FORT WAYNE WORKS

NEWS

Volume 32 — FORT WAYNE, INDIANA, FRIDAY, JANUARY 7, 1949 — No. 1

This span of life was lent for lofty duties, not for selfishness; not to be whiled away in aimless dreams, but to improve ourselves and serve mankind.

—Aubrey DeVere

BOUND BY THE KALMBACHER BOOKBINDING CO., TOLEDO, OHIO

Dismantle 10 Ton Crane For Transport To Danville

Two fork trucks are shown above placing the hig crane on a highway transport truck.

A 10-ton electric crane, with 40-foot span and cab control, was hauled by truck recently from the Broadway Plant to the Danville, Ill., Plant.

The project was accomplished by Plant Engineering to provide heavy overhead crane facilities for sheet steel storage at the Danville Plant. The crane was no longer in use here because of a change of occupancy in Bldg. 24.

Many Changes Made

The crane span was shortened to 38 feet by removing a two-foot piece out of the girder at a point inboard from the end and welding the remaining pieces. This was done to retain the use of the specially blacksmithed ends of the girders.

The crane was also rewired to

G-E Cited For J-47 Jet Engine

Divisions Contribute To Establishment Of World Speed Record

WASHINGTON, D. C. — entical awards for contrib-ing to the establishment of world speed record of more an 670 miles per hour by jet fighter plane were arded to the Air Force, rth American Aviation mpany, and the General ctric Company here.

The triplicate awards were pre-ted by the National Aeronautic sociation for the Federation ronautique Internationale, offic-l international society for all onautical record trials. The Air ce received the award for spon-ng and conducting the record-shing flight; North American Av ation for designing and build-ing the F-86 jet fight and Gen-eral Electric for d ning and p ducing the plan esi engine, th TG-190 or J-47.

E. S. Thompson, manager of les of the G-E Aircraft Gas Tur-as Divisions at Lynn, Mass., ere the J-47 jet engines are produced, received the award for General Electric.

Hits 670 MPH

The certificate of award indicates that the F-86 flight, "re-

Must Make Reservations Today For Elex Meetings

Today is the last day to make reservations for the Elex meetings to be held Thursday, Jan. 13, for both the day and night girls. Tickets are $1 and can be obtained from contact girls.

Kathryn Turney Garten will review the book "Abigail Adams" at each meeting. There will be attendance prizes of books autographed by Mrs. Garten given at each review.

Luncheon will be served for the night girls at 12 noon at the Y.W.C.A., while dinner will be served for the day girls from 4:45 until 6 p.m. at the G-E Club.

Company Prepays Half Of Five-Year Bank Loans

The Company has prepaid half of $50,000,000 of five-year bank loans, chiefly to depository banks in cities where there are G-E plants and sales offices, President Charles E. Wilson has announced.

The $25,000,000 prepayment, Mr. Wilson stated, is part of a $200,000,000 financing program undertaken two years ago to cover additional cash needed for the increasing volume of business, losses resulting from the nine-week strike in early 1946, and the post-war plant modernization and expansion program.

Of the borrowings, $150,000,000 was obtained on 20-year promissory notes from 14 investors—11 insurance companies and three trustees—at an interest rate of 2.55 per cent. Banks supplied the remaining $50,000,000 at an interest rate of 1.652 per cent, with the privilege of prepayment on 30 days' notice.

The Company used half of the sum borrowed to repay $100,000,000 short-term bank loans secured under a line of credit established in May, 1946.

In announcing the partial repayment of bank loans, Mr. Wilson

Apparatus Revises Its Price Policy

A change in the year-old price protection policy of General Electric's Apparatus Department, reducing the amount its contract prices can be increased from 20 to 10 percent, effective Dec. 27, has been announced by W. V. O'Brien, general sales manager.

The new 10 percent ceiling applies to all apparatus lines except for large power transformers above 15,000 kvs, waterwheel generators, and synchronous condensors, effective Dec. 27.

Mr. O'Brien also announced an increase of approximately five percent in the price of motors rated 50 hp and above, and a 10 percent increase for large turbine generators rated 20,000 kilowatts and above.

"These adjustments are necessitated by increased manufacturing costs in these particular lines," Mr. O'Brien said.

Mr. O'Brien said that the 20 percent limitation on price increases established last December has been regarded as successful in keeping prices of G-E apparatus as low as possible relative to cost. He added: "We are reducing the ceiling to 10 per cent in the in-

General Committee Grants Additional MBA Benefits

Members of the Mutual Benefit Association were granted additional benefits by the General Committee of the MBA at its meeting Friday, Dec. 31.

Changes include the following:

Payments for hospital extras on both the employee and dependent plans have been increased from up to $15 to $20.

Surgical maximum benefits for employees have been hiked from up to $150 to $175 and for dependents, from up to $112.50 to $131.25.

Children under 12 years of age formerly received up to $3 for hospital room and board, but will now be given up to $5, the same as other dependents.

Supervisors To Install New Officers

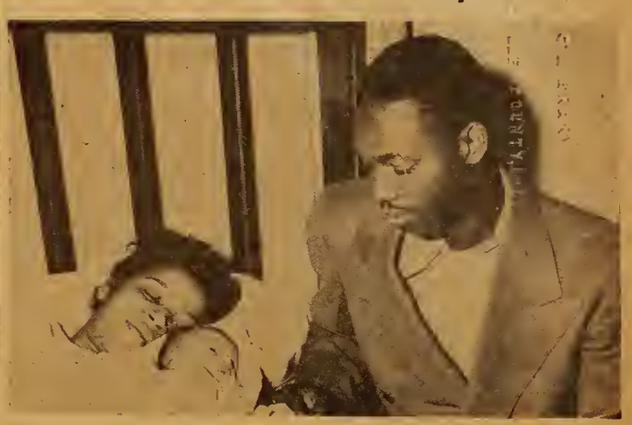
ADMINISTRATORS ELECT RINEHART TO PRESIDENCY

The Supervisors' Club will install its new officers Monday, Jan. 10, at a meeting in the Squares' club.

Elected to office recently by the Board of Administrators were:

President—I. D. Rinehart, Bldg. 8-2.

Vice President—W. H. Crouse, Bldg. 26-4.



Secretary—Hubert Meyer, Taylor St.

Treasurer—A. S. Johnson, Bldg. 18-1.

[illegible] Dean of the College of Business Administration at Lehigh University, will be the main speaker, following the installation and a short business meeting.

A buffet lunch, refreshments and cards will conclude the meeting.

Pace Wins First Place In New Year Baby Race

Mr. and Mrs. John Pace, above, look proudly upon the new addition to their family, the first baby born in Fort Wayne this year.

The stork's first visit of the New Year made Mrs. John Pace, wife of an employee in Bldg. 26-1, the city's first new mother of 1949 at 2:04 a.m. in the Methodist Hospital.

Eric Wesley tipped the scales at 6 pounds, 7¾ ounces.

Mr. Pace has been an employee of the General Electric Company for six years and was at the Winter St. Plant before coming to Bldg. 26-1 three months ago. He served in the armed forces for three years.

The Paces have another [illegible] who was born Jan. 20, 194[illegible]

Curiosity Often Brings New Contributions To Mankind

Probably the most valuable quality with which a youngster begins life is curiosity.

If he faces all situations with a question mark in his eye or on his tongue, he should go far and contribute something to the well-being of mankind.

Nothing is now being done as well as it could be done. Less than a hundred men in a million can be expected to raise a doubt about anything. The mass takes life as it finds it.

Occasionally a man comes along who wants to know why a thing is done a particular way, or why it is done at all. For a whole generation conductors laboriously collected fares from street-car passengers. Then someone thought of the fare box.

Butter was scooped from a tub until someone thought of the pound brick, and later someone thought of dividing the brick into four sections.

Whatever we may be doing, there is a chance for improving the way we are doing it. Opportunities lie close at hand, in every shop, office, and home.

Current Standard Of Living Owes Much To Mighty Midget

Sixty years ago the kilowatt hour wasn't included in the vocabulary of the average man. Today folks who wouldn't know one if they could see it, talk as glibly about kilowatt hours as they did about the price of kerosene oil in 1878. But do they realize that the current American standard of living owes more to the powerful influence of this unit of electrical [illegible] than to any other single force? Why? Because [illegible] increase in the amount of [illegible] the United States, industry has been [illegible] to a high state of efficiency, to a plane where it can produce quality products at prices ordinary people can afford to pay.

Truly a mighty midget this kilowatt hour, this unseen unit which by the minute measures off the units of power which make America great.

Let statesmen thunder, let politicians promise, but let nothing interfere with our mighty midget . . . the kilowatt hour.

It's A Fact That 'Never In A Million Years' . . . .

WILL those toes of yours be safe, while a pair of safety shoes you're going to buy some day, stays on the shelf in the store!

WILL you ever be safe on your job, until you learn to follow the reasonable rules set up on a basis of years of sound safety practices!

WILL you wife ever think you're anything but a careless guy if you keep coming home with a tied-up finger or a couple of bent toes!

WILL your children be proud of you, if you keep on being known by other children's fathers as the chap who is always getting hurt on the job!

WILL the boss give you the breaks, when a better job is in sight, if you can't keep your fingers out of the iodine bottle in the Works Hospital!

WILL the world be safe for the rest of us until all the fools are six feet underground or in places where they make a specialty of caring for them! . . . and that would be UTOPIA!

Battle Of Ideas Keeps Business Ever Growing To New Heights

Business is a battle of ideas. That is one reason WHY we have a Suggestion System. New ideas keep business ever on top, ever searching for the Better Way, ever growing to newer heights. A business gone sterile on ideas is on the rocks regardless of how many adding machines it operates.

Changes come swiftly when ideas flow freely and the thoughts of men intermingle for the common good. Let us hear your ideas and suggestions.

WE NEVER MISS THE WATER TIL....

WHAT'S NEW IN PLANTS & LABS

SAN FRANCISCO—The entire cost of installation of G-E floodlights for Witter Field at Piedmont was borne by the high school's student body, aided by Jean C. Witter, father of former football captain, Jean, Jr. The school recently held its first night game. This is the third school field in the East Bay area to be equipped with the G-E L-69 sports light, the same as those used at the Yankee and Briggs stadiums. G-E's Lynn River Works manufactures the equipment.

BRIDGEPORT — To facilitate installation of rectangular cabinet-style electric water heaters under continuous kitchen counter tops, two models have been added to its line, the range and water heater divisions announces—a 30 and a 40-gallon model, both having the same outside dimensions. They can be installed under any counter that is 36 inches high or higher.

CLEVELAND—A new 75-watt R-30 spot lamp (reflector 3¾ inches in diameter), and a new flood lamp of the same size, designed to meet the demand for smaller, lower wattage lamps, have been announced by the Lamp Department. The new lamps have a rated life of 1,000 burning hours.

CHESTER, PA. — Powered by G-E steam turbines and gears and with two G-E turbine generator sets for auxiliary power, the first of 48 new 12,500 horsepower "supertankers," with a speed of 16 knots, the S. S. Esso Zurich was launched here at the Sun Shipbuilding and Dry Dock Co. yard.

Two new television receivers have been added, including the lowest-price television console yet announced by the company. The console (Model 811) has a 10-inch picture tube. The table set (Model 814) has a 12-inch aluminum-backed picture tube. Both are equipped with the G-E automatic clarifier and automatic stabilization circuit which controls picture synchronization and enhances picture detail. A separate circuit for each of the 12 broadcast channels makes possible the reception of any station in the broadcast service area by merely turning a rotary switch to the desired channel.

LYNN RIVER—The first installation of the world's largest street lights, 25,000-lumen giants 21 inches in diameter and nearly a yard high, was officially dedicated recently in Akron, O. Manufactured for use with lamps rated as high as 1500 watts, 65 of the huge Form 108 luminaries are located along five blocks of the main street. About 180 fixtures will comprise the entire installation. The Form 108 luminaires were designed by the G-E Illuminating laboratory here for applications requiring more than two and one-half foot candles and can be used with the highest output lamps.

SCHENECTADY—High-pitched sound from a one-inch-long whistle that is focused to a point by an ordinary headlight reflector can perform such stunts as cause cotton to burn and bits of cork to float in mid-air. Fashioned in the General Engineering and Consulting Laboratory, the small hollow tube, activated by compressed air blowing across its mouth, is used to examine the peculiar properties of "ultra-sonics," sounds pitched above the 17,000 beats a second the human ear is able to hear. Cork particles, placed directly above the focal point of sound having a frequency of about 25,000 beats a second, remain suspended one-half wavelength apart in a ladder-style formation. Cotton held at the focal point, agitated by the unheard sound, will smoulder. A tiny piston inside the tube allows adjustment of the pitch.

The OLD PHILOSOPHER *Says:*

The other day the man who ta[kes] care of the tools came in for [a] visit and to leave a plea that fo[lks] be more careful with tools they use at work. "You know," he said, "There's a lot of money going out the window every day because folks are just plain thoughtless about using tools."

"Just what do you mean," I asked, "for after all you know I only use a typewriter and a pencil. Monkey wrenches aren't in my line."

"Well, here's an easy one," sai[d] the tool man. "Take screwdriver[s] for example. Lots of folks use them for pinch bars and chisels. Hammers too get used for funny things and wrenches, say you ought to see some that come back to the tool crib. You'd think they'd been through a war."

"You know," continued the tool man, "the tools we use every day help us make our living, just as much as our two hands and [we] wouldn't think of letting our ha[nds] get hurt, would we?"

And with those few words [the] tool man left the room and I turned to sharpen my pencil.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q: What is "fool's gold?"

A: This name is commonly appl[ied] to pyrite, a mineral consist[ing] mainly of iron sulfide, wh[ich] contains 53.4% sulfur [and] 46.6% iron. Having a meta[llic] luster and a pale brassy-yel[low] color, it has often been [mis]taken by inexperienced per[sons] for gold. It is rarely used [as a] source of iron, but it is so[me]times employed as a source [of] sulfur in making sulfuric a[cid].

Q: At what altitudes are su[per]chargers used on airplane [en]gines?

A: There are two kinds of su[per]chargers, one being oper[ated] by gearing from the en[gine]. The other is the turbosu[per]charger driven by exhaust g[as] as that pass through a turb[ine]. Most engines have both. [The] geared supercharger is opera[ted] continually, while the tur[bo] supercharger is generally [used] as well at altitudes of 1[0,000] feet or more. Thus, it compr[es]es the rarefied gases of the atmosphere and feeds them to the engine at sea-level pressure, enabling it to yield its full power.

LaVine Appointed Assistant General Foreman Of Div. 15

J. W. LaVine

J. W. LaVine has been appointed Assistant General Foreman of FHP Motor Division 15.

Mr. LaVine began his General Electric career in 1929 as an apprentice machinist-toolmaker. Upon his graduation he was assigned to the FHP Motor Division as a machinist in Bldg. 4-3. Since 1934 he has been a foreman in various sections of the Fractional Horsepower Divisions. The latest position before his recent promotion, was Foreman of the Tool Room in Bldg. 4-2.

He is married and has two boys. The LaVines live on a farm east of Fort Wayne.

G-E Cited

(Continued from Page 1)

rded by registered instruments d otherwise carried out in acrdance with official rules and gulations governing record trials, s been recognized as an official ord, and has been entered on record lists of the Federation ronautique Internationale."

iloted by Maj. Richard L. Johnn, the F-86 established the new rld's speed record of 670.981 les per hour at the Muroc Air rce Base on Sept. 15. The previ- record mark of 650.796 miles hour was set Aug. 25, 1947, by rine Lt. Col. Marion E. Carl in ouglas D-558 Skystreak, highed Navy Research plane.

he presentation was made by d Crawford, president of the Foundation and of Thompson ducts, Inc. The award was ed by Louis E. Leverone, NAA ident and by Roger W. Kahn, ident of FAI.

he award was made at the an- Aero Club dinner meeting at Statler hotel. The Aero Club branch of the National Aeroic Association.

Produced at Lynn

apable of producing approxiely 10,000 horsepower at the p speed of the new planes being uilt for its application, the J-47 as been in production at the G-E et center in Lynn, Mass., for more than a year.

The engine is a greatly advanced development of the Company's axial-flow TG-180 or J-35 jet engine, which is the powerplant of 10 different types of military jet-propelled fighters and bombers, including the Douglas Skystreak.

Improve Design

Although having approximately the same frame size as the J-35, the J-47 has many design improvements, a greater thrust rating, and is substantially the same weight as the former unit. Compared with the slightly more than 4,000 pounds thrust developed by the J-35, the new engine has 25 per cent more power, according to the Air Force.

Future development of the G-E jet, according to engineers, promises to increase its rating to 6,000 pounds thrust.

Production of the new engine is expected to increase greatly this year with the opening of a former wartime plant in Lockland, O., for the assembly and test of the G-E turbojet.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

Is anyone interested in learning how to weave? If so, see Solona Hunter, Vivian Smith or Roedean Dowell, girls of the Service Bureau. . . . Does anyone want an introduction to Polly Pappert? She is in the Drafting Division, isn't she Ralph? . . . Congratulations to Mildred Fettinger for her large suggestion award. Besides her suggestion award, she played Bingo last Wednesday and won $41. Isn't that enough money to win in one week, Mildred? . . . Mr. Starke now has a Test Engineer working with him. Mr. Scanlon will be with Mr. Starke for a few weeks. . . . We are very sorry to hear Herb Driftmeyer is ill. He is in the hospital due to a heart attack, and his condition is still serious. . . . Louis Pooler was found pounding on the drums the other night at the Chatterbox. Take it easy, Louis, that drum was not a transformer! . . . We understand that Chet Krasienko received a couple pairs of flashy socks for Christmas. "This is fair warning" to have your colored glasses ready! Remember his tie? . . . Gail Doolittle must certainly intend to be a different person in 1949. You should have seen her making out copies of her New Year's Resolutions. There were so many sheets that they covered Mr. Harvey's table completely. . . . Did anyone visit the Knoll's home during the Holidays? Just how many were there, George? . . . Helen Brindle is quite an expert in making date pudding. The men have really made a fuss over it. Helen, did you know the best way to a man's heart is through his stomach?

Apparatus Revises

(Continued from Page 1)

terests of stabilizing prices and encouraging the continuation and fulfillment of expansion programs underway throughout industry. Any price reduction made in the future would, of course, become effective immediately on orders on the books."

Company Prepays

(Continued from Page 1)

said that the Company's cash requirements have now passed their peak, pointing out that the possibility of prepayment of the remaining bank indebtedness would be influenced by such things as the nature of future corporate taxes and any developments which would increase operating costs.

Two years ago when the loans were announced by Mr. Wilson he said:

"The Company's current business volume is running at more than twice the prewar rate. In addition there was a drain on working capital during the nine-week strike because no shipments could be made from our factories and as a consequence receipts from regular commercial transactions were limited. Our cash outlay remained at a high level despite the strike. For one thing, we were anxious to accumulate such raw materials as we could in order to be ready to go into production as soon as the strike ended. The strike not only cost the Company and labor vast sums which can never be recovered, but this drain on working capital resulted in the necessity for borrowing earlier and in larger amount than might otherwise have been the case."

E. J. Horstman, New Supervisor Of Procedures

E. J. Horstman

E. J. Horstman has been appointed Supervisor of Procedures of the Specialty Transformer and Ballast Divisions, it was announced this week.

Mr. Horstman joined the General Electric Company in 1922 as an apprentice. In 1926 he was assigned to cost work in the FHP Motor Divisions, and two years later he transferred to the planning section. He was made Supervisor of Order Service, FHP Motor Divisions, in 1938.

The following year he did production methods work under A. J. Rose, and in 1942 was appointed Supervisor of Production Methods in the Fractional Horsepower Divisions. Prior to his recent appointment he worked for E. F. Waldschmidt, who was, at that time, Supervisor of Procedures for the Works.

He is married and has two boys and one girl. The Horstman family resides at 2431 Thompson Ave.

So this is 1949! The arrival of January brings to mind, along with the Christmas bills, that the State of Indiana will also help manage our finances before the 30th. For some the 15th is the deadline for filing adjusted estimates on 1948 to Uncle Sam and for the rest of us March 15, looms in the near future. The rules and forms are different this year, so don't wait until the zero hour to file your reports. Those are words of wisdom!

Most Embarrassing Moment

Last week Estel Monroe, Bldg. 18-1, was a little embarrassed. She rushed out the door to catch the "special." Imagine her embarrassment when the white gloves she picked up turned out to be white bobbie socks. . . . Harold Janes, son of H. G. Kappel, Data Bureau, was home from the University of Miami, Coral Gables, Fla., for the holidays. He had as his house guest, Jantje Johanna Knul, a native of Holland who is also a student at the University. . . . Barbara Meyer, Bldg. 18-4, was in "Life With Father" at the Civic Theatre. After the patience Mrs. Meyers had with Barbara and her "props, lines and practice" we think the title should he "Life With Mother." . . . It is nice to have Annabell Redding, Bldg. 18-4, back after a serious throat infection. Joe Hambrock and Herman Volmerding, both of Bldg. 18-4, have been ill. . . . Fonda Cook, Data Bureau, claims to have had the best Christmas. Her son came home from Pearl Harbor on a leave. . . . Last week Ed Hagadorn, Blueprint Sec., did his Boy Scout deed. He rushed around at noon cashing checks for his fellow workers. The only thing wrong—when he returned he found that he forgot to cash his own check. . . . Bernice London leaves this week to live in South Bend. She will be missed by her friends in Bldg. 18-5. . . . Everything seems to be normal again at the home of the Paul Mullers (Betty to you from Bldg. 18-4). The new slip covers are on, the walls painted and everything, "pretty as a picture." . . . Virginia Worden and Verneal Meyer, Bldg. 18-4, are always so neat and attractive, so now the secret can be told. They are both good seamstresses, which is quite an asset these days. . . . Goldie Archbold, Bldg. 18-5, thinks that it is expensive to dance at the Prom Terrace. She said it cost her $15 to dance there last week.

Progress Delayed

Bob Hawkins reports that his boy got three trains for Christmas which may explain why progress on his house is slow. He says he needs time and fair weather; we think he is spending the time playing with the trains. . . . The Old Year is past history and we all have high hopes for the new year ahead. Let us all work toward making our dream of a peaceful world come true.

If people are to continue to inhabit the earth, they will have to learn to tolerate people, whether they like them or not.

Vosburgh Is Named Ass't. Supervisor, General Planning

E. J. Vosburgh

E. J. Vosburgh has been appointed Assistant Supervisor of General Planning with specific responsibility for Manufacturing Development projects of the Fractional Horsepower Motor Divisions.

With the Company since 1929, Mr. Vosburgh's first position was in the FHP Manufacturing Standards Division, working for L. D. Hodell. He then had several planning assignments throughout the divisions, and was made Supervisor of Planning in Bldg. 4-3 in 1936. The following year he became Supervisor of Planning in Bldg. 4-5. Since May, 1948, Mr. Vosburgh has been the Staff Assistant coordinating all manufacturing activities for new products for the FHP Motor Divisions.

Mr. Vosburgh is married and has one daughter. They reside at 4721 Beaver Ave.

10-Ton Crane

(Continued from Page 1)

provide pendant, push button control at floor level, in which the push button box moves with the load hook.

After floor assembly of the altered crane and test of the electrical controls, the crane required only disassembly in order to transport by truck in the form of two girders, two trucks and one combined carriage with control panel.

Two Trucks Used

In the picture, the first bridge girder with attached catwalk and bridge drive has just been deposited on the truck by two fork trucks. Later the second bridge girder was placed on the far side of the truck to balance the load. Then chains secured the load and highway permits covering weight and length were acquired before commencing the 175-mile journey.

The combined carriage and panel followed on a second truck.

At its destination the truck was placed directly under the hoisting gear that lifted the crane onto the runway, without unloading the truck and rehandling the crane parts.

The entire moving procedure was radically different than that which would have been used even 10 years ago—a real testimony to the advances in the art of material handling since that time.

S. T. A. B. BALLASTS Products

A representative line of ballasts and fluorescent lamps they operate is shown above. From top to bottom are: one of the new terminal-board ballasts and a slimline fluorescent tube, a 100 watt ballast and corresponding lamp, a 40 watt ballast and corresponding lamp, and a 20 watt ballast and corresponding lamp.

(Editor's Note—This is the first in a series of stories featuring the products of the Specialty Transformer and Ballast Divisions.)

"A new line of leadless, terminal-board ballasts for slimline fluorescent lamps has been announced by General Electric's Specialty Transformer and Ballast Divisions."

This news release appeared recently in a number of technical publications and trade papers. Most of you, probably, did not have an opportunity to see it. But, as a member of the great G-E family, you may want to know what G-E produces and why.

Our story concerns ballasts. The word "ballast" may be unfamiliar to you. If so, you might ask, "What are they?" "What are they used for?" "By whom?"

Let's start with the fluorescent lamp. About 10 years ago, scientists developed a fluorescent tube filled with mercury-vapor gas which, when a current of electricity was passed through it, would glow and produce light. The only trouble was that the gas-filled tube offered no resistance to the current flow and the lamp would burn out instantaneously. (In an ordinary incandescent bulb, the fine filament wire checks the current flow.) Thus, something had to be added to the circuit of the fluorescent lamp in order to hold down the current and allow the lamp to burn for a long time. This "something" was a ballast unit. The ballast was so named because, in a sense, it balances the fluorescent lamp in the circuit.

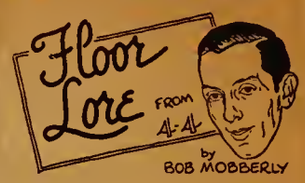
In low-wattage fluorescents, the hallast simply opposes or reacts against the current and is therefore composed of a reactor (a transformer-like core and coil) mounted with necessary lead wires. In larger lamps a higher starting voltage is needed, so other units are built into the ballast to supplement the basic reactor. And so, the size of the ballast depends on the size of the fluorescent lamp.

Every fluorescent lamp, regardless of size, must have a ballast connected to it in order to operate. Therefore, everybody who uses a fluorescent lamp, uses a ballast. And that's where Fort Wayne's Specialty Transformer and Ballast Divisions come into the picture as the largest manufacturer of ballasts in the world.

But, let's go back and explain these new terminal-board ballasts. Ever since the advent of fluorescent lighting, all ballasts have been manufactured with lead wires extending from the case. This meant that the manufacturer of fluorescent fixtures wasted a lot of time and labor splicing the ballasts' leads to the lamp leads. That's why General Electric has designed a ballast which replaces the conventional wire leads with terminal boards. Thus, the fixture manufacturer can connect the lamp leads directly to the ballast case with the aid of nothing more than a screwdriver, just as you connect a new plug to an extension cord!

The Specialty Transformer and Ballast Divisions are especially proud to have contributed this advancement in design to the fluorescent lighting industry. Although they are at present being made only for a few of the higher ratings, it is felt that industry-demand will in the future allow the S. T. A. B. Divisions to enlarge the program to include nearly all sizes of ballasts.

What's that? You say this all may be so, but you've still never seen a ballast? Well, next time you buy a fluorescent light fixture, floor lamp, or table lamp, look in the base, and there you'll find our hidden friend, the ballast. In fact, it would be a good idea to look before you buy, and be sure that it's a G-E ballast!



If you are feeling low and need a good laugh, ask Harold Bonker the definition of a cow puncher. On second thought maybe Lorena Buuck could tell you too. Her boyfriend is here from the Lone Star state. That accounts for the big smile. . . . It's June in January as far as Marge Kennel and Blanch Mountz are concerned. Both are walking high above the ground. Third finger, left hand will tell you why. . . . It's a welcome to Guy Johnson. Also to Harold Frazer who replaces Al (Afraid of Sadie Hawkin's Day) Mueller. Now we have to help Harold with all those stators that decide to stray. We're sorry to see you go, Al. While we are on the subject of losing people, we will surely miss Bob Griffin. Our loss is Taylor Street's gain. . . . Jay Rippe is also leaving us for school. Don't forget the red apple for teacher, Jay. . . . Does anyone know who Joe Jensen's helper is? It is reported his name is Bob. . . . Maude Goodrich has joined the early bird risers. Glad to see you back on first. . . . We can just imagine how Pauline Gnau felt when she picked up the paper and saw the headlines "Fire at the Bon Ton Laundry." She was one of the unlucky persons to lose her laundry. . . . Happy birthday to Mildred Huntine. May you have many more. . . . Madalyn Briggs had her machine moved. Now she won't have to buy roller skates. . . . P.S. Is everybody still keeping their New Year's resolutions?

Apprentice BROADCAST

By Eugene Werling

Happy New Year! That greeting has tried to get into print for two weeks but due to the length of the holiday issues was omitted. . . . By now the usual array of resolutions have been broken and already those for next year have begun. Zurbuch tells us that the easiest resolution to keep is to quit smoking. He's quit hundreds of times. . . . McNulty resolved to keep his shoes on at all times. Mac was very pleased when the mailman brought him a parcel containing his Sunday shoes. Mac thanks his buddies from Bldg. 19-4 for sending his shoes back. . . . Everyone recuperated very rapidly from New Year parties, at least by Monday. The Bob (Errol) Barnes' did some entertaining about 2:30 A.M. or were they entertained? Bob is going to be an electrician since he is so good at finding burned out bulbs on the not to be forgotten tree decorations. . . . Most of the draftsmen celebrated New Year's at different parties and all had a good time. A few of the gang did get together but dawn was about to break and this time at the Frank Woenkers. Frank is really getting to be some host. Is Frank crowding out "Boogie Beat" Skeeter Lahrman? After telephoning Leffers for about one and a half hours John finally answered and accepted Frank's invitation. John was delayed because he had the key to "Vets" building. The Birkenbeuls, Leffers, Skeets, Joe and Joan claimed the party as a success. . . . Bob Finton claims he had quite, or a quiet, New Year's. (What's better than sleep?) The Fred Bortons spent a quiet evening at the cinema. . . . This year is the one most draftsmen have been waiting for. Before '49 leaves they will be graduates of the Apprentice School and working toward a new way of life. They will do well because fellows with such spirit never lose. Lots of luck in '49. . . . Don Macke was very successful in his first attempt on the stage. The stage is the WORKS NEWS. You autograph hounds had better bring your own pencils for Don to use because Millie's supply is depleted. . . . Dick Gebert tells us he is going into the valve making business. It seems as thou Dick wants a valve that is tur off when first used. "This," says, "should replace the conv ventional type." Dick shows favorites, oil and water alike.

Our first observation of the new year concerns the modern song writer. For example the character responsible for the song hit "A Slow Boat to China," can be diagnosed in one basic English word: NUTS! Anyone wanting to be in China these days, regardless whether it was via a slow boat or by any means of transportation can have it. . . . Bert Brown, we understand, has received a suggestion to use his file as a necktie! Perhaps it would be a novel idea, Bert! . . . Anyone having anything to sell, contact Ruth Barnes or Edith Venrick! . . . Leon Radamaker feels that the New Year got off to a wonderful start, after he realized a week's vacation and all the ice fishing he desired. From now on "Rody" will be all smiles. . . . The question of the week: If corn is $1 a bushel and pigs are 20 cents a pound, why is it that you can't make money? Honk, honk, or should we say, Tonk, tonk, Lloyd Runyon? . . . Belated happy birthdays to Ruth Gongaware and Ruth Barnes. . . . Apparently Bill Putt acquires a different name at each Christmas season. Since, however, we are still in a benevolent mood we won't disclose the latest name Dorothy Swank gave him! . . . Pappy Vogel's small boy came home from a Christmas party very upset. When asked what was wrong, the little fellow, between tears, explained he had been ing to get his daddy on the te phone without any success. Pa asked his son what number he h been dialing and the lad gave h their HOUSE NUMBER. . . . (parting thought: "The measure a man's real character is what would do if he knew he would ne be found out."

The size of your troubles g erally depends on whether they coming or going.

Hartman Brothers Have A Total Of 135 Years

Seated in the above picture are the four Hartman Brothers who have nearly 135 years service with General Electric. Left to right are George, Al, Clarence and Joe Hartman.

The Hartman brothers have a total of approximately 135 years service with the Company.

Joe, who has the longest service, began working for G-E in 1903 as an apprentice machinist. He left in 1905 and returned in 1912 when he was placed on ice test. During this time Joe helped test the first No. 1 ice machine—a forerunner of the modern refrigerators. Three years later he went to work for W. N. (Billy) Wehrs, and since 1916 he has worked in the General Tool Division.

Clarence began his service with G-E in 1907 as a machinist apprentice. After his graduation from the apprentice school, he was assigned to the tool room. Since 1918 Clarence has been with the Fractional Horsepower Motor Divisions, serving in various positions such as Assistant Foreman, Foreman and General Foreman. In 1946 he went to the DeKalb, Ill plant as a General Foreman, and then was transferred two weeks ago to Fort Wayne, where is is now located at the Taylor St. Plant.

Chairman and Secretary of the Works Suggestion System, Al began his G-E career in 1916 doing production correspondence and requisition work in the FHP Motor Division. Since 1927 he was a foreman in Bldg. 17-3, General Foreman in Bldg. 19-5, and an Assistant General Foreman in FHP Div. 17 at Taylor St. Al received his latest appointment to the Suggestion System in 1947.

The last brother to join the ranks of the General Electric family is George, who has been working in the General Tool Division since 1926.

hold the fishermen, Don as and Jess Doersole and they came into work the next ing, the truth was not in Jess caught 23 and Thomas cording to their stories. Closer tigation brought the truth to —they didn't go fishing! They stick with their stories and stuck with them too. . . . 30 more working weeks 'till on is here again. Pleasant ht, isn't it? . . . Clara Gehays, "Even if the carfare has up, we are only charging 10 a ride in our new car. . . . the second shift "What we like in '49": Charlie Hunt, er;" Paul Schlie, "A new of bolts;" Kenny Ford, skates;" Morrie Snyder, "A carpenters to get my house Cliff Imbody, "A little less Purl Hite, "Some stilts;" Bennett, "More fish, less ," Charles Crain, "A portable jet job!" . . . Floyd Benot only had the New Year ebrate but also his birthday. happy returns, Sandy. Cy ur, Charlie Crankshaw, Otto ler, John James and Mel Azar celebrated this week. In fact, day is Mel's birthday. Over the eek-end Al Walchle and Mr. Hanon will also celebrate. Best wishes om all the gang. . . . Our conratulations to Mel Azar for winning fourth place in the Christmas ghting Contest.

Partizan Chapter Plans Card Party

The Partizan Chapter of Elex will hold a card party, to which the public is invited, Thursday, Jan. 27, at 8 p.m. in the St. Paul's Hall, corner of Barr and Madison.

Talleys can be obtained for 50 cents each from Irene Meyers' office at Broadway or Ceal Romary's office, Taylor St. There will be attendance and table prizes for the evening. Those attending the party are requested to bring their own cards.

Chairman of the card party is Martha Zehender.

Fractional Fiction 4-5

By Elaine Sutter

We all wonder how many of us will keep those New Year's resolutions. . . . Since Roy Woods got a new Nash for Christmas he either rides the bus or with someone to work. . . . Lynn Crawford's coworkers want to know why he hasn't done any ice fishing? . . . Gene Berg is looking forward to a good tracking snow so he can go rabbit hunting. . . . Congratulations to Joe Shricker, Crystal Waterman and Wava Aughenbaugh who celebrated their wedding anniversaries. Wava received a beautiful orchid from her husband. . . . K.C. line wishes to welcome their new union stewardesses, Crystal Waterman and Lois Waterson for the coming year. They also thank sy George and Velva Smith for their good work for 1948. . . . Dorothy Pokrywka is spending a week in Philadelphia. . . . Glad to see Mada Candle back to work. She was ill for a couple of days. . . . We do need more news. We cannot get it without your help, your daily experiences and good nature. Let us all do better in the coming year. . . . We welcome Dorothy Klug back. She has been ill for several weeks.

Most wives will listen to reason but they hate to hear the same one too often.

The wax figures in the store windows are beautiful but dummies.

Thisa and Thata

SPECIALTY MOTOR

By Helen Engle

To start the New Year right, we want to wish Fern Painter, Thelma Fenstermaker, and Bessie Potts happy birthday. . . . Anyone wanting to know how to make anti-freeze see Ed Robin. . . . The lucky winners at a recent party were Frieda Knoche who carried home a bushel basket of groceries. I should say Clarence carried it home. Alva Foulks won one also. Henry Grepke's son won two chickens; Lorena Hahn won a chicken and yours truly carried home a ham. . . . Our heartfelt sympathy to Robert Blee whose father died recently. . . . Grace Ober and her husband are starting the new year right. On the first they got a ticket for reckless driving and on the second they got a ticket for over-parking in front of their own home. . . . Hazel Stauffer is also starting the new year right. She was to bring some fruit salad and forgot all about it until she got to work. . . . Here are the finals on the awards that were made Friday afternoon, Dec. 31 in 1x10. Messrs. Mettler, Korte, Knoll, Prince and Roehm were all present at the presentation and enjoyed it. Bob Black was the M. C. The first prize went to Howard Hamilton, and the runners-up were George Marchan and Russel Rose. "Ham" didn't know whether to accept the honor at first or not. The first prize was a very pretty engraved goblet. The runners-up received cards wishing them better luck next time. . . . Happy birthday to Willard Smith and Floyd Steinbacher. . . . The boys in Bldg. 4-3 test would like to find out when W. Schmidt will get that door of his to do what he wants it to do. Give us a tip, Schmidt, when it will be. . . . Wonder if Emory Tucker turned his alarm clock back one hour the other morning so he wouldn't have to get up so early? . . . Two lucky fellows in 1948 were Raymond Snyder and Al Rebber. Raymond got the prize for throwing the most stuff and Al got the money. . . . They say that Raph Gelbert and Florian Korte had their picture taken at Tommy's the other day. . . . Gilbert Walker was working the other day when all at once he left his wrench in the air and started north. Did you forget something, Gilbert? . . . We were all very sorry to hear about Gail Stauffer dying in an auto accident. Gail worked in Bldgs. 19-4 and 19-5 a few years ago and had many friends at the G-E. . . . Ray O'Brien is ready for that house-warming now. Ray has oil heat in his new home, so everybody bring one gallon of fuel oil.

Evidently Santa forgot to bring Herb Koch any cigars this year or maybe he is waiting until we forget all about Christmas before he springs them on us. . . . Marilyn Rhoem is still passing Christmas candy, only it is mints and not chocolates, thank goodness. . . . Laurel Weaver swears that from now on someone else will get the supplies from the stock room. The door is tricky; it has a bad habit of locking from the outside. . . . Being a country dweller with a 10 mile ride every morning I have the opportunity to, as the radio announcer says, "To study my weather," only with me it is the stars that I study. On cold clear mornings they are beautful, especially the very large one in the east. I am sure it is just a little brighter at this time of year, as though it were trying to tell the world that it is celebrating the birth of Christ. If any of you happen to be up that early just turn your face eastward and take a good look at that star, I am sure you will feel like a different person after watching it twinkle.

Elex Club To Journey To Chicago Jan. 15 For Sonja Henie Show

The train for the Elex Club's Chicago trip to the Sonja Henie Ice Show will leave the Pennsylvania Station, Saturday, Jan. 15, at 8 a.m. Arriving in Chicago at approximately 10:45 a.m., the girls will have free time until 7:15 p.m. At that time they are to meet at the Union Station, where there will be special buses to the arena.

Immediately after the show, the girls attending the show are to board buses marked "Elex" for transportation back to the depot. Tickets for the show will be distributed on the train, and everyone is to have her receipt.

Although the trip has been a sell-out, there are still a few tickets available for the trip.

Gene Werling Writes 'Apprentice Broadcast'

The Division Editor of the Week is Gene Werling, who writes the "Apprentice Broadcast."

Gene began his General Electric career in 1942 doing repair work in the Transformer Division, Bldg. 26-4. In 1943 he took a leave of absence to serve in the Army three years. Gene first entered the Army Air Corps and then the A.S.T.P. program, being assigned to Wayne University in Detroit. When the A.S.T.P. was discontinued, he saw overseas duty with the 96th Infantry Division.

He returned to General Electric after his discharge in early 1946, and since September has been a machinist-toolmaker apprentice.

Being interested in all sports, Gene now plays basketball with the apprentice team of the Interdivision League. Reporting is not new for Gene. During his high school days, he was a sports writer and reporter for the "Maroon and White" at Concordia.

Gene handles all the reporting work in the Apprentice School. He has assigned Joe Rowan to be the reporter for the apprentice-draftsmen who are located in various divisions.

R. W. Bischoff Dies Saturday

Ralph W. Bischoff, former Fort Wayne resident, died Saturday, Jan. 1, at the St. Joseph Hospital in Kokomo.

Mr. Bischoff worked at the Fort Wayne Works from 1934 until 1945, when he was transferred to the Kokomo Plant. He was a foreman prior to the closing of the Kokomo plant.

Surviving are his widow, Mildred; four daughters, Donna, Karen, Fonda and Janice, Kokomo, his mother, Mrs. Ora Farrell; and four brothers, Hugo, William and Gordon, Fort Wayne and Melvin witb the U. S. Navy.

Last rites were held at 10 a.m. Wednesday, Jan. 5, at the Rich Funeral Home in Kokomo. Burial was in Crown Point.

Motor-Generator Static

Thought for the week, "Use no reproachful language against any one, neither curse nor revile."

Orchids to the folks in Bldg. 19-1. Each year this group remembers its pensioners with appropriate Christmas greetings. The pensioners are Harry Knatz, Robert Ormiston, John Overholt, George Schacher, Mathias Smith, William McClish, Charles Brown, and Charles Johnson. Nice work, gang, such thoughtful little things can bring a lot of happiness to people. . . . Mary Ellen Nies of Bldg. 19-1 attended the New Year's Ball at Norwalk, O. . . . The Motor-Generator group received a nice letter of appreciation from the Christ Doenges family for the Christmas remembrance sent them. . . . Ed Homan, Bldg. 31-1, was in a dither the day before New Year's. Ed's day was filled with things like lighting a cigarette, laying it down lighted, lighting another and jumping up to answer the phone on another desk when his phone rang. Perhaps he was thinking up the resolutions he intended making that night. . . . Cecile Hinton, matron of Bldg. 31, thanks the girls for their beautiful gift. . . . This writer is one of the folks in Fort Wayne who stayed home New Year's Eve and enjoyed a quiet evening. Tuned our radio to the police band and found that other places were also keeping their law enforcement personnel occupied that night. One western station was issuing orders for a squad car to quiet a man riding a borse and shooting a gun. Seems the old days of the wild west are still here. . . . A resolution Ed Foley should have made New Year's was "not to start another American Greek Society." If the powers of suggestion and psychology work according to form this writer may open a Greek restaurant in a few weeks. Every day as we come in the west gate, Big John, president of Ed's organization, greets us with "Hello, You Greek. How you, Greek." This has been going on so long we are afraid our thoughts and actions are becoming Greek in form. Of course, our reply to John's greeting is, "Hello, you Irishman," said in the hope of changing his thinking, but so far the results are discouraging. He seems to like it.

Ramblings in Bldg. 31-2

Remember Jean Horn, ex-engineer's assistant? Jean and her husband announced the arrival of a 6 pound 14 ounce boy, Ted Allen, Dec. 20. . . . It's a boy, too, for Mr. and Mrs. Lester Schowe. Richard John, was born Dec. 27. . . . Speaking of new arrivals, we have a new girl in our Commercial Section. She is Thelma Williams from Kokomo. Hope she enjoys working here. . . . What does a guy do when he remembers a dinner date just as he finishes his supper at home? McDougal gave us the answer—he just ate another dinner. "Mac" must have a few Scotch ancestors. . . . If you saw Ray Atkinson and Mark Smith sheepishly fixing a mail box out in "Hazelbrush" recently, don't give them any credit for being philanthropists. Ray backed his car a little too far, coming out of Smith's driveway. Mark disclaimed any responsibility, but Ray claims that it wouldn't have happened if the driveway wasn't so curved. . . . "Necessity is the mother of invention." Sometimes engineers do more work on a labor-saving gimmick than the gadget will ever save. The latest example is Phil Pott's electric eye garage door opener. Think of the fun he'll have flicking the headlights, and watching the door go up and down. Phil, won't the door operate when the sun comes up? That's a little early in the morning for you. . . . We wonder what the engineers had to drink the day before New Ye... Some of them were actually w... ing the windows. There were M... Baker, Claude Penn, Ty Sch... man and Hodge Vineyard ... buckets and wash rags. Just ... what Fred Eisenbiegler missed ... hear he took a week off to ge... gaged—poor fellow.

Lillian Huhn Retires

When Lillian Huhn, Bldg. 26-1, left for retirement on the Company's Pension Plan, several of her friends gathered to say "So long." In the above picture, which was taken at the time she received a gift from her friends, are left to right: Johnnie McMaken, Lillian Huhn, Minnie Prumm, William Edmunds, and Rudy Jackson.

Bernard Steinacker Dies In Hospital

Bernard Steinacker, 80, 3014 South Hanna St., died at 1:30 p.m. Saturday, Jan. 1, at St. Joseph Hospital.

Ill for seven weeks, he had been a patient at the hospital for one week. Retired from General Electric 10 years ago, Mr. Steinacker began his employ with the Company in 1923 as a blacksmith. At the time of his retirement, in 1938, he was a helper in Bldg. 4-3.

He was a member of St. Peter's Catholic Church and its Holy Name Society.

Surviving are his widow, Louisa; a daughter, Mrs. Irma Uhrick; two sons, Raymond and Erwin, Flint, Mich.; three brothers, Frank, Henry and Edward; and three grandchildren.

Funeral services were held at 8:30 a.m. Tuesday, in the Mungovan and Sons Mortuary and at 9 a.m. in St. Peter's Church. The Very Rev. John Bapst officiated and burial was in the Catholic Cemetery.

Open New Lamp Plant In Ohio

Opening of a new plant at Circleville, O., for the manufacture of slimline fluorescent lamps was announced in Cleveland by the Lamp Department.

Costing approximately $2,500,000, the plant when in full operation will employ approxima... persons, of whom 80 per ... be women.

Slimline lamps six and eig... long, but only one inch in di... will be produced by the Circ... Lamp Works, one of 43 fac... being operated by the Lamp ... partment. The new plant is a ... story factory building with ne... 200,000 square feet of floor sp... and a two-story office building...

Two Receive Certificates For 30 Years Of Service

Mildred Carpenter, Bldg. 4-3, and Edward Farrell, Bldg. 4-4, both of FHP Motor Div. 1, recently celebrated their 30th anniversaries with the General Electric. At that time several friends offered their congratulations to each.

In the picture on the left are, left to right: Victor Jacobs, O. J. Mettler, FHP Motor Div. 1 Supt.; Mr. Farrell, Florian Korte, Edward Robin, George Prince, and Merland Heller.

Shown in the right photograph are, front row, Esther Pape, Mrs. Carpenter and Daisy Ford. In the back row are Lester Franke, George Prince, Florian Korte, O. J. Mettler, FHP Div. 1 Supt., and Fred Castor.

One evening while driving around looking at the Christmas displays throughout the city, I asked myself where else but the U.S.A. could you find such a sight. The beautiful decorations and trees that will this week find their way to the city dump. Do we really appreciate our resources, the things we have that the "have-nots" would like to take away from us. I could go on and on but neither time nor space would permit. Now that the New Year is here, let's all try to be more cheerful, more considerate of the other fellow. How much more you will get in return for a cheerful smile and a pleasant word. . . . Cigars last week were from Clarence F. Myers when he and the Mrs. almost received a Christmas present in the birth of an 8 pound, 4 ounce daughter, Coleen, born Monday, Dec. 27. Congratulations and best wishes. . . . Dale Chaney has named his twins Tommy Lee and Bonnie Jean. . . . Why Russ Deveny has to make so much noise on the lathe to attract attention I don't know, when he could get lots more attention by joining the Saw Breakers Club like Ray Matthews did. . . . After Paul Boedeker went fishing last week and came in with such a fine catch story, neither rain nor thaw could keep Louie Watt at home the next night. From all reports it was a rough night on the lake but Louie came home with the fish just the same. When Paul brought in the sack of bones for Louie, it was Louie who had the last laugh. . . . Again last week the firemen were called on to do their best to save water damage and again they came through in fine shape. When it comes to wading in you have to hand it to Claude Gill. . . . Anyone wishing to buy tickets for the Shrine Circus should see Harold Whonsetler as he has tickets at bargain prices. Give him a 20-dollar bill and he will give you $2.23 change. . . . The Tools bowling team won first half in the Small Motor league. That's why Matthews and Boedeker were greeting each other as "champ." . . . It only took three deals for Paul Jones and Howard McMaken to win the right to own the little burlap bag for the striped kitty Monday noon. . . . Ward Staley, Sr., vacationed last week, and is reported to have spent most of his time at his favorite pastime of ice fishing.

We decply regret the death of Harry Odel, our General Foreman on first shift, and a loyal friend. We extend our sympathy to his relatives and many fricnds. . . . You have, no doubt, noted the change in supervision which has taken place recently. "Pop" Luebke is getting to be a familiar figure around here on first shift with Art Everett starting his day at 3:30. . . . Willard Burgess is the lucky guy. He spent Christmas week in Orlando, Fla., visiting his folks. . . . Anyone wanting any dope on the "horses" see Les Laible. (He should know—he talks to 'em.) . . . All Chuck Campbell can say to fathers who bought their kids electric trains, is, "It's a lie!" (The kids haven't a chance.) . . . It has been rumored that Andy Frank doesn't care for the new way of disposing of Christmas ties. They seem to be wearing them short this year, Andy, especially if you happen to be in the Standardizing Section. . . . According to Harold Fanning "There's no place like home." You may have picked the wrong season for that trip to Kansas, Harold. . . . Can you imagine anyone forgetting it's his vacation and coming to work on Monday morning? I bet you hate yourself for that, Talmage Sparks. . . . Raymond Kreigh is makin' with the fancy stuff since he dabbles in sheetmetal work. . . . Say, Lee Miller, the boys are sure raisin' a fuss because you used all those wooden plugs in the water mains. Leaks have been springing all over the place. . . . Sim Faurote would like to have his friends know tbat he is not taking any 'phone calls between 7 and 8 Sunday nights. He is holding the line open for the Stop The Music Program. Sim says he has the right answer—all he needs is the call. . . . "Mousie" Miller is sure glad he took that lead out of his cart. He's really makin' time now, isn't he, Howard? . . . A happy birthday to Mary Hooper, Art Everett and Erma Cumming.

It Takes Two . . . .

. . . . THE EMPLOYEE AND THE COMPANY WITH A SINGLE AIM—ACCIDENT PREVENTION—TO MAINTAIN GOOD SAFETY RECORDS FOR INDIVIDUALS AND SUBSEQUENTLY GROUPS OF INDIVIDUALS.

To illustrate this point we are fortunate to have the help of ELMER WELDY, FRACTIONAL HP MOTOR DIV. 19, shown in the above picture operating an air press. Elmer has approximately 27 years of service and he has never had a lost time accident. To keep his hand from being injured by the descending ram, "A", the press is equipped with a guard, "B", which must move across the point where his right hand is shown in the picture before he can operate the trip valve which causes the ram, "A", to descend.

Yes, the Company provided this guard which has proven to be a good one and has been in use for approximately 15 years. But let's consider what Elmer does and has done for many years for his personal safety. HE GRASPS THE PIECE SO THAT HIS FINGERS WILL NOT BE UNDER THE RAM. HE DOESN'T TAKE CHANCES WITH HIS FINGERS. HE HAS THE SAME CONSIDERATION FOR HIS EYES—HE IS WEARING SAFETY GOGGLES. HE ALSO WEARS SAFETY SHOES.

HERSCHEL L. SMITH
Safety Engineer

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Here it is the start of a new year, and everyone has resolutions to do better in the coming year. . . . Gerald Crum thanks George Horner for the 12 pound ham he received for Christmas, only it was a bit woody. . . . Lawrence Hosack received a little Christmas spirit from the boys. . . . Naturally Bob Bunyan and Mary Keiler exchanged gifts. Bob received a necktie and Mary a box of candy. Why don't you give the guy a break, Mary? . . . Bill Edmunds has resolved that he will only use office chairs with four sturdy legs. Last week he got all mussed up as the result of a chair leg breaking and sending him rolling across the office floor. . . . Bob Bunyan has become a top salesman. He is selling those new plastic "seldom refill" lighters. For a demonstration see Roe Ormiston. . . . The boys were getting a travelogue of Florida as Bill Conrad has just come back from there. He says he likes the Indiana women better than the ones in Florida. . . . Jim Stauffer is now checking all the office chairs for safety. He doesn't want to roll across the floor like Edmunds. . . . We see that Ed Parker is taking up barbering. Ed sure was getting a lot of practice on his co-workers one day. . . . Things were sure popping the day before New Years, were't they, Eddie Kaliker? . . . Chappy said he was going to get a bicycle as his car won't run in rainy weather. . . . Sherm Miller went up to get his driver's license. The girl there told him he couldn't get one without his tax receipts and that the law for tricycle operators needing licenses hasn't been passed yet. . . . We hear from a little owl that Mary Kieler has become a member of the "Night Owl Club." Mary, there is no change in the working schedule we start at 7 o'clock not 9 remember? . . . We express our sympathy to Joseph Ort upon the deatb of his father.

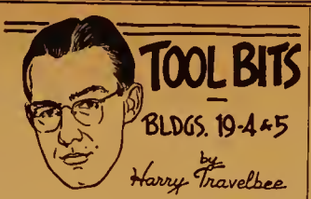
Now that the holidays are over we will tell what fun Mr. Schuman's winders had at their Christmas party. Everyone got a kick out of the surprise gift exchange, especially Dorothy Whan. What did you receive, Porter? Wanda O'Malley took pictures of us all evening. They were really swell pictures, especially that of Dan Reiulle. Peggy Reynolds and Garnet Curie took some sleepy lagoon poses. . . . Anyone in the winding section who needs help, yell for "Bubbles." Ernie Clark will know who you mean. . . . If anyone has seen a large Santa walking down Broadway the day before Christmas he probably swore off drinking then and there. If they looked behind the picture they would have seen Lonnie Rockstroh carrying it. . . . Hap King, did Santa bring you that snazzy hat you're wearing to work now? . . . We are a little late in wishing Velma Rose a happy birthday. . . . Garnet Curie has left us for second trick and Lois Bailey came on first trick. . . . Les Parrish is a grandpa now. He says he does feel a bit older. . . . Dorothy Linsky received two wax front teeth for singing "All I Want for Christmas is My Two Front Teetb." Peggy Reynolds even did better; she received a whole plate of wax teeth for singing it. . . . When Irma Z. went in the wash room to wash her hands for lunch Thursday she came out with her hair dripping wet. Now come Irma and tell us the truth was it a water bottle, or was it the nice finger wave that Millie Strickler gave you at noon?



"The hard part of making good is that you must do it over every day."

Now that the final pages of the Book 1948 are closed, we find ourselves given to an opportunity which comes but few times to each of us. It is that chance we say we've been waiting for. It's time to start with a clean slate and heart. If each one would make just one resolution, to live so there is peace within his heart and with his neighbor, in his own little world, the great world without might also be won to peace. . . . Our sympathy to Helen Bilskie in the recent death of a relative. . . . Personnel is proud of their Charlie Wilt who was recently appointed manager of the G-E Club. . . . The Elex girls are really in there. Over 500 tickets have been sold for the Sonja Henie show at Chicago next week. The new DanGE girls (Danville G-E Elex Club) will join the Fort Wayne Works girls at Chicago. We know you girls are in for a wonderful time. . . . We're glad to see the several people who have been off for illness the past few weeks back to work. Hope the flu bug flew. . . . The "Floridan" Herschel Smith and his family are home after an exciting week in Florida. Of course, the fish stories, etc., are too numerous to tell, but he evidently spent the week dreaming up fantastic stories to breeze around at work. We're glad you had such a swell time, Herschel. . . . The Bldg. 8-2 girls and the Employment Office girls thank Veora Habig and Bob Hodell, respectively for the fine parties given at the Christmas season. . . . Our very best wishes to our matron in Bldg. 8-2 who married during the Yuletide. We wish you much happiness, Audrey. . . . Jeanne and Jack Newton do some fancy getting around with their new convertible. They go out of town nearly every weekend. . . . Mr. Stauffer is definitely an outdoor man. He tosses those 400 pound blocks around at his new house like they were baseballs. But it hasn't been long ago he was seen with a cramped walking position. His back was in a twist, caused from too much writing. . . . Val Miller and family were glad to have his mother from St. Louis with them recently. . . . I guess there's no real significance to the fact that Herschel Smith's wife and his secretary both have Dec. 31 as birthdays. (Boy, this column really gets you into family troubles, doesn't it, Uncle Herschel?) . . . It was great to see Warren Locker again. . . . The Employment Office says they're glad to have Mae Mulvane back after a leave of absence; Imo Jean Schwartz after her trip to Seattle, Wash., and Alta Bishop and Dr. Garton after their vacations. . . . Mrs. Schrader tells us she has gained a son-in-law. It's a good attitude; she feels this way instead of feeling that she has lost a daughter. . . . We wish a speedy recovery to Mr. Beer's son who underwent a minor operation last week. I guess we should also wisb Mr. Beer likewise, that is unless his smashed toe is already healed to perfection. . . . And, Minnie, you won't mind if we borrow one of the clever little lines will you? It was seen at your desk and we like it: "Even the best family tree has its sap."

Art Archer, who has been working in our rotor section, has left to take a position in the postal service, having passed the civil service examination for railway mail clerk. He will be stationed at the local post office a few weeks before taking a road job. We wish him all the luck in the world in his new venture. . . . John Weber was telling us recently about the abundance of rabbits on his place. He said that whenever he wanted rabbit, all he had to do was knock one over in a very few minutes. When one of his co-workers asked permission to come to his place and hunt, John told him that the rabbit population had decreased to almost nothing as the dogs got busy and ate them all up. Pretty flimsy excuse, we think. . . . Shades of the late W. C. Fields Herman Doehrman appeared with a fiery red swollen beezer. It seems that he has a small boil brewing upon that member. Herman said that it was anything but funny and we agree with him but he sure put us in mind of the late Fields. . . . Clarence Stove had the misfortune to knock himself out the other day. He claimed that he bumped his head on a conveyor. We don't believe this, as he is short in stature and can easily walk under our lowest conveyor. If he did bump his head he must have jumped a little to do so. We since have learned the truth of it all. Clarence was sitting in bed the other evening reading when suddenly the ceiling gave way giving him a terrific bump. . . . Ed Stute and Frank Blotkamp, our self styled euchre champions, took it on the chin the other day. They were brought to their knees by Emanuel Miller and Archie Boren who played as brilliant a game as we ever saw. Ed and Frank are now going around giving excuses as to why they lost. . . . O. J. "Fuzz" Meyers received a new French horn for Christmas and is as joyous over it as a child. All he wants to do at home is toot the blasted thing, driving the family to distraction.

Ferd Kramer says that the bluegills and crappies were really biting Saturday on Little Long Lake. In fact, he caught his limit. . . . John Ebert thinks that micrometers should be made of more durable material since the pair he was using tangled with the cutter in his machine. . . . We are sorry to hear that George Spitler has been ordered to bed by his doctor. We hope it is nothing serious and that he will be back soon. . . . Have you noticed that swanky grey job that Gus Wiedleman was wearing on his head Monday. . . . We don't like to mention it, but the flashy blue T-shirt that John Stetler is wearing this week looks a little tight. Either the laundry used the wrong soap and shrank it, or he borrowed it from his son. . . . Do ice fishermen wear sun glasses that have a tendency to magnify. Not that I doubt the word of Cliff Dunten, but he has been telling some very interesting fish stories about those nice nine inch bluegills that he catches. Why doesn't your wife fry a skillet full and bring them to work so we can taste as well as see them, Cliff?

Bldg. 19-4 Bench

They tell me that Herb Mennewisch prayed for a white Christmas and got six inches of rain? From all reports there was enough water in Ed Shafenacker's section to float Herb's 14-foot rowboat. . . . Bob Truelove tells us that if at any time your wife won't let you out, just contact Joe Mettler and Mart Walsh. He claims they will get you out even if they have to buy her candy. . . . We congratulate Elmer Sauerwein on the nice big Christmas tree he put up this year, but I think Elmer could have found a shorter one so he wouldn't have had to cut a hole in the floor. . . . That new pick-up truck in our parking lot is Al Devaux's new farm runabout. . . . It seems that the cobwebs in Dale Romey's attic must have gotten in his eyes, judging from the hole in his living room ceiling. He blames it on the toy garage he built for his son. . . . Paul Brinkroeger always slips an extra holiday in this time of the year, by celebrating his 15th wedding anniversary last week. . . . Lowell Welker thought he had a new muffler on last week only to find it was one of his Christmas ties. He showed us that it could be used for a bow tie, belt or ear muffs.

Second Shift

Jim Harris found out that a thermos bottle of coffee will break if dropped on the floor, even though it has a metal shell. Maybe a rubber coating will help the new one bounce. . . . Harry VanDiver spent New Year's Eve at Defiance, O. with an old friend, Charlie Hoff. . . . Wilbur Lane has acquired a new nickname of "Puddles" from some of his close friend. The whole story hasn't come out yet. Could it be that he fell in while ice fishing?

Why is it that the guy who's the life of the party on his night out is usually such a grouch at home?

AD-LETS

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, January 10, 1949

BROADWAY LOST AND FOUND

LOST—Two keys in leather case. Lost in parking lot back of Bldg. 12.

FOUND—Man's tie clasp with American Legion emblem on it. Found on steps of Bldg. 18.

LOST—Ronson cigarette lighter. Lost at G-E Squares New Year's Eve dance.

LOST—Fuschia and white earring. Lost in McCulloch Park.

TAYLOR ST. LOST AND FOUND

LOST—Shrine pin with three diamond sets.

FOUND—Man's wrist watch in the west parking lot.

FOUND—Brown leather tobacco pouch.

FOR SALE

DINING ROOM TABLE—And chairs, buffet. Will sell separately. A-75442.

EARLY AMERICAN MAPLE VANITY—Bench; maple butterfly table. Excellent condition. A-68042.

FOR RENT

SLEEPING ROOM—With twin beds. Gentleman preferred. Breakfast if desired. H-19742 after 6 p.m.

TRANSPORTATION

RIDE WANTED—Jack Heiniger, from Blue Lake or Churubusco. Works in Bldg. 6-4, from 8-5, Churubusco 3301.

RIDE WANTED—Carol Shoff and M. J. Wyant, from the end of West Main St. Works in Bldg. 4-5 from 7-3:30. A-67571.

RIDE WANTED—Ferne Runyan, from 330 N. Walnut St., Columbia City. Works in Bldg. 6-2, from 8-5:15. Columbia City 349-R.

RIDE WANTED—Dorothy Long, from Columbia City to Broadway plant. Works from 8-5:15. Columbia City, 3038J.

RIDERS WANTED—Ella Staver, from North Manchester or along state roads 14 or 114. Works in Bldg. 4-3 for W. Wickliffe from 7-3:30.

It's Windy Here

FHP Motor Division 17 Office

by Pat Dolan

Did everyone have a good time New Year's eve? I know you did. At least there were a lot of plans being made Friday for parties, etc. . . . Gordon Smith, Kenny Sheehan, and Charlie Gable went ice fishing the other day and guess what happened? Gordon lost his car keys. I would imagine that it would be very, very cold waiting out in the wind and cold, for someone to find a key. I guess the fellas are going to get him an extra set of keys in case he loses the other one. Charlie is having a time proving just how many fish he did catch. There seems to be some differences about it. . . . The girls in the Cost Section had a little theater party for Roberta Martin and Betty Truman. They took them to see "Paleface," and from the sound of things the show was a riot. I would be willing to bet that they will be talking about it for weeks. . . . This will probably be my last week of writing this column. If it is I want to be sure and thank you for all your help. You were really wonderful, and I enjoyed every minute I spent writing for you. It has been a wonderful experience. It is kinda hard saying goodbye, but then "Life Gets Tedious, Doesn't It?"

The secret of success in conversation is to be able to disagree without being disagreeable.

Everyone in 10-20-30 Frame must have wanted the New Year to start off right as they all reported for work last Monday bright and early. From the looks of them they welcomed the New Year very quietly, or was it since we ushered Santa Claus in so noisily that we didn't have pep left for the New Year? . . . Ed Brockall, the fisherman, and Virginia Johnson, have returned after a week's illness. . . . Kenny Brown and Earl Fredericks have returned from their third week's vacation. Brownie said he didn't do much as his children had the measles. . . . Clarabelle Castle must have a mind like an elephant. She wonders if a certain person made New Year's resolutions "to return tools he borrows." . . . Who saw Ralph Keller at the G-E Christmas party going through the gift line for the second time. We have proof, Ralph. . . . We are sorry we are late, Jessie, but better late than never. Congratulations to Jessie Cleveland on her engagement. Have you noticed the beautiful diamond she is wearing? . . . Ruth Cavender has been having trouble with her car. Why doesn't she borrow Velma Reiter's magic candle. We hear it does a lot of things, such as light the candle and the lights go out all over the house. . . . I wish that certain girl and Rose Cuny would give me a little help writing this column. They say they are getting tired of reading about the same people. Just a little help, girls, and we'll get some new names just for two of you. . . . Sarah Pulfer must have been eating strawberries, because she sure has a print of two on her neck. . . . Betty Ann Carsten sure did a good job of entertaining the girls at the Christmas party she had. Besides being a good entertainer, we all found out Betty Ann makes a very good housewife and is a wonderful baker. Anyone wanting proof ask Jackie Elder, Peggy Bandt, Irene Schafer, Leanore Nohlcheck or Clarabelle Castle. . . . Bob Heinzelmann started the new year off all wrong. He came to work Monday and left his wife Dorothy home. Did he forget she still works here? . . . We wonder if Ed Saxton enjoyed the chicken he won bowling. The least he could have done was brought us the feathers. . . . Charley Engle informed everyone that he took down his Merry Christmas sign early this year. . . . Too bad Ellen Saul's foot is sore but that's all right because she walks on them. Next time, Herb, take your shoes off when you are talking to a lady.

Was a time when gals used to drop merely a stitch. Now most of them have dropped knitting altogether.

"Never attempt to bear more than one kind of trouble at a time. Some people try to bear three kinds—all they have had, all they now have, and all they expect to have."

Archie Evans and George Miller are not hard to locate these days. Those loud plaid shirts can be seen for quite a distance. . . . Gertrude Moss was made happy at Christmas upon receiving a nice big doll. Such a big girl for a doll but it's the kind that decorates the bed. . . . Have you noticed the change in Ray Grotian? He's a Deacon now. . . . Bob Scheulke is the new safety man in the tool room for the coming year. . . . We extend our sympathy to Bob Kerr in the recent death of his sister. . . . There were three in one group who had the flu last week. They were Hazel Herrick, Paul Bender and Ed Meyer. All seem to have recovered at this writing. . . . Barbara Wilson spent Christmas week-end at her home in Kentucky. . . . Herb Winters has joined the group in 16-17. Group 16-15 says no wonder their pool is so high. . . . Harold Hohman wonders what scares the fish away. It seems that Harold goes fishless summer and winter. . . . Lena Shaw played Santa Claus the day before Christmas and placed a pretty greeting at each one's place before we came to work. . . . Just a little suggestion in closing—why don't each one of you in Bldg. 17-2 consider himself a reporter and give us at least one news item a week? Many of your names do not appear because we often get the news too late or someone just failed to hand in the news. This favor would be greatly appreciated. Thanks.

We have been asked many times in the past week if Vaughn Sheets has taken up Bull Fighting. That red sweater he is wearing is really something. After a very confidential interview with Vaughn he says it could be but they are not the four legged type. . . . It looks like Bill Rohe has taken over the city's contract for the hauling of cans and garbage by the looks of his car last Friday night. Cans everywhere. Oh! yes, and he still has some worms left over from last year's fishing trips in the trunk of his car. Of course, they are slightly frozen, but no doubt cold be defrosted and used for catching blind robins. . . . Cleo Crowe and his wife spent Christmas week in Florida. . . . It makes no difference to Jess Easterday whether he works one hour or 12. Jess still gets hungry and carries his dinner bucket every day. At least, that's what Jess did the day before Christmas. . . . Happy birthday, Harry Beltz. . . . Who plays more than the children with the toys received Christmas than Porky Schoenefeld and Bill Irwin. Bill Irwin is looking for a tricycle next Christmas. . . . It gets very chilly falling in the lake at this time of year, don't you think, Joe Connett, or are you used to it by now? . . . Ralph Hoover, don't count your chickens before they are hatched, and don't believe everything you hear. That guy hasn't turned those eggs for weeks.

Let's Eat!

CAFETERIA and RESTAURANT MENUS

JANUARY 10 THROUGH JANUARY 14

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant—16-2 12:00 M. - 1:00 P.M.

MONDAY, JANUARY 10

Cream of Tomato Soup	Split Pea Soup
Roast Pork and Dressing	Roast Beef and Dressing
Italian Spaghetti	Ham and Limas
Beef Barbecue Sandwiches	Pork Barbecue Sandwiches
Whole Browned Potatoes	Steamed Potatoes
Fried Apples	Buttered Broccoli
Buttered Turnips	Buttered Hominy

TUESDAY, JANUARY 11

Chili Soup	Beef Barley Soup
Roast Beef	Breaded Pork Loin
Fried Liver	Chicken a la King on Biscuit
Bacon and Tomato Sandwiches	Hot Roast Beef Sandwiches
Mashed Potatoes	Escalloped Potatoes
French Fried Onion Rings	Buttered Peas
Creamed Green Beans	Harvard Beets
Buttered Beets	

WEDNESDAY, JANUARY 12

Vegetable Soup	Chicken Noodle Soup
Pork Chops	Smoked Sausage
Beef Pot Pie	Veal Chop Suey
Chopped Beef Sandwiches	Chili
Mashed Potatoes	Ham Sandwiches
Buttered Whole Kernel Corn	Whole Browned Potatoes
Buttered Cabbage	Escalloped Corn
	Buttered Asparagus

THURSDAY, JANUARY 13

Cream of Potato Soup	Cream of Celery Soup
Swiss Steak	Swiss Steak
Wieners and Kraut	Creole Spaghetti
Ham Salad Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Whipped Potatoes
Buttered Carrots	Buttered Green Beans
Creamed Peas	Buttered Cauliflower

FRIDAY, JANUARY 14

Oyster Stew	Bean Soup
French Fried Fish	French Fried Potatoes
Baked Ham	Macaroni and Cheese
Hot Roast Beef Sandwiches	Baked Ham
Escalloped Potatoes	Chopped Beef Sandwiches
Buttered Wax Beans	Whipped Potatoes
Buttered Hominy	Buttered Spinach
	Succotash

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.
Menus Subject to Change

Inquiring Reporter

WHAT FEATURES OR NEWS IN THE WORKS NEWS DO YOU ENJOY MOST?

EDWIN E. PARKER
Bldg. 24

"I like the sports page. Having played for several years on different teams at the local plant, I like to follow the division and interdivision teams in all of the different sports at the factory."

MARIE HUMMEL
Bldg. 4-4

"My first interest in the WORKS NEWS is the writing concerning my own division. The articles which appear on Page 2 are also very interesting."

WAYNE EDINGTON
Taylor St., Central Cost

"Next to the local news from Taylor St., I enjoy reading the cartoon 'Out Our Way' most."

ARTHUR L. BEAR
Taylor St., Sec. 14x5

"I enjoy the Science Section of the WORKS NEWS because it is both educational and entertaining."

ADELE KUCKUCK
Taylor St., Sec. 13-80

"I enjoy the comments in the WORKS NEWS by all the different writers, because in this way you keep in touch with your co-workers."

Although the day before New Year's was quiet in Bldg. 4-6, our New Year "1949" arrived with much ado. We have all made our resolutions and will no doubt try hard to live up to them through the promising year ahead. . . . New Year's Day ice-fishing was well under way. Orland Foltz, Bob Starkel, Harold Buck and Glenn Willits all were reported to have had a good catch. . . . We welcome Ralph Obringer back to the AC Div. . . . We are also glad to see Joe Hiles back after a short illness, and hope that he is back to his normal "peppy" state once more. . . . Bill Rutledge is now with the 101st Airborne Division in Uncle Sam's Army. He left us Dec. 28 and now we are patiently awaiting a picture of Bill in his uniform. . . . We welcome Warren Berkheiser to the DC Div. Warren was formerly at Winter Street before coming here. . . . Congratulations to Ed Whipple! He is the proud father of a new 7½ pound son, John Allen, born Tuesday, Dec. 28. . . . Delores Giltz is a very lucky fisherwoman. Last Monday night she caught seven whoppers at Blue Lake. She was the 48th lantern on the lake, so maybe that is the lucky number. . . . We were happy to see Mrs. Richard Kilian and Mrs. Harry Balz at the D.C. Div. Christmas party. . . . The Dev. Div. welcomes John Rhodes, rotating engineer, who is working in Larry Wightman's group. This is John's third assignment. He was formerly at Winter St. and in Motor-Generator. . . . F. Cooper, Service Engineering, cleaned out his desk so he could start the new year right. The process of disposing of different forms proved to be rather trying since all the members of the section were anxious to get their share and were all wondering whether there would be enough for all. . . . We all agree that Reba Coppock has a very pretty green and white checked apron, but we really didn't expect her to wear it in the office. . . . Celeste Moran of the Production Section received a diamond ring Christmas Eve. The lucky man is Henry (Hank) Schnelker. . . . Nelda Welsh and her family spent Christmas with relatives in Schenectady. . . . John Spencer, Purchasing, is enjoying the third week of his vacation just resting here and in Toledo at his daugbters. . . . We wish Dorothy Bolons, Production, and Bob Knepple, DC Div., happy birthdays.

As we begin the New Year we should keep in mind the Golden Rule, and we all will be much happier. . . . We wish a lot of happiness to Mary Ray, who will say "I Do" tomorrow. . . . Our friend Louie DeVoe can't understand why Fay Emerson Roosevelt gets her name in the papers, when she gets a scratch, and he had a mole removed and no one even noticed it. . . . We hear Johnny Wilson was all dressed up for New Year's eve, and nothing happened. . . . Walt Neimeyer's wife sent him to the store to purchase several articles for their New Year's party and he came home with only soda water. What happened, Walt? . . . Who had more fun than Marie Wickelman the day before Christmas? . . . We have noticed Janet Hire has been walking in the clouds; could it be the beautiful "furs" she received for Christmas? . . . Buster Kissinger received a box of frozen fish from Cleon Oyer, who is on vacation. . . . Theron Kitchen can do the barnyard two-step very well. He stepped in a pile of fresh cement and then really two-stepped. . . . Ruth Dannecker sent Gus Weisenburger a little note marked "Greetings" last week. Gus wasn't too happy about the little notation under the attached note. How come, Gus? . . . Happy birthday to Mable Thompson, Sophia Bodigan, and Tom Harber. . . . Our deepest sympathy to Mr. Witham in the death of his father.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Looks like everyone is too busy with holiday activities for much news, but we did find a few New Year's resolutions. Carleton Peters: To tell at least one good story. Ray Horstman: To stop all horseplay. Tom McClure: To catch all the fish in Crane Lake. George March: To always keep my hair combed. Kenneth Wills: To shave every morning. Frank Schlink: To eat hamburgers for lunch every day. John Winstel: To stay out of Kip's Barbecue Shop. Dick Beck: To spit farther and wider. Eleanor Sarnecki: To get to work on time. Homer Hibler: To eat an onion a day. Pete Scotton: To whistle only songs requested by Frank Bitsberger. Russ Prince: To get more of Buck Buchan's "Old Grandpappy." Glen Baker: To try to get along better with the southern colonel. Joe Hofer: To buy a new whistle. Don Fox: To move to town or buy two cars. . . . We're sorry to hear of Maurice Archbod's illness. Hope we'll soon see him on the job again. . . . Happy birthday to Luther Abner, Eileen Gault, Florence Hindman, Edwin Lepper, Russel Miller and Carl Weigman.

Bldg. 19-3

Neoma Klaehn came to work after Christmas with a beautiful sparkler on the proper finger. Our best wishes and congratulations to the lucky man. . . . Frankie Enderle, one hardy perennial, broke into the headlines again. Frankie was mixed up in an affair of chivalry on Broadway Christmas Eve. Not having any personal interest he held the victim's coat, a gracious gesture, while aforesaid victim had both eyes blackened. "Anyhow," to quote F. E., "the girls were on our side." Attention, Homer Hibler, please check with Enderle for full details. . . . Russell Neireiter was worried one day when Ernie Lindley visited Bldg. 19-3. . . . Frank Elder was the recipient of a pretty gift from his fellow workers the day before Christmas. "It was very nice," said Frank, "but I don't believe I'll hang it on the Christmas tree." Howard Musselman also received a gift from the gang; a box of quarter cigars—the other three-quarters had already been smoked.

May Use Betatron To Produce X-Rays For Medical Research

SCHENECTADY, N. Y.—A 50-million volt betatron to produce high-energy X-rays that may have value in cancer treatment was announced here today in the General Electric Research Laboratory. The new device, weighing about eight tons, is a compact version of the 135-ton hundred million-volt betatron which has been in use here for several years in atomic research.

According to Dr. Ernest E. Charlton, head of the X-ray Section of the Laboratory, research shows that radiation of 50 million volts will penetrate into the body more deeply and effectively than those of lower voltage.

A machine of this size may be mounted on trunnions so the beam may be directed toward the patient at any desired angle, something hardly feasible with the 135-ton betatron.

Medical Uses Unknown

No medical experiments have yet been made with the 50,000,000-volt device and none are now planned, declared Dr. Charlton. "This is hardly within our province," he said, "but we hope that properly qualified medical scientists will explore the possibilities of these radiations which are now available." He added, however, that the new betatron will be used in connection with a program to be conducted with the support of the Atomic Energy Commission by the Biology Department of Union College in Schenectady, N. Y., studying the effects of high-energy radiation on living organisms.

This is the fourth betatron built in the G-E Research Laboratory. The first, of 20,000,000 volts, was loaned to the University of Illinois. Second was the 135-ton giant, and then came a 10,000,000-volt machine to produce penetrating X-rays for industrial inspection. In addition, a second 50,000,000-volt betatron is being built in the Company's General Engineering and Consuling Laboratory, with Research Laboratory assistance, for the National Bureau of Standards in Washington.

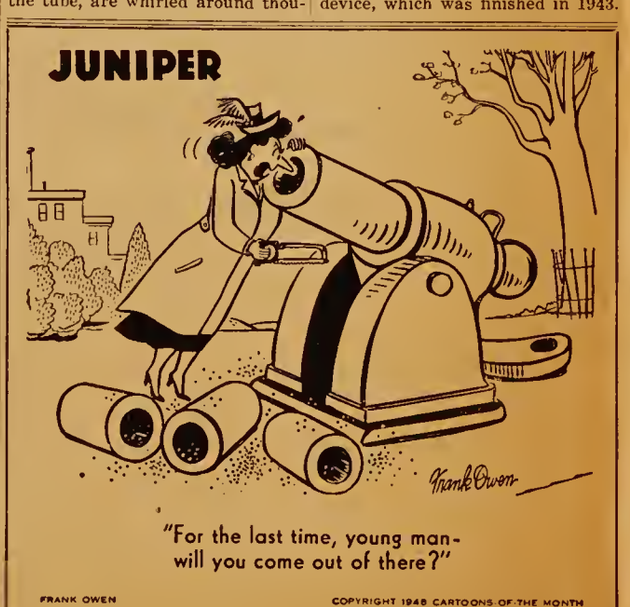
The betatron consists principally of a large electromagnet. In the heart of the device, between circular polefaces, is a doughnut-shaped vacuum tube. Electrons, emitted from a hot filament inside the tube, are whirled around thousands of times and are constantly accelerated while the magnetic field builds up. As the field reaches its maximum the orbit of the whirling electrons is shifted and they hit a tungsten target which they missed on previous trips. This generates a beam of high-voltage X-rays, and occurs at the rate of 60 times per second.

Devises "Biasing" Method

Dr. Charlton credited his associate, Dr. W. F. Westendorp, with the "biasing" technique that makes the new betatron so compact. These machines work on alternating current, in which the voltage starts at zero, builds up to maximum, returns to zero, reaches a maximum in the other direction and returns to zero again. This cycle may be repeated 60 times each second. In the 100,000,000-volt equipment, electrons are injected at the start of the cycle and removed when it reaches its first peak.

Dr. Westendorp's method involves special "bucking" coils which carry alternating and direct current. The effect of the biasing direct current is to shift the zero line of the cycle so that the electrons may be introduced earlier. Then they can be accelerated over approximately a third of the entire cycle instead of only a quarter. With more trips around the doughnut, they acquire greater energy.

Though the basic method was described before the war in Germany by Max Steenbeck, the first betatron in this country was made by Dr. Donald W. Kerst, of the University of Illinois. It was a small one, of 2,300,000 volts energy. On leave from the University, Dr. Kerst came to Schenectady and aided G-E scientists in building the 20,000,000-volt equipment which was loaned to the University when he returned. Then Dr. Charlton and Dr. Westendorp proceeded with the construction of the 100,000,000-volt device, which was finished in 1943.



OUT OUR WAY

By J. R. WILLIAMS

Puerto Rico Resources Authority Orders Third Steam-Turbine Generator

SAN JUAN, P.R. — A third 20,000-kilowatt steam turbine-generator has been ordered by the Puerto Rico Water Resources Authority, according to an announcement from International G-E. This will bring to 60,000 kilowatts the power potential of a new steam power plant being built which is to have an ultimate capacity of 100,000. Included in the order is a 25,000-kilovolt-ampere transformer, plus miscellaneous switches, oil circuit breakers, and lightning arrestors. In the past 15 years the number of consumers here has more than doubled and consumption has increased from 45,000,000 kilowatt hours a year to 258-000,000. To relieve the power shortage, the Authority in 1946 bought a 30,000-kilowatt floating steam power plant built by G-E for the U.S. Army.

Brouwer's Screwballs of the Interdivision Bowling League won the first half title with the Taylor St. team finishing second and the Broadway B and W team tieing for third with Motor and Generator.

Bob Stout of the Transformer team came up with the only 600 series of the evening on games of 208, 185 and 223 for a 616 total.

Two hundred scores were rolled by Iannelly, 244; Junghaus, 235; Hal Spath, 224; Walt "Kokomo" Buesking, 215; George Luedaman, 213; Wayne Wiemer, 212; Andy Koorsen, 204; W. Berning, 203; Leo Elward, 203; Herbie Habig, 201; and Les Shroyer, 200.

Masonic League

Patrols took first half by three games over the Squares and Composite in the show position.

Two hundred scores were rolled by Bill, 232; H. Hickman, 225; Gidley, 220; Chevelier, 218; H. Somers, 214; and B. Somers, 210.

Small Motor League

Tool won first half title by one game over the Planning team and three games over the Production team.

Erv Aumann and Walt Mertz both came up with 600 counts. Erv made his 622 series with games of 207, 205 and 210, and Walt's 615 total on games of 245, 191 and 179.

Two hundred scores were piled up by Bill Miller, 219 and 200; Brown 213; Erv Haughk, 212; Reffelt, 212; Flager, 210; Frank Gitter, 207; Paul Walker, 201; Hubartt, 202, Orval Doherty, 201; and Slug Lauer, 215.

Office League

Led by Vic Rump's 612 count (232, 211 and 169) the Alternators won three games to take over first place in the second half race.

John Root had a 614 count on games of 204, 187 and 223, and Les Shroyer a 602 on counts of 194, 207 and 201.

Johnny Johnson came up with the only other 200 game with a 202.

Monday Night Ladies League

Girls interested in bowling in the Monday Night League are asked to contact Voyce Brumbaugh, Bldg. 4-4, extension 2356.

High games were rolled by Emma Vaugh, 171 and 175; Pauline Hartman, 175; and Rita Fleckenstein, 172.

Bowling and Stuff

All set for the City Tournament this coming week? Let's bring home the bacon—to the G-E Club.

Basketball Team Drops Four Games

The G-E Club basketball team had a tough time during the Christmas season by losing four games. They began their streak by losing to Essex Wire, 49-40, in an Industrial League game at Central. The other three games were played at the G-E Club, and the scores are as follows: Marine Corps, '49, G-E, 42; Sandpoint Merchants, 69, G-E Club, 44; and Wilshire American Legion, 55, G-E, 46.

The next games will be played at 8 p.m. Monday, Jan. 10, at the G-E Club against Essex Wire; and Thursday, Jan. 13, 9 p.m., at Central High School with International Harvester.

Engineer to Appear On WKJG

General Electric's contribution to the Air Forces' armament building program will be described on the "Air Force Hour" radio show on Station WKJG of the Mutual Broadcasting System at 1 p.m. Sunday.

Jack Lawrence, G-E Application Engineer in charge of the B-36 armament systems program, will be interviewed. Other members of the broadcast are Air Force personnel.

The interview was recorded several weeks ago at the Guilderland Firing Range at Schenectady, where 20MM air craft gun turrets made by the Company were test fired for the recording.

A second recorded-interview made at the G-E flight test center has been tentatively scheduled for broadcast late this month.

G-E Company To Broadcast Game Tonight

The North Side high school gym will be the scene tonight of another city series basketball game, with the North Side Redskins meeting the South Side Archers.

The game will be broadcast over station WANE at 8:30 p.m. under the sponsorship of the Fort Wayne General Electric. Tomorrow's game between Central high school and Richmond will be aired at 8:15 p.m. Dick Buckley will announce both games.

North Side won the holiday invitational basketball tournament New Year's Day by topping Mishawaka, 43-28, Saturday night. Central won third place by crushing Riley of South Bend, 58-42, in the consolation game.

In the afternoon session, the Redskins defeated Riley, 32-31, and Mishawaka beat Central in a close game with a score of 45-44.

Elex Christmas Fund Helps 56 Families

The Elex Club was able to give 56 needy G-E families a Merry Christmas through the annual Christmas Fund drive. Charlotte Stanford, Elex President, extended thanks on behalf of the Club to everyone who contributed to the fund.

Strong convictions precede great actions.

Voltmen To Sign Many New Players Next Year

Manager Braden Foresees Bright Outlook For Coming Season

The personnel of the G-E Voltmen next year will include a great many new players, it was announced today by John "Red" Braden, manager of the G-E Club's national semipro baseball champions.

"Despite the fact that we have won the championship for two years," Braden explained, "I have still not been satisfied with the strength of the team and I want to increase it this year."

Quite a few organized players have given up playing professional ball and have provided the Voltmen's manager with a large field in which to choose. None have been signed yet, although a large number have been contacted.

"The outlook is better this year than it was last year at this time," Braden stated.

An announcement earlier this week by the Board of Directors for the G-E Club that the Voltmen would return to the diamond ended conjecture about the fate of the team. Lack of attendance during the past two seasons has led to discouraging reports about the Voltmen's future.

Officials of the Voltmen are now working out their Michigan-Indiana League schedule and exhibition games to prevent conflicts with the home appearances of the Fort Wayne Daisies. They hope this will assure better attendance at the games.

Industrial Noses Out Winter St.

In a tight ball game which was won in the last 30 seconds of play, the Industrial team nosed out the Winter St. Interdivision team, 62-59, Monday, Jan. 3.

The Winter St. team, with the assistance of Morkoetter and Meyers of the Firemen and O'Keefe of the Squares, made a real battle of it all the way. With less than a minute to go they held a one point lead. Every man on both teams scored. Davis was top man for the winners with 17 points. Hormeyer got 15 for the losers.

Box Score:

The luncheon is gone, but the memory lingers on. . . . Orchids to host Staehle for a wonderful Friday, Dec. 31. . . . "Little Johnny" trying to peer over the top of an elephantine portion of Baked Alaska. . . . "Big Johnny" scouring his mental file for a clean story. . . . A fur-lined coffee pot to Cy for his persistent heckling. . . . All the "city-slickers" trying to tell country jokes. . . . Dolson trying to pick out the non-fishy bits from that huge platter. . . . The half apologetic ending to Sam Jeffries story. . . . All the comments on the way back that it was just "SWELL." . . . Thought While Pushing a Wheelbarrow: Looking back at last Friday, we wonder if Mr. Staehle's initials could stand for "Pleasant Moments?" . . . Our New Year's Resolutions. Resolved—to keep our nose out of Ann Wade's lovelife—to ignore the fact that Andy O'Dwyer always has a seat on the evening bus—to never tonk on less than four of a kind—to keep Joe away from FDR dimes, and any other kind, if possible—to work hard and keep busy every minute, just like everyone else in the office. . . . Predictions of Stuff. (Predictions which, in the past, have been 86 proof) 1. We won't keep any the above resolutions more than five minutes, if that long! . . . It's a new year, have fun, kiddies!

Winter St. Defeats Regional Warehouse

Winter St. of the Interdivision Basketball League kept its perfect record intact by beating previously undefeated Regional Warehouse, 36-28. Green was top man for Regional with 11 points, and Blauvelt garnered 9 points for the winners

The Squares rebounded from their last week's defeat to beat the Apprentice School, 36-23. Transformer, off to a slow start this year but steadily improving, defeated Taylor St., 32-19.

The Firemen really turned on the heat by trouncing Tool and Die, 69-25. Small Motors cracked the win column for the first time this season in defeating Fractional, 36-32.

We Start the New Year with This Resolution...

IN 1949, we are going to try to be a better employer. We are going to try to have General Electric an even better place to work.

Last year General Electric foremen and other supervisors—all management in fact—spent more time than ever before in Company history studying how to do their jobs better; how to be better leaders; how to get along better with the people who daily work with them; how to be more considerate, more helpful, more responsive to the needs, wishes and feelings of their employees in the conduct of the day's work.

This year we are resolved to intensify our efforts to put into practice what we have learned from our past successes and our failures, to become a better employer and to make General Electric a better place to work, by doing everything in our power to put the human considerations first.

GENERAL ELECTRIC COMPANY

Lamp Magic Show To Be Given Here

Company's Performances Of 'Light Sorcery' At G-E Club Jan. 31, Feb. 1

"Light Sorcery," a scientific stage presentation of the magic of lamp research, will be presented under the sponsorship of the Fort Wayne Apparatus, Lamp, and Air Conditioning Department facilities of General Electric at the G-E Club, Monday and Tuesday, Jan. 31 and Feb. 1.

The hour-long performance will be presented by lighting specialists from the Lamp Department at Cleveland.

There will be no admission charge. Final plans for distribution of tickets will be announced next week. First consideration will be given employees and their families, it was announced today by R. E. Zook, Supervisor of Personnel. Employees will also be provided tickets for their friends and neighbors.

Efforts will be made to conduct a sufficient number of shows during the two days to provide everybody an opportunity to attend.

G-E Credit Union Plans Meeting

The G-E Credit Union's annual meeting for election of officers and report of last year's activities will be held Monday, Jan. 31, in the G-E Club at 8 p.m. All members are urged to attend.

Mildred Fettinger Given $105 For Top Suggestion

Mildred Fettinger, Bldg. 26-2, received $105 for a suggestion that proposed a form be made for necessary drafting data on transformers. This form has been of great help to both draftsmen and engineers. In the above picture she is shown receiving her check from E. J. Thomas, Manager of Transformer Engineering, while Morris Cox, Supervisor of Drafting, looks on.

Mildred Fettinger, Specialty Transformer Div. 93, received the top suggestion award made to 70 suggestors this week. She received $105 for a suggestion concerning drafting data.

Next on the list is Jessie L. Elder, FHP Div. 17, who was awarded $80 for her idea to coil inject certain coils. Another FHP Div. 17 employee, Fred E. House, also received a $70 award for his suggestion pertaining to conveyor line loading.

Twenty-five dollars went to Adrian J. Voirol, FHP Div. 10, for his suggestion about a dock door switch.

Others who have received awards of various amounts ranging from

WIVES TO HEAR ADDRESS BY DR. CAROTHERS

Economist To Speak On 'Where Are We Now' At Meeting Monday

Dr. Neil Carothers will speak on "Where Are We Now," at a meeting of the wives of G-E division heads, engineers, supervisors and foremen, Monday, Jan. 17, at 8 p.m. in the G-E Club.

Dr. Carothers, a noted economist, is Dean of the College of Business Administration at Lehigh University.

Invitations have been mailed this week to the homes of all those who have been attending the dean's series of nine lectures on basic economic factors. The meet-

500 Members Of Elex To Attend Ice Show

Approximately 500 Elex members will join a Chicago excursion to attend the Sonja Henie Ice Revue tomorrow. The train leaves the Pennsylvania Station at 8 a.m. arriving in Chicago at 10:45 a.m.

The girls will then have free time until 7:15 p.m., when they will meet at the Union Station to board buses for the arena.

(Continued on page 4)

Red Cross To Start First Aid Classes

Starting Monday, Jan. 17, for five consecutive nights, there will be a series of classes for First Aid instructors at the American Red Cross, 123½ W. Wayne St.

Jerry Kelly, Special Field Representative of the Red Cross, announced that those who have the standard and/or advanced Red Cross card or the instructors card are eligible to take the course. Anyone interested in the course is to

G-E Laboratories Develop Many New Devices Last Year

Devices for detecting leaks so slow they would pass but one ounce of gas in a century, for measuring shocks passing through the earth from explosions, and for producing photolight flashes lasting two-millionths of a second were among hundreds of new engineering tools developed in General Electric Company laboratories during the past year.

The Company's diversified developmental engineering programs for 1948 also included the testing of parts for a jet-propelled helicopter, the building of a 100,000,000-volt betatron for Oak Ridge National Labratories, and continued research on firing and controlling of German V-2 rockets.

The "halogen leak detector" in-

MAIL CALENDARS TO PENSIONERS

General Electric calendars are being mailed this week to all pensioners. All who do not receive a calendar in the next few days are requested to notify the WORKS NEWS office, Ext. 441.

55 Test Engineers Here Represent 44 Different Schools

Fifty-five Test Engineers at Fort Wayne pose for their picture, above, at a meeting recently in the Chamber of Commerce.

Test Engineers at the Fort Wayne Works represent 43 different colleges and universities in the United States and one in China.

Shown in the picture at the left are:

First row—P. S. Gratny, T. D. Turner, M. A. Kline, E. D. Elwonger, G. L. Lee, G. E. Gerlaugh, H. T. Briggs, G. D. Howton, R. A. Kasting, R. E. Chappell, W. A. Peterson, F. G. Hibbard, J. A. Chiera, C. H. Hudson, and Henry Lehmann.

Second row—W. E. Holmes, J. R. Burton, E. R. Lee, P. G. Campbell, E. A. Smart, W. G. Hoefer, Ruth M. Dingman, R. I. Eddy, G.

We All Take Part In Bringing Death To An Ancient Phrase

In the old days when a man bought an article of merchandise, he bought it mistrusting the seller. He bought it fully expecting to get a trimming if he did not keep his eyes peeled. Out of that way of doing business came the phrase "caveat emptor" or "let the buyer beware." Just why business had to be done that way is a mystery unless there was a lot of dirty work somewhere along the line.

Perhaps the article for sale was made of inferior materials. Perhaps the man who made it did a careless job and and let the painter cover it up. Perhaps the man who sold it didn't pay the man who made it enough to live on. Perhaps he was greedy and tried to get more money for the article than it was worth. Anyway, the lot of the buyer in those days was always tough.

Consider today's way of buying. No longer do we need to be especially alert or unduly suspicious when we enter the market place. For example, let us take electrical products . . . appliances we'll say because everyone knows about them and uses them. We go in and buy without fear of getting stuck. We buy a toaster for example. We get a handful of metal which, made alive with electricity, browns our bread just the way we want it. But is that all we get? Indeed no! We get the brains and knowledge of a great, far-flung organization. We get the benefits of the thinking of many men and women. We get the fruits of years of research. Back of that toaster glowing on our breakfast table, making our morning bread easier on our stomachs, is the greatest force man has . . . thinking, a process of mind open to everyone.

And what has all this to do with that ancient phrase "caveat emptor." It has this: that because many men and many women want more and better things, they set out to get them. They so increased the number of buyers, that the old saw lost its kick. Why? Because, buyers of today's electrical products are likewise the makers of them and no one intentionally sells himself a lemon. The better we make our products, the better we like them and the public, seeing us use our own products, is inclined to agree with us and buy them too.

Research Has Been Industry's Storehouse For Years Ahead

In 1844, the U.S. Commissioner of Patents was convinced that the end of human improvement had almost been reached, yet railroad transportation had not yet come. Automobiles, telephones, the radio, airplines, the electric light . . . all these were as yet the stuff of dreams.

Forty years ago a man of science said that probably all the great discoveries in physics had been made. A year or so later the X-ray was discovered.

In 1900 experts said the incandescent lamp was nearly perfect. Now it is five times better. If we used 1900 model lamps today, $5,000,000 a year would be added to the nation's light bill.

Research, constant peering into the future, ever seeking the answers to questions, ever charting new courses, has given industry the key to the years ahead.

We do not know now what the products of the future will be. We do know that they will be better than those we have today. They will make new industries . . . new jobs . . . newer and better standards of living and they will come out of the industry's storehouse . . . **RESEARCH!**

LUTHER BURBANK: 'Every Day Is The Best Day In The Year'

Luther Burbank, that grand old man of nature, whose studies and experiments with growing things, left the world richer for his having lived, once quoted a few lines which are worth remembering. They illustrate sharply, the value of time and they are as follows:

"Write it on your heart that every day is the best day in the year. . . . No man has learned anything rightly until he knows that every day is doomsday. . . . Today is a king in disguise. Today always looks mean to the thoughtless, in the face of uniform experience that all good and great and happy actions are made up precisely of those blank days. Let us not be deceived, let us unmask the king as he passes."

WHAT'S NEW IN G-E PLANTS & LABS

G-E will furnish fluorescent lighting, controls, switch-gear, and allied equipment for the 9,000-foot-long, two-tube, four-lane Brooklyn-Battery Tunnel now being constructed. The New York vehicular tunnel, one of the world's longest, is reported to be the first in which slimline fluorescent lamps will be used.

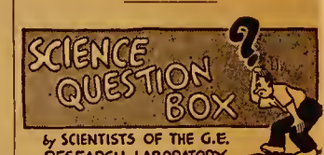
Astronomical clocks will turn on a higher intensity of light in the portal sections during daylight hours to make it safer for motorists driving from bright sunlight into the tunnel at normal traffic speeds. The supply of power to the lighting system is arranged so that loss of any part of the power supply—including complete loss at one end of the tunnel—will not leave any section of the tunnel in darkness.

Scientists are beginning to doubt their knowledge of the Earth's accuracy as humanity's master timepiece, the National Electronics Conference was told recently by Harry A. Meahl, an engineer in the G-E General Engineering and Consulting Laboratory. He said that the world's rotation, by which time standards are set, may vary more than a second every four years, judging from studies made at the U. S. Naval Observatory. He said that the standards now being used to check radio frequencies are timed by the slightly erratic revolution of the earth, and so could be in error by more than one part in 100 million. "With extremely high-frequency equipment such as radar becoming more and more commonplace," he declared, "and with objects radar might be tracking moving faster than sound, the earth's error could cause serious miscalculations."

A new apparatus service shop, one of the largest of a chain of 29 extending from coast to coast, was opened this week in Medford, Mass., near Boston. It is completely equipped for repairing all types of apparatus and will service electrical equipment users in New England, excepting Connecticut.

A new tube, called a "dyotron," which can control the time of flight of electrons moving as fast as seven million miles an hour, developed by E. D. McArthur and R. A. Dehn of the G-E Research Laboratory, was described at the National Electronics Conference here. The tube controls the speeding electrons as they cross a tiny gap in the tube anywhere from one billion to four billion times in a second. It was designed to meet the special needs of high-frequency equipment such as radar and "microwave" relays for television networks, which send out signals at frequencies above a billion cycles a second. The dyotron has a tiny condenser built into it and it is capable of controlling the electron speeds for frequencies ranging from 1,000 to 4,000 megacycles, a range which in the past has required a complex three-tube circuit. Now radar and microwave relay units can be made lighter and more compact.

A new indicating voltmeter with an expanded scale, designed for general switchboard use by electric utilities and large industries, is announced by the Meter and Instrument Divisions at Lynn, Mass. An addition to the Type AB-15 line, the new meter has a scale 7.1 inches long spanning 250 degrees about the center. The scale is expanded over the most frequently used range, from 90 to 130 volts, enabling easy detection and measurement of 0.5-volt variations within that range. Scales for higher voltages can be supplied.



The OLD PHILOSOPHER Says:

I wonder sometimes, when I hear someone talk about the "good old days" if any of us really would want to go back to them. I wonder if we stop to consider that only 50 years ago, the largest pay check in the country couldn't buy a radio, an automobile, an electric refrigerator or even a porcelain bath tub . . . for the simple reason that they just didn't exist. I wonder too if we stop to consider that just these four things have been made possible by the much criticized machine-age.

There is only one way to look at it and that is, that the development of the machine has been chiefly responsible for the thousands and thousands of products and services available today and which did not exist 50 years ago. Today we live in the greatest age man has ever known and don't let anyone tell you different.

Can you imagine for example going back to the horse and buggy days when you had to go out to the barn half an hour before the folks wanted to go for a ride on Sunday afternoon. And you had to manicure the old mare and dress her up in her Sunday harness and back her into the shafts and hook up . . . and then you got the family and jogged along a dusty road at about three miles an hour for five miles out and then five miles back . . . can you imagine calling that a good time today? No, I don't think you can and when you step on the starter of even your 10 year old car today, you can thank the machine age and the present industrial set-up that makes it possible.

Q. What is it, other than fire, that causes damage when lightning strikes an object?

A. When an electrical discharge, such as lightning, passes through air, it causes a pressure to be developed which is dependent on the amount of electrical current. This pressure may reach its full magnitude in five millionths of a second or less. It is responsible for the thunderclap accompanying the discharge and for many of the damaging effects of lightning. It causes the tearing and rending when a tree, pole, or wooden building is struck. If there is moisture present, as there is with a growing tree, its sudden conversion to vapor adds to the pressure that is developed.

Foremen Hear Steel Official

L. S. Marsh, former Manager of the Metallurgical and Inspection Department of the Inland Steel Company, narrated a motion picture on steel at a meeting of the Foremen's Association Thursday evening, Jan. 6, in Kreis Stoltzenau hall. Robert Morris, Everett Lindeman, president of the association, and Mr. Marsh are shown above discussing the movie after the meeting.

Specialty Transformer Div. 93: Murray J. Sherman, Clara Michelini, Betty J. Horner, Calvin C. Hapner (2 awards), Kenneth Casselman, and Neil E. Bracht.

Specialty Transformer Div. 94: Joseph Troendly, Oscar Risser and Raymond H. Horstman.

Specialty Transformer Div. 95: J. Virgil McKeeman, Alta M. Lees, and Ernest A. Kern.

Danville Plant: Dale Smalley, Orie E. Freeman, Laura Mae Jenkins, Robert Hicks, Raymond Southard, and Dale L. Brown.

Motor and Generator Div.: Paul Walker, George L. Santon, Miles E. Reynolds, Clifton J. Mugg Gaddis G. Hall, Kenneth C. Cozad, and William E. Billue.

Wire and Insulation Div.: Robert L. Pickett, Robert F. Dressel. Ralph G. Lindeman, Carl M. Junk and Robert E. Baals.

General Tool Div.: Robert M. Truelove, Joseph J. Hartman Glenn O. Hoon, Granville C. Gorrell, and Robert Bryan.

Distribution Div.: Herman Ebel, William C. Elick, and Carl J. Click.

Miscellaneous: George Lambroff.

A man recently drove his auto into a truck loaded with dynamite, but it didn't go off. People drive across railroad tracks without looking, too.

Behind The Cracker Barrel In General Stores

By Marie Kettering

What happened to the column last week? That's a good question. There wasn't any and if you don't make news there can't be news. . . . The fellows in the Grinding Room would like to remind Karl Soest to be sure and listen to President Truman's Inaugural Speech Jan. 20. It seems Karl lost $10 to the boys by betting on Dewey in the recent election, and now they want him to listen to the speech so he may be compensated for some of the money he lost. . . . Belated birthday felicitations to Arthur Haberstock, Marion Sienkiericz and Kenneth McManama. Just remember, fellows, our wishes are stronger because we kept them longer. . . . Our deepest sympathy to the Charles Florent family on the recent death of Mrs. Florent's mother. . . . For Chester Gilliam's future information the hole in the floor outside the grinding room door leads to the steam pipes and is not a disposal vat for kerosene. . . . We are wondering if Charlie Kimes is out of the dog house at home yet. Not only does he take his wife's shoe and hit her on the shin, but, since he has bought a new car, he spends practically all his spare time at the lake fishing. Have you had any luck fishing, Charlie? We haven't heard any stories lately. . . . The topic of conversation in the office is the Sonja Henie Ice Revue. Several of the girls are going to Chicago tomorrow with the Elex Club to attend the revue. . . . We are glad to see Albert Van Behrens back after an absence of six weeks due to illness. Good luck and good health in the future, Al. . . . Byron Simmons is at it again—trying to grow a mustache, that is. Even after a week it scarcely can be seen. Won't one of you girls come to his aid and lend him your eyebrow pencil?

Big story of the week. Art and his wife had another "Rowe" on Tuesday morning, but, we understand that it was just a little one! Having had recent experience along these lines ourselves, we would suggest naming the little girl Continuous Rowe! You could call her Connie for short. . . . Candidates for Siberia: The guy who addressed the resplendent sales brochure to "F. Ondronk!" The engineer who called the Ballast Sales Office and placed an order for half a dozen pipecleaners! . . . Test Engineers—Up in Arms! (Pick your own) Ann Wade has informed us (we suppose because of the publicity given her recent romances) that she will have to break the "bad habit" of dating T. E.'s! Bad habit—she calls it! O. K., fellas, are you going to take this sitting down? (With Miss Wade, I mean?)

F. L. Schafenacker Named Supervisor In FHP Divisions

F. L. Schafenacker

F. L. Schafenacker has been appointed Supervisor of Mechanical Facilities, Tools and Supplies, of the Fractional Horsepower Motor Divisions.

A General Electric employee since 1909, Mr. Schafenacker first started his G-E career as a machinist toolmaker in the FHP Motor Division. He later transferred to the Apparatus machine shop and then to the general tool shop. In 1913 he became foreman of the special machine shop, and in 1920 he was made supervisor of machine tool operations.

He later became a general foreman in the Meter Division, and was made Superintendent of the Apparatus Division in 1934. Mr. Schafenacker went on special assignments in the FHP Motor Division in 1939. Since 1941, he has been Supervisor of mechanical equipment at the Supercharger, Assistant to the Superintendent at Taylor St. and Staff Assistant in Robert Wylie's office. Bldg. 18-1.

It isn't what the average man says that counts—it's his wife's reply.

Supervisors Hear Economist

M. W. Edgar is shown above chatting with Dr. Neil Carothers and I. D. Rinehart at the Supervisors' Club meeting Monday night at the Squares' hall. Dr. Carothers, noted economist and Dean of the College of Business Administration at Lehigh University, was the main speaker; while Mr. Rinehart has been elected to succeed Mr. Edgar as president of the organization.

Wives To Hear

(Continued from Page 1)

ing is being sponsored by Management primarily to give the wives an opportunity to hear a portion of the information included in the series just concluded here.

Before coming to Fort Wayne in November, Dr. Carothers gave his lectures at the Schenectady Works. Later he will present the series at the Erie Works.

Congratulations Leo Elward. That was a mighty fine portrait we saw of your intended in last Sunday's paper. Why didn't you let us in on it, Leo? It can't be that you are still bashful or are you? We never thought you would make the grade, but we do know you will make and be the model husband, Leo. Your co-workers will be more than happy to give you any and all the advice you may need. Please don't be afraid to ask. . . . We have taken notice that Francis Groeschel comes to work shaved clean as a whistle. We understand that the only reason for this is it's orders from headquarters. Leo Elward, please bear this in mind. . . . Oscar Baumgartner is back after being absent due to a broken foot. . . . We welcome Nina Hartman, who has joined Wire Cost. We hope you will like us Nina. . . . Folks, the news is coming in very slow, so far this year. You all haven't made New Year's resolutions not to turn in news have you? You can't tell me that 1949 is at a standstill. Come one and all please give out.

If every nose stuck into other people's business were snipped off, wouldn't we be a funny-looking race?

Tricks In Transformer —FROM DIVISION 91—

By Johnny McMaken

Some people are always wishing for something instead of giving thanks for what they have. For instance, Eddie Dauscher and Don Huffman were hoping to get a new hard rubber tired tool wagon for Christmas. Now the boys wonder if Ted Mullens, Bill Edmunds or Herman Korte would just consider overhauling the old one. That one flat wheel makes it a little hard to push. . . . Bob Bunyan is also one who is thankful because his son left his army clothes at home when he went to the Navy. Bob now has some clothes to wear as his were lost in the big laundry fire. . . . John Kennell would like to trade his '38 LaSalle for an old Model T that will run since John's car can usually be found at the garage. John says it's the best car on the road. . . . Lorenzo Smith says the taxi fare from Decatur to Fort Wayne is pretty high. How about it, Buck? . . . In case anyone is interested, the odor in Bldg. 26-1 is due to Don George and Bud Garner getting skunked in cards. Rodger "Rod" Collar and Orlie "Fireball" Zimmerman were crowing all day. Bob and Don claim they skunked Rod and Fireball at least three times a week. . . . Big chief safety man, Ray Chapman says, "I am going to put my foot down on wearing gloves while running a drill press." Amen. . . . Last week some buddy was flying low over the Brooklyn railroad tracks. The men in blue would like to speak to the man behind the wheel. . . . Anyone requesting information on anything see Fireball Zimmerman—he is a jack of all trades.

Violinists are said to make good aviators because of their rhythm. It sounds reasonable unless they start fiddling around in the air.

The marathon runner has a lot of wind, says a trainer. And how about the hole-in-one golfer?

G-E Laboratories

(Continued from Page 1)

troduced in 1948 is a pistol-shaped electronic device extremely sensitive to the presence of the elements fluorine, bromine, chorine, and iodine. Infinitesimal leaks in pressure systems filled with gases containing these elements can be detected with the instrument, which sucks in air and registers the presence of any halogen on a control panel.

Another new device, called the "earth shock accelerometer," was tried out for the first time early in the year, when it was buried in earth near the explosion of one-half million tons of high-explosives in Tennessee. Signals from the device, indicating extent of shocks, are carried through a cable to recording instruments on the surface.

Light Catches Action

For high-speed photography, G-E engineers developed a photolight which puts out a bright flash lasting only one-millionth of a second. With this flash, it has been possible to take virtually motionless pictures of such objects as artillery shells traveling at three times the speed of sound.

Facilities for development and testing of parts for a proposed jet-propelled helicopter were expended in 1948. New facilities include an outdoor bowl-shaped pit 150 feet in diameter, in the center of which is a huge helicopter blade. On the end of the blade are jet units to be tested.

Among the particle accelerators —"atom smashers"—produced during the year were a 10,000,000-volt betatron for Naval Ordnance, and a 50,000,000-volt betatron for the National Bureau of Standards. A 70,000,000-volt synchrotron is being built for nuclear research at Queens University, Canada, and work was begun on a pair of 100,-000,000-volt betatrons for the University of Chicago and for the Oak Ridge National Laboratories, Oak Ridge, Tenn.

Control V-2 Rocket

The G-E rocket research and development program, conducted for the Army Ordnance Department, continued through its third year. In February, 1948, a German V-2 rocket was controlled in flight for the first time. Development of telemetry equipment progressed to the point where the present apparatus for signaling from instruments in the rockets to the ground weighs only 23 pounds, and transmits 28 different kinds of information every 1/30th of a second.

For specialized research underway at Rutgers University, G-E engineers designed and built a six-ton electromagnet. Because of the influence of strong magnetic fields on certain salts, the giant device will help provide means of reaching temperatures near absolute zero. It will also be used to investigate properties of isotopes in nuclear research.

A new job for X-rays was found in rolling mills, with the development of the G-E X-ray thickness gage. The gage keeps a continuous check on the thickness of metal sheets as they shoot from the rolling machines by measuring the quantities of X-rays passing through them.

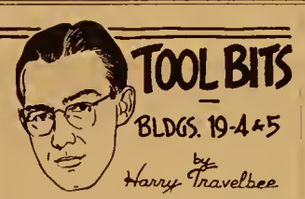
Automatic Weathermen

For keeping meteorological records at unmanned weather-stations in remote parts of the earth, G-E engineers designed an "electric weatherman," which automatically and continuously records wind velocities and direction on a roll of paper, and requires attention only once a month.

A new type of bearing was introduced, whereby a rotating shaft is suspended in air by magnets, so that it touches no surface as it spins. First application of the "floating-on-air" principle was in a watthour meter, the familiar device that keeps a record of electricity brought into a home.

Another novel device to make its debut was the "hypsometer," which measures altitude by the temperature of a boiling liquid. The greater the altitude, the lower the boiling point of liquids, so the hypsometer simply boils the liquid and measures its temperature, which can be translated into terms of height. The compact device is expected to be particularly useful in meteorological measurements at 50,000 feet and higher.

Machine Solves Problems



Another engineering advance was the production of a machine which makes possible the "mapping" of the invisible field of force surrounding electrically-charged pieces of metal in a matter of hours. The machine is automatic, and does in hours an operation once requiring weeks of tedious calculations. The field of force is represented in a drawing which the machine makes. It can be used to solve problems in magnetics, fluid streamlining, heat conduction, and propellor blade torsion, according to G-E engineers.

For measuring vibrations of moving machinery, rotating equipment, factory buildings, etc., a "recording vibrometer" smaller than a loaf of bread was developed.

Completes 40 Years Service

C. H. Matson, Works Manager, Tuesday celebrated his 40th anniversary of service with General Electric. On this occasion he received a 40-year service certificate. At the presentation were, left to right, W. C. Wichman, Manager of Specialty Transformer and Ballast Divisions; Mr. Matson, J. M. Crawford, Manager, Large Motor and Generator Divisions; M. E. Lord, Manager of the FHP Motor Divisions; and O. L. Weitzman, Winter St. Works Manager.

John Neukam has been calling John Roemer "Bad Eye" all last week and now Neukam wished he hadn't, cuz he too has a bad eye. Moral—He who laughs last, laughs best. . . . Gus Wiedleman says he is getting a little absent-minded as he forgot his billfold Monday. He had to borrow lunch money from the boys. . . . John Hensler, who has been off ill since Labor Day, is convalescing at the home of his sister and brother-in-law at 230 W. Sherwood Terrace and is feeling better. In fact he would enjoy a visit from the fellows in Bldgs. 19-4 and 19-5. . . . Congratulations to John Ebert on his 30th year with G-E. To show that it was a gala occasion he was sporting an oversize bow tie for the event. . . . "Just call me a big oil magnate," says Del Stickler. Seems that Del wanted to drain the oil out of the pan on his lathe Monday. Since he had the necessary equipment in the two buckets, he filled the first one and started to push the second bucket under the lathe after taking the other one out, but the bucket didn't quite go under. Del didn't give up—he just kept trying again; however, it just wouldn't go. The sad part was that all this time the oil was running on the floor until someone told him to put his finger into the hole, which he did, until the oil could be changed from the short bucket to the tall one. Del still says that he should have left his five buckle arctics on this morning. . . . Harry Schlichter is our new sweeper in Bldg. 19-5. . . . Ed Taylor says that your pocket is no place to start a fire. Seems Ed had about a dozen matches ignited at one time. He really went into high gear to get them out of his pocket.

Second Shift

Max Greeno says he's going to take up ice-fishing. Says he received two new fish poles for Christmas and just has to break them in. . . . John Fleischer and Wilbur Lane got their new fishing licenses last week and now they're confident that they'll pull out plenty through the ice. Wilbur said his old one was no good, as there just were not anymore fish on it. Since when does a new license make better fishermen? . . . Dale Eddington came in one night last week with his arms and legs all skinned up. Said he came down stairs wrong side up.

Red Cross

(Continued from Page 1)

report Monday evening at 7 p.m. to the Red Cross at the W. Wayne St. address. The classes will be held from 7 p.m. to 10 p.m. each night.

Any additional information can be obtained from the Safety Section office, Bldg. 8-2, Ext. 563.

500 Members

(Continued from Page 1)

A delegation representing the DanGE Club, newly-formed girls' club at the Danville plant, will meet the Fort Wayne girls to attend the revue.

Following the show, all members are requested to board buses marked "Elex" for transportation back to the depot.

"Perhaps the psychologist who says there's no such thing as pain has never listened to another psychologist."

We are pretty proud of the Hartman Brothers whose pictures were in last week's WORKS NEWS, especially our own Al Hartman, Suggestion Office. . . . Congratulations to Richard Burdett upon the occasion of his becoming father to a baby boy. We think that's pretty swell; but we don't think it's anything of the sort that you're leaving the Personnel Office. Good luck, for the job, baby and all. . . . Our Floridan that we mentioned last week has doubled-crossed us and turned into a New Yorker. Every week he's something new. Let us name you for this week, will you, Herschel? Jeff Davis II sounds practical. . . . Jean Newton finally convinced (?) her husband that she was responsible enough to be permitted to drive their new convertible. So last week when the weather was wonderfully warm, she ventured out with the top down. Of course, Jack went along. . . . Ceal Romary bowled in the money during the recent bowling tournament, or at least her team did. Was it the bowling that got you down, Ceal, or is that teeth-pulling job working on you? . . . The Employees' Store personnel regret that Richard Harber has left the Company. . . . Some days when Ray Fischbach comes to work and is feeling really low, it helps to understand what is causing all the trouble. He says "Those doggoned kids." They left the water running in the bathroom, tore up his dark room, smeared jelly on his easy chair, scratched the furniture and tore the legs off some of the chairs. He's a family man, though, and enjoys it all, especially when he can make the wife happy by buying all new furniture. . . . Woe is also Don Stroehel when he heard a commotion in his lunch box, for it turned out to be a nosey little mouse. Don saved enough cheese out of his lunch to bait a trap. "Let's be friends, shall we." We understand that the mouse enjoyed a fine lunch, anyway, because the trap failed to trip. Fool that he was, he came back for more and wasn't so lucky that time. . . . Our little helpful line for this week is strictly for the girls. "There are few things that never go out of style, and a feminine woman is one of them."

Test Engineers

(Continued from Page 1)

S. Allison, W. J. Sundheimer, D. F. Lefler, M. E. Evans, E. M. Smith, E. R. Ferguson, and Chester Lichtenberg, Assistant to the Works Manager.

Third row—W. S. Bertaux, R. M. Donnell, R. E. Michael, H. S. Hollenberg, C. R. Creamer, H. A. Folsom, F. F. Collyer, L. A. Goehring, Jack Killion, Peter Fenoglio, M. L. Heeb, L. B. Taplin, J. N. Groves, and G. W. Chambers.

Fourth row—C. D. Galloway, S. S. Jefferies, W. F. Dripps, P. H. Baker, J. L. Oldenkamp, W. R. Seegmiller, C. D. Cockburn, R. L. Winchester, D. P. Spalding, B. G. Walker, A. T. Braswell, R. H. Griner, and Michael Nasser.

How did you like the spring weather we had last week? If we start to raising oranges, don't be surprised. California has been having our cold weather, so we could surely have her fruit. . . . We still have an unsolved Christmas mystery. Does anyone have the answer to the disappearing act of Otto Brandt on the day before Christmas? He didn't even wait for his Christmas present. . . . Harold Kiel thinks that all stop signs should be neon so drivers won't miss them. In fact, he will donate two bucks to the cause. . . . That brings safety to our mind. Let's have an excellent record this year. You know the slogan "Safety first makes safety last." It could stand a little overtime of work. . . . Our "we wish you happiness" mat is out for Shirley Ohneck and Ralph Ross, who recently said "I do." . . . If you see Anne Chomey walking around and her feet not touching the floor, the eventful day of saying "I do," is fast approaching. . . . If you see a new Plymouth, better get out of the way because it probably is Mary Zirkle. Isn't she lucky? . . . We see a lot of new faces among the early birds. . . . Hello to Sarah Sowards, Marcella Oetting, Harry Chism, Ralph Armey, Agnes Vaughn, Ocie Jackson and Almeda Fairchild. If we have missed anyone, I'm sorry and a hello to you also. . . . Sorry to report a sick list of Thelma Oswald, Maltha Burk, Betty and Phyllis Lupton. Hurry back, we miss you. . . . Marge Ponsot is improved and when you read this she will probably be home from the hospital.

When Robert (Red) Smith, formerly of Tool Maintenance, was accepted as a member of the Fort Wayne Police Department, the boys in the group gave him a gift. Although a lot of thought went into the purchase, it's doubtful if it will be very useful in the pursuit of his new vocation unless the police are using water pistols and other paraphernalia found in "Gangbusters" kits. We all wish him the best of luck in his new undertaking. . . . Glad to see Ed McKering back to work following a three months' absence caused by a broken ankle. . . . Congratulations to Mr. and Mrs. William Doell who are parents of a brand new baby boy. . . . We hope True Sheets will be back soon. He is now at his home following an operation. . . . That sash Mary Stewart was wearing the other morning turned out to be a nylon stocking which in some manner became entangled with the back of her sweater.

What this country needs is a girl's complexion that will look good on a young man's coat lapel.

30 Year Employee Honored

John Ebert, General Tool Division, recently completed his 30th year with General Electric. At that time he received a congratulatory letter from the Company. In the picture are, seated, C. A. Brenner, Supt. of the General Tool Div.; Mr. Ebert, Carl Ahlersmeyer and Arthur Wolfe. Standing are Robert Green, Scott Click, Albert Nebur and Walter Schust.

Neva Lutz has joined the ranks of the "400" as they have purchased a new Pontiac complete with radio and heater. Neva says it really is O.K. and that if she doesn't have any heat in the house or her radio won't play, they'll just move into the Pontiac. Oh yes, they still have their "Chevy" also. My, my, two cars! . . . Earl Fredericks came to work with a regular work shirt on last Monday. What happened to those "pajama tops," Earl? . . . We overheard Kenny Brown giving Virginia Johnson a bawling out the other day for not signaling when she turned a corner. Better listen to him, Virginia, or you'll have that Chevy back in the garage. . . . Lil' George Ryan must have won at home, as he is now wearing his new sweater. . . . Andy Anderson wanted to go ice fishing last week-end. Someone told him that he would have to walk a plank from the bank to get out on the ice as it was melted around the shore. Andy decided he had better wait until this week as the ice might be thicker. We don't blame you, Andy, as that water would be mighty cold this time of year. . . . Catherine Chilcote went to Chicago to see the Sonja Heine Ice Revue. She thinks it is much better than last year. . . . Melvin Riley, Charley Briggs and Oral Emrick went hunting together last Saturday and all took their revenge on one poor little bunny. Charley shot twice before he discovered his gun wasn't loaded. Melvin shot twice and injured the bunny's foot, but said bunny kept right on going. Then Oral shot twice and we guess that poor little bunny just dropped dead from fright this time, 'cause Oral said he had a rabbit dinner Sunday. . . . Charlie Engle made a trip to Cincinnati last week-end. . . . If you don't want to be paid off in pennies, you'd better not bet with "Red" Sordelet. It seems the party with whom Red bet 25 cents on the Monroeville-C.C. game a week ago got paid that way. . . . If Fred House happens to invite you over to his house, you had better take a canteen of water along with you. We hear Fred doesn't have any water in his house. It seems that the plumber, who was working in the house next door, ran across what he thought was a deadend line, so he just cut it off and plugged it shut. It so happened that this was the water line to Fred's house. (Incidentally the home next door belongs to Claude "Blue" Gill.)

Fractional Fiction 4-5

By Elaine Sutter

C. J. "Frenchy" LeGras, foreman Bldg. 4-5, has received a letter from our old friend Erwin Hott former foreman in Div. 15. Mr. Hott is now living in Tuscon, Ariz., and states in his letter that after the first of the year he and his family are moving to Dupree, S. D., to take charge of a 24,000 acre ranch. Erwin also wishes all his many friends in Div. 15 and the Fort Wayne Works a happy and prosperous New Year. Erwin is now located in the heart of the South Dakota pheasant country. Looks as if he will have lots of company this year. He had better start building tourist cabins right away. . . . Congratulations go to Vonne Nesbitt who had a birthday last week and to Gertrude Bertsche who had an anniversary last week. . . . Laura Krauskopf just returned from a week's vacation in Florida. She could step out in their back yard and pick oranges. . . . Co-workers of Mary Brandt wish her back soon. Mary has taken a sick leave.

A New Yorker fell three stories to the first floor and wasn't hurt. If he had landed in the basement, 'twould have been another story.

Motor-Generator Static

Thought for the week: "Reprehend not the imperfections of others, for that belongs to parents, masters and superiors." . . . We were delighted to receive a letter from Art L. Voelker, formerly of Bldg. 31-1. We all wish you the best of luck, Art. Best regards to Jim Walker. We feel that you will want Art's address, so here it is: Rect. Arthur L. Voelker, US-52005797, Co. H. 506th ABN Inf. Regt, 101st Airborne Division, Camp Brackenridge, Ky. . . . Anytime the AC Engineer group, Bldg. 31-2, wants to edit this column for a week, the gate is wide open. . . . Hobson told his little son,

"If you're good as you can be,
You can have your 'Lectric train
When you are twenty-three.

"But Brosius uses different tact
His life is filled with dread,
The only time he gets the train is
When Sonny's safe in bed.

"Long ago I learned my lesson.
Cast my falsehoods on the shelf.
I swallowed all my manly pride
And bought one for myself.

"I can't blame wrecks upon my kids,
Can't say their faults are many.
I never lay a hand on them
Because I haven't any."

Jim Mitchell

Jim Mitchell, proprietor of Mitchell's Emporium, has added skating to his many accomplishments. This being Jim's first year on skates we understand he spends half his time on the ice, the other half trying to keep off it. For Jim, life has its ups and downs. . . . Dick Hodson is thinking of trading his practically new 1929 Buick for something of a later vintage. Anyone desiring a museum piece and having a pogo stick, roller skates or an electric train for Dick's son to play with, contact Mr. Hobson. Speaking of electric trains, Mr. Hobson bought one, presumably for his son's Christmas. To date Dick plays with the train and only permits the lad to press the whistle button on occasions. . . . One of the newer men in this division observing Ed Horman talking to the writer, asked if we were son and father. When informed of this mistake Ed remarked "If you were my father, I'd shoot myself." To which I replied, "And if you were my son, I'd loan you the gun." We are all proud of Monroe Brosius since bis picture appeared in the paper. Of the entire group photographed "Junior" was by far the "purtiest." . . . Goldie, with her buttons and bangs, the mystery tune is, "Year of Jubilo."

Thisa and Thata
SPECIALTY MOTOR

By Helen Engle

Say, Waldemar Schmidt, why do you like candlelight? Are you thinking of old times? . . . We wonder when Pondo Vlasheff got his new job as a policeman. We thought you were a tester in Bldg. 4-3 or was the job as policeman for Jan. 1. And another thing, why just on Road 1, south? . . . Why was Berry so quiet on New Year's Eve? Did your better-half lock the door and throw away the key or were you just being a good boy that night? . . . We would like to know the reason Sam Beer was ill New Year's Eve. It was the flu. . . . Carl Harmon will have a nice dog to give away soon. Watch the news. . . . I've been cooking for a long time and I never heard of putting baking powder in noodles. That is what Glen Schwartz did and he says they turned out swell. . . . How many of you have noticed the loud ties Carl Metker wears? . . . A little bird told me that George Prince went home from a party a "little on the short end" for the first time in his life. I'll bet his stocks and bonds quivered in their vault. . . . Agnes Brown was seen carrying a long package home. She said it was a rabbit, but again a little bird said it wasn't. . . . The boss gave a party for the Specialty Motor Supervisors, Saturday, Jan. 8 at the Pastime Club. O. J. Mettler showed the gang that he is still "cock-of-the-roost." . . . Mr. Korte had to take time out to take the Mrs. to the beauty shop, but he did come back. Also missing early was Otto Roehm. Frank Brindle was there long enough to eat three ham sandwiches and drink some pop. . . . Early-to-get-homers were the Robin Twins, washing windows and floor scrubbing were in order for them. . . . Carl Metker also had something to do early, but as far ahead as he was we don't blame him for leaving. . . . We missed semi-skin-head Tobias who was unable to attend because of illness. Also where were Winner and Thomas? . . . A good job of serving was done by Wiekliffe, Jacobs and Glenwith. . . . Knoll and Castor as usual held up their end. Top and low honors were taken by Stocks and Haberkorn, while Prince, Blee and Strodel also ran. . . . E. Sible was gone just long enough to procure a chicken for Sunday dinner. Lester Franke was the only sensible dresser in the gang, he looked like an eskimo which was correct for conditions. . . . It was very pleasing to the gang to have Carl Reitdorf at the party. Everett Lindeman gave up his fishing for the day, but found enough suckers at the party.

FHP Motor Specialists Help Build Sales

Alert to present day competitive selling problems, General Electric Supply Corporation, one of the major sales outlets for G-E products, recently conducted a sales education program for the sales personnel of their Cleveland office. The program was typical of many being planned for sessions throughout the country.

Shown above, presenting the story for fractional horsepower motors, made by the Fort Wayne Works, are W. R. Smart, Power Apparatus Specialist of the G-E Supply Corporation; P. S. Salstrom, FHP Motor Sales Engineer, and R. E. Boyle, Manager of the Fractional Horsepower Sales Section of the General Electric Apparatus Department Sales Office at Cleveland. In this talk, helpful hints on the proper application and sale of fractional horsepower motors were given. The objective, of course, was to encourage more sales effort to be placed on fractional horsepower motors.

During this conference, the G-E Supply Corporation announced that for the first time since the war they were in a good position to ship fractional horsepower motors from stock. They further emphasized that now is the time to get out and sell, using immediate shipment as a valuable selling tool.

The Works Service Accounting and Payroll personnel are now nicely situated in their new quarters in Bldg. 18-1. Just in case you have tried to call E. G. Waldschmidt, his telephone number is 303. The Procedures group is still located in Bldg. 16-3 on 'phone 794.

Our Welcome Back To

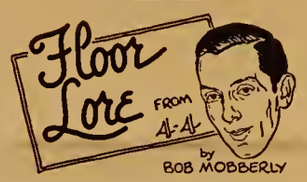
Donna Walters, Bldg. 18-B, who has been on leave of absence due to illness in family. . . . Mary Alice Huber, Bldg. 18-4, who has been ill with a cold. . . . Joan Riley, who has returned to Bldg. 18-3 following a tonsillectomy and Joe Hambrock, Bldg. 18-4, who has had quite a seige of illnesses. In addition to our welcome may we suggest "An Apple A Day—etc." . . . Elma Madsen, Bldg. 18-5, attended her brother's wedding in Hammond, Saturday. . . . Barbara Meyer, Bldg. 18-4, and Doris Lehman, Bldg. 18-2 observed tbeir birthdays last week. . . . Bill Kozma, Bldg. 18-3, celebrated last week too. He insists that he is just "Sweet 21." . . . Ruch Wichern, Bldg. 18-B, has been transferred to Bldg. 6-2. . . . Dick Kent will not tell us how to copy his bargain in overcoats.

Interesting Visitor

W. G. Smith of this city, was a business visitor in Bldg. 18-4 this week. The efficiency of his "Seeing Eye Dog" was a marvel to everyone who saw them. We all agree that these dogs are a blessing to the blind—such a sight should make us all the more safety conscious—so wear your safety glasses and be able to see the "Seeing Eye Dog." . . . Opal Cook, Bldg. 18-5, had her equilibrium disturbed recently when the bus pulled away without her. . . . Marilyn Ort will be the news reporter from Bldg. 18-3 and would appreciate the assistance of everyone on the floor to help her. . . . Everyone carries a burden these days, but not nearly as large as Barbara Meyer, Bldg. 18-4. She carries Mexico on her back. Reason: a beautiful handmade jacket made in Mexico with the word "Mexico" embroidered on the back. . . . Bldg. 18-1 Service Payroll girls, Estella Monroe and Gladys Forst celebrated birthdays this week. . . . Dorothy Janel returned from a hurried trip to Connecticut due to the death of her grandfather. . . . Maxine Hauth, a former payroll girl, has announced the arrival of a baby daughter. . . . Believe it or not the much heralded, new car of Elizabeth Carnells, actually will run on country roads. She made it all the way to Cincinnati and back without a bit of trouble. . . . Herman Volmerding, Bldg. 18-4, must have a sweet tooth. He says candy soothes his troubled nerves. That is a new one! . . . Joe Wauro, Bldg. 18-3, purchased a new suit of clothes recently, with not two but three pairs of trousers. The third pair was sold to Joe rather forcefully, and now he thinks he has a lifetime job.

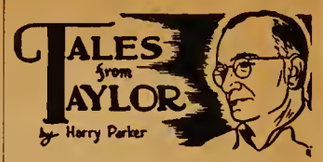
It'll soon be the time of year when mother can't win. Either Junior will forget to wear his rubbers or he'll track right through the house with them on.

The politicians who straddle the issue usually get taken for a ride.



"Diplomacy is the art of letting someone else have your way."

We are glad to welcome back Don Stute, after an absence of six years. How well do we remember the day tbat be left to join the Navy and the subsequent visits that he made before he was sent overseas. While he was stationed in New Orleans, however, he acquired a wife whom he has brought up to the cold North. He says that she likes it here and they expect to establish their home in Waynedale. . . . Ray Widdifield's wife went to Arizona the first part of December and writes to Ray telling him about the good food that she is enjoying out there. She made a trip to California one week and has been having a fine time. He says that he wishes that she would hurry back because he is tired of eating hash and bologna. . . . We bid a reluctant farewell to Hazel Herrick, Bob Foster and Hilmer Drayer who are leaving for other jobs. It seems like part of the family is breaking up. Best of luck to all of you always. . . . Ervin Lange and Gene Wheeler are to be entertained with a beautiful steak dinner as the result of choosing the right team at the Rose Bowl game. Too bad, Dick Madden and Herb Koch. . . . Paul Bender figures in the news again. This time for something we've heard of plenty people doing but not all them of accusing their wife of the mistake. Paul drove to work the other day and rode home on the bus. As he approached his home he noticed that the car was gone and wondered at once where his wife could have gone. He didn't realize that he had driven until he entered the house and to his surprise saw his wife. Then the light began to dawn. Kenny Hyman said that he drove to work to save bus fare and that he rode home on the bus to save gasoline; but just what is to be gained by this system has not been determined. . . . Tomorrow is the day of the Elex trip to Chicago. Hope all the gals have a good time and don't get lost in the big windy city.



Use of electricity in the home has quadrupled since 1920.

Squares Women Plan White Elephant Sale

A White Elephant Sale will be featured at a meeting Wednesday, Jan. 19, of the Women's Division of the General Electric Squares. Bridge will be played following the sale. Co-chairmen for the evening will be Mrs. K. K. Cooper and Mrs. W. H. Connor.

On or about this time of year, a familiar but unwelcomed slip of paper, prepared in duplicate form, is vested on all of us—our withholding tax statement. By this token we are reminded of a statement by F. B. Colbert in 1665, "The art of taxation consists in so plucking the goose as to obtain the largest amount of feathers with the least possible amount of hissing." . . . We welcome Wendel Haflich back to the section following his recent operation. Here is wishing you the best of health from now on, Wendel. . . . When it comes to answering classified ads via telephone, Dal Smith really rates high! How did you like the receptionist, Dal? . . . We bid farewell to Dick Lothamer and Martin Vogel who leave the section this week. Especially the second shift shall miss you fellows, but all wish you the very best of luck. . . . It was a great sight in seeing Bertha Burnau back following her recent illness. We all hope 1949 treats you much better, Bertha. . . . How musical can a man get? When Bert Brown was shown some color films of Clarence Roths' grandchild, Brownie looked at several of them without comment. Then suddenly he exclaimed, "That sure is a nice looking piano in the background!" . . . It is our turn now to wish Margaret Parisot a happy birthday. Margaret entertained all the girls of the section with a noonday luncheon last week. Many happy returns of the day, Margaret. . . . Our parting thought: Habit is a cable and we weave a strand of it each day.

Some of our ice fishing fans, it seems, just cannot wait until the ice is thick enough to support their weight. One is Buck Adams who went to a near-by lake one night last week in a driving rain to do a little fishing. As a safety measure he put sled runners on a boat and slid it out onto the thin ice assuring himself of a safe and sane evening of fishing. . . . One day Mable Miller met Nettie Sellers in the grocery purchasing some frozen horse meat for her cat. Mable observed this and asked Nettie if she was going to feed all that good meat to the cat. When informed that she was, Mable still seemed to think that it was a shame. Now Nettie wonders if Mable buys this kind of meat for her husband. . . . George Cowan is an enthusiastic Tum fan as he is always eating these little tablets. At times he frightens us as he resembles a dog with hydrophobia as he foams at the mouth quite profusely. . . . John Weber injured his foot while out hunting so he decided to go to the dispensary and have the nurse look at it. She put him to bed and placed the heat lamp upon the injured member. John went sound asleep and so did his leg for when he tried to stand, said leg gave way and he tumbled to the floor. . . . Someone sent Jim Goins a gift of three large rubber bands. He cannot quite understand why anyone would send him sucb a gift as he tells us that he absolutely has no use for them. Jim, you might use them to slip under your chin to hold your hat on during a high wind. By the way, Charley Richardson would like to know why you sent all of your Christmas cards collect. . . . Our old friend Buck Klinc is back after being confined to his home following a major operation. He looks good and he says that he feels fine. Anyway all of us are glad to have him with us again.

Certain turtles live to be 400 years old because they don't think, says a scientist. This leads us to believe that some people are lying about their ages.

Two Engineers Construct Model Trains For Hobby

Robert H. Johnson, Assistant Division Engineer in Bldg. 4-6, and Williard Hopkins, Design Engineer in Bldg. 4-6, are shown above working at their hobby of making model trains in Mr. Johnson's basement workshop. Both men construct the trains to scale out of both metal and wood.

Apprentice BROADCAST

By Eugene Werling

Be careful men, your safety posters are showing. A new assortment of Safety posters have been posted recently, thanks to safety committee chairman, Zurbuch. Kenny says there will be more at various intervals. These new posters are very illustrative and should make a good impression. Our safety record has been good, but let's make it an excellent one. Those dispensary chairs are still hard and get harder when you've been injured and are being given aid. There aren't any good safety posters there because when you're there it's too late to start reading. Let's all take heed to these posters and all safety reading material, equipment; and above all let's keep safety in our head and not just in the posters. Last week's safety pin award for a safe section went to the grinder section. Kenny was looking for a place to put up a poster when he observed that all grinder men had on safety glasses and safety shoes, so didn't give a lecture. The poster was on safety glasses. Remember, men, an eye can only be put out once so why take a chance? Jim Hoppel is the chief safety inspector for the grinder section. See Hop for safety glass and shoe inspection. Hop gave Chappel a break because he did have safety glasses although his safety shoes were missing. . . . Auer had no trouble keeping all traffic laws recently. The second day Myron had his car he had some gear shift trouble which resulted in a break down. The repairing took about a week after which time Myron was held up and robbed of $50. The robbery was presented in the form of a repair bill but Auer still claims that the "mechanic" had to use a gun. . . . The multiple drill press was nearly burned out Friday with Barnes and Smith at the controls. You sure do make those deadlines close, Bob. Maybe that's what was wrong with your bowling. . . . The question is "Does Dick White have any water out at Markle?" Last week Dick took a coffee bath and now he's expressed his like for an oil bath. His assistants were Dick Gebert and one drum of oil. Dick did do a good job of washing out his oil soaked trousers. . . . Last Thursday evening the draftsmen were laboring on their trig problems until someone decided to forget everything and stage a hunting and fishing expedition for the week-end. Enthusiasm began to spread and a combination of Whitie, Leffers, Birkenbeul, Lahrman and Bergman took off Friday for parts unknown. Birkenbeul came up with the prize fish, one mud bass about seven inches long. In the hunting department it was Skeets leading the pack. He didn't shoot any but he stepped on a couple of rabbits or came close to stepping on them. . . . Jack Kirlin claims his efforts were to no avail last week. After Jack had begged enough guys to play volleyball they cancelled play, but will resume action this week. Why don't more turn out once in awhile? A little exercise would be good for you and besides the little woman should have a little privacy once in awhile. How about it Schmidt, Miller, Obringer, Roby and some of you other guys?

Announces Elex Board Meetings

Charlotte Stanford, Elex president, has announced that there will be a board meeting at 7:30 p.m., Tuesday, Jan. 25. The meeting will be held in the large conference room located in Bldg. 8-2.

The night girls board will hold its monthly meeting at 1:30 p.m. Tuesday, Jan. 25, in Room 204, Bldg. 8-2. Rachel Fisher, Elex Vice President, will preside over this meeting.

Sharp people get that way keeping their noses to the grindstone.

TRANSFORMER TATTLES

By Mary Ann Miller

Your editor thought she should put a big column in the paper this week because Dean Lockwood couldn't find it last week. P.S. Neither could anyone else, Dean. . . . We are sorry to hear Sally Bryan is ill. We wish her a speedy recovery. Also glad to see Clara Cohagen back after her recent illness. . . . The green room gang welcomes Elsie Dunfee, Rita Fleckenstein and Matilda Nettle. . . . Mike Dunscombe thinks he needs a maid at his house. . . . Val Sitcler, Pearl Barry and Ceal Pranger should be better known as "Three Musketeers" or should we say "Hillbillies." . . . Sorry to hear about Louise Perry breaking her arm while ice-fishing. What's the matter, Louise, were the fish that big? . . . Benny Keller was called home to his rancho last week one day. His cattle broke out on a stampede and he had to get them back in the corral. . . . Ralph Braden won the prize out at the Southwest Club trap shooting. His score was 49 out of a possible 50. He's planning on going to Vandalia, O., to enter the Grand American contest. You hadn't better miss one bird, or it will cost you, Ralph. . . . The girls in the finishing section are finally catching up with Darreld Hirschfelder. They moved right behind his desk. . . . Congratulations to Leo Klejnot on the birth of a daughter. Also to Maurice Casey on the birth of a son. . . . We see that Mel France is taking his showers at work again. P.S. In the drinking fountain. . . . The Hildebrands of Hoagland Ave. are vacationing in Florida with the Trumans again. . . . We see that Glen Keck has fully recovered from his nervous breakdown. . . . Ralph Smith is capitalizing on ideas these days. It recently netted him $45. Did you tell mamma about this, Ralph? . . . Does Wayne Weimer know what 12-36-6 means by now? . . . Congratulations to Georgia Dinger on her recent marriage. We all wish you lots of good luck and happiness, Georgia. . . . The peace and quiet is getting on the boys' nerves since Tom Hildebrand went on his trip.

E. S. McKay Named To New Post In Air Conditioning Dept.

E. S. McKay, formerly Assistant to the Manager of Employee and Community Relations in the Apparatus Dept., has been named Advertising and Sales Promotion Manager of the Air Conditioning Department, it was announced today by H. B. Donley, marketing manager at Bloomfield.

Since joining G-E in 1933 following his graduation from University of Michigan, Mr. McKay has filled a number of positions—district publicity representative in Chicago, supervising editor in the publicity department at Schenectady, in charge of the District Contact Section, and manager of the District and Distribution Division of the Advertising and Sales Promotion Divisions of the Apparatus Department.

HERE and THERE in BUILDING 17-4

by Maxine Baker

Now that those Christmas bells are out of the way, you can start to worry about your taxes. Life seems to be one worry after another, but what is a poor mortal to do. . . . Mel Azar got quite a surprise on his birthday, complete with gifts and a cake too. For once he was really surprised and then he turned bashful and surprised us. Will wonders never cease? . . . Bill Dimond says he is going to move out of Huntington if those basketball scores don't change soon. . . . Walt Lorenz and Kenneth Gillenwater celebrated birthdays last week. Happy birthday, fellows. . . . Our master coon hunter who usually brings them back, dead or alive, has finally met his match in coons. From now on he is going to bring them back dead, completely dead that is, so says Walter Lydy. . . . We finally found out why Herb Ufheil hurries out to the parking lot right after work. He turns on the car radio and listens to Aunt Jemima's "Ladies Be Seated." He eats pancakes for breakfast too! . . . If you wonder why Ray Hoelle has been looking pale lately, he's trying to smoke up a box of cigars he got for Christmas. . . . Oh yes, Bill Geist said he wanted a new "bucket of bolts" too.

Half of the fun of eating at home is in not knowing what you're going to have—until it turns out to be just what you had for lunch.

Three Receive New Positions In Revision Of Store Rooms

L. D. Platt

K. J. Redding

E. J. O'Neill

The various sections of the General Stores Division have been consolidated into one division, which is now located in Bldg. 8-1.

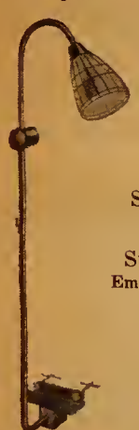
Under this consolidation, L. D. Platt has been named Supervisor of General Stores, and also Foreman of Stockkeepers and Non-durable Tool Grinders. K. J. Redding has been made Assistant to the Supervisor of General Stores, in charge of Tools, Stationery and Supplies, while E. J. O'Neill is Assistant to Supervisor of General Stores, responsible for Maintenance, Construction and Production Materials.

Mr. Platt began his General Electric career as a shop clerk in the arc lamp division in 1911. The next year he transferred to Tool Supply and in 1913 became a turret lathe and automatic operator. Returning to Tool Supply three years later, he was made Assistant Foreman of the section in 1920. He was made Foreman of the Tool Crib, Forges and Heat Treatments in 1932. In 1941 he became Supervisor of Non-durable tools and shop supplies at the Supercharger.

Starting work at General Electric in 1922, Mr. Redding's first job was that of a messenger. Since that time he was a time clerk; tool keeper; stockkeeper; order, invoice and price clerk, and foreman. In 1946 he went to the Danville, Ill., plant, returning to Fort Wayne in October of that year to work in the Cost Reduction and Inventory Control section in Bldg. 20-2. Prior to his recent promotion, he was a staff assistant in Bldg. 8-1.

Mr. O'Neill's service dates back to Jan. 4, 1926. He first worked as a clerk in Bldg. 20-1. The position he held before the consolidation of the General Stores was that of Assistant to the Supervisor in Bldg. 8-1.

Elex To Sponsor Label Collection For Aid To Blind



The Elex Club is sponsoring another service project in which they are asking everyone to bring in labels from cans of a dog food. These labels in turn will be sent to the Master Eye Foundation, Minneapolis, Minn., wbere the dog food manufacturer will redeem them for cash.

The money obtained by the Foundation is used to purchase, train and give guide dogs to the blind free of any charge.

Labels collected are to be given to contact girls or sent in to Irene Meyers' office, Bldg. 8-2, or Ceal Romary's office at Taylor St.

- Wire and Wiring Devices
- Paints, Colors
- Coffee Makers

Worth Repeating....

. . . WE BELIEVE, IS THIS EXCELLENT NEW YEAR'S RESOLUTION of Gerald Uhl, employee in Division 14, Taylor St., in the above picture. We wrote Gerald, Jan. 7 as follows:

"Permit me to congratulate you on your New Year's Resolution, 'I resolve to use extra care to avoid accidents, whether at home, at work, or in my automobile', which appeared in the Dec. 31, 1948, issue of the WORKS NEWS 'Inquiring Reporter' column.

"I am especially interested in the fact that your safety thinking goes beyond the machine you are operating. Accidents are the fourth greatest killer in the U. S. with approximately 70 out of every 100,000 population coming to the end of their life in this manner. We must extend our safety thinking beyond our job. During 1948 there were three on-the-job fatals within our entire Company, while at the same time nearly three times that number of our employees at the Fort Wayne Works (including branch plants) alone lost their lives in off-the-job accidents.

"Although a few days late, let me wish you and yours a Happy (safe) New Year."

HERSCHEL L. SMITH,
Safety Engineer.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Here we are with another new reporter for FHP Div. 17 office. Pat Dolan, our very capable reporter, has been moved to the General Foreman's office, so consequently yours truly is going to see what I can do with the column (with the help of every one in the office). Pat, we hated to see you leave the office, but at least you didn't go so far, but what you can still come around once in awhile. . . . From all rumors it seems Gordon Smith and Ben Fleek did a little better when they went ice fishing on New Year's Day, than when Gordon went with Charlie Cable a few nights before. Gordon, maybe it helps when you don't have Charlie along to heckle you. . . . Hugh Neely had what might have been a very serious accident one evening, but the way he told it, it sounded very funny. He was at the top of the basement steps when the steps broke and the next thing he knew he was back on the basement floor. But anyway Hugh, we were glad that you weren't hurt any worse than you were. . . . Gordon was home recently to ward off the old flu bug. His "little" boxer dog Duke felt so sorry for Gordon, that he wanted to show his sympathy by giving Gordon a little lick on the cheek every now and then. For some reason, Gordon didn't think much of the idea. . . . The girls in the office at last revealed their "Secret Pals" the other day. Most of the girls were very surprised to learn who their "pals" were, but a few of the smartys had known all the time. . . . That's about all for this time, folks. See you next week with all the latest happenings in Div. 17.

A Wisconsin boy shot himself in the foot so he could look like a hero to his girl friend. Now he hasn't a leg to stand on.

Tanks To You From Plating-Two

By Marie Lantz

In narrating choice news today it is customary for the conversationalist to credit the source of this story to "A Little Bird Told Me" origin. Today "Tanks" reverses tactics; tells this story "on the bird."

A little robin, for reasons bere unknown,
Missed out on annual flight to warmth of southern zone.
Came depth of winter snow and week of Christmastide—
He was found on a window sill, shivering outside.
Inside there burned the lights of a lovely Christmas tree.
And in the heart of man a kindred sympatby.

To his rescue came the man who saw him suffer there,
Brought him then, inside, to warmth and care
They went into his greenhouse where many flowers grow,
It was to be his home now, where he was christened "Joe."
When the florist sat Joe down, he didn't move nor sing.
Close inspection found Joe had a broken wing.

The florist pboned a friend, in Florida so warm,
Who promised to protect Joe against unwanted harm—
'Til time would heal his wing and Joe, again, could fly;
Once more to release bim to home of outdoor sky.
The florist arranged the robin's flight upon a plane.
And tbe populace gathered—to bid man and bird acclaim.

Lloyd Pinkerton's father, James Pinkerton of Peru, shows marked improvement from a serious illness, and was returned home from Duke's Hospital where he was taken Dec. 29. . . . This section extends sympathy to Ralph Eibling, whose mother, Mrs. Orrin Eibling, died Saturday, Jan. 8. . . . We welcome George Felts and bid farewell to Kenneth Carpenter, now of Bldg. 4-5. . . . This recent deluge of rain and spring weather isn't welcomed by ice fishermen. However, Cliff Robinson managed to get a gill before the thaw Saturday. Zimmerman, who was lured lakewards, reports that it was too dangerous to go out—on what was left of the ice surface. . . . For your scribe it was sort of a "lost week-end." Saturday's loss was a coat belt at the theater; it was a purse left at a neighbor's house overnight Sunday, and Monday morn I missed most of my voice. True, I came in a little hoarse but not—a galloping.

There certainly is no excuse for the draftsmen getting "1948" instead of "1949" on a drawing. Just look at all the new calendars! Some pretty good ones, too. . . . Just recently the FHP Sales Div. had a very welcome visitor. Fos Campbell, now of the Boston Office and formerly of Bldg. 4-6, paid us a visit. We certainly were all glad to see him. . . . We heard that Beth Hoover, now at Taylor St. and formerly of Bldg. 4-6, received a beautiful diamond for Christmas. Best wishes, Beth! . . . A new member to the club of "Men of Distinction For Their Famous Last Words" is none other than Wilmer C. Kruekeberg. (To find more out about the club, your reporter refers you to Wilmer since she has been unable to find out all the details). . . . The flu bug has bitten Mary Rogers, but we do hope to see her soon. . . . Happy birthday to Irene Whelan and Esther Batchelder of Production. . . . We welcome Wilma Kirby into the Engineering Div. Wilma will be secretary to I. E. Ross and W. A. Pringle, in the D.C. Div. We hope you will like Fort Wayne as well as you liked Kokomo, Wilma. . . . Bob Schulte sent out very clever blueprints announcing the birth of a baby daughter, Joan Marie, born Tuesday, Jan. 4. Some of the specifications listed on the announcements are "Fuel intake, tremendous; Efficiency, 100%." By the way, Bob, we heard you filled the role of the "Lady of the house" quite well. . . . Lela Omspach has finally put the plastic lunch box she received in the Christmas exchange to good use. It is now a terrarium garden for African Violets. . . . Herman Daler, Dev. Div., has the distinction of being the first in '49 to join the "floor sitters club." . . . The Dev. Div. welcomes Jim Burton, test engineer. Jim formerly worked in W. H. Sunier's group. The A.C. Div. received a letter from Rct. William Rutledge, stationed at Camp Brackenridge, Ky. He immediately became Company Clerk because he was the only recruit who knew how to peck on the typewriter. That's our boy, Bill!

AD-LETS

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSINC DATE FOR NEXT ISSUE
Monday Noon, January 17, 1949

LOST AND FOUND

LOST—Black leather billfold with red binding. Contains $35, driver's license and other papers with name Betty Jean Rose on them.

FOUND—One man's black leather glove. Found in Bldg. 17-2.

WANTED

THREE-BURNER GAS RANCETTE—119 S. Morgan St., Bluffton, Ind.

MISCELLANEOUS

FURNITURE REPAIR AND REFINISHING WORK DONE—Reasonable rates. 1123 Rockhill.

A number of people of the Sample Shop had nice New Year's vacations. Irma Zion went to Houghton Lake, Mich., to do a little ice fishing. She said the fish didn't bite very good, but she had a nice time. . . . Louie Miller (Bitter Boy Miller as he is better known) took his wife for a fast trip to Chicago in three hours. Say, does that Pontiac of yours have wings? Glad to hear you had a good time. . . . We wonder what came over Harry Rollins this winter. He doesn't say a word about ice fishing. What's the matter, Harry, too busy preparing that cottage for the happy event? . . . Happy birthday to Irma and Rosie on Jan. 5 and 6. . . . A new glow was added to our gang on last Wednesday. A test engineer by the name of Ruth Dingman. Welcome, Ruth. . . . Has anyone any old radios lying around? John Altekruse sure would like to get some tuning knobs. He says they will now bring 15 cents each. . . . By the way, have you read the best books of the year? Such as, "Two Nights in Paulding" by Stan Emery or "Why I Like Fog Lights" by Les Arnold and "Euchre Signals" by Ray Hamilton.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Frank Elder's newest nickname is "Thunderbolt." Rather dramatic, we think, and besides this one is printable. . . . Have you ever noticed the interesting color Russell Neireiter's face gets when he makes an error on a boring operation? It is kind of like he was silently choking on an oversized fish bone. The color is a cross between magneta and beet red. . . . Rudy Rastenberg lives so far north of Fort Wayne, he claims that the only law out there is Sergeant Preston of the Royal Northwest Mounted Police and his dog King. . . . One of our popular co-workers, Henry Littlejohn, has been transferred to Bldg. 19-1. . . . We wonder what George Noffze, the sage of Avilla, is doing nowadays way out west in Bldg. 19-3. Slip us some facts and figures on the gang in your end, George. Put something in the pot, boy. . . . George Foerster is still on the sick list. We hope he gets well soon, and gets back to work. We miss his cheerful face. . . . Remember, it's not too early to do your vacation planning. . . . Happy birthday to Jerry Stanger, Martha Musselman and Hubert Risser.

Winter is one of the nicest times to have in-laws visit you—or don't you wear earmuffs?

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

We want to tell all of our co-workers who have either been transferred or have joined the ranks of the unemployed that we miss them and that we hope it won't be too long before we will see them again. The place looks vacant since they left. . . . Jerry McKown is still going hunting and fishing, and as usual is still having the same luck—No fish or bunnies. . . . Nellie Biltz took advantage of her few days of vacation and visited Chicago. . . . Ruby Stucky, who left this week, will undergo a tonsillectomy at the Methodist hospital tomorrow morning. We all wish you a speedy recovery, Ruby. . . . Ethel Koons says she has found that you can't go places and do things on Saturday night and then try to bowl the next day. It just doesn't work, as she tried it last week-end. Emma Vaughn was there too, but she doesn't have a thing to say. . . . Ed Bireley took Bob Federspiel and Roy Orr hunting with him last week. We guess Bob and Roy just went along for the walk, as Ed got seven bunnies and they got nary a one. Ed says he thinks they just went along to get some fresh air(?) . . . Arveda Neal, Evelyn Lietzke, and Irene Ely were guests of Rose Liby last Thursday. It is reported that a good time was had by all. . . . We welcome Maxine Jones and Kenny Frick to the first shift, and also Chet Carey back into our section. . . . We also welcome Frank Beatty as our dispatcher, and tell George Denner that we are sorry to see him leave, but he won't be too far away to say "hello" once in awhile. . . . We wish Minnie Kendricks a lot of good luck. Be sure to let us know when the addition arrives, Minnie.

My, things have sure been quiet since Christmas. . . . Magadalon Fisher had a birthday Jan. 2 and Phyllis Crace had one on the first of this month. . . . Joyce Lakey, a former colleague, was back for a visit during her Christmas vacation from Indiana University. . . . Bob Gebert, that eligible bachelor, is on a two weeks' sea voyage as a part of his Naval Reserve training. Here's hoping Bob doesn't get seasick. . . . Ferne Runyan has joined the gals in the Complete File. (Ferne, please note.) Ferne says she had to put her name in the want-ad section to get it in the paper, but now she'll have to take that back. . . . Doris Smith is mighty proud of that little niece of hers, and why not, my what a cute little tike. . . . If you'd like some inside dope on the art of coon hunting in Kansas just consult Hilda Krause. Ooh they make her so angry! . . . Charlene Inskeep left us Dec. 31 to become a bride on New Year's. Here's wishing her and her hubby bushels of good wishes. . . . Well, chillun, until your Ed can stir up the pot of excitement a wee bit more, we shall have to say, "That's it."

JANUARY 17 THROUGH JANUARY 21

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Wide selection of home-made pies and delicious salads served daily.

Breakfast served at Broadway daily from 6:20 to 7:50 a.m.

Special dinners and parties arranged upon request.
Menus subject to change.

Inquiring Reporter

WHAT TYPE OF QUESTION WOULD YOU LIKE TO HAVE DISCUSSED IN THIS COLUMN?

HELEN HUNT
Bldg. 26-4

"I think it would be a good idea to give people a chance to voice their opinion on how to pay the Soldiers' Bonus."

D. R. GRAYBILL
Bldg. 6-2

"An interesting question would be: What is your job and why do you like it? I believe readers would be interested in what other folks are doing."

AUDREY YOUNG
Bldg. 17-3

"A question I would like discussed is: How many people read this column?"

RALPH 'L. DOLAN
Bldg. 27

"A good question would be: How, at this point in the evolution of our country, can we best prevent error in our economic behavior and provide for our children a lasting foundation with which they may remain free?"

MABEL M. BECK
Bldg. 19-2

"I would like to know: Just what is responsible for the laying off of so many of our present day industrial workers?"

Winter St. Beats Squares To Retain League Title

Winter St. remained the only undefeated team in the Inter-division Basketball League by beating the Squares, 38-35. As the score indicates, the winners had their hands full and were unable to establish a lead until near the end of the third quarter. The Squares came back strong in the last quarter but fell short as time ran out.

Small Motors tied with the Apprentice School at the end of three quarters. They scored just one more point than the Apprentice boys in the final period to win, 30-29.

Taylor St., unable to win a ball game this season, upset Tool and Die, 28-23. The Firemen and Transformer put on a real hair-raiser, with the firemen taking the verdict, 41-37. Transformer beld a commanding lead at the half, but some great playing by Stemmler, Morkoetter and Moodie tied the score in the third quarter. In the final quarter, the Firemen put on another spurt outscoring their opponents, 14-10.

Regional Warehouse held onto their No. 2 position in the standings by beating Fractional, 45-35. Trabel made a great effort to keep Fractional in the ball game by scoring 20 points before fouling out.

All five games were played Tuesday, Jan. 4.

Buckley To Narrate South -vs- Huntington Game Tonight on WANE

Tonight, beginning at 8 p.m., Dick Buckley will announce the South Side-Huntington game to be broadcast over station WANE under the sponsorship of General Electric at Fort Wayne. The game between South Side Archers and Mishawaka will be aired at the same time tomorrow night.

In last Friday's game of the city series, South bested North Side, 38-25, to take the lead in the city standings. The Richmond Red Devils defeated the Central Tigers, 63-58, in a game at the North Side gym Saturday, Jan. 8.

Cheer up! If you swallow your collar button, you at least know where it is.

("Lost all my money through hole in pocket. Needle and thread on table. Thanks, dear")

BALO COPYRIGHT 1948 CARTOONS-OF-THE-MONTH

John Lare has come from behind those dark glasses, and we're glad to see his face back to normal again. Better stay away from poison ivy, Johnny. . . . Incidentally, folks, we've been informed that our pet squirrel at the gatehouse has been living under false pretense. From now on it's "Harriet the Nut-cracker" instead of "Harry." . . . "I've got spurs that jingle, jangle, jingle" is getting to be a very popular tune around here lately. From what we're able to pick up via the grapevine, one of the fellows received a dandy pair of spurs, including instructions for use, from a few "well wishers" not so very long ago. Haven't heard whether he's used them or not. . . . No, Ray Kreigh wasn't having a chill the other day when he put his coat on—he had just discovered it wasn't quite time to "take-off" for lunch and decided to "sweat it out" the last few minutes. . . . The boys are wondering how Harold Fanning and his new Kelvinator Nash are coming along? Was that a refrigeration unit or a heater they installed in your car, Harold? . . . Bill Schible apparently had an ulterior motive in having the boys over the other night, besides breaking in that super-duper new poker table. Did you wind up with the price of a pair of shoes for the little gal, Bill? Seems like things were pretty cool around there and from time to time the boys had to go out doors to get warm. How come you didn't give the boys more heat, Bill? "Vulture" Edmunds again bled his fellow men for a meaty sum and has spent the entire week chuckling about it—as only a rich old bachelor can do. . . . There is always a feeling of sadness when it is necessary for our co-workers to leave us. To each and everyone of you, good luck. . . . Whitie Van Auken's beautiful tan didn't last too long. He says that Florida is wonderful though. Harry Gardner just got back from there, too. . . . Carl Waterson is on the sick list. Hope you will soon be better, Carl. . . . Congratulations to Art Smethers, the proud papa of a new son, Joseph Earl. . . . Happy birthday to Bob Hughes, Cliff Thiebolt, Myron Cole and Ralph Craig.

Partizan Chapter To Sponsor Party

The Partizan Chapter of Elex will sponsor a card party, at 8 p.m., Thursday, Jan. 27, in St. Paul's hall, corner of Barr and Madison. The public is invited.

Tallies, which are 50 cents each, can be purchased from Irene Meyers' office at Broadway or Ceal Romary's office, Taylor St. Those attending the party are requested to furnish their own cards.

The regular January meeting of the Chapter will be held Tuesday, Jan. 18, at 1 p.m. Bertha Piper will be hostess at her home, 325 N. Cornell Circle. Assisting her will be Lois Henry and Nual McVay.

G-E Club Beats Horton, Wabash, Essex Wire Teams

The G-E Club basketball team bounced back from their four defeats last week and took three straight. They defeated Horton in a league game by the score of 46-22. Then they took the starch out of a strong Wabash Chevaliers team by having an exciting third quarter, scoring 21 points with Wabash scoring just seven. The final score was 70-50.

The Club took revenge on Essex Wire, which had beaten them earlier. The score was 67-44 in favor of the Club.

The Club will play Wheatley Center Saturday, Jan. 15, at 8:30 in the St. Paul Lutheran gym. On Tuesday, Jan. 18, at Central, they will play Inca in a league game. The team will meet the First Evangelical church team at the club gym on Thursday, Jan. 20.

Fred Vietmeyer celebrated a birthday last week and also won the Gold Star award. Congratulations on both, Fred. That's really practicing safety on the streets as well as in the shop. . . . The recession is taking its toll in our group with the following leaving: Bob Mosshammer, George Miller, Max Buskirk, Ray Matthews, Walt Fry and Tex Dowell. Good luck, fellows, maybe we will all be together again sometime. . . . Louie Watt and Bob Repine went ice-fishing last Sunday. After a fair catch Louie asked Bob the time and it being 6:05 p.m. they decided to start for home. Bob didn't tell Louie his watch was set for Eastern Daylight Time. Anyway they arrived at Louie's house 20 minutes before they started. . . . Monday, Richard Nix carefully lined up a job in the arbor press and was all ready to reach for the handle before he noticed the handle was gone, having been removed about two weeks ago for repairs. . . . Belva Imel also hurdled another of life's milestones last week. . . . Gurney Lindley is the newcomer to the machinist group this week. George Houck came on days from second trick in the lathe group. . . . Say, Russ Deveny, don't tell us that new Mercury is falling apart already. . . . Everyone tries to pretend that Lyle Claphan and I were the first to get the little burlap bag, but H. McMaken and H. Jones should have permanent possession after three skunks in one week.

Plating, the last place team in the Small Motor League, the first half, came up with three wins Wednesday evening to go into first for the second half title.

Jim Daley had a 603 count on games of 206, 189 and 208.

Dick Madden came up with a 243 game using his brand new Christmas present. Other 200 games were rolled by Lowell Welker, 235; Frank Gitter, 219; Ed Reese, 213; Ty Cook, 210; Ife Holmes, 204; Paul Berghorn, 203; Erv Haugk, 203; Walt Mertz, 200; and "Brownie" Brown, 200.

Apparatus League

Team No. 2 walked off with the first half bunting, beating teams 9 and 11 by the big margin of just one game.

O. Anderson came up with a 603 on games of 198, 215 and 190.

Two hundred scores: Ty Cook, 216; Frank Gitter, 208 and 205; Arnie Horstmeyer, 211; "Sore Thumb" Blomker, 213; Charlie Briggs, 208; Don Waldrop, 202; Bill Piercy, 212, and Williams 207.

Masonic League

The Patrols and Ionic teams started the last half with three victories each to share the lead.

Larson came up with a 601 count. Two hundred scores: Lauterberg, 242; "Sap" Quinn, 236 and 201 (wonder what the other game was?); Hinrichs, 234; Larson, 229; Ruhl, 215; B. Somers, 214; Martz, 204; and Paul Bohn, 204.

Interdivision League

One 600 count was rolled by Les Shroyer, 206, 199 and 221 for a 626 total. Two hundred scores: Milt Marks, 240; Erv Haugk, 235; Iannelly, 232; Hal Fanning, 219; Hal Spath, 214 and 210; Don Dimke, 212; Pop Matthews, 205; Bob Buck, 204; Giese, 204; Adam Farrell, 203 and 202; Anderson, 200, and Leo Edward, 200.

The Broadway Bread and Water team is looking for a 200 bowler (what team isn't?). Paul Billman was the only member of the team not to rack up a 200 count Wednesday evening.

We notice that Adam Farrell is back in harness with the Doodlebugs. His suspension for two weeks must have done some good as he came up with two 200 counts last Wednesday.

Transformer Division League

The E-I team is out front with 14 wins and only 7 losses. Two hundred games were rolled by Hobbs, 200; Cartwright and Gnau, 202; Downie, 204; Miller, 205; Macy, 211; France, 213; and Moore, 218.

Bowling and Stuff

The Office League started the G-E teams off to a very slow takeoff in the city tournament as Standardizing and Designers were the only one to break 2900. Bad start—good finish, we hope.

DISSENSION! Boy, those Screwballs are just one happy family, Ha. Two of the boys won't even speak to each other. I wonder what they'll do when they howl doubles together.

You don't have to be big to master this game of bowling, as proven by Harry Smith, 17 year old, 106 pound, high school student, who paced his team to the $1,000 first place prize in the Ray Schalk Sweepstakes. Smith had games of 257, 233, 206 and 232 for a dazzling 928 series.

Speaking of boys, the Star Bowling and Billiard team of the Moose Boys League has been doing O.K. They are in fifth place in the city tournament.

The following was printed in "The Gutter Ball" Div. 14 bowling news sheet:

"It should be of interest to you to know what the G-E Club is doing for us and for the great sport of bowling. The following is what it means to us in dollars and cents:

"Four chickens	$9.00
Refund to League at End of Season	$60.00
Payment of Team Sanctions @ $2.50 per team	$15.00
Entry Fee to City Tournament	$60.00

"In addition to this direct benefit to us, the G-E Club is entering a team in the local industrial league, four men and three girls teams in the state tourney, two men and one girl team in the national tourney. They also sponsor girls' teams in the City Tournament, men's annual tournament, and the women's annual tournament. They also offer a trophy for the highest single game and highest three games rolled at the club in league competition by a regular team member.

"The total donations by the G-E Club to the bowlers will amount to over $4300 this year. Let'a take our hats off to the G-E Club, fellows."

There will be open bowling Monday, Wednesday, Thursday and Friday from 3:30 p.m. until 6 p.m.

Flash

Ionic team of the G-E Masonic League took over first place in the city tournament with a 3,153 count. The team was paced by Howard Hickman who shot the biggest series of his life a rolliking 679 on games of 242, 258 and 179.

Grinders of the G-E Winter St. League also got into the money with a 3,024 count.

The average small motor has more than 150 parts.

Ticket Sales Skyrocket For Golden Gloves Tournament

Frank Newport, at the far right above, is shown at the G-E Club training two boya in the art of boxing as preparation for the Golden Gloves tournament.

Boxing fans are urged to get their tickets for the 20th annual Golden Gloves tournament as soon as possible inasmuch as advance ticket sales indicate sellout crowds for all four nights.

An unprecedented sale of tickets has been reported, with 15% having been sold by mail order even before sales officially opened.

The amateur boxing clasaic, sponsored by the G-E Club and Journal-Gazette, opens at Nortb Side high school Thursday night, Jan. 20. The tournament will continue on the four following Thursdays, Jan. 27, Feb. 3 and 10.

Expect Over 100 Boxera

Entries are expected to go well over the 100 mark.

Two champs from last year will be competing to regain their respective titles: Bob Thomas of Van Wert, lightweight, and Odel Billingsley, light-heavyweight.

Every boxer who steps into the ring receives a miniature golden glove as a souvenir, and every boy who wins at least one bout receives a pair of satin boxing trunks. The champs and runners-up in each contest are awarded full boxing outfits. The Sportsmanship Trophy goes to the most outstanding boxer of the tournament. Two were presented last year because of a toss-up by the judges.

Tournament coach, Frank Newport of the G-E Club, has been conducting training classes for novice boxers at the club's gymnasium each night during past weeks from 7 to 9 p.m. This instruction is offered free each year to all amateur boxers.

Limited to 3 Rounds

Under the rules of the Amateur Athletic Association, Golden Glovers box just three rounds of two minutes each. They are not permitted to box more than that in one bout, regardless of how close the contest migbt be. The judges must make a decision, even though they might prefer to call it a draw.

The gloves used are eight ounces for the four lighter divisions and 10 ounces for the four heavier classes.

The boxers in Golden Gloves ordinarily compete only once in one night, although late in the program, in divisions that are top-heavy with entries, they may be called upon twice, with a long rest in between.

The tournament is open to all amateurs in the Fort Wayne area who are at least 16 years of age.

G-E VOLTMEN

J. E. Estabrook, Assistant to the Works Manager, wishes to acknowledge the memorandum received several weeks ago in which several hundred G-E people expressed a very sincere interest in continuing the Voltmen baseball team through 1949. As announced in last week'a issue of the WORKS NEWS, the G-E Club will sponsor the Voltmen through the coming season and it ia expected that an even better team will be fielded than the 1948 championship nine.

Red Braden, Manger of the team, and the G-E Club join Mr. Estabrook in expressing appreciation for this vote of confidence.

OUT OUR WAY

By J. R. WILLIAMS

A Report on Pay

—and Prices—and Job Security

AT THIS TIME of the year when everyone is adding up the progress made in the past twelve months, we are happy to report that the average earnings of our hourly employees at General Electric now are at a rate more than 90% higher—and weekly take-home pay more than 90% greater—than in the year 1940.

And—beyond what is in each pay check—there is another 7% to 11% paid out by the Company for our employees or put away in their interest. This is for General Electric Pensions, free Life Insurance, the Savings and Stock Bonus Plan, Company contributions to old age benefits and unemployment insurance, and other benefits in the direction of health and security. Such "extra pay" was (in the first three quarters of 1948) at the annual rate of over $50 million.

As compared with the 90% rise in the average hourly earnings of General Electric employees, the "cost of living" (according to the Bureau of Labor Statistics Index at November 15) had risen during the same period about 72%. And General Electric's "cost of living" as a Company increased even more than that of our employees—since General Electric's purchases of steel, copper and all other materials from outside suppliers were made at prices averaging 81% above 1940.

Yet, despite all this, the prices our customers paid us for General Electric products averaged only 40% above 1940—and as the result of the Company's research and planning they were far better products with more and better features than our pre-war models.

In the process, there were more and steadier jobs at General Electric than ever before. In fact, hourly rated jobs at General Electric have nearly doubled in number since before the war. Constant attention and effort have helped to keep these jobs surprisingly steady and secure during the interruptions and shortages of materials that have plagued business due to post-war reconversion, strikes, transportation tie-ups, and numerous other difficulties.

For the past sixty days both industry and public have been showing a sudden reluctance to buy as freely in many lines as in the earlier part of the year. The resulting drop in public demand for certain products has unfortunately meant fewer General Electric jobs in some areas despite our best efforts.

But increased employment in other lines has more than offset these decreases, and **General Electric is happy to report that in the last week in December there were actually slightly more hourly-paid people working at their jobs than there were sixty days before.**

We are going to keep on trying—we are going to do all within our power—to keep every General Electric job just as steady and secure as we possibly can both now and in the future. And we know we have got to do this by each of us in General Electric pitching in to do his part in the job of helping to sell General Electric products—after doing the very best job possible in designing them to suit our customers, and then in manufacturing them economically to General Electric's high standards of quality and reliability.

New Safety Record Set

To Distribute Tickets Monday For Lamp Show

EIGHT PERFORMANCES OF 'LIGHT SORCERY' TO BE GIVEN HERE

Arrangements for distribution of tickets to employees for the eight "Light Sorcery" shows to be given at the G-E Club Monday and Tuesday, Jan. 31 and Feb. 1, were announced today by R. E. Zook, Supervisor of Personnel.

Tickets will be available to all employees of the Broadway, Taylor St. and Winter St. Plants from foremen and supervisors beginning Monday, Jan. 24. Extra tickets will be made available only after the needs of all employees and their families have been fulfilled.

The hour-long performances will be presented by lighting specialists from the Lamp Department of the General Electric Company at 1:30 p.m., 4 p.m., 7 p.m. and 8:30 p.m.

Black—and light—magic, in the

Foremen's Assn. To Hear Dr. Lee

Dr. Ralph D. Lee will address the Foremen's Association at its meeting Wednesday, Feb. 2, at 8 p.m. in Kreis Stoltzenau hall, 111 E. Brackenridge St.

Dr. Lee is a member of the Public Relations Department for the General Motors Corporation. His topic will be "Leadership and What It Takes."

An engineer and inventor, Dr. Lee pilots his own airplane in traveling on many business engagements.

Election of officers will follow the talk and the evening will be concluded with refreshments and a few social activities.

George Lewis Receives $115 For Top Suggestion

92 Share $937.50 For Ideas

George A. Lewis, Motor and Generator Div., received the largest suggestion award this week, with 92 employees sharing $937.50 in awards. Mr. Lewis' idea, which amounted to $115, pertained to the use of fountain pens for drafting practice.

Kenneth L. Guisinger, FHP Motor Div. 15, was next on the list with a $50 award for his suggestion on B. C. Rotor take-offs. For his idea to change assembly on rotation leads, Bernard J. Braun, Decatur, received $30.

Twenty-five dollar awards went to the following: Claude L. Gill, FHP Motor Div. 13; Marlin D. Johnson, FHP Motor Div. 14; Marguerite J. Wyant, FHP Motor Div. 15; Frank E. Wolter, FHP Motor

More Stockholders Getting Dividends

The dividend on General Electric Company stock will be paid Jan. 25 to the 249,339 stockholders of record as of Dec. 17, an increase of 489 over the preceding quarter, according to William W. Trench, Company Secretary.

1948 Is Record Year For Fort Wayne Works

G-E employees last year set a new safety record for the Fort Wayne Works.

Based on both the number of lost-time accidents and on the days lost, figures released today by Herschel L. Smith, Safety Engineer, showed the best safety record in the history of the Works.

Smash All Past Records

The frequency of accidents (number of lost-time accidents for one million man-hours) for 1948 was 3.2. The best previous year was 1938, when a 4.25 freqeuncy was recorded. This showed an improvement of 1.05.

The severity of accidents (days lost per one thousand man-hours) showed a reduction of from .107 in 1942, the best previous year, to .076 in 1948, an improvement of .031.

A combination of frequency and severity of accidents was .24 last

Payroll Division Mails Statements To All Employees

The Payroll Division has mailed withholding tax statements to all employees. A change in the income tax law requires that every person who formerly used the withholding tax form as an official tax filing form to fill out a new one. The new form requires that the withholding tax statements be attached.

1,350 HEAR DR. CAROTHERS MONDAY

The photos at the top, above, show two views of the crowd that packed the G-E Club auditorium Monday night to hear Dr. Neil Carothers. Dr. Carothers is Dean of the College of Business Administration at Lehigh University.

At the left, the dean is shown being presented a portable radio by W. H. Crouse as a gift from all those who attended his series of nine lectures during the past few months. In the center photo is the group who took part in the presentation of gifts following the talk. Included in the picture are W. H. Crouse, M. L. Sordelet, K. D. Strong, C. H. Matson, Dr. Carothers and J. J. Clarkson. A sink, with disposall unit and electric dishwasher like the one above, has been installed in Dr. Carother's home at Bethlehem, Pa., as another gift paid for out of a collection taken by those who attended the lectures. The picture at the right shows one of the wives, Mrs. I. H. Freeman, talking with the dean following his talk.

Approximately 1,350 persons heard Dr. Neil Carothers at a meeting of G-E division heads, foremen, supervisors and engineers and their wives Monday night at the G-E Club auditorium.

The speech, "Where Are We Now," was sponsored by Management for the benefit of the wives of those who attended the dean's series of nine lectures on basic economic factors. Dr. Carothers was introduced by C. H. Matson, Works Manager.

Attacks Communism

Opening his talk with a fiery blast against communism, Dr. Carothers stated, "Communism is founded upon a false economy built upon hate and revenge, yet pretends to bring security and equality."

"Communism already has swallowed up nine countries and is continually moving westward," he continued.

The dean then discussed the Marshall Plan in its present attempts to "revive industry and hope in the Western nations."

"England in desperation turned to socialism, but it is a democratic-socialism," he pointed out in a review of the conditions in Europe and Asia. He added: "France is on the edge of surrendering to communism; 450 million persons in China are already in its grips; and,

You Can Save Both Gasoline, Lives By Slowing Down That Car

It is generally known that the faster one drives beyond about 30 miles an hour the more gasoline and oil his engine uses per mile. Figures have been compiled by the United States Bureau of Standards to show just how much the consumption increases with speed. The table, as reported by the American Automobile Association, is based on the performance of an average car capable of going 18 miles on a gallon of gasoline at 30 miles an hour. Here it is:

10 M.P.H.	18.7 miles per gal.
20 M.P.H.	18.9 miles per gal.
30 M.P.H.	18.0 miles per gal.
40 M.P.H.	16.4 miles per gal.
50 M.P.H.	14.6 miles per gal.
60 M.P.H.	12.6 miles per gal.
70 M.P.H.	10.6 miles per gal.
80 M.P.H.	8.6 miles per gal.

In tests conducted at the Indianapolis Speedway by the A.A.A. it was found that nearly seven times as much oil was used up at 55 miles an hour as at 30.

To Achieve Success You Must Avoid Making Biggest Mistake

The Arabs have a proverb: "All mankind is divided into three classes: those that are immovable, those that are movable and those that move."

To achieve success in any undertaking, you must not only move, but you must keep moving. You must always be trying to contribute to progress. Maybe you don't always know how things are coming out, but if you keep busy and keep your mind ever active, you won't be courting failure because you are lazy.

Benjamin Franklin once said "The man who does things makes many mistakes, but he never makes the biggest mistake of all . . . doing nothing."

Competition Supplies Impetus To All Leaders Of Mankind

Competition is harsh, sometimes cruel, but it works. It gets results. It compels improvements in methods that multiply the efforts of a man a hundred and a thousand times.

A high school graduate can outline more utopian ideals in an hour than the world can achieve in his lifetime. Only after the young man has had his face rubbed against the grindstone can he be taken seriously.

Of course, the highest type of man is one who, in full knowledge of what is, keeps his mind and vision open to what ought to be, and supplies impetus to push the world in the right direction.

These men are rare. They are the leaven that has caused mankind to rise slowly but surely to the stature of free men.

HOW WOULD YOU LIKE . . .

TO go out to the woodpile every morning and whack up enough wood for the breakfast fire in the old range?

TO hike over to the ice house every morning and get a chunk of ice so ma could keep the milk sweet and the butter firm?

TO go out to the well every morning and fill up the water buckets so ma could wash and cook all day?

TO trim the wicks on a lot of kerosene lamps and polish the chimneys with old newspapers so you could read at night?

TO dance all night with your best gal and then walk home four miles through the snow swinging an old oil lantern?

TO go to bed every night with the chickens because there wouldn't be anything else to keep you awake?

IF YOU DID, you'd like to live in the GOOD OLD DAYS they're always talking about.

Just Rub It and the Genii Appears

HUGH CRANE discusses WHY NO DEPRESSION?

NEW YORK—If there ever was a time when the signals were all set for an old-fashioned depression, it's now. And yet it doesn't seem to be coming.

Economists started predicting way back in the first year after Pearl Harbor, 1942, that there was bound eventually to be a depression after this war, if only because there was a depression after every other major war for a couple of centuries or more.

First Boom—Then Bust

This depression was supposed to come along after the war-time shortages had been made up. First would be a temporary boom, just as there was after the Napoleonic wars, the American Civil War, and World War One. Then after that, their advice was, "Hold your hat."

And most depressions start with little depressions in some part of industry. These upset confidence, and everybody starts cutting down on their buying and their production, and pretty soon the little depressions snowball into a national depression; prices go to pieces; jobs fade.

Well, all these things have now come to pass. There's been a post-war boom all right, for three years. People have made up most of their war shortages, except in houses and automobiles. Most prices have turned down. And little depressions have sprung up in the clothing industry, radios, the movie business, machine tools, and a few other places.

Where Is the Crash?

It's no wonder that the Russian economists at a recent meeting of the Institute of Economics of the Soviet Academy of Science are beating their brains out without result in trying to figure why this country doesn't have the great economic crisis that capitalism is supposed to slide into somewhere about now.

But if, as they think, capitalism is on its last legs, it's a near-corpse that refuses to lie down.

One of the things that's happening that isn't working at all the way business-cycle theory says it should is the strength in the "capital goods" industries.

Industry Led Trend in 1932

In the old pre-war days when consumers for one reason or another began to cut down on their buying, industry promptly went them one better and cut down even more rapidly on its own buying of new plant and equipment. One of the sure things about a depression was that the demand for capital goods would fall off many times faster and harder than the demand for consumer goods. While consumers might cut down on their buying of groceries by 20 per cent, industry cut down its buying of steel, machinery, turbines, and so on by 90 per cent. During the 1932 depression the demand for steel fell from around 90 to less than 20 per cent of capacity, and the market for machine tools, railroad rolling stock, and heavy electrical goods fell off almost to nothing.

But this time it's working the other way round. While consumers are staying away in droves from department stores, hardware stores and men's clothing stores, most of the capital goods industries are still tooling along with more orders than they can handle. The steel industry for instance confidently expects to keep running at nearly 100 per cent of capacity through the present year.

Report Exaggerated

The long and the short of it is that something so fundamental has happened that the Soviet economists are way out on a limb in their predictions about the capitalist system. Like the report of Mark Twain's death, their expectation of its collapse is "greatly exaggerated."

That goes also, incidentally, for the expectations of orthodox American economists who have combed the history of business cycles and acquired great learning in how these cycles used to operate. But we're fooling them. Their learning is out of date. It isn't working that way. The capitalist system today isn't the same as the capitalist system they've studied about. Something fundamentally new has been added.

Next week I want to explore some of the changes that have fluffed up the guesses of orthodox economists both here and in Soviet Russia.

The OLD PHILOSOPHER Says:

The other day I was talking with one of the men whose duty is to keep waste and spoilage losses down to a minimum. That's a big job if anyone should ask me and I don't envy the chap who has it. But the fact is that waste and spoilage losses are mounting and someone has got to do something about it, lest these losses get completely out of line.

I remember back to my manual training days in school. We had an instructor who came from far off Sweden. He was a stickler for accuracy and a tough man if he thought you were wasting materials or spoiling them. His favorite saying was "Plane it smooth and true," when he was explaining how to plane a piece of wood. Ever and always he dinned that phrase, "Plane it smooth and true," into our ear. Finally we learned how to do it and in the doing, we conserved our materials, got better products and won the praises of our instructor.

So in this waste and spoilage business does the analogy apply. If we figuratively "Plane it smooth and true," we cut down losses by waste, for we don't use more material than we need and we cut down losses from spoilage by the same token for we don't need another piece because we spoiled and wasted the first one.

Let's "Plane it smooth and true."

A positive conviction without accurate information is a dangerous thing.

550 Elex Members Attend Ice Show In Chicago

Approximately 550 Elex members boarded a special train Saturday morning, Jan. 15, for Chicago to attend the Sonja Henie Ice Revue. As the girls left the Pennsylvania Station, they received candy from a local business concern, and from then on the trip was uneventful. Aboard the train, they settled back for a restful trip, played cards or visited.

After arriving at Union Station in Chicago, their time was their own until 7:15 p.m. when they met for the buses to take them to the stadium. The "Big City" absorbed the entire 550 as each party went shopping, sightseeing, attending shows and visiting friends.

The girls boarded chartered buses for the stadium at Union Station. During the show, everyone thrilled at the spectacular sets, costumes and superb skating.

Following the performance, the girls returned to the train, and at 3 a.m. Sunday, a tired group arrived back in Fort Wayne after an enjoyable time in the Windy City.

In the layout of pictures, top row, first picture shows a portion of the group at the Fort Wayne station. In the foreground are Charlotte Stanford, Elex President; R. A. Zook, Supervisor of Personnel; and Rachel Fisher, Vice-President. The picture on the right shows the Winter St. girls aboard the train enroute to Chicago.

The Fort Wayne girls are shown in the first picture, bottom row, meeting the girls from Danville. Left to right are Irene Meyers, Lois Drewett, Rachel Fisher, Charlotte Stanford, Norma Grimes, DanGE President; and Laura Jenkins, Danville plant. In the other photograph are several of the girls boarding the bus for the Stadium, while in the picture below are four very tired girls catching a few winks on the way home. Left to right are Lois Drewett, Tommy Williams, Betty Puff, and Charlotte Drewett.

Dr. Carothers

(Continued from Page 1)

India is ripe, what with its conflict of Mohammedans and Hindus destroying themselves through a beastly hate of each other."

Gives Position Of America

Dr. Carothers then reviewed our own economic position.

In explaining the economic forces at work in the United States, the dean pointed out the pattern of economic law as proven by history.

"At time of war this nation went into unnatural production at a rapid speed," he said. "We had swollen wages and profits."

"People saved their money then, but are now spending it extravagantly," he continued. "We are buying things now at prices we should not pay."

If the government steps in to control prices, he predicted, the country will be wrought with shortages and black markets.

This boom period following the reconversion cannot last, he stated. "People have not learned from the past, but continue spending recklessly."

Recalls Depression

He then recalled the first postwar depression following World War I and compared the trend then with that of today. He said that after the first world war the postwar prosperity lasted seven years, then followed a depression.

"There is no reason to believe we will make an exception this time," he stated. "There is nothing to encourage me to believe that we now have a new situation."

He then decried the lack of adequate leadership in this country and attacked "the outpouring of government funds and vast increase in taxes."

"At the present time the Russians are waiting and praying for an appalling depression in Ameriea in hopes the Marshall Plan will stop," he said, "and that we will have such a violent overturn that we will be ripe for a communist revolution to arise in this country."

Tells What To Do

In pointing out what the ordinary citizen ean do, Dr. Carothers outlined:

"We ean retard these economic forces by (1) thinking straight and saving money rather than squandering it; (2) studying economic forces and keeping up with current comments of all authorities; (3) refusing to accept propaganda without checking it against the comment of impartial men; and, (4) voting for the ablest men for high office."

"The twin curses of all ages are not war and epidemic, but poverty and insecurity," he stated. "We are grappling with both these problems, but we will never do it by social hates, following lies, or electing demagogues to office."

In conclusion, Dr. Carothers stated:

"Our nation faces in the next five years many problems—economic distress, social unrest and bitter political rivalry. Some predict a dictatorship will arise out of another depression and that we will go the way of other nations. I don't share these prophecies of doom. I see trials and tribulations, but no nation with a spirit such as ours will ever surrender to dictatorship."

Squares To Hold Bridge Tourney

The G-E Squares will hold its annual bridge tourney tonight and Friday, Feb. 4, at the club's hall on East Berry St. The tournament will start at 8 p.m.

Lamp Show

(Continued from Page 1)

best Houdini manner, will be presented by Alston Rodgers, master of ceremonies. He is shown in the picture above with a "Ukelitely," an amazing instrument resembling a ukelele which produces music played by a light beam.

The demonstrations will feature such feats as a man walking away from his own recalcitrant shadow—with the aid of a million-watt light and a beam of infra-red light.

Spectators will also see a 10,000-volt, high-frequency coil light a cigarette and make an unconnected fluorescent lamp glow brightly. A balloon in the act of bursting will be photographed at a speed of 1/3000 of a second, and the shadow left on a screen.

"Light Sorcery" is currently on a tour which will eventually include most of the 48 states. It was created by engineers and lighting specialists at Cleveland's famed Nela Park, headquarters for General Electric's Lamp Department research.

The show's visit here was arranged by the Fort Wayne Apparatus and Air Conditioning Works and local representatives of the Lamp Department.

Coon hunting sometimes turns out to be as dangerous for the hunter as the hunted. At least, that's the experience Charlie Reed had on his latest hunting trip. In going over a fence, he had the misfortune of breaking a bone in his foot. He is confined to his home, but we hope it will not be long until the injury will be healed and he will be back with us. . . . Arnie Johnson is still buying cigars for Park Schemehorn and Paul Kennerk. It seems they always come up "tails" for him. . . . Glad to have Edna Fletcher back with us after an absence of six months following an operation. . . . Birthday greetings to Irene Pulfer, Vivian Frauhiger and Theresę Prine. . . . Virgil Allmandinger and Ray Lepper spent the week-end fishing in Michigan and brought a pound and one-half bluegill in to prove their luck. Of course, we have only their word that they have 73 more just like it. . . . Today we are saying goodbye to Ruth Papenbrock who is leaving to be married soon to Edgar Field and will make her new home at Lake Gage. She received a gift from the division and along with that go the best wishes of all of us for her future happiness.

Yesterday is a cancelled check. Tomorrow is a promissory note. Today is ready cash; spend it wisely.

Safety Record

(Continued from Page 1)

year, in comparison to the best previous year (1942) when it was .54, an improvement of .30.

The worst year for accidents on record was 1926, when the frequency was 17.58; the severity, 1.545; and, a combination of the two showed 27.16.

Pile Up Large Total

Five divisions at Fort Wayne and the Decatur Plant, all with over 1,000,000 accident-free man-hours between accidents, piled up a total of 10,437,938 accident-free man-hours.

They were as follows:

FHP Motor Div. 14	2,536,280
FHP Motor Div. 15	2,217,504
FHP Motor Div. 33	2,028,830
Tool Division	1,463,399
Decatur Plant	1,242,415
FHP Motor Div. 13	1,087,718
Total	10,576,146

This is equivalent to the entire Works in operation approximately four consecutive months without a lost-time accident.

In 1947 six divisions totaled 9,272,722 accident-free man-hours or nearly 1¼ million less than in 1948.

Gain Six Over 1947

In the Fort Wayne Works' annual Safety Contest, 24 out of 28 divisions and plants qualified for Meritorious Safety Performance certificates issued by the General Safety Committee. This was a gain of six over the 1947 performance.

Nineteen divisions improved their records in 1948 to make it a record-breaking year for safety.

The certificates are awarded on the following basis:

(1) One year without a lost-time accident.
(2) One million man-hours between lost-time accidents.
(3) A combined frequency and severity of .40 or less.
(4) 50 per cent improvement over the record of the previous year.

The divisions and plants that will receive certificates are:

FHP Motor Div. 14, FHP Motor Div. 15, FHP Motor Div. 33, Tool Division, Decatur Plant, FHP Motor Div. 13, Kokomo Plant, FHP Motor Div. 1, Tiffin Plant, FHP Motor Div. 16, DeKalb Plant, FHP Motor Div. 17, Wire Division, FHP Motor Div. 19, Insulation Division, FHP Motor Div. 20, Distribution Division, Transformer Div. 95, Motor and Generator Division, Transformer Div. 94, FHP Motor Test, Transformer Div. 93, Benton and Danville Plants.

Activities Justify Record

Some of the activities on the 1948 safety program included:

Safety was on the agenda at meetings of foremen and supervisors 550 times during the year.

There were 360 divisional and plant safety committee meetings during 1948, with nearly 3,000 safety items on the agenda.

A total of 251 recorded safety inspections were reported.

General foremen rated their foremen on 13 different safety performance items quarterly during the year.

Active in C. of C.

Employees of the Company were very active during the year in community and national safety activities.

Serving on the Chamber of Commerce safety council were:

General Chairman and member of the Executive Committee—Herschel Smith, G-E Safety Engineer.

Fleet Safety Committee—Jay Greer and Chester Kowalski.

Fire Prevention—Howard Miller and Ernie Hanauer.

Industrial Committee — Loyd Bodenhamer and Harry Gargett.

Traffic Safety Committee—C. B. Smith.

The three major safety activities at the Fort Wayne Chamber of Commerce were attended by nearly 200 G-E employees.

Smith On National Council

Herschel Smith served the past year as vice-chairman of the National Safety Council's Power Press Section and was elected its General Chairman for 1949 at the 36th National Safety Congress and Exposition in Chicago.

In reviewing the safety record of the Fort Wayne Works for 1948, Mr. Smith stated:

"Employees at the Fort Wayne Works have repeatedly shown that they can improve good safety records as well as bad ones. The year 1949 offers a tremendous challenge to improve a good record. We will try to accelerate all phases of our program aimed at being a 'jump ahead' of the accident, while at the same time placing more emphasis on correcting hazards which cause 'near accidents' and 'minor injuries' as well as those which cause loss of time. Furthermore, we are planning a better 'off-the-job' safety program."

Top Suggestions

(Continued from Page 1)

Div. 17; Jerome Coffee, Decatur Plant; and Stanley G. Gongaware, Specialty Transformer Div. 95.

Those who received awards ranging in various amounts from $5 to $20 are listed below:

FHP Motor Div. 1: Golda L. Duff, Frank J. DeVaux, Arthur M. McNamara (two awards) and Howard C. Taylor.

FHP Motor Div. 13: John P. Bastian, Wilbur C. Hinton, Marvin E. Pierce, Walter F. Fry, Arthur F. Sorg, Ernest C. Tatman, Glenn C. Yager, Marion E. Oman, Frieda G. Morin, Fred Kryder, Jr., Clarence Hartman, Ira Augspurger, P. A. Schoppman (two awards), Bertha Albrecht and Theodore C. Reed.

FHP Motor Div. 14: Robert Sealover (two awards), Charles Hoffert, Herbert F. Seslar, Fred H. Vogt, and Theodore C. Reed.

FHP Motor Div. 15: Vergie Stephen, Willis K. Dillman (two awards), Milo W. Reade, Forrest Allman (two awards), Mary J. Sitko, Joseph B. Howard, Walter Amacher (two awards), Kenneth L. Guisinger and Mary E. Stewart.

FHP Motor Div. 16: Geraldine Snyder and Herb Halley.

FHP Motor Div. 17: Eugene P. Kelsey, Clifford Balyeat, Myrtle Cramer, John F. Driver, George N. Miller, Gerald E. Gamble, George P. Kapp, Raymond A. Pickett, Maurice L. Roc, Ralph T. Martz, Fred Young and William D. Baker.

FHP Motor Div. 19: Joseph Schible (two awards), Edward A. Huhn, William L. Fisher, John R. Miles, Mary Jane Meyer, Leo Heerscbe, Richard J. Boyle, Raymond B. Schuckel and Margaret M. McCaffrey.

Decatur Plant: Archie Smitley, Victor Kuhn, Ray Kelsey, Clement Meyer and Arthur Denig.

Tiffin Plant: George George (two awards), and Alton Lonsway.

DeKalb Plant: Ernest Kastler.

Specialty Transformer Div. 91: Chester T. Laughman, Ed Kaliker, and Robert A. Bunyan.

Specialty Transformer Div. 95: William C. Mills, Jr., and Raymond H. Adams.

Danville Plant: Robert Wright, Floyd W. Smith and Merle J. Miller.

General Service: Anthony W. Crow and Lester E. Bienz.

Miscellaneous: Dorothy M. Leininger.

Honored At Retirement

A luncheon was held last week at the Taylor St. cafeteria in honor of Clara Lake, FHP Div. 14, who left the Company to go on pension. Left to right in the picture are Rosamond Schooley, Ethel Evans, Clara Lake and Esther Watson.

More Stockholders

(Continued from Page 1)

Eighty-seven per cent of the stockholders are individuals, Mr. Trench said. Brokers, banks, bank nominees and other business enterprises hold less than two per cent, and trustees, guardians and other fiduciaries account for 10.7 per cent. Approximately six-tenths of one per cent of the stockholders of record are education and charitable institutions, owning more than 410,000 shares.

Mr. Stork has been busy the past few weeks. Herbert Springer's wife presented him with a baby girl New Year's Day. She was born at 11:48 a. m. Herb has two sons so is it any wonder they are so thrilled about Cheryl Jean's arrival. Noel Young is also a proud father. He has a baby boy. Is it any wonder "little Mike" and his "Pappy" are walking on the clouds? . . . Carl Kloepper can also add another "Little Exemption." Their son was born Jan. 8. . . . Margaret (Peggy) Beerman left last Friday. Good luck and let us know if it is a boy or girl. . . . Stella Strong is "grandmother" again. Two weeks ago it was a boy, last week a baby girl. . . . Wilbur Poller is on a new kind of diet. All the cake he can eat. Doesn't it make us girls jealous? . . . Les Green found out his shoes weren't waterproof. But it took a lot of water puddles to convince him. . . . We understand Ruth Curley has a "side-line" repairing jewelry. However, she isn't too highly recommended as she recently burned her own necklace in half. . . . Helen Miller lost a good bet to Louise Roberts. Louise made the 3-7-10 split. . . . What's this we hear about Nora Roser trying to get a longer ride on the bus? Fall asleep, Nora? . . . Bea Hans' motto is "Be Prepared". She lost the heel off her shoe going to the cafeteria but she had an extra pair in her locker. . . . Did Elmer Buuck get a purple shirt? If so why doesn't he wear it? . . . What's this we hear about "Hot Lips" Kissinger? It seems he put a stick of chewing gum in his mouth and tried to light it with his cigarette lighter. . . . Bill Weber has been telling us what a wonderful cook his wife Jessie is and last Friday he brought us all some cake. All we can say is, we agree with Bill—it was delicious. . . . Carl Langas, former co-worker, has been appointed to the City Fire Department. . . . A luncheon was given for Clara Lake, who was pensioned last week. . . . Janet Hire had a tonsillectomy last Friday. We hope you are feeling much better, Janet.

Suggestion Brings $50

Kenneth Guisinger, Bldg. 4-2, right, and his foreman Alton Kissinger are looking over the application of Mr. Guisinger's recent suggestion which netted him $50. His suggestion covered changes in the take-off of Wright Die machines so that scroll stock could be used in place of strip stock in making certain B. C. rotor punchings.

Last Tuesday evening, a member of our family in Bldg. 17-4, put his tools away, cleaned off the top of his bench and laid his apron upon his tool chest to take a few weeks leave for hospitalization. Late Friday afternoon we stood by his bench quiet, solemn, stunned by the news of his death. Paul Menze was one of the family here for many years, 27 in all. Some of us knew him all of these years, others for only a short time; yet his smile of friendship held a welcome warmth for all. We will miss the hours of working together side by side, the last moments of merriment as we left for home at the close of each day and many of the moments of brotherhood we shared. It is difficult to shape words into meaning to express the feelings that are in your heart, but forever in our memory will be the sorrow we feel at the loss of our friend. To us, the apron on his bench waiting for his return will remain a tribute to his work, the same as we here, on the material things of living, as well as his work in the spiritual home of friendship with his fellow men. Our sincere sympathy to the family. . . . Are you looking for a nice place in the country? If you are, see Junior Mannisto, his place is for sale. . . . The new President of the Fort Wayne Archery Club is Charlie "Deer-Hunter" Hunt. . . . Ever watch Les Stauch tell a joke? He resembles a rhumba dancer jumping up and down. His jokes are really funny because he always laughs so hard! . . . Our Research Department headed by Test Engineer Elwonger is now tackling a very difficult problem. The problem is "Is twice as hot the same as half as cold?" or "Is heat the absence of cold or is cold the absence of heat?" . . . Our best wishes to Carl Langas who left Friday to join the City Fire Department. When presented a few parting gifts, Carl was as red as the fire truck! . . . Some people can acquire the most nicknames. One such person is Norb Lose. Some of his more appropriate nicknames are "Dim Bulb," "No Nod," "Lover Boy," "The Human Capacitor," "Baby Sitter"—just to mention a few! . . . Since Ray Solga is back the rest of us boys won't get ribbed about hair cuts. Although Ray isn't getting any criticism about his hair cut because he hasn't got any yet. He certainly is getting reminded of his need of a scalp mowing. . . . What was that whizzing by? The fire truck without the siren? No, just Elnor Laymon in her new red car! . . . No. 82 is very significant to Cora Conrad; it is just the new high score in hearts. Say, C. J., the object in that game is low score. . . . Ruby Lydy, your water and egg diet did agree with you very well. Better try convincing a few of the other girls to try it too! . . . Could it be that Maxine is trying to regain her lost youth by using a 1943 calendar. Steady, Maxine, you can't turn the clock back! . . . Birthday wishes to George Miller, Pauline Nau, Wilbur Gray and Sol Andorfer.

Retires Under Pension Plan

When Charles Kloepper, Bldg. 19-4, left to retire on Company pension, he received a farewell gift from his friends in the General Tool Division. In the picture is Mr. Kloepper, left, receiving his gift from Ralph Stewart. J. R. McFeely is looking on.

Sure enough, I am still here and will try to give you a few of the details that have happened and are about to happen to the second shift. . . . Al Windmiller, the Geneva Whirlwind, is now at his position in Shipping and from the last report is doing great. Herman Myers is working for Mr. McDougal in the Winding Section. Of course, there are a few more changes, but you will have to look for yourself. . . . I will have to say that new Hudson of Jake Eady's is all right, after seeing him give a car a push the other evening. Thanks, Jake! Anyhow it wasn't a Ford. . . . Lawrence Beal, formerly connected with the white collar workers, has taken over the duties of law and order in and around the Plant. All he lacks now is uniform and brass buttons. . . . Henry Dellinger has replaced Fred Busse in the cage in Plant 1, as Fred has gone to Plant 2 to work in the cage. . . . Guy Secaur, the boom-boom man from Plant 1, is at Plant 2 on the second shift now. Hi, Guy! . . . I wonder whatever became of cord set Fisher, I mean the fellow they used to call Plymouth Fisher. . . . Maybe I am losing out but I haven't heard of Jake Eady pulling Paul Myer around the lot this winter, or has Pauly changed cars? . . . Poor Pete Fairchild, the big brass of the Assembly Line, has his eyesight afflicted and is wearing those rose colored glasses. We don't know what is the matter, but Pete has a name for it. . . . McDougal, the boy wonder, has been talking in a whisper all week, and I don't think it is from yelling at his wife. . . . Chalmer Knittle is the proud father of a son. Our congratulations, Mr. and Mrs. Knittle! Ruthie Knittle is an aunt of the little fellow. . . . What we saw wasn't a bush, but "Speck" Hebble with a beard. Speck, do you really think growing that beard is worth winning a bet? . . . Howard Gehrig, the hammer wielder, is now learning to be a machinist. . . . You haven't seen anything until you see Ralph Rabbitt square dance. . . . Happy Birthday to Doris Resh. We hope you have many more of them, Doris. . . . Our sympathy to Richard Drake upon the death of his mother.

Fractional Fiction 4-5

By Elaine Sutter

While investigating the moans and groans last week, we found everyone had received their wage receipts. Once again that tax paying job is here. . . . We say farewell to Grace Schwab, who is staying home to take over the household duties. . . . We welcome Jo Franklin to 4-5. Jo is our new rotary file girl. . . . Last Friday we heard an awful commotion in the office. Looking around we found Dorothy Amstutz lying on the floor. With the help of Harold Struver she managed to find her chair which rolled out from under her. . . . Eileen Schuler, Ilo Motter, Bette Rinker and Alice Dahman were among the Elex members who saw Sonja Henie's Ice Review. . . . The K. C. lines were sorry to see Frank George and Kenneth Beber leave. They also welcome Margaret Wyatt and Carol Schoaff to the first trick. . . . Anyone knowing the whereabouts of an unbreakable thermos bottle, please inform Joan Meyers. She seems to have a lot of trouble with the ordinary kind. . . . Mary Baumgartner has created her own style turban. She wraps her apron on her head to keep warm. . . . Happy birthday to Eileen Schuhler and Georgia Trevly. Eileen received a beautiful bouquet from her husband. . . . Welcome back, Melba Morr. Melba just returned from a wonderful honeymoon. . . . We are sorry to hear Mary Gileff is on the sick list. . . . Our deepest sympathy to Alice Hahn on the death of her grandmother.

We welcome Howard McVay as our foreman in the Die Cast. Goodbye to Clyde Helms, who is leaving to be a foreman in the 10-20-30 Frame Line. We sure are going to miss you, Clyde, and come over and see us often. . . . Adele Weitfeldt, Maggie Moore, Maxine Luker, and Harriett Welling went to Chicago last week end to see Sonja Henie's Ice Revue, and report that in spite of the weather, they had a wonderful time. . . . Norman Wolf's wife also went to Chicago, and so Norm went out by himself Saturday night. From what we hear, Mrs. Wolf had better stay home and take care of little Norm, 'cause he forgot to turn off the radio in his car, and he couldn't start said car due to a run-down battery. . . . Tommy Williams visited her folks last week end and then got stuck with K. P. duties for her dad. She says she fixed him the only thing she knows how to cook. The eggs were delicious. . . . Vern Whitlow and Sy Liechty went to the ball-game the other night, but Sy didn't see much of the game and doesn't even know what the score was. He says they sure didn't have girls in school like that when he was a boy. Now, Sy. . . . Welcome to Ellen Saul, who has joined our group, and hope you will like us all, Ellen. . . . We hear that Bob Federspiel sure was disgusted at Roy Orr's Pontiac last Saturday night, especially when it pushed his grill in while he was trying to start it by pushing it with his car. Bob says he wonders why Roy doesn't trade it in on a good used pocket-knife. . . . Welcome to Charlie Penn, Supr. of Test and Inspection, and to Don Niles, our new foreman of Test and Inspection. . . . "Ducky" has gone on the second shift and Bill will be the leading operator on Inspection and Test.

Employee Receives Dolls From Uncle In Germany

Carl Stadelman, Marie Thornhill and Erna Mann, Bldg. 4-2, are examining the dolls Erna received from her uncle in Dresden, Germany. The dolls were hand-made in Ertzgeburg, Germany.

Erna had sent packages of food and other articles to her uncle in Dresden. He sent these dolls at Christmas-time to show his appreciation for the packages.

Specialty Transformer, Ballast Divisions

Ignition Transformers

Help Keep Homes Warm In Winter

Shown above are the four oil burner ignition transformer models being featured in the new "Standardized Manufacture" program.

Four million people are more comfortable this winter because they are using oil burners to fire their furnaces and heat their homes. Each one of these oil burners uses an ignition transformer and Fort Wayne's Specialty Transformer and Ballast Divisions are one of the three largest manufacturers of these units in America.

The story of these ignition transformers touches history, war, and the solving of an engineering problem. But, before we get too far along, let's clear up one point. Don't mistake an oil burner for any of those small space heaters which burn the liquid fuel. The true oil burner has a combustion system similar to the engine of your automobile—the fuel is vaporized under pressure, then ignited by a high-voltage spark (in most cases, 10,000 volts). It's from the resulting "ball of flame" that you get the heat. These oil burners can be used to fire hot air furnaces, or boilers for producing steam heat or hot water.

The history of the oil burner covers the past 25 years and G-E has been making ignition transformers for 20 years. During the last war, oil burners played their part in operating portable laundries in the front lines and airplane steam cleaning equipment.

And what about the engineering problem? For years oil burners had a great bugaboo—radio interference. Because of the peculiarities of electricity, some of that high-voltage spark energy would sneak back into the home electrical circuits and "raise Cain" with radio reception. The problem was how to keep this from happening. About five years ago, General Electric's engineers devised a method of "two-way self shielding" for the ignition transformers which finally put an end to all radio interference coming from the transformer. Extensive laboratory tests have proved that G-E ignition transformers are superior to all other brands in this respect.

The most recent advance in ignition transformer manufacture is our present attempt to standardize the types used. For years there have been hundreds of different oil burners on the market. Because of variations in their design, almost all of them required a transformer of slightly different size or shape. (For instance, in one electrical rating, the Specialty Transformer and Ballast Divisions has 1500 specifications for ignition transformers which vary only in size and shape!) To the transformer manufacturers this meant production in small quantities and therefore high production costs. It was only a few weeks ago that General Electric announced its program of standardizing manufacture on four models, designed to fit the vast majority of oil burners. This "SM" program (standardized manufacture) will result in large savings in production costs which are being passed on to the burner manufacturers, and in turn, should be passed on to the ultimate buyer. Thus, if you are one of the 6,000,000 people expected to buy oil burners this coming year, you will be able to save money and at the same time, insure yourself against radio interference by looking for the G-E nameplate on the transformer of the burner you intend to buy.

Glamour boys of the Wire Division are Walt Konow, with his pink shirt, and Herb Thompson, with his red, white and green plaid necktie. . . . We know now why Wimpy Lemper always follows a bag of oats around like a horse. This seems to be one of the qualifications of a farmer. . . . Cleo Crowe's vitality is running at a new low since his vacation in Florida. Cleo says he just must go back to the fountain of youth for a refill. . . . They tell us Joe Ceveris made a New Year's resolution not to chase any more fire trucks. That is a good one, Joe, hope you keep it. . . . Some folks talk about things going to the dogs. Porky Schoenefeld's things go to the mice. They keep eating all of Porky's records. Must be some good food in those records, or maybe they think the records are not worth saving. . . . Bob Pickett is no juggler, but he can remove paint with a blow torch, start a fire, burn his leg and put out the fire all at the same time. Bob's advice is don't try it if you don't want to be laid up with a roasted leg. . . . Bob Baals' rabbits are similar to Stop-The-Music program. They multiply and multiply and multiply.

Motor-Generator Static

Thought for the week: "Play not the peacock, looking everywhere about you to see if you be well decked, if your shoes fit well, if your stockings fit neatly and clothes handsomely."

The new mystery melody has us stumped. We are going to leave this to Cliff Milnor in "Lines And Angles," though we will say this, it sounds like a version of a military bugle call and "You Gotta Get Up." . . .

Goldie:

Every night on the radio
I'll either hear some Jane or Joe
Yelling till the volume grows
"I'm All Yours In Buttons and Bows."
But Goldie tried a different ang.
And, in our place, the bell she rang.
She sings alone or with the gangs
"I'm All Yours In Buttons and Bangs."

Pards:

Shultz and Archbold are pards
Who just dote on sending cards.
Neither has one bit of shame,
Homer always gets the blame.

We don't want to display too much pride in the results our column produces but would like to mention one outstanding case. Last week we published the fact that Dick Hobson was willing to part with his old 1929 Buick on any sort of trade. The day after the "NEWS" carried this story, Dick was driving a new Buick convertible, so you see it pays to tell your troubles to a "Static" reporter. . . . Junior Brosius again gains the spotlight and brings honor to his co-workers by being accepted into a national organization. Don't remember the name of this organization, but their emblem is a safety pin. . . . Our thought for the week for prospective brides and grooms: "Love is a dream but marriage is the alarm clock that wakes you up." . . . Bob Kite, Bldg. 19-1 Paint Shop, is conducting a shoe collection—for a worthy cause.

Ramblings 31-2

The engineers (not assistants) accept the responsibility of editing this column as offered in this column last week. We understand editing to mean editing and not writing. . . . Leave it to the "little woman." Do you know why the Monday evening lecture by Dr. Neil Carothers was given for engineers, supervisors, foremen and their wives? Mrs. Warren Brighty was disturbed by some ideas the ladies had about economic situations. Having heard about Dr. Carothers' lectures from her husband, she wrote a letter to the Company explaining why she thought wives should be included in the educational program. C. H. Matson informed Mrs. Brighty that the Monday lecture was the result of her letter. While riding the Broadway car one afternoon, Mrs. Brighty noticed one of the men who boarded the bus at G-E, looking at her. Someone called him Dr. Carothers, so she decided to talk with him before leaving the bus. She approached the man and asked if he were Dr. Carothers. "Yes," he said, "but don't bother to tell me who you are, I know. You are the one who caused me all the trouble." He had seen her picture in the evening paper that week and recognized her. . . . Curly Mannan note: Here's the story for which you have been wanting — Mark Smith is always ready to help the ladies. One winter during the ice and snow, a lady motorist was having trouble getting started at an intersection. Mark got out of Joe Shelly's car and pushed the lady's car. Having done his good deed, he jumped back in Shelly's car. Shelly's car? Oh no, much to Mark's surprise, he discovered he was in another man's car and sitting on the man's lunch.

Tanks To You From Plating-Two

By Marie Lantz

One thing leads to another. Toward the end of last week we felt misgivings about our column, chagrined because we capitalized on a news story from the morning paper. This particular story related the tale of a robin, rescued by a florist in Yonkers, New York, who found the bird suffering from a broken wing and he sent him, then, via airplane to a friend in Florida. This flight was made by wing—but not his own. There was so much interest in "Joe" (as christened by his benefactor) that a crowd of over three hundred Yonkerites turned out at the airport to bid him goodbye. This story held so much appeal that we wrote a poem about it. Now comes this Monday morn and Fred Zimmerman reports that they've had a robin in their back yard all winter and Fred and his wife feed it daily. "And," Fred adds, "he doesn't need mending. He's O. K.—but sort of old and fat." And, no wonder. . . . We welcome Harry L. Conner from Winter St. and bid farewell to Fred McGee. . . . This wet and warmish weather claims more "cold" victims. The latest is Clyde Hemrick, who says he'll regain his good disposition when he loses his cold. We didn't know he'd had one—cold—of course. . . . His name is now "Beany" Merriman. Beans is the one thing that he is fondest of; instead of having his wife cook a small portion which would suffice for one meal, she cooks enough to last at least a week or more at a time. After this last batch, beans will be the fondest of things he is "of ain't."

Celebrates 35th Year At G-E

Frieda Kaiser, Bldg. 26-5, completed her 35th year with General Electric last week, and at that time she received a 35-year certificate from Management. In the picture which was taken during the presentation, left to right, are Paul Peterson, Alma Kaiser, her sister who has 39 years' service; F. N. Banks, Miss Kaiser, and Louis Sordelet.

The Kaiser sisters have worked in the same section throughout the 35 years.

Autographed Books Given At Elex Club's Meeting

Sue Hitzeman, Winter St.; Wilma Redding, Bldg. 26-5; and Lois Tritch, Bldg. 4-6, standing left to right, are watching Kathryn Turney Garten autograph the books the girls won as attendance prizes at the Elex Club book review, Thursday, Jan. 13. Lois Shaw, Bldg. 26-3, won the book, during the night girls meeting at noon the same day. Copies of "Abigail Adams," the book Mrs. Garten reviewed at both meetings, were given as attendance prizes.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

According to Harold Mundt, Hudson, Ind., where he resides, must be quite a place. As everyone knows, it lies in the Michigan snow belt, and always goes just a little farther in all things climatic. The snow is always deeper, the cold, colder; and in summer the heat is hotter. . . . George Foerster is still on sick leave. We hope he's feeling better. . . . George Wolfe attempted to cure Charles McCormick's rheumatism one day via the electrical method. Charlie refused to take a second treatment. . . . Frankie Enderle has a fund of clever little stories, but refuses to tell them. Perhaps he thinks we are intellectually too immature to appreciate them. . . . Ralph Jacobs, Bldg. 31, who visits us occasionally, is the nephew of the Centralia, Ill., watermelon king. He is selling bred gilts for a party in Bldg. 19-B. If you care to buy a gilt for the children or just as a pet, see Ralph. . . . If you have noticed lately the sparkling shoe shines, the immaculate haircuts, and the meticulous dress and behavior of the west end ex-GI's, extend your praises to Francis (Fearless Frankie) Kartholl. With his lashing tongue and domineering sneer, this gallant ex-MP and guardian of democracy has been exerting all of his persuasiveness toward getting them back on the ol' military beam. . . . Congratulations to Mr. and Mrs. Maurice Archbold on their baby boy, Stephen. . . . Happy birthday to Lloyd Brown, Vaughn Hiser, Lawrence and Leonard Bresler, Ward Hall, William Molthan, Donald August and William E. Hoke. . . . A closing ode of a girl who is leaving: Here's goodbye to old 19, and the darndest job I ever seen. It makes some fat and others lean, but it wore the hair clear off my bean. It's the darndest job I ever seen, but I liked it! Now this job wasn't hay, 'twas more like corn. You shake like jell on a frosty morn. They will shake you to and shake you fro, whether you tape 'em fast or tape 'em slow. I've had poor work but never got this low, but I liked it! I can't write what I'm thinking, not at this time, for I can't make any nice words rhyme, but here is the thought: "There'll come the day" when more than one of you will say, "I miss the tales and those corny jokes, I'd like to see her, wouldn't you, folks?" The gang up here is the average run, some nicey nice and others fun. You can tell the ones that I run with; they don't say "Peth," they all say "Pith," but to take the gang all in all, you're a pretty good bunch, I like you all. If your coils come to you nice and straight, you just get started and your tape will break. Then you teeter right on the slot, like a feller steppin' on an icy spot. Now it's going good you say, alas, and what happens? You find a patch. This job would make any one sick, but still it's better than diggin' with a pick.

We wonder if we could make up a song called "Grandma's Gettin' Younger Every Day", cause we really think they are. Could it be the hair cuts or the clothes? I sure would like to know. . . . We also would like to know if Esther Gulcia Finkhouse Brown, "Blondie" to you, does all her shopping at Murphys as every time you go in that store you bump into her. That's all right, Blondie, it's a good place to shop. Just ask me, I know. . . . If anybody is looking for a new and easier way to comb their hair, just ask Harry Brattain.

Apprentice BROADCAST

By Eugene Werling

Peace once again rules in old Bldg. 12-2. Peace and quiet with its beautiful serenity has come over the school last week and will also continue for next week. Our able bodied performer of the past months has adhered to Uncle Sam's call. A return engagement has been scheduled for Jan. 31 when the bands will play, the drums roar, and our own nature boy comedian will return. No tears have yet been shed on his departure but they will when he returns. Of course, you know I can be talking of none other than our own Don (G.I. Joe, Uncle Tom, Hoagy) Konow. Don is taking his training in the Naval Reserve. Dick Gebert is also brushing up on his radio work and deck swabbing with the reserve. Dick ought to be able to give Don some pointers on his swabbie experiences. The gear and heat treat section misses Dick's helical gear experience. They may surprise you Dick and divide right some day. . . . Mrs. Frede's note of thanks for the school was appreciated very much. We hope that she is recuperating rapidly and glad the candy and book was helpful. . . . The lost and found bureau had an anonymous call last week. The call came from an annoyed secretary who lost a record book. This lost secretary, or rather record book, belonged to Millie. She had Sherlock Zurbuch on the trail but it ended a complete mystery. Millie gave out with some information what the book contained but as yet she is safe because it hasn't been found. . . . The city bowling tourney attracted widespread attention from the entire apprentice bowling league but attention is all that was present when the scores began to add up. None of our teams got into the money. However, all did well but the Mikes. The tough opposition supplied by the Compasses was too much for the Mikes. The Scales and Dividers, ruled the underdogs, came up with some good games and may have supplanted some of the leaders in the individual departments. . . . A star has been born! A new shining light entered into the Zurbuch family Jan. 12, a boy of nearly nine pounds. Congratulations, Kenny and Eilcen. . . . Joe Raupfer is having troubles. He tells us that he forgot his apron on Monday but he probably didn't bring it in for a purpose. Those chairs do get dirty, Joe. . . . Don't forget your state taxes have to be in by Jan. 31. With that statement I can do only one thing, get back to work and earn some more shekels.

Andy Frank is sure making a name for himself since he released his latest book, "Easy Money In Poker." We understand it's packed full of helpful hints, such as "How to beat a royal flush" and "How to approach your wife after the game," and many others. . . . Art Everett gives the boys a treat every now and then when he gets out his new "piece" pipe and smokes that choice tobacco he received for Christmas. . . . Dick Kastings has been receiving some advanced valentines, we're told. That big red one has sure been getting around, Dick. . . . Happy birthday to Pete Helmer and Bill Schible.

Help! Help! Ambulance! The nurses in the Bldg. 8-1 dispensary heard the buzzer on the emergency door buzzing like mad. They ran to see who had met with an accident, only to find Verne Castle trying to get into what he thought was the Employees' Store. The exasperated nurse explained that it was not an automatic door leading into the Employees' store, but that pretty red button was for ambulance service only. . . . Harold Hohman has given up playing with toy trains and now devotes his spare time to caring for his tropical fish. He has a large aquarium, and even a large dipper for catching the fish, some fun. . . . Now we have heard everything, Paul Merkey tells it like this: He fell asleep while waiting for his wife to return home from town. When Mrs. Merkey did arrive she was unable to arouse her sleeping husband so she went around to the back door and pounded some more. About that time Paul got one eye open and started to get to his feet only to find that one of his legs had turned to rubber. After picking himself up from the floor he stumbled to the door at last and later found that he had a badly twisted ankle. . . . Audrey Hickernell was hostess to the Birthday Club this week. She entertained with a dinner at the Berghoff Gardens with the following girls present: Norma Krall, Luella Bixler, Dorothy Askren, Florence Knight, Laurel Weaver, Eveleen Bennett, Eileen Hennen, Marjorie Gorden, Marilyn Roehm, Dorothy Mills, Audrey Hickernell and Belle Buchan.

Receives Congratulations For Service

Harry Billman, Bldg. 19-1, completed 30 years of service with General Electric. The picture was taken when he received a congratulatory letter on his anniversary. Left to right are Al Deininger, William Hanke, William Kaiser, Mr. Billman, Adam Farrell and William Greider.

Did you notice the collection of large, shiny apples on Wilson Sims' desk recently? His "A" (Advance Engineering) class students are taking no chances. Each apple was appropriately tagged as to the week it represented. What do you bet—the one intended for exam week had a big fat worm in it! . . . From what I hear, everyone's welcome to Betty Horner's new home when she and her hushand move in a couple of weeks. . . . Dick Stoner, Drafting, has been showing quite a few of his magic tricks lately. Can't decide whether Dick wants to prove to people he is a magician or if he is in need of shows. He really knows enough ahout his tricks and can pull the wool over anybody's eye. . . . We welcome in Bldg. 26-2 the Transformer Payroll Section from Bldg. 18-1. Those who came are: Iona Gray, Ruhy Beard, Mary Brinker, Jocile Stohlman, Wilma Dowden, Evelyn Bradhury, Betty Spittler, Margaret Tennissen, Dorothy Andrew, Gloria Miller, Al Berg and Ray Soughan. . . . The Planning Section is very happy to welcome Dick Burdett. He was formerly of Personnel. . . . We are all glad to hear that Mr. Driftmeyer is improving. He has been in the hospital due to a heart attack. . . . Vera Reeves is always up to something. She has been trying out Dick Sellers' new pipe. With the pipe in her mouth, she reminds one of Mommy Yokum, but she just doesn't like the tohacco (Rum Maple). Tell Dick to change his brand to tobacco, Vera. . . . Usually, married women know how to cook, hut Theresa Lindenherg is still learning how to hoil eggs. She put the eggs in to boil hefore going to hed and forgot about them until morning. . . . Going hack to the suhject of heing welcome in the new homes of the girls up here, Vera Kilian and her hushand, Dick moved in their hungalow on Smith Street last week end. She says we're quite welcome to come but to he sure to wear our working clothes. "A job for all," that's the Kilian's motto!

Thisa and Thata
SPECIALTY MOTOR

Hazel Herron got a hig hump on her head. I sure can think of a better way than hitting myself on the head with a brass pipe to kill myself! . . . Fern Painter had a birthday a few weeks ago and her hushand took her out for supper, so she got all dressed up. She put on a new dress and tbe gifts she got from her friends at work and also wore some new earrings. Imagine her surprise when she got home and found one earring laying on the dresser and the other on her ear. Here she had spent the whole evening wearing just one earring and thinking she was so dressed up! . . . Happy hirthday to Bessie Potts, Ruth Mutton, Thelma Purdue, Russell Carter and Lubadell Dowden. . . . So glad to see Ardola Johnson hack on days. I hope you stay with us for awhile. . . . Our friend Clara Clark is going on pension this week. We will miss you hut know you will he happy just keeping house for Louie and the girls. It will give you plenty of time to make some of those good cookies. . . . Johnny Ormiston said he felt like he had been heaten up—his hack and hip were so sore. He says he is laying those small linoleum hlocks on the bathroom floor. . . . A speedy recovery to the following who are on the M.B.A. list: Pauline Selking, Kathleen Brinker, Harold Dalman and Gertie Bender. . . . Joyce Schraeder says "He who laughs usually gets laughed at." She caught her hand in the wringer hut is hack at work —no bones broken. . . . For hire! One singer, week-ends only, very reasonahle. See Pondo Vlasheff in Test in Bldg. 4-3. They say be is a real singer! . . . Ed Boedeker in Bldg. 4-3 test will have to watcb his motors a little closer than he has been or they will all walk away. This is for your information, Ed, keep one eye open and East from the hrake at all times.

More than 75 babies were dragged into a bahy show in Florida. It was a crying shame.

Poverty is a hlessing in disguise —and the disguise is perfect.

One can see that Wally Clayton takes his joh seriously, or did you notice that extra large size hottle of aspirins on his desk? Or, could it be an income tax headache? . . . Happy Birthday to Delores Giltz and Bill Pringle. . . . Congratulations to Glenn Seabold, the proud father of an 8 lh. 3 oz. (no less) hoy, Terry Lynn, horn Sunday morning at Lutheran Hospital. . . . Colleagues of P. A. Berghorn might well call him "Sport" these days; have you noticed the brown sport shirt and loud yellow tie "Comho"? . . . Did you note Fory Carlson's expression when he looked up one day for his 30-second rest period and saw Don Spaulding sitting across from him? Don was transferred from the AC to the DC Section for several months. . . . If, and when, you see Carl Fiertag's heaming face, congratulate him for receiving his first patent. When you see the morose look of Ralph Mesings, sympathize with him for "He's in the Army Now". . . . We're all happy (especially Mary Smoak) to see Virginia Mariotte hack after a 7-week absence. We've missed your smiles and pleasant personality, Virginia. . . . Lydia Swift has heen hubbling and huzzing over all the new togs you'll see her wearing soon. Her fiance, Bob Wilkening, gave her a new sewing machine for her birthday. . . . Did you see the heautiful picture of Betty Rose (or should I say the picture of our heautiful Betty Rose) in last Sunday's paper? . . . Betty Stahl hoasts a new addition to her little red hook and Teddy Neds hoasts a new Plymouth. . . . According to the hags under Jackie Bower's eyes Monday morn, Vaughn Monroe must have heen a success. . . . Latest scoop on Bill Rutledge is his description of his "Bravery in Action." It seems that Bill was voted by virtue of his strong stomach the man to do the joh. So, he's swahhing the fellas' arms off before and after inoculation. Or could it be the nurse beside Bill who's brave? . . . Joe Hiles gives a lesson for the week, when a light turns red it means stop, especially when there is a squad car sitting in a nearhy service station. . . . Everyone was glad to see Thursday come last week. That was the day when Thelma Voiral was on good behavior—even a smile for Walter Gerke. . . . Everyone received their happy notices Wednesday. I wonder why all the sad faces. It's amazing how much someone else can save for you, isn't it?

Irene Blank is already planning her vacation. She is going to see her hill-hilly cousins. I'll het that is so she won't have to wear shoes. . . . One of these days we expect to see Eunice Zehr come in with a new fur coat. That is, if she gets any coons on those coon hunting trips she has been taking. . . . Does anyone have a hook on "How To Raise Chickens"? Helen Weigle is very interested. . . . Happy hirthday to Bertha Witham, Frances Eckrote and Elizabeth Wert. Hope you have many more of them. . . . We thought we were going to get a wedding treat or someone had a new baby when we saw Otto Brandt strolling down the aisle with a hrand new cigar. No luck though. He had heen mooching from our new foreman, Harry Chism. . . . Floetta Zartman's rat trap must have failed to do its duty. Maybe the rats liked her car hetter, because they chewed the wires so her horn won't hlow. . . . Boh Rehrer is a genius, we know. He is sure our machines had fluid drive. No fluid drive, Boh, just airflow arbors. Next time don't forget the clutch keys. . . . Farewell to Violet Draker who has left to go on pension. . . . Our sincerest sympathy to Marie Dunfee in the death of her father. Also to Marge Ireland in the death of her mother.

Ray Pickett and Herh Kurtz went ice fishing Saturday at Wall Lake, and the boys did fine. Herb was catching two at a time, hut they were only about three inches long. After having fun for awhile, they decided to go to Pretty Lake where they hoped they could catch some "keepers." They went there, and did fine fishing, but then Herh had to catch so many that the ice gave away and Ray had to fish for Herh instead of the fish. Ray says Herb nearly froze before he could get him home. Herh says he learned a lesson, but he doesn't know whether it's to keep off of thin ice or not to try to get all of the fish in the lake. . . . We welcome Clyde Helms to our line, and tell Howard McVay we're gonna miss him, but we'll see him often as he will he just across the aisle. . . . The gang in groups 17x41, 17x70, 17x80, and 17x580 enjoyed a potluck last Friday in honor of Howard McVay, Selma Voight, and Ellen Saul, who have left. A 15-pound ham, baked hy Ruhy Stoops, was the main course and then there were all of the trimmings hesides. Those enjoying the delicious food hesides the group gang were Ralph Dennison, Ralph Hare, Clyde Cowan and Al Kleinrichert. . . . Andy Anderson howled in the City Tournament last Thursday and as his wife was having cluh, he decided to take his six year old daughter, Darlene, with him. After Andy finished howling, the team wanted to go to "Tommy's" for a short-minute, so Andy told Darlene to wait at the cluh and he would he right hack. After Andy had heen gone awhile (his daughter thought it too long awhile) she asked "Moe" where her daddy was. Fatherly Moe told her not to worry, that her Daddy would be hack soon. She sat and watched the other fellows howl, hut hy her look, she was hecoming more perturhed. At long last, Daddy came hack and when she saw him, she really told him off. Andy says she wouldn't say a word all of the way home; in fact, she wouldn't even look at him. . . . The gang in final Test and Inspection have been wondering if the chickens have gone on a strike, as they say they don't get eggs anymore. . . . Melvin Riley is having his new Lincoln Zephyr towed where he wants to go until he can get a motor installed. . . . Welcome to Charlie Penn, our new Supervisor of Test and Inspection, hope you will like us all out here. We want to say "Be seein' ya" to Ducky Drake, who has gone on the second shift, and to Bill Roberts, who is going on as leading operator. . . . We also welcome Don Niles, foreman of Inspection and Test, even though he will he in the Fan Motor line more than our line. . . . The gang in the rotor section welcome Cozetta Walper.

If all the pedestrians in the country were laid end to end, think how much easier a job the reckless driver would have.

Home is the place where a man can say anything he pleases, because no one pays attention to him anyway.

Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE

Monday Noon January 24, 1949

LOST AND FOUND

FOUND—Pair of green safety goggles in leather case. Found on Jones St. parking lot.

FOR SALE

PING PONG TABLE—Good condition. A-78911.

LADIES' HOCKEY SKATES—Size 5. $2. H-76482.

TWO WINTER COATS—Spring coat; six street dresses; formal. Size 11. A-57752.

G-E ELECTRIC STOVE—Perfect condition. 2822 John St.

GIRLS SHOE ROLLER SKATES—Worn twice. Size 3. $10. 331 W. Wayne after 5:30 p.m.

HOFMANN AUTOMATIC GAS HEATER—New. H-01562.

THOROUGHBRED BLACK COCKER SPANIEL—Male, two years old. H-82355.

ICE FISHING BOX—Never used. Won at Sportsman Show. $4. A-55741.

TIRE CHAINS—Innerliner; new butyl innertube, fits 5.25-19 tire. H-77755.

RADIO—Artone, floor model, combination, one year old. 1004 Lincoln Higbway, New Haven.

3¼x4¼ FILM PACK CAMERA—With plenty of accessories. New Haven 3595.

LADIES' WHITE CHICAGO ROLLER SKATES—And bag. Size 8. $10. H-81434.

G-E ROASTER—With grill and broiler attachment, also hotplate. Phone 8W, Ossian, Ind.

WANTED

UNFURNISHED OR PARTLY FURNISHED APARTMENT—Two bedrooms for three adults. E-38804 after 5 p.m.

BOY'S SNOW SUIT—Size 5-5 for play. Reasonable. A-75442.

TRANSPORTATION

WANT RIDE—Two girls from near Monroeville. Both work in Bldg. 18 from 8-5:15. Contact Mary Brouwer, Bldg. 18-2, Ext. 2117.

WANTS RIDE—M. C. Halleck, from 3164 Parnell to Bldg. 28. Works from 8-5:15. A-45732.

Rites For Myers Held Wednesday

Services for Charles H. Myers, 83, who died at 7:45 a. m. Sunday, Jan. 16, at the St. Joseph's Hospital, were held at 1:30 Wednesday at the Klaehn Funeral Home. The Rev. L. E. Olson officiated with hurial in the Elhanan Cemetery, Ossian. The Scottish Rite conducted ceremonies following the regular service.

Mr. Myers resided at 3309 Piqua Ave. He was a memher of the First Baptist Church, the Fort Wayne Scottish Rite and Olive Branch No. 248 of Poe. He retired from General Electric in 1935, having begun his service with the Company in 1917.

Surviving are two sons, C. Everett and Dwight; two daughters, Mrs. Cora Mann, Antwerp, O., and Mrs. Ralph Manier, Richmond; a sister, Mrs. R. A. Morton, and 10 grandchildren.

Court Rules On G-E Lamp Case

Recognizing that many of the practices involved had already been discontinued, Judge Phillip Forman of the Federal District Court of New Jersey, ruled this week that General Electric—along with eight other companies manufacturing or marketing electric light bulbs—had violated certain provisions of the Sherman Anti-Trust Act.

Judge Forman ruled, however, that the Company had not violated the Clayton Act and the Wilson Tariff Act as charged by the Department of Justice.

The case had been before the Court since 1941, but was deferred during the war period to avoid interference with war production of the companies involved.

General Electric had contended since the inceptoin of the case that it had conducted its business in the manner approved by the Supreme Court in a similar case in 1926, and had relied on the higher Court's opiniou and on the fact that after a complete investigation of business practices in 1922, the Department of Justice did not question the legality of any of the other practices.

In summarizing his 313-page opinion, Judge Forman pointed to General Electric's impressive industrial achievements, remarking that General Electric had "organized through the years an establishment that stands as a model of industrial efficiency. It early established the policy of making the best lamps as inexpensively as possible and to this end developed a lamp research, engineering, and production system which established it in the first position of industrial leadership in the incandescent electric lamp field not only in the United States but in the world."

Background of the Case

This case was started by the Government in January, 1941, and was tried in March, 1946, over a period of many weeks. The exhibits and testimony of the case fill 34 printed volumes. The opinion of the Court is some 300 pages long and we have not had time as yet to study it. There are, however, certain facts which are necessary in order to obtain the complete background of this litigation.

As early as 1922, the Department of Justice investigated General Electric's method of conducting the lamp business. The business practices then investigated involved the same legal questions as those raised in the case just decided. As a result of that investigation, action against the Company was brought, involving some, but not all, of such practices. The Supreme Court in 1926 found those practices involved in the suit to be entirely proper. Since that time, General Electric has conducted its business in the manner approved by the Supreme Court in 1926, and in reliance on that decision and on these facts that after its complete investigation in 1922 the Department of Justice did not question the legality of any of the other practices.

The agency system used by General Electirc to distribute its lamps is fundamentally the same as that approved in 1926 by the Supreme Court.

The patent licenses granted by General Electric were in the same form as those approved by the Supreme Court in 1926. Although that Court approved price control provisions contained in the General Electric license granted to Westinghouse, nevertheless General Electric voluntarily revised this license in 1945, eliminating from it all price control provisions and such quota limitations as had existed. At the present time, General Electric has no licenses outstanding under which it fixes the price of the product sold by the licensee, whether that product is in the lamp industry or in any other field.

Some of the foreign contracts involved in the present case had their beginning as far back as 1892, when the Company was first incorporated, and all of them have been in existence for many years prior to the filing of this suit. Indeed, in 1922 the Government was given copy of all General Electric foreign contracts, the ones involved in this suit being the same contracts or renewals. These contracts were studied by the Department of Justice at that time but not complained about in the Anti-Trust suit brought in 1924 and decided by the Supreme Court in 1926. Because of the inventions, improvements, and know-how made available to General Electric through these contracts, it and its licensees have been able to give the American consumer electric lamps made in our own country which embody the latest of most important advances in this fast developing art, wherever in the world these advances may have originated. The exchange of scientific and technical information advances research and development step by step upon accumulated knowledge and information. Research and scientific advancement have become not merely a means of advancing the standard of living but are in reality a necessity for survival.

With respect to the Government's claim of monopoly, the uncontradicated facts show that while in 1912 General Electric had 82 percent of the incandescent lamp business, that proportion has been steadily declining, so that at the time that the Government brought its Anti-Trust suit in 1924, in which General Electric was held not to have violated the Anti-Trust laws, its proportion of the lamp business had declined to 60 percent and at the time the present suit was brought, it had further declined to about 58 percent.

Since 1920 General Electric research and manufacturing efficiency has increased the amount of light given out by its popular 60 watt lamps by 45 prccent and at the same time, General Electric reduced the price of these lamps from 45¢ to 12¢; a decrease of 73 percent in price. The American public is the only one in the world which can obtain such efficient lamps at so low a cost.

The lamp industry in this country is a highly competitive one, free from patent harriers, or price or other restrictions of any sort. Among our competitors are companies sueh as Westinghouse Electric Corporation, Sylvania Eleetric Corporation, Consolidated Electric Lamp Company, Tungsol Lamp Works, Ine., Chicago Miniature Lamp Works, and Duro Test Corporation.

Can you imagine the "Windy City" with Irene and her 549 Elexers taking over Marshall Field's the Stadium and the City in general? The Ice Revue must have been beautiful and from all reports the affair well planned. Bldg. 18 was represented by Opal Cook, Hilda Hoeltje, Dorothy Erham, Mildred Whitmer, Mary Kikiloski, Marilyn Miller, Clara Theismann, Hazel Meyers, Beverly Willig, Betty Carper, Thelma Stone, Elizabeth Carnell, Mary Jane Horrell and Elizabeth Drivelbliss. (If we have missed any we are sorry). . . . T. T. King, former second shift supervisor, now retired, writes that he and Mrs. King have enjoyed the holiday season with their daughter and family in Lincoln, Nebr. . . . Henry Reehling was visiting friends at G-E Friday. . . . Talked with W. H. Fritz, Saturday. I believe that Fort Wayne looks good to him after being in New Orleans. . . . News of our students: Warren Fischer who has been in Tiffin on an assignment visited Fort Wayne Friday enroute to Philadelphia Works. . . . Guy Chambers, who has been in the General Superintendent's office the past few weeks, reported to the Taylor St. FHP offices Monday. . . . We welcome Ralph K. Bailey a new test student. . . . Ed Dahlin, Bldg. 18-4, is wearing a new and decidedly different necktie (he believes in carrying his work with him). The design is a small electric motor woven into the material.

Traffie Trouble

Henry Volmerding, Bldg. 18-4, is having his share of trouble! It seems an automobile and he came together at exactly the same time! Consequence—he will be under the weather for a while. We are glad it was not any more serious. . . . Virginia Bradtmiller, Bldg. 18-5 says it never does for two parties to be of the same mind—when you have to drive to work. How does the other car look? . . . Verneal Meyer, Bldg. 18-4, will be working in Bldg. 4-6 for a few weeks. . . . This is the last week for "Christine" matron in Bldg. 18. . . . We are very sorry to learn that Byron, son of R. N. White, Bldg. 18-5, is ill with scarlet fever. . . . Pat Trevey, Bldg. 18-5, is ill. . . . Flossie Chapman, Bldg. 18-5, believes in keeping up her English traditions. Anyone enjoying afternoon tea is welcome to call on her in Reproduction. . . . Happy birthday to Minta Cole and Ruthann Ryan, Bldg. 18-B.

Inquiring Reporter

HOW DO YOU THINK THE STATE SHOULD RAISE THE FUNDS FOR THE PROPOSED VETERAN'S BONUS?

JAMES PEPPLE

Works Lab

"I think bonus funds should be raised through a tax on gambling. Some people are going to gamble anyway, so why not collect some revenue from it."

MAXINE LINDSEY

Bldg. 19-1

"I think the funds should be raised by increasing state income taxes, if provision is made that the taxes be lowered after the bonus is paid."

GLENN W. BICE

Bldg. 4-2

"In my opinion, the easiest, best and most convenient method would be a small-percentage sales tax."

MARY SAXTON

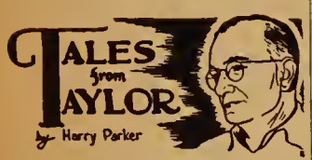
Taylor St.

"I think that instead of enforcing any new tax laws, the state should use the cigarette tax to pay the Veterans' Bonus."

HAROLD TRAUTMAN

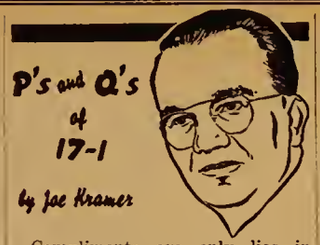
Bldg. 26-5

"I think the funds should be raised by a sales tax over a period of 10 years. Deducting it over a 10-year period would not be such a burden to the state. I also think the plan to pay a veteran $10 a month for every month of service is a fair rate."



Paul Menze, 44, Dies In Hospital

Paul C. Menze, 44, died at 2:30 p. m. Friday, Jan. 14, at the Lutheran Hospital. He had been employed at General Electric since 1920 and at the time of his death was a model maker in Bldg. 17-4. He resided at 2818 Bowser Ave.



He was a senior deacon at the Zion Lutheran Church and a member of its Men's Club.

Surviving are the widow, Hilda; a daughter, Carol Lu; three brothers, William and Henry, Fort Wayne, and Fred, Lake George; and two sisters, Mrs. Minnie Berning and Mrs. Velma Wiehe.

Serviees were held at 1:30 p. m. Monday, Jan. 17, at the Klaehn Funeral Home, the Rev. Paul L. Dannenfeldt officiating. Burial was in Concordia Cemetery.

Kenny Applegate grew a mustache to impress the fair sex, but it failed to gain the attention he had hoped for. Nevertheless, he let it grow until he had a heavy crop. In fact it became so long that it became caught in a drill press destroying half, so poor Kenny had to shave off what remained. . . . James Workman is very busy these days establishing a trailer camp on his property northwest of town. It is to be of the super variety and will have every modern convenience. All the comforts of a city dwelling is Jim's motto. He has gone as far as to furnish each trailer owner who rents space a large apple tree and a bee hive. He plans to also furnish each one with a cow and a churn. . . . If you remember correctly, a week ago Saturday was a beautiful day with the temperature in the 50's. On this day Loyal Liddy was seen in the Decatur business district attired in a rain coat. Evidently he was a little pessimistic about the weather. . . . Willard Hull eame to work one day minus his store teeth. He explained to us that he forgot them and was in a quandry as to how he was going to eat his luneh as his wife had packed an apple, some pickles, crunchy peanut butter sandwiches and a lot of hard candy for his luneh. Someone suggested to get a large mallet and pound all of this up and then it could be consumed without much difficulty. . . . As you all know O. J. "Fuzz" Meyers received a new French horn for Christmas, so his dog to show its disgust for Fuzz and his horn refused to remain on the premises as long as the horn tooting was in progress. Now he tells us that the dog has made up with him becausc Fuzz had four front teeth pulled and cannot do any horn tooting until his new teeth are installed. . . . Mable Miller surely is a child of woe. Last Thursday evening she called at her daughter's home. When leaving she took a tumble down the stairs, and now she looks as though she might have had an encounter with Joe Louis.

Compliments are only lies in court clothes. . . . Here we are again after an absence of two weeks due to no news. You know, this eolumn is being written for your benefit. Why not use the information sheets at the time clock and turn in some news items that we can use in your column. . . . Birthday cards or baby cards —what's the difference. At least this is what Helene Evanoff thought. She bought a card for Danelda Dotterrer but as a precaution before mailing, Helene read the verse and discovered it was a baby card. . . . Jack Lewis is now listed as a fisherman's jinx—reasons unknown. . . . The new bright and shiny face on the lathe in the tool room, first trick, is Fern Crick. . . . Red Braden, with the approach of the baseball season, is practicing talking to himself. Now he's using a rubber hose. . . . Ed Huhn claims that someone is trying to give him pneumonia. It is either open windows or a running fan. . . . Happy birthday to John Braden and Ray Huhn. . . . We wonder why Carl Reiter wanted to borrow a cold chisel when he received such a nice one Christmas. Did you forget so soon, Carl? . . . Rex (Pop) Beerman, president of the B&K stock farm is promoting the use of double barrel stock deal for raising of cattle. He is signing Bill Hodge to be his right-hand man. . . . Wally McKay has been backing not the wrong horses, but the wrong bowlers. Every week there has been a friendly bet between Wally and Carl Reiter that Charles (Slug) Lauer and Howard (Split) Reinking will beat Reiter's average of the pervious Monday. The record to date is 8 cigars won by Reiter, none by McKay. . . . Not knowing how to describe in black and white the official chant of an Indian squaw, we merely want to report that the cry rang out in Bldg. 17-1 from Agnes (Indian squaw) Cordes while wearing the official Indian feather headdress. . . . We are wondering if eating really makes a person gain weight or if it is because of the inconsistency of the scales. Helcne Evanoff got weighed in the bond room and discovered she was a pound heavier. She even went without lunch that day to try and lose the pound she had gained. . . . A belated happy birthday to Betty Sue Morris and Tavie Popa. . . . We bid farewell to Julia Berger who left last week to take up full-time duties as a housewifc. . . . **Tools are costly. Broken drills, hammers, screw drivers, taps, and other tools add much to the manufacturing losses of our Division. See the display case for cost of some of the above items.**

The best advice is always the kind people don't like.

You can never find lost time even though you find time to look for it.

The one best way to win an argument with a woman is—just listen.

Station WANE To Broadcast Game Tonight

The Fort Wayne General Electric will sponsor the broadcast of the North Side-Michigan City basketball game tonight over Station WANE. Dick Buckley will give play-by-play deseription of the game which will begin at 8 p. m.

The South Side Archers defeated the Huntington Vikings, 59-47, Friday, Jan. 14, while the next night the Archers repeated by downing the Mishawaka Cavemen, 39-32.

At this time of the year when everyone, faced with tax papers to prepare, are deeply engrossed with their own problems, there, nevertheless, is an appeal for help issued by the Infantile Paralysis, March of Dimes Campaign. Taxes themselves are a problem for anyone involved, but in your own heart we feel that ten cents, one thin dime, will not be greatly missed, but shall be greatly appreciated and needed by the foundation. Won't you remember to give, that others might some day be given a chance to walk? . . . We wish a belated Happy Birthday to Bill Putt. . . . Repair and Return section's own, original Dot Swank left for the No. 1 city south of the Mason-Dixon line—New Orleans. From personal experience we know New Orleans will present many new sights for Dorothea—but we wager that New Orleans will never find another visitor quite like Dot! . . . All in a lifetime: It was dawn, 4:30 a.m. to be exact, when at the door of the Fogwell homc eame a rapping and a tapping. Frank was finally aroused and feeling his way, found the door and inquired of the sunrise visitor what he wanted. The voice without asked for some kerosene, so Frank told him to bide his time until Frank could get his store open. A few minutes later, on a dim-lit Sunday morning, Frank asked his eustomer how much kerosene he wanted? The man, very seriously, answered: "One quart, please"! . . . We, of our section, take justified pride in the following fellows: Frank Fogwell, Bill Grubb, Elmore Hurt, Ed Saxton, and John Dennis, who through their own generosity and thoughtfulness of their fellow mankind, donated enough blood to the blood bank at Bluffton to replace that amount needed by George Morton's widow. From the very bottom of our hearts, we are all deeply proud of you fellows and the manner in which you displayed the feelings within your hearts. . . . Seldom, if at any time, have we taken issue on any given subject. However on this particular topic, we feel well within our right in chastising the latest calendar purloiner. When a person PURCHASES a calendar, to hang by his work bench and finds it has disappeared, then we feel that another new low has been attained by the meanest person in the world. . . . Our parting thought: "Statistics are like alienists—they will testify for either side."

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Now that income tax time is upon us again, everyone is wondering what they did with all the money they made in '48. It really is a wonder how it gets away from us and we have so little to show for it. . . . Did you know that the mail room had been moved? Anytime you want a mail boy, just call Joan (Little Pete) Liebig's desk and you can usually find at least one of the boys there. We have been wondering what the big attraction is, is it Pete's new haircut or is it the songs she is always singing? . . . We of Div. 17 have been looking for a BIG thick juiey steak to give Ceal Romary, Personnel Section, who has been off the last couple of weeks. We wish Ceal a very speedy recovery and hope that she will be able to master our steak when she returns to work. . . . Although some people try to forget their birthdays, we have a way of finding their deep dark secrets, so we want to wish Hank Gollmer a very happy birthday on Jan. 26 and Vera Schweier on Jan. 27. . . . Here is a little word of condolence to all wives whose husbands are ardent bowlers—

Thursday's Bowling Night
I thought I had married a husband, as I
gazed proudly at my rings,
But I found myself Disillusioned, and
Marriage "just one of those things"
For HE spends his time at the alleys
(It makes me so mad I could fight)
And, though I complain, It's always in vain
When it's bowling league that night.
Some women have men who are brutal,
and some have inveterate flirts;
And some have hums who are drunkards,
but they don't know how it hurts
To be left alone at the fireside on a
lonesome wintry night;
For my hubby's sins are knocking down
pins
At the alleys on bowling league night.
Once our company was so entertaining,
they talked of their friends and their
care
But my husband now butts in with "10
pins", fast alleys and strikes and
spares;
Oh, last week he husted 600, or hit the
headpin too light
His noodle just spins, for toppling pins,
at the alleys on bowling night.
Then came the heart-rending moment when
grandmother dear passed away;
The house was a garden of flowers, in the
parlor the old lady lay
The visitors offered their condolence, their
eyes with sorrow allight,
But my grief was no sham—my man took
a lam—Yes, he bowled in the league
that night.
Now I know when our days are over and
we depart from this earthly state,
And are wafted on wings by the angels, up
to Peter on guard at the gate,
He'll ask "what leagues are they rolling up
here in the starlight so bright?"
And if there are none, he'll organize one,
So he can howl ON THURSDAY NIGHT.

We are very sorry to see Marge Greiner leave our little family. It was nice having you around Marge and don't forget us. . . . Welcome to Evelyn Harges who came to us from Bldg. 4-6. Nice to have you with us and we hope you will like Div. 17. . . . Also had to say goodby to Bill Roney and Erv Hattendorf last week. We hated to see you leave fellows and we wish you all the luck in the world. . . . That's it for this week, see you later.

Al Schoenheinz is at St. Joseph's hospital recovering from a major operation. He is in Room 263 and at this writing is doing very well, and can have visitors. . . . Dale Chaney celebrated a birthday this week. Congratulations, Dale; they roll around pretty fast, don't they? . . . I have from pretty good authority that Gurney Lindley has been a very efficient onion salesman on the spur of the moment, in days gone by. . . . George Lambroff is on days in the lathe section. . . . Newcomers to the group are Byron Drew and Robert Griffin. Bib isn't altogether new to the group having worked with a number of the fellows in the past. . . . Cecil Strong, our riding deputy from Busco, is now working in Bldg. 8-1. We will sure miss you out there, Cec. . . . The fellows are still trying to figure why McMaken had the "Odoro De Cologne" scent about him last week. . . . Dewey Erne is sporting a new shop cap this week. From the looks of him you would think he was working on the railroad. . . . Ozzie Nahrwold is now at home at his new address, 2727 John St., after a busy weekend of moving. . . . Paul Boedeker has been very busy sandwiching his fishing trips between reworking his truck over so it doesn't shimmy all over the road. I don't know what he is going to do for entertainment for his boys now.

Division Officials Map Strategy For Sales Promotions

Plans for the coming year of sales and sales promotions for the Specialty Transformer and Ballast Divisions were completed Monday and Tuesday at a meeting of division officials with several advertising men.

Those taking part in the meeting included Fred Adams of G. M. Basford Company, an advertising agency; M. E. Fisher, Manager of the Central Station section in the Advertising and Sales Promotion Divisions at Scheneetady; and, J. E. Duncan, a member of Mr. Fisher's staff as editor of the Specialty Transformer group.

Nelson Named Plant Manager At Allentown

Oscar W. Nelson, General Foreman of the Allentown, Pa., Plant since it was opened nearly three years ago, is now manager of the plant, it has been announced by W. P. Hauck, Manager of Heating Device manufacturing, Appliance and Merchandise Department.

Starting as an assembler in 1930, Mr. Nelson step by step has risen successively as leader, assistant foreman, foreman, and until now general foreman.

96 G-E Teams Enter City Bowling Tournament

Action in the City Bowling Tournament at the G-E Club Alleys is shown above. In the photos from left to right are Wilber Hinton, Harry Brown and William Demsey.

The G-E Club sponsored all 96 teams in their tournament bids. The Ionic team of the Masonic League is one of the leading G-E teams.

Winter St. Wins First Half Of G-E Interdivision League

Winter St. beat Small Motors, 46-36, in their final game of the first half for the Interdivision Basketball League, making their record nine straight wins and no losses and giving them top place.

Transformer staged a big last quarter rally to defeat Tool and Die, 32-23. Tool and Die led at the end of three quarters, 23-13, but Transformer got 19 points in the final stanza to win the game.

The Firemen beat the Squares, 59-51, in a good game. The Firemen took the lead at the start and held it all the way. The Squares came fast in the last quarter, but some nice playing by Morkoetter and Stemmler kept the game safe for the Firemen.

Regional Warehouse beat Taylor St., 44-30, to finish the first half with just one loss. Turney and Green did most of the scoring for the Warehouse, and Butler was high man for Taylor St.

FHP bowed to the Apprentice School, 29-24, in the final game of the week. Neither team could hit consistently, and the game was very even all the way.

The second half play will start Tuesday, Jan. 25.

G-E Drops Two Games

The G-E Club basketball team dropped two games this past week. One game was lost to the Harvester in a league game, 35-45, and the other to the Wheatley Center Elks, 61-57.

Grant and Barksdale paced Wheatley with 18 and 17 points respectively, while Gettys starred for G-E with 18 points.

The next games are: Monday, Jan. 24, Indiana Tech, at the G-E Club gym, at 8 p.m.; and Thursday, Jan. 27, the Zollners Reserves, 8 p.m. at the Central high school gym.

Golden Gloves Tournament

Here are some of the important facts regarding the coming Golden Gloves Tournament, sponsored by the G-E Club and Journal-Gazette:

When and Where—At North Side high school, Jan. 20, 27 and Feb. 3, 10.

Who Is Eligible—All amateur boxers in the Fort Wayne area who are at least 16 years of age.

Is There a Place to Train—Classes are being held each night, Monday through Friday, from 7 to 9 p.m. at the G-E Club gym, Broadway and Swinney Ave.

What Are the Awards—Each boxer who wins his first bout receives a pair of satin regulation boxing trunks. The eight champions are taken to Chicago for three days to box in the Tournament of Champions at the Chicago Stadium; receive complete boxing outfits, including all-purpose wool and leather jackets; and carry-all bag. One boxer selected by the judges receives the large Sportsmanship Trophy.

How Are the Bouts Conducted—Each bout is three rounds, two minutes each to a decision. As far as possible, boxers are matched during the early stages of the tournament according to experience and are not drawn by lot until late in the tournament. There are eight different weight divisions. Contestants box only once a night with a few exceptions late in the tournament and then after long rest periods.

Where May Tickets Be Secured—At the Main Auto Supply Company until the box office opens on tournament nights.

Our fair-haired boys, the Ionics of the Masonic League, got knocked out of first place in the city tournament. Their 3153 count failed to hold up as two teams passed them. The Buffalo Cafe team with a sizzling 3259, featuring the Scott family, took over first. The South Side Beer Garden team is in second place with a 3194 total. The Buffalo Cafe team shot 3010 actual pins. This is high total for quite a number of years.

In the doubles competition who should be leading the pack but none other than the rookie of the Screwballs, Walt Mertz, and his brother Andy. They shot a 1358 score with a total handicap of 120 pins. By the way, Maury Cox is still no slouch with that bowling ball. Thanks for the free ride, Maury.

We wish to retract a statement made in last week's column, which was copied from "The Gutter Ball," a Div. 14 bowling news sheet, which stated that the G-E Club sponsored teams in the state and national tournaments. We are sorry to say that the Club is not doing this, but that they hope to in the future.

The Motor and Generator team of the Interdivision League have really been riding the Screwballs, as they beat them out of the squad prize last Wednesday night in the tournament.

High scores for those trophies: 681, W. Siedel; 594, H. Wagner; 276, W. Goss; and 247, T. Williams.

After the reports from New Haven on the Buddy Bomar exhibition, I don't feel quite so bad when I get those 160 counts. Speaking of the Bomar exhibition, I hear that Walt Mertz and Frank Matthews got so enthused over a shuffleboard game that they had to go back in the evening to see the bowling exhibition.

How about a ghost writer for a couple of weeks. What this column needs is new blood. Do I hear any volunteers?

Have you entered the state tournament yet? The tourney is held at Gary this year and entries close midnight, Feb. 5.

Main Office Heads Volleyball League

In the Interdivision Volleyball League, Small Motor won over the Apprentice Machinists 15-15-15 against a forfeit. Winter St. defeated General Tool in all three games by games of 15-2; 15-4, and 15-3.

The Squares were victorious over Taylor St. in games of 15-8; 16-14; and 15-5. The Apprentice Draftsmen lost to the Main Office team by scores of 15-2, 15-4 and 15-3.

Next week-end will wind up the first half play.

How Would You Revise Our Labor Laws?

We Americans are about to re-examine—through our Congress—the fundamental laws regulating the relations of employees, unions, and management with each other and the public.

We should be sure this examination is calm and deliberate. Any resulting revisions will be of vital interest to the whole public—to the some 15 million union members and the more than 45 million non-union workers, to union officials and management officials, to consumers and to citizens at large.

Despite any differing points of view, what all of us really seek are laws that are fair to employees, unions, and employers, and which adequately protect the public.

Let's check the following questions to see what are some of the individual ingredients you think should or should not be included in any law that would accomplish what we are all seeking:

1. Do you believe that labor laws should, in general, preserve the employee's right to strike? ☐ YES ☐ NO

2. Do you believe labor laws should give the President of the United States the right to seek, through courts of law, to delay a strike that would cause a national emergency endangering the health and safety of the entire country? ☐ YES ☐ NO

3. When two or more unions are fighting each other over who shall do a job or who shall represent the employees, and a strike is called to compel an employer to give to the members of one union the work or recognition being given to the other union—that is a jurisdictional strike. Should labor laws prohibit such strikes? ☐ YES ☐ NO

4. Should labor laws prohibit secondary boycotts—that is, prevent an employer and his employees, where there is no labor dispute, from being damaged by a union seeking to coerce another employer having a labor dispute? ☐ YES ☐ NO

5. Should labor laws provide that an employer cannot deduct union dues or assessments from wages unless the employee gives his personal O.K.? ☐ YES ☐ NO

6. Do you believe labor laws should see to it that both employers and unions be required to bargain in good faith? ☐ YES ☐ NO

7. Should labor laws give to both employees and employers the freedom to express their own points of view on employee relations problems—provided such views, or arguments, or opinions do not promise bribes or threaten reprisals? ☐ YES ☐ NO

8. Should labor laws protect the employee against unfair practices by unions and management? ☐ YES ☐ NO

9. Do you believe that labor laws should require both union officials and company officials to swear they are not communists or fascists or members of any party or organization which plans to overthrow the government of the United States by force and violence? ☐ YES ☐ NO

10. Do you believe labor laws should require unions to make appropriate reports to members and government as to handling of funds—just as companies are required to make appropriate reports to owners and government? ☐ YES ☐ NO

11. Should labor laws make it clear that a collective-bargaining contract must be honored by both parties? And that each has an equal right to sue the other for breaking the contract? ☐ YES ☐ NO

12. Do you believe labor laws should make it unlawful for a union to compel an employer to engage in featherbedding; that is, to pay money for work which hasn't been done or won't be done? ☐ YES ☐ NO

13. Should labor laws permit the forcing of an employer to hire only workers who belong to a given union? ☐ YES ☐ NO

14. Do you believe it should be unlawful for an employee to be prevented from working by the use of violence, force, or intimidation? ☐ YES ☐ NO

15. Do you believe foremen and other supervisors could properly perform their management duties of serving the balanced best interests of employees, customers and owners alike, if bargaining for supervisors by unions should be included in the labor laws? ☐ YES ☐ NO

16. Do you believe labor laws should protect individual workers in the right to join or not to join a union—to remain or not to remain members—just as they individually wish? ☐ YES ☐ NO

17. Should labor laws make clear that both unions and employers can now so affect the public for good or ill that the labor-management relations of both should be regulated equally by law? ☐ YES ☐ NO

18. Should labor laws provide that a striker who has been replaced in the course of an economic strike—not involving any unfair labor practice—be permitted to vote in an election to choose a bargaining agent at the conclusion of the strike? ☐ YES ☐ NO

In the re-examination of the present labor laws and in making any revisions, we—as American citizens—must be concerned with guaranteeing equal rights between and among individuals and organizations, while striving to eliminate force, fear, hatred and ignorance from employee-management relations.

But we must meanwhile keep always in mind that no labor law can do more than provide a reasonably favorable climate for good employee-management relations. The accomplishment of those good relations must come from the will to try to spread the area of common interest and voluntary agreement.

In the exercise of your rights as a citizen in a Democracy you may want your Congressmen in Washington, D. C., to know your attitude—whether "for" or "against"—on each of the above questions and any others you may have in mind. If you wish, mark the "yes" or "no" boxes, add any comments, sign your name, address and occupation and mail to your Congressman over the week end.

'Light Sorcery' Show To Present Eight Performances For Employees

G-E Invites Pensioners To First Presentation; Students To See Show

Eight performances of the "Light Sorcery" show will be given for the benefit of employees at the Broadway, Taylor St. and Winter St. plants and their families and friends Monday and Tuesday, Jan. 31 and Feb. 1, in the G-E Club auditorium.

All pensioners, totaling more than 700, received special invitations this week from C. H. Matson, Works Manager, to attend the first performance, Monday, at 1:30 p.m. Although they are welcome to attend any show, this one will give former employees an opportunity for all to come together to renew old friendships. All pensioners are invited to bring their relatives and friends, Mr. Matson has announced.

This performance will also be open to employees, their families and friends.

Shows will be given at 1:30 p.m., 4:30 p.m., 7 p.m. and 8:30 p.m. on both Monday and Tuesday. Second shift employees are urged to attend the 1:30 p.m. performances.

Show For Students Tuesday

There will be a special showing Tuesday morning at 10 o'clock for

(Continued on page 3)

A. S. Johnson, Staff Assistant in the General Superintendent's office, is shown above handing out tickets for the "Light Sorcery" show to Dolores Connin, Dorothy Leininger, and Pat Olinger, all of Bldg. 18.

Dr. Lee To Talk On Leadership At Foremen's Ass'n.

"Leadership and What It Takes" is the topic of the talk to be given by Dr. Ralph D. Lee, Wednesday, Feb. 2, at a meeting of the Foremen's Association. The program, which will start at 8 p.m., will be held in Kreis Stoltzenau hall.

Dr. Lee is a member of the Department of Public Relations, General Motors Corporation.

Election of officers will follow the talk.

Mrs. J. R. Cullen Elected President Of Partizans

Mrs. J. R. Cullen has been elected president of the Elex Club's Partizan Chapter. Others elected were: Mrs. Helen Miller, vice president; Mrs. Burney Tomson, recording secretary, and Mrs. Rose Van Horn, treasurer.

1948 Report Totals 6,133 Suggestions

Works' Suggestion System Issues Annual Statement; $26,462 Given Last Year

A total of 6,133 suggestions were submitted during 1948, the annual report of the Fort Wayne Works Suggestion System revealed today.

Issued by A. C. Hartman, chairman-secretary of the committee on suggestions, the report showed an increase of 135 suggestions over the previous year.

Of the 6,133 suggestions received, 2,235 or 36.4% were adopted. This is the best record to date and is above the average of the Company as a whole.

Largest Award to a Woman

Awards amounting to $26,462.50 were added to the earnings of employees. An award of $1,000, the largest ever paid to a woman worker of the Works, was presented to Gladys Balliet, a finisher in Div. 17. Her idea was to fusion weld in place of silver soldering certain field connections.

Jessie Elder, another employee of the same division, earned $965 for four suggestions. The largest

G-E Opens Applications For Scholarships, Loans

Available To Employees Or Their Children: Raise Maximum Amount For Employees' Loans

Scholarships and loans for undergraduate study available to employees and their children, including those of affiliated companies, can be applied for from now until April 1, William W. Trench, Secretary of the Company and chairman of the G-E Education Committee, has announced.

The committee this year has changed the deadline for the receipt of applications for scholarships and loans to April 1, or two months earlier than formerly. This was done in an effort to give those granted scholarships or loans the earliest possible notice so that they will have more time to make arrangements for the next school year.

At the same time, the committee increased the sum that parents of the students may borrow, making the maximum $300 instead of the $200 previously allowable.

Available For Any School

Funds for the loans and scholarships are derived partly from the income on $200,000 set aside as the G-E Employees Education Foundation. The money is available for any field of undergraduate study at any accredited college or university that the applicant attends. The Foundation is part of the million-dollar General Electric Educa-

48-Year-Old Motor Returns For Repairs

James Veira and Herbert Seider, both of Bldg. 6-1, are shown above examining a motor which arrived this week for repair. The motor was built here on June 25, 1901, from a patent granted in 1895. It is owned by the Alvord Electric Company of Douglas, Wyo.

Test Engineer Here From China Studying Manufacturing Methods

H. H. Chen, a test engineer, is the Fort Wayne Works' ambassador from China. Mr. Chen, a native of Shanghai, was born in a Christian family of his parents, four brothers and three sisters.

His father was a graduate of Johns Hopkins University and, before his death, was chief surgeon at the Shanghai Municipal Council. His mother is a trained nurse. Mr. Chen's four brothers followed the medical profession. One is now working for a fellowship to the

Opportunity Is One Of Our Most Cherished Possessions

There are two ways of interpreting the fact that throughout this world some people have more than others.

The interpretation prevalent in some foreign countries is that because some people have more, others have less. And in these instances the effort is to take from some people and give to others.

The net result of this process and this philosophy is a general downward level of living standards.

Then there is the other interpretation which has been for years accepted in the United States and other progressive countries. This interpretation is that the fact someone else has a better home or a better car indicates that others have an opportunity to achieve the same position. Success by some people means that success is possible for others. In this country we call that "opportunity" and it is one of our most cherished possessions.

It has a direct influence on the way all of us live. It is largely responsible for our high American living standards—the highest ever achieved in the history of the world.

The pressure of men striving—not to tear down what someone else has achieved—but to get ahead themselves, to achieve and produce, has been and should continue to be a mainspring of American progress.

Let's Pay More Attention To The Little Accidents

Accidents continue to happen. Probably the time will never come when the world is free of them. We hear daily of the tremendous loss of life caused by automobiles. We hear constantly of the big accidents. But we don't hear of the millions of small accidents, the apparently petty things which happen all day and every day in our busy industrial world.

These small accidents, such as dropping a box on a toe, such as scratching a hand on a piece of metal, such as bumping a head on a door, and so forth and so on, continue to perplex and confound the safety man and make him wonder why people are so careless.

It goes right back to beginnings, for as people grow more careful, more thoughtful of what they are doing, so in direct proportion will these small accidents begin to decline in number. They are the bane of everyday shop existence and it is common sense only to urge everyone to pay more attention to the little things of life. The big ones will take care of themselves.

Can We Truly Say We Are Living In A Machine Age?

We often hear it asserted that we are living in a machine age. To the extent that we have more machines today than ever before, that is true. But what of the men who make and operate these machines? Man came first and man must ever serve the creatures of his brain. It would seem that instead of a machine age, we live more truly in a man age.

As time passes, it cannot help but be apparent that manpower becomes more valuable. We shall always need men . . . men to make machines, men to sell machines, men to operate machines and men to guide other men. Without the one, neither could amount to much for even the most automatic of mechanical robots, must sometime need the care of man.

If then, this is a man age rather than a machine age, it follows that opportunities must increase as the changes of civilization become more rapid. A quick glance at the pages of contemporary history will reveal the fact that thousands of occupations exist today which were not dreamed of 40 years ago. Where one blacksmith shod horses, now a dozen mechanics repair automobiles.

Yes, it is a man age!

Familiarity Breeds Contempt

HUGH CRANE discusses ECONOMIC EXPERTS

NEW YORK—Now that good business continues keeping on in nearly every line, the economists are again doing some second-guessing, and saying that business is going to stay good for quite a while yet.

Why is it that so many of our economists have been so wrong so many times, and so often have to come up with a "me too" when their predictions go wrong?

"Alice in Wonderland"

Sometimes they remind me of the Dormouse at the Mad Tea Party in "Alice in Wonderland." Remember? Alice and the March Hare and the Mad Hatter and the Dormouse were having tea, and the Dormouse kept falling asleep.

"'The Dormouse is asleep again,' said the Hatter, and he poured a little hot tea on its nose.

"The Dormouse shook his head impatiently, and said, without opening his eyes, 'Of course, of course; just what I was going to remark myself.'"

Look at the Record

Just look back over the last 15 years at the economists' record.

In 1933 most Wall Street economists were saying that if we abandoned the gold standard we'd have inflation. But we didn't. A few years later the New Deal economists were saying that if we "primed the pump" with government spending we'd have recovery. But we didn't. At the beginning of the National Defense program in 1940 economists were saying we'd have a terrible inflation as a result. But we didn't. During the war economists kept saying that we'd have a depression shortly after the war. But we didn't. Or again—during the 1930's economists were saying that the country couldn't possibly stand a government debt in the hundreds of billions. But it is standing it.

So when things turn out differently, the economists seem to wake up and say, "Of course, of course. Just what I was going to predict myself."

Why So Wrong?

Why such a wide "margin of error?" Why does economics seem so different from engineering or science?

Well, perhaps the reason is that economists get their background from three main "schools of thought"—and none of them have aimed at anything like what the engineers call "know-how."

The first of these might be called the "classical school" or the "Victorian school." It's theme song ran to the effect that "the capitalist system is the best of all systems, and if it has a depression every now and then, that's just inevitable, temporary, and part of the price for this good system."

The second of these might be called the "Marxian school" and its theme song was that "capitalism is a system of organized robbery and needs to be replaced, not improved."

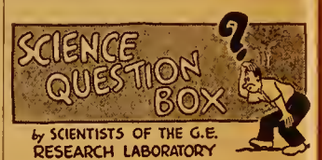
And the third might be called the "statistical school" and its theme was "Before we can do anything about business depressions we need a great many more statistics."

So none of these schools really taught anything about trying to make the system work better. They were all in a sense fatalistic. The first and second were really schools for argument and the third was a school for statisticians and scholars.

Appear To Miss Something

And so none of them seem to have noticed the fundamental changes that have taken place in the last 10 or 15 years in our economic system. They have been too interested in either (1) selling people for it, or (2) selling them against it, or (3) gathering statistics about it. Meantime life has gone on and a revolution has taken place. More about this revolution next week. It's the reason why we don't get a depression right now.

The OLD PHILOSOPHER *Says:*



Ideas keep things going and make no mistake about it. When anything happens to shut off the flow of thought or to put a penalty on a man using his brains, then it's a safe bet that the world is in for a decline. There's nothing truer than the fact that men with ideas make the world, our world at least, the only one we'll know and it behooves us to listen when ideas start flowing.

It sounds crazy now, but the doctors once thought locomotives would poison the air and kill the birds. Only 70 years or so ago, newspapers said it was impossible to send a human voice over wires. Now look what we do without wires!

We need new ideas, new products and new thought all the time. How much we need them is found in the fact that 40 per cent of the sales of a large company have derived from products developed within the last 10 years. Here's another way to look at it. In the past 50 years, 18 new ideas have developed into industries giving jobs to 9½ million people, about one-fourth of all folks working for a living.

Who said new ideas didn't pay?

Q. What are Sun dogs?

A. These are bright spots that may appear at about the same height as the Sun and 22 degrees to the side. They are caused by six-sided ice crystals which bend the rays from the Sun at such an angle. When these crystals are scattered at various angles they make a complete halo around the Sun, but sometimes they all tend to keep their sides vertical. Then only the crystals to one side or the other are in a position to send the rays to our eyes, and we see Sun dogs. Under similar conditions Moon dogs may be formed at night.

Q. If the Earth were hollow, with a spherical cavity, would an object released just inside the shell fall toward the center of the hole?

A. No. Under such conditions the force of gravity would be balanced in all directions, and it would float freely in the cavity.

1948 Report

(Continued from Page 1)

award being $625 for her idea to change certain hand-wound fields to machine placing.

Thirty employees received $100 or more for their suggestions.

33% Adopted Since 1923

Since its adoption in Fort Wayne in January, 1923, the Suggestion System has recorded a total of 118,700 suggestions here, of which approximately 33% have been adopted.

The first year that the system was in effect 496 suggestions were received, of which 12% were adopted.

The largest individual award ever made at Fort Wayne was given to Raymond Stoller at the Supercharger Plant in 1943, when he received $1,100 for his suggested method of salvaging impellers.

System Started in 1906

The Company's Suggestion System was started at Schenectady in 1906 on the recommendation of Christian Steenstrup, often referred to as the "Father of the American Employees' Suggestion System in Industry."

Mr. Steenstrup is noted for his contribution to the hermetic sealed refrigerator unit. For his work with hydrogen copper brazing in 1932, he won a Charles A. Coffin award. He was again honored four years later for his work on the electric refrigerator. In 1940 he was given a "Modern Pioneer Award of the National Association of Manufacturers."

Starts Here Later

The Suggestion System was inaugurated in Fort Wayne during January, 1923. The first committee here was appointed by Walter Goll, Works Manager. It consisted of C. H. Matson, representing the factory; Robert Steck, engineering; W. J. Hockett, industrial service department; J. J. Kline, management, and E. J. Kimm, secretary. Mr. Matson served as the committee's first chairman.

(See display of pictures on back page).

G-E Opens

(Continued from Page 1)

tional Fund established in honor of two former company presidents, Charles A. Coffin and Gerard Swope.

In addition to the Employees Education Foundation, separate trusts provide for other scholarships and loans.

Scholarship Honors Scientist

The Charles P. Steinmetz Memorial Scholarships was established by G-E more than 25 years ago in honor of one of its most eminent scientists. Under it a yearly allowance of as much as $500 may be granted for either engineering or academic courses at Union College, Schenectady. The scholarship may be retained through four years provided a satisfactory record is maintained by the student. Six awards involving $2,400 were made last year.

As a personal gift of $25,000 by Gerard Swope in 1927 a fund was established under which loans of $250 will be granted for one academic year at a time at Union College. Although the college administers the fund, the students are selected by the Company's Education Committee. On these loans the interest rate is one per cent a year while the student is in school and 3 per cent a year is charged on the unpaid balance after the recipient leaves school. Nine loans were granted last year amounting to $2,250.

The Richard H. Rice Memorial Scholarship, established by G-E in honor of a former manager of the Lynn Works, provides up to $400 yearly allowance for study at Stevens Institute of Technology, Hoboken, N. J. Preference is given to Lynn Works employees, or their children.

Loans Granted Two Ways

Loans under the G-E Employees Education Foundation are granted in two ways: (1) to students, up to a maximum of $250 a year on which there will be an interest charge of 3 per cent a year on the unpaid balance after the recipient leaves school. No interest is payable for or during the years the recipient remains in school. (2) to parents of students, up to $300 a year with repayments to begin immediately by payroll deductions and be completed within 12 months at an interest rate of 3 per cent a year.

Grant 16 Loans in 1948

Last year 16 loans were granted, totalling $4,000.

A limited number of scholarships may be granted to outstanding applicants for loans, Mr. Trench announced. There were 12 selected by the Education Committee last year in the amount of $3,600.

Stating that the names of successful applicants would be announced about May 1, Mr. Trench said that the Education Committee determines the recipients of all loans and scholarships on the basis of character, scholastic standing, financial need and general merit.

Application forms can be secured from and submitted to Ray Zook, Supervisor of Personnel, Bldg. 8-2.

Two Retire Tuesday

C. H. Kloepper

Charles H. Kloepper, General Tool Division, will retire Feb. 1 after 31 years service. Mr. Kloepper has been a machinist in the Tool Division most of his time with the Company, and at the time of his retirement was a grinder in Bldg. 19-5.

Lloyd Keller

Lloyd Keller, a machinist in the Motor and Generator Division, will leave Feb. 1 for retirement on the Company's Pension Plan. Mr. Keller has been a machinist during his entire service of 23 years with General Electric.

McCollum, New Plant Manager At Coshocton

A. K. McCollum

Alden K. McCollum, formerly head of the Kokomo plant, is now manager of the laminated plastics plant at Coshocton, O., it was announced by Robert O. Bullard, Manufacturing Manager of the Plastics Division in the Chemical Department, Pittsfield.

Mr. McCollum succeeds Arthur C. Treece, the former Manager who was appointed Assistant to the Plastics Division Manager last October. Mr. Treece has continued to supervise Coshocton operations.

The former Kokomo plant, under Mr. McCollum, was opened in 1942 to produce electrical equipment for Navy destroyer escorts, converted to production of fractional horsepower motors in 1944, and closed down at the end of 1948.

Mr. McCollum joined G-E in 1929 as a test engineer at Schenectady and was with the Large Motor and Generator Division of the Apparatus Department until 1940 when he became supervisor of planning and wage rate for the Motor and Generator Division here.

He left Fort Wayne in 1942 to become Assistant Superintendent at the Kokomo Plant. He was named Superintendent two years later and in 1946 became the Plant Manager there.

'Light Sorcery'

(Continued from Page 1)

all school children in Fort Wayne and Allen County. Arrangements for attendance at this show have been made through the Fort Wayne Superintendent of public schools, and Township Trustee, superintendents of the parochial schools and school principals.

Tickets for the other eight shows were distributed this week by supervisors and foremen. Tickets will still be available through Tuesday and shortages in any division will be handled by redistribution through A. S. Johnson's office in Bldg. 18-1.

"Every effort will be made to accommodate all persons desirous of attending the shows," Mr. Johnson announced today.

"To avoid over-crowding at any presentation," he added, "all employees are requested to go to the performance specified on their tickets."

Many Requests For Tickets

The demand has nearly exceeded the supply of tickets, especially for the evening presentations.

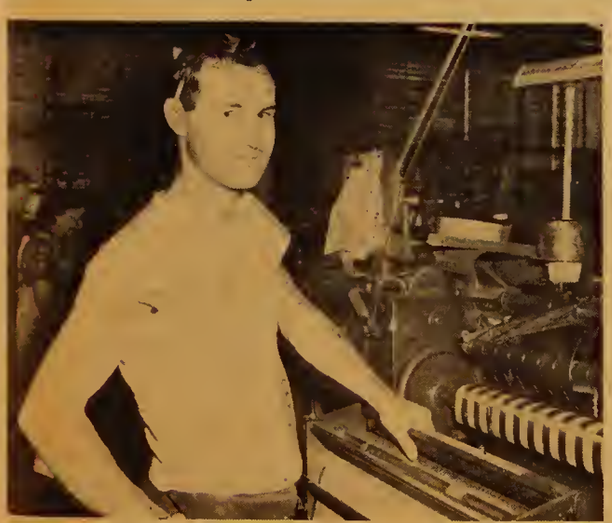
The hour-long performances are being presented by lighting specialists from Cleveland's famed Nela Park, under the sponsorship of the Fort Wayne Apparatus, Lamp and Air Conditioning Department facilities of General Electric.

James Jensen, master of ceremonies for the show, will demonstrate how to walk away from his own shadow, make an unconnected fluorescent lamp glow brightly, light a cigarette with a 10,000-volt, high-frequency coil light, and will photograph a balloon in the act of bursting as a few features of the show.

Elex Members To Usher

Members of the Elex Club will usher at the different performances. They are:

Monday—Barbara Wilson, Bldg. 17-3, and Rachel Fisher, Bldg. 4-2, at 1:30 p.m.; Martha Keokuk and Eva Fisher, both of Taylor St., at 4 p.m.,; Miriam Bolyard, Bldg. 31-1 and Oliva Toor, Bldg. 17-3, at 7 p.m.; and Mary Leiter and Mary Vorndran, both of Winter St., at 8:30 p.m.



Tuesday—Eileen Foor and Mary Jane Redding, both of Bldg. 17-3, at 1:30 p.m.; Geraldine Schmidt, Bldg. 31-1, and Elizabeth Wert, Bldg. 17-3, at 4 p.m.; Mary and Helen Wyss, both of Winter St., at 7 p.m.; and, Nellie Wendt and Helen Wagner, both of Bldg. 26-3, at 8:30 p.m.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

We understand that George Foerster is getting along nicely. Not able to return to work yet, but able to get around some. . . . Cal Case got one of his rare hair cuts recently. How will he be able to bear the wintry blasts of January? You should have waited until spring, Cal. . . . Our sympathy to Hugo Kleint on the recent death of his mother. . . . The Lichtsinn supply of canned goods, soups, tomatoes, etc., is going down rapidly, according to Paul. Rumor has it that the gang in the east end of Bldg. 19-3 is going to start a friendship train to keep him supplied with food. If you want to know what we mean, check the size of the lunch Paul brings daily. . . . George Wolfe had a liquid cooled engine on his DeSoto sometime ago when the hose connection broke, and sprayed anti freeze all over the motor, drowning out the spark plugs. Those DeSotos are not as dependable as a little team of bay mares, are they, George? . . . Martin Krueckeberg thanks all his friends in M-G for the nice purse he received from them as a parting gift. . . . Sign of spring: Elmer Minnick and Rudy Rastenberg in deep conversation. Planning to put out their oats by the first of February, no doubt. . . . We were grieved to hear of the death of Ed Schacker's brother last week. Please accept our deepest sympathy, Ed. . . . "Arky," also known as Frank Ruesewald, passed the cigars the other day. "It's a boy!" says Arky.

Given $25 Award

Stanley Gongaware, Specialty Transformer Division 95, is pictured above at the application of his recent suggestion that brought him. $25. Mr. Gongaware's suggestion concerned winding filament coils in which the start lead was started a half-turn back. This helped save coils that have the start wires sawed off.

Test Engineer

(Continued from Page 1)

Royal Society of Surgeons in London.

Mr. Chen received his first education in an American missionary primary school. He then went to a British high school in the Shanghai Municipal Council. Following his graduation from high school, he worked for two years as a medical statistician in a medical research institute. It was just a coincidence that he switched to engineering. Since there were two schools endowed by Henry Lister, one a medical and the other an engineering school, Mr. Chen enrolled in the latter.

He then worked for the Texas Oil Co. in China for two years after his graduation in the engineering department, after which he joined with a friend in a company that manufactured machine tools, motors and small tools.

Comes To America

After three years in the sales department of this company, a representative of the I. G. E. interested Mr. Chen in General Electric's Test Course. He came to the United States in June, 1948, and completed his first two tests at the Schenectady Works before coming to Fort Wayne. He will then return to Schenectady for his final test, after which he will go back to his home country to be with his wife and son. He is returning to China with knowledge gained here with hopes to help his people, partieularly on the manufacture of items they need.

Mr. Chen stated that a majority of the average families with children in China are educated in missionary schools, and that life there is similar to that here in the States. Many of the young people's social life is centered around the church, which has a very good fellowship program. Usually the favorite sports are tennis in the summer and soccer in the later months.

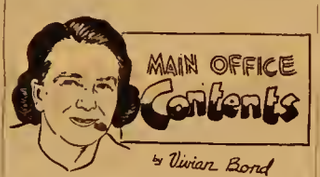
Sees Only Social Change

When asked about his opinion of the Chinese political situation, he stated that it was his personal belief that this was a way to help the people to think a little about what they want and need. They, especially the poor people, have gone without so many things that now they want a change. He believes that this is a social change instead of one of power. Mr. Chen remarked that it is his opinion the greatest help the United States can give is to send more missionaries to assist the poor people.

In speaking about the United States, he said, "I think the first thing that impressed me was the tremendous resources, and the material comfort the people have."

He also stated that this country represents what all would like to have; and also that the people live the life of Christians more here than any place else.

Mr. Chen is the only member, of 77 test engineers at the Fort Wayne Works, who is here from another country.



K. W. Michael Elected Toastmasters' President

K. W. Michael, Assistant to the Supervisor of Personnel, was elected president of the Anthony Wayne Toastmasters' club Tuesday evening.

30 Year Employee Honored

J. H. Staak. Taylor St., is shown receiving a congratulatory letter from A. W. Bartling, Mgr. of FHP Motor Sales, on the occasion of Mr. Staak's 30th anniversary with the Company. Left to right are, B. R. McClure, Mr. Bartling, Mr. Staak and M. E. Lord, Mgr. FHP Motor Divisions.

This comment may be a trifle belated—but I would like to add my word of appreciation for the privilege of hearing Dr. Carothers when he addressed the wives of the men who had attended his nine-week course on economics. I am sure the ladies all left the G-E Club Building with the feeling that the weight of the economic world was resting squarely on their shoulders. It was a pleasure to confirm the splendid reports of Dr. Carothers' dynamic personality and sound judgment. . . . Paul Lenz is rushing spring these days in his new suit and those handsome neckties the men are wearing in Bldg. 18-4. . . . Barbara Meyer has returned to Bldg. 18-4 after a short illness. . . . The news that Carter McLaughlin and Marjorie Meyer were still in Bldg. 16-3 is no longer true, they are now in Bldg. 18-4.

New Reporter

Pat Olinger, Bldg. 18-5, is the new reporter from Bldg. 18-5 who is helping Vivian and Dolores. She is replacing Fonda Cook who is moving to Bldg. 18-4 and still reporting the news from the Data Bureau. Keep up the good work your reporting has been splendid. . . . Welcome to Mary Ann Ryn. We hope you will enjoy your work in Bldg. 18-5. . . . Question—Why did two men come back to Bldg. 18-5 with indigestion the other day, after lunch. Could it be the looks and threatening notes from others in the section who were unable to get a table?. . . . Contrary to any other statements last week Mr. Kent was hit in the eye while playing basketball! (We have always heard that one should say—I ran into a door). Bldg. 18-4 personnel have been taking time out to kid Annabell Redding about those new fashionable shirts she is wearing. . . . Dudley Snyder, Bldg. 18-5, can now join the other members of the Bent Fender Club. . . . Virginia Worden, Bldg. 18-4, has taken over the duties of Verneal Meyer since her transfer to FHP Motor Division. . . . Joan, daughter of Mr. and Mrs. A. E. Leider, a student nurse at the St. Joseph Nurses Training School, received her cap on Sunday. . . . Mary Ann, the daughter of J. H. Hambrock, Bldg. 18-4, will be married to John Koeks on Feb. 12 at St. Patrick's Church. We hope that her future will be filled with much happiness and success. . . . The girls in Bldg. 18-4 have a weighty problem. Why is a home-made hamburger at its best never as good as a boughten one? That is a mystery they would like to solve.

The question of whether Elmer Buuck really has (or should we say) had a purple shirt or not has been solved. We know now he had one but he certainly was chiseled. It faded out to a "baby pink," when it was washed. . . . We have been told the Brouwers Bowling Team won two games last week. What luck, but we think it was about time. . . . It is quite troublesome for Mac to get ready to eat his lunch. After a long search for the newspaper, adjusting the waste basket to a correct position, so he can balance himself on his chair at a very dangerous angle, he is ready to eat his lunch. Remember "Safety First," Mac. . . . We wonder what Mildred Orr had on her mind when she went in Martha Washington's Candy Shop, last Wednesday? . . . Anyone wanting to know the whereabouts of Rosamond Schooley, Zella Sheehan, and Ina Armey, on Wednesday nights, can always find them "drowning their troubles" at a certain soda fountain uptown. . . . Louisa Roberts should be called "The Raisin Kid." Could it be she is trying to build up more energy to increase her bowling average? . . . Bob Kissinger was given a cherry pie as a farewell token. He is leaving us to work at Broadway. Sincerely, Bob, we will really miss you. . . . Aaron Oyer and Leon Sechler are retiring, and we wish them Good Health and the Best of Luck. . . . Helen Miller has a right to feel proud of her bowling team. They rolled a 795 game, even though Catherine Auker was absent. Nice going, girls. . . . Margaret Lepper is improving greatly in her bowling. She had a 470 and 487 in one week. . . . Loretta "Alexander" Runyon has a new nickname. How come, Loretta? . . . Bill Roby still insists that he is just "tired." . . . Chester Degitz, who has been ill, would like to hear from some of the gang. We hope he is feeling much better and will be back to work real soon. . . . Mabel Staley was all smiles when she could hold her grandchild for the first time. The baby has finally been taken home after spending several weeks in an incubator. She now tips the scales at four pounds. . . . Happy birthday to Marcielle Bantel.

With four weeks of this new year gone all we can sing is "I've Got My Taxes To Pay Blues." By the way, what ever happened to all those resolutions you made? That's what we thought, forgotten. . . . Here's something we wanted to be sure and tell you and then forgot. Joe Prezbindowski probably resolved not to chew tobacco, especially O.P. He turned first white then green when he tried a chew recently. Sez Joe, "Never Again." . . . Happy birthday to Ernie Fruechtenieht, Howard Brooks, Jesse Ebersole and Fred Stauffer. . . . Wonder what Alice Pflueger was doing in Clara Metcalf's flower bed late one Saturday night? Were you picking daisies, Alice? . . . Guess we all heard Bill Turner rave about the banana flavored tobacco Monday. Bet American Tobacco Co. would like to know about it too, B. B. Turner. . . . Esther Hakes' kitchen utensils are in bad shape. They would probably be beyond repair if she had a husband to swing them at. What's the trouble, Esther, were the biscuits too heavy? . . . From now on it is "Heine" Geist. Well, look at him! . . . Now that the new Chevies are coming out, our big question is, if Paul Schlie still calls them "A bucket of bolts." . . . If you want to take a nice boat ride, where the weather is warm, go out to Ray Hoelle's basement, he's got plenty of water!!!

Fractional Fiction 4-5

By Elaine Sutter

How many of you have joined the March of Dimes? Your dime will help. Remember one half stays in your community and the other half goes for research. . . . A few changes have taken place on our floor. Charlie Penn has gone to Taylor St., Div. 17. Charlie says it's a big place but he manages to find the cafeteria at noon. Then we say farewell to test engineer Pete Kemp who will be leaving for Pittsfield, Mass. Our new test engineer is Scott Wilkins. Welcome, Scott, to Bldg. 4-5. . . . Bill Dillman not only gives motors an electrical test, but gives them a shock test as well. He has his own method on shock test. . . . Several of Bldg. 4-5 people do need alarm clocks. For instance if Tom Blackwell had one, he wouldn't have to run down the street half dressed to catch his ride. And Trella Gerber and Neva Scott would make it to work on time. . . . Clara Ringenberg is thinking of a transfer to be a carpenter's helper. . . . Pete Macke seems to be doing all right at main placing. . . . The co-workers of Lois Watterson wonder if putting her headscarf on her shoulders keeps her hair dry. . . . Eileen Schuler, Vonnie Nesbitt and Gladys Macon had quite an experience last week. The elevator in which they were riding stuck for a couple of hours. Their co-workers were ready to send an SOS when they didn't show up at regular time. . . . Don Coolman has been bringing in red apples lately.

New Supervisor Of Cost In Wire, Insulation Div.

J. S. Gargett

J. S. Gargett has been named Supervisor of Cost in the Wire and Insulation Division.

Mr. Gargett first came to General Electric in 1933, and his first job was in the Billing Section in Bldg. 6-3. He then transferred to the Cost Section of the FHP Motor Division in 1937. In 1941 he went to the Wire Division Cost Section and later to the Supercharger Cost Section. After serving in the Army from 1942 until 1945, with two years overseas duty, Mr. Gargett returned to the Wire Division.

He is married, and the Gargetts have two boys. They reside at 2312 Opechee Way.

Jake Harshman thinks even when you win, you lose. How was he to know when he took a chance on a rabbit it would turn out to be just a chocolate Easter bunny! The way Doell, Bracht and James have been gyping the boys it's going to be hard from now on to sell chances on something really worth while. . . . Bill Ort went all last week without shaving just to win a bet from Ethel Geyer. Who wants to look like a "bum" all week just for a dollar? . . . Glad to see Bryan Brown back to work after an absence of several weeks of sickness. . . . We are saying goodbye to Elizabeth Pelkey, who is leaving today. She is moving to Plymouth where she will make her new home. . . . Our best wishes to Joan Shuler who is being married on Saturday to Robert Hartwig. In her honor the girls in the office entertained for lunch on Wednesday. Her place was decorated with a corsage and she received a gift certificate. Those attending were Betty Williams, Dorothea Meitz, Clara Outlaw, Alice Kelty, Margie Fenstermaker, Erna Mann and Helen Hardy. . . . We are glad to welcome Margie Fenstermaker who is new in the Cost section—also Ellen Raby, Marguerite Kohr and Winifred Ostheimer who are new in section 15x50.

Celebrates 30th Anniversary

Herbert Bauer, Bldg. 4-4, celebrated his 30th anniversary with General Electric Tuesday, Jan. 18. At that time he received a congratulatory letter from the management, and several of his friends congratulated him. Left to right in the picture are Fred Trautman, O. J. Mettler, Supt. of FHP Div. 1; Florian Korte, Mr. Bauer, George Prince, Wilford Kinsey, Floyd Truelove and Otto Roehm.

Isn't it a pity when even your own automobile won't let you forget a certain date. Such is the case of Buck Buchanan and Sherm Welch. Stand in line never! But never let it be said that these two stouthearted men gave up without a fight. They just put the mighty brain to work and came up with another way to get those little red and white plates without standing in line. . . . Seems everytime Eva Westrick visits Chicago she encounters a very hazardous experience. Eva was among the Elex girls who went to Chicago to see the Sonja Henie Ice show, and before she arrived at the stadium it happened. She fell flat on her face in all that water we had (and Chicago had) that Saturday. By golly, Eva, believe you'd better take a little hazard protection along with you next time Chicago beckons. . . . Teresa Arend, Betty Millhouse, Ludella Conrad, Dot Fletter, Georgian Vachon, Mary Louise Genth, and Harriet Spring joined Eva in seeing the spectacular ice show. . . . Happy birthday, Forrest "Dutch" "Foggy" Wilson. Dutch celebrated the day with a cake complete with one candle and several red hots. On a card from complete file he was in disguise a little mouse, trying to find his way out of the fog. Despite it all happy birthday, Dutch. . . . Bob Gebert looks no worse for the wear since his return from the life of the men in Navy blue. He did, however, acquire a slight tan in that tropical sunshine. . . . Magdalen Fisher left the gang last Friday. Best of luck from all of us, Magdalen. . . . Shirley Renkenberger is leaving today for her new home—Indiana University. Instead of a typewriter you'll have a book staring you in the face now, Shirley. Just be sure and keep your nose above C and all will be well. . . . That's all for now, chillun.

Michel Is Appointed Asst. To Supervisor

L. C. Michel

L. C. Michel, Bldg. 31-1, has been appointed Assistant to the Supervisor, Methods and Equipment of the Large Motor and Generator Division.

A 1934 graduate of the Apprentice School, Mr. Michel has been with the Company since 1929. Since that time he has held various production jobs, being assigned to the Motor and Generator Division in 1939. Mr. Michel has been a foreman in Bldg. 19-3 since 1941.

He is married and has two boys and one girl. The Michels live at 1715 Riedmiller Ave.

Congratulations to Art Kraft and Harold Whonsettler who this week celebrated birthday anniversaries. . . . Who makes more noise than Russ Deveny? Ray Bowers is trying to attract more attention than Russ. Last week Ray had an end shield in the mill putting a lot of fancy designs around the same. . . . Paul Boedeker now is in possession of the burly bag, or rather bags since another small one has been added in case there might be some small skunks added to the collection. . . . Ray Bowers asked Paul Armstrong if he wanted the pocket on his apron. When Paul said, "yes," Ray took it off and gave it to him. . . . Cecil Strong, who recently went to Broadway, was sent a very nice pep-letter by the boys out here. . . . Jake "Red" Allstetter has been worried about not making the column lately. One of these days I'll have room for you, Red, so just be patient. . . . Al Schonheinz is recovering very nicely from his operation, but will probably be confined to the hospital the balance of this week. Al is permitted visitors and will appreciate your call. Room 263, St. Joseph Hospital. . . . Howard McMaken of the St. Joe V.F.D. couldn't hear the alarm when Spencerville called for help last Sunday morning. Maybe after a late Saturday evening he went to bed and covered up his head, so there wouldn't be any awakening from those sweet dreams. . . . Last Monday we were given a surprise visit by Ed Graft.

Meyer Is New Supervisor Of Cost, Budgets

R. C. Meyer

R. C. Meyer has been appointed Supervisor of Cost and Budgets of the Fort Wayne Works Contributing and Services Divisions.

Working on various cost sections throughout the Works, Mr. Meyer's G-E career began in 1925 at the Winter St. plant. Six months later he transferred to the Motor and Generator Division. He returned to Winter Street in 1930, and in 1941 was made Assistant to the Cost Supervisor of FHP Series and Specialty Motor Div. 1. Two years later he became the Cost Supervisor of that division. After serving on special assignments in the Central Cost section, he became Cost Supervisor of the Wire and Insulation Division.

Living at 3617 Reed St., Mr. Meyer is married and has one daughter. He is interested in sports, and is a member of the G-E Squares and the G-E Supervisors Club.

Congratulations to Mr. and Mrs. William Kessler who are now the proud parents of a baby girl named Susan Jane and weighing 7 lbs., 4 ozs. . . . Anyone interested in buying or renting a season ticket for the Zollner basketball games should contact Bob Huhn as he is offering one. What's the matter, Bob, are you regusted with them? . . . Hollis Mee came in to work with a Yo-Yo last Monday and he was all set to trade Roy Orr for his car. Then he says he got to thinking about it and is not too sure he will come out on the best end of the bargain. Roy, is that car really that bad? . . . We wish a speedy recovery to Floyd Goodwin's brother and hope that Floyd will be able to be back soon. Floyd went out West to bring his brother back to Fort Wayne. . . .'Ed Bireley went ice fishing last Sunday. Ed says all he got was a good case of tiredness, but no fish. . . . Evelyn Lietzke really put the week-end to good use. She says she caught up on all that sleep she has been missing. We will say that it sure paid off, as you really looked peppy Monday a.m. . . . We are happy to have Aarwood DeLuery back with us and also Byron Drew and Rowland Parker on the second shift.

Specialty Transformer, Ballast Divisions

Neon Sign Transformers

Build 'Midgets' For Indoor Display

Shown above is one of the new "MIDGETS," indoor-hanger type, neon sign transformer.

On the fifth floor of Bldg. 26, they're making "Midgets"! But, not the kind you've seen in circuses. These "Midgets" are new, small, G-E transformers for operating neon signs.

Because of the electrical principles involved, a neon sign must be connected to a very high voltage source (generally speaking, anywhere from 5000 to 15000 volts) before it will produce that familiar colored glow. Fort Wayne's Specialty Transformer and Ballast Divisions manufacture special neon sign transformers for supplying these necessary high voltages.

Neon signs may be any size, depending on how much available space and supporting material there is. However, for efficient operation and since you can only connect a limited amount of neon tubing to one transformer, the number of transformers used for one sign will vary from one: for small, indoor signs, to many: for huge spectacular outdoor advertising signs.

Let's suppose that you own a store and you want to hang a small sign in the window. You will need only one transformer, indoor-hanger type. A while back, you would have had to get a transformer that was unnecessarily big, awkward, and hard to mount. Today, however, you can get a G-E "Midget"—a neon sign transformer hardly bigger than your hand and only weighing about eight pounds! For this, your thanks would go to the Specialty Transformer and Ballast Divisions' Engineers, who were given the job of designing a little sign transformer that would do all the work of the older, bigger models. The resulting design is fast becoming an industry leader in its field—proof that they did their job well.

Of course, transformers for indoor signs are only one part of the picture. There are also transformers for outdoor signs, for counter signs, and many others. In fact, the Specialty Transformer and Ballast Divisions have specifications for approximately 500 different neon sign transformers.

Over a period of years, the most popular models have been the "streamliners." They are powerful, long-lasting transformers built into sleek, modern streamlined cases. Tops in both appearance and performance. They're typical of the G-E products in which we all share pride.

If you like to play games, you might try one called "Find the Transformer." All you do is look at a neon sign, then look around to see where the transformer is located! Since there is one connected to every neon sign, your opportunities to play are practically limitless. Indoors, you will usually find it tucked away near the ceiling, directly above the sign. Outdoors, they are most often mounted in the metal sign box, or on the wall of the building. But, those are just the usual places—you may find it anywhere or (due to clever hiding) not at all. Nevertheless it's there somewhere, and looking for it is a pleasant pastime. And, if you're like us, it will give you a feeling of pride to find one wearing the G-E nameplate.

Note: Last week, in our story about Ignition Transformers, we said that 6,000,000 people were expected to buy oil-burners next year. Our faces are red from such an obvious error. The number should have been 600,000.

A farewell dinner was held in the private dining room for Esther Teeple, who formerly worked in Production Div., and is getting married next month. We all wish her much happiness. Those attending the dinner were Mary Jones, Dorothy Schnepf, Mary Miller, Alice McBride, Mary Ann Laurent, Christian Andrews, Florence Schultz, Wanda Bailey, Irene Holthouse, Dorothy Schumm, Barbara Roop, Earleen Steffen, Esther Meyer, Fern Passwater, Lucy Daniels, Mary Fennig, Eloise Noll, Frances Terveer, Lydia Lehrman, Cathryn Steele, Millie Geimer, Joan Liechty, Harriet Haines, and the honored guest, Esther Teeple. Ardella Heare and Genevieve August were unable to attend. . . . Don't ever lose your boots in the mud is Alice McBride's advice. For further details contact Alice. . . . Dorothy Schenpf celebrated her birthday Jan. 26. We wish you many more, Dort. . . . If ever you need a coach in euchre playing, Jim Staley's the one. . . . Have you noticed how Chet Kleinknight has been strutting around the last few days? I am sure you would too if you just became the owner of a new Buick. Well, Chet, when do we get a ride?

We are glad to see Jim Linn back after being absent from work since just before Christmas due to a broken finger. We haven't had time yet to ask him just how he spent his vacation though. . . . Bill Roberts was wearing his tie clasp, but no tie. Now we're wondering if someone swiped the tie, or if Bill was just absent-minded and forgot said tie. . . . Jackie Elder can sure get a guy confused. She was telling about her Dad butchering a beef the other day, and first she would call it a "cow" and then in the next breath she would call it a "He." Is it another one of those "Bruster" cases? . . . Charlie Penn passed out calendars to all of his people last week and on the back side of the calendar is the decimal equivalent chart. The fellows now wonder what side it was that Charlie wanted them to have, but there is always the chance that it was to tell when Sat. and Sun. would roll around. . . . Congratulations to Orrie Ogden on his birthday last Monday. He passed candy in honor of the occasion. . . . If you wonder why Oral Emrick is strutting around with his chest all throwed out, it's because his bowling team knocked the league leaders out of first place. . . . And besides that, Oral also received a badge of merit from the rifle club for having the highest average of the year. . . . Poor Ole Ralph Keller has gotten so frail lately that he has to wear suspenders, or did one of the boys borrow your belt, Ralph? It could also be that he wears them just in case that Buick gets stuck he could use them as a tow rope. . . . We're glad to see Marge Ulrich back to work after her recent attack of the Flu. . . . Virginia Johnson's little girl started to school last Monday and Virginia took her over to see that she got there O.K. and all. Ginny said it seemed so good that she sure would like to go back to those "Good Old Days" herself. But now, Ginny, wouldn't a horse and buggy look kinda funny going down Calhoun St.? . . . Congratulations to Charlie Engle, who had his picture in the News-Sentinel for being a member of the Moose Lodge for 38 years. . . . Congratulations are in order to Moe Satterwaite who actually drove his "Chevy" to Indianapolis last Sat. and made the trip back home on Sunday without losing any of the parts. Maybe we should give the Chevy the congratulations instead of Moe, as that is a long journey to hold up under.

If you have been wondering why Ruth Fields has taken on interest in buying baby rattles, just ask her. Ruth is now a proud grandmother! "Granny" Fields' new granddaughter was named Deborah Lynn. Baby, mother and grandmother are doing fine. The Engineers are seriously thinking of moving a rocking chair in Ruth's corner so she can keep in practice while at work. . . . "Beau Brummel" Krasienko sported a pair of knit sox the other day. The "BRIGHT" ones we had warned you about. They were really slick and, believe it or not, we didn't need colored glasses! . . . The Ballast Engineering Section welcomes James Groves, Stan Antalis and Mike Nassen to the group. Stan is married BUT Jim and Mike are unattached. . . . Les Denham made the society column recently when he traveled East to be an usher at Bill Carpenter's wedding. Many of you will remember Bill as a former Engineer here. . . . If you ever miss a Zollner Piston basketball game, just come to Purchasing and A. J. Lange and G. H. Knoll will review it for you—play by play down to the last dribble! . . . While on the subject of basketball, the County Tourney was held last week at New Haven. One of the Monroeville Cubs' loyal spectators is Louise Klinker. She hasn't missed any of their games this year and says they will win the Sectional! . . . . Would you care to swing on a storm door (just like swinging on a star)? If so, see Vera Kilian for details. She and the wind were "feudin' 'n fightin' " with the door but the wind won. Vera had a free ride "with the wind and the rain in her hair." . . . Mary Brinker and Betty Spittler were the two lucky girls from the Payroll Section who attended the Sonja Henie Ice Show in Chicago recently. They went with the Elex group. Jocile Stohlman spent the week-end in Indianapolis having a wonderful time. . . .HURRY! HURRY! HURRY! WE GET TO PAY OUR STATE INCOME TAXES THIS WEEK. AREN'T WE LUCKY PEOPLE THOUGH????

Pat Parrot Is Pet Of Mrs. Patterson

Mrs. Patterson is shown above warning Butch to stay away from Pat Parrot's cage.

The cage separating the bird and cat, above, is to keep the two from playing together. For, when play gets too rough, it is usually the cat that gets the worst of it and goes running for cover.

Pat, the parrot, and Butch, the cat, are pets of Elsie Patterson, Bldg. 4-3.

Although Butch has the run of the house, it's Pat who usually rules the household. His kingdom is his cage in the kitchen, where he especially delights in demanding food from the table while dinner is being served. He usually squawks until he gets what he wants. One of his favorites is mashed potatoes, which he eats from a spoon. He also likes to drink soda pop and eat carrots.

Like all parrots, Pat likes to imitate people. His favorite time is when someone talks on the telephone; he repeats everything that is said. He also likes to sing songs, but will protest if he doesn't like what is currently being played on the radio. He put up the greatest fuss when he heard the broadcast of President Roosevelt making his declaration of war speech before Congress in 1941.

He is often a source of embarrassment to Mrs. Patterson. One afternoon as a man passed the house, Pat kept calling "hello" to him. The man saw only three women on the porch, so thought it was one of them being fresh with him. Another time, Mrs. Patterson came home late at night and was frightened by someone talking to her in the dark. At first she thought it was a burglar, but then realized that it was only Pat up to one of his tricks again.

The parrot has been a resident at the Patterson home for eight years, but his age has been estimated at over 30 years.

GENERAL ELECTRIC NEWS SUPPLEMENT

Candid Camera

VOLUME 14 JANUARY 28, 1949 No. 1

Unique Telecast . . . G. E. and NBC recently arranged for famed artist Grandma Moses, 88, to view from her home in Eagle Bridge, N. Y. the largest display yet made of her paintings on exhibit in New York City. Using a radio microphone, she talked to the art critics discussing her pointings. The program was carried by NBC and telecast by WRGB in Schenectady. With her is Vernon Cooke of Station WGY, Schenectady.

Trophy Taker . . . Ruth Kern, Philadelphia Switchgear Division's only full-fledged woman engineer, admires trophy presented her by the Engineers Club of Philadelphia for completing its Effective Speaking Course with distinction. Miss Kern, a Development Engineer, is quick to point out that "a successful womon engineer must have a thick hide and a sense of humor."

Face-Lifting . . . Schenectady's General Office recently transformed one of its public dining rooms into this beautiful new "Helderberg Room" (above) complete with soft music and lights of alternate pink and white. Along the teal blue walls are comfortable maroon leather seats with facing chairs of blue or red leather. Walls are splashed with mammoth photographs taken in the Helderberg country near Schenectady. Trying out new booth at one end of dining room are, from left, Margaret Hughes, Dorothy Decatur and Muriel Spencer, all of General Office, Schenectady.

He Makes Time . . . Hand-made, all-wood clocks is hobby of Sanford A. Smith, left, a test engineer at the Bridgeport Works, showing his latest clock, "Wag-on-the-Wall" to fellow test engineers, Ted Hill, Ray Ericson, Ned Barron and Don Feigenbaum. At right, "the works" is revealed by removing wooden pegs which hold cover in place. His clock works on o series of small wooden gears, which are hand-made from wood of women's high-heeled shoes and is entirely put together with small wooden pegs.

Anthony Stalp

ONE of the most successful employee benefit plans in operation at General Electric is the Suggestion System. Since 1922, when the plan was organized on a Company-wide basis, more than $2,500,000 has been awarded to employees for their suggestions. Single suggestions have brought awards as high as $3,000.

Recently, in one week alone at the Schenectady Works, $1,270 was presented to employees whose suggestions were adopted. The largest award that week went to Anthony Stalpinski, a radial drill press operator, who received $250 for a suggestion concerning the salvage of rejected castings.

In order to show what steps Tony took to present his suggestion, and to show how the System operates, our Candid Camera photographer visited Tony at his home and at work. Incidentally, this is the third time Tony has cashed in on a suggestion and his total awards now amount to over seven hundred and fifty dollars.

1. Tony sketches the first plans for his suggestion to salvage castings at his home work bench, and is ably "assisted" by his two sons, Ronald (left) and Alan (right), dad's enthusiastic boosters.

2. Having worked out his idea on paper, Tony next tries it out on his drill press in Building 105. He believes that some extra machining will make the rejected castings usable for other purposes.

3. Satisfied that his idea will work, Tony writes out the details on the official Suggestion Plan blank provided for that purpose, and drops it in a suggestion box near his section.

4. The suggestion then goes to J. J. Huffmire, secretary of the Works Suggestion System, who studies it and informs Tony that his suggestion has been received, and is being acted upon.

5. Additional information is needed so Tony explains his suggestion to his foreman, Ernie Bay (center) and to the Division Superintendent, R. L. Aughenbauch (right), for further study.

6. The suggestion is next studied by specialists from the engineering, wage-rate, and planning sections; James Dutelle (left) V. R. White (center) and K. R. Palmatier (right); for a final report.

7. The Works Suggestion Committee weighs the full report of the suggestion and awards Tony $250, based on the calculated savings which Tony's suggestion will make possible.

ki Is One of Many Whose Ideas Pay Off

8. Informed that his idea will bring him an award of $250, Tony and his daughter, Eleanor, went Christmas shopping. We see them here being greeted by the family as they arrive home.

9. The entire family benefits from Tony's suggestion, and Mrs. Stalpinski is heartily in favor of the Suggestion Plan since she obtained a new winter coat with a share of the award money.

10. Eleanor, who is a stenographer at International G. E., and Mrs. Stalpinski wrap Christmas presents as they happily discuss the timely arrival of Tony's Suggestion Award check.

11. Meanwhile, Tony, Ronald, and Alan hold a serious mechanical consultation about Alan's new tricycle, which is another dividend resulting from Tony's suggestion award payment.

12. At dinner the family recalls a previous suggestion award of $500 which Tony received back in 1945. Some of the furnishings in their new home were purchased with that extra money.

13. As our photographer takes leave of the Stalpinski family, Tony tackles a minor repair job on the front porch of his home. His comment, "Anybody can come up with a paying idea."

Candid Camera

Brightening Their Lives . . . To enable physicolly-hondicopped ond shut-in youngsters to enjoy television, Shirley Dinsdale, ventriloquist on Station KTLA, Los Angeles, is promoting the ideo of TV Bedside Circuit which would circulate television receivers to deserving children. Shown attending a kiddies' party are Shirley, her dummy sidekick Judy Splinters, ond Art Linkletter, radio showmon, with a television set donated by the General Electric Company to get the TV Bedside Circuit idea rolling.

Million Mark . . . The millionth home radio receiver to be produced by the Electronics Department since it opened its headquarters at Electronics Pork, Syrocuse in July 1947, recently rolled off the production lines. Present for the occasion were Dr. W. R. G. Baker (left), Vice President and Generol Monager of the Electronics Department, and I. J. Kaar, Manager of the Receiver Division, viewing the radio receiver as it goes down the line.

Blind Armature Winder . . . A General Electric apprentice in 1935, Clark Brody was tops ot the bench eleven years later ot the Atlanto, Go., Service Shop, where his sight faded despite the best medical care. Friends ond fellow-workers, hospitalizotion insurance, G.E. Employees Relief and Loan Plan, ond rehabilitation corried Brody and his wife ond son through trying months. Last summer he wos offered new opportunity for his skill by Generol Electric. His leader says, "Brody's work is equol or superior to ony mon in his job classification."

Run Remedied . . . The latest thing for General Office girls is this stocking mochine just installed in one of their rest rooms as a trial venture. Doris Breymaier demonstrates how, for one dollar, she can get a pair of full-fashioned, guaronteed, Business Sheer nylons, with a choice of two colors and four sizes. Whatever revenue is made will go to the General Office recreation committees to help finance some of their activities for employees.

Division Columnist Is Shoe, Photo Fan

Helen Engle

Featured as the Division Editor of the Week is Helen Engle, who writes "Thisa and Thata, Specialty Motors, Bldg. 4-3 and 4-4." Helen has worked in FHP Motor Division 1 for 13 years as a lead placer.

Helen's main hobby is collecting miniature shoes. She now has between 150 and 200 shoes gathered from 31 states and six countries, representing Canada, Mexico, India, Germany, Japan and China. The items are made from various materials such as china, metal, tallow, wood and cardboard.

Besides collecting shoes, Helen is also interested in photography. She has cameras in both the movie and still-picture fields, and is particularly interested in color photography. She is also active in Christian Eadeavor work, having been on the state board for a number of years. She is now head of the Church Activities section of the board.

Helen has a large staff of reporters. They are Betty Birtsch, Alva Foulks, Grace Ober, Louis Barrow, Bill Dinkle, Paul Arnold, Helen White, George Crickmore, Marie Devoe and Bonnie Wolf.

"He who is determined to get on by 'Hook or Crook,' will get the first and become the second."

Barbara Wilson made the headlines this week. Barbara had been looking forward to the trip to Chicago with the Elex as much as the rest of us. But as it turned out she only rode home with us. The train pulled out at the scheduled time—8 a.m. but not with Barbara. She was still dreaming at eight and did not awaken until the train was well on its way. She took another train and arrived in Chicago just two hours later than our arrival. The rest of the party had given her up and started out without her. Imagine their surprise when they saw her in the Union Station Saturday night ready to go to the Sonja Henie Show but the tickets were given out on the train and she didn't get to sit with any of her crowd. Better luck next time, Barbara! . . . The F.B.I. (The Funloving Boys Inc.) were very busy investigating a mysterious character named Max Feilitz last week. Max bought a new camera with a lot of gadgets on it and asked a fellow worker to show him how to operate it. But the good 'ole FBI was right on the job and the chief investigator himself (name withheld) took his finger prints and is still trying to connect him with some unsolved crime. . . . Joe Haas has every reason to be proud of his little girls. He brought their pictures in and they are certainly sweet youngsters. . . . George Todd's daughter, Nancy, underwent an appendectomy last week at the St. Joseph's Hospital. She complained the first night after the operation because they wouldn't give her anything to eat. A mere operation doesn't seem to spoil her appetite. . . . The fellows are getting curious about the many trips Eddie Bienz makes to Chicago. What about your FBI getting into that too? . . . Walt Buesking had a good time ice fishing recently. He had to fish his four and a half year old boy out of the lake too. . . . J. Rippe is a newcomer to the Tool room. Don't let the fellows be too hard on you, Rippe. . . . Earl Yoquelet went hunting recently but all of a sudden he changed his mind, or should I say that a BULL changed his mind? At least he looked for another place to hunt, who wouldn't?

He that tells a lie must invent twenty more to maintain it.

Apprentice BROADCAST

By Eugene Werling

Taxes, License, Insurance are the three main topics of all pocketbooks at this time of the year. January seems to be the big month for government mainly due to tax collecting. We start the year by paying taxes in January and depletes our saved shekels so much it taxes a couple months to get ahead a little again. The next thing we know it's poll tax time again so once again we dig into the sock and keep the county treasurer happy. Now we're all set for awhile with our taxes all paid up but that doesn't last long either because here we are right back with January again. Just one happy cycle. Why don't we all just hibernate for awhile? It's a good thing it's Friday so we can for a whole weekend. Don't forget, the state taxes have to be in by Monday. . . . Bob Barnes better check and double check his tax forms to make sure he had the correct form in the correctly addressed envelope. Bob had trouble getting lunches mixed lately and has been very cautious since. Mrs. Barnes did her usual chore of making Bob's and her daughter's lunches, with one for tape worm Bob and the other for their daughter. He came to work with his lunch in hand but when it was opened he found to his dismay that it wasn't his lunch. After that experience Mrs. Barnes probably puts a tag on his lunch. . . . Lucky Teeter Owens has been doing very well driving lately, no crashes or escorts. You'd better stick to a street car, Bill, because you just can't win. . . . Bill Smith can't figure out what happened to Jesse's Sea Clamps. Don't make it so tough, Bill, all you need to ask for is C clamps. . . . (Hairless Joe) Chappel finally saw the light, or was that stars, Chap. He got too engrossed in a calendar pin-up and really fell-backwards. . . . Another week has come to pass and all the draftsmen seem to be holding their own. Friday evening Jack Kirlin's wife left the house to him and said that she didn't care what he did. So Jack invited about eight of the boys out. Ol grandad Skeeter and Joe turned out to be the euchre champs. The boys all want to thank Jean for the swell meal she fixed for them. . . . Rumors are flying around that some of the boys are going to change the style of Roby's costume. It consists of a complete zoot suit with red tie and yellow socks. I hear they have a big pair of scissors for equipment already. But Garland claims he wears it for sentimental reasons. Somebody gave it to him for a Christmas present. I just wonder what he gave them in return for it. . . . I guess Lew Davis will be teaching Roby letter writing one of these days. It seems everybody picks on poor Roby even (New Departure Co.). Lew gets his handbooks free and they request Roby pay 50c a copy.

Jan. 20 was inauguration day for our president, but for Walter Kryder, it was limburger cheese day. . . . "Lady, your token." Does that sound familiar, Eileen Steinacker? . . . Have you noticed the glasses the girls are wearing that connect and weld? They aren't hiding from the public, but just taking care of their precious glimmers. . . . Happy birthday to Pauline Gnau, Verna Bullerman and Walter Kryder. . . . Hi ya, Fern Monroe. We are certainly glad to see you back. Hope you don't have to leave us again. . . . Rose Hughes has left us for a leave of absence. . . . We don't know what kind of a vehicle Francis Eckrote travels in but it must be fast. Tuesday she was in California all day. Wednesday morning, sure enough, she was at her usual place. We expected a card, but none arrived. It must have been her vacation dreams out loud. . . . We can't decide whether it is the Ohio air or just a week-end down on the farm that changes Elvira Diller. It takes her until Wednesday to get back to normal. . . . Speaking of traveling, Iley Souder has been trying to travel down the cellar steps the fast way. Better be careful, Iley, Hap Hazard is watching you. . . . If you are out of wire, just call Herb Bender. He is our new wire boy. . . . Just mention "camera" to Max Felietz if you want him to turn a pretty cranberry pink. . . . Does anyone know why it is that Walter wears a tie when he goes down to Bldg. 17-2 but returns without one? . . . We are expecting Juanita Likens to call out a big "Mamma" after seeing all the baby food she has been eating. . . . Dorothy Johnson believes in being prepared. The night of the big blow she sat calmly holding a candle just waiting for the lights to go out. . . . Sorry to report Betty Lupton is again on our sick list.

It is not enough to rage against ugliness; beauty must take its place. It is not enough to expose the false; truth must march.

Choir To Be Featured At Elex Club Meetings

The Elex Club will hold its monthly meetings Monday, Feb. 7. The Day Girls will meet at the G-E Club gym with serving hours from 4:45 to 6 p.m. The YWCA will be the scene of the Night Girls' luncheon which begins at 12 noon.

Featured on both programs will be the Indiana University Choir, above. This choir of 40 male voices is under the leadership of George Krueger. Tickets for both meetings are $1 and reservations must be made with Elex contact girls on or before Thursday, Feb. 3.

Starting with this meeting, the Works Cafeteria will furnish the food for the Day Girls' dinner-meeting. The menu for that evening will be ham and sweet potatoes, cole slaw with oil dressing, rolls and butter patties, cherry pie a la mode, and coffee.

Those members who have been laid off can make reservations for the meeting by calling Irene Meyers' office, Bldg. 8-2, before the deadline. Tickets then can be picked up at the door before the meeting.

When a job is finished, then it is time to look back and take stock of how well that joh was done. During the 12-month period of 1948, our section repaired and returned to customers over 100,000 motors—111,705 to be exact! We point with pride to this achievement, a record never before equalled or surpassed in our section. This record was achieved only through the full cooperation of everyone in our section, and everyone can feel proud of their part in setting this record of a job well done. . . . We welcome Orval Harrod, who hails from Bldg. 17-1, to our section. The best of luck, Orval, in your new joh. . . . We wish belated, but sincere happy birthday wishes to Voyce Brumbaugh and Jeannie Conrad. Many more happy birthdays, girls.

"Woe To A New Camera"

If you want your picture taken,
Just see Margaret Parisot.
She has the finest camera
That money ever bought.
Alas, when a subject's focused
There's a click, a flash, a pop,
Rarely is she lucky though,
For the majority are a flop.
Occasionally after shooting 8 or 10,
A fairly clear print is obtained.
Straight downtown you should go;
Is our best advice to you,
To obtain a picture you can show.
"One Who Appreciates Good Pictures"

Dal Smith has been advised hy his many friends to eat food containing iron, following the examination which showed his blood to be low in iron content. Do you really think that diet of steel shavings will help you, Dal? . . . Earl "Four-Quart" Gallon joined the second shift last week. Welcome back on nights, Earl, especially from the "tonk players." . . . A Smith by the name of Ray rejoined our section last week after spending sometime at Taylor Street. Welcome back, Raymond. . . . Walt Sollberger gained another new name to add to the long list. His latest nom de plume is "Waldo." . . . It might be a good idea for Bob Mobberly to tie a string on his billfold, just in case. It can be found in the most unusual places.

Mary Louise (Hull) Heuer was in to see us this week and informed us that she was on her way to Florida. Here we are slopping around in slush and fog, some people have all of the luck. . . . We sincerely hope that Santa hrought Harold Hohman and Walter Kryder a good supply of ties for Christmas. Sure looks like their old ones were disappearing inch hy inch. . . . The old flu bug is active in our office again. He surely did work on Dick Lare, but Dick is hack at his desk again looking a little wobbly. . . . Looks like Pres Slack is again planning that dream house in the country. He comes in laden down with all kinds of hooks telling all about houses and what can be done with them. . . . Who says that we don't have honest people in the world today? Eveleen Bennett lost her pay check Friday and it came back in the mail Saturday morning, and without a request for a reward.

Three New Q-C Club Members

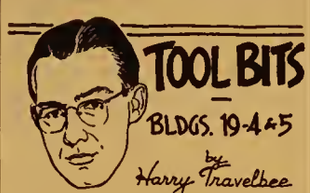
Jack D. Fox
Bldg. 6-2

Berniece E. Kratzsch
Bldg. 26-4

Lee T. Mohr
Bldg. 26-4

"Tell my committee when I am dead
That they need shed no tears;
For I shall be no more dead then
Than they have been for years."

We wish a speedy recovery to Betty Zieg, Employees' Store, who is hospitalized after an appendectomy. We hope that certain somebody in your life hurried back from Cuba to brighten your convalescing days, Betty. . . . Congratulations to Loyd Bodenhamer in his recently becoming father once more. Its a boy! And most of the Employment Office people will remember Norma Jean Schumm—she and Henry have their first one, a girl. We wish all of you the very best. . . . Wednesday was a big day for our supervisor, Mr. Zook, who visited Schenectady that day. Hope you had a nice trip. . . . We know Don Campbell doesn't like publicity, but this one seems too good. His picture appeared in a Pasadena, Calif., paper recently, acclaiming him as one of the students from Northwestern University. The picture was with a group of others depicting scenes from the university campus and was used during the week of the Rose Bowl game. . . . Evanell needed two alarm clocks last Friday, hecause she simply ignored the time till she heard someone laying on their automobile horn. It was her driver who picks her up for work every day. That should teach you, Evanell, for a week or so anyway. . . . We'll admit it was pretty chilly the other day, Doris, hut we thought it was a little too much when you gathered up the cot cover along with your coat and took it into the office with you. . . . We were happy along with Charles Bilskie in his recently having won a share in the Dinner Winner program. It sounds (from the description of all the things they got to eat) like they'll be eating six or seven meals a day in order to use it all. . . . Till next time, this word to the wise: "The fellow who thinks himself a wit is usually half right."



It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

The men in the Division are really on their toes these days since Mr. Dennison has made his new ruling. For anyone late to the meetings called in Ralph's office it will cost them 25 cents and if they are a special friend (like Kenny Sheehan) they may he charged 50 cents. At a meeting last week $2.50 was collected. At that rate you boys can have a big feed before too many weeks. . . . Div. 17 is pretty well represented at Purdue Extension, Prof. Everett Smith is teaching algebra, and Schoolboy Gene Foster is getting a little advanced learning. Gene says it's very embarrassing when those kids just out of high school can show up an old man like him. . . . We lost two of our gang last week. Basil Squires left for Div. 15 and Roy Jahnke is now in Div. 13. . . . We are happy to hear that Vera Schweier's father is improved after his stay in the hospital. . . . Charlie Gahle, Ben Fleek and Gordon Smith are very much afraid their ice fishing is over for this year. If it doesn't freeze up pretty soon, they are going to trade their ice fishing equipment in for a good cane pole and a big straw hat for next summer. . . . That's all for now and we will see you next week.

Nothing like having an interesting hobby to keep you busy in your sparetime and that is what Del Stickler has in the printing equipment. Del says that it is fun. If you want to order, see Boh Goers for further information. . . . Have you noticed the classy pipe that Stewart Bohrer has been sporting? One good glance at that pipe would seem to indicate that Stewart might have been indulging in a few too many Sherlock Holmes stories. . . . Did you notice the new apron that John Neukam broke in last Monday morning. Naturally, we thought it was the very latest 1949 style, so we asked him how much it cost and he named a price 30 cents under today's prices. He confessed that he had bought it before the war. . . . Cliff Dunten says his pet peeve is to be awakened too suddenly out of a sound sleep. Can't blame you, Cliff, most people hate to be awakened anytime. . . . We all wish Charlie Kloepper good luck, hut never good-bye for we're expecting many visits from you Charlie, even though you have retired. . . . The boys all have highest respect for Carl Einsiedel since he was recently selected elder in his church. . . . Jack Roesoner seems to have a very good radio personality as witnessed last week over "Hey Mr. Motorist" on WOWO. At first, he was scared he had violated a traffic law when the policeman hauled him to the curh where the broadcast was held. Jack said he felt better when he found out it was only a radio broadcast and was willing to talk about anything including the weather. . . . Carl Ahlersmeyer's wife is evidently very thrifty, especially where Carl's spending is concerned. He came into work one morning last week with hoth pants pockets sewed shut completely. That is one way to guarantee economy. . . . The county tournament is over and our Monroeville fans of Bldgs. 19-4 and 5 are sure enjoying themselves. These include such notables as Russell Jones and Agnes Ditlinger who think the Cubs can coast to the State title. . . . Joe Mettler has cancelled all his tickets to Zollner basketball games since they hlew a 14 point lead and lost hy one point. . . . Our fearless foursome Swede Moser, Joe Mettler, Mart Walsh and Glen Ramsey are planning a trip to the wilds of Canada this spring for some good trout fishing. . . . Mr. and Mrs. Jim Mattes are the proud parents of a baby boy horn last Monday morning. Congratulations from the boys at the shop. . . . Waldo Reed is in favor of more parking space in the parking lots around G-E. Seems that he just hacked into a fellow worker's fender. . . . As for the office, things have been running pretty much according to — since the two Mary Ann's (Jones and VanRyan this is) and Elaine Allen departed. Incidentally, we miss you girls. . . . Sure glad your little girl is better, Harmon Westrick, and hope that you keep her out of the hospital now. . . . If you think you're seeing someone else in Edith Gordon's place, you're mistaken. Yes, Edith had her hair shingled, and we like it, Cliff—that's her hushand. . . . Connie, if you're going to take Mary Ann's job, you've gotta whistle—just can't stand that quietness.

It would he nice if we could trade in heads of oak for hearts of the same stuff.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday Noon, January 31, 1949

LOST AND FOUND

LOST—One buff wool glove in C-E Club.

FOUND—One earring with brilliant sets. Found in C-E Club.

FOR SALE

ELECTRIC BROODER HOOD—10 hole metal nest. H-77615 after 4 p.m.

SILVER FOX COAT—Size 12-14, excellent condition. $50. H-35552 between 4 and 6 p.m.

HORTON ELECTRIC IRONER — Table model. New at Christmas. H-0743.

16 FT. HOUSE TRAILER — $350. A-26665.

PHILCO RADIO—Eight tubes, floor model. H-19221.

G-E CONSOLE RADIO—And Minneapolis-Honeywell furnace regulator. H-26341.

PINBALL MACHINE — A-1 Condition. $15. 2215 Curdes Ave.

DOBERMAN PINSCHER — Obedient, 8 mo. old, dogbouse. A-79665 after 7 p.m.

GIRL'S SHOE ICE SKATES—Size 3. H-76943.

FOR RENT

PARKING SPACE—At 1434 Broadway. E-40203.

WANTED

TWO-BURNER GAS HOTPLATE — H-79386.

USED MIXER—Tank sweeper with attachments. A-75442.

TRANSPORTATION

WANTS RIDE—Ralph E. Jacobs, from Liberty Center, Highway 303. Works in Bldg. 19-1, from 8-5, Extension 2334.

P's and Q's of 17-1

by Joe Kramer

The more you say the less people remember, the fewer the words the greater the profit. . . . Miriam Valentine was so excited and so pleased when her sister came to visit, that she didn't want her to return home. Miriam came to work, the excitement being so much for her, she locked the apartment door locking her sister inside. After a few hurried telephone calls, the landlady unlocked the apartment. Was Miriam's face red. . . . Red Braden and Novis Hopkins wonder how a bench man like Jack Lewis could get the seat of his trousers so dirty. Must be someone sets cans of grease on the chairs. . . . An evening meeting of the N.H.P.C. was held at Robert Dent's last Friday. The party was given by Wally McKay, Dick Evans and Howard Reinking. Those attending who had an enjoyable evening were Carl Reiter, Robert Dent, Frank (four-of-a-kind) Quinn, Joe Kramer and Norb Meyer. It certainly is surprising what control some people have over games of chance. Lucky Quinn. . . . The not so new but radiantly beaming face in the tool section of the Planning Section belongs to Bob Taylor. Bob returned to Bldg. 17-1 from Kokomo, and at the last report, all Bob says is, "It just feels like coming home from a long visit." Welcome back, Bob. . . . It is surprising what can happen at 4 a.m. and all of those claims some of these furniture manufacturers make for their products, they should be ashamed of themselves. This complaint will be verbally attested to by Vie Hall. It seems that the slats used in making beds just aren't as long as they should be. If you have been having trouble keeping your bed together, see Vic Hall. He will give you definite instructions as to the care and maintenance of this article. . . . We bid welcome to Clarence Hatfield who is the new methods planner in the office, coming to us from Div. 13, Taylor St. . . . Helene (Dancing Girl) Evanoff wants it known that the burn on her forehead was caused by permanent wave solution and not a floor burn. . . . Tavie Popa will gladly share her Necco wafers with anyone providing they don't take any of the chocolate flavored ones. . . . **If you saw a fire you would immediately turn in a fire alarm. So why not when you see waste occurring in the factory sound the waste alarm, tell your foreman. HELP REDUCE WASTE.**

Thisa and Thata

SPECIALTY MOTOR

By Helen Engle

Bonnie Birely says that her husband is really a good cook. We can believe that because he has had more experience than Bonnie. . . . George Luedeman is looking forward to a great tomato crop this season. He has a pair of non-skid shoes and I guess he plans on picking everything from Waynedale to Decatur. . . . They say Louis Sauer is going home by the way of Broadway to Berry to College to Jones St. Maybe it's closer that way or maybe he just does it for the exercise. . . . Say, did you girls see the nice looking fellow's picture that Betty LeMasters had up here last week? They were pictures of her young son. He sure is cute. . . . Our deepest sympathy to Freda Farley on the death of her nephew and to Joan Braun's son-in-law whose brother, Robert Weaver, was killed in a plane crash. . . . We welcome the night girls on days. . . . Olive Adams visited with her daughter, Mrs. Max Decker in Murry over the week-end. . . . Edna Hauser had a plastic party Friday night with Carol Estes as demonstrator. Bessie Fitch, Bessie Franee, her daughter and Iva Mullins were some who were present. . . . Ray Soest is getting 100 baby chicks this Friday. So now we know where to go for a chicken dinner. . . . Lester Hubbartt says he doesn't like the icy sidewalks. Watch your step and then they won't come up to meet you on the way down. . . . Will some one please help Fred Clark. this new car deal sure has him down? . . . There has been some changes recently in our group, namely—Ruth Hine has been helping out in Bldg. 17-1. Hurry back, Ruth. Junc Rencman has been transferred to Taylor St. on nights and Esther Madden to the Truestand. . . . Al Brauer has retired. Good health and good luck from the gang. . . . Alice Claymiller had a trying time one morning last week. Speaking from experience she thinks dogs should be left out of doors. . . . Betty Kummer really had an experience one day. She was riding three in the front seat of a car when they rounded a corner and out she flew. . . . Did you ever hear of anyone warming their ice-cream? That is what we saw Jim Harnish doing the other day. He said that it was too cold. . . . Phyllis Herms and Jaunita Shoppell left last week to become full-time housewives. Good luck to you both and let us know if it is a boy or a girl. . . . Our sympathy to Betty Kulesza whose young son Jimmy died. Just saying you have our sympathy I know will not take the place of Jimmy but we did want you to know that we are thinking of you and may God give you strength to carry on.

Sleuthing

IN BLDG. 46

by TEDDY NEDS

The Production Section reminds us of a six-year-old child who lost his two front teeth since J. J. Welch's group moved to Taylor St. over the week-end. We hope you like it out there and remember Bldg. 4-6. . . . The Purchasing Section bids farewell to Evelyn Harges who has been transferred to Production Div. 17, Taylor St., and also to John Leininger, who transferred to Bldg. 18. . . . The familiar face of R. E. Brake can now be seen in the Purchasing Section. Bob has been in Kokomo for several years. . . . K. H. French of the A. C. Section, was in such a hurry one day last week that the time clock stopped for him. Incidentally, it failed to run the rest of the noon hour. . . . The answer to the rejected look on Ralph Mesing's face is that he still isn't in Uncle Sam's Army. . . . Al Ulmer has recently completed the "12th page" of his log regarding the coin experiment and he now has $1.65. Someday we will all celebrate if the sum continues to grow. . . . Have you heard of the "Indestructible telephone"? C. J. Herman has recently proved there is no such thing. The day after he won the plaeard for the "Long-Winded Champ," he dropped his telephone and it fell apart. These engineers—they're always trying experiments and proving or disproving theories. . . . Col. Julian Stark was the second member elected to the "1949" Floor-Sitters Club. Fory Carlson, a veteran member of 1948, was present for the initiation and did a very good job of timing. . . . John Reuille is probably one of the scotch tape manufacturer's best customers since his baby daughter, Rosie, has learned to cut paper. Just the other day, he was seen taping his telephone bill together because Rosie picked up the scissors and the telephone bill at the same time. . . . That big smile of Jane Winebrenner's is all Theron Cusenberry's fault. She came to work last Friday morning with a beautiful diamond on her left hand. Best wishes to both of you! . . . We hear that Adolph Strasser has a "Dr. Jeykll and Mr. Hyde" personality. He is now known as "Why Don'tcha" or "Coming and Going."

John Laymon, Sr. isn't here to protect himself we won't say much about him except that he is home this week enjoying his vacation. . . . Gerald Crum has been running a pretty high temperature ever since he saw the new Chevrolet last Saturday. The "new car fever" has really got him going now. . . . We understand that Robert Mcnewisch is being recommended for some sort of medal for having a perfect attendance record for the last few weeks. . . . Riding home from work in crowded buses doesn't agree with Fred Wellensilk so now he just calls a taxi after work. . . . Gerald Schaefer has declared an open season on all shear operators for piling their scrap too close to his machine. . . . Bill Gepfert was awfully disappointed the other Saturday when his hams didn't come out already precooked after feeding his hogs coal.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

If any of you fellows are having trouble finding a place to get a shave around Fort Wayne, don't worry about it any longer. We have a barber in the crowd, namely Arlo Amick. This we know because we saw him giving himself a shave the other morning before the whistle blew. . . . We wonder where Ed Byers got that loud shirt he was sporting around here last week. . . . Ralph Milligan celebrated his (he didn't say which) birthday last week by giving all the fellows in his section a big red apple. Almost forgot to mention it but the office girls were included in this birthday party. . . . While we are talking about birthdays we would also like to say that homemade peanut brittle will be O.K. for a treat the next time Eddie Daucher has a birthday. . . . Since

Inquiring Reporter

WOULD YOU BE IN FAVOR OF DAYLIGHT SAVING TIME THE YEAR AROUND?

DOYLE D. MILLER

Bldg. 26-1

"I think Daylight Saving Time is all right for the summer months. But, why lose that hour of good sleep in the morning during the winter months?"

HELEN MEADOR

Bldg. 4-6

"Yes, I believe Daylight Saving Time the year around would solve many problems and eliminate the semi-annual confusion and arguments which the change-over invariably causes. It has been proven to work out satisfactorily in the past on a year around basis and the change-over would put us in the same time zone with most of our neighboring states."

ALICE ALLEN

Bldg. 31-2

"I would be in favor of Daylight Saving Time the year around as most people work in the cities and this change would add one hour of daylight to the time they have for their personal outdoor work and recreation."

PHILIPP VORHOLZER

Bldg. 10-1

"Yes, I am very much in favor of Daylight Saving Time the year around, because I do not care for the changing from Daylight Saving Time to Standard Time. It is quite difficult for me to adjust myself to the hours to get up."

SYLVIA M. BAUGHMAN

Taylor St.

"No, if the entire state were to adopt it so there would not be so much confusion, then I would say, 'yes.' As for taking trips in the summer, the different kinds of time are very confusing to the traveling public, and to have the same time all over the state would be more convenient."

It Touches The Heart....

. . . . WHEN WE THINK OF SAFETY AS IT SHOULD BE CONSIDERED. It was this heart-warming, emotional approach to safety that prompted Bob Mobberly, WORKS NEWS Reporter, Bldg. 4-4, to place the following poem (author unknown) in his column, "Floor Lore From 4-4."

Somebody's Little Boy

Somebody's boy was crossing the street,
Innocent, young and fair,
He hadn't the judgment of other folks,
He didn't see the danger there.
Somebody's boy had a song on his lips,
But it died in an instant away.
For a motorist ran the little boy down,
And he died at the close of day.
Somebody kneels by an empty bed,
And fondles a little shoe.
Somebody looks through the empty years.
Suppose this somebody were you!
Will you not watch for the little boys,
Drivers in cities and towns?
Really, it's one of the greatest crimes
To run a little boy down.

Mrs. Jess H. Romine, in the above picture with her husband, who is an employee in Bldg. 17-4, was so moved by this poem that she promptly forwarded this poem to the News-Sentinel "Private Opinions" editor. She had a good reason, because Tommy Lee, the happy youngster in the above picture, is her son. The editor again was motivated by this same force to select this as a worthwhile article for further circulation among the reading public.

WE MUST TAKE SAFETY HOME WITH US. IN 1948, SEVEN G-E EMPLOYEES OF THE FORT WAYNE WORKS LOST THEIR LIVES IN *OFF-THE-JOB ACCIDENTS*, WHILE THREE IN THE ENTIRE COMPANY LOST THEIR LIVES *ON THE JOB*.

Here are some statistics which indicate we Fort Wayne Works employees are having fewer accidents off the job than the average citizen.

NATIONAL AVERAGE — 70 out of 100,000 population
FORT WAYNE WORKS— 7 out of 12,000 population
OR—58.3 out of 100,000 population

HERSCHEL L. SMITH
Safety Engineer

Motor-Generator Static

Thought for the week: "In writing, or speaking, give to every person his due title, according to his degree and the custom of the place."

Many persons ask why do we have so much about so few people? It is because so few people send in news items. Which reminds us of the small town editor who when his collections were slow coming in stated, "You can't run a newspaper on hot air and cold potatoes. People come and go but nobody tells us." . . . Just talked to Cliff Milnor about the mystery melody. He didn't have it as of Jan. 24, so we don't feel so bad. He expects to have it by today or Sunday. Watch "Lines and Angles." . . . S. A. Palmer, formerly of Suggestions, visited Bldg. 31-1, Monday, Jan. 24. Glad to have seen you again, Si. . . . Did your house shake on the evening of Jan. 15? Did your private seismograph register mild tremors in the downtown Fort Wayne? If so, don't be excited, Mother Nature was not up to any tricks. The earth shocks developed in the Junior Hall at Harrison and Berry St., where Joe Neal was square dancing. . . . "Big John", president of Ed Foley's American Greeks attended a Greek New Year celebration which started New Year's Eve and continued through Sunday. John proved to be a mandolin virtuoso and performed during the celebration. Time and effort exacted their toll. When the party broke up only one string was left on the instrument. . . . Dick Hobson came to work last week with a dandy shiner. The explanation was that Junior Hobson had socked him in the eye. Perhaps, because we know Dick, we doubted this story. The writer tried putting himself in Junior's place and on analyzing his reactions, decided we would have given the old man not one, but two shiners for monopolizing our new electric train the way he has. This analysis proved to us that the story did not ring true so we investigated to find the truth. Dick went out to the garage to drool over his new Buick, stepped on a hoe lying on the floor, the handle flipped up, hitting him in the eye. . . . Roscoe Markley of Bldg. 19-1 is a very modest and retiring man who keeps his light so well hidden under a bushel that few people appreciate his versatility. In addition to being a hog fancier and dirt farmer, Mr. Markley is also a hog caller of renown. He referees basketball games and entertains between halves by tossing eight out of 10 shots from the center of the floor through the basket without touching the rim. (Pistons, please note). He is an expert square dancer and teaches this art. He is also a carpenter of no mean ability, a leading light of Roanoke and member of that city's Lions Club. . . . Not to be outdone by Brosius, Foley and Hobson, who bought toys for their Christmas, Bob Tieman of Bldg. 19-3 purchased a mechanical train. He donned his overalls and engineer's cap and unpacked the railroad preparatory to setting up his transportation system. When the unpacking was completed he had an engine and coal car but was short a piece of track, so now Mr. Tieman has given up railroading and just sits back and dreams.

They Got The Limit

Frank Hall, a boring mill operator in Bldg. 27, and Al Hutchisson, an assembler in Bldg. 19-1, are very proud of their hunting ability. On the last day of the season, Al and Frank took no chances of not getting their limit. They each took along two guns. When one got hot they switched to the other gun until it cooled.

Ramblings 31-2

"Drafts" from the Drafting Room—We have in this world cigarette, bromo-seltzer, and dope fiends. However, in a class by themselves are the fresh-air fiends. Some people think it is a joke to open the windows a dozen times a day. . . . There are only two "HE-MEN" left in the drafting room. R. A. VanHorn, who chews cigar clippings to keep his hair from turning gray, is one. The other fellow is Walt Coolman, an ex-Golden Glove champion. . . . Dwight Meyers laughingly drove over to the curb on Washington St. He wanted to let a wrong-way driver past. After pulling over, he discovered that it was he who was going the wrong way. . . . For what the best dressed man is wearing today, see Dick "Beau Brummel" Hickman. When it comes to good looking clothes, he gives Charlie Thompson some competition. . . . Curley Mannan is off the wagon. He drinks four glasses of water before rising in the morning, three after rising, three or four cups of coffee for breakfast, and a few glasses of water before leaving for work. He says water is a hair grower. We think that he thinks he is a battleship trying to launch himself.

All of us in the Sample Shop say "so long" to John Hunnicutt who is leaving. It's been nice knowing you, John, and come back and see us sometime. . . . We wonder how Jean Fry can think of all those nice pet names that she calls Harry Rollins. That's all right with us, Jean, as sometimes he deserves them. Rollins is also known as "Crooney boy." P.S. He couldn't sing a note last year. . . . We hear that our boss Mr. Hobbs was in the money last Friday as far as he knows in the City Bowling League, here's wishing you luck, Glenn.

Some folks may dislike lipstick, but it usually makes a good impression.

So you don't like the "pint" sized columns. Sorry, folks, but seems like nothin' happens 'round here no more. However, now that Cliff Clauser is working days, we'll expect big things from Taylor St. . . . Monday we bid farewell to Jap Davis. Hope you enjoy many pleasant hours on your farm, Jap, but don't forget your old friends. Drop in and see us once in awhile. Bob Hatfield will be taking over Jap's duties. . . . The ice fishing crew and spectators in Bldg. 20-2 slipped into boots, heavy underwear and what have you Friday night for a chilly trip to Barbee Lake. Yep, some 22 made the trip to see the boys do their stuff only to find no ice. So the gang holed up in the cottage for a very enjoyable evening. That is, for some who did not have a lot of explaining to do when they got home. The gang had a wonderful ham lunch when they arrived. The reason for having ham instead of a roast pig was that "Tez" Trump's sick pig took a turn for the better. Don Brayer had Andy Frank very much confused, and over an innocent little portable radio. Andy came up with a few jokes—the boys are still trying to figure them out. Jim Leeper was in the dog house for tearing down the fortifications the boys had put up to keep out the cold. In general, the gang had a swell time and all thank Wiley Shockney and the guys who helped do the work and also for the swell feed. . . . It is with pride that we again mention Dorcas MacKay in our column. This time as being the first local musician ever to appear in a solo role with the Philharmonic orchestra. Miss MacKay (that's Charlie's daughter) will be guest soloist at the "pop" concert tomorrow night at the Quimby Auditorium. . . . Bill Gregg had the whole floor in a dither one day last week when he actually started cleaning off the top of his desk. The moths flew—a little unfinished business from 1945 made its appearance, some old prints and many other odds and ends were discovered in the heap. Anyway the glare of a shiny topped deck was too much for Bill at the time of this writing you can bet your bottom dollar it's right back in the same condition it was a week ago. . . . Bad luck follows Rollin Eagleson who works in the Power Plant. He upset a bench and mashed his toe and later he stumbled over the family's pet cat and fell down the basement steps. He is living to tell about it. . . . Our best wishes go to Joe Banks for a quick recovery. . . . Dick Kastings is leaving us today. Good luck on your new assignment, Dick.

Reserve Officers Hear Talk By Robert Hanna

Robert C. Hanna, Assistant Manager of the FHP Motor Divisions, Apparatus Department, was the speaker Wednesday night at the regular monthly meeting of the Anthony Wayne Chapter of the Reserve Officers Association.

Teams 3 and 5 of the Apparatus League are tied for first place in the league, each with three wins and no defeats.

C. Redding started slow with a 102 count, but ended the evening with his season's high of 246. Other 200 scores were rolled by O. Anderson, 200 and 204; Willie Bushong, 212, and Hal Spath, 211.

The boys were fighting the pins all evening, evidently they don't like to shoot at new wood. "Sore Thumb" Blomker shot a measley 470 count; but to his dismay, he took over first place in the individual averages. Who did he pass? P. S. Vic Rump. Wonder what will happen this week.

Masonic League

Gavels and Plumbs tied for first with a record of five and one.

Two hundred scores were rolled by Gidley, 225; Meyer, 215; May, 212; Sap Quinn, 207; Martz, 205; E. Bailey, 205; Ed Crabill, 204; Gilchrist, 202, and Schaberg, 202.

We wonder who won all the pot games on the Composite team? You should know better than to gamble by this time, Harold Garrett.

Office League

Those amazing Alternators are still out in front with nine straight victories.

Two hundred scores were rolled by Paul Perry, 224; Vic Rump, 212; Les Shroyer, 212; Wes Goss, 205; Miller, 204; Harry Goheen, 202; Ralph Kaeck, 202; and Johnnie Johnson, 201.

Paul Perry missed that 600 count by just one pin. It seems to be a habit for him. Maury Cox filled in for Shockney Monday evening and came up with a 227 and 201 count.

Small Motor League

Production is leading the pack with a 5-1 record.

Ray Matthews splintered the wood for a 601 total on games of 210, 201, and 190.

Two hundred scores were piled up by Ken Highland, 224; Hubartt, 218; Orval Doherty, 212; Walt Lamboley, 208; "Sore Thumb" Blomker, 204, and Frank Gitter, 200.

Interdivision League

Brouwers Tire and Battery team, commonly known as the Screwballs, are on top with a 6-0 record.

Russ Rose was the only one to crack 600 Wednesday. Russ had games of 169, 220 and 247 for a 636 total. Keghead missed that 600 by one pin.

Two hundred scores were rolled by Noah Kuntz, 214 and 200; Frank Kopp, 209 and 202; Les Shroyer, 217 and 201; Herb Habig, 214; Erv France, 211; Paul Walker, 206; Carl Stout, 205; Don Dimke, 204; Bill Stute, 203, and Wayne Weimer, 202.

Transformer League

E-I is out in front with 16 wins and 8 losses. Two hundred games were rolled by Lord, 203; Hoopingarner and Lenz, 204; Downie, 206; Hazelett, 214; Rowe, 220; Beery, 237, and Feaser, 246.

Ladies Monday Night League

Vivian Fleckenstein rolled 166, 160 and 175 for a 501 series. Other high games were kegled by Edna Koester, 202; Nellie Wendt, 187; Evelyn Mattes, 170; and Emma Vaughn, 176 and 178.

Decatur G-E Bowling

Teeple Truck Line with a total of 3030 captured the team event in the Annual City Tournament being held at the G-E Club alleys. The winning team is composed of McIntosh, H. Murphy, G. Laurent (G-E Employees) and G. Schultz and E. Faulkner. With one more week-end to go, G-E bowlers stand a good chance to finish high in the other events. Bob Lord is presently in second in the singles with .675. Johnnie Berry's 672 is holding third place. Chuck Cook-H. Strickler are in fourth place in doubles while Bob Lord-Babcock are in fifth place. George Laurent holds top spot in the All-events with 1774, followed by Bob Lord in second with 1771.

In the G-E Fraternal League, high games were rolled by J. Murphy, 202; Miller, 207; Faulkner, 205 and 212; Laurent, 216; H. Murphy, 211; M. Brown, 212; Zelt, 203; and Baumgartner, 201.

G-E Monday Night League bowlers rolled the following high games: Cook, 208; Schultz, 237; Gage, 209; Shoaf, 206; Andrews, 213; H. Murphy, 235; and Strickler, 246.

Much interest is being shown by the second shift bowlers in the newly organized Owl League. This league is composed of four teams, with bowling on Friday nights following the end of the second shift work. We haven't heard the results of the first session, but as soon as the boys get the kinks out, you can expect some high class results.

The Murphys continued to dominate first place in the mixed doubles by overpowering the helpless Basharas, 3 to 0. Bakers (Gutter-Ball Jay, that is) again bowled consistently and lost all three to Hiltys. Laurents subdued the Nelsons, 3 to 0 (Peggy is now rolling over 100 and carrying most of the load). Gary and Helen Schultz, newcomers to the league, served notice that they are going to be tough by edging Appelman-Faurote, 2 to 1.

Jay Baker is getting peeved because he never gets his name listed among the high scores, so to appease him and some others we hereby diverge from regular procedure and list the low scores: (Hold your temper, Jay).

Mamie Bashara (90-98-98), Fred Bashara 82, J. Baker 122, Marge Baker 137, Peggy Laurent 97, Jack Nelson 120.

Bowling and Stuff

This week-end will end the team event in the City Tournament. The Ionie team dropped baek one slot further last week. They are now in fourth place.

FLASH! Ed Crabill of the Masonic League shot 277 to take over high single game of the year. W. Goss's 276 was the previous high.

Golden Gloves Tourney Is At Halfway Mark

The second session of the Golden Gloves Tournament last night at North Side high school narrowed the field striving for the eight championships and the right to compete in the Tournament of Champions at the Chicago Stadium on Feb. 21, 22 and 23.

The local tournament is being sponsored by the G-E Club and the Journal-Gazette.

There is certain to be at least six new champions, since only Bob Thomas, lightweight, and Odell Billingsley, light heavyweight, are back. Jim Calland, welterweight champion the last two years, weighed in as a middleweight.

Training will continue next week at the G-E Club on Monday, Tuesday and Wednesday.

Tournament tickets are available at the Main Auto Supply Company for the next two nights, Feb. 3 and 10. The box office will be open Monday night until 8 o'clock.

G-E Rod, Gun Loses Match To City Club

The G-E Rod and Gun Club lost to the Fort Wayne Rifle Club in a match held at the Armory, Monday night, Jan. 24, by 1119-1096.

Fort Wayne Rifle Club

	Prone	Sit.	Stand.	Total
L. Roussel	99	94	91	284
L. Feldes	100	99	85	284
R. Stevens	99	90	89	278
V. O. Miller	98	88	87	273
			Total	1119

G-E Rod, Gun Club

	Prone	Sit.	Stand.	Total
L. Bland	97	97	84	278
R. Wickliff	99	96	83	278
O. Emrick	100	94	79	273
K. Hart	97	92	78	267
			Total	1096

The G-E Club basketball team lost to Inca last Tuesday in a league game by the score of 33-19. The score was 11-11 at the half, then the Club fell apart both on offense and defense.

On Thursday, Jan. 20, the Club was a victim of injuries, other appointments, and out-of-town visits. They played the First Evangelical church team and had to use the manager in order to have five men to start. As the game progressed some of the fellows were able to arrive late and made a fair game, being defeated by the score of 48-55.

On Saturday, Jan. 22, the Club played Indiana Tech J.V.'s at Concordia College and beat the J.V.'s, 58-35. All the boys played good ball in this game and looked as if they may be on the winning trail again.

The next games are: Tuesday, Feb. 1, at Central at 7.:30 p.m. in a league game against A.C.W.A. and Thursday, Feb. 3, at 8 p.m. at the Club against Wayne Pump.

Main Office Captures Volleyball League's Title For First-Half

The Main Office team won the first-half in the Interdivision Volleyball League play, which ended Friday, Jan. 21.

The Apprentice Machinists won from General Tool in games of 15-7, 15-3 and 15-4. In the Small Motor and Winter St. Game, the scores were Small Motor, 15, 1 and 12; Winter St., 7, 15 and 15. The Apprentice Drafsmen lost to the Squares 4-15; 14-16, and 6-15. The Main Office defeated Taylor St., 15-6, 15-5, and 15-5.

Standings

	WON	LOST
Main Office	21	0
Squares	18	3
Winter St.	12	9
Taylor St.	9	12
Appr. Machinists	9	12
Small Motor	8	13
Appr. Draftsmen	6	15
General Tool	1	20

Dick Buckley To Broadcast Games For G-E

Dick Buckley will announce the General Electric-sponsored basketball games over the week-end. Tonight will be another city series game between South Side and North Side, while tomorrow night North Side will meet the Adams team. Both games will be aired over Station WANE.

Mary Hartwig is wondering if Pat Moran and Sally Bryan are testing her willpower or really think she has an honest face, as they have both left their billfolds at her place recently. . . . Birthday congratulations are in order for Phyllis Borkenstein and thanks for the treat. . . . We take this opportunity to welcome Maude Harden back to the Green Room. . . . The finishing section welcomes Bonnie Hefner, Wilma Morgan, Mary Murphy, Ethel Lockett and Lois Weeks. . . . Bill Rectanus was seen trying out the new aisle for the 100-yard dash the other day. . . . Virginia Reed offered her picture for Mike Dunscombe's picture. We wonder which one was the most glamorous. . . . Dean Lockwood planned an ice fishing trip last Saturday and then was informed he had to attend a meeting. The trip was cancelled, but the boys didn't let him forget about his trip. They asked him all during the meeting how the fish were biting. . . . Congratulations to Mr. and Mrs. James Baker on the birth of a son. . . . Anyone wishing to learn the rumba can take lessons from Pat Moran. . . . Tom Hildebrand is back from his vacation. While in Florida, the Trumans invited him to the inauguration. . . . Jackie Boxberger won't bite anyone anymore. She had four teeth pulled this week. . . . Wonder where Lois Debolt got the burr she was wearing on the back of her coat. . . . We haven't heard any complaints from Millie (as well as can be expected) Kouder lately. . . . It seems like Helen Eger gets all her exercise opening the windows and shutting off the heat.

Four Here Receive Coffin Awards

FORT WAYNE WORKS
GE NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, FEBRUARY 4, 1949 | No. 5

Schild, Hodges, Skinner, Marsh Are Honored Today

C. A. Schild

Charles A. Schild, Foreman in the Engineering Development Section of the FHP Motor Divisions, received the Coffin Award today from M. E. Lord, Manager of the FHP Motor Divisions.

Mr. Schild won the award for his multitude of outstanding accomplishments extending over a great many years in the operation of the Developmental Shop in the FHP Motor Divisions. His citation read:

"For his consistent interest, enterprise and cooperative effort in the design and manufacture of fractional horsepower motor

(Continued on page 3)

R. D. Hodges

W. G. Skinner

Ralph Dudley Hodges and Willard Guy Skinner were presented Coffin Awards today by C. H. Matson, Works Manager.

Mr. Hodges is an engineer in the Chemical Section of the Works Lab, Bldg. 28. Mr. Skinner is an engineer in the Wire and Insulation Division at Taylor St.

These awards were presented because of the outstanding development work carried on by Mr. Hodges and Mr. Skinner which has resulted in a means of recovering 95% of the cresylic acid and 27% of the naphtha from wire coating machines where it has been used. The annual reduction in cost, resulting from the use of this process, is currently $300,000. Of great but intangible value is the elimination of cresylic acid in the atmosphere from the vicinity of G-E wire plants.

The citation for both awards is as follows:

"In recognition of outstanding application of technical knowledge to design and development work, which made possible substantial economies and improved method in the manufacture of Formex coated wire."

M. O. Marsh

Myrle O. Marsh, Division Engineer in the Specialty Transformer Engineering Division, was presented the Coffin Award today by W. C. Wiehman, Manager of the Specialty Transformer and Ballast Divisions.

This award was made because of the outstanding improvement in the Company's commercial position and resulting increase in G-E prestige in the field of specialty transformers, brought about through the unusual design ability of Mr. Marsh. By the exercise of ingenuity, resourcefulness, and perse-

55 G-E Men Cited For Outstanding Accomplishments

Company's Highest Honor Bestowed In Ceremonies At Plants Across Nation

General Electric's highest and most coveted recognition of employees, the Charles A. Coffin Award, was achieved in 1948 by 55 employees for accomplishments far beyond the "normal expectations" of their duties. Four from Fort Wayne were recipients: C. A. Schild, R. D. Hodges, W. G. Skinner, and M. O. Marsh.

Identities of the award recipients were revealed today by President Charles E. Wilson as ceremonies honoring the employees at 15 locations across the continent, gave tribute to those whose "signal contributions" won for them the special honors.

More employees attained the treasured recognition than in any year since the awards were established in 1923.

Presented at 11 A.M.

In shops, laboratories, and offices at 11 o'clock this morning from Coast to Coast, families, friends, fellow workers, and supervisors applauded as the award winners stepped forward to receive from Company officials the citations signed by Mr. Wilson.

Each award winner was presented with a certificate bearing the description of the accomplishment that warranted the award. With the official citation there is paid an honorarium and, representative of the citation is a gold lapel button.

Nearly $20,000 in honorariums was distributed to the award winners, raising the total to almost $225,000 paid to 834 persons granted Coffin Awards in the 26 years they have been established in honor of General Electric's first president.

U. S. Industry Faces Biggest Task; C. E. Wilson States In Washington

A vigorous defense of the free enterprise system and of reasonable and equitable profits which he termed the "life and vitality" of America was made by Charles E. Wilson, president of the General Electric Company, when he appeared recently in Washington before the Joint Committee on the President's Economic Report.

"Next to manpower and the spirit of the people, the greatest asset of any country is the strength and productive power of its industry and agriculture," he told the committee. "Profit, whether plowed back or paid out in dividends and reinvested, is the food on which American industry has grown to an unchallenged position of leadership and usefulness in the world's economy.

Partizan Chapter To Attend Station WOWO Broadcast

The Partizan Chapter of Elex will hold its monthly meeting at 1 p.m., Tuesday, Feb. 15, at the Leisure Electric Home, 122 W. Wayne St. Those wishing to take part in the Jane Weston program over Station WOWO must arrive by 12:30 p.m.

Squares Club Plans Three Social Events

A bridge tournament, valentine dance, and barbershop quartet contest have been scheduled by the G-E Squares Club for the coming two weeks.

Tonight the Squares' bridge tournament winds up. Those who participated in the first half of the event will return for the finals tonight at the Squares hall.

A St. Valentine's Day dance, featuring the orchestra of Hod Kreigh, will be held Friday, Feb. 11, from 9:30 to 12:30 p.m. in the Squares hall. Members and guests are invited. An added feature of the program will be a Chinese auction. R. C. Hanna and R. B. Hors-

Booklet On Safety Issued Next Week

C. A. Biedenweg Is Guest Speaker At Safety Committee Meeting Wednesday

A safety booklet titled, "The People, Why and How of Our Fort Wayne Works Safety Organization," was reviewed Wednesday at the February meeting of the General Safety Committee.

The booklet will be given to all foremen, supervisors and safety committeemen next week. It contains the names of 683 employees who will serve on the 35 divisional and special safety committees at the Fort Wayne Works. The booklet also features general information and statistics concerning the local safety record and plans for 1949.

Clarence A. Biedenweg, director of physical education, health and

G-E Police Chief Recommends Safer Driving At Parking Lot

G-E Chief of Police, A. R. Vegalues, recommended today that employees drive safer while parking their cars in the West lot at the Taylor St. plant. He has received numerous complaints from employees concerning those who have been driving recklessly while entering and leaving the lot.

Coffin Awards Are Presented For Creative Accomplishments

Today—amid the swarm of a busy 200,000 workers in G-E shops and laboratories and offices across the nation—55 individuals stand out prominently—55 who have distinguished themselves by earning the highest honor the Company can confer—the Coffin Awards.

Accomplishment—creative accomplishment, achieved by the well-known formula of hard thinking, hard work, determination and perseverance—gained for these men deserved recognition for deeds far beyond anything that could be expected of them by their company.

Conferring of the Coffin Awards upon employees for "signal contributions to the progress of the Company" is in keeping with a highly cherished quality of American life—recognition of individual merit and achievement—that ability and accomplishment in America can and does attain rightful acknowledgment.

It is this spirit of American life that pervades General Electric and with that spirit America and General Electric have grown. The Company attained leadership in the electrical industry by reason of the exceptional capabilities of its several leaders and first among them is G-E's founder and first president, in whose honor the Awards conferred today were established a quarter century ago—Charles A. Coffin.

Behind the vanguard of its leaders a great many men have contributed something to the Company's development. For those who make greater contributions there are reserved by the Company greater rewards, and at the top of the stack of greater rewards stand the Coffin Awards.

It is reassuring that accomplishment is forever present and at this moment in G-E shops, laboratories and offices—in the American and General Electric tradition—other employees are on the way to accomplishments that will merit the applause of their fellow workers just as those honored today are applauded.

Profits Are Only Source For Industrial Development

The question of industrial profits is again in the headlines, due in large part to the varied testimony given to congressional committees which are looking into this matter. President C. E. Wilson's appearance recently in Washington before the Joint Committee on the President's Economic Report was a highlight of one of these sessions.

Those who consider only the total figures can very easily reason that industrial profits are excessive and unreasonable. On the other hand, it is an obvious fact, recently stressed here by Dr. Neil Carothers, one of the nation's noted economists, that the dollar buys only a fraction of what it bought in prewar days, and that the cost of building and improving industrial facilities adequate for our needs makes large earning necessary in the public interest.

It is true that General Electric's net income in dollars is about twice what it was in 1940, because today's volume of business is much bigger than it was pre-war. But profits after taxes are currently running at only seven cents in each sales dollar, as compared to 12.4 cents in 1940. To obtain even this return, G-E sales volume has had to increase to three and a quarter times that of 1940, and the total permanent capital investment in the business has been more than doubled.

In short, those big profits we read about aren't all "velvet" by any means. They represent the only source of money for industrial development which provides more and better jobs, which helps maintain the living standards of the people, and which guarantees that the United States shall hold her place as the strongest economic power in the world.

What is true of our company is generally true throughout the industrial structure. The old idea that high industrial profits are the fruit of exploitation of the country, was never more wrong than at present. The larger part of them, to the contrary, are used to make the country stronger, and to benefit everyone in it.

In Your Hands

HUGH CRANE discusses Changes In Our Economic System

NEW YORK—By all the old-fashioned signs and portents, this country ought to be headed right now for an old-fashioned, heart-rending depression. Like 1932, or 1921, or 1907—or, for that matter, like 1890, 1884, or 1873.

Business Still Booming

But it isn't. It isn't working out as it used to. Industry is still spending billions on expansion. There are still 60,000,000 people working. The steel industry expects to run at capacity all year. I went to the automobile show this week and Detroit expects to make (and sell) 6,000,000 cars this year for a new high record (in fact the automobile people expect that the less steel other people use the more cars they will build).

If you ask most people they will say that our economic system today is fundamentally the same as it was a generation ago. "It's a capitalist system now," they will figure, and it was a capitalist system then. So it must be still the same system, with perhaps a few frills and some larger government controls." They feel that if you don't have a revolution you don't have a fundamental change.

Something New Added

But the proof of the pudding is in the eating. Our system doesn't work the way it used to. It works better. Something has been added.

The economists didn't add it. In fact they can't seem to understand it. Wall street economists think the system is just suffering a temporary derangement and will ultimately pay the price. Radical economists think it's still much the same bad old system. Russian economists wait for it to have an old-fashioned smash as it used to every 10 or 20 years.

Here are three fundamental changes.

One. In the old days the first rule about the national budget was that it must be balanced. Today that rule has been scratched out, and the first rule is that it must be used in such a way that the nation's manpower be used to capacity, that there be no depression, and that so long as the nation has the capacity for it, the standard of living shall keep on rising and no one shall want.

Step by Step Progress

It took a lot of steps for us to get to this point. In the 1921 depression the budget was kept balanced and Congress took no responsibility for unemployment. President Hoover urged such responsibility. President Roosevelt carried on the idea. The war required it. The Full Employment Act of 1946 expressed it. The "cold war" continued it. And the majority of voters have ratified it, again and again.

Two. In the old days it was considered good business and good morals to put your prices as high as you could, or to "charge what the traffic would bear"—and to pay as little as you could. Today that principle has slowly changed, particularly in large industry, to the principle of "fair prices." You can see the difference in the gray markets. The steel industry sells steel for about $80 a ton; for a while last year the same steel was selling in the gray market for $250-$300. Or you can see it in the recent premiums for "new-used" cars over list price.

And it took a lot of steps for the country to get to this point also. Railroad and utility rates have been regulated for forty years. Industrial prices were first held down during World War One. After that war, however they were marked up to "the market"—and fell accordingly. But raw material and manufactured prices began to get political attention during the 1930's. Then World War Two put them under a lid again. And since the war, big industries have come to act on prices almost like regulated utility companies.

Three. There is no credit shortage. Despite the postwar boom, interest rates have stayed down at levels that used to prevail only during hard times. The banks no longer have to call in loans because they're short of cash.

These are fundamental changes. Remember the old saying, "Comes the Revolution?" Well, to a large extent the "revolution" has already arrived. More on this next week. There are causes behind these causes for the new "dynamic stability" of modern capitalism.

The Grim Reaper has struck again, taking from our midst one who, by his kind deeds and friendly words, has endeared himself to all who knew him. It has been my good fortune to have known him many years, both in the shop and out. Having spent some years as fellow officers of the Moose Lodge 200 and as fellow chairman in the M.B.A. Al, as he was known to his friends, was four square. When he thought he was right, he felt it a loyal duty to stand by those convictions, a trait that made him stand out among his fellow workers and friends. Along these lines he was never vindictive, but rather forgiving. He was always ready with a helping hand when help was needed. So with these few words, in my humble way, I wish to pay our respect to our friend, Alois Schonheinz, who died suddenly last Friday morning after seemingly well on his way to recovery from an operation. . . . We have a newcomer in the group—Howard Shay, our helper. . . . Now that Ground-Hog Day is past we can sit back and see how the weather prophets made out on their predictions. . . . Richard Nix is on a search for a croquet file. Anyone who can help Dick in this search please do so. . . . George Lambroff became so hungry last week he started chewing his tongue. After several bites he decided the hunger pangs were not so bad after all. . . . The winter fishermen are again getting their tackles out as the ice on the lakes again thickens, but at this writing no good catches are reported.

Four Here

(Continued from page 1)

The awards mark "signal contributions by employees of the General Electric Company toward the increase of its efficiency or progress in the electrical art." All employees have an equal opportunity to achieve the award; a workman in the shops or a clerical employee receives the same consideration as an engineer doing important design or application engineering. The achievements of workmen are compared with those of other workmen; engineers with those of other engineers.

Four Previous Recipients

Four of this year's recipients have the distinction of having won the award in previous years for other outstanding deeds. One of the four, Alfred Duglin of the punching, tool and die punch press section, Apparatus Department, Schenectady, has achieved Coffin Awards for each of three accomplishments, in 1938 and 1941 and again last year. Duglin is 49 years old and a G-E veteran of 34 years' service.

Another of the four was cited twice before, in 1942 and again three years later. He is Richard Lamborn, section engineer of the electrical design and development propositions sections, Erie Works. He is 45 years old and has 26 years' service.

Another award winner this year, previously cited in 1940, is Ira W. Lichtenfels, proposition and requisition engineer, urban transit equipment at Erie.

The fourth of the group of previous Coffin Award recipients is Harold E. Trekell, assistant designing engineer of the meter engineering division at West Lynn, who won his previous award in 1936. Trekell collaborated with a group of five men in the development of the basic design of a new single phase watthour meter. All are receiving Coffin Awards.

Schild Retires Today

Youngest of today's winners is 29-year-old John M. West, who has been two years with the Nucleonics Department at the Hanford Works, Richland, Wash. Eldest winner is 64-year-old Charles A. Schild, 38 years' service, foreman of the engineering development section, fractional horsepower motor division, here at Fort Wayne. He is leaving today to retire on the Company's Pension Plan.

Among the rarer accomplishments meriting a Coffin Award is that of Harry A. Kramer, power plant operations analyst for the Nucleonics Department at Hanford. His accomplishment was the organization of a system of meteorological stations to receive information on the probable crest of the flood of the Columbia River, which prevented loss of life and property.

Brothers Get Joint Awards

Two brothers, Clifford and George Benander, were the recipients of joint awards at Monowatt, Inc., Providence, a G-E affiliated company.

The names and locations of the 55 Coffin Award recipients for the year follow:

Aitchison, T. C., Apparatus Dept., Pittsfield.

Almassy, G. W., Apparatus Dept., Los Angeles Office.

Bakke, H. A., Apparatus Dept., West Lynn.

Benander, C. N., Monowatt, Inc.

Benander, G. B., Monowatt, Inc.

Betz, J. F., Apparatus Service Shop, Chicago.

Bonesteel, L., Apparatus Dept., Fitchburg.

Brightman, J. B., A & M Dept., Erie.

Bullis, J. M., A & M Dept., Erie.

Clapp, Dr. C. W., General Engineering & Consulting Lab., Schenectady.

Crowley, G. C., A & M Dept., Bridgeport.

Dalton, E. C., Apparatus Dept., Erie.

DeMichael, D. J., General Engineering & Consulting Lab., Schenectady.

Duglin, A., Apparatus Dept., Schenectady.

Fischer, L. J., Apparatus Dept., Lynn River.

Flynn, E. J., Works Lab., Schenectady.

Foster, R. F., Electronics Dept., Syracuse.

Gabrielson, S., Apparatus Dept., West Lynn.

Goodrich, S. W., Apparatus Dept., Pittsfield.

Gray, W. F. M., Apparatus Dept., Pittsfield.

Hansen, A., Jr., Apparatus Dept., West Lynn.

Harris, R. T., Apparatus Dept., Erie.

Hobday, H. W., Apparatus Dept., Schenectady.

Hodges, R. D., Apparatus Dept., Fort Wayne.

Hoyt, G. A., General Engineering & Consulting Lab., Schenectady.

Jacobs, S., Apparatus Dept., Fitchburg.

Kizaur, A. J., G-E X-Ray Corp.

Kramer, H. A., Nucleonics Dept., Hanford Works, Richland, Wash.

Kreitl, C., Apparatus Dept., Schenectady.

Lamborn, R., Apparatus Dept., Erie.

Lehman, E. H., Electronics Dept., Schenectady.

Lichtenfels, I. W., Apparatus Dept., Erie.

Marks, C. E., Jr., Apparatus Dept., Pittsfield.

Marsh, M. O., Apparatus Dept., Fort Wayne.

Meckley, W. O., Apparatus Dept., Lynn River Works.

Mendelsohn, L. I., Apparatus Dept., West Lynn.

Miner, E. F., Jr., Apparatus Dept., Pittsfield.

Nonken, G. C., Apparatus Dept., Pittsfield.

Pfuntner, R. A., Apparatus Dept., West Lynn.

Pohl, R. V., General Engineering & Consulting Lab., Schenectady.

Robertson, A. D., A & M Dept., Bridgeport.

Schild, C. A., Apparatus Dept., Fort Wayne.

Seeley, H. T., Apparatus Dept., Philadelphia.

Skinner, W. G., Apparatus Dept., Fort Wayne.

Solberg, W. O., Apparatus Dept., Pittsfield.

Stanley, M. F., Apparatus Dept., Pittsfield.

Tinsman, H. E., A & M Dept., Erie.

Travis, E. H., General Engineering & Consulting Lab., Schenectady.

Trekell, H. E., Apparatus Dept., West Lynn.

VanBennekom, C. F., Apparatus Dept., West Lynn.

Vogt, P. O., Apparatus Dept., Schenectady.

West, J. W., Nucleonics Dept., Hanford Works, Richland, Wash.

White, L. D., Apparatus Dept., Schenectady.

Wright, J. H., Apparatus Dept., West Lynn.

Young, G. W., Works Laboratory, Schenectady.

Credit Union Elects Officers

The G-E Credit Union election of officers was held Monday night in the G-E Club lounge. The new officers and members of the office staff are shown above.

In the front row, left to right, are: Lee Cupp, treasurer; Carl Nix, vice president; Glenn Stapelton, president; Vern Gratts, director; Elmer Abbott, director, and Willard Smith, director.

In the back row, left to right, are: Edward Kronmiller, director; Lewis Barrow, secretary of the supervisory committee; Naoma Hippensteel, assistant treasurer; Charles Spice, chairman of the supervisory committee; Dorothy Dreyer, office clerk; Roy Berdelman, chairman of the credit committee; Florence Bennett, office clerk; Clifford Baker, credit committee; Agnes Hohman, Winter St. representative and Loyal Decker, director.

Absent when this picture was taken: David Slater, director; George Fields, Loretta Bloom and Evelyn Blakley, credit committee; Elmer Harshman, supervisory committee, and Ora Ferrey, office clerk.

(Editor's note: The following is a copy of the telegram which was read during the presentation ceremonies)

Will you convey my congratulations to the Coffin Award recipients you are honoring today.

Because the Coffin Award is not easily achieved, it is an honor of significant importance. Excellent performance on the job alone does not merit the Award, commendable as that performance may be. There are thousands upon thousands of General Electric employees who would qualify on that basis.

Only signal contributions to the work of the Company, which surpass in great measure the accomplishments expected of the employee, are recognized by the conferring of a Coffin Award.

May the initiative, enterprise, and perseverance which has won for them this high honor carry them forward to other and even greater accomplishments.

President

Honored Today

(Continued from page 1)

C. A. Schild

samples."

Mr. Schild works in Bldg. 17-4 and has served the Company for 38 years. He started as a toolmaker at G-E on April 19, 1910. Named an assistant foreman in the FHP Developmental Shop on Jan. 31, 1921, Mr. Schild became a foreman there on Jan. 6, 1927.

Photography and fishing are Mr. Schild's major hobbies. He resides at 1207 Elmwood Ave.

Mr. Schild has three daughters and three grandchildren.

R. D. Hodges

Mr. Hodges graduated from the Virginia Polytechnical Institute in 1927. He was employed by the U. S. Gypsum Co. before he came here on Dec. 31, 1929. He started as a chemist in the Works Lab, Bldg. 28.

Mr. Hodges left the Company to enter the Army Air Forces on Dec. 6, 1940. He was a lieutenant colonel and saw overseas duty in Hawaii.

When he returned to G-E on March 25, 1946, Mr. Hodges was given the responsibility of setting up chemical sections at all the branch plant laboratories.

Mr. Hodges is married and has one child. He resides at 4827 Montrose Ave.

W. G. Skinner

Willard G. Skinner attended Ball State Teachers College in 1936. He received his Bachelor of Science degree in Chemical Engineering from Indiana Technical College in 1938.

Mr. Skinner started as a chemical engineer in the Works Laboratory nearly seven years ago. He was transferred to the Wire and Insulation Division on Feb. 5, 1944. On June 10, 1947, he was transferred to the Taylor St. plant.

Mr. and Mrs. Skinner have two children and reside at 829 McKinnie Ave.

M. O. Marsh

verance, often under extreme competitive pressure, he has brought out units possessing superior electrical characteristics, pleasing appearance, and at costs which have allowed the General Electric Company to obtain business heretofore not obtainable.

The citation states:

"In recognition of the resourcefulness and perseverance reflected in the design of specialty transformers, which have enhanced our commercial and design leadership in this field."

Mr. Marsh graduated from Purdue University in 1928 with the degree of Bachelor of Science in Electrical Engineering. Shortly thereafter he entered test at the Fort Wayne Works.

He was transferred to the Specialty Transformer Engineering Division in November, 1928, and was assigned to the design of large air-cooled transformers. In 1938 he was appointed Section Engineer of the High Voltage Section, which position he held until September, 1947, when he was made Section Engineer in the Radio and High Voltage Section in the Specialty Transformer Engineering Division.

He is married and resides at 1407 Taylor St. He has two sons.

Safety Booklet

(Continued from page 1)

safety for the Fort Wayne public schools, was guest speaker at the meeting. He is a 1926 graduate of the Apprentice School here.

Mr. Biedenweg outlined the safety program for schools as it dealt with student and teacher participation, accident investigation and reporting, safety education, and training of specific subjects.

Short talks on current accident experiences were given during the meeting by Kenneth Zurbach, Warren Sheets, W. K. Holloway, and D. E. Waldrop.

Ed Cade and Veda Orff, nurse, presented talks on modern methods of first aid.

U. S. Industry

(Continued from page 1)

"With the population increasing faster than at any previous time in its history, and with that population demanding both a higher standard of living, and greater security, we think American industry has its biggest job ahead. We know General Electric has. Profits sufficient not only to keep its facilities up to date in an expanding economy, but also to underwrite that security and to help to provide that standard of living, must be our goal in the public interest as well as our own.

"Industry does not ask that these profits be guaranteed. It will earn them, if given a fair chance. And the free play of competition, plus the long-range interests of the producer, as he seeks the consumer market, will assure that the profits which are earned are not excessive and are equitably divided among the appropriate groups."

Other quotes by Mr. Wilson included:

"The sharing of the benefits of progress—the benefits of increased efficiency, labor-saving machinery, scientific discoveries, and increased production—is fundamental to any approach to the problem of the adequacy of prices and profits. For those benefits are claimed—and rightly—by several groups; the customers, in lower prices; the workers, in shorter hours and higher wages, the owners, who have invested the risk-capital, in increased income. None of these groups can be denied."

* * *

"It is in the interest of our company and of every company, to seek to pass on to the customer as many as possible of the savings resulting from increased efficiency and output, from the economies of mass production and standardization, in order thus to increase the demand, enlarge the sales, create new jobs, and again reduce the costs of production. Certainly it is this passing on of benefits to consumers in lower prices which must be the only healthy answer to the problem of halting inflation without involving considerable unemployment."

* * *

"The objective of passing on to the consumer his proper share of the benefits of progress through price reductions has—particularly since the war—been greatly impeded by the erroneous belief of some that all such gains belong to employees to the exclusion of consumer and owner alike. It should be apparent that to give to labor all the gains of technological improvement would eliminate the incentive for future risk-taking on the part of capital; it would deprive the consumer of lower prices and increasing purchasing power—with the inevitable result of ultimately discouraging further technological improvements and prolonging the inflationary cycle."

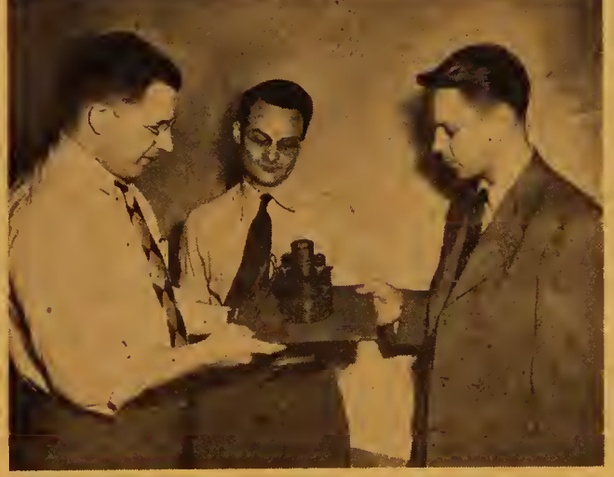
* * *

"Constant raises in wages and salaries, to the extent they are not balanced by a comparable increase in output per manhour, can only result in higher prices. It follows that unless prices are to keep on climbing, higher wages can be paid only out of the increased productivity of labor. And to achieve that there must be greater capital investment per worker. So it is that in the long run labor can gain only as American industry itself continues to prosper and expand."

* * *

"It is, of course, fundamental to the whole subject of profits that the investment of so-called risk-capital must be accompanied by at least a reasonable expectation of a return. The common stockholder is in reality the key man in the corporate undertaking. Industry operates on capital supplied by risk-taking investors—including the employee, the butcher, the baker, the teacher, and the cop on the corner. Of the 250,000 shareholders in our own company, no one holder owns as much as 2% of our stock. It has been estimated that there are 12 million corporate stockholders in America today. It is this typical American, it must be remembered, who is the owner of the business. Any consideration of the problem of profit must recognize the fact that unless investment by the stockholder is encouraged, the interests of the entire national economy will suffer."

* * *



"It is our serious conviction that the present margins (of profit) are lower than they should be to provide the necessary cushion to protect us against any sudden drop in the market and to assure us of the opportunity to continue with our endeavor to show progress in the field of industrial achievement."

Brinker Given Gift At Retirement

When Ed Brinker, FHP Motor Div. 1, left to retire, after 35 years service, his friends in the division gathered to give him a farewell gift. In the above picture, which was taken at the presentation, are left to right, Florian Korte, Mr. Brinker, O. J. Mettler, Div. 1 Supt., and Ed Robin.

Draftsman Builds Model Generator In Spare Time

Norman Jueschke, Bldg. 31-2, is showing the model generator, above, to Richard Hanson and Lester Schowe, the draftsman and engineer who designed the generator.

Norman Jueschke, draftsman in the Motor and Generator Division, built a model alternating current generator during his spare time at home. The vertical generator, measures approximately six inches high and four inches in diameter. It was made according to scale, 1/16 the size of the big ones built in the factory. Norman spent at least 30 hours on the model, which is an exact duplicate even down to the G-E monogram. The blue-gray generator is mounted on a red piece of textolite board. The biggest part of the model is made of wood, but the stairway up to the exciter is of metal. It has pipes for the cooling system, conduit box, bearing thermometer, oil sight gage, and all the other parts.

Did you see the "Light Sorcery" show? The loss is yours if you did not. Did you, as G-E employees, ever stop to realize just how many very nice things the Company does for your entertainment and education, in addition to your pay check? . . . The much dreaded "zero" has hit us and we have lived through it. I am sure the writers who insist that snow is beautiful do not leave their warm quarters until spring. By the way, did you check your anti-freeze in time? . . . Marion Champion, the messenger girl in Bldg. 18-4, surely must find a spot pretty soon. First she is here, then there, but always punctual with her work. Her home is in Angola, where she visited over the week-end. We are glad she did not get lost in a snow drift. . . . Carol Waterman, a former Bldg. 18-5 employee, who was home from college over the week-end, visited us and displayed a very pretty new engagement ring. . . . The data Bureau is now located in Bldg. 18-4. . . . Anyone wanting to visit the Credit Union, please contact Ginny Bradtmiller, Bldg. 18-5. She will be sure to get you into the wrong house. . . . J. Leininger is back in Bldg. 18-4 with C. R. McLaughlin. Incidently, both Mr. and Mrs. Leininger are employed in Bldg. 18. . . . Mary Slater, Bldg. 18-4, is recovering from a mild eye infection. . . . Mary Alice Herber, Bldg. 18-4, is a lover of good books. Ask her the latest book, movie or review and she has the information. Welcome to Pat Beebe, who transferred to Bldg. 18-5 from Winter Street. . . . Annabell Redding, Bldg. 18-4, attended the performance of Allan Jones Sunday evening. Her only regret was that he didn't sing "Begin the Beguine," her favorite song. . . . Barbara Meyer enjoyed the CYO sleigh and skating party, Tuesday evening. . . . Jeanne Grant, Bldg. 18-4, has been rather sleepy these days. Everyone said she should have more sleep. Her alibi is that she and her husband have been attending church. . . . Dorothy Ehernman has been transferred from Bldg. 18-5 to Bldg. 18-4 Data Bureau.

Paging Mr. White

Bldg. 18-4 has three Mr. Whites. Doyal, Ray and Fred, but they don't have any Jones, Browns or Smiths. Incidentally, when writing to a Mr. White better give an initial. . . . Curled up in the photograph section, Bldg. 18-5, beside Bob Hawkins' boots was a little mouse—quite dead. Comment: Ever hear of a mouse dying with his boots on—well, he tried! . . . Who said there were green leaves on the rose bushes? After this week there won't be any!

Squares Club

(Continued from page 1)

man are co-chairmen of the arrangements. Tickets are $1.50 per couple.

The Squares' annual Barbershop Quartet contest will be held Wednesday night, Feb. 16, when groups will again vie for the Howard Miller trophy.

Sleuthing IN BLDG. 4-6

By Joan Poos

Aching muscles seem to be a disease these days. Ray Jones took a beautiful tumble down his front terrace the other morning when "pulling a Dagwood" to join his rider colleagues. Having started down the steps, he turned to wave to his son, David. Oh, what a mistake! It seems that he ended in a heap at the bottom of the wet bank, necessitating a change of clothes and a lonely ride to work in his own car. Can't you just see the gleeful look on Babe Dave's face. He didn't know that Daddy was such a clown! . . . "If at first you don't succeed try, try again," seemed to be the motto of a group of our test engineers plus Messrs. Clarkson, Johnson and Sims, who were trying "En Masse" to locate Frank Olney's septic tank, Sunday, by the "Hunt and Dig" method. Success resulted at last, after five attempts. Small volcano craters in the Olney front yard tell the tale, but they were rewarded for their efforts with apple pie among other morsels of delight to soothe their "achin' backs" and shrunken tummies. . . . Fred Suhr seemed to 'ave 'ad a bad day, Monday, as he caught his umpteenth cold of the winter and while eagerly cleaning his pipe, dropped it making a neat cut and severing it into two pieces —bowl and stem. A thoughtful bystander suggested that some of C. J. Herman's nylon sleeving would make a unique stem, but for some unknown reason it doesn't seem to be useful for anything except artificial spaghetti these days. . . . Gilbert Baker tried an experiment last week. First, he sat down in a lonely puddle of ink, and then shortly afterward in a large puddle of water. How about it, Gilbert, was it washable ink, or not? . . . A hearty welcome for Walter R. Seigmiller, new test engineer in the A.C. Division. . . . C. B. Smith, Production, is sporting a new secretary these lays. Name, Helen Meador. Other info—she's from Kokomo. . . . Several people seem to be "cookin'" these days. For instance, there is Wilma Kirby, who had to go home to practice her talents and also Jack Graff who, we hear, is a "Sharpie" on the pancake detail. . . . We are all familiar with "The Sweetest Music This Side of Heaven," but when the subject is pipes, that's different. However, if any of you pipe smokers are bothered with a soggy heel or get up with a dark brown taste in your mouth, it will be worth your time to see Norm Oetting. Norm claims that he has the perfect remedy for sweetening pipes, just boil them in water over night, and if it's a severe case, add a pinch of Duz. Duz does everything. . . . Anyone wishing to hire an experienced painter should contact Ella Cox, Tabulating Section. All work guaranteed to give satisfaction. Or, if you wish to buy or sell any antiques, contact Reba Coppock or Dorothy Bolins. A big deal was made last week. . . . There isn't quite the same thrill to be had from being reinstated in a very popular club as the original initiation, but the Floor Sitters Club welcomes back John Chijko. John's only comment was that he missed the chair and about that time gravity set in. . . . And the only comment your blabbermouthed correspondent has at this time is—"Nuf Said."

Lloyd Keller Retires On Pension

Lloyd Keller, who retired Feb. 1, received a going away present from his friends and co-workers in Bldg. 19-1. Shown in the picture, left to right, are Tom Hayes, George Fields, Lester Patton, Chalmer Steele, Frank Rathert, H. L. Stevenson, Joe Taylor (in background), William Hanke, Mr. Keller, Russell Genth, Ed Lebrecht, Louis Koop, Joseph Dahman and Glenn Billman.

Behind The Cracker Barrel In General Stores

By Marie Kettering

Seven come eleven! The other day the great Fraternity of Bone Rollers suffered a terrific shock which fairly froze them in their tracks. The place—a downtown hotel. The time—two hours flat. The winner and new champion—none other than the great "Count" Albert Von Behrens. . . . Noland Meyers must really have had a bad time one Saturday night. Things are really rough when the next morning you see the holes where night-crawlers had been instead of seeing pink elephants. . . . For a few moments of enjoyable reading, see the Grinding Room Bulletin Board. A series of "Out Our Way" cartoons, clipped from past issues of the WORKS NEWS, have been posted which ably (?) portrays various members of our crew. For example, there's "Bull of the Pen" Karl Soest, "Dignity of the Office" Lloyd Platt, and many others. For more enjoyment, drop over and see Harry Golden's drawings. Where—in the Grinding Room, of course. Note—the best ones are inside the cabinet door. . . . Birthday Greetings to Byron Simmons and Traverse Chandler. . . . Rosie Smead says goodbye today to her many friends in this section. These friends wish her the best of luck and hope she will take time to drop around and see us now and again. . . . Your reporter reminds you that if we are going to keep this column up she must have some news. It's all done in the spirit of friendship, you know.

Elex Club To Hear Men's Concert Choir

The Men's Concert Choir from Indiana University School of Music, under the baton of George Krueger, will present programs for the Elex Club's regular monthly meetings, Monday, Feb. 7. The first concert will be held for the night girls at the Y.W.C.A., with the luncheon beginning at 12 noon. The day girls will hear the choir at the G-E Club gym following the dinner hour. Serving hours will be from 4:45 until 6 p.m.

Foremen's Association Re-elects Lindeman

The Foremen's Association re-elected Everett Lindeman, Bldg. 4-3, its president at a meeting Wednesday evening in Kreis Stoltzenau hall.

Others elected were Joe Wyss, Taylor St., vice president; Leon Bond, Bldg. 26-3, secretary; Fred Pyle, Bldg. 4-1, treasurer; Ewald Steinsmuehlen, Taylor St., director, and Edward Hesher, director from the Decatur plant.

Dr. Ralph D. Lee, of General Motors Corp., was the main speaker of the evening.

Two Receive Patents

M. W. Sims

M. Wilson Sims, Designing Engineer of the Specialty Transformer and Ballast Engineering Divison, has been granted a patent covering a Selsyn control system for radar antenna. It was granted jointly to Mr. Patterson of Schenectady. This is the third patent granted to Mr. Sims.

E. J. Zelt

A patent relating to a mechanical arrangement for holding a terminal board to the end of a fluorescent lamp ballast case has been granted to E. J. Zelt, Design Engineer in the Specialty Transformer and Ballast Engineering Divisions. This is Mr. Zelt's thirteenth patent.

The Big WIND

DIVISION 17 TAYLOR STREET

by Dorothy Heinzelmann

We are sorry, dear readers, that our column is so short, but we only have one reporter bringing in news lately, and seems that yours truly just can't find the time to go out and round up any. That is the reason for the briefness, so if any of you have any news, just drop it off and we will try to put it in your column. . . . Tommy Williams is getting very disgusted lately as her Tuesday night bowling scores are the ones that count in the bowling pool in her section. These scores just aren't too good lately, but on Friday night when the scores don't count, you should see how she bowls them over. Seems like you are a little mixed up on your night there, Tommy, and here's hoping your luck changes pretty soon for you. . . . We welcome Lulu Vore, and hope she will like it here. . . . Sure wish that Rose Liby would learn how to walk out of work at night without falling down, and especially falling in a puddle. Did you have any trouble explaining the scratches when you got home, Rose? . . . Congratulations to Mr. and Mrs. Wilbur (Bud) Gerardot on the arrival of a 9 lb. baby girl last Thursday. . . . It seems that Jerry McKown was about the only one willing to risk going out in the cold weather last week-end, as he is our only reported out-of-towner. Jerry went to visit his father-in-law in Antwerp. . . . How about some news from our second shift people, Mildred? I know that some you turned in the last couple times didn't make the column, but it was due to yours truly being absent from work, and the gal who pinch hits for me didn't know where it was. We miss your news as it was interesting and we do like to tell on our second trick now and then.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

They have been doing quite a bit of changing in Bldg. 26. Dick Rump, formerly of Bldg. 26-3, is welcomed to Production Div. of Bldg. 26-2. We are also happy to welcome Betty Carter and Bob Burns, who have also come from Bldg. 26-3. Betty and Bob are now in the Cost Div. of Bldg. 26-2. . . . Has anyone noticed Jim Locker's new look? He has curly hair now! I wonder if he's tried the new capsule curl set! . . . Somebody should tell Phyllis Fisher that a clock has two hands. She seems to think the minute hand is the only one that counts. Don't we wish that were true! . . . Pat Lauer, Div. 93, ran into a parked car one day all because Vivian O'Neill, Bldg. 26-2, was describing the delicious steak she was going to have when Pat came over for dinner. . . . Bob Thomas, Service Bureau, has been on our sick list for a week and a half. We are sorry to hear this, Bob, and hope you'll be back soon.

Thirty-nine years ago, Charlie Schild began his employment here at G-E. This week he will join the retirement group of employees. To many of us who have many years until we retire, Charlie is a lucky fellow. We can imagine all the benefits of not having to get up and go to work, but sleep in late; or when the fish calendar looks good, to go fishing; or when the icy blasts of winter whip about us, to go to Miami; but Charlie probably doesn't agree, at least he is non-committal on his future plans. Many of his friends surprised him with a party at Squares hall last night. Among the gifts he received, the most prized possession, is a model desk complete with swivel chair, Charlie, cigar and all. To appreciate the gift one has to have known him, for the life-like miniature is a compliment of the skills of the men whom Charlie directed. Of all the words that might be written here, none can quite express the thoughts as well as this gift. On Wednesday the girls surprised Charlie with a potluck dinner. As guest of honor he received all the extra large portions of all the good things to eat. He also received a giant ash tray with cigar to fit, a bright new tie, the latest in fishing equipment, complete with fish and all the best wishes of our gang. We wish to say to you, Charlie, "May your new experiences be as pleasant as those you have had here in these many years. Good luck and best of everything." . . . Anyone trying to get on the streetcar—don't depend on Jean Forst to get you there! She'll zig-zag you across the street five or six times first. Then there you are with your coat tail caught in the door, just lucky you even got on. . . . Lucille Welch and Ruth Baker are learning a few new punches these past few weeks. You've guessed it, they're ardent Golden Glove fans. Maybe we'd better stay out of their reach for awhile. . . . Glad to hear Edna Ward is recovering nicely and hope she's back soon. . . . Margie Kramer, we'll change our card game to crocheting lessons if you come back to work. . . . The wind removed a part of Ida's farm recently and she has been worried ever since. . . . It just doesn't pay to mention basketball around Joe Quillan since those Monroeville Cubs were rated fourth in the state. Until the Sectionals roll around it's "Put up or shut up, Buster." . . . Now that the new Chevy "bucket of bolts" is on the market it is hard to get the minds of the two Bills (Geist and Johnloz), and Paul Schlie onto any other subject. . . . We all hope that by the time this goes to press Cliff Imbody will be back with us. Of all things, he had chicken pox. . . . All conversation of a technical nature is going from the ridiculous to the sublime. The latest query is "How long is a short circuit? . . . Don Kruse finally experienced one of life's most embarrassing moments After ribbing Ray Solga for so long about a hair cut it finally dawned on Don that he needed one. So one night he went to a neighborhood barber shop. Upon arriving he discovered the barber had a boy about five years old in the chair, so he took his coat off grabbed a magazine and sat down to await his turn. Soon the barber turned the chair around and the boy saw Don. He gasped, pointed at Don and exclaimed in a loud astonished voice, "Gee whiz, what are you doing here? You don't need a hair cut!" . . . Anytime you think the leads on a motor are too long, see Lawrence Baker. He will cut them off to any desired length Just be sure it isn't an explosion-proof motor that takes long leads!

C. A. Degitz Dies Saturday

Chester A. Degitz, 49, died at 7:30 p.m. Saturday, Jan. 29, at his home, 2425 John St. after two years of illness. He was employed by General Electric in 1917, and before his retirement in November, 1947, was an assembler at the Taylor St. plant. He was a member of the Quarter Century Club and St. Peter's Catholic Church.

Surviving are his mother, Mrs. Joseph Degitz, and a brother, Lester.

Services were held at 9:15 a.m., Tuesday, at the Mungovan and Sons Mortuary and at St. Peter's Church at 9:45 a.m., the V. Rev. Msgr. John Bapst officiating. Burial was in the Catholic Cemetery.

LIFE CAN BE HORRIBLE!

A Tragedy in One Act

The Time: Monday, Jan. 17, 1949.

The Place: A suburban Fort Wayne home.

Scene I takes place in the bedroom. The husband is in bed, "sawing wood." The floor is covered with sawdust! The wife enters. . . .

Wife: (Softly) Honey, it's time to get up.

Husband: (Flopping over) Ugh!

Wife: (Louder) Come on, dear, get up!

Husband: (Head buried) Ugh!

Wife: (Yelling in his ear) HIT THE DECK, YOU BIG LOUT!!! (Husband leaps out of bed dragging covers with him—promptly stubs toe on door—swears loudly—and staggers blindly towards the bathroom.) (Curtain.)

Scene II takes place in the kitchen. Wife is merrily preparing breakfast. From the bathroom comes the sound of man splashing in tub. (Production note: this sound may be simulated by placing a live walrus into a large tank of scalding water.) As wife breaks eggs into the skillet, she looks at clock on wall. Suddenly, an expression of horror comes over her face. She looks at clock again. She drops three dozen eggs on floor and dashes to the bathroom door.

Wife: (Calling) Dear?

Husband: (Off) Huh?

Wife: Are you in the bathtub yet?

Husband: (Off) Uh-huh.

Wife: Oh! Well, I must've made a mistake—it's only six o'clock.

Husband: (Appears in door dripping wet, with towel around middle) WHAT?????

Wife: (Sweetly) Now don't get all excited, dear, I just made a little mistake—I got you up an hour early!!

Husband: (Exploding) Great cauldrons of boiling fat!! You mean it's only six A.M.???

Wife: (Meekly) Yes, dear.

Husband: And I'll get to work BEFORE eight o'clock?

Wife: Yes, dear.

Husband: Great Cauldrons of Boiling Fat!!! Do you realize what you've done?

Wife: Yes, dear.

Husband: Why . . . why . . . why I'll even get to work before Mr. Staehle!!!

Wife: Yes, dear.

Husband: GREAT CAULDRONS OF BOILING FAT!!! (Curtain.)

(NOTE: The character's used in this play are entirely facetious, and any resemblance between them and Mr. and Mrs. Frank Ondrovik is purely intentional!)

Alois Schonheinz Dies At Hospital

Alois Schonhcinz, 57, died at the St. Joseph's Hospital at 12:25 a.m., Friday, Jan. 28. He had been a patient at the hospital since Jan. 13.

Born in Germany, he lived at 3031 Warsaw St. Mr. Schonheinz was employed by General Electric in 1917 as a helper in Bldg. 26-4. He later worked on various jobs such as boring mill operator, die repairman, machinist and leading operator. At the time of his death he was a leading operator in the Tool Room, FHP Div. 13, at Taylor St. He was a member of St. Peter's Catholic Church, its Holy Name Society, the Moose Lodge and the Knights of Columbus.

Surviving are a son, Fred, and a brother, Emil, New York. His wife, Maude, died in 1940.

Services were held at the Mungovan and Sons Mortuary at 8:30 a.m., Monday, and at 9 a.m. at the church. The V. Rev. Msgr. John Bapst officiated, with burial in Greenlawn Memorial Park.

An opinion is an idea that you hold; a conviction is an idea that holds you.

We thought that all of the ice fishermen would welcome all of this nice cold weather. From what we hear it scared Charlie Engle out of fishing as he sent up north somewhere and ordered some fish. They were supposed to be pike, but Charlie says they looked more like carp. . . . If you have wondered why Larry O'Shaughnessey has been so quiet lately, it is due to his having a little trouble with his bowling. Maybe you had better talk to Oral Emrick on this subject, Larry. . . . The fellows in Final Test and Inspection are a very unhappy group, and they have just about lost all faith in humanity. It seems that "Moe" brought in a very beautiful calendar; it had a lovely scene on it. The first day the boys had it up, everyone remarked about its beauty, so the boys decided that they had better put it away when they went home that night. The next morning they hung it up again, and that night they decided that no one would take it, so they left it hang. So-o-o, they did, and that's right—someone took it. Now the boys are very sad, so will the person or persons who took it please bring it back so all of the boys can smile again. . . . Congratulations to Li'l George Ryan, who celebrated his birthday last Friday. . . . Our Jackie Elder, went and did it again, only this time it was just her picture in the news. Jackie went to visit the Windy City over the week-end, and did not get to see her picture in the WORKS NEWS until she returned Monday. Glenn Miller had it all painted and hung up for her when she came into work. . . . Welcome to the packing section, Noel Boelinger, and it is also welcome to the stock room for Harry Byall. . . . We are sorry to hear that our good friend Ed Bandt is on the sick list, and sure hope that you will have a speedy recovery, Ed. . . . We also learned from a very reliable source that Ted Budecki is classed as an EXPERT when it comes to starting cars with automatic chokes. If you are interested in getting any of this valuable information just contact Ted. He will tell you a beautiful way to spend your week-end, especially one as cold as last week.

Five Complete Quarter Century Service With G-E

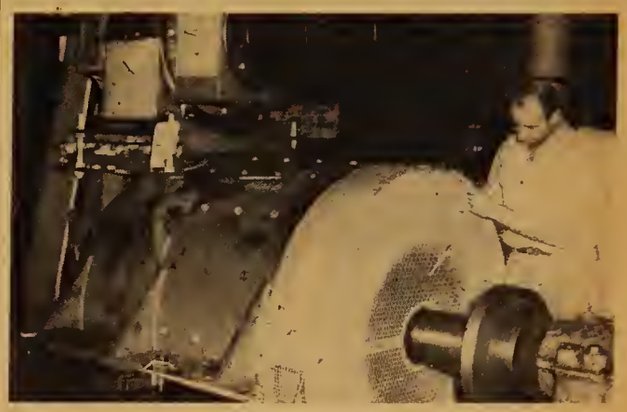
Fort Wayne Division Provides Motors, Generators For Modern Ferry Boats

An artist's sketch of the new ferry boats is shown above.



Two modern ferry boats will go into service this spring for the Norfolk County, Va., Ferries, it was announced recently by Charles Freund, superintendent of the ferry line. Diesel-electric drive on the new craft, will be equipped with General Electric main and auxiliary generators, motors, and controls. The main motors and generators are being furnished by the Fort Wayne Large Motor and Generator Division.

The propulsion plants on each will consist of two Cooper-Bessemer 580 hp diesel engines, two G-E 350 kw propulsion generators, and two 400 hp G-E marine propulsion motors. In addition to the propulsion equipment, General Electric will also supply auxiliary generators and controls.

A new system of controls will make it possible for the new boats to deliver a greater amount of horsepower at the initial turn of the screws than is ordinarily possible. Because the main propulsion motors might be damaged by sudden applications of full power, special designs and devices have been incorporated to make it possible for the motors to accelerate faster, building up rapidly to the full 200 rpm of the propellers. The double-ended boats will be able to operate in either direction with equal ease due to the adaptability of the diesel electric system of propulsion.

The ferry boats, now under construction at the John H. Mathis Co., in Camden, N. J., will be 180 feet long and will be able to carry 40 vehicles each. They will operate across the ⅞ mile stretch of the Elizabeth River between Norfolk and Portsmouth. Traffic over the river at this point averages about 8,000 cars and 20,000 pedestrians daily.

Until the new boats go into service, the traffic will continue to be handled by two diesel-electric ferries and three old steam-powered vessels. One of the steamers is propelled by paddle wheels on the sides.

John Caston, Tester in Bldg. 19-1, is shown above with a 350 kw marine propulsion generator on test.

Apprentice BROADCAST

By Eugene Werling

A warm "Welcome Home" was extended to Dick Gebert and Don Konow in full fashion Monday. Banners were unfurled as greetings to our Navy Reservists. The welcoming committee's surprise came when the banners were noticed and acclaimed by everyone except Dick and Don. The outside banner withstood the blizzard very well. As the bench section watched out the west windows for Gebert to make his entree, he was already back at his desk in the office. Konow also missed the outside banner by coming in from the north rather than the usual way, from the west. Don claims the clock wasn't set but the truth probably is that he had to get the Navy started out right this week. Dick didn't see the banner at the end of the aisle either. His reason was that he was checking on the swabbed deck. . . . It looked like homecoming Monday with Arv Jones, Ward Staley and B. O. Smith putting in an appearance. Smith and White didn't waste any time comparing mail order fish. . . . Dick Nix had his troubles this past week. Dick arranged to have some work done on some chisels. One of Dick's friends finished working on them and so put them in Dick's pocket. It seems as though they weren't entirely cooled and after a short time Dick was doing a terrific jive number. His rhythm was fast until he finally got the chisels out of his pocket. Dick also had pronunciation trouble at the tool crib. Be careful, Dick, they have most anything now days. . . . The basketball team came through very well in its first, second-half game by winning 36-23. It took sometime to get started, but got rolling in the second half. Cliff Bieber made his first appearance of the season and canned a long toss. . . . Shidler says that he's going to help his wife do the washing. Duane's part will be to hang up the clothes because his wife has dreams and thinks she has the clothes pins in her mouth but instead it's Duane's shoulder. Why don't you feed her? . . . Monday is usually a pretty dull day but not for the draftsmen. A group of the boys belong to the Air National Guard. So after school off they go to Baer Field. Homer Carson displayed how to look dressed up when going to work. Stripes, ribbons and all. Carl Lommatzsch and Harold Fremion still showed they have some soldier ability left in them, the General complimented both boys on the way they shined their shoes. We found out later Harold made a special trip downtown to get them shined. . . . Birkenbeul wants it understood that he can play euchre too. He says he won a few games, but his partner lost a couple. Figure it out. . . . The volleyball team has been playing their hearts out but can't raise the won-lost column very much. Jack says wait 'till these boys with the spirit get a few years' experience under them. Then they will go. . . . What's the matter with John? It's getting to be a familiar question. Yes! men, it's the truth John has been sick. The doctor bills are getting higher than his pay check.

Glad to have True Sheets back after an absence of three weeks due to illness. . . . Joe Trentadue wants everyone to know that he had a birthday last week. Belated congratulations from all of us, Joe. . . . Ed Gebhart has invested in a pair of nice warm fishing pants and is hoping the weather will stay cold enough so he can have an opportunity to use them some of these week-ends. Maybe he can borrow some of Heaston's night crawlers for bait when he does go. . . . Best wishes for a speedy recovery to George Seabold, who is ill at his home. . . . Congratulations to Kenny Guisinger who has his picture along with the other 1948 suggestion champs. . . . We are welcoming Elsie Fabian, Viola Martin, Mildred Greene, Hazel Leonard, Flora Crawford and Laurene Kraus who have come to work in our division.

A guest like a fish becomes superfluous at the end of three days.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Wilbur Ayres gets the "Oscar" for absent-mindedness this week. He left Bldg. 19-3 the other day with Rudy Rastenburg and Paul Lichtsinn and walked all the way to the College St. parking lot before he remembered that he was parked on the Fairfield lot. He believes now that what you don't have in your head, you have in your feet. . . . Frankie Enderle, our "bon vivant" and gay dog in general, has been contemplating a week-end trip to Hamilton, O., to check his financial holdings in the Rub-No-More Machine and Gear Works, and a little bird told us perhaps to check up on a certain little Irish Colleen, named Margie. . . . Leroy Cook will answer to the name of "Skinny" from now on, but don't call George Wolfe, "grandpa." . . . Tom Closson left us to work for Lec Anderson in Bldg. 19-2. . . . Howard Musselman is still looking for about 40 acres in the heart of Fort Wayne, so he won't have far to go to work, and still farm on the side. . . . Some of the fellows are wondering what size bowl Elmer Minnick's barber uses when he gives Elmer one of those deluxe Minnick Haircuts. . . . We were right when we predicted that when Cal Case had his haircut recently a few days later he would come down with a bad cold. Cal vows no more haircuts until early summer. . . . Happy birthday to Bill Hale. . . . We are sorry to hear of Clara Hoeh's unfortunate accident. . . . On our sick list are Maurice Archbold, Cora (Bonnie) Asies and Manford Lee. We hope it won't be long until you will be with us again.

Ode To A Five Dollar Bet

The die was cast
Each man to the last
Had pledged himself
Of smoking he'd fast.

Five dollars was the bet
Bob, Ed and Heiny had set
Would cost the man
Who smoked a cigarette.

The day grew nigh,
Each throat grew dry
Until one man
Was heard to sigh.

"If I don't smoke a fag
To the floor I will sag
Like a man suffering
From a thirst jag."

Ed Hormann did slip
And up to his lip
With trembling hands
A cigarette did flip.

The first puff was nice
The second suffice,
Then he thought of the bet
And the terrific price.

His head did spin
As he got his wind,
And he vowed never again
To be taken in.

It just goes to prove it
That you can't always win it
For, Dear Reader, you see
There is one born every minute.

Anonymous.

Pound Of Coffee Given With Each Maker Purchase

A pound of coffee will be given away with each G-E coffee maker purchased in the Employees' store, it was announced today. The offer will continue for a limited time only. A card entitling the buyer to a pound of coffee if sent in to the coffee company has been placed on all coffee makers now on sale at the store.

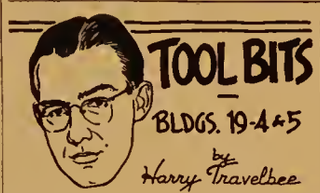
"A half-truth and a whole lie are congenial companions."

This little rhyme was given us by one of the Punch Press men. Perhaps some others have the same problem.

"In our gang there is a fellow named Keck
When he opens the windows he sure has us wrecked;
We turn on the heat, he turns it off,
I guess we will have to work in the Loft."

We welcome several newcomers to Group 16x42. They are Dick Raber, Mary Beamon, Camelita Fough, Virginia George and Arlouine Wise. . . . Virgil Fogel has joined the early risers. . . . Charlie Thomson's wife will not let him help her with the washing anymore. Charlie was in a hurry to go someplace and tried to put all the clothes in at once. . . . Speaking of washings, Kenny Johnston is getting to be quite an expert. Since his baby daughter arrived he doesn't get Saturdays off anymore. . . . Dave Slater says that winter is going to be mild. He has been feeding two robins in his back yard since last fall. I was inclined to agree with him until last week-end. . . . Gertrude Moss celebrated her birthday by treating the gang to spice cake. . . . The second shift lost some of their co-workers recently. Among them are George Foster, Tom Goodenough and Maud Runyon. . . . We hope that Dick Madden will be back by the time the NEWS goes to press. Dick has been ill. . . . Herman Wiegman had a cyst removed from one of his hands and is unable to work for a couple of weeks. . . . Bill Straub bought his wife a little puppy—a Pekingese. . . . Jerry Wert had some of the fellows a little curious about why he was handing out cigars. It was his birthday. . . . We're certainly proud having such a polite fellow working with us. The other afternoon Eldon Robey parked after hours. As Eldon came up to his car he thanked the cop for the ticket. The cop was polite too. He said, "You're welcome."

Mr. Hobbs' boy is on the road to recovery from pneumonia. . . . We sure would have liked to have seen Harry Rollins doing the Barn Yard Polka when he dropped the tongue of his trailer on his fingers. He said he also invented some new words. . . . If any of you people in Bldg. 26-3 heard a loud shriek the other day, it was coming from our winder Jean Fry. It was a mouse which someone put right in front of her when she started to work. Yes, Jean, it's a little too early in the morning for that kind of visitors. . . . By the way, Bldg. 26-3, when are you going to put some more write-ups in the WORKS NEWS? We need a little help as we are a little group and are slowly running out of news, so come on and let's keep this column going. . . . When anyone can beat Stan Emery in biting on a tall story, they really have to get up early in the morning. How about it, Cueball? . . . Does everyone know we have a Barney Oldfield in our group. He passes everything on the street and I will give you one hint as to who he is. He drives a '37 Ford. . . . The neighborhood in the southwest part of town will soon be brightened up by the presence of a new tenant. Congratulations on the completion of your new bome, Gladys.



If any of you good people have been driving down any of the Summit City's fair avenues lately (after dark, of course) and noticed (possibly bumped into) a car being driven witbout lights it migbt have been Luella Welbaum. Luella, you really should use them, they are a marvelous help. . . . Lenora Hanley and Sbirley Renkenberger enjoyed a few days in the sunny state of Georgia this past week, (Augusta, Ga., to be exact.) Lenora states that the whole tbing was "ooh, Peachy." . . . "Here comes the bride!" and it's Alice Strahm, oops pardon us Mrs. Walker Jr. The Walkers were married Saturday, Jan. 29. Best of luck to you both. . . . Just a week ago Teresa Arend celebrated her 1949 birthday. Happy birtbday, Teresa. . . . Wbat could be more irritating to one's noon day meal, than to go to all the trouble to hunt up a salt shaker, carefully cover same with wax paper so the salt won't all drip out, and then find out when the time for salt approached that the shaker was empty. Such was the sad plight of Ruth Kibiger. Bet you'll look next time, Ruth. . . . Speaking of sad plights, how about that swollen jaw of Viola Haiber. Now regardless of what you may think Vi fell down (face down) and that is the real cause of the swollen jaw. No one socked her.

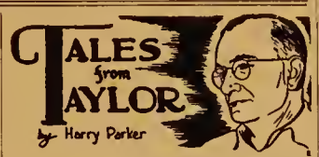
Too many kind acts that speak for themselves, talk in a whisper.

Schultz Completes 30 Years

William C. Schultz, Bldg. 4-3, recently celebrated his 30th anniversary with General Electric. At that time, he received a congratulatory letter. Standing left to right in the above picture are Harry Magner, W. W. Winner, O. J. Mettler, Supt, of FHP Motor Div. 1; Mr. Schultz, Florian Korte, Frank Laier, Robert Blee, and George Prince.

Rumors are that a lathe man, John Roemer by name, is seriously considering going on a diet since a rather embarrassing experience last week. The story is that he had the radiator off his car for repairs. When putting it back and tightening the rods holding the radiator, John had to do some high class wiggling to work himself into position to tighten the rod from inside the car. He started to crawl out of the car, but to his surprise and embarrassment, he found himself stuck up under the dash and couldn't get out. After using every trick he knew, he finally called his wife who helped him. We think the Mrs. should have honorable mention. If you're serious about this diet business, just pass your lunch pail back to us, John. . . . Is it true that Bob Goers and Harry Travelbee are seriously considering placing train whistles on their Fords rather than the usual horn? Nothing like keeping yourself reminded of your favorite hobby. . . . Last week's wet weather seems to be having a growing effect in the lathe section as a small pine tree made its appearance back of the small lathes. . . . Gus Wiedleman says manufacturers should make car doors that close automatically. . . . Strange and different sandwicbes seem to be the rule rather than the exception in the lathe section these days. Keep your eyes open as you may be seeing a newer one appearing in a few days in the form of a fox sandwich. . . . Cliff Clapesattle has been doing a lot of fox hunting lately. From the stories we hear, he and his hunting companions have been getting a number of foxes. He is trying to put the fox meat to good use as he was heard offering John (Expansion) Roemer a hind quarter if he would come out to the locker to get it. John isn't too sure about the merits of fox meat. He has been trying to find someone who has eaten it before, but to our knowledge, he hasn't been able to find anyone yet. Keep trying, John, and we will be looking for that fox meat sandwich. . . . Correction: Bob Green and not Waldo Reed had the fender trouble described last week. We thought a libel suit was upon us when last week's WORKS NEWS came out. . . . George Luker, Drafting, joined the Tool Division basketball squad. We understand that there was some misunderstanding about the team needing an anchor-man.

Blackburn Appointed Shipping Supervisor



R. E. Blackburn

Russell E. Blackburn has been named Supervisor of Shipping, FHP Motor Division 36, at Taylor St.

An employee at General Electric since 1937, Mr. Blackburn first worked as a raw-material clerk in the Fractional Horsepower Motor Division. In 1940, he transferred to the Motor and Generator Division doing similar work and scheduling.

Mr. Blackburn was transferred to Kokomo in 1944 as a raw-material leader, and in 1948 was made Assistant to the Supervisor of Production at that plant. He was appointed Supervisor of Production at Kokomo in September, 1948, the position he held prior to his recent appointment.

He is married, and at the present his family is still in Kokomo. The Blackburns have three children, a daughter and two sons.

Charley Odom, who left the Company a week ago Friday, was given a rousing send off on his final day at work. The boys presented him a lovely log chain type dog collar which they locked securely around his neck. . . . Art Brandenburger was subjected to a blackhead massage one day last week. As you know his hair is of the "gone with the wind" type. He looked so well with a black head that he is now thinking of having a black crinkle finish put on his dome with a permanent part built into it. . . . The punch press and plating gangs are still riding Frank Blotkamp about his euchre playing. Frank always claimed to be a champion at this but somehow he seems to have lost his artistry. One of the boys brought him in a corn cob and told him to rub it behind his ears before and during the game and this would surely restore his lost ability to play a good game of euchre. . . . The raising of a mustache seems to be the vogue. The latest one to grow fur on his upper lip is Paul "Speck" Wilcoxson. We do not know what his motive is, but we do hope that this one does not die an untimely death as did Kenny Applegate's flowing beard. It became entangled in a drill press and had to be destroyed. . . . Britt Skevington, who has been absent eight weeks due to illness, is back, and we are glad to have him with us again. He looks good and tells us that he is hitting on all eight again. The boys on the assembly line were very considerate and gave him some very nice remembrances. Britt appreciates these and wishes to take this means to thank them. . . . We see by the daily papers that Ray Heck of our rotor section entered the Golden Gloves contests in the light heavyweight class. All of us are giving him our support and sincerely hope that he smashes his way to victory.

A grown-up usually means about half he says and a youngster says about half he means.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot he repeated. All articles mentioned must be personal property of the employee. Ad will not he accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone numher may appear in ad, only the home telephone number or address.

No ad will he received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, February 7, 1949

BROADWAY LOST AND FOUND

LOST—One pair of brown leather gloves.

FOUND—Two keys on a chain and a small roll attacbed with name H. W. Oetting on it. Found in Bldg. 4.

FOUND—Package of valentines on west side of Broadway.

TAYLOR ST. LOST AND FOUND

FOUND—Five keys on a ring.

FOUND—Single key.

FOUND—Small brooch with blue sets.

FOR SALE

KITCHEN SINK—With drainboard and fixtures. H-59105.

FORD-FERGUSON TRACTOR — With two bottom plow, cultivator, and tandem disc. A-68270.

G-E RADIO PHONOGRAPH COMBINATION—Five years old. $50. 338 W. Leith St.

BLACK COCKER—Female, 18 mo. old. Distemper immuned. Phone Monroeville, Ind., 2061.

GIBSON ELECTRIC RANGE—Almost new, deluxe, deepwell, "Updaisy" burner. A-67169.

LADY'S WOOL COAT—15; dresses, 32-34; wool slacks, 26-28. H-35932.

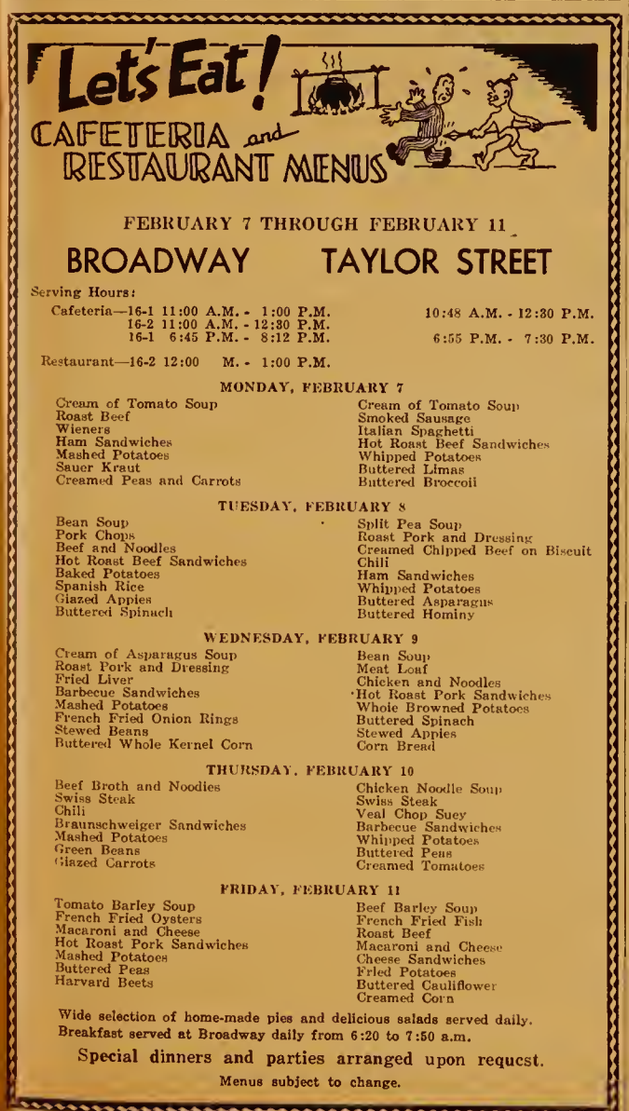
PINBALL MACHINE — Man's wrist watch. Will trade for guns. H-57343.

HOOVER SWEEPER — With attachments. Reconditioned. $25. Steel coal window. Cheap. A-98112.

WANTED

SMALL LAVATORY—A-65893.

Old Man Winter really gave us a taste of the weather they have been having in California. One consolation, spring is only 45 days away. Speaking of spring, a tip to Edith Bohde would be to wait until spring and shoot marbles. Bowling seems to get her down. . . . Minnie McCague, Fern Monroe and Eileen Steinacker helped Verna Bullerman celebrate her birthday with a dinner at the Candlelight Cafe. Verna received a pretty present. . . . Doris Ryan was in such a hurry to go to lunch one day that she forgot what she was doing. She took off her apron and then put it on again. Next time try grabbing your sweater. . . . Happy birthday to Faye Stockberger. . . . Rose Heche is back in the fold of Bldg. 17-3 after being absent for sometime. . . . Sorry to report Stella Kemp is on our sick list this week. . . . Bob Rehrer has gone to Bldg. 17-2 to work. The same Fun Loving boys, Inc., (that Jeanette Blough writes about) have initiated him into the Blue Bloods. Don't try to high-hat us, Bob, we remember you from Bldg. 17-3.



John Anspach is in the "lime light" this week. His wife presented him with an 8 lb. 9 oz. baby girl Jan. 26. Johnny says that his wife and Linda Diane are doing nicely. . . . Katie "grandma" Auker is also very proud of her new grandson. . . . A group of girls were entertained at Kathryn Erwin's home and a very interesting program for the "March of Dimes" was given. . . . Orville Robinson would like to have a map of the United States, and would someone explain to him how the State of Washington got further north than Oregon? . . . Bill LaVine wants to know if he really looks like a guy that would fib to anyone? . . . We welcome Elizabeth Hudson, Grace Wall, Martha Lee, Etta Everly, Irene Bowman, Dessie Jackson, Alva Hake and Cecelia Sidney to first trick. . . . Margaret Lepper set a new record driving back from Cleveland. Rather "foggy" wasn't it, Margaret? . . . Ann Johnson seems to be having trouble with "Susie" again—new springs and gas tank this time. . . . Mac seems to have dinner pail trouble. He is either going to get a bigger lunch pail or quit eating between meals.

Fractional Fiction 4-5

By Elaine Sutter

Does anyone have an extra ribbon we could give to George Seabold. He was seen chasing his hat for half a block last Friday morning. . . . The pinochle players of Bldg. 4-5 are on the lookout for a good scorekeeper. The previous ones can't be trusted. . . . Overhearing a conversation last week, we believe Joe Parent would make a good salesman. He sold Gene Berg the idea of buying a thermos bottle. Could it be, Joe, you would like to drink all of your own coffee? . . . Last Thursday night when we had those high winds, Dale Peden made the remark that he wasn't too afraid, for his neighbor's garage doors were flying back and forth. As long as they didn't fly off he knew his house would stay on the foundation. . . . We welcome Basil Squires to Bldg. 4-5 who hails from Div. 17. Basil will follow shipment parts on aircraft. We also welcome Jein Badders to Bldg. 4-5. . . . George Seabold has a new grandson. Congratulations, Grandpa. . . . Say, girls, what do you think of that nylon machine? Can you imagine nylons for $1.00. . . . Most of you remember Joe Bruns. Joe was up to see us to say farewell. You will probably see him in a white truck with the name of a local laundry printed on it. He says that will be his new job. Good luck to you, Joe. . . . Clara Ringenberg was all smiles last week. She left for St. Louis to visit her first grandson. Also Neva Scott is in New York visiting her daughter. . . . Paul Castle says, "It's news. The weatherman predicted snow and we got it." . . . Herbie Landstoffer said he had all the thrills he wanted and still stay on four wheels. A friend drove him home from Ossian at 98 miles an hour. Herbie doesn't like flying any better. . . . The co-workers of Mark Brindle learned the secret of his eating chicken every other day. Mark's story is that he takes his casting rod and puts a grain of corn on the hook and throws it over the neighbor's fence. . . . In aircraft, Virginia Shambough, Joye Boyd and Ilo Kraft have gone on a diet. They have monopolized all the rye-krisp from the candy lady. . . . We welcome Jim Clark back to Bldg. 4-5.

. . . Milo Heller has a new dessert. Whipped cream with pie on the bottom. . . . Chairs have a way of slipping away from Ester Watson. It just wasn't there when she sat down. . . . We hear Mike O'Grady is having trouble with his car. When asked if he was going to work on it himself he said, no, as his wife objected highly of him using the living room for a repair shop. . . . Wash day worries are over for Mildred Wineman. Her husband gave her a new G-E washer. . . . Happy birthday to Grace Anderson.

FEBRUARY 7 THROUGH FEBRUARY 11

BROADWAY **TAYLOR STREET**

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant—16-2 12:00 M. - 1:00 P.M.

MONDAY, FEBRUARY 7

Cream of Tomato Soup	Cream of Tomato Soup
Roast Beef	Smoked Sausage
Wieners	Italian Spaghetti
Ham Sandwiches	Hot Roast Beef Sandwiches
Mashed Potatoes	Whipped Potatoes
Sauer Kraut	Buttered Limas
Creamed Peas and Carrots	Buttered Broccoli

TUESDAY, FEBRUARY 8

Bean Soup	Split Pea Soup
Pork Chops	Roast Pork and Dressing
Beef and Noodles	Creamed Chipped Beef on Biscuit
Hot Roast Beef Sandwiches	Chili
Baked Potatoes	Ham Sandwiches
Spanish Rice	Whipped Potatoes
Glazed Apples	Buttered Asparagus
Buttered Spinach	Buttered Hominy

WEDNESDAY, FEBRUARY 9

Cream of Asparagus Soup	Bean Soup
Roast Pork and Dressing	Meat Loaf
Fried Liver	Chicken and Noodles
Barbecue Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Whole Browned Potatoes
French Fried Onion Rings	Buttered Spinach
Stewed Beans	Stewed Apples
Buttered Whole Kernel Corn	Corn Bread

THURSDAY, FEBRUARY 10

Beef Broth and Noodles	Chicken Noodle Soup
Swiss Steak	Swiss Steak
Chili	Veal Chop Suey
Braunschweiger Sandwiches	Barbecue Sandwiches
Mashed Potatoes	Whipped Potatoes
Green Beans	Buttered Peas
Glazed Carrots	Creamed Tomatoes

FRIDAY, FEBRUARY 11

Tomato Barley Soup	Beef Barley Soup
French Fried Oysters	French Fried Fish
Macaroni and Cheese	Roast Beef
Hot Roast Pork Sandwiches	Macaroni and Cheese
Mashed Potatoes	Cheese Sandwiches
Buttered Peas	Fried Potatoes
Harvard Beets	Buttered Cauliflower
	Creamed Corn

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 a.m.

Special dinners and parties arranged upon request.

Menus subject to change.

Here's a tip, folks, don't trust Vaughn Sheets or Harry Perl too far. Socially, that is; they are the kind of guys who let you win a few games of euchre just to gain your confidence. Then they come up and even the score which still doesn't make one feel too bad. But for a night cap on the play-off they will give you a good skunking. Now we ask you, Vaughn and Harry, is that the way to keep or win friends? . . . Bill Irwin seems very happy these days. He says he is the only one he knows of who ever got a treat off of Bill Rohe, without using coercion. . . . If any of you boys and gals have a record of "Preacher went out a hunting one very fine Sunday morning," please send it to Ray Kierspe. Ray likes this record so well that last Saturday he broke up a good night's sleep just to hear it played over the telephone. . . . We notice by the last safety report that Vaughn Sheets has changed his name to Sheep. Folks, figure it out for yourself. You know, boy on a farm, Waynedale, etc. . . . Congratulations to Harold Parkison and Warren Harding who are the proud new fathers of sons, and to Phil Feiburger and George Andorfer proud new fathers of daughters.

The difference between good luck and bad luck is usually the frame of mind you happen to be in.

Inquiring Reporter

SHOULD FORT WAYNE INSTALL PARKING METERS?

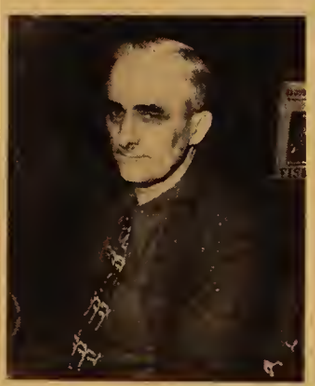
IMO JEAN SCHWARTZ

Bldg. 21

"Yes, I think it would help reduce the parking problem in the downtown area, and perhaps be a start in solving the traffic situation in Fort Wayne."

ROBERT S. LUSK

Bldg. 17-4



"Yes, I think parking meters should be installed. They would give more people a chance to park downtown for shopping; also would be a source of income for the city."

GRACE BEDSWORTH

Bldg. 12-B

"I do not think Fort Wayne needs parking meters. Besides being an added expense to the car owners, it detracts from the appearance of the city streets."

LUTHER ABNER

Bldg. 19, Elevator

"Yes, Fort Wayne should have parking meters as it would create better parking facilities. I suggest the money be used for the upkeep of the city."

VERNON C. DAFFORN

Bldg. 4-5

"Yes, it would eliminate all-day parking, and parking places would be more convenient to find. It would also be a good way to pay the Soldiers' Bonus, if all towns would take a revenue from parking meters."

6,000 Attend Performances of 'Light Sorcery' Show

Approximately 5,200 persons witnessed the eight performances of the "Light Sorcery" show Monday and Tuesday in the G-E Club auditorium.

Presented under the sponsorship of the Fort Wayne Apparatus, Lamp and Air Conditioning Department facilities of General Electric, the show was given at 1:30 p.m., 4 p.m., 7 p.m. and 8:30 p.m. both days. There was also a special showing Tuesday morning for school children of Fort Wayne and Allen County. Nearly 800 students attended this performance.

The scenes above were taken at the first show, to which all pensioners were invited. An estimated 325 pensioners and their wives attended.

James Jensen, master of ceremonies for the show, is shown in the picture at the left playing a "Ukelitely," an instrument resembling a ukelele which produces music played by a light beam.

The center photo shows a section of the crowd, while in the picture at the right are two ushers from the Elex Club showing one of the pensioners to his seat. They are, left to right, Rachel Fisher, vice president of Elex, Bldg. 4-2; Al Shroeder, and Barbara Wilson, Bldg. 17-3.

P's and Q's of 17-1

by Joe Kramer

Silence, when nothing need be said is the eloquence of discretion. . . . Whoever heard of playing golf in the winter time? A few of the rabid golfers went to Kendallville last Saturday for the annual Screwball Golf Tournament. One of the prominent, and should we say gracious, at least he looked very graceful when he fell out of the barrel, was none other than our own Harold Red Braden. Red did pretty good for himself too—came in and tied for fifth place which wasn't bad considering the competition in the tournament. . . . You don't believe the weatherman? We know a certain party in Bldg. 17-1 who has no faith in the weatherman. It seems that the weatherman said we would have freezing weather so a member of the hand screw machine section partook himself to the lake. With the daily reports of colder weather coming, he waited for the lake to freeze. No freeze, no ice, no fishing—disgusting isn't it, Harry. . . . It was a unique stage presentation that was given at the Moose Auditorium recently. Among the acts was a spectacular knife throwing exhibition. For some reason, the knife thrower's helper failed to show up—so believing the old adage that the show must go on, our Art Brockmeyer volunteered to be the victim. He stood at the board without a blindfold. A few flicks of the wrist in throwing the knives, and Art was pinned to the board. All in all, it was really an enjoyable affair. . . . Ernie Reiley believes in following the advice of Horace Greeley who said, "Go West young man, go West." Ernie has been planning all winter how he is going to spend his three weeks' vacation driving West to visit his daughter, but there seems to have been changes in his plans. What is the matter, Ernie, doesn't Mrs. Reiley agree with your idea of a nice trip? . . . If you would care to see how Ed Martin looked in his "Little Lord Fauntleroy" suit back in 1907, see George (Goldie Locks) Mosshammer or Frank (Nature Boy) Martin for the evidence.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Some people will believe anything they are told. It seems the other day when the elevator stopped on the second floor by mistake, and Charlie Gable yelled "third floor." Alma Witte and Perry O'Neill were half way down the hall before they woke up to the fact that they were on the wrong floor. . . . Charlie Gable is really getting very good with his ceramics. He had two figurines here the other day that were really beautiful. Are you open for orders yet, Charlie? . . . When Hugh Neely was asked the other day what his bowling average was, he very quickly changed the subject. What's the matter, Hughie, aren't you doing so well? Maybe you need a few more of Charlie Briggs' instructions. . . . Eleanor Lambroff had that happy gleam in her eye Monday morning when she came into work. It seems the boy-friend was in town over the week-end, so she was all smiles. . . . We were very sorry to hear of the fatal accident of Perry O'Neill's father-in-law in San Diego, Calif. . . . Here we are again at the end of another week. What can you say that you have really accomplished this week, or was it just another "wasted" week? When you stop to think how short life really is, we should try and make the most of every day. . . . See you next week.

Bring on the below-zero temperatures! It's a relief to have anything drop!

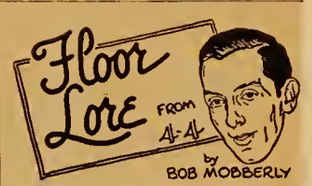
Shorts and Snorts from General Service

by Katie Steinman

Carl Campbell was recently awarded a "special edition" of the Works News in honor of his working at G-E 25 years. He was also given half of a $5 check and will get the other half in 25 more years. Carl's only remark was "I'll be here 'til I do." Then he was helped into a waiting ambulance. Anyone wishing to gaze upon this special work of art may see same in rustic, palatial, vine covered Bldg. 20-2. Congratulations, Carl. . . . It seems even with all the water we've had, Forrest Carr still has to have some for his new home. By the way, Frosty, we have a song request for you. The next time you're out by the elevator will you please give us your rendition of "Buttons and Bows?" . . . Have you seen the Albert English Funeral Parlor for dead chickens? . . . Willard Fuller sure acquired a black eye, (and at "Golden Gloves" time too). Pick on someone your own size next time and don't lead with your eye, Willard. . . . We say goodbye to Tim Timberlake. Good luck, Timmy. Ray Quinn is an ungrateful guy, just doesn't appreciate pretty calendars or nuthin' . . . Lee Miller, would you like to buy a new shovel? . . . Wouldn't you know the photographer would have to catch up with three of our boys at the Golden Gloves the other night. That look on Bill Garver's face spells "murder," whereas Wiley Shockney and Tez Trump seem to be taking things a little calmer, or were they just posing to have their picture "took." . . . It's a baby girl at the Rudolph Wuttke's. Congratulations, Rudolph. . . . The fellows in the shop at Taylor St. would like to know just what size heater fits Frank Kilcoin's little finger. . . . Harold Smith seemed to be "all up in the air" the other night when he got in his car to go home. It seems there wasn't even a truck around to help him out. However, Carl Furge gave him plenty of moral support. . . . The gang at Taylor St. says it just doesn't seem right not to see those No. 12's propped up on your desk when they go by the engineering office, Jim Hubbard.

Thisa and Thata

SPECIALTY MOTOR



By Helen Engle

Funniest sight of the week—seeing Gordon Jackson sitting on the floor after falling backwards from his desk chair! Was his face red? . . . Harlon Brown has a dog that is so mean that the newsboy is afraid of him, and now Brownie doesn't get the paper anymore. . . . Ray Soest is having trouble with his chickens already. He couldn't keep a fire going to keep them warm so he had to take them home over the week-end. . . . Beatrice Michels is now Mrs. Raymond Bley. Best wishes and lots of good luck, Bea. . . . Sorry to hear that Theresa VanBlarcon and Edna Houser are on sick leave. Hurry back, girls, we sure miss you. . . . Eleanor Kohrman, Secy. of M.B.A. has been having a lot of nice looking visitors lately. I wonder if they all see her about M.B.A. . . . Mardo Tobias had better get a corner on the peanut market. That way it wouldn't cost him so much to buy peanuts every week. . . . We have two St. Valentine babies in 1x29, none other than Lester Shirley and Charlie Hendrickson. We wish you both a very happy birthday. . . . Faye Folk thought she was carrying her umbrella on her arm the other day. Imagine her surprise when she discovered all she had was the handle and the umbrella was lying in the street about a block back. . . . Veva Healy really has something to be proud of when she shows the twin granddaughters' pictures.

Few girls have any particular views on kissing, says a writer. Pehaps hecause they close their eyes.

Floor Lore from 4-4

by Bob Mobberly

A ray of sunshine has broken upon Europe. While the papers talk about the Russo-American cold war, the depression of 1949, millions who will starve this winter, the crime wave everywhere, the advance of Communism and how Indiana shall raise money for the soldiers bonus, the news goes around that the Swiss have invented a runless stocking. A daring reporter says he slashed one with his pocket-knife and made no impression. You can have them—in time—in silk, rayon, nylon or lisle. The secret is in the weaving, not the material. There is, apparently, hope yet of science inventing a fool-proof statesman! . . . Amid all the noise and solid colors of machinery, it is refreshing to look at the fresh green of the sweet potato growing near Mildred Hoover's table. . . . From our personal observation, we believe Clarence Didier has a working formula for the purchasing of foundation garments! . . . The "Jolly Dot" Dorothea Swank has returned from her wonderful vacation in the deep sunny south. Welcome back, Dorothea. . . . Earl Galland claims, and he should know, that there is a "d" in his last name. Since it is generally a silent letter, we still feel that in the metric system it still equals "four quarts." . . . Remember when? Bill Putt whistling such songs as "Don't Fence Me In," and "The Gypsy?" . . . Oh, Mr. Bell! Miss Foster, after a long waiting period, finally received her much wanted French style phone. It is reported Nena tested the new phone immediately to see if her voice sounded different than it did over the conventional type phone by calling various friends. . . . Our parting thought: The more things a man is ashamed of, the more respectable he is.

The Patrols, Gavels and Levels of the Masonic League are up at the top, each having a record of seven wins and two losses. Ed Crabill came through in excellent style with a 277 for high single game of the week. His second game was 212 and then he dwindled down to a mere 168. However, he still had a nice fat total of 657.

Lauterberg with a 213 game to his credit and M. Bailey with 212 were Ed's closest competitors.

Small Motor League

The production team still has a firm grip on the lead with seven games won and two lost,

The boys that broke the 200 count this week were Jim Daley, 212; Otto Proehl, 211; Kammeyer, 210; Herman Doehrman, 209; Lowell Welker, 209; Bill Miller, 208; Ife Holmes, 202; and Leo Reffelt, 201.

Apparatus League

Team 5 is in the lead alone now with six wins and no losses chalked up for them. The boys that piled up the 200 scores were John Root, with 202; Charlie Redding, 203; Westrick, 203; Russell Sealover, 214; Bob Stute, 214; Frank Schlink, 226; Fred Schafenacker, 211; and F. Bienz, 229.

Office League

Poor old Keghead is still up in the clouds. In case you haven't heard (but you must have, he's been telling everyone he sees). Last Monday evening he rolled a total of 689 for three games. That's the record so far for this year. But he's been so excited about it, he just couldn't concentrate on such prosaic things as writing columns. So his ghostwriter is pinch hitting for him this week. The rest of the boys in the Office League weren't doing so badly either. Just look at this nice list of 200 scores: First, of course, there was Keghead who knocked off a 246, 230 and 213. Not far behind him, was Paul Hattendorf with 235. The others were Frank Schlink, 225; Don Waldrop, 225; "Popeye" Patterson, 216; Bob Knepple, 208; Vic Rump, 204; Johnny Johnson, 202; and Dick Gettys, Hal Fanning, Walt Nitz and Miller each rolled a 200 game. Incidentally, we think it's worth mentioning again that Walt Seidel held the record for the three-game total. He stacked up a count of 681. They don't come that high every day, you know.

Monday Night Ladies League

High games in the league were rolled by Vivian Fleckenstein, 193; Helen Wagner, 188, and Emma Vaughn, 182.

Open Bowling

EVERY SATURDAY
3 P.M. - 11 P.M.

At The
G-E CLUB

G-E Club Breaks Even In Basketball Games

The G-E Club basketball team won one and lost one game in Industrial League play at the Central High school gym. The Club lost to Zollner, 32-29, Thursday, Jan. 27, and won from ACWA, Tuesday, Feb. 1, by a score of 32-13. Bucher was high score man for the Club in the Zollner game, piling up 10 points for his team. He shared scoring honors with Carr by getting eight points each in the game against ACWA.

Box scores:

G-E	G.	F.	T.	Zollner	G.	F.	T.
Davis	1	0	2	MacDonald	3	2	8
Lowden	2	0	4	Bail	0	1	1

16 SURVIVE THIRD ROUND OF GOLDEN GLOVES MATCH

The third round of Golden Gloves boxing was held last night at the North Side high school gym, with 16 survivors left to try for the championships, Feb. 10. This 12th annual event is sponsored by the G-E Club and the Journal-Gazette.

G-E Volleyball League Opens Second Half

The Interdivision Volleyball League opened its second half of play last Friday with three teams winning all three of their games. The three teams are Squares, Winter St. and Main Office.

The scores for the evening's play are as follows:

General Tool—3-2-5.
Squares—15-15-15.

Taylor St.—6-15-4.
Apprentice Machinists—15-8-15.

Two High School Basketball Games To Be Broadcast

Dick Buckley will be on hand to air the G-E sponsored broadcast over station WANE of the North Side-Central city series game tonight at 8:30 p.m. Tomorrow evening he will broadcast the South Side-Gary Tolleston high school game to be played at the South Side gym starting at 8:15 p.m.

Last Friday, North Side came through to win an overtime thriller over South Side by a score of 43-40. This game put the Redskins in the lead for the City Series crown. The next night, North nosed out South Bend Adams by a score of 64-45.

G-E ENGINEERS HOLD MEETING

The Fort Wayne Association of G-E Engineers held its semi-annual general membership meeting, Wednesday, Feb. 2, at the Squares' clubrooms. K. K. Cooper and C. M. Summers, chairmen of the statistical and the engineering efficiency committees, led discussions relating to the engineering profession.

OUT OUR WAY

By J. R. WILLIAMS

The Firemen initiated the second half with a victory over Winter St. in the Interdivision League. As usual the game was close all the way. Tied at 45 points each at the end of the regulation playing time, the Firemen won their ball game in the overtime period. This was Winter Street's first loss of the season.

"Trusts may solve the world's problems if Trust in God is one of them."

We extend our deepest sympathy to Evanell Holman in the recent death of her grandfather. . . . Last week when we said Loyd Bodenhamer had a new son, the news was so fresh that we didn't have the name. But it is Fred Orville. . . . Our proud grandfather, George Waldschmidt, tells us how he varnished the baby's crib to perfection last week-end, but only to find the varnish wouldn't dry, so now he has to remove it and start over. Shall we remind you, George, not to use the same can of varnish this time? . . . Our flash-flash news for this week lets us in on a new love life. Laurine Phillips is sporting a lovely sparkler on her third finger, left hand. The lucky fellow is Keith Procise, a student at Indiana Tech. We wish you both all the luck and happiness in the world, Laurine. . . . Gene Moss has taken just the opposite turn, as she is living alone the next few weeks while her folks are tending some friends' farm duties. (Maybe this lonely life will change your mind about hating men, Gene. We're only kidding, of course.) . . . Have you seen the pictures of Bill Hartman's newly adopted dependent? It's a toy peke, about as little as a minute, and is he ever adorable! Mr. Stauffer wonders if you claimed him for exemption in filing your income tax, Bill. . . . Ken Michael feels ditto with Dagwood Bumstead that "Husbands are a sorry lot" because he has been spending nearly all his home life on his knees in the basement. (Always thought probably his wife had to ball-and-chain him to keep him home). What he's really doing is putting new switches, etc., around the walls. . . . Royal Stauffer was another prayer-bone type recently, keeping his nose to the grindstone in finishing up his house. He is laying flooring at all hours of the day and night. Doesn't even have time to cry because his wife and daughter are visiting her relatives in New York. He tells us they'll be back in about a month. We hope they're having a wonderful time, and that you're not too unhappy there by yourself, Mr. Stauffer. . . . The Personnel Group at Taylor Street is glad to have Ceal Romary back after several days' illness. . . . The people here in Bldg. 8-2 seem to be going to the dogs lately. Besides Bill with his toy peke, Al Hartman and Herschel Smith are having troubles with their dogs, too. Al Hartman heard the door downstairs close and decided it was Tyke getting up to feed the dog, so it must be morning. He got all cleaned up, ready for work, when Tyke came upstairs and informed his father that it was only 12:00 o'clock midnight. And poor Uncle Herschel's dog has eloped again. Dog-owners are a sorry lot, too, I guess. . . . Those who attended the Light Sorcery show this week claim it to have been very successful. We're glad so many of the employees and their families and friends were able to see the exhibition. . . . "We are peace-loving people, seldom paying pensions for more than three wars at a time."

Transformer won over Fractional, 50-23, to mark up victory No. 1 in the second half.

The Apprentice boys, trailing 16-10 at the half, came back strongly and decisioned Tool and Die, 36-23.

Small Motors played one of their better games and sank Taylor St., 48-31. Voors and Wickliffe got 14 points each for the winners. Trott played a nice game for the losers, getting 11 points.

The Tax Collector Is Here Again

1. If your earnings were less than $5,000 and you did not get more than $100 of other income, such as dividends or interest, you should file **Form 1040A or 1040 and attach Form W-2, your withholding statement.**
2. If you earned more than $5,000, or earned less than $5,000 but also received more than $100 from such things as rent, you must file **Form 1040 and attach Form W-2.**
3. You may have the privilege of splitting income which may result in a smaller tax by filing a joint statement with your spouse.

Most payroll sections of the Company by this time will have completed distribution of statements to employees which show the wages or salaries paid to them during the calendar year of 1948 and the amount withheld for Federal income taxes. The statement is known as Form W-2, your withholding record.

That means that the Federal tax collector is just around the corner and wants you to send him your tax form not later than March 15, or he will penalize you for delinquent filing. You can settle your tax obligation anytime before that date if you wish and, as a matter of fact, there's an attractive reason for doing so—you'll get any refund owed you much sooner.

Form W-2, just distributed by the payroll sections, is an important item in filing your tax return covering your income for last year. The withholding statement is given to you in duplicate, the original to be attached to your tax return as evidence to the government of the amount paid you in salary or wages; the carbon copy you keep in your own files.

Must Attach Statement

The withholding statement no longer can be used alone as a tax return. It is necessary this year for you to file a tax form and attach the withholding statement to your completed return, which will be Form 1040A for most wage earners, or Form 1040. The latter comes in two styles, a short form and a long form.

You may report your income on Form 1040A if all of your income came from wages or salary and amounted to less than $5,000, if it is reported on your withholding statement, and you did not get more than $100 from other sources, such as in dividends and interest.

If your income was more than $5,000, or if it was less than $5,000 but you also received other income amounting to more than $100 from such things as rent, for example, you must file Form 1040.

May Send Refund

If you use Form 1040A the tax collector will compute your tax for you and send you any refund that may be due you because of an excessive amount withheld from your pay.

FORM 1040A
Treasury Department
Internal Revenue Service

EMPLOYEE'S OPTIONAL
U. S. INDIVIDUAL INCOME TAX RETURN
IF YOU USE THIS FORM, THE COLLECTOR OF INTERNAL REVENUE WILL COMPUTE YOUR TAX

1948
CALENDAR YEAR

Do not write in this space
Serial No.

ATTACH ALL YOUR ORIGINAL 1948 WITHHOLDING STATEMENTS (Forms W-2)

Name John J. Doe + Jane A. Doe
(PLEASE PRINT. If this is a joint return of husband and wife, use first names of both)

HOME ADDRESS 333 Elm Street
(PLEASE PRINT. Street and number or rural route)

Valleyville (City, town, or post office) 2 (Postal zone number) N.Y. (State)

Occupation Machinist Social Security No. 333-03-3333

Your Exemptions

1. List your name John J. Doe
Were you as of December 31, 1948: 65 years of age or over? Yes ☐ No ☒; blind? Yes ☐ No ☒.
2. If married, does this return include all income and exemptions of both you and your wife (or husband)? Yes ☒ No ☐. If answer is "Yes," list her (his) name Jane A. Doe
Was she (or he) as of December 31, 1948: 65 years of age or over? Yes ☐ No ☒; blind? Yes ☐ No ☒.
3. List names of other close relatives with 1948 income of less than $500 who received over half of their support from you. If this is a joint return of husband and wife, list dependent relatives of both and write letter "W" after name of any dependent supported by wife.

NAME OF DEPENDENT RELATIVE (please print)	RELATIONSHIP	ADDRESS—if different from yours
Macon Doe	son	—
John J. Doe, Jr.	son	—

Your Income

4. Enter income tax withheld and wages shown on all your 1948 Withholding Statements (Forms W-2). If this is a return of husband and wife, enter income tax withheld and wages of both. Attach all Forms W-2.

Print Employer's Name	Where Employed (City and State)	Income Tax Withheld	Total Wages
General Electric Co.	Schenectady, N.Y.	$ 106 00	$ 3,399 00
Enter totals		$ 106 00	$ 3,399 00

5. Enter total of interest, dividends, and any wages not shown on Forms W-2. If this is a return of husband and wife, enter total of such income of both 72 00
If item 5 is over $100, or if you had any other income (such as rent, etc.) use Form 1040.
6. Add items 4 and 5. If total is $5,000 or more, use Form 1040 instead of this form ..... $ 3,471 00
If item 6 includes income of both husband and wife, show: husband's income $ 3,399; wife's income $ None

If you filed a return (Form W-2 or Form 1040) for a prior year, what was the latest year? 1947
To which Collector's office was it sent? Albany, N.Y.

Is your wife (or husband) making a separate return for 1948? No (Yes or No)
If "Yes," write her (his) name —
Collector's office to which sent Albany, N.Y.

I (we) declare under the penalties of perjury that the foregoing statements are true to the best of my (our) knowledge and belief; and that ALL 1948 INCOME IS REPORTED HEREON.

(Signature of person, other than taxpayer, preparing this return) (Date)

(Address)

John J. Doe (Signature of taxpayer) Feb. 28/1949 (Date)

Jane A. Doe (Signature of taxpayer's wife or husband if this is a joint return) Feb. 28/1949 (Date)

➔ To assure any benefits of split-income provisions, husband and wife must include all their income, and BOTH MUST SIGN, even though only one has income.

THIS SPACE FOR COLLECTOR'S USE ONLY
TAX DUE OR REFUND WILL BE COMPUTED BY COLLECTOR

Credits	$
Tax	$
Balance due or refund	$
	$
Total	$

16—55934-1

If you want to compute your own tax liability, even though your income is below $5,000, you may do so by filing in Form 1040. There are good reasons for filing 1040, even if income is below $5,000, such as claiming all possible deductions for large medical expenses that may exceed the normal allowance.

Remember that on May 1, 1948, Congress placed into effect a new schedule of withholding tax rates which were lower than the rates in effect during the first four months of the year. Because the tax reduction of the 1948 Revenue Act applies to all of the 1948 income, taxpayers might have had an excessive amount withheld from their pay. If that is so they will have a refund owed to them by the government.

May Split Incomes

There's something else that is new this year in paying taxes that may prove to be an advantage to you. There is a new provision permitting married persons to split their income when it is reported in a joint statement, even if all of the income for the household was earned by only one of them. The advantage may be that your tax may be smaller on the split-income basis.

The split-income provision applies to statements filed jointly on either Forms 1040 or 1040A. Both must sign the statement.

The tax collector wants to make sure that you get the better break about the split-income provision. Therefore, if you file Form 1040A as a joint return with your spouse, the tax collector will compute your tax for you in two ways—as an individual return and on the split-income basis. He will charge you whichever is the lower of the two computations.

Collector Computes Tax

This service will be given only if you file a joint statement with your wife or husband. If you file as an individual, he will not compute your tax on the split-income basis.

In filing 1040A the taxpayer does not compute his own tax. The collector does that, based on the facts you place in your return. If you have had withheld from your salary or wages more than was needed to pay your tax he will return the excess to you. If not enough has been withheld he will bill you for the difference owed.

It is important that you attach all your 1948 withholding statements, Form W-2, to your tax return, whether you file Forms 1040 or 1040A.

FORT WAYNE WORKS
NEWS

This nation, under God, shall have a new birth of freedom, that government of the people, by the people, for the people, shall not perish from the earth.

Subscribers Given Renewal Blanks For 'Adventures Ahead'

Teenagers May Receive Free Magazine By Mail; Voltmen In Next Issue

Renewal blanks will be inserted in the March-April issue of Adventures Ahead, it was announced today.

Adventures Ahead is a bimonthly publication for teenagers. The magazine is mailed free to sons, daughters, or other near relatives of G-E employees.

All subscribers must fill out a renewal blank if they want to continue receiving the magazine. These renewal blanks may also be used for new subscriptions. Additional blanks are available from foremen and supervisors.

The blank must be signed by the sponsoring employee, as well as the subscriber, and given to a supervisor.

Stories About Science

Each issue contains stories of new things in the world of science which would appeal to teenagers.

One of the leading articles in the current issue outlines the parts young women play in such General Electric operations as the General Engineering and Consulting Laboratory in Schenectady, N.Y. Other stories include one on how to draw and another explaining how to build a crystal set. The

ABRAHAM LINCOLN

Bill Junk and Sondra Kronmiller, whose fathers work in Bldg. 17-1, stand at the base of a statue of the young railsplitter from Illinois who later became one of our greatest Presidents. Young Abe Lincoln exemplifies the opportunity offered American youth in his pioneer day as well as today. The statue, above, is located in front of the Lincoln Life Insurance Co. building on Harrison St.

76 Employees Share $1,225 In G-E Suggestion Awards

J. A. Haggenjos Tops List With $435; F. E. House Receives $115

Seventy-six employees have shared $1,225 in suggestion awards since the beginning of the year, according to the list released today. John O. Haggenjos, FHP Motor Division 17, received the highest award, $435, for his idea which incorporated a shaft undercutting operation on Brown and Sharpe machines.

Another Division 17 employee, Fred E. House, was next on the list by receiving $115 for his suggestion for salvaging castings. Eighty-five dollars went to Grover F. Rhodes, Specialty Transformer Division 91, for his suggestion on office routines.

For his suggestion pertaining to the third operation on certain stackers and test, Verlin Biggs, Danville plant, received $37.50. Edwin W. Stute, FHP Motor Division 13, was awarded $55 for his suggestion for magazine feed spring supports. Twenty-five dollars went to Charles K. Winans, also of FHP Division 13, for his idea involving the repairing of winding machines.

Those who received awards ranging from $5 to $20 are listed below:

FHP Motor Division 13: Clarence W. Watterson, Anna E. Griebel, Fred K. Vietmeyer, Kenneth C.

(Continued on page 4)

Family Night Will Feature Square Dance

A square dance for G-E Club members will be held Friday night, Feb. 25, in the club's gymnasium, the Family Night committee announced today.

Admission will be by free tickets which may be obtained at the candystands in Bldgs. 18-B and 23-B. Attendance will be limited to 1,000 persons.

All family night attractions are free and are sponsored by the G-E Club. Future programs will include basketball, volleyball, outdoor sports show, and the 1948 World Series movie.

Employees' Store Displays New Remote Control Wiring System

Ray Fischbach, manager of the Employees' store, is shown above turning off the switch on a display board being used to demonstrate the new G-E Remote Control wiring system. At the bottom of the board is the transformer; at either side, the new type of push-button switches, that clamp three to a box; the relay, in the center; and the lamp socket, at the top. Because of the low voltage it is now possible for a person to insert his fingers in the lamp socket without danger of shock.

Attractive switches, a safer system of wiring, and a new conception of switch control are a few of the advantages offered by the G-E Remote Control wiring system now on sale in the Employees' store.

(Continued on page 3)

Valentine Dance To Be Held Tonight At Squares' Hall

The G-E Squares Club will hold its annual St. Valentine's Day dance tonight from 9:30 to 12:30 p.m. in the Squares' hall. Hod Kreigh's orchestra will present the music for the informal dance.

The Squares' Barbershop Quartet stag night will be held Wednesday, Feb. 16, at 8 p.m. Quartets from the FHP Motor, Transformer, Works Lab and general divisions will compete in the contest. The Indiana Tech Glee Club will also be featured on the program.

The Squares' bridge tournament was concluded last Friday night with the following winning top places:

Mr. and Mrs. James Townsend, Winter St., placed first with a total score of 9,750; Mr. and Mrs. Herb Behm, Bldg. 4-6, came in second with 7,920, and Mr. and Mrs. Dick Killian, Bldg. 4-6, were third with a total of 7,580.

Company Prints New Apparatus Handbooks

Patricia Olinger and Clara Richter are shown above looking at the new Apparatus handbooks, which contain complete buying and selling information on the products of the Fractional Horsepower Motor Divisions and the Specialty Transformers and Ballast Divisions.

More than 40,000 G-E customers, distributors, and salesmen have received the new G-E Apparatus handbooks. The project of printing and distributing the books was completed on schedule recently after two months of assembling material.

Edison Day Has Become A Tribute To A Great Public Benefactor

Today the entire nation commemorates the birthday of Thomas Alva Edison.

Born in Milan, Ohio, in 1847, young Tom Edison first revealed his inventive talents at the age of seven, when he set up his chemical laboratory in the cellar of his home.

When he was 12 years old he got a job as train-boy on the Grand Trunk Railroad. Edison's career as a telegraph operator began when he saved the station agent's young son from the path of a moving freight car. Out of gratitude the father taught Edison the new science of telegraphy. By the time he was 17, Edison was "on the road" as a telegraph operator. He drifted from Stratford, Canada, to Adrian, Michigan, and even spent some time in Fort Wayne.

At the age of 29, he went to Menlo Park to make the greatest of his inventions—a successful incandescent electric lamp.

It was in 1892 that the Edison General Electric was combined with the Thomson-Houston Company to form what is now our own General Electric Company.

The many achievements of Edison are too well known to need repeating. Foremost among them were his successful experiments in the science of electricity which provided the groundwork on which the whole vast power industry was built, and which have revolutionized the living and working habits of the American people. Edison Day thus becomes a tribute to one of the greatest public benefactors the world has ever known.

America's Security Depends On The Spirit Of Its People

The Reserve Officers Association of the United States has again planned its traditional observance of National Security Week during February 12-22.

It is most appropriate that the period lies between the birthday anniversaries of our two greatest Presidents; one whose efforts created our country; the other whose efforts preserved its unity.

This week should make us aware of our national heritage and the priceless liberties which we must preserve. It should bring us another thought as well. This nation has never provoked a war. No people on earth is more peaceful in intention. None will do more to achieve a just and lasting peace for all countries. If ever we are again forced to engage in war, it will be because we can find no other means of maintaining those rights and freedoms which make up the American tradition.

The United States must build and conserve its strength. That means, on the surface, that we must have a strong military force capable of dealing with aggressors, and a mighty industrial structure to back it up. But these things, vital as they are, represent a reflection of our strength rather than the substance of it. For the core of this nation's strength and power lies in the spirit of its people.

The spirit is the spirit of freedom. It is based on the knowledge that every American has inalienable rights which cannot be abrogated. The right to speak our minds, the right to own property, the right to engage in a business of our choosing, the right to be free of dictation by government—these and other rights constitute our strength. And that too is the significance of National Security Week.

Safety In Shoes Remove Causes For Many Serious Foot Injuries

Safety reports indicate that a foot injury can cost you full pay for weeks. In these modern times practically everyone believes in and does carry life insurance. They may carry accident insurance too. All of these are very good and should be part of every worker's budget, but he should go even further and relieve himself of the pain, misery and expense caused by accident to the feet.

Workers should not be handicapped in this manner when safety shoes are yours for such a small amount. This is to you an insurance of another sort and you will be removing the cause for an accident. Thin soles are another source of trouble. Keep your shoes in good condition, and by all means wear safety shoes whether your work is hazardous or not.

THOMAS ALVA EDISON

WHAT'S NEW IN G-E PLANTS & LABS

SOMERSWORTH. N. H. — First place trophy in the national 1947-48 safety contest between units of the metal industry for no lost-time accidents during the year was awarded to the G-E plant here by the National Safety Council, Chicago. Man-hours of work for the year, the period covered by the award, amounted to 716,397. In accepting the plaque, Leo P. Hannaway, manager, pointed out that there had been no employee accident at the plant for more than a year and a half, involving 1,342,512 man hours. The plant's accident frequency rate is zero compared to the national average of 7.7 for the industry as a whole.

SYRACUSE—A new single-unit mobile FM transmitter-receiver for communication in the 152-162 mc frequency band is announced from Electronics Park by the Transmitter Division. High selectivity is the major feature of the new unit, designed for use by police, public utilities, taxis, and similar agencies. It operates on 6.3 volts d-c and furnishes transmitter power of 20 watts. The electrical design includes quick-heater tubes in the transmitter; positive action in relays in all control circuits; jacks to measure directly all important receiver and transmitter circuits. The new unit is 8 inches high, 8 inches wide, and 26 inches long, and weighs 46 pounds.

CLEVELAND — Brighter and surer screening of motion pictures is available to users of 8-mm. and 16-mm. projectors as a result of a major improvement in construction of movie projection lamps, it is announced at Nela Park. Engineers revealed that, after years of effort, there has been devised a method of forming mechanically the complex filaments used in the projection lamps, resulting not only in improved screen illumination initially, but also in better light maintenance. The new technique supplants the tedious system whereby an individual's trained manual dexterity could do no better than form filaments for about 80 projection lamps daily. The new construction now applies only to a 500 and a 750-watt lamp, each rated with a burning life of 25 hours, and a 1000-watt lamp, rated at 10 hours.

A new electrical system which automatically controls the weight of an oil-well drilling bit hundreds of feet below the surface of the ground is announced by the Materials Industries Division. The new control consists of a drag generator, an amplidyne-controlled regulating generator and exciter, a main control panel, and an operator's control panel. It can be applied to any kind of rotary drilling-ing operation, electrical, mechanical, or steam. This device is expected to speed up drilling operations by minimizing the number of times the entire drill stem must be wornout drilling bits.

The OLD PHILOSOPHER *Says:*

Long ago when we all were mere children, Valentine's Day was a party-party day at school. Ice cream, cake, and heart-shaped candies imprinted with "I love you," "Be Mine," or "My heart yearns" were part of the delightful tradition.

The highpoint of every party was the big box on teacher's desk decorated with red and white crepe paper frills and overflowing with assorted white envelopes. Almost every little boy and certainly every little girl had watched the gradual swelling of the box for days with great anticipation and no end of trepidation. It was an unwritten law that whoever gained the greatest number of Valentines was the most popular person in the class.

We all sent Valentines to teacher—everyone from her pet to the class dunce. Decorated with rulers and blackboards, the card told of our appreciation and devotion to her. What little hypocrites we were!

The types of Valentines we received were varied. There were the clever ones sent by casual friends. There were insulting comic ones sent by the little boy from whom we had won 76 marbles or from the little girl whose boy friend we had borrowed for awhile. There were the handmade ones, still smelling of paste, with the lace slightly askew. There were the hearts and flowers variety that dripped lace and sentiment.

We've almost forgotten the day a shy little boy slipped a bashful little girl a lace bedecked supplication. With a big smile and a lisping, "Happy Valentineth Day."

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. What fraction of a horsepower can a man exert?

A. Naturally this will vary considerably with the individual. However, a healthy man, driving bicycle pedals attached to an electrical generator, can keep a 100 watt lamp burning for a short time, and this takes about an eighth of a horsepower.

Q. Why does a small jewel in a record player usually sound better than a steel needle?

A. Because the jewel has a smaller mass than the steel needle, it responds more easily to variations in the groove on the record. This gives a more faithful reproduction of the recorded sounds.

Foremen Hear Talk On Leadership

Everett Lindeman and John E. Estabrook are shown above discussing the main points of Dr. Lee's talk with him. Dr. Lee, in the center above, is a member of the public relations department for the General Motors Corporation, Detroit. He was introduced by Mr. Estsbrook.

Approximately 140 members of the Foremen's Association heard Dr. Ralph D. Lee talk on "Leadership and What It Takes" at a meeting Wednesday night, Feb. 2, in Kreis Stoltzenau hall.

A member of the public relations department for the General Motors Corporation, Dr. Lee is a noted speaker as well as an engineer and inventor. At the meeting Wednesday he outlined some of the requirements of being a good leader.

Dr. Lee stated that followers look for the following in a good leader:

One who is not afraid of his job, for his job, of his boss, or of his followers; believes his work is important and is not a slave of economic necessity; enjoys his work; is willing to fight for those who are under his leadership; has the workers' interest at heart; recognizes those under him as fellow human beings; knows most of the answers, but not all of them and will admit it when he doesn't; is predictable; honest; accessible when wanted; can show others how to do something without showing off; will listen to otbers and pay attention to what they are saying; respects others and would never humiliate anyone in the presence of another; knows all that is going on and yet turns his ear against gossip; loyal to himself and the things he is doing; and, uses his authority to promote, demote, correct or protect wbenever necessary.

"All leaders have found in work not only a means for living," Dr. Lee pointed out, "but a reason for living."

He gave the following as signs of good leadership:

"Low voice; slow speech; neat appearance; moderate style; rarely in a hurry; doesn't show all he feels and thinks; looks you squarely in the eye; punctual; rarely interrupts; doesn't tell everything he knows; is easy to meet; never takes himself too seriously, and really likes the people he meets."

In conclusion, Dr. Lee added, "There never was a human being, no matter how great a leader, who was absolutely perfect."

Dr. Lee was introduced by John E. Estabrook, Assistant to the Works Manager. The election of officers was held following the talk.

Following their election, the new officers of the Foremen's Association held a short powwow session to discuss plans for the coming year. They are, left to right: Edward Hesher, director from the Decatur plant; Joe Wyss, Taylor St., vice president; Ewald Steinsmuehlen, Taylor St., director; Fred Pyle, Bldg. 4-1, treasurer; Everett Lindeman, Bldg. 4-3, president; and Leon Bond, Bldg. 26-3, secretary.

Employees' Store

(Continued from page 1)

This recent development of the General Electric Company opens up an entirely new conception of light and outlet control.

A remote control system is a method of wiring which has controlling devices, such as relays, at the equipment which is to be controlled and auxiliary means to operate the controlling device. A dial telephone system is probably one of the best known remote control wiring systems.

Low Voltsge

The G-E Remote Control system works on a similar principle, but is designed to control lighting, convenience outlets, or small appliances in home or office, factory or fsrm. It consists of low-voltage, 25 volt relays with built-in high-voltage, 115 volt switches, and low-voltage controlling switches.

The relay, a simple device of small dimensions, is mounted at the light or convenience outlets which it has to control; the low-voltage switches are installed in all locations where regular switches were formerly used. In this way, a light or convenience outlet can be controlled from any number of points, without the use of comparatively high-priced three- and four-way switches and large quantities of three-conductor and four-conductor cables. To obtain the low voltage, it is necessary to install a small transformer, slightly larger than a standard bell transformer, somewbere on the premises. One transformer can be used for many relays and control switches. Only one is normally needed in the average home.

Switches are so easily installed that tbe addition of one switch or many does not present any problem. It does not make any difference whether a light or a number of lights is to be switched from one, two, or ten points: always the same type of switch and the same type of wire is used. There is no use for special cables like those normally needed for three-way and four-way switch hook-ups; on the contrary, all switches are wired solely with an annunciator type of No. 18 Awg wire, which is easy to handle, very low in cost, and hsrdly noticeable should it be installed on the surface.

Many Advantages

The switches are very small, attractive looking, of simple, long-lasting design, and cost but little. They do not need large switch boxes to be mounted, and eliminate the use of wallplates and other accessories. Only one type of switch is installed, no matter how many control points are needed.

The system is safer than the ordinary method of wiring. Since the switches are connected to the harmless voltage of 25 volts, the danger of shock is completely eliminated. This is especially important where switches have to be operated from wet floors, around sinks and lavatories and in bathrooms.

Due to its economy, the remote control system permits an entirely new conception of switch control. With this system, it is possible, st a reasonable cost, to have three and four controls for certain lights or outlets where formerly the cost of installing more than a single switch would have been prohibitive.

Trsnsformers Msde Here

The remote control system consists of the relay, which is of split coil design: one coil to close the 115-volt circuit, the other coil to open the 115-volt circuit; the switch, whicb is a SP, double-throw momentary contact switch which is normally open; the conductors, which are either two or three No. 18 solid conductors; and, the transformer. The transformers recommended are G-E 72G4 or 72G14, which are made here at tbe Fort Wayne Works by the Specialty Transformer Division.

Not Subject To Restrictions

The remote control system, using low voltage, is not subject to the same code restrictions as the conventional system. Because of its inherent safety, installation is simplified. The low-voltage system can be short-circuited at any point, without danger to the installation of excessive beat or fire.

The G-E Remote Control System is equally adaptable to old or new construction.

Bangert Named Assistant To FHP Purchasing Agent

R. E. Bsngert

R. E. Bangert has been appointed Assistant to the Purchasing Agent of the FHP Motor Divisions.

An apprentice school graduate, Mr. Bangert began working for General Electric in 1931. He then went to Bldg. 4-5 in 1936 as a toolmaker. In August, 1936, he transferred to Bldg. 4-6 as a clerk. The following year, he became a tool and equipment engineer in Bldg. 4-4.

Mr. Bangert, on Jan. 24, 1938, became a machinist in Bldg. 4-5, and in November of that year transferred to Bldg. 19-3 as a planning engineer. He later became a dispatcher until 1940 when he entered the Company's Production Training Course in Schenectady.

In 1941 he returned to Fort Wayne as a production clerk in Bldg. 18-4. He also did subcontracting. He then worked on subcontracting in Bldgs. 4-6 and 6-2, and at one time was Supervisor of Subcontracting in Bldg. 4-6. On March 31, 1947 he became a section leader in Bldg. 18-4 and last year was section leader in the Purchasing Division, the position he held prior to his recent appointment.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Here we are again and things are still booming in Bldg. 26-1. We have a fellow wbo enjoys drawing pictures and printing on all the trays that come down the conveyor. He can draw almost as good as any 6th grade child. He is none other tban McConnehey. Anyone wishing to make Mac happy just give him a piece of cbalk. . . . We also have a big butter and egg man in our midst. More eggs than butter, I understand. Bill Edmunds is supplying half of the factory and office force with eggs. . . . "Gorgeous George" Barker has just returned from his tour at Winter Street. . . . Jake Fullner became tbe father of a bouncing baby, 7 pounds, 13 ounces. Congratulations, Jake. . . . Now that Ed "Hop-along Hotspurs" Parker has his own radio program we suggest tbat he get bimself a supply of autographed pictures. We hear that a fan club has been organized. . . . One of our truckers, George Schafer, will probably be recognized by the National Safety Council for having the best set of brakes on bis automobile, even when compared to those on the late model cars. . . . Some more picturesque characters in the punch press section have been receiving three valentines quite early this year, and these people are being referred to as "politicians." Yes, men, Gamblers and even Clock Watchers. We still wonder why Fred Thieme and Gerald Crum don't follow suit and display their greetings by posting them some place where all the boys can see tbem. . . . Sam Rhoades' luck is still holding out as he got a fair sized return from a small investment he made one day last week. . . . That sly old fox Robert Bunyan came out of the deal with free ice cream, as he always refuses to lose at his own game. . . . If you have any old cuff links bring them to work. Ralph Milligan, our ex-G. I. antique collector, is paying a high price for them. . . . We would all like to express our deepest sympatby to Paul Conrad upon the death of his fatber.

Offer Home Demonstrations Of G-E's Flatplate Ironer

A free home demonstration of General Electric's flatplate ironer is now being offered to all those not familiar with its operation.

Mrs. Darrel Wilson is conducting the demonstrations through the sponsorship of tbe Schueler Appliance store, Fairfield Ave. Mrs. Wilson's husband was a former G-E employee.

The ironers are on display and may be purchased at an employee discount at botb Schueler's and Wolf & Dessauer's.

76 Employees Share $1,225 In Suggestion Awards

Haggenjos Gets $435

In the above picture are Arthur Luessenhop, John O. Haggenjos and Carl Sorenson, FHP Div. 17, looking at the application of the suggestion that netted Mr. Haggenjos $435 in a suggestion award. His idea incorporated a shaft undercutting operation on the Brown and Sharpe machines.

New Idea Merits $85

Grover F. Rhodes and S. A. Macy, Specialty Transformer Div. 91, are looking at the file cards effected in Mr. Rhodes' suggestion to change the office method of handling record cards. This suggestion was worth $85 to Mr. Rhodes.

Company Prints

(Continued from page 1)

One hundred tons of type was used along with 11,176 engravings to print 41 million sheets of paper. Stacked in one pile, these sheets would be 1,889 feet high, well over three times as high as the Washington Monument. In all the books there are more than 9,800 pages of information, three times as many pages as in Webster's Unabridged Dictionary. To publish the handbooks on schedule, nine typographical houses, nine engraving firms, 14 printing houses, three binderies, and one electrotype foundry cooperated.

Several of the books showing the products made at the Fort Wayne Works are shown in the photograph. One handbook contains a complete listing of standard fractional horsepower motors; such as general-purpose motors and motors for pumps, fans, blowers, oil burners, stokers, and hair dryers. The other book includes a complete listing of specialty transformers; such as Types M & D, control and signal, machine tool, automatic voltage stabilizers, ignition transformers for oil burners, transformers for electronic applications and ballasts for fluorescent, mercury-vapor and uviarc lamps. The booklets on the table contain complete selling information on specific products. They are inexpensively prepared from existing handbook information.

The handbooks enable G-E salesmen to quickly and efficiently price and sell any of the thousands of G-E Apparatus products from ballasts and fractional horsepower motors to turbines and cyclotrons. The streamlined, easy-to-read handbook also offers an added inducement to customers of General Electric.

(Continued from page 1)

Miller, William A. Sivits, Ardell W. Hambrock, John Wood and Charles H. Bell.

FHP Motor Division 14: Fred H. Vogt.

FHP Motor Division 15: Vergie Stephen (two awards), Thyral L. Neu, Forrest R. Allman, Paul F. Boyer, Lloyd Ernst (two awards), Forest E. Monroe, Charles Dingman, Park E. Schemchorn, Edwin C. Rodenbeck and Lewis H. Hutchinson.

FHP Motor Division 16: Garland K. Keister (two awards), Donald H. Witte (two awards), Charles H. Francies, Geraldine I. Snyder, Herb Halley and Paul E. Beaver.

FHP Motor Division 33: W. H. Mills, William Decker, Lawrence A. Baker, Donald F. Thomas, Joseph E. Quinlan and Herman T. Ambrose.

FHP Motor Division 10: William W. Johnson and Raymond J. Stout.

Tiffin Plant: Russell L. Semer, Gilbert E. Theis, John A. Burkhardt, Everett F. Crum, Richard A. Reamer, Donald W. Shutt, Dora Jumper and Lucille Mount.

Specialty Transformer Division 91: Owen R. Allen, William Swander and Harold Jamison.

Specialty Transformer Division 93: James E. Quinn, Lavona Porter, Margaret Reynolds, Levi C. Carpenter and Clifford P. Thompson.

Specialty Transformer Division 95: Dale F. Stuckey, Agnes M. Jump, Raymond R. Crippen and Betty Jean Sapp.

Danville Plant: Verlin L. Biggs, and Wilson D. Halls.

Motor and Generator Division: Margaret Fletcher, L. W. Griffith, Philip E. Lydy and Frank A. Fordham.

General Tool Division: William M. Lipp.

Miscellaneous: Virginia E. Worden.

Decatur Pensioner Dies In Hospital

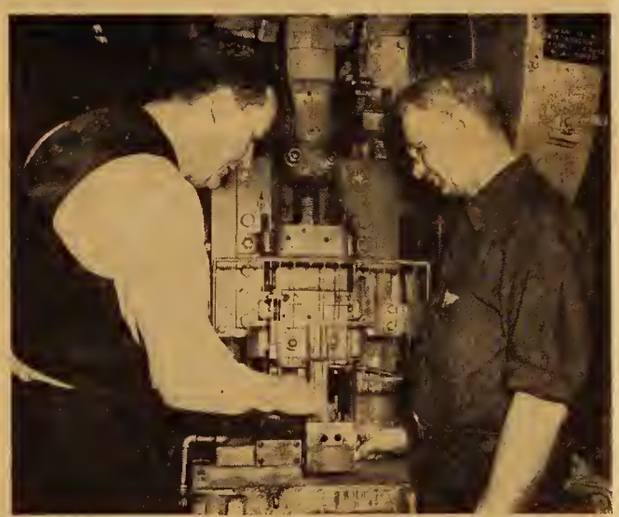
Agnes E. Conter, 63, retired Decatur G-E employee died at the Adams County Memorial hospital Wednesday, Feb. 2, after an illness of more than three years.

Miss Conter started at General Electric in February, 1924, and retired because of ill health in February, 1945. Prior to her retirement Miss Conter was active in GeCode Club activities.

She is survived by a sister, Christine Conter.

Funeral services were held Saturday at St. Mary's Church.

PARTIZANS TO SPONSOR KAFFEE-KUCHEN DAY



The Partizan Chapter of Elex will sponsor a Kaffee-Kuchen Day at 2:15 p.m. Thursday, Feb. 17. At that time there will be homemade coffee cake sold at Irene Meyers' office in Bldg. 8-2. Anyone desiring to purchase a cake must make arrangements to pick up the cake before 3 p.m.

House Receives $115

Fred E. House, FHP Motor Division 17, received $115 for his recent suggestion on a better method of salvaging castings. The picture above was taken at the time Mr. House received his award check. Left to right are R. C. Dennison, Supt. of FHP Motor Division 17; Mr. House and A. L. Nicholson.

Suggestion Brings $55

Edwin W. Stute, FHP Motor Div. 13, recently received $55 for his suggestion to make a magazine feed for a spring support instead of hand feeding. Basil Bowley, left, and Mr. Stute are looking over the application of this suggestion.

Subscribers Given

(Continued from page 1)

latter article was written by Charles E. Ream, supervisor of the mechanical section in the Fort Wayne Works Laboratory. He has also written a subsequent story telling how to add a one-tube amplifier to the set. This article will appear in the March-April issue, which will be mailed the second week in March.

Voltmen Are Featured

The next issue will also contain a story about Fort Wayne's Voltmen. The national semipro champions are introduced to G-E teenagers in a story titled, "Two Down —One to Go."

The story of Gerhard Neumann, Lynn River Works, is one of the leading articles of this issue. Mr. Neumann has the unusual distinction of being a citizen of the United States by act of Congress.

He fled Germany, went to China, became identified with the "Flying Tigers," joined the U.S. Army Air Force, was voted citizenship, and then went with his wife on a jeep trip that started at Hong Kong and ended at Palestine.

Another interesting story is "Salute from the Isle of Capri," which is about Henriette Dorris, an industrial nurse at the Erie Works. While a Captain in the Army Nurse Corps during the war, Miss Dorris did such outstanding work among the children and mothers on the Italian island of Capri that the island's mayor asked the Army to let her remain. Pictures from her own photographic album illustrate this article.

I Greet My God

However wearily at dawn . . . I leave the Land of Nod . . . I never greet the world before I say "Good-morning, God" . . . And when tbe day is done and I . . . Have reaped my just reward . . . I never go to sleep until . . . I say "Good-night, O Lord" . . . Because there is no surer way . . . To keep in constant touch . . . And though my eyes are weary I . . . Can do at least this much . . . And whether I am glad or sad . . . And skies are bright or dim . . . It is a way to dedicate . . . The day and night to Him . . . My happiness is in The Lord . . . Who solves my every plight . . . And that is why I always say . . . Good-morning and Good-night.

By James J. Metcalfe.

Last Friday we received word that Josephine Foster had died. To the family we wish to express our deepest sympathy. . . . Also Chester Degitz, a co-worker, who has been ill for the past few months, died last week. To his family we express our sympathy. . . . We understand the "Gutterball" last week mentioned several guests who were present at a party for Carl Langas and his wife. However two couples, Mr. and Mrs. Voltz and Mr. and Mrs. Wilson who had quite a lot to do with arranging the party, were not mentioned. You're slipping, boys. . . . Meredith Trout came to work wearing two different socks, but he insists he had the mates to them at home. Seeing is believing. . . . We hear Bill Weber had asked his wife to mail a pen to a certain company for repairs and when he asked his wife if she did, she replied, yes. Later that day Bill found the pen on the desk, so after contacting the postmaster the empty box was returned. . . . We wonder why Elmer Buuck has decided to give up smoking? At least at home, anyway. . . . Arlo Hawk fell asleep the other night on the davenport at home, and at 12 o'clock his wife called him to come to bed. But Arlo seemed quite confused and went upstairs to dress for work. Was he surprised when his wife informed him of the time. . . . Betty Harrold has a certain "glow" these days. She has set the day for Feb. 12. . . . "Doc" Les Greene has been giving some good advice for curing colds. Sitting on the ice is one way to catch them, Les. Know what we mean? . . . Ask "Mac" how he likes making "Sorority Contacts." . . . Congratulations to Mary Rueswald, who has a baby boy. Michael Jay is his name. . . . If anyone hears Ina Armey giving out with a certain kind of "lingo," don't become alarmed. She is learning to speak Spanish. . . . Lucy Whitlock was so sleepy the other morning she sliced her fingers instead of the ham she was preparing for her breakfast.

Who remembers when parents could wait up to kiss the kids good night and still get to bed at an early hour?

Concert Choir Appears At Elex Meetings

The Indiana University Men's Concert Choir sang at two programs for the Elex Club last Monday, the first at the Y. W. C. A. for a luncheon meeting of the night girls and the other in the evening for the day girls. The program was varied, including selections from the classics, spirituals, as well as popular songs and novelty numbers.

In the above picture are the choir with relatives of some of the boys who live in the surrounding area. Left to right are George Krueger, choir director; Forrest Mulvane from Ossian and former G-E employee; his mother, Mae Mulvane, a nurse in Bldg. 21; Mrs. Cora Revert, mother of Glen Miller, a former G-E employee and native of Yoder; Mr. Miller; Mrs. Miller; Mrs. Howard Horn; Leonard Horn, the only member of the choir from Fort Wayne; Mrs. Sally Ross, and Harold Ross from Garrett.

Did you hear about Butch Vegalues losing his billfold the other week-end? Butch spent a couple of days in Toledo and while there lost his billfold and a pack of tobacco. Some honest fellow found the "moth haven" and returned it to him, but Butch wasn't satisfied because he didn't get his tobacco back. The latest report is that the guy in Toledo is sending Butch 15¢ to cover the loss of the tobacco. . . . We wonder if the boys in the drafting room are collecting those pipes as a hobby or is it a profitable business. Wiley Shockney prefers the unfinished kind while "Hoot" Gibson goes in for the more beautifying type, such as the one he wears around his neck, with the deep bowl. . . . You should have seen the look on Tez Trump's face the other night when he went all the way out to the parking lot for his car and suddenly remembered he had taken it to the garage that day. . . . Will someone please explain to Roger Pierson just how Sonja Henie "twirls"? Rog says she twirls on her toes. Erv Huth says if she did she'd bore holes in the ice, and the rest of us just wish they'd forget the whole tbing before we all go "nuts." . . . If you read that write-up in Lines and Angles about Dorcas MacKay, you couldn't help but chuckle—just a chip off the old block. How about it, Charlie? . . . Elton Swank has sure been having luck ice fishing. Every time he goes he always brings back at least 15, that is when they're biting. . . . Did you know Bill Altekruse was a valentine? That probably accounts for those "taking ways" of his. Anyway, happy birthday, Bill, and to Lois Ulrey and Oscar Rodenbeck too.

H. O. Telley Dies In New Mexico

Herbert O. Telley, 30, died at 5 a.m., Tuesday, Feb. 1, at his home in Tucumcari, N. M., where he had lived the past year and a half. He was employed by the Fort Wayne General Electric in 1937, working in Bldg. 17-1. He left the Company in 1945 to enlist in the Navy, and upon his discharge was re-engaged to work in Bldg. 4-3. He was working at Taylor St. when he moved to New Mexico for his health.

He was a member of St. Patrick's Catholic Church and its Holy Name Society.

Surviving are his wife, Florence, two sons, Patrick and Michael; his parents, Mr. and Mrs. G. E. Telley, and a sister, Mrs. Gustav Schmiemann.

This week we say farewell to Bernie English and Louie Starr. Bernie is going into the tool room in Bldg. 19, and Louie is going on pension. To both we wish good luck and say that both will be missed very much. . . . Now we have heard of girls swapping clothes but men seldom do, however Larry Gase decided that Paul Merkey's coat would look better on him than his own, so he swapped. The only thing is, Larry is short and wide where Paul is long and thin. . . . It was a swell wrestling match, or was it? Don't ask the time clerks in the office. They were all set for a large evening at the arena, but just like a woman one of them was slow getting ready. When they got there they couldn't even get in the door, so they proceeded to the apartment of Joan Toderoff and really had a good time eating hamburgers. Those enjoying the "Burgers" were Eveleen Bennett, Laurel Weaver, Eileen Hennen, Dorothy Askren and their hostess, Joan Toderoff. . . . What is this we hear about Harry Chism house hunting, and in the country too. Maybe he thinks like the rest of us city farmers that at least he will be eating regularly.

Bud Lindeman has taken up needlework. If you are interested in taking lessons, prices will be reasonable. . . . Some men never know when to stop. We are told Virgil Nash has taught his wife to run the bulldozer. It probably was Virgil's bulldozing that put her in the mood. He told her she could earn lots of extra money in her spare time. How do you do it, Virgil? . . . Belated birthday greetings to Harley DeWitt, Cletus Lothamer and Bill Stearns. . . . Congratulations to Bill Skinner, who was the recipient of a Coffin Award. Nice going, Bill. . . . We welcome Joe Goodman to Wire Cost. Hope you like us, Joe.

Insulation News

Congratulations to all employees of the Insulation Section for their splendid safety record. You have not only come through with no lost-time accidents for the year 1948 but have also saved someone from many hours of pain and suffering. Last but not least for this reason that good old weekly pay check wasn't short. Keep up the good work, gang. Practice and work as safely in 1949 as you did in '48. It pays to cooperate with your Safety Committee. . . . Phyliss Braun and Irene Stucky thank their co-workers for that swell dinner. Sorry to see you leave, girls. . . . Welcome Elaine Allen and Josephine Balsamo to our Insulation Office. We hope that you find working with us a real pleasure.

Starr Receives Retirement Gift

The friends of Louis Starr, Bldg. 17-3, gave him a goodbye gift on the occasion of his retirement last Friday. In the picture are, left to right: Verne Castle, General Foreman; Harry Starr, Harry Chism, foreman; Jessie Wilcox, Ray Johnson, Ray Miller, Ralph Meschberger and Henry Pliett.

Last Friday Louis Starr folded his apron, dusted off his work bench and bid us all goodbye. He is exchanging a clock card punching life for one of ease. Best of luck, Louie, and may you enjoy all the things you have said you were going to do when you didn't have to work anymore. . . . Did you see that big smile of Martha Arnel's this week? She is a brand new grandmother. . . . Dorothy Johnson is now honorary Fire Chief of Maumee Avenue since the big fire last week. . . . I wonder if we went over to see Rose Dowling if she would give us a ride in her new Packard? . . . Mary Wright likes to cook so well she even brings her cookbook to work. . . . Francis Eckrote says Mary Shumm and Virgie Mayer are poor hostesses. After asking her to have lunch with them, they let her to go by herself. . . . Lucille Allen has been making old Hap Hazard's eyes glitter by taking a tumble. It wasn't Hap that helped her up either. . . . Willa Williams, our matron, invited some of the girls to a sacred concert at the St. John's A.M.E. Church. Those attending report a wonderful concert and appreciated the invitation. . . . Happy birthday to Mary Foster, Doris Ryan, Martha Rice, Ralph Armey and Madalyn Briggs. The 80 frame group had a potluck on Mary's birthday. A few friends helped Doris celebrate her birthday. . . . It's "hello" to Elsie Klemm, Clara Dixon, Alice Robinson, Bertha Furge, Ruth Troyer, Lela Schaper and Ada Byerly. They have all joined the early bird shift. . . . Tomorrow is the big day for Anne Chomey when she says that all important, "I do." We wish you lots of happiness. . . . Our sincerest sympathy to Mary Foster and Bertha Furge in the death of their fathers.

Magazine Article Describes Layout Of Tiffin Plant

The layout for mechanization of materials-handling at the Tiffin, Ohio, plant is described in an article by George W. Auer, Tiffin Plant Manager, that appeared in the December issue of "Factory Management and Maintenance," a McGraw-Hill publication. The story, titled "Mechanized Handling Brings Two-Week Inventory Turnover," contains three pages of photographs illustrating the stator and rotor lines at the plant.

"I run things at my house" declares Herschel Smith. (Yes, probably the lawn mower and the washing machine.)

Welcome to Ruth Dingman, test engineer, who has been spending some time in the Personnel Division recently. We hope you enjoy your short stay with us, Ruth. . . . We congratulate Herschel Smith and all who had a share in making the new Safety Booklet such a success. . . . Minnie Fryback celebrated her birthday in a big way last week. The dispensary group remembered her with numerous gifts which made a lovely display when they were arranged on a card table. . . . The girls in Bldg. 21 would especially like to wish a belated birthday to their friend Anne Murtaugh, formerly a nurse, who is now a patient at the Irene Byron. Anne was employed at Decatur, but, of course, had many friends at the Employment Office. The group here is very alert to do any little thing they can for Anne, and would like her to know they are thinking of her often. . . . . Doris Dreyer is a little ray of sunshine this week—Walt is home. 'Nuff said. . . . "Mrs. Catt says war can be talked to death. If that is true, Mrs. Catt has her mission in the world, and there is no reason why she should not proceed."

Ethel Koontz enjoyed the circus Sunday, especially when the elephant did its dance. We sure thought you were grown up, Ethel. . . . Jerry McKnown had to go fishing twice over the week-end to get a few fish. . . . Chet Carey reports he sat for eight hours and finally caught fish but too small to even keep. . . . We're happy to have Arvedia Neal and Emma Vaughn back with us. . . . Maxine Jones came in Monday morning with a new short hair-do, and we all think it's very becoming to you, Maxine. . . . Tommy Williams sure had her tough luck. She started out to the car for work with both hands full when all of a sudden she sat down on the ice. She didn't think so much about that but when she got here in the parking lot and got out of the car she thought she felt a breeze and when she looked she decided to go home and get more clothes to replace those she tore. . . . Ruby Allen attended a birthday dinner for her daughter. . . . Ernie Raypole came into work last week, his chest twice the size because his basketball team had won the league championship. Later we found out Ernie didn't play, he just carried the water and threw in the towel. . . . Harold Mosshammer is fishing just like he hunted rabbits; no evidence to show.

Letter No. 1. To Any Policeman It May Concern: If my lifeless body is found jammed head first into a wastebasket, some dark night—the editor of this paper is an accomplice before the fact! It figures—and here's how. The blue-pencil boy is always after we columnists to get people's names into our penmanship practice. We may fancy ourselves as a budding de Maupassant, but, he thinks of us as nothing but a Winchell! Do we rebel? Well, no. You see, the Boss' letter assigning us this task is beautifully framed in our mind—so we use names! For instance, we used the name Ann Wade in our column a number of times. Now, that was fine—until one day Miss Wade came around and threatened us with all kinds of dire consequences, unless we stopped publicizing her exploits. And that's only one instance. We've had similar threats from Harry Dolson's wife, Mr. and Mrs. F. Ondrovik, and practically everyone else whose moniker has appeared under our byline! So here we sit, between the devil and the deep-blue sea—and after consuming three packs of Luckies, we still do not feel our level best! Our problem, Dr. Anthony, is this: How can we use people's names (to satisfy our editor) without using people's names (in order to stay alive)?

Letter No. 2. To Bud Nesvig and Johnny Plate: Fellows, we haven't known you as long as some of the office staff, but believe we speak for all in saying, "We hate to see you go." To this columnist, you've both been good friends and grand sports. Since this may be the last one of these things you will read, we want to wish you great success and much happiness in your new adventures.

Letter No. 3. To the Entire Staff: We won't discuss how he acquired them, but Andy O'Dwyer returned from the NESA show with the largest collection of "gimmicks." If you haven't already seen them, contact Andy, and we're sure he'll be glad to arrange a private showing. But, let us remind you—adults only!

Letter No. 4. To Ray Rogers, the Super Impersonal Salesman: We think your efforts to cram Valentine Dance tickets down the throat of a certain young bachelor test engineer, in view of the noble cause, is O. K. But, we strongly object to your tactics. Reducing our local beauties to a position of having to scramble for the coveted honor of attending said dance with said T. E. Tsk, tsk, tsk! If you could have seen Avanel's tear stained cheeks as she crawled on her hands and knees to my desk, and sobbed out her pitiful story about how Sam had cast her aside, in favor of Ann, I'm sure you would have repented your selling tactics. As suitable punishment, we suggest that you furnish one exclusive item to this reporter for the next seven consecutive weeks.

A professor says grade school teachers should know 4000 words—and Junior says "study this at home" should not be among them.

Gregory Honored On Retirement

On the occasion of his retirement, friends and co-workers of Herbert Gregory, Bldg. 22, gathered to wish him good-bye and to present him a gift. Left to right in the picture are Farrell Hill, Clarence Miser, Louis Fox, Floyd Brown, Forest Sutter, Waymon Morton, John August, George Winan, Jacob Mattes, Charles Nord, Edgar Ball, Mr. Gregory, Emery Cramer, Louis Meyers, Guy Carnes, Ralph Garrett, Charles Castle, Adam Farrell, General Foreman; Erwin Jurgens, R. M. Hartigan, Manager of Motor and Generator Manufacturing; Donald Voorhees, Rowland Braun, Oliver Miller, Al Mason, Foreman; and Roy Brimeyer.

Celebrates Eventful Month

The month of February has been an exciting one for Charles Schild, Foreman in the FHP Motor Development Div. 33. Last Friday he received the Coffin Award for his accomplishments in the operation of the Developmental Shop. This was also the day he left General Electric for vacation and finally retirement on the Company's Pension Plan. For a finale he will celebrate his birthday, Sunday, Feb. 13.

In the above picture are Mr. Schild and several of his associates looking over the various gifts he received as retirement presents. The outstanding gift was a model desk and chair complete with a miniature of Mr. Schild. It was made by the employees in the Model Shop. Left to right in the picture are Ida Witte, Clara Gehring, Ruth Baker, Bill Hurtt, Mr. Schild, Ross Harter and Jim Smith. Don Baker, who made the figure, is holding the model of Mr. Schild, at the right.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

The "For Sale" sign has been hung in the Service Bureau. Audre Waltze is selling miniature crocheted hats to be used for pin cushions and crocheted chickens that fit over eggs which will be just the thing for the kiddies at Eastertime. Louise Klinker is selling boxes of everyday cards which are very nice. . . . The Specialty Transformer and Ballast Divisions are very proud of M. O. Marsh who was one of the four Fort Wayne employees to receive the Charles A. Coffin Award! . . . The welcome mat is out in Purchasing for Bernard Christie. . . . The Drafting Section is going to buy M. Cox's latest engineering book, "How to Start a Fan," for Wayne "Buzz Bomb" Bergman. . . . Barbara McGuire of the Service Bureau has been on the sick list for the past two weeks. We all miss you, Barbara, and hope you get well soon. . . . Congratulations to M. W. Sims and E. J. Zelt who were granted patents recently. . . . Would anyone like to donate a small sum of money to buy Ruth Fields a new dictionary? She seems to have made a dreadful mistake while typing the other day. . . . C. A. Ellis and his secretary, Ruth Ehrsam, have finally found a permanent office. They are now located in the Main Office of Bldg. 26-2. . . .

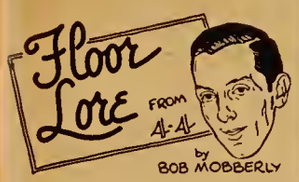
Roses are red.
Vlolets are blue.
If you don't send your girl a
Valentine.
She won't love you.

It's just about as easy to find an argument as it is to lose one.

All people worry because they are either married or single.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty



ODE TO RUDY

There is a man named Rudy.
Who tries to do his duty.
But whenever he is late
He blames his Ford V-8.
He knows his money is sunk
In a pile of junk.
The shiftless skunk.
And that's no bunk.

Leroy Cook almost did himself brown one day. His apron caught fire right on the tummy, and Roy did a lot of fancy dancing to put out the conflagration. . . . Henry Becker almost went home with one of those artificial tails hung on him last week. Henry threatened mayhem if it happens again. . . . Frank Elder has a job playing a horn at the Shrine Circus, at least that's his story. Some of the boys claim he is substituting for an indisposed elephant. . . . What connection is there between Frank Enderle and the alleged F.B.I. man who interviewed him at the gate house recently? . . . It sure doesn't take a man long to get into the dog house with the little woman, as Glenn found out not so long ago. Glenn was getting ready to retire, and during the process was chatting with his wife. He glanced casually out the bedroom window, lo and behold his startled eyes alighted on a damsel in the neighboring house, who had neglected to pull down her shade. The Mrs. whose back had been toward the window, scented something amiss, veered around and right then is when Glenn entered the dog house. We can't figure out just what crime Mrs. G. charges Mr. G. with for exiling him to his canine Siberia, but a woman doesn't always need a reason, I guess.

Some men can't get along without a woman—until they get one.

Happiness is not given; it's exchanged.

Although we didn't go out and keep a vigilant watch over a groundhog's lair, we know that when the perennial bewhiskered woodchuck came forth from his subterranean bedroom, he saw a shadow black enough to last until June—which time it will probably be before it is warm! . . . Dot Swank really acquired a wonderful sun tan! A genuine "made-in-Florida" tan from Miami to be specific, where she spent a wonderful vacation. . . . To return to reality, or Indiana actually, we noticed Edith Venrick checking her ice-grips which fasten to her shoes to make certain they were sharp. . . . John Bechtol became grandfather again last week. Congratulations, John! . . . Things there should be more of: The way Margaret Parisot greets you with that cheerful "Hello." . . . We bid farewell to three swell fellows this week, Martin Vogel, Dave Miller and Bernie Kelker. Here is wishing you all the very best of luck in your new jobs. . . . We understand that Florence Behrens doesn't care for pink as a color, especially the shade of pink the traffic bureau uses on their overtime parking tickets. . . . We put out the welcome mat for Carl Reeves, who is a newcomer to the office. . . . Our parting thought: Vice itself lost half its evil, by losing all its grossness.

Fractional Fiction 4-5

By Elaine Sutter

A wonderful spirit was shown by the employees of Bldg. 4-5, when misfortune struck Gladys Groh's home. One hundred and six dollars was presented to her. Gladys was very appreciative and thanks everyone from the bottom of her heart. . . . We were very sorry to hear Harry Brunner died Thursday, Feb. 3. Harry retired from our floor in 1945. He had many friends and we will all miss him. . . . Co-workers of Bernice Lund were wondering if she knew the postal rates increased instead of decreased. She sent several letters with no postage at all. . . . Ed Rodenbeck's two and one-half year old son sure is learning fast. Ed tried to take his picture, but Sonnyboy showed him instead. They snapped pictures but not sure of what they took. . . . If any of Norma Werling's friends hear her use big words it is because she looks up a new one every day. . . . Pete Macke's 15-year-old son had a birthday recently. Pete thought he would turn him across his knee. Results: Pete sprained his back. They do grow up. . . . The KC lines welcomes Elmer and Neil Anderson to their division. The aircraft girls welcome Helen Struver and Ruth Gunn to Bldg. 4-5. . . . We have talent on our floor. Dessie George is the girls' hair stylist, and Rose Moody is the songstress. . . . Dale Fredricks and Roy Woods had an unusual contest. They both planted a tomato seed to see who could grow the tallest plant. Dale won and Roy paid the bet, buying Dale's dinner. . . . Pauline Taylor's husband has his own band and makes Red Bird records. . . . Happy birthday to Marie Hayes, Delores Gladback and Don Coolman.

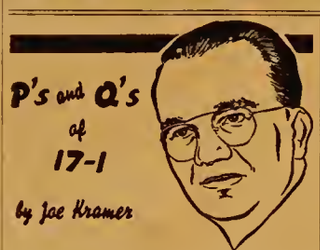
Retires Under Pension Plan

Rosella Chambers, Taylor St. Plant, recently left to retire on the Company Pension Plan. On her last day at work, her friends in FHP Division 17 gave her a send-off by giving her a farewell gift. In the above picture, left to right are: Sarah Moore, Ralph Hare, John O'Neil, Clarabelle Castle, Morris Roe, Gladys Pantizan, Dale Ross, Louis Kurtz, Darrel Dennie, Rosella Chambers, Ted Budecki, Thomas Cannon, Zella White, Clark Holmes, Hugh Johnson, Clarence Morris and Art Hubler.

Taylor St. Employee Dies Last Friday

Mrs. Josephine W. Foster, 38, died at 7:45 a.m. Friday at her home, 528 Fairmount Place. She had been employed at General Electric since 1929 and at the time of her death was a coil placer at Taylor St. She was also a member of the United Brethren Church at Ossian.

Surviving are a son, Raymond, of Avilla; a brother James W. Confer, of Avilla; five sisters, Mrs. Alda Rybolt, of Avilla, Mrs. Louis Herman, of Yoder, Mrs. Mary Kumfer, of Markle, Mrs. Florence Droege, of Waynedale, and Mrs. Vergie Woods.



Services were held at the D. O. McComb Funeral Home, Sunday, at 1:30 p.m. and at 2:20 p.m. at the Ossian Methodist Church. The Rev. Paul Parker officiated and burial was in Oak Lawn Cemetery.

Apprentice BROADCAST

By Eugene Werling

This past week was ideal for the ardent ice fishermen of the school. They all talked about going more than they did about the fish that were caught. I wonder why? Some people had luck from the report on rumors but Aughinbaugh claims they had an early start. Dick White lined up the Paul Bunyans of Bldg. 12-2 and had a tree-cutting party Saturday morning. Those present were Chappel and Zurbuch. One of their main objectives was to look for bait but that proved fruitless. They arrived at Hamilton lake about two o'clock and left before dark without any fish, then on to Fox lake where they really were hitting. The grand total of fish, after they were carefully counted, was three for Chappel, one for Zurbuch and none for White. The reports aren't completed yet since Mort hasn't compiled his total taken on his new ice poles. With all that equipment, Howard, you shouldn't miss. . . . Congratulations to Berdell and Mrs. Smith on the birth of a baby girl. All three are doing very well. The theme song for the toolmakers and draftsman next week will be "Smoke, Smoke, that big cigar." . . . Carl Hubartt is the most talked about draftsman this week. Carl is the proud papa of a fine baby boy. Congratulations to Carl and Joan. We hope you get along fine. Dennie won't be lonesome now. . . . None of the other boys have accomplished as much as Carl this past week but they are still doing their best. The volleyball team claims they have at least gained the support of the other team in the cheering department. But they don't let down any in play when the draftsmen meet them. The won and lost column still remains the same. . . . It's getting close for the draftsmen to shift, so the boys keep pretty busy spreading rumors. Each guy makes one up with his own version and then they begin to spread. Of course, just the good ones keep going around and the others drop by the wayside.

Nothing is so good for an ignorant man as silence; if he were sensible of this he would not be ignorant. . . . We're glad to welcome Cliff (Tidy) Combs back after his recent illness. . . . Another partnership bas been formed in Bldg. 17-1. This time it is the D. and G. Poultry Farm. It is the prime purpose of the poultry farm to operate in competition to the B. and K. Stock Farm. Clarence Doctor and Paul Geiger are to be the partners in the new undertaking, providing Paul can talk Doc into buying the chickens. . . . John (Vitamin first) Quinn comes forth with this famous saying, "Reach for a carrot instead of a smoke." . . . Red Pettit now knows what tbe red light on the street signs mean. The judge really wasn't too rough on him. . . . We welcome two new men to Bldg. 17-1 tool room—E. Kelley and C. Gill. . . . It has been rumored the reason Jack Lewis doesn't catch any fish is because he continually talks to himself. Some people say he gets more like Red Braden every day. . . . Fred (just call me engineer) Shutt was seen displaying one of those pointed-bill caps the other day. Fred's explanation was, he was tired of driving a car and was going to become an engineer. . . . We are glad to hear that Elizabeth Love has left the hospital and is recuperating at home. . . . We were sorry to see Bill Miller leave Bldg. 17-1, but we wish him a lot of luck in his new job. Come back and see us often, Bill. . . . Remember when Henry Papenbrock was in the south end of Bldg. 17-1 and the pass word was, "Do you want to buy bull?" This has been changed to "Do you want to buy a suit." . . . The name is spelled Riley and not Reily. We are sorry we made the mistake, our apologies to Mrs. Riley.

E. C. Mannet Dies In Yoder

Edward C. Mannet, 67, of Yoder died at 10:20 p.m. Tuesday, Jan. 25. He was a former employee of the General Electric Co. He left the Company because of illness in 1945.

Surviving are tbe wife, Cora; three sons, Marvin, of Huntington; Earl, of Cleveland; and Clem, of Provo, Utah; a daughter Mrs. Della Friedman; three stepsons, Clifford, Ivan and Herschel Swank; three stepdaughters, Mrs. John Jetmore, Mrs. Paul McKee, Anderson, and Mrs. William Meyers, Waynedale; three sisters and four grandchildren.

Funeral services were held at 2 p.m. in the Missionary Church at Yoder. The Rev. Charles Kaufman officiated and burial was in the Uniontown Cemetery, near Zanesville, Ind.

COUNT OFF 10·20·30

Taylor Street DIVISION 17

Dorothy Heingelmann

Fred Young went to Chicago over the week-end to get his grandson, who arrived from California. Fred must have wanted to give him a good impression, as while in Chicago he took a bubble bath. He says he can't get rid of the bubble odor and that the stuff makes you itch. . . . Rose Chambers went on pension last Friday. Her co-workers gave her a gift and had their picture taken with her. Best of luck, Rose, and come back to see us anytime. . . . Lillian Brandyberry returned from a two week's vacation. It won't be long until she will be leaving us too on retirement. . . . Kathryn Chilcote and Sarah Pulfer said they could never drink Sanka coffee as they didn't like the taste. Louise Sinn thought she would have some fun and see if the girls could tell the difference; she brought some in a different brand can. Sarah and Kathryn drank the coffee and remarked how good it was. If the girls haven't found out yet what kind of coffee they drank, here's the answer. . . . The fellows in Division 17 have started a recreation club. Once or twice each week they get the G-E club right after work and play basketball until about 5 p.m.; they have a darn good time and it takes care of a lot of muscles. Last Friday, Andy Anderson and Bill Pappert were guarding one another and both were travelling down the floor when they got their legs tangled and Andy came into work with some nice floor burns. Andy said, that Bill doesn't play fair as Bill tripped him; and Bill says "I'd never do a thing like that." . . . Charlie Engle has been rushing Earl Fredricks to join the South-West Conservation Club. Earl says he will join when he's 64 and when you are 65 your dues are paid for life, but Charlie says he can't do a thing like that. We don't know whether Charlie is an officer of the club, but we hear he is getting up a petition to keep all present officers. . . . Someone said if you see a junk-heap out in the parking lot think nothing of it as it's only two '36 Chevrolets that plowed into one another.

Thisa and Thata

SPECIALTY MOTOR

By Helen Engle

When Lee Raver returned Ernie Pfeiffer's fishing pants he was very much surprised to find the pretty pink border that had been crocheted on the bottoms. . . . Edna Braur was way down between first and second floors when she discovered that sbe forgot to ring out so up the steps she ran and rung out and then rode the elevator down. . . . Pauline Irey left last week to become a full-time housewife. Good luck and let us know if it is a boy or a girl. . . . Congratulations to Ruth Baker for becoming a member of the Quarter Century Club. . . . You girls who didn't attend the Elex party last Monday don't know what you missed. That choir was wonderful. . . . A speedy recovery to Vivian Curran. . . . Ray Snyder is buying a new car so when he starts to Florida he can get farther than Chattanooga, Tenn. Last year Ray started to Palm Beach and stopped in Chattanooga. . . . Everyone is wondering why Louis Sauers has been so happy the last few days. We knew everything would turn out all right, Lou. . . . We wonder if Carl Harman is going to get that new rug for the kitchen that his wife wants or if he is going to get the dog that he wants. Will let you know the outcome. . . . Glad that Sam Beers made it back in time for dinner last Friday after that long rest he had. . . . Say, Harry Berry, after this when you go to a meeting, please try to get to the right one. It is quite embarassing to sit two hours in the wrong meeting. . . . Anyone taking up donations don't pass up Merl Keesler. He always gives, even if it is for a cookbook for himself. . . . Edna Hauser, who is on sick leave, was operated on last Wednesday at the Lutheran Hospital. She is getting along fine. . . . Happy birthday to Bernice Johnson. . . . It sure is hard on the people that are used to coming in to work at eight and now have to come in at seven, especially when they lay awake all night listening for the alarm. How about that, Ella?

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office. Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, February 14, 1949

LOST AND FOUND

FOUND—Pair of safety glasses. Found in Fairfield parking lot.

FOUND—Pair of pearl beads in stairway in Bldg. 18-3.

FOUND—Five small keys and a house key on a bar. Found in McCulloch Park.

FOUND—A fountain pen in Bldg. 31-1.

FOR SALE

GIRLS ROLLER SKATES—And case. Size 4. H-79033.

G-E PORTABLE IRONER—Large roller. Very good condition. Reasonable. H-64362.

BOYS COATS—Size 12-14, 14-16; Girls coats, size 12. 2720 Central Drive.

YOUTH BED—Maple with innerspring mattress. E-1188.

DEEP FREEZE—Three cu. ft., brand new. A-56433.

FIVE-LIGHT DINING ROOM FIXTURE—Pair, ladies ice skates, size 9. A-19893.

RABBITS—Four proven does, one first litter, and two bucks. A-86640.

MOHAIR DAVENPORT AND CHAIR—Monitor Top refrigerator. A-89373.

WANTED

ELECTRIC BASEMENT PUMP—H-39334.

GIRLS SNOW SUIT—Size 3. A-97695.

FOR RENT

TWO SLEEPING ROOMS—With kitchen and bath. Furnished, all private. H-64732.

LARGE FRONT ROOM—Gas heat, employed couple or gentleman preferred. H-4316 after 6 p.m.

ROOM—Automatic heat and hot water. Near car line, north residential. A-67634.

TWO ROOM APARTMENT—Furnished. On bus line. H-44032 after 4 p.m.

MISCELLANEOUS

SEWING AND ALTERATIONS—Reasonable. H-36016.

TRANSPORTATION

WANTS RIDE—Clarence Rosselot, from Road 427 north to G-E Broadway plant. Works from 7-3:30 p.m. A-68270.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Last Monday the sun was shining so brightly that one couldn't help but notice the glare in the office. But it was the middle of the afternoon before someone noticed that part of that brilliant glare was caused by Vera Schweir's engagement ring. Congratulations, Vera, and you certainly do have a beautiful ring. . . . Joan (Pete) Liebig is having a hard time trying to decide what to do with her future. As of today, she is still debating about whether or not she wants to be an air hostess, take singing lessons, dancing lessons, go to business school, or just settle for a few sewing lessons. With such a large selection to choose from, Jo, you should be able to make something out of one of those things. . . . It seems that car trouble is the best sport around this office lately, or so George Denner has found out. He says it's especially disgusting when his car won't start in the morning, and he has to take a bus to work. We other bus riders know what you mean, George, and sincerely sympathize with you. . . . Perry O'Neill is all smiles again this week, as he finally received that long awaited letter from his wife, who's with her mother in San Diego, Calif. That old adage of "Absence Makes the Heart Grow Fonder" certainly seems to be true in Perry's case. . . . Norma Bastian's most embarrassing moment was one day last week when she discovered that upon turning out the lights in the Cost Section, she had also turned out the lights in the conference room where a meeting was in progress. That certainly left the boys in the dark as to what they were going to do next, didn't it, Norma? . . . Trusting that with Smitty's careful supervision in the moving of his household furniture and personal belongings, everything was moved in perfect order. Here's hoping that he and his wife will enjoy their new domicile on Washington Blvd. . . . See you next week.

Behind The Cracker Barrel In General Stores

By Marie Kettering

If some people would use the same amount of energy saying "I will" that they use saying "I can't" there'd be a lot more constructive action going on. . . . We all wonder why Byron Simmons wasn't able to work last Friday afternoon. Could it be the effects of the "paddling" he received earlier in the day—or did he just want to get an early start on his birthday celebrating? . . . That reminds me that Howard McMaken and Blaine Webster are celebrating birthdays this week. . . . Just pick up any old newspaper and whose picture do you see—Ed O'Neill, of course. Who knows—you'll probably see it in "Who's Who" next. . . . We welcome Chris Riez, who comes from Bldg. 6-1. . . . Kenny Redding sure is a "Jack-of-all-Trades." He buys his wife a new electric sewing machine and then spends an evening showing her how it works. He's also handy at tying bow ties and teaching the office gang the latest way of winning at pinochle. . . . We noticed this morning that one of the carboloy grinders was wearing colored glasses. Upon investigating it was none other than our good friend Alvin McCullough. Al started working first trick today and isn't used to the sunlight yet. . . . Kenny Redding hasn't decided whether or not to be insulted. Someone offered him a quarter Monday morning for his bow tie, and Chris Riez told him he should have sold it and bought two more like it. All kidding aside, Kenny, we really do like your bow ties.

Transformer Tattles

By Mary Ann Miller

Due to the lack of people working on the floor this column will be in every other week, unless we can get more news. . . . There will be a Valentine box in the Green Room. Anyone wishing to get even with their friends, keep this in mind. . . . Gladys Getts' famous last words: "I'm the best puttier in the Green Room." . . . During this recent rainy weather, Virginia Meier and Mary Hartwig thought they had it over on the rest of the gang by keeping an extra umbrella at work. Everything was grand until they arrived at the gate house when along came a gust of wind and turned it wrong side out. . . . Congratulations to Berniece Bechtol on her new grandson. . . . Archie Rian and Dutch Norwald have decided they are getting too old to ice fish and are taking up tiddleywinks. . . . Frank Keck is wearing all-spice instead of old spice these days. . . . Dutch Norwalt must be anxious to get home from work. He doesn't even remember to take his dinner pail with him. . . . We wonder how long Buzz Hiser is going to nurse his fingers. The boys are getting tired of doing his work for him. . . . The Bldg. 26-4 office welcomes Kathryn Schieferstein, Camella Raucci and John Darnell. . . . The Bldg. 26-4 office is sure getting toothless. Jackie Boxberger started out by having hers pulled, so Johnny Robinson and Edna Bailey felt sorry for her and had theirs pulled also. . . . Anyone having a bad case of hiccoughs see Tubby Scheumann. . . . The latest wrinkle, Frances Batzner is making coffee with no grounds. . . . We see one of our present employees and one of our ex-employees have gone into a new business. Anybody having any nitro, please contact Bill Hildinger and George Golden. . . . Paul Gressley went fishing Saturday and netted seven fish. . . . We understand Otto Braun and Benny Keller have become efficiency experts. For details ask Bill Crouse. . . . We hear Ted Lauterberg is getting singing telegrams on his birthday, by our songstress Mary LeBeauf. . . . Norb Sordelet is a teacher on ice fishing now. . . . Russ James sure is getting absent-minded these days. He locked the door of the cage two different times and left the key inside. . . . We are sorry to hear that Jay Wickliffe became ill at his home last Saturday. We all wish him a speedy recovery.

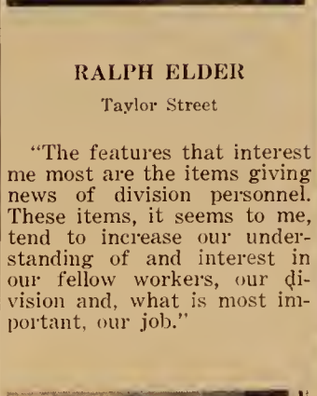
Sleuthing

IN BLDG. 4-6

by TEDDY NEDS

Wednesday, Feb. 2, proved to be one of our very nicest sunshiny winter days, and we all know that Mr. Ground Hog saw his shadow. The old saying goes that we shall now have six more weeks of winter weather. But don't be distressed, spring is just around the corner! . . . Wallace (Doc) Potter celebrated his birthday on Feb. 2. Many happy returns, Doc! . . . We bid farewell to Muriel Smith, of the Production Section, who will be leaving for Cincinnati soon. . . . Have you noticed the snazzy how tie Al Voltz is wearing? It lights up at night, too! . . . We wish Delores Soule a very speedy recovery and we send a cheery get-well-soon to Esther Baurmeister's husband whom we hear is in a hospital in Cincinnati. . . . Last Wednesday noon the Payroll girls honored Mildred Lewark with a bridal shower in the Works Restaurant. Mildred will become Mrs. Leslie R. McQueen this Sunday, in the United Brethren Church, Roanoke. We wish you loads of luck and happiness. . . . Irene Kleber of Purchasing is the very latest member of the Bldg. 4-6 Floor Sitters' Club. . . . Last Friday morning, Helen Hemmeter was telling her husband to be careful not to slip and fall in the "slush." She no more had uttered the words when "kerplop," she slipped and fell. From now on, Helen is going to "practice what she preaches." . . . That racket you heard last week suddenly piercing the semi-quiet atmosphere of the DC Div. was Ed Whipple trying to find the square root of "0" on the Friden Calculator. It jammed the machine and put up a terrific screaming protest until Ed pulled the plug. . . . The clever little "thing-a-mu-jig" Ray Jones brought back with him from New York called "Twink-a-Toes" caused quite a bit of excitement and interest. . . . There appears to be quite an exchange of money going on in the DC Div. Ted Ross saves dimes and Paul Lange saves half dollars. That's a good way to save, boys, but having it "forced" on you makes it a little rough at times, doesn't it? . . . Wade Tyler is still receiving a lot of help in getting rid of the mints that Ted Ross gave him for Christmas. Ted manages to eat at least one a day. . . . Don Reek should be more careful about who he accuses of taking his pencil since his was found in Bob Dobbin's desk, and Dobbin's was found in Reek's pocket. . . . A chemical analysis of Walt Gerke's pipe tobacco proved it to be half eraser rubber. Walt thinks he was a victim of a practical joker. But we think he did it himself—just to get his name in the column. . . . Jim Capps is the second member of the Dev. Section who has been testing telephone breakage. Just like C. J. Herman, Jim has decided they break very easily when they're dropped on the floor. He not only broke the receiver but also the base. . . . Happy birthday to Doris Downs of the Service Engineering Div. . . . It is rumored that Mike Davich likes ham so well that when he can't eat all he gets in a restaurant, he takes it home with him.

Inquiring Reporter



WHAT NEWS OR FEATURES IN THE WORKS NEWS DO YOU ENJOY MOST?

JOAN SEERY

Bldg. 2-2

"Those little bits of human interest as presented weekly by our various division columnists have always interested me. They make the WORKS NEWS our paper. Let's encourage their efforts."

RALPH ELDER

Taylor Street

"The features that interest me most are the items giving news of division personnel. These items, it seems to me, tend to increase our understanding of and interest in our fellow workers, our division and, what is most important, our job."

OPAL RUNION

Bldg. 26-3

"I like to read the cartoon, 'Out Our Way', and the news of our own division."

M. D. WALSH

Bldg. 19-4

"I enjoy reading our own column 'Tool Bits', also the 'Science Question Box' and the 'Ad-lets'."

LORETTA L. RUNYON

Taylor Street

"I like to read the sports section, especially 'Foul Line Fables', as I enjoy reading the bowling scores of fellow employees."

MOTOR and GENERATOR Static

Thought for the week: "Associate yourself with men of good quality, if you esteem your own reputation, for it is better to be alone than in bad company."

Stanley Marquardt is now known as the Bat Man. He spent almost an entire evening last week chasing a bat. Every time he tossed it out the window, it flew back. The noise became such that his neighbors were about to call the police bnt when Stan explained to one, he became the man of the hour. The next night this was offset when Stan met the same neighbor about 11 p.m. and said to him, "Do you know what I saw just as I crossed Calhoun St., three elephants walking in the snow storm." The neighbor smiled, raised his eyebrows and went on down the hall. Of course, the elephants were from the Shrine Circus.

I've heard of funny pets
Some snakes, some crows, some monkeys;
I've even heard of Westerners
That made a pet of donkeys.

But Doris Olinger's new pet
Is as active as a crater,
For when her folks were way down south
They sent her a small 'gater.

It wouldn't eat a blessed thing,
It kept her in a tizzie,
But fishworms finally did the trick
Now Doris' smile is busy.

If you have a desire to step into someone else's shoes, forget it. That condition can be most uncomfortable as proven by Pete Dannecker in a sort of "People Are Funny" situation. Recently Pete and Bob Bender went on a trip and arising after a night's rest, dressed and went about their day's business. All day long Pete limped, complaining that his feet hurt and in the evening discovered why. He and Bob had exchanged shoes when they dressed in the morning. Remarked Mr. Bender, "My shoes did feel a little loose." . . . Mert Baird remarks "Pappy Archbold is a more reckless driver sitting still than most people are at 60 miles per hour." . . . One of our downtown sconts informed us Friday evening, Feb. 4, that the name of the Mystery Melody is "Toast to the Marines." Cliff Milnor scooped us on this, however, as he gave the title in his Sunday's column. . . . We bid Virginia Hatch goodby today. All her many friends wish her the best of luck. . . . Mary Bollinger received a nice wedding gift from the girls in her section. The wedding took place Saturday, Feb. 5. . . . Carol Boyce had a minor problem which was solved very nicely. On arriving home from work, she asked her young son, just starting to kindergarten, what be did and if he played with tbe other children. He said, "No, Mother, I was too bashful, but I won't be tomorrow." . . . Donnabel Dawson is doing very well with her skating. Her life has its ups and downs.

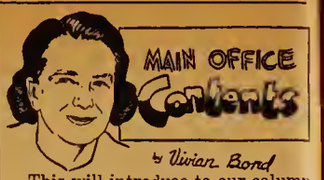
Ramblings 31-2

The Motor-Generator Engineering and Drafting Div. points witb pride to the results of the Fort Wayne Camera Club's annual salon. Of the Club's 60 odd members, three who work in Bldg. 31-2, and one ex-coworker walked off with seven out of eight awards. Kenneth McDougal took the award for the year in the scenic class. Norman Juescke won for still life and architecture. Paul Perry placed first in tbe classes of human interest and animals. Bill Willig, our ex-draftsman, received a trophy, the highest yearly honor, for the No. 1 print of the past year, which was first in the portrait class. Besides the awards for the portrait, he placed first in the open class. . . . Two familiar faces are missing this week. Eugene Mattes, draftsman, left us to study at a Chicago Art School. Bob Gillum, engineer, got enlisted by Uncle Sam. . . . "Dinner-winner, Dinner-winner," the loud speaker blared. Fred Eisenbiegler said "Darn" and tuned in "The Lone Ranger." A few minutes later tbe "Dinner-winner" program called Fred on the phone. Fred said, "Hello." Don't be surprised if Fred keeps saying "steak and potatoes" instead of "hello." . . . Girls! You have a new member for your Noon Hour Knitting Club. None other than Phil Potts, who now wears Argyle sox knitted by his own hands. The Duke of Windsor has notbing on Phil since Mother Potts taught Phil and his wife to knit. ATTENTION: Irene Meyers! The next time you visit Bldg. 31-2, all the gents may be knitting, too. . . . DISCOVERED! Magdalene Beck found a new species of mouse on the keyboard of her typewriter. "Becky" nearly had a heart attack when she lifted the typewriter cover and saw the white mouse with black stripes, black ears and black tail. Some Pixy planted it there, when he found out how well "Becky" liked mice. Mrs. Beck set a trap and caught two mice which were nibbling the candy in her desk. . . . We hear that Mr. Kern's initials H. L. now stands for Honey Lamb. Enough said.

Work seems to come easiest to the folks who work hard.

Employees Present Check To Victim Of Fire

A delegation from all the employees in Bldg. 4-5 is shown, above, presenting a check for $106 to Gladys Groh. The gift collection was made last week after a fire destroyed the interior of Mrs. Groh's house. Her son, Robert Bonar, resided in the four-room dwelling that caught fire when a coal stove exploded. Nearly $1,800 worth of new furniture was lost in the blaze. The entire damage was estimated at $3,000. Upon learning of the fire, her fellow employees took up a gift collection and several have offered to help in the remodeling of the house.

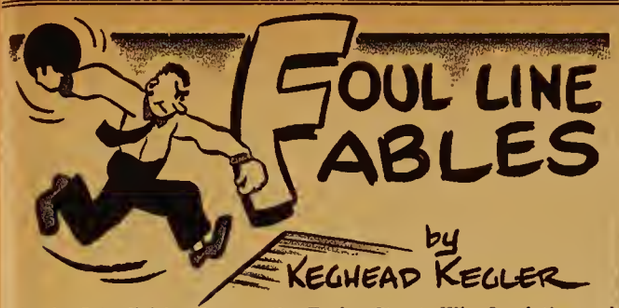


"There are two classes of people, the righteous and the unrighteous. The classifying is done by the righteous."

Louis Starr is really out of our territory, belonging in Bldg. 17-3, but since he spent several years on our floor we feel that we too would like to say something about him. Louie retired last Friday, and we here in Bldg. 17-2 got to reminiscing and were reminded of the little pranks he pulled on his fellow-workers. I remember one time receiving a live mouse as a gift. The donor stood in the aisle laughing as be watched the proceedings and the sudden departure of both the recipient and the mouse. Well, it was all good fun. Your friends in Bldg. 17-2 wish you and your wife many happy years ahead as you leave us. Don't forget us, Louie. . . . Jim Kavanaugh found out that Chicago is a good place to wreck a car. He jnst got a 1946 Nash on Saturday at 1 p.m. and approximately 24 hours later he met someone quite forcibly on the Outer Drive in Chicago. . . . Bob Reher is now working with the other boys down in the tool room. . . . Joe Griffen is glad when the ground is frozen. He doesn't have to worry about getting stuck in the driveway then. . . . Gene Dahmon has bad enough practice making signs lately that we feel he will soon be going into business. (Monkey business). . . . Harold Hohman is still trying his luck at fishing. When asked about it the answer is always, "No Luck." . . . Gene Kester is still trying to find something good about his new car. . . . Ed Bienz says be knows how to drive in Chicago after all his trips and that he will be glad to teach Kavanaugh so he won't have the same trouble again. . . . Mel Keesling always looks to see if his name is in the WORKS NEWS. He looks in the wrong column to find it.

Did everyone see Van Osdales' picture in the "News-Sentinel" the other day? If we see you at the lakes this summer, Ralph, we expect a boat ride. . . . We sure are glad that our Sample Shop got moved last Friday as some one down in Bldg. 26-1 must have blown their top as we sure got a hard jolt in Bldg. 26-3. . . . We would like to congratulate Millie on winning a suggestion award. . . . Since Irma Zion quit smoking, we see her gnawing on carrots all the time. . . . It will be safe to fish on the dry end of Adams Lake since Charlie (Water Cooled Clutch) Gass, (as he has been called lately) has been too busy with his building project to do any ice fishing. . . . We also would like to know what came over Carl Fletcher recently as we see him around a little more often than we used to. It's not such a bad place to be, Carl, with this cold weather we have been having. . . . We heard that Lucille Stover's daughter was married Feb. 5. We wisb her a lot of happiness. . . . Wedding bells will ring for Mary Johnson at the Cathedral tomorrow. We hope it's a nice day, Mary, and good luck. . . . Now we will give out with the bad news. Stucky is back with us winders. . . . Lonnie Rockstroh, why is the No. 333 always on your mind? . . . It looked as if the dentist took a sock at Wanda Grim last Thursday on the jaw. Did it hurt?

This will introduce to our column readers, Pat Olinger (her pictnre is on tbe front page of this WORKS NEWS), the poet from Bldg. 18-5. We are sure you will enjoy her weekly rhyme:



It was the day before the day of doom.
The bride to be was happy, not so the future groom.
For Papa Snyder said to Dudley, our boy,
"The state of marriage won't be solemn bliss and peaceful joy.
'Women,' he said, 'No meals will cook,
No socks will they mend,
The pennies you slave for, they will all of it spend.
The house will be left dirty as to bridge clubs they roam.
So please listen to me and never leave home.'
But Dudley, poor kid, even though he now knew,
Decided to be one of the many, instead of the envied few.
So wedded he'll get and he'll learn like the rest,
All we can do is give them our best . .
Congratulations to Norma Jean Johnson and Dudley Snyder, Bldg. 18-5."

Mr. and Mrs. Herman Kappel spent the week in Coral Gables, Fla., and attended the wedding of Mrs. Kappel's son, Harold Janes, on Feb. 9. His bride is Jantje Johanna Knul, a native of Holland, attending the University of Florida. . . . W. H. Kellermier of Bldg. 18-4, was ice fishing at Lake Wawasee, over the week-end. He said he didn't catch a thing, with the possible exception of a cold. . . . Wednesday of last week tall tales were being told about three elephants holding up traffic. It seems three elephants from the Shrine Circus were taking an evening walk just as G-E employees were en route home and consequently traffic was slow. . . . We are happy to welcome J. V. Johnson back from DeKalb. . . . Happy birthday to Al Tharp, Bldg. 18-4. . . . Two girls wbo formerly worked in Payroll, had baby daughters, Daisy Knipstein and Catherine Sowers Schmidt. Our best wishes to you both. . . . The Data Bureau is very proud of their new home with clean windows, venetian shades and a roomy file room. The new location is not so new, however, as the Data Bureau originated in Bldg. 18-4. As the Bureau expanded they were moved to Bldg. 18-5 and now that still more room is needed they are back in Bldg. 18-4. . . . Mr. and Mrs. Paul Muller (Betty, to us) of Bldg. 18-4, visited their parents in Churubusco over the week-end. . . . Barbara Meyer, Bldg. 18-4, and Pat Olinger of Bldg. 18-5 have enrolled at Indiana Extension. (Off the record—Barbara is studying criminology, so be warned!) . . . Juanita Spicc and Hazel Meyers of Payroll, are absent this week with the influenza. . . . Dorothy Ehrman is the new file clerk in Bldg. 18-4. Hope she enjoys her work and new associates. She was formerly employed in the vault.

Elex Board Meetings To Be Held Wednesday

Charlotte Stanford, Elex President, announced today that there will be an Elex Board meeting Wednesday, Feb. 16, at 7:30 p.m. in the Bldg. 8-2 conference room.

The night girls' board meeting will be held at 1:30 p.m. the same day in the small conference room, Bldg. 8-2. Rachel Fisher, Vice-President, will preside at this session.

In the Interdivision League the Taylor Street, Wire-Insulation and Motor Generator teams are tied for first place.

We missed last week's 200 scores so for that reason we have quite a string of them. J. Saylor, coming up with a big count each week, tops the list with 257 and 222; Walt Buescking, 248; Carl Stout, 238; Herb Habig, 237; Hal Spath, 228; Noah "Snake Hips" Kuntz, 224; Hal Fanning, 218; Walt Berning, 217; Paul Billman, 214; Clarence Rump, 213; Paul Walker, 213; Frank Kopp, 213; D. Miller, 212; "DoDo" Matthews, 212 and 200; Bob Buck, 206; Adam "Lazonga" Farrell, 206; Ivan Parrish, 206; Bainbridge, 203; Bill Glenn, 200.

Office League

The Alternators are out in front by a very comfortable margin.

No 600 counts this week, but I know of a couple of fellows that should have, namely Vic Rump, 203 and 234, and Les Shroyer 207 and 216. Other 200 counts, Sam Moore, 242 and 200 (P.S. That second 200 is the total of Sam's last two games); "Sore Thumb" Blomker, 235; Frank Schlink, 221; Clarence Rump, 220; Ed Hagadorn, 216; "Popeye" Patterson, 216; Johnnie Johnson, 210, and Miller, 201.

Apparatus League

Team No. 5 finally lost a game, but still continues to lead the league by two games.

Two hundred scores were acquired by A. Bresler, 224; Erv Aumann, 223; A. Horner, 211; Frankie Schlink, 204; E. Boester, 203; Dick Blust, 202, and "Sore Thumb" Blomker, 202.

Masonic League

The Gavels are out in front by the slim margin of just one game.

Two hundred scores were rather few and far between. Gerber came up with a neat 241, and Art Crayton latched onto a 214 and 203. Other 200's were Harris, 227; Hinrichs, 210; May, 203; "Sapp" Quinn, 202, and Schaberg, 200.

Small Motor League

Production is still out ahead of the pack.

The boys were quite warm Wednesday evening as they came up with fifteen 200 counts. They were as follows: Howard Reinking, 202 and 223; Ife Holmes, 201 and 201; Ray Matthews, 201 and 203; Paul Walker, 225; Runyan, 225; Jim Daley, 215; Harry Brown, 212; Bob Walt, 212; Bill Miller, 211; Vance, 203; Erv Aumann, 201, and Bob Blomker, 200.

Transformer Division League

E-I and D teams are tied for first place with 20 wins and 10 losses each. Two hundred games were rolled by McAllister and Meeker, 200; Feaser, 215, and Wyckoff, 223.

Decatur Plant Bowling

H. Murphy and Faulkner bowled 624 and 620 respectively in the G-E Fraternal League. High Scores were rolled by McIntosh, 214; Laurent, 205, and Lord, 201.

George Laurent rolled a 626 series in the Monday Night League, while high games were piled up by H. Murphy, 203; Strikler, 213, and Cook, 232.

In the Mixed Doubles League, high scores were kegled by Murphy, 202; Schultz, 206; Nelson, 243; Appelman, 225 and 204, and Laurent, 205 and 212.

McDougal bowled the highest score in the Owl League with a 204 game.

Bowling and Stuff

Don't forget the annual meeting of the Fort Wayne Bowling Association. It will be held Saturday, Feb. 19, at 8 p.m. at Maenerchor Hall, 1802½ W. Main St. Checks for the city tournament will be given out.

It looks like Walt Mertz and his brother Andy might become the proud owners of those actual pin belt buckles which the city association passes out. Hang on, Walt.

High scores for those trophies are Les Shroyer, 689; Helen Wagner, 594; Ed Crabill, 277, and Tommy Williams, 247.

We hope to hold the annual G-E Tournament April 9, 10, 16 and 17. The tournament will be run the same as in the past with competition in team, doubles, singles and all events. The prize kitty will be swelled by $150, a neat sum of money kicked in by the G-E Club. Entry blanks and further information will be available next week some time.

It's too bad we don't have more ghost writers for this column. Last week's column was worth reading for a change as we had a ghost writer by the name of Ruth Maher. Are there any more volunteers?

Taylor St., Main Office Win All Volleyball Games

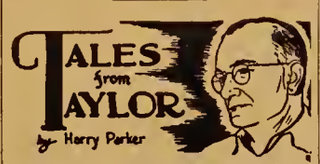
Two teams won all their games in the Interdivision Volleyball league play last Friday evening at the G-E Club gym. Taylor St. won from the Tool Division team and Main Office won three games from the Apprentice Machinists.

Scores for games played that evening are as follows:

Small Motor 15-15-2
Apprentice Draftsmen 5-10-15

Taylor St. 15-15-15
Tool 5-7-3

Winter St. 15-2-7
Squares 9-15-15



Main Office 15-15-15
App. Machinists 0-7-1

Most wrinkles in faces are caused by worrying over things that never will happen and never have.

Basketball Team Schedules Three Games Next Week

The G-E Club Basketball team will play the Van Wert Independents, Sunday, when the Pistons play New York. This game will be at North Side high school at 7:15 p.m.

They play the First M.E. Church team Monday, Feb. 14, at 8 p.m. in the G-E Club gym. The team then plays the Indiana-Michigan Electrics Tuesday, Feb. 15, at 7:30 p.m. in a league game at the Central High School gym. On Thursday, Feb. 17, they play the Wheatley Center team in the G-E Club gym at 8 p.m.

Now that Ross Hobbs has left us Clarence Stove will have no one to sing the famous "Turtle Bird" song to him. Both the music and lyrics were written by Hobbs, and it surely is some song. To really appreciate it, one would have to hear him sing it to Clarence who misses this treat greatly and is quite perturbed about it. Perhaps we can find another baritone who will do it justice. This is not the only thing Clarence is put out about. During the high wind one night the past week the corner street light was put out of commission. He claimed that he had to use his flashlight to find his way about. He does not like to do this as it runs the batteries down. . . . The contest to decide who is the greatest watchdog in Div. 13 is still on with a vengence. According to the onlookers, Ward Grim will put Buck Adams in the shade by a wide margin. Ward will go as far as to mount a stepladder so as to enable him to look over his battery of drill presses to keep an eye on a suspected one, while Buck still sticks to the time honored method of dodging around corners. At any rate all of us are interested in the outcome of this sleuthing race. . . .

Winter St. lost its second game of the year dropping a 37 to 33 decision to Transformer. Winter St. held a one point lead at the half but could not hold Transformer from then on.

Fractional Horsepower bowed to the Firemen, 61 to 36. The Firemen are tied for the league lead. They piled up a big lead in the first half and then played their opponents on about even terms for the rest of the game.

The Squares won their ball game from Tool and Die by a score of 60 to 39. O'Keefe had another good night getting 22 points for the Squares, while Krieg totaled 21 points for Tool and Die.

Taylor St. was forced to forfeit their game to the Apprentice School, having only four men on the floor at game time.

Box scores:

North Side Wins City High School Basketball Crown

Last Friday, the North Side Redskins won the city high school basketball crown by handing the Central Tigers a 46-43 defeat. In the game the next night, South Side was downed by Tollestoon, 42-36.

Dick Buckley will announce the week-end high school basketball games between Concordia and North Side tonight and the Central-South Side game tomorrow evening. These General Electric sponsored broadcasts will be aired over station WANE, starting time at 8:15 p. m.

Ed Schaefer, as you all know, has a cottage at Big Long Lake. He is always telling the boys what wonderful fishing there is at this place and is forever bragging abont his big catches. The secret leaked out when one of his co-workers visited him and while inspecting the place happened to glance into the pantry. There neatly arranged in rows were cans of pickled herring, mackerel, salmon, tuna fish, lobster and sardines. Evidently all of Ed's big catches come in cans. . . . Two more of our euchre champions have been dethroned. For a long time Everett McKee and Niles Reynolds have been playing the game with some girls in the switch section and have trimmed them everytime. Now the worm has turned, the girls have become experts and are now taking Niles and Everett to the cleaners, but the boys cannot take it and decided to quit playing altogether.

OUT OUR WAY

By J. R. WILLIAMS

12 Men From G-E Take Active Part In Scout Activities

Twelve G-E employees, all of them scoutmasters, have a prominent part in the 39th Boy Scout Anniversary Week celebration at the Wolf & Dessaner auditorium. "The Trail of Citizenship" displays have been open to the public daily from last Tuesday until tomorrow from 9:30 to 5:30, with demonstrations hy the scouts from 4:30 until 5:30. The demonstrations will be given all day tomorrow at the store.

Those scoutmasters whose troops have an active part in the demonstrations are Max Buskirk, Taylor St.; W. T. McDougal, Bldg. 26-3; C. B. Crankshaw, Bldg. 17-4; Wayne Henderson, Bldg. 26-2; John Bastian, Taylor St.; Clande Hoover, Bldg. 4-3; M. W. Ploughe, Bldg. 19-1; Roy Hans, Bldg. 17-2; Ross Domer, Bldg. 17-3; Roy Berdelman, Bldg. 4-1; Frank Valentine, Bldg. 17-2; and Richard Smith.

Four Men Are Presented Coffin Awards

Last Friday at 11 a.m. four Fort Wayne Works employees received the Company's highest honor, the Charles A. Coffin Award, for outstanding accomplishments. Those honored were C. A. Schild, R. D. Hodges, W. G. Skinner, and M. O. Marsh.

The above pictures were taken during the presentation ceremonies. In the picture on the left are P. M. Staehle, Mgr. Specialty Transformer and Ballast Sales; E. J. Thomas, Mgr. of Engineering; W. F. Oswalt, Asst. Mgr. of Mfg.; Mr. Marsh, Division Engineer; C. H. Rinne, Divisions Accountant; W. C. Wiehman, Mgr. Specialty Transformer and Ballast Divisions; and C. W. Kronmiller, Asst. Mgr. of Engineering.

The center picture shows, left to right, H. A. Hire, Supt. of the Wire and Insulation Division; Howard Miller, Engineer, Works Lab; Mr. Hodges, Mr. Skinner, and C. H. Matson, Works Manager.

Mr. Schild is shown receiving his award in the picture on the right. Left to right are P. O. Noble, Mgr. of FHP Motor Engineering; D. H. Hanson, Supt. of FHP Motor Development Div. 33; Mr. Schild; M. E. Lord, Mgr. of FHP Motor Divisions, and L. D. Hodell, Mgr. of FHP Motor Manufacturing.

The best fishing story this week is about Bill Johnson when he went fishing at Pleasant Lake with Louie Watt. When they arrived at the lake, Bill very gracefully rolled out of the car onto the ground, spilling tackle and equipment in the snow and breaking his spud. After getting things together and locating a place to fish he sat down on his tackle box to relax and laugh at Louie as he attempted to make his way out where he was. Louie would cautiously slide his feet along then boom would go the ice and Louie would quickly go in reverse then cautiously he would start again. Then came a booming of the ice and a crack right through where Bill was sitting, whereupon Bill took off for the car. Then he decided a cup of hot coffee would do him some good, so he sat in the car and poured a cup of coffee, placed the thermos between his knees while he drank it. After a healthy swig he glanced down and the steam from the thermos bottle startled him so, he thought he was on fire whereupon he again took off, tumbling out of the car door again into the snow. Sounds like you sure had a case of bad nerves that day, Bill. . . . Jerry Knight is getting to be quite a politician, anyway he is a pretty good vote getter. . . . Last week the Burlap Bags went to Paul Armstrong and Ray Bowers. But they soon passed them on to John Bastian and Yours Truly, but it couldn't be my fault we got skunked. . . . Harold Whonsetler came rolling in late one morning last week, or maybe I should have said later than usual, with the excuse that he has been trying to wean that Ford but it just won't run without gas. . . . Speaking of being late, we thought someone had not informed Marcellus Junk, our new representative from the apprentice school, that we start work at 6:48 but he said he had been told and would have been here on time except for a flat tire. . . . Belva Imel has the most original excuse for wrecking a car. He says it was the fault of the carburetor that he went through the fence at Brooklyn Ave. and Bluffton Rd. . . . Ed Smethers and Clarence Stolte take the cake when it comes to operating the Do All Saw. They couldn't figure why a new blade wouldn't cut until they were told they had the blade on upside down. . . . Henry Bradfield is also a newcomer to the group working second trick with the machinists. . . . Ewald Stinsmuehlen has had enough scrambled eggs at home to last for sometime. His son wanted to see what was in the sack on the kitchen cabinet and pulled it off on the floor. So they had two dozen scrambled eggs. . . . February, being the month of famous birthdays, I want to remind you that Chris Delagrange and Lyle Claphan celebrated birthdays this week, too. . . . The odor of burning rubber was quite evident around Russ Deveny's machine last week. Cause: Rubber bands cut in his tobacco. . . . Jack Pollock was calling all his friends last week trying to get Harold Whonsetler's phone number so he could call him for tickets to the Shrine Circus. Upon questioning we found he was still using a 1945 phone book.

John Boese Dies Sunday

John C. Boese, 431 West Pontiac St., an employee of General Electric for 30 years and at one time a foreman in the FHP Motor Division, died at 4 p.m. Sunday, Feb. 6, at his home. At the time of his retirement in 1946 he was a power shear operator in Bldg. 6-B. Mr. Boese was a member of St. Patrick's Catholic Church and the Quarter Century Club.

Surviving are his wife, Elizabeth; one daughter, Mrs. Elizabeth Glenn; two sisters; one brother, and one grandchild.

Funeral services were held Wednesday at 8:30 a.m. at the Mungovan and Sons Mortuary and at 9 a.m. at St. Patrick's Catholic Church, the Rt. Rev. Msgr. D. L. Monahan officiating. Burial was in the Catholic Cemetery.

Harry Coffelt has gone into the dog buying business. Harry says he will buy any dog sight unseen providing he is not gun shy. . . . Verena Meyer got a big surprise when she pecked into a certain box. Verena, the sign said, "Don't open this or you'll be sorry," and now she says she is a believer in signs. Laying all joking aside, those mice would make nice pets wouldn't they, Verena? . . . A farewell dinner was given for Lucy Daniels of Payroll, who was also pleasantly surprised with a beautiful birthday cake, since her birthday was the following day of the dinner. All the girls from the office were able to attend the dinner but one. . . . We still haven't seen that new car of Chet Kleinknight's, but maybe one of these days he will drive it to work and show it off. . . . What's this we heard about Fern Passwater trying to get in the bank on Thursday afternoon? . . . If you want to see something very interesting watch Mary Ann Laurent take a pill. . . . Milt Brown is off work due to a wrenched knee which he suffered last week while bowling for Moose 1 team in the G-E Fraternal league. Hurry back, Milt, before your team hits the skids. . . . Leo Hackman, G-E Club president and other Club officers and directors, were guests of the Club at the recent Zollner-Piston-Minneapolis basketball game. They were treated to a thrilling overtime game won by Minneapolis. . . . Our sympathies to Leo and Richard Bogner, whose mother recently died. . . . "Peck" Hilton, the electrician "deluxe", is recuperating at his home from painful injuries received recently when he lost control of his car and crashed into a tree. . . . Friends of Russell Weldy wish a speedy recovery to Russ, who is convalescing at the Indianapolis Veterans' Hospital. . . . Who was it that put that hand full of snow down R. Shackley's neck—it was none other than Jay Moser. . . . Alice McBride has found a new way to walk on the ice—on all fours. Kind of slippery wasn't it, Alice. . . . Have you ever noticed what words some people's initial's spell out, here are a few: Ardella Heare, Ah; George E. Myers, Gem; R. E. Owens, Reo; S. O. Lord, Sol; G. A. Gage, Gag. . . . The new test engineer is Herbert Duane Frye. Welcome to Decatur, and we hope you like our little city. . . . The GeCode Club girls entertained their fathers, Feb. 5. The party was entitled "A Date With Dad." It was a combined day and night force party with Dorothy Schnepf, chairman, for days, and Norma Bower, chairman for nights. During the dinner hour Betty Frauhiger rendered music on the solovox, after the delicious dinner a quartet headed by Dave Embler sang some favorite songs, and Neil Thomas sang two solos, "Ol' Man River" and "It's Magic." The oldest father there was Florence Schultz's father. The youngest father there was Virginia Heller's. The father with the most daughters was Mildred Geimer's. The father that came the longest distance was Norma and Betty Bower's father. Bingo was also played later in the evening. The guests all received a lovely gift from the Club.

Bruner Dies In Hospital

Harry E. Bruner, 71, 1236 Huestis Ave., died at 9:19 Thursday, Feb. 3, at the Lutheran Hospital. He was a member of the West Creighton Ave. Christian Church and also the Quarter Century Club at General Electric. He was first employed at General Electric in 1918 as an assembler and was retired in 1945.

Surviving are his widow, Myrtle G.; two brothers, Waldron and Forrest; two sisters, Miss Nettie and Mrs. Mary Brown, both of Washington, D. C.

The funeral was held Saturday, Feb. 5, at 2 p.m. at the West Creighton Ave. Christian Church, the Rev. Ernest Harrold officiating. Burial was in Prairie Grove Cemetery.

Our main topic of conversation recently has been Charlie Schild's retirement. So many things have happened to him that it is doubtful if he will come down out of the clouds for several weeks. As a climax to the wonderful experiences he has had, was the presentation last Friday of the Coffin Award. Certainly nothing could have thrilled him more. This award along with the surprise parties, gifts, cards and congratulations, which have been coming thick and fast, will give him a warm remembrance of Bldg. 17-4. About the party last Thursday, one man said, "Every one had a swell time at Charlie's retirement party, and talk about hot music, we had the hottest music that ever hit Fort Wayne. Charlie received several useful gifts including burned out flash bulbs, used film, a tripod with one leg a foot short, a developing tray with only one hole in the bottom, a nice folding camera that won't work. He did receive several nice things in the last week. He had most of them on display last Monday so everyone could see them. We all congratulate Charlie on his receiving a Coffin Award, that was quite an honor for our boss and friend." . . . Larry Reed didn't have much to say this week, his Central Tigers have blown up. He's going to move to Huntington and help Bill Dimond root for the Vikings. . . . We all wish Ray Hoelle's wife a speedy recovery from her recent operation. . . . Ruth Theurer has been singing so much lately that we wonder if someone mixed bird seed in with her precious whole wheat germs she's been munching. . . . In private life she's known as Betty Rygowski. When she interrupted our conversation with "Patsy is just like her mother, too," we were curious to learn who Patsy was, knowing there were no children in the Rygowski home. Finally Betty announced, "Oh, that's my doll." . . . That was a pretty expensive dozen eggs, eh, Lucky Roskuski? Lucky it was the eggs that broke and not your bones.

NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, FEBRUARY 18, 1949 | No. 7

The preservation of the sacred fire of liberty, and the destiny of the republican model of government, are justly considered as deeply, perhaps as finally staked, on the experiment entrusted to the hands of the American people.

—George Washington

The Rumor Clinic

RUMOR:

Why does General Electric continue to build products in such quantities for Russia when the two countries are at such great odds?

ANSWER:

We can say with complete confidence that no orders are accepted for apparatus from any foreign country without a license from the United States Government, and these licenses are subject to cancellations. This is exactly what happened in the cases referred to in the RUMOR CLINIC question.

The apparatus in question was ordered, from the General Electric Company by several of our good domestic customers, to supply power for their product at a time when Russia and the United States were on more friendly terms and were exchanging goods. When the United States Government decided to cut off the flow of materials and apparatus going from this country to Russia, these orders were held up. Shortly after they were held up, our customers decided to transfer these requisitions to domestic orders.

In conformity with our shop practice on all manufacturing instructions, when these requisitions were received we showed the customer's name and the ultimate user. Therefore, when these requisitions were transferred to domestic use, we did not feel it necessary to go through all the paper work and change the name of the ultimate user to which it had been consigned, but simply changed the necessary ones which dealt with the modifications to the apparatus and the new shipping instructions to the domestic customer.

RUMOR

I have heard that when I am called for jury duty the Company will compensate me for the difference I receive between what I receive from the court and my normal pay.

ANSWER

Non-exempt salaried employees having one or more years of service, and all exempt salaried employees, will be paid full salary while serving on jury, without respect to fee received as juror.

Hourly rated and piece workers having one or more years of service shall be paid the difference between average normal earnings (for normal work week, Monday through Friday) and the fee received as juror.

RUMOR

I have heard that the items sold in the Employees' Store are not first class merchandise; they are seconds.

ANSWER

The Employees' Store sells both Class "A" and Class "E" mer-

(Continued on Page 3)

Red Cross Drive Opens March 7

Glenn Reynolds, Executive Director of the local Red Cross Chapter, is shown at the left, above, presenting an official Red Cross campaign poster to K. W. Michael, chairman of the Fort Wayne Works drive. The poster, a dramatic depiction of the tension and danger inherent in Red Cross disaster relief work, was painted by Jes Schlaikjer, celebrated illustrator and portrait painter. His design was inspired by an incident which occurred shortly after an airplane crashed on Thing Mountain near San Diego, Calif., Christmas Eve, 1946. Red Cross workers served rescuers three days and nights in freezing weather as the search went on for the missing plane and its passengers.

K. W. Michael Named To Head Campaign Here

The annual Red Cross Fund-Raising campaign will be conducted at the Fort Wayne Works beginning Monday, March 7.

K. W. Michael, Assistant to the Supervisor of Personnel, has been named chairman of the drive.

Soliciting groups will be formed in all sections throughout the Works, and they will contact every employee personally sometime during the week-long campaign.

Solicitation at the Winter St. Plant will be held the same week under the direction of J. W. E. Humphrey, representative of employee relations in the Works Manager's office at Winter St. The Decatur Plant will hold its campaign Thursday and Friday, March 10-11.

The national goal for 1949 is $60,000,000 and the goal for the city is $110,225.

G-E Club Committee Maps Plans For Square Dance

Charles Ream, at the left above, explains the steps and techniques of square dancing to the others on the G-E Club Committee: William Allen, Family Night chairman; Erv Huth, and Charles Wilt, G-E Club President.

Tickets for the G-E Club's square dance will be available, Monday, Feb. 21, at the candy-stands in Bldg. 18-B, the G-E Club, and at the Taylor St. employment and personnel offices.

The dance will be held Friday night, Feb. 25, in the club's gymnasium. Joe Taylor and his Red Bird orchestra will provide the music for the dance, which will start at 8 p.m. Mr. Taylor works in Bldg. 27. His band has made several records and is heard over Station WFTW Saturdays at 12:30 p.m. Ed Parker, Bldg. 24, will call the dances.

Charles Ream and Erv Huth, co-chairmen of the dance, stressed today that one need not be an experienced dancer to enjoy the excitement and color of square dancing. Special dance sets will be arranged for the inexperienced or less ardent dancers.

All family night attractions are free and are sponsored by the G-E Club.

Attendance will be limited to approximately 1,000 persons.

Spring Bonnets To Be Theme Of Elex Breakfast

Elex Club's first and second shift girls will hold a combined meeting Saturday, March 5, in the form of a Spring Bonnet Breakfast at the Y.W.C.A. Breakfast will be served from 10:30 until 11 a.m.

Two spring hats will be given as attendance prizes, and each girl will receive a favor. The Sunshine Islanders will furnish music during the breakfast.

Tickets for the breakfast are $1 each and can be purchased from contact girls. Reservations must be made by Wednesday, March 2.

SQUARES WOMEN PLAN POTLUCK, BRIDGE PARTY

The Women's Division of the Squares Club will hold a potluck and bridge party for their husbands Saturday, Feb. 19, at 6:30 p.m. in the Squares' clubrooms.

George Washington's birthday will be the theme for the party.

Mrs. W. A. Pringle and Mrs. E. M. Stanbery are the co-chairmen. They will be assisted by the following: Mrs. Leonard Erickson and Mrs. John Flickinger, coffee; Mrs. I. H. Freeman and Mrs. Maurice Felger, bridge; Mrs. J. F. Formanek and Mrs. R. A. Gallmeier, decorations; and Mrs. P. L. Deal and Mrs. Robert Drake, prizes.

Visitors At Broadway Granted Parking Space

A parking space for representatives of other companies visiting at the Broadway Plant has been established at the north end of the restricted parking lot on Lindley Ave. The restricted area is identified by yellow timbers and signs, according to A. R. Vegalues, G-E Chief of Police.

G-E Remote Control Wiring System Now Available At Store

Switches, wiring, relays, transformers, and all other equipment necessary to install General Electric's new Remote Control wiring system is now on sale in the Employees' store, it was announced

(Continued on Page 3)

Barbershop Quartet Wins Miller Trophy At Squares' Party

The Transformer quartet won the Howard Miller trophy at the Squares' Barbershop Quartet contest and stag party Wednesday evening at the Squares Hall. Quartets from FHP, Transformer, Works Lab and general divisions entered this annual event. Fred

Free Enterprise System Is Our Country's Greatest Resource

By George S. Benson, President Harding College

When you enter the gates of our huge factories and industrial plants, do you see what is really there?

Many of you are more familiar with hydraulic presses, annealing ovens, and catalytic crackers than I am.

But whenever I do go inside factory gates, the wonder of it all amazes me.

Where did all the equipment come from? By what magic was all of it assembled into such a gigantic unit for production?

What a tremendous outlay of capital it takes, just to get the machines running!

Before a worker can start drawing a paycheck, the average American industry has brought together $6500 worth of machinery and facilities for this workman to use.

Somebody had to pay for all of it. What great benefactor accomplished that deed?

Do you suppose it was a capitalist? Are capitalists guilty of that kind of thing?

Yes, capitalists did the deed. It is interesting that they keep doing that type of thing, all along.

They keep building steel mills and putting up new oil refineries.

New assembly lines are continually set up, the old ones improved. Plant expansions are undertaken. Modern tools are installed to replace worn ones.

And one of the most amazing things about it is that nobody has to tell them to do it!

No dictator commands that all this money be spent.

No government bureau has to send out a directive.

It's all just part of the system that is the mainspring of America.

This system of free and individual enterprise has made possible the building of our nation. Whenever the incentive of profit or reward is there, both men and money will be put to work.

Capital comes to the job in hope of a reward, just as a man expects a paycheck as the result of his labor.

Money and men work side by side, then.

These things are so common under the enterprise system as we know it in America, that most of us take them for granted.

It is a commonplace experience to see people deny themselves luxuries they otherwise might have, in order to supply the capital for a business enterprise.

They look for profit, yes. Yet, these capitalists (sometimes attacked so bitterly by unthinking persons) constantly supply the essential ingredient that makes jobs and produces goods.

Actually, the six or seven cents profits out of each sales dollar, which is typical of industry as a whole, does a tremendous job for you and for me.

It pays for all the machines that, in turn, do most of the work.

This makes it possible for 60 cents or more of this same sales dollar to be given to those who supply the human energy, the workmen.

Some three cents, or only about half of this small profit, is used on the average to pay investors for the use of capital that brought these industries into being.

The other three cents or so of the profit goes back into the business.

This portion of profit is used to pay for wornout equipment and other replacements, and to keep up with rising costs and increased taxes.

Today, that part of the sales dollar called profit is hardly ever enough to meet industry's real and urgent needs.

In late years our industry has had to borrow more and more to meet rising inventory and equipment costs.

The nation's industrial enterprises cannot exist now, and never could have been developed, without the use of capital.

This is the way America's tools of production are brought together and put into action.

Capital very effectively teams up with labor and management to bring great benefits to every citizen.

Each of the partners—investor, worker, manager—has his own incentive.

This system, free and unhampered, brings forth the best effort from each.

The enterprise system is our country's greatest resource.

Haste Makes Waste

WHAT'S NEW IN PLANTS & LABS

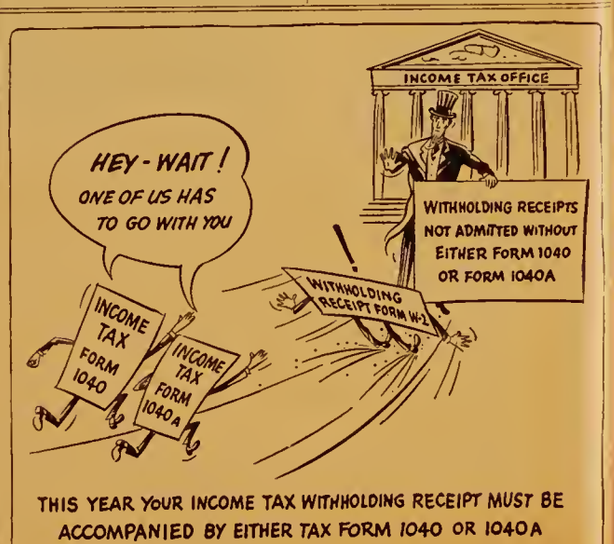
A new single-phase combination watt-hour and thermal watt demand meter for industrial use has been announced at West Lynn by the Meter and Instrument Divisions. Designated as the Type IHM-1, the new meter is housed in a case slightly larger than that required by a conventional watt-hour meter. It can be installed wherever rate structures require the determination of demand as well as energy, without increasing the size of the original installation. The revolutionary new damping system and electromagnet of the recently introduced I-50 watt-hour meter, adapted to the new design, comprise the watt-hour unit of the Type IHM-1 meter.

Rain may be the best remedy for putting out a fire, but the time may come when fire may prove a useful tool in starting a rainstorm. Several different silver iodide smoke generators which make use of fire to produce snow and rain have been developed in the Research Laboratory. The generators are expected to undergo extensive experimentation in actual weather conditions by the Army Signal Corps and the Office of Naval Research. Chief among the generators developed are two charcoal-burning units, one for use on the ground and one for use on a plane, and a hydrogen-burning unit for use on the ground.

The "Carnival of Measurements," G-E's traveling exhibit of electrical measuring devices has embarked on a 14,000-mile tour of 80 major U. S. industrial cities. Feature of the display is the new I-50 watt-hour meter, in which the principle of magnetic suspension is applied. The meter's rotating disk and shaft are suspended in space by the interaction of two tiny magnets. The collection of instruments manufactured by the Meter and Instrument Divisions at West Lynn, Mass., includes aircraft instruments, photometric devices, remote position indicators, portable testing instruments, telemeters, and many others.

A new and separate sales district — Michigan District — became effective the first of the year, it was announced by the Apparatus Department. The district will embrace all sales areas presently in the Detroit, Jackson, Grand Rapids, and Saginaw Sales Office territories. A. R. Hines has been named manager.

SCHENECTADY—A new low-cost Thy-mo-trol drive, Type H1, designed for constant torque loads, is announced as available from stock by the Control Division. The new drive, in ratings through ½ hp, utilizes a simplified half-wave circuit to provide d-c flexibility from a-c power, and smooth stepless speed control on small lathes, grinders, drill presses, conveyors, pumps, packaging equipment, and paint and varnish mixers. The drive operates from 220-volt, 60-cycle a-c. For other voltages a suitable anode transformer is available. The complete drive is easily installed, either separately or directly on the machine, and requires little maintenance.



The OLD PHILOSOPHER Says:

In this little space every now and then we talk of many things, most of them closely connected with the work in hand. Suggestions, safety, better workmanship, etc. It is good sometimes to turn away from the customary and give a thought to something foreign to the immediate need. So, for a change let's see what there is to this business of getting a thrill out of life.

This is a hectic age we live in and to many minds there are ways of getting a thrill out of life not found in the story books. But I wonder sometimes if folks who think that way, really do get what they're after. Most thrills the world knows are but passing imitations of the real thing . . . for the real thrill in life comes out of service to someone else.

A veteran newspaperman, if you'll pardon again my quoting these chaps, finds that folks who get the most out of life, live objectively. They have a cause to fight for. They know where they want to go. They proceed to get there, hell or high water and in the journey they find happiness. No man need miss happiness, whoever or wherever he may be, if only he establish his objective and then gets there.

Fred Hurry celebrated his 23rd wedding anniversary Thursday, Feb. 10. Fred had two chickens all picked out for the occasion but it seemed that his dog thought they were for him, so he killed both. Oh well, Fred, if you filled up on chicken there wouldn't have been any room for that 60 gallons of beer, anyway the dog has to live too. Congratulations, Fred, and here's wishing you many many more anniversaries. . . . If anyone wonders why Frank Sprunger is always wearing that big smile, it's because he is the proud owner of a new Hudson. . . . The way we get it John Loshe and Jake Keller take their wives to Preble to play the game of shuffleboard. Don't worry fellows we'll never tell why your faces were so red when the game was over. . . . Andy "Romeo" Andrews sure has taken an awful liking to the city of Celina here lately. Watch your step, Andy, one of these days you're liable to lose that lucky rabbit foot you carry around. . . . Last week you read in this column that Florence Shultz's father received the award for being the oldest father at GeCode's "Date with Dad" party. Nosie Rose of this column snooped around and discovered Bill Schnepf was present at the head table next to chairman daughter Dorothy. Counting her fingers and multiplying by 5, adding her toes and one ear, Dorothy discovered Bill's age to be 2 years more than Mr. Schultz's 59. This story could stop here except Ray Leitz, George Buckley, and several others, who consistently have had to listen to Bill's own version of how to raise the biggest families, the biggest corn crop, the biggest steers, the best soy beans, cannot understand why Bill did not grasp this opportunity to explain his theory of clean living habits being a major contributing factor to his zestful living these many many years. They know there isn't anything timid or bashful about him. . . . Over in Bldg. 1 the other morning everyone was wondering who the new girl was in the Credit Cage. To their astonishment it was only Kate with the "new look." Even Dick, Kate's husband, has been having trouble finding his wife as he continually asks everyone if they have seen Kate. . . . Guess who was back on the job this morning? That's right, Pick Hilton, the electrician. . . . If you see Harriet Haines coming late to work it won't be because her clock stopped or her alarm didn't go off, but because she just had to listen to her new portable radio five minutes more. . . . Our sincere sympathy to Ray Crist and family upon the death of his father. . . . Big things almost happened in the mixed doubles league last Friday. George Laurent (average 186) had to come from behind and roll a terrific 152 to top wife Peggy's 142. Andy Appleman got a double in the 10th to squeak out a topper of Bess Faurote's 169. Julie Baker got "tapped" in the ninth frame and "robbed" in the 10th in his effort to win the third from partner Marge, which he didn't. . . . Mary Jones is very proud of the 180 she bowled the other night. . . . George Myers got so excited the other noon in euchre when he played and made four points he knocked his chair over and almost landed on the floor himself. Take it easy, George! . . . The GeCode Club is planning on a trip to Chicago on April 2 and 3. A tour is planned for the Sunday which will include a Lake Shore drive to Evanston, Chinatown, The Ghetto, Hull House, Bahai Temple, and many other points of interest. Sounds like fun, doesn't it! All you have to do is have your reservation in by Feb. 28, so don't forget that date. . . . Wanda Bailey, Joan Liechty, and Mary Jones gave a shower for Esther Teeple whose wedding took place on Feb. 12. We wish you all the happiness in the world, Esther. Those present at the shower were Genevieve August, Lydia Lehrman, Esther Meyer, Alice McBride, Mary Miller, Florence Schultz, Dorothy Schumm, Barbara Roop, Earleen Steffen, Wanda Bailey, Joan Liechty, Mary Jones, and the honored guest Esther Teeple. Those unable to attend were Dorothy Schnepf, Mary Ann Laurent, Fern Passwater, Irene Holthouse, Lucy Daniels, Ardella Heare, Harriet Haines, Cathryn Steele, Mary Fennig, Frances Terveer, and Eloise Noll. . . . Dorothy Schnepf bought herself a bowling ball, so we hear. How about a 300, Dort? . . . Did everyone receive a Valentine on Valentine Day? If you didn't maybe it was because the sender did not put the right amount of postage on it as it takes a two-cent stamp instead of a one-and a half cent stamp. . . . Decatur Bowling League — Monday Nite League high scores were rolled by Schultz 246, Shoaf 201, Strickler 204, Murphy 213-216. G-E Fraternal League high series were rolled by: H. Murphy 627, Zelt 620. Other high scores were Beery 220, Faulkner, 216.

Frank Quinn Here 45 Years

Frank Quinn, Bldg. 17-1, celebrated his 45th anniversary of service with General Electric, Feb. 12. Several of his friends gathered Friday to congratulate him. Seated, left to right, are Robert Dent, W. H. Franke, FHP Motor Div. 19 and 20 Supt.; Mr. Quinn, Fred Schafenacker, Quarter Century Club president; Henry Wichern, and Norman Bender.

Standing, left to right: Frank Hickman, Ed Kronmiller, Ed Brosche, R. E. Zook, Supervisor of Personnel; Marion Sprague, Clyde Crabill, Ernie Riley, and Paul Geiger.

INSTALL PAY PHONES

For the convenience of Broadway employees, pay phones have been installed at the East Broadway gate and at passenger elevators in Bldgs. 19-1 and 4-1.

Edison Pioneers Mark 102nd Birthday Of Famed Inventor

Six "Edison Pioneers" who worked with the renowned inventor prior to 1892 at the Edison Machine Works, tiny forerunner of today's giant General Electric Company, gathered at a dinner in Schenectady last Friday to mark the 102nd anniversary of the birth of Thomas A. Edison.

The toot of the whistle that summoned these men with their coworkers to the job at the two small shops at seven each morning more than 60 years ago called them to their dinner last Friday in the Van Curler Hotel as guests of General Electric. The toot started a hum, above which could be heard a familiar "Do you remember when. . ." The whistle was loaned for the occasion from the Edison relics in Henry Ford's Dearborn museum.

The half-dozen men who traded anecdotes about the "good old days" when two small shops on a 12-acre site were their workrooms in the Nineties are still residents of Schenectady, including Tom Dempster, Peter Kirsch, Fred P. Wilson, John Weber, August Tinnerholm, and David Miller.

Three Are Absent

Three other Edison Pioneers in the Schenectady group were absent from the small gathering—William F. Madigan, now living at the St. Mary of the Angels Home, near Buffalo; A. Leio MacPadden, in Florida, and John P. Kelsey, Sr. The latter attended the reunion of Pioneers in East Orange where Dr. C. G. Suits, G-E vice president and director of research, was the main speaker.

The nine are the only old-timers in Schenectady who are officially enrolled in the "Edison Pioneers," an organization with New York headquarters which observes Edison's birthday with a pilgrimage to Edison's laboratory in East Orange, N. J.

Edison's small beginnings at the Schenectady machine works he secured in June, 1886, remain part of the vast Schenectady Works of today, and are historically significant to General Electric. One of Edison's two structures, now known as "Building 10," is intact. In 1889 the small works changed its name to Edison General Electric Company. Three years later, in 1892, it merged with Thomson-Houston Co., Lynn, Mass., to become the General Electric Company.

Grows from 25 to 33,000

When Edison actually placed the two abandoned buildings into operation in December of 1886 there were about 25 employees on the job. A few weeks later they grew to 300 and in 1892 at the time of the consolidation the total had climbed to around 3,400.

The Schenectady area of today with its offices and laboratories boasts about 33,000 workers. The Works of today numbers about 240 buildings on a tract exceeding 600 acres.

Out of the union of the Schenectady and Lynn operations of 1892 giving General Electric its birth, the Company has spread from coast to coast with locations in one-hundred-odd cities, employing almost 200,000 workers.

Edison discovered the incandescent lamp that lights those cities, but none shines as brightly as the fame of its inventor.

Barbershop

(Continued from page 1)

Hagadorn, a representative from the local SPEBSQA, headed the judging.

The Indiana Tech Glee Club entertained during the evening, and later led community singing. A social hour followed the quartet contest.

"These Parlor Pinks remind me of Uncle Ben. Said he was always kinda fond of wimmen . . . 'til he married one."

Rumor Clinic

(Continued from page 1)

chandise at a discount to employees. Class "A" merchandise includes all items which are first class goods, the same as sold at any independent dealer. Goods in Class "A" are in perfect condition. Class "E" merchandise includes all items which, though mechanically perfect, have some small imperfection in the finish, such as a dent or chip on a vacuum cleaner or iron. These items are not only sold at an employee's discount but have an additional discount to more than compensate for the minor imperfection. Class "E" merchandise carries the same guarantee as class "A".

RUMOR

Why should I put out more than eight hours' work? I don't get paid any more for it?

ANSWER

The General Electric Company has in the past and is at the present time making a sincere effort to improve the jobs of its employees. The Company found that General Electric employees wanted jobs which contained the following:

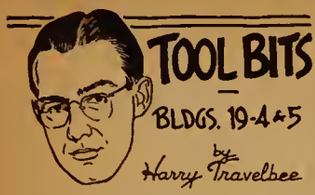
1. Good pay.
2. Good working conditions.
3. Good bosses.
4. Steady work.
5. A chance to get ahead.
6. To be treated with respect.
7. To get the facts about what's going on.
8. To be doing something worthwhile.
9. And to have other reasons for really liking their jobs, such as finding them interesting and deeply satisfying.

In return for furnishing a job containing the above ingredients the Company expects the employee to:

1. Use his full skill.
2. Use conscientious care in all phases of his work, including the maintaining or improving of quality, the avoidance of spoilage and the elimination of waste of time, materials and effort.
3. Put forth a full day's effort.
4. Be on the job promptly, regularly, and agreeably.

If each of us fulfills his part of this bargain we will produce more and thereby decrease costs which in turn is passed on to the consumer. This then places us in a strong competitive position, increases sales of our products and provides job security for all connected with the Company.

No one is asking the employees of General Electric to put out more than eight hours' work in an eight hour period. We are interested, however, in having the employees give their full skill, care and effort to their day's work.



"More goods for more people at less costs" is more than a motto to us in General Electric. To us, as employees, it means steady jobs and steady wages.

Remote Control

(Continued from page 1)

today by Ray Fischbach, manager.

Contrary to a statement beneath the photograph in last week's announcement of the new system, there is danger of a shock if a person inserts his fingers in the lamp socket.

We were pleasantly shocked at the modesty of two of our co-workers. The "Please," request of the Inquiring Reporter for opinions and pictures was politely—but firmly—refused by H. Theile and Dan Willike. Oh, well, those red ears wouldn't look good in the papers anyhoo. . . . We see where Clyde Spangler's son Bobby is going great guns on Huntertown's Wildcats. Clyde is predicting that Bobby will be another Joe Foulks. . . . Carey Baker is walking around with a big broad smile since brother Floyde's Richmond Red Devils trimmed Huntington. . . . Bernie Byanski's Sunday fishing trip almost ended in disaster. B. B. B. was coming home and decided to stop for lunch in Kendallville. When he emerged from the snack bar, he found that the car had the lights on, the motor running, and the doors locked. The day was saved when Bernie's son Beezie produced an extra set of keys. . . . Harold Wherry had trouble keeping the engine in old Betsy running on his merry way to work last week. He thinks the icy roads frightened her so bad, she began coughing. Harold was so upset over his misfortune that he got off the elevator on Bldg. 19-3. You shouldn't feel so bad, Harold. Your good friend, Henry Gick, rode his G-E special in late the same day. . . . Elmer Sauerwein was keeping the telephone wires a humming recently when his son Jack broke his glasses with exams coming up at Hillsdale College. The glasses were in Jackson, Elmer's son was in Hillsdale and the prescription was in Fort Wayne. Elmer has decided in the future Jack shall have the prescription with him at all times. . . . Ed Schafenacker is checking up on Kaiser and Frazers. Walt Greiner thinks Ed should buy a Jeep to make sure he would have plenty of head room. . . . Smoke gets in your eyes is what the host of people at the Lake George fishing party are mumbling. . . . George Hartman can't understand why the new chimney on his cottage plugged up. However, we're sure his guests Swede Moser, Joe Mettler, and brother Joe Hartman could help solve the mystery. . . . Bob Goers is thinking of taking up big game hunting after an experience a couple of weeks ago. The reason: small game is too hard to bite. Seems that Bob saw a rat run across his yard, so he rushed to get his gun and ammunition which were at different parts of the house. Then he dashed to the window, raises it just as Mr. Rat was on his way back. Bob took careful aim and fired, only to see said rat proceed on his way. From what we hear, Bob took quite a razzing from his family. Why don't you try a 12-gauge next time, Bob? . . . We are all mighty happy to see John Hensler back in the tool crib after being off work for five and a half months. John will work half days for a while until he feels stronger. . . . Cake and pie (apple, that is) were enjoyed by the boys in the lathe section as a farewell party for Del Stickler, who is leaving to work in Bldg. 17-1. We all wish you good luck on your new job, Del. . . . Neukam and Reynolds furnished the cake and pie, but Chet just got behind the eight ball with his wife as he forgot to tell her to bake a pie until 8 o'clock, the night before he was to take said pie to work. To make things more complicated, the Reynolds had company, but Mrs. Chet rushed out bought apples for the pies then proceeded to bake two pies, one to eat at home, the other for the party. Everything worked out fine, but Mrs. Reynolds asked to have an advanced notice the next time.

Wilson Completes 30 Years

F. D. Wilson, FHP Motor Sales Division, recently completed 30 years service with General Electric, at which time he received a congratulatory letter from the Company. The above picture was taken when Mr. Wilson received his letter. Left to right are: A. W. Bartling, Manager of Sales, FHP Motor Divisions; Mr. Wilson, and M. E. Lord, Manager of FHP Motor Divisions.

Charles Gorden Dies After Heart Attack

Charles Gordon, 55, died Tuesday morning at his home in Churubusco after a heart attack.

Mr. Gordon first came to General Electric in 1926 as a laborer in the General Service Division. He later became a machine mover, and in 1934 transferred to the Winter St. plant. Returning to Broadway the next year he worked on Japan dipping in Bldg. 4-2. From 1938 until his death he was an annealer in Bldg. 4-2.

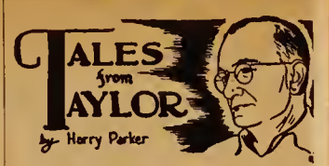
Surviving are the widow, Dollie; a son, Robert; two daughters, Mrs. Naomi Frazier and Mrs. Amber Tanner; his mother, Mrs. Alice Gordon; five grandchildren; four brothers, Roy, Elmer and David, Churubusco, and Lawrence in Florida; and five sisters, Mrs. Nora Bates, Kendallville, and Mrs. Mary Crabill, Mrs. Amy Raypole, Mrs. Laura Gray and Mrs. Iva Gorsuch.

Funeral services will be held at 2 p.m. today at the EUB Church, the Rev. Alfred Burk and the Rev. R. R. Wilson officiating. Burial will be in Eel River Cemetery.

Krumbigel Is Appointed Assistant To Supervisor In FHP Motor Div. 10

L. F. Krumbigel

Leonard F. Krumbigel, Bldg. 4-6, has been appointed Assistant to the Supervisor in charge of Tabulating in FHP Motor Div. 10.



Mr. Krumbigel began his General Electric career in 1922 as a winder in the Transformer Division. He then transferred to the Motor and Generator Division. He held such jobs there as winding armatures and field coils and followed production.

Since 1933 he went to the Fractional Horsepower Motor Divisions, and from 1938 until 1947 did production correspondence. Mr. Krumbigel has been with the Tabulating Section since 1947.

He is married and has two daughters. The Krumbigels live at 2024 Kentucky Ave. He is the General Superintendent of the Forest Park Church Sunday school, and a member of the Supervisors' Club and the Quarter Century Club.

Question of the week: Does Jeanne Holthans enjoy ice skating as much as she used to before the accident. . . . Today the gang bids farewell to Maxine Ramm. Best of luck, Maxine, come back and see us soon. The same best wishes to Helen Priddy who left last week. . . . The Distribution gang had a nice dinner and gift for Herb Grueb, Thursday, in honor of his 35 years with the Company. Congratulations and best of luck. . . . We extend our sympathy to Shirley Hughes whose mother died last week, and to Helen Elbert upon the death of her husband. . . . Have you noticed the proud look Max Harris has lately? The reason is a car. Now Max has no more worries about catching that Bluffton bus. That'll add 10 years on your hairline, Max. . . . If there is a living soul who has more trouble than Eileen Fitch will he or she please step forward. Eileen's crowning catastrophe occurred Friday morning. Seems she came racing from the house to catch her bus (which was already at the corner) and out of breath she crawled aboard and reached into tbe crowded depths of her purse for her billfold (you all know what the inside of a lady's purse looks like no doubt so I shall not explain that it sometimes takes a whole block to find a billfold). After a block's ride the thought hits our heroine that the purse is no doubt home on the dresser. Then the race back home and the thorough search of the Fitch household in the vain effort to uncover the last billfold. Many searching hours later Eileen received a phone call from the detective bureau stating that an honest soul had found her billfold and turned it in to them. Eileen was really relieved, because you see the billfold contained friend husband's check and her only remaining street car check. As any wife can testify most husbands get very upset when the little woman loses their weekly earnings. . . . Happy birthday to Dot Fletter. A little valentine yet. Dot had a nice big chocolate cake from the gals to celebrate.

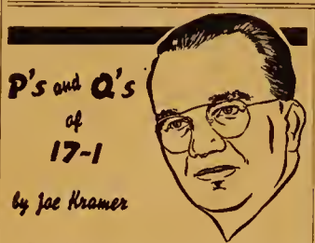
Harold Richmond had a terrifying experience one night last week, his wife awoke him by screaming. There were sparks flying all around the room. He was a little bit groggy when he awoke and thought a Fourth of July celebration was in progress. All the trouble was caused by a short in some electric wiring. Harold, finally coming to his senses, pulled the main switch, made the necessary repairs; and the rest of the night proceeded peacefully. . . . Cecil Gordon has acquired some new attachments for her sewing machine and had a wonderful time trying them out. Every evening finds her seated at the machine trying out these different gadgets. So far she has not come up with anything sensational, but promises that she is going to come up with some new inventions in this art. It would not surprise us a little if we saw some ruffled button holes on her clothing. . . . If there is anything that terrifies Josephine Eme, it is a mouse. She tells us that just the sight of one puts goose pimples all over her. The other evening a dead one lay on the floor and Jo had just as big a fit about it as if it were alive. . . . "Baroness" Kathryn Miller's husband, the "Baron," surely concocts a mean sauce for hot dogs. He, being quite an artist at preparing savory dishes, tried his luck at condiments and came up with this super hot sauce. The Baroness said that after taking one bite of a hot dog smothered in the sauce, blue flames spouted forth from her mouth. . . . Newton Poland tells us that he has been bothered lately with window peepers and is preparing to do something about it. He has oiled up his heavy field piece and if this prowler ever shows his mug at one of Newt's windows again, he will get a fiery reception. . . . O. J. "Fuzz" Meyers reports that he is a grandpa again and he is right proud. He wants us all to know that he now is two times a grandpa. We think that one of the reasons why he is so thrilled is the fact that he will have another member to listen to his French horn tooting, who may be more appreciative than the dog.

It takes 16 years for some orchids to bloom. Behind the wheel a human being can become a blooming idiot in a split second.

No matter how bad the weather may be, it's far better than none.

You can't stop people from thinking—but can you start them? That's what counts.

30 Year Employee Honored



Oliver H. Bowman, Bldg. 4-2, rounded out 30 years service with General Electric, Feb. 13. On this anniversary he received a congratulatory letter from the Company. Left to right in the above picture are Gayle Stripe, Mr. Bowman, Andrew Nichter, Virgil Allmandinger and H. G. Siebold, FHP Div. 15 Supt.

Apprentice BROADCAST

By Myron Auer

Last Monday the office personnel and several of the students were greeted with timely comic (?) valentines. Some gay soul had spent lots of time finding such appropriate verses for the gang (Wasted Effort). . . . Congratulations to Mr. and Mrs. Donald Dimke who were the proud parents of a red headed package of dynamite. He's some boy I hear. . . . On the feminine side of the fence Mr. and Mrs. Duane Shidler boast a baby girl, Martha Kay. . . . Dick Gotschall has been on the sick list for two weeks. All kinds of information was received as to the trouble. Everything from going under the knife to stubbing his big toe was turned in. Joe Fulks gave Dick a setback when he threw in the amazing total of 63 points last week. Gotch had vowed to match him in the Apprentice School games. He fared pretty well, he got the three but failed on the sixty part—50-50 not bad at all. Dick, keep in there as we all wish you a speedy recovery. . . . The smiling faces of two comrades will be missed as Paul Chappel and Jess Sircle are leaving. Paul informs us he will give us a break by attending bowling on Friday afternoons. We hope Jess returns to visit us often. Good luck both of you. . . . To some veterans, V.A. spells trouble. Just ask Whitie Fremion. . . . The basketball aggregation is leading the league in the win column with a healthy two while a goose egg constitutes the setbacks. Keep up the good work, fellows, and keep us in the running. . . . Fish, fish, who caught the fish? Zurbuch and White turned in their usual report of catching nothing but a cold and the devil from their wives. This isn't the only report. Howard Morton along with his ancient methods brought in 52 over the week-end. Kane Lake is where they were 'till Mort left. The question is, where are they now? Mort informed me that for a small fee he will lend you his patent on his exquisite reel for ice fishing. White wants to know, is it possible for all the "good" fishermen to always be at the right place at the wrong time? . . . The B.A.A. has nothing over on the Apprentice School in the trading division. Morton and Barnes made a trade with no cash involved. Merle Auchinbaugh, 201 pound mill operator, was swapped for 143 pound Paul Wuttke, a double experienced lathe operator. . . . Fred Stoup put his money on the wrong team last Saturday as the mighty Tigers from Central ate the helpless South Side Archers who had nothing but a broken-down bow and a split arrow. Fred still has a chance to regain his pennies in the Central-Concordia game. I wish you lots of luck, Fred (All bad as I want to win again). . . . Paul Mischo comes to work every other morning with his queen's good-bye still on in the morning. I think Paul is proud of that red stuff. Is tbat right, Paul? . . . W. H. O. better known as William Henry Owen lost a half century to a policeman for going 70 down Broadway. Bill lost the bet it seems because old John Law caught him. Speaking of Old John, Bill Mowery wanted to race his buddy. His buddy turned out to be a squad car. . . . Just think, fellows, March 11, is almost here. Those exams, aren't they exciting to think about? . . . This spring weather sure is fine isn't it? Morton predicts it's here to stay.

Consideration for others delays traffic, but permits a few people each day to live out their natural lives. . . . Belated valentine greetings to everyone. . . . Valentine cards were much in evidence last Monday especially the comic type. George (Goldie Locks) Mosshammer is still looking for the person or persons who pinned on him the title of Baby Sitter. Orval Haver and Ray Epperson were very much surprised and flattered by the lovely cards they received. . . . It was Valentine's Day, but maybe it should have been April Fool's Day. Betty Baker came to work with a different style anklet on each foot. . . . A celebration was held at the Yacht Club last week to honor Frank Quinn on his completion of 45 years service with General Electric. It was also a bidding farewell to Carl Reiter, who left Division 19 to join the Cost Division at Taylor Street. Carl received a number of nice gifts from the Cost Section Supervisors. . . . Betty Sue Morris suggests that a foot stool be installed at the drinking fountain in Bldg. 17-1. Sue says it is dangerous to attempt to get a drink at the fountain at the present time. . . . We haven't heard of any big cattle or poultry deals being advanced in the south end of Bldg. 17-1. Our reporter seems to be slipping. Come on, Mike, get us some news for the column. . . . If we are fortunate in securing the services of the new member in Group 19x72, I am sure this column will improve 100%. The noted columnist who wrote "Floor Lore from 4-4" has joined the gang in Bldg. 17-1.

Edward G. Brinker Retires On Pension

E. G. Brinker

Edward G. Brinker, Bldg. 4-4, retired Feb. 1 after 35 years of service with General Electric. Starting work in 1913, Mr. Brinker's first job was that of a grinder. He later became a machine operator in Bldg. 4-3, after which he was made a turret lathe operator. Since then Mr. Brinker has worked in the Fractional Horsepower Motor Division as a miscellaneous small drill operator, and multiple spindle drill press operator. He was a layout man from 1943 until his retirement.

We shouldn't say joined. We should say rejoined as Bob Mobberly worked in Bldg. 17-1 before his greetings from his Uncle Sam. Bob, can we depend on you for some help in writing the column? . . . Frank Quinn would like to have it made known that the cane he received at the Yacht Club is to be used in meetings of the N.H.P.C. as he does not need a cane to lean on when he is walking. . . . Philosopher Argend Denney really has one to figure out now. He was handing out his little bundles of sunshine and explaining very successfully that 2 and 2 make 4 when the villian D. Leo Pershing came upon the scene and said this is not always true. Denney has gone into research.

In reading "Flicker Flashbacks" in the "Echo" reminded me of a conversation on the bus the other night. Some of the girls from our floor were reminiscing about the days of long underwear and high top shoes. Speaking of the "Echo" again, I think we should all appreciate the time and work that is put in this publication. The girls are doing a fine job. . . . It's congratulations to James and Helen Pogaizelski Mattes on their new blue bootied tax deduction. Helen was a former co-worker. . . . Harold Kiel has a pair of pockets that he tries to carry full of water. Maybe he thinks he needs a little ballast on the windy days we had last week. . . . The tiers in group 562 think that Walter Kryder should move near Monroeville. Wonder if the Leo-Monroeville game had anything to do with it? . . . Happy birthday to Mary O'Shaughnessy and Otto Brandt. . . . If you saw all the scrambling at the insulate between table, it was Lola McCague finding a mouse in her glove. . . . Have you noticed that Violet Brower is changeable about when she wants to sit at the cafeteria? . . . Emma Bennett was really having a time last Friday. The excitement was over the fact that she was getting ready to say "I do" Saturday. . . . Newcomers to the early bird shift are Helen Biddle, Beulah Huff, Jeanette Brienfalk, Julia Heuer, Pauline Stocks, Gertrude Martin, Betty Blackburn and Augusta Boehm. Hello to all and hope you enjoy working with us. . . . We bid farewell to Ruth Troyer and Gladys Strong. They have gone to Taylor St. . . . If you have noticed Margie McDonald limping it was because she slipped and twisted her ankle. . . . Our sincerest sympathy to Marge Kennel in her recent bereavement.

The best tip to purchasers of automobiles is don't tip!

The photographer forgot one picture at last week's Foremen's meeting — the one where Ozzie Nahrwold was sitting on the floor after the collapse of his chair. . . . Arnold Engle is now smoking cigars with a bang after getting that Buick. He has also issued a challenge to Russ Deveny, but he will have to wait 'till Russ gets the Mercury fixed again. Someone skidded into it while it was parked in front of his house. . . . Our hats are off to Lyle Claphan this week for getting his picture in the evening paper with the other officials of the Northwest Community Association. . . . John Repine decided to take a little evening snooze while sitting by the stove waiting on the Mrs. to prepare his supper. He was rudely awakened by her batting him with a large towel putting the fire out where his shirt caught on fire. . . . It ought to be about time for Capt. Hendrickson to take another one of his submarine trips in Big Lake. . . . I miss those reports I used to get about the roads up north in the Indian country from Virgil "Potsie" Anderson. How about it, Potsie, is Sunset Pass drifted shut this winter? . . . We have another representative from the Apprentice school. Eugene Werling and another newcomer to the group, Hubert Sherlock, who is helping with the oiling. . . . Harold McMaken also celebrated a birthday last week. . . . Jess Batchelder was having a time trying to lift the top off a press last week when someone told him if he would take the other four bolts out it would come off easier.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Monday morning the girls in the office were very pleased with the hankies they received from their secret pals for Valentine Day. Peg Turschman was taking no chances in not thanking the right person. She made the rounds of the office telling everyone how much she liked her pretty yellow and brown hankie. . . . We were sorry to hear that George Denner was struck by an automobile over the week-end, but we understand he was not injured seriously. . . . Happy birthday to Roy Rippe today. . . . Welcome back to Paul Miller in the Cost Section who has been on the sick list for sometime. . . . At last the fellows were able to do some ice fishing over the week-end. When we left work Friday evening Charlie Gable, Kenny Sheehan and Gordon Smith had some big fishing plans for the week-end, but for some unknown reason there was very little said about the trip on Monday morning. What was the matter, boys, not so proud of the results? . . . Ann Smith is very happy with her new apartment and is very anxious to move in. . . . That's all for this week, see you later.

Marie Kettering Writes 'Behind Cracker Barrel'

Marie Kettering

Marie Kettering, Bldg. 8-1, is the Division Editor of the Week as the author of "Behind the Cracker Barrel in General Stores."

A G-E employee since 1943, Marie first started as a blueprint clerk in Bldg. 4-4. She then transferred to Bldg. 20-2 as an order clerk, working for E. J. O'Neil. Last July she came to Bldg. 8-1 as secretary to Lloyd Platt, Supervisor of General Stores.

Reading and record collecting are her hobbies. She likes to read all kinds of books. Marie has a collection of about 600 or 700 records, with the Andrew Sisters and Bing Crosby as her favorites. She also has a sizeable collection of religious records and some of Glenn Miller's recordings.

Marie has a staff of three reporters to gather the news for General Stores. They are Carl Soest, Ward Staley and Henry Guenther.

Advice to all wives whose husbands are working short time. Be smart, girls. For example: Melvin Bill has to do the weekly family wash; Fritz Rudusky, the weekly family ironing. Of course, Melvin is smart, he has only to turn on the switch and let the washer go to town, but poor Fritz has to stand many weary hours on those No. 12's pushing that old iron. The only thing in Fritz's favor is that he is able to stand the heat since his job is working around enameling ovens. Now, girls, we don't say that this will always work. It depends upon who's the boss, but here's an idea, since marriage is supposed to be a 50-50 proposition, let your husband be boss while he is at work and you be the boss the rest of the time. (Boy, is yours truly ever due for a panning.) . . . Fatty Morse received a nice Valentine, but the question is who had it first. Could you by chance, Leo Elward, have the answer? . . . Bill Rohe also received a Valentine. It was the Super Salesman type which we thought was very appropriate. . . . Who's giving the cigar to who now days? Wimpy Lemper was seen giving cigars to Gene Coulter, we wonder why? . . . Our absent employees due to operations are Jake Arnold, David Troyer, Delmas Detter and Johnny Powner. On the sick list are Lloyd Cowell, Harold Sorg, and Altos Corson. Here's wishing you fellows a lot of luck and a speedy recovery and that we will be seein' you soon.

Young men who drive with one arm are liable to run into a church.

Tanks To You From Plating-Two

By Marie Lantz

Sometimes we believe this world is becoming more civilized; it's noon on St. Valentine's Day and no comic ones have arrived as yet. (Valentines—we mean). Then, seriously, we know this world is civilized—but we wonder. That happening in Hungary that left the whole world shock-bound was horrible. Encouraging, somewhat, is the fact that goodness abounds in this old world yet; peoples of all nations join in mutual protest of Communism's outrage on Christianity. . . . Around here they call him "Shorty" Robinson—but certainly not because of stature. At least we think Cliff is of average height. In brief, the "short" of it comes from this tall fishing tale. Along with Angler Andrews, "Shorty" went to Witmer Lake last week-end, to "fish", of course. As usual, his "luck" was bad, he eyed Andrew's half-dozen enviously and felt disgust that the only gill he got was "short," at that. Meanwhile their attention was distracted to a spot on the lake where all the fishermen were gathering. Investigating our platers found that a small boy, about six years old, who accompanied his father, fishing, astounded his audience with the amount of fish he caught. "I'll show you how," he offered. "I just jerk the line a little," and, incredibly, he pulled in more fish. Wide-eyed with wonder, Robinson wanted to "buy" his fishing hole. The youngster refused. We'd say he was "Johnny-on-the-spot." . . . "Pouff" Decker has threatened to expose your scribe and make a real story out of this minor episode if Tanks doesn't. They credit me with hitting a new high—so startled with the ensuing noise when accidentally leaning against an air-hose, I was up "in the air" and not with the greatest of ease, please.

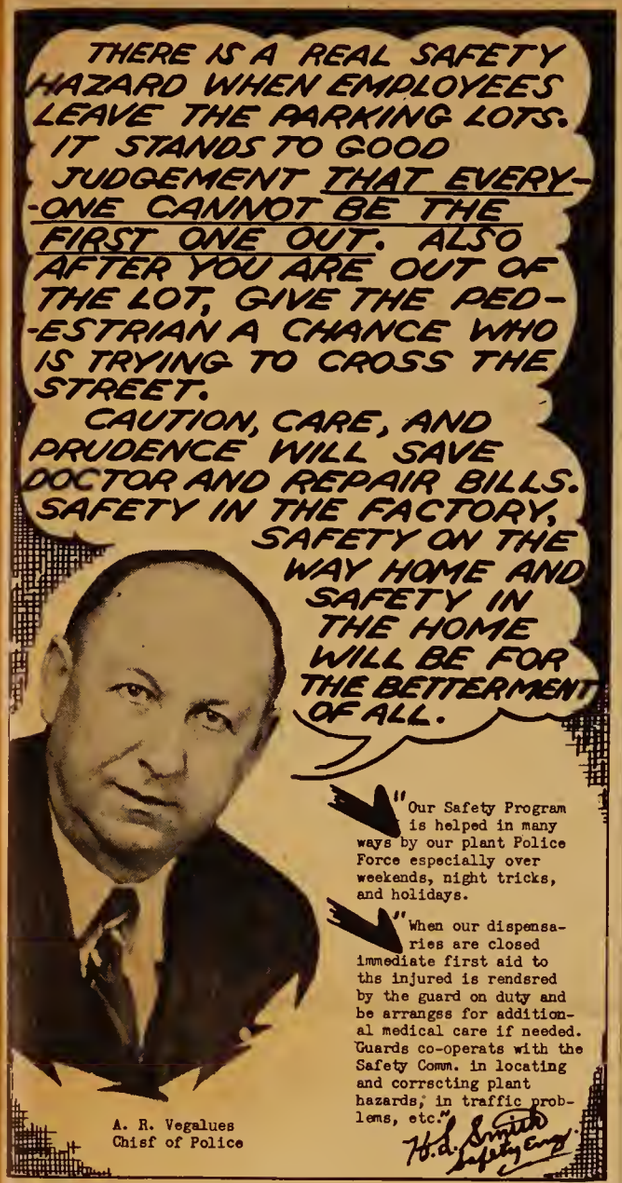
"Would to God that harmony of nations were an object that lay nearest the heart of sovereigns." George Washington.

You've all heard of automobiles called "hot rods." It seems that's what Cliff Smead has. In fact his car got so hot it caught on fire and Cliff needed the city firemen to put out the flame. . . . Max Clum says he hopes he can get a new car in the spring. He's not satisfied with his brand new Oldsmobile. . . . After ending in third place the first half, our Bldg. 17-2 bowling team went into the second half with a slow start. So far it has won five and lost seven in three weeks of bowling. . . . We were glad to have Roy Mentzer pay us a visit last week. Being a man of leisure seems to agree with him, he looks fine. . . . Mrs. Vance Burnau was pleasantly surprised with the box of plastic greetings her husband brought to her, purchased from Elex. He gave them to her a few days early for Valentine Day so he had another purchase to make—a heart box of candy. . . . At this writing Mrs. Dave Slater is improving in health. She has been ill since November, and we hope her improvement will continue until she has completely recovered. . . . Mr. and Mrs. Herb Winter certainly have a cute little son. His pop brought some pictures of him to show the gang. His name is Denis. . . . Erv Lange is right on the job as to fire prevention. He made sure that Harold Kiel's pocket would not catch on fire. He saw a pipe protruding and didn't want to take chances of his trousers catching fire, so he put enough water in his pocket to make sure.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Frank Enderle was somewhat late leaving the shop one afternoon. In fact he was 15 minutes late. Some fun-loving, red-blooded co-worker had put about 200 staples in Frankie's clean shirt and it took him a quarter of an hour to pick them out in order to don the garment. . . . George Wolfe suffered a minor injury to his left leg last week when a commutator fell over and badly scratched his shin. George is bearing up bravely; he says he has the only technicolored leg in the plant. . . . Henry Becker is sporting a very bloodshot right eye, but he assures us that it's neither from bad liquor nor the wife's fist. Just an inflammation due to more or less normal causes. . . . Elmer Minnick says, "What's wrong with my haircuts, are they really that bad?" . . . Elvie Nicholson wonders why his cow doesn't have any confidence in him. "Why," says Elvie, "when I go to milk her I've got to chase her down, and then she holds out on me on the amount of milk she gives." It is alleged that one time when Elvie was milking her she switched him across the face with her tail. Elvie fixed that tail by fracturing it. Maybe Bossy remembers that incident, Elvie. . . . Ruth Bell of Mr. Wagner's office retired last week, receiving gifts and a send-off from her fellow employees. Good luck, Ruth.



We wonder who in the tool room sings the "Pussy Cat Song" every morning. We will have to slip over there and see, as it doesn't sound half bad. . . . We wish Jean Fry a happy birthday which was on Valentine Day. . . . If anybody needs any chiropractor treatments see Mac McCray, as he really can take the kinks out of your neck. . . . Irma Zion is back to work after having her vision blurred when drops were put in her eyes. . . . We wonder if Kenny Casselman still has that gun that he's been shooting the bull. Say, Kenny we would like to hear all of the story behind this report. . . . If you feel a draft whizzing by, it's only Louie Miller going by after some material.

Reiz Serves Company 30 Years

Christian A. Reiz, Bldg. 6-1, recently celebrated his 30th anniversary with General Electric. At that time he received a congratulatory letter on the completion of his long service. He also received a gift from his co-workers. Left to right in the picture are Richard Robertson, Mary Warren, Ruth Schroeder, Henry Bruggeman, Ann Lapidot, Phyllis Nordyke, Mr. Reiz, Marie Alleger, Marie Renz, Tom Dent, Harry Beatty, Joe Hambrock and Ruby Flaugh.

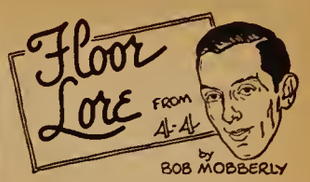
The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

If you wondered why there wasn't enough WORKS NEWS to go around last Friday it was because John Haggenjos took them all home to show his relatives his picture and the write-up about him in the NEWS. That's O.K., John, as there isn't everyone who makes the news for such a good purpose. We don't blame you for showing off. . . . Chet Carey really had some tough luck over the week-end. He hit a slick spot on a black top road and his car hit a telephone pole. We are glad, Chet, that you weren't hurt. . . . Maxine Luker is the latest city farmer. The Lukers bought a new farm, and we do hope that you will like it very much, Maxine. By the way we are all invited out for a chicken dinner if we bring the chicken. . . . Maggie Moore spent the week-end in Indianapolis visiting her sister. She saw some of her relatives which she hasn't seen for "ages." Maggie says it sure was good to see them all. . . . Welcome back to days, Rose Liby. . . . The girls on silver soldering are all thrilled over their new shields and thank all who were responsible for them. . . . George Miller has made another resolution. This time it is to never go fishing with Harold Mosshammer again. He says it is the same as going hunting with him, you never get anything. Oh yes you do, George, Harold got a good cold out of it. . . . Jerry McKown thought maybe if he took his wife fishing his luck would change, but even that didn't do any good. Maybe you and Harold should go together. Since you are both so bad you could maybe have a little luck. . . . Congratulations to Roy Orr. Bob Federspiel reports that Roy's car will now run without being pushed. . . . Have you noticed how much earlier Robert Boone gets to work recently? It is because Bob doesn't have to spend that time in the morning "steaming his hair" to get that pretty wave, as his life gave him a "Toni" a week ago. Do you know, Bob, you can't tell it from the real thing. . . . Welcome back to the reporter staff to "Braunie." She will be our second shift news gatherer again now that she has been called back to work. Our thanks to Mildred Snyder for her willing help.

The younger generation learns things quickly from the older, says a writer. And maybe the younger generation is making a mistake.

Four G-Enerations



If the two youngsters in the photographs, below, follow in their parents' footsteps, they will someday be joining General Electric. Four generations of G-E folks are represented in these photographs that were taken by Leamon Huffman, Division 17 at Taylor St., both youngsters' grandfather.

Left to right, above, are: Mrs. Mildred Phillips, Bldg. 4-4, mother; Mrs. Mary Woodward, retired from the Cafeteria at Broadway, great-grandmother; Larry Phillips, and Mrs. Huffman, Bldg. 17-4, grandmother.

Left to right, above, are: Mrs. Mary Eversole, mother; William Woodward, retired elevator operator for the office of Bldg. 19, great-grandfather; Dianna Lynn Eversole, and Mrs. Huffman. Dianna has nine grandparents.

Today we are saying "30" to the column "Floor Lore From 4-4" as written by this reporter. "30" in journalistic circles signifies that is all, the end has been reached. Its primary function is to designate that there is no more "copy." In other fields of journalism "30" has been used by some radio commentators to let the audience know that is the end of the news for that particular period of time. . . . For the past three years we have received great pleasure in bringing news items and small bits of color concerning the members of the Repair and Return section. We have attempted to the best of our ability, to make the column one that could and would hold your interest. If we have failed then we are really sorry, but on the other hand if we succeeded in some small measure to add to your relaxation, then we feel the task has been more than well compensated. . . . It has been a great pleasure not only to write of you fine folks, but it has been a greater pleasure to work with you. . . . If by chance this column is continued by someone else, we wish them the very best of luck and best wishes for a successful news coverage. . . . Thus for today on this Friday, Feb. 18, your reporter closes this column with a sincere goodbye and "30."

Then there is the woman who couldn't figure out what her husband did with his evenings. So one evening she went home and there he was!

"It is about as hard for a rich man to enter heaven as it is for a poor man to remain on earth."

Our very best wishes for a successful recovery to Evelyn Blakely's mother, who has been at the St. Joseph Hospital during the past few weeks. . . . Mr. Zook has been as busy as a bee recently, as two days of this week were spent in Schenectady, and one day last week was spent at the Chamber of Commerce where he served as president of the Fort Wayne Personnel and Industrial Relations Ass'n. Several of the fellows from the Personnel Division attended the evening affair. And Jean Smith, one of the two ladies attending the meeting, enjoyed everything, especially the lovely corsage. . . . We're glad to have Betty Zieg back after her recent appendectomy. . . . Loyd Bodenhamer tells us at his house they have changed the hit song "Buttons and Bows" into something like "Bottles and Bibs". . . . Dorothea Swank exhibited her skill at the Pistons-Jets ball game last week. During half-time a women's basketball shooting contest was held, and Dorothea walked off with first prize. (She sunk two out of five.) . . . Duane Stroud, dispensary, is sporting around his new Nash. You make a nice looking couple, Duane. . . . Little red hearts were popping all around Herschel Smith when he opened one certain piece of mail last Monday. It was a sweet Valentine from his wife. (We think he had her send it to impress us). This one must have been quite touching, because he usually erases the signature from cards he receives and mails them back to the sender with his own name on them. "Just being economical," he says. But this one, he wrapped in asbestos and is carrying it close to his heart. . . . The other day I read where a "prominent dentist announced that Eskimos enjoy pain." It seems that dentists have that idea about practically everybody.

Honored On 30th Anniversary

Hilda Mueller, receptionist at the Bldg. 18-Gate, recently celebrated her 30th anniversary with General Electric. The above picture was taken when she was presented her 30-year congratulatory letter. Standing behind Miss Mueller are, left to right, A. R. Vegalues, Chief of Police; J. B. Greer, Supt. of General Service Div.; Roy Weick; E. H. Hanauer, Fire Chief; and F. O. Harrold.

George A. Block Dies At Hospital

George A. Block, 78, 415 W. Butler st., died at 9:15 p.m. Saturday at St. Joseph's hospital after an illness of several months. He was a member of the Quarter Century Club, and the Men's Bible Class at the East Creighton Ave. Church of Christ, where he was also a deacon.

Employed as a carpenter in 1907, Mr. Block retired from General Electric in 1932.

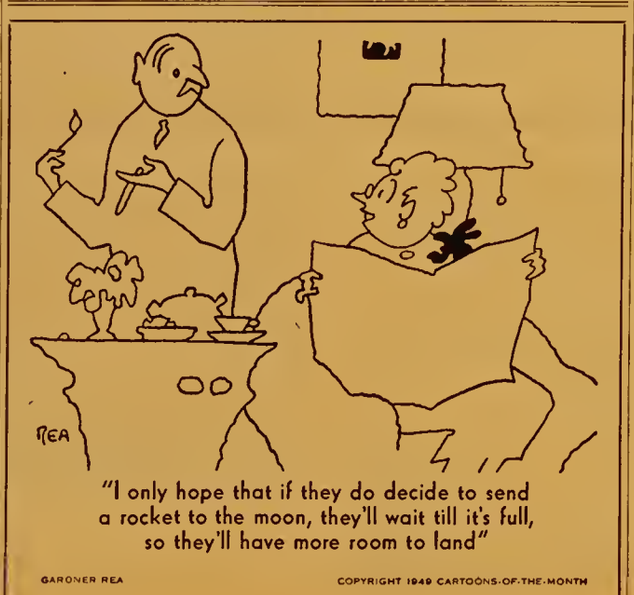
Surviving are four sisters, Mrs. Louis Pequinot, of Pierceton; Mrs. Mary Stewart, Mrs. Emma Hatch, and Mrs. Laura Bailey.

Funeral services were held Wednesday at 2 p.m. in the East Creighton Church. The Rev. Charles Matthews officiated and burial was in Lindewood Cemetery.

Our sympathy to Floyd Murray on the death of his son. . . . Our friend Walter McKinney celebrated his birthday Wednesday and we hope it was a pleasant one. Walter is taking his three weeks' vacation, and then retirement. We sincerely hope your health improves, Walter, and may you enjoy many more happy birthdays. . . . Congratulations to Esther and Johnny Root, the proud parents of a 5 lb. baby girl. . . . Lew Barney will look twice the next time he leaves a certain theater to make sure the door is marked "Exit" and not "Ladies". . . . That greenish pallor on Rog Pierson's face when he left the office recently was the result of a good old "smokehouse" cure. Rog sat in his corner in a cloud of smoke coming from the pipe of a well-meaning friend for about an hour, and it just got a little too stout for him. (Plenty of cured ham on hand, folks, or should we say "on foot".) . . . Harry Nickels received a large fancy valentine on Monday, which just did his ole heart good—to think his friends remembered him in this manner. . . . Works Service Division and Shipping and Receiving put on a real show for the Supervisors and Foremen's party one night last week. It was an old time medicine show—barring nothing. The "bugaboo juice" sold fast with Harold Smith as the medicine man. Ernie Hanauer convinced the boys he's all muscle and was under a terrific strain at times. Elmer "Emily" Mesing met up with "foul play"—and it was Arnold Landis, tottin' a shootin' rod, who tried to straighten out the affair. Besides a snake charmer (Hap Leider), there was a fan dancer, none other than Bill Gregg—swinging a mean leg, concealing his shapely "figger" behind one fan and a flower. It was said Bill Altekruse did a bit of good acting—so natural! Charlie MacKay was m.c. and from all reports, did a swell job. . . . Sorry we missed your birthday last week, Gloria, will try to do better next year, I hope. . . . We understand Dick Gallmeier is getting that new house paid for in a hurry, according to the poker game boys. . . . The other morning coming to work, Charlie Hartman ran out of gas. After having someone push him into a filling station he discovered that it wasn't open. After debating what to do, he took the hose and drained it, and came merrily to work. . . . Has anyone noticed the rare stamps that Whitie Van Auken and Oscar Rodenbeck have been sending to each other? . . . Skin McGary doesn't think he got much of a welcome when he came out to T.S. Everything was going just fine until he and Vern Smith went up to the monitors. When Skin opened the door, off came his cap and he didn't see it again until quiting time when it was formally presented to him torn to shreds. . . . Ted Waggoner thought it was a big joke when Mrs. Stuart had to make a rush trip to the plant last week. Joe seems a little reluctant about telling what happened, especially if there are any ladies present.

Little Valentine

About 47 years ago a little valentine arrived at the Henry household and was named Sammy. Mr. Henry, who now works in Bldg. 10-1, celebrated his birthday Monday, St. Valentine's Day.



Sleuthing IN BLDG. 4-6

By Joan Poos

Another new car! The new Hudson becomes proud Papa Claude Voss. . . . Gwen Stienbarger has been searching for the prankster who took her street shoes. She didn't have to look far, for the next rainy day she discovered them in her boots. Bad luck seems to come in streaks as does absent-mindedness to some people. Shortly afterwards she left a pair of new hose as well as a new pair of gloves on a store counter while searching for bargains. However, all is well now and the sun has come out again. . . . You'll be missing several familiar faces in case you haven't noticed. Face No. 1, Pete Fenoglio, DC Section, transferred to the Pittsfield Works. Face No. 2, Warren Brown, who has transferred to Motor Generator. Face No. 3, Jack Grafe, Motor Sales, who will be seen in the "Windy City" from now on. . . . New faces (all in DC Div.) are William J. Caruso on a three months assignment, and Garland Roby and Carl Hubbartt, who are taking over Brownie's vacancy. . . . If you happened to see Helen Brosche covered from coiffeur to corns with mud recently, the answer is "Sir Walter Raleigh" dropped her as he tried to carry her across the street. . . . Rumor has it that Ray O'Keefe has them swooning these days. Just call him "Frankie." . . . If you have noticed the smog which has settled down over the AC Section, you can attribute it to Norm Oetting, who is the proud Pa of a 7½ lb. baby gal, Suzanne. . . . And speaking of smoke, have you noticed the smoke screen that Howdie Gerlaugh, Development Division, has been working on lately. Why? . . . Joke: Jack Jennings, Bob Knepple and Shorty Poyser can't wait 'til golf season opens, so they can "clabber" G. P. Baker. . . . Correction, "Esther Bauermerster" should have been Esther Batchelder, whose hubby is ill. So sorry. . . . You should see Gene Hart's "wild pink" apron, which matches his eyes. . . . Happy birthday to Reba Wilkerson and Catherine Gardt. . . . Will all members of the FHP Motor Engineering Division please save your copies of this week's WORKS NEWS (if you can't use it yourself, that is) and send it to Glen Stapleton. Autographed copies are welcome. What are you going to do, Glen, paper your doghouse? . . . We hope Nina Andress has recovered from her attack of messed up 'itis! Seems she couldn't find her belt one day and substituted another only to find her belt, after she had gone to work, in a sleeve. She also tried to put both her coat and hanger on the other evening. What is her main maladjustment?

Spring is here—almost
And with it comes the urge to coast
A lovely lazy mood prevails
To do nuthin 'cept count puppy dog tails.

Valentines were flying Monday. For instance we have "Conceited" Marge Murphy, "Bargain Hunter" Ruth English, "Grumpy" Gerlaugh, "Radio Fiend" Neds, "Wolf" Mesing and numerous others. We wonder what April Fool's Day will bring. . . . "Bye for now from your "pleasant peasant" friend.

McCULLOUGH DIES IN CALIFORNIA

Word has been received here that Francis W. McCullough, a former Fort Wayne resident and employee of General Electric since 1928, died at his home at Riverside, Calif., Jan. 26. He worked in several buildings here as a balancer and assembler in the Fractional Horsepower Motor Division. In 1942 he left the Company to enter the Army.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday noon, February 21, 1949

LOST AND FOUND

LOST—A gold glove holder. Lost between Bldg. 19-Gate and the corner of Lavina and Broadway.

FOUND—Pair pink shell rimmed glasses in brown leather case. Found in front of G-E Club on Swinney Ave.

FOR SALE

1937 OLDSMOBILE — Eight cylinders. A-1 condition, $300. H-59363.

CHAMBER FIRELESS GAS STOVE—A-1 condition. $20. 2209 Curdes Ave.

ZENITH CONSOLE RADIO — Seven tubes. H-60864.

12 FT. CAR-TOP BOAT—Brand new, very reasonable. H-67395.

CHILD'S SPRING COAT—Gleaned and like new. Size 2-3. H-20322.

UPRIGHT DEEP-WELL HAND PUMP—Only $2. H-37777.

1930 4-DOOR PLYMOUTH—Newly overhauled motor, two new tires. $75. 2215 Curdes Ave.

12-GAUGE SHOTGUN — Gleaning rod, hunting coat, size 44. Two boxes shells. A-95495.

PUPPIES—H-15168.

ELECTRIC BROODER HOOD—10 hole metal nest. H-77165 after 4 p.m.

VANITY DRESSER—Walnut, triple mirror, very nice. $18. H-55901

APEX REFRIGERATOR—6¼ cu. ft. A-1 condition. H-50784.

1948 WESTERN ELECTRIC HEARING AID—Just used 3 days. A-55015.

THREE 6:50-16 TUBES — Half price H-48345.

LADIES WHITE FIGURE ICE SKATES—Size 8. $8. 2622 Fox Ave.

TRANSPORTATION

WANTS RIDE—Mary Schwartz, from Leo. Works for Ralph Keller, FHP Div. 17 at Taylor St., from 6:48-3:18.

Former Fort Wayne Man Named N. Y. Dist. Mgr. For Electronics Dept.

Grady L. Roark, formerly of Fort Wayne, has been appointed New York District Manager for the General Electric Company's Electronics Department, it has been announced by Arthur A. Brandt, General Sales Manager, at Syracuse, N. Y.

He succeeds Howard J. Mandernach, recently deceased. Headquarters for the district office is at the Company's building at 570 Lexington Ave., New York City.

A native of Oklahoma City, Okla., Mr. Roark is a graduate of Oklahoma A and M College with B. S. degrees in electrical and mechanical engineering. He has been associated with General Electric since 1933 in various sales, customer relations, and manufacturing activities.

Mr. Roark was an Assistant Section Superintendent in the FHP Section 14 when he left here in 1945.

Thisa and Thata "SPECIALTY MOTOR"

by Helen Engle

We thank Merl (Cookie) Keesler for those wonderful cookies he brought to work. Merl says he made them but we know better. He had better stick to golf and let his wife make the cookies. . . . We sure have talented girls on the winding table. Malinda Gehle is knitting sweaters and baby things; Clarice (Oh, when am I going to get them done) Woodruff is knitting socks; "Instructee" Esther Fagan is knitting sox and more sox. . . . Kathryn Hepker can bake another upside-down cake, as we are getting hungry. . . . We wish Olive Adams a speedy recovery. She is ill with the flu. . . . We welcome Florence Byers, who is now working days. . . . Marie Griffin is back after being on sick leave since Christmas. It's good to see you back, Marie. . . . Billie Tucker brought a get-well card to send to Edna Houser, but when Billie went to sign the card she found it was a birthday greeting. Better luck next time, Billie. . . . Carl Harmon, our boy in Bldg. 4-3 test, is back on his old job. How do you like Bldg. 4-3, Carl? He and his wife are still debating the question of dog versus linoleum. . . . Lester Hubartt says that you can't eat a good meal in a half hour. Time goes too fast doesn't it, Les? . . . Hilda Seiler was walking home from church last Sunday when a gust of wind came along and blew her hat off. Hilda was wearing a new pair of shoes and she stopped, looked down at her shoes debating the question: "do I get the new shoes muddy or do I let the hat go?" The result—she let the hat go. She wanted a new one anyway. . . . Thelma Purdue is a grandmother again. . . . Speaking of grandmothers, those pictures Ethel Younker had of her granddaughter were all right, too. For the life of us we can't figure out how Carl Metker could lose Skin-head Bain. I would think his head would shine like a beacon anyplace. . . . Mary Nute and her husband are on their second honeymoon in Chicago. . . . George Prince and his wife are taking care of a six year old boy for some friends. Can you imagine the results as they have never had a six year old in their home and especially a boy. . . . Hazel Herron's father fell the other day. We hope it isn't too serious and he gets well soon. . . . We extend our sympathy to Evelyn McClain Muller whose daughter died last week. . . . We were reading a WORKS NEWS from 1917 that Harry Haberkorn gave us. We noticed that the Fire Department and Band had an annual outing and that Fred Duryee read the Gettysburg Address instead of the Declaration of Independence by mistake.

Every one desires to live long, but no one would be old.

Let's Eat! CAFETERIA and RESTAURANT MENUS

FEBRUARY 21 THROUGH FEBRUARY 25

BROADWAY	TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant—16-2 12:00 M. - 1:00 P.M.

MONDAY, FEBRUARY 21

Fried Apples	Buttered Peas

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

Menus Subject to Change

HERE and THERE in BUILDING 17-4

by Maxine Baker

Friday, several men of the Test Section were enjoying the aroma of an after dinner cigar, presented by Kenny Gilwater who papa-ed again, with a daughter. Congratulations, Kenny. . . . Ray Solga has had several offers by ice fishermen to join the group in session of frigid capers with bluegills some Saturday. Ray hasn't figured out yet how much the last three months resting from a previous ice folly has cost him; at least $100 for those he believes he might catch in the future. . . . Everytime Tony Miller goes fishing something goes wrong with his equipment. One time last fall when the water hadn't turned to ice he dragged his outboard motor some 300 miles to discover that it wouldn't start. Last week he hauled his gasoline lantern to the lake to keep warm while fishing, but its generator wouldn't work. It has been suggested that he should make a dry run in his back yard before he decides on a trip. . . . Every Saturday for several weeks, Bill Mills put on his red cap, shouldered his trusty rusty musket and assumed the role of the aristocracy. He joined the chase (fox hunt to us commoners) in and about Ossian. All owners of dogs of non-descript breeds have been duly warned and have hidden their pets or else the weary have not been able to catch the wary—anyway so far—no fox! . . . Lawrence Mellinger has a new assistant, Herb Tilbury. The first task Herb had to perform involved crawling around the cages on the life test (several comments against the dignity of man were passed on this occasion) but now Mellinger has him under control. Herb has a job with a 250-lb. weight to balance, so he keeps both feet on the floor and the theories of Darwinism have ceased. . . . Wonder where Clara Gehring learned her cave man tactics? Paul Woodard is mighty lucky Clara's aim was bad or he would be looking for a wig. Scalping was done in the frontier days, Clara; you'd better go West. . . . Welcome to Edith Childers and Edna Harkenrider. Hope you like your new work. . . . It's been said all important people have birthdays in February. If you don't believe it, just ask Lucille Welch. We hope you have many more birthdays, they're becoming to you, Lucille. . . . Edna Ward seems to be recovering nicely. Keep up the good work. . . . Have you seen the Arthur Murray of Bldg. 17-4 give out with some fancy foot work? We know him as Bill Turner. Nice going, Bill, do the Lindy Hop for us sometime, will you?

Oh see the jolly Pistons
Come racing down the floor
You'd think they'd never lose a game
But then they seldom score.
They're big and tall, and lanky
They're full of speed galore
But they seldom win a ball game
Because they seldom score.
Carl Brenner is a Pleton fan
He is disappointed more and more
It's hard to brag about a team
When they very seldom score.
Now when Brenner and the Pistons
knock at the Golden Door
St. Pete will send them down Below
With those who cannot score.

Cy Seymour will no doubt want extra copies of the above poem if all indications of the discussions in the cafeteria line with Carl are confirming.

Inquiring Reporter

WHAT ARE THE OBLIGATIONS OF BEING A GOOD CITIZEN?

DEWEY BAUMGARTNER
Taylor St.

"I think that application of the Golden Rule, 'do unto others as you would have them do unto you,' is the most important obligation of a good citizen."

H. J. LOWERY
Bldg. 27-A

"The obligations of a good citizen are courtesy, observant modesty, loyalty, honesty, refrain from all that is destructive, and abide by the laws of our government."

LOIS ULREY
Bldg. 20-2

"To abide by the laws of the state and nation; exercise the rights of the United States Constitution to the best of one's ability, and be honest and expect honesty in return are a good citizen's obligations."

R. F. MARKEY
Bldg. 4-3

"This question covers a large field, but one obligation as well as a privilege comes to my mind. That is casting your vote (according to your own personal views) on election day, which many of us fail to do. Minding your own business is also an important factor in my opinion."

LEONA M. BRANNING
Taylor St.

"I think a person should be dependable and help to make our country a safer and better place in which to live."

44 Years Ago

Firemen Get New Uniforms

The picture above was taken Sept. 4, 1905, when the Work's Volunteer Fire Department participated in the Labor Day parade. It was the first photograph showing the members in their new uniforms, which were presented to them by the Company in February, 1905. The complete outfit included rubber coat, helmet, boots and badge.

A record kept by the department revealed the following account of a fire the previous year, on July 10: ***"Fire destroyed the roof of Laboratory Power Plant (which is now the Plumbing Shaaty). Fire took place about 12 o'clock at night. The City Fire Department responded to the call and placed pump on our hydrants and sucked all the water out of the system. Therefore, an order was issued prohibiting the city department from hitching onto any of our hydraats. We also placed a twin-hose connection on the hydraat to take care of two lines of hose. This fire was caused by the raising of gas-pressure in heating-stoves. Orders were issued by Superintendent E. A. Barnes to do away with all gas-heaters about the Works."***

by Vivian Bond

The life of a column writer is not a bed of roses, some weeks all of the reporters come through with a quantity of news items. This week our reporters have been so busy admiring their valentines (or wondering who sent the comic ones) that they could not be bothered. Last week I confidently announced that we would have a weekly poem from Pat Olinger of Bldg. 18-5—the very next week she fails us. You can imagine our surprise and complete happiness when Dolores Connin of Bldg. 18-4 comes through with

THE NEWS IN RHYME

This week the men are in the news.
There are some things I cannot tell.
My rights as a reporter, I can not abuse
So here goes! Wish me well.
Ed likes his work and likes it well.
But those telephones ring like mad.
So he says—"I buy, not sell"
As things go from worse to worse—then bad.
Now we have a lucky guy named Paul,
He wins every round.
Now listen, I ain't telling all,
'Cause you see, I'm duty bound.
We had better get our reservations in
Before it is too late,
Because Fred, to the depot he's been,
To get our tickets on old No. 8
Herman seems to be in a flutter new.
Because the SN's aren't quite right,
But hold your temper, please do,
They'll be OK, just sit tight!

Emily Guth, Bldg. 18-2, entertained a group of friends at her home Saturday evening. . . . Thelma Stone, Bldg. 18-1, spent the past week-end in North Manchester with Betty Garber, a former Payroll employee. . . . "Roz" Cameron, Accounting Division, is convalescing from her recent appendectomy at the Lutheran Hospital. . . . Elizabeth Carnell, Bldg. 18-1, has been absent due to illness. . . . Walter Konow has been transferred from Bldg. 6-2 to the Accounting group replacing Richard Fry who has joined Internal Audit in Bldg. 18-1. . . . Rex Mericle, Bldg. 18-5, is a patient in the St. Joseph's Hospital. . . . The memorable Floyd Collins had nothing on Mae Lacy of Bldg. 18-1 Accounting. The only difference—it wasn't a cave but the Bldg. 18-1 vault. She didn't have a rock on her foot, the door was locked and she didn't have to stay in the vault quite as long as Floyd stayed in the cave. She assures us that 20 minutes is a long time to wait for someone to come along and let you out. The moral to this story is: Always take extra work along into the vault. Then if the door closes on you, you won't waste time!

G-E Club Scores 3 Victories

The G-E Club basketball team started the week off with an impressive win over St. Andrews church team, 75-42. The boys showed some fine team work and a lot of fast breaking and good pass work to run up the score. St. Andrews played good ball, but missed a large percentage of their shots.

Sunday night, as a preliminary to the Piston game, the Club team beat the Van Wert Independents, 27-24, in a good ball game that was close all the way.

Monday at the Club gym the G-E boys were too rugged for the First Methodist Church team. They won 75-38. Carr with 32 and Gettys with 17 were high point men for the team.

The next games will be played Monday, Feb. 21, at the Club gym at 8 p.m. facing the Maumee Club; Tuesday, Feb. 22, in a league game at Central at 7 p.m. against Salisbury Axle; and Thursday, Feb. 25, 8 p.m. at the Club gym playing the U.S. Naval Reserve club.

Open Bowling

EVERY SATURDAY
3 P.M. - 11 P.M.

At The
G-E CLUB

The Big News of the week is the 279 score rolled by Orval Doherty of the Small Motor League. This is high single game of the season. Orv had a neat 658 series on games of 279, 223 and 156. .

Lowell Welker had a nice 616 count on games of 241, 168 and 207.

The Models team took over first place in the league by one game over the Inspection and Production teams.

Two hundred scores were rolled by Doehrman, 231; Erv Haugk, 223; Ed Reese, 204; Bill Walt, 203; Jim Daley, 202, and Kammeyer, 221.

Masonic League

The Patrols and Gavels are all tied up for first place with 11 wins and four losses.

Two hundred scores were kegled by Jones, 222; Ed Crabill, 218; "Sapp" Quinn, 216; Gidley, 215; May, 211; Harold "Homeless" Garrett, 210, and Marion Bailey, 200.

Office League

Those red hot Alternators are still out in front with a record of 15 wins and three losses. Oberlin of the Blueprint team shot games of 222, 232 and 159 for a 613 series.

Two hundred scores were rolled by Les Shroyer, 226; Bob Blomker, 224; Miller, 219; Fred "Big Hoor" Schafenacker, 213; Vic Rump, 202, and Thompson, 202.

Apparatus League

Team No. 5 is really rolling along. They have a record of 11 wins and only one defeat.

Bill "Detroit" Piercy came up with a 610 series on scores of 215, 200 and 195.

Two hundred scores were rolled by H. Fansler, 226; L. O'Shaughnessy, 225; Jimmy James, 221; Arnie Horstmeyer, 218; Bob Blomker, 216; Andy Anderson, 206; A. Thompson, 205; Hal Spath, 201; Paul Perry, 200, and Pappert, 200.

Interdivision League

Noah Kuntz was worried about not seeing his 200 score in the WORKS NEWS the other week. We hope he noticed that it was in last week.

The Taylor St. team is in first place all by themselves this week. Three 600 counts were rolled this week with "Do Do" Matthews showing the way with a 634 series on games of 232, 168 and 234. W. Berning rolled 210, 198 and 222 for a neat 630 total, and Jerry Saylor, 194, 238 and 172 for a 604 series.

Plenty of 200 scores were kegled with Clarence Rump showing the way with a 224, Doyle Miller, 222; Burnau, 211; Thiele, 211; Herm Westrick, 210; Giese, 210; Herb Habig, 204; Les Shroyer, 204; Milt Marks, 202 and 200; Tobias, 201; Paul Walker, 200, and Noah "Worried" Kuntz, 200.

Bowling and Stuff

After reading last week's "Inquiring Reporter" column you can see what a few good ghost writers can do for this column. Loretta Runyon of Taylor St. stated that she especially enjoyed "Foul Line Fables." Oh brother, I'm going to have to get a larger hat and more ghost writers.

There's going to be two nice shiny brand new belt buckles around the bowling alleys next week, as Ross Smith, Bldg. 27, who bowls on Thursday night in the Apparatus League, pulled down first place and $50 in the City Tournament. Ross had a 744 total with a 105 handicap. The other buckle winner was Walt Mertz who along with his brother, Andy, won the actual pin championship in the City Tournament. His share of the swag was $42.50. Congratulations, boys.

High scores for those trophies are Les Shroyer, 689; Helen Wagner, 594; Orval Doherty, 279, and Tommy Williams, 247.

The annual G-E Tournament will be held April 9, 10, 16 and 17. The team event will be held on Saturdays, April 9 and 16, with squads at 3:30, 6:30, and 8:45 p.m. Doubles and Singles will be rolled Saturdays, April 9 and 16, with a squad each day at 1:30 p.m.; also Sundays, April 10 and 17, with squads at 1, 3, 5:30, and 7:30. This will be an A.B.C. sanctioned tournament. Entry blanks are available at the Club. Guaranteed first prizes are team, $85; Doubles, $35; Singles, $20, and all events (actual pins) $10. Don't forget to get your entry in early as entries close April 2. If necessary the tournament will be extended. All G-E employees and G-E Club bowlers are eligible. Entry fee will be $1 per man per event.

Capacity Crowd Sees Final Clash Of Golden Gloves

A capacity crowd saw eight young boxers battle their way to win championships at the Golden Gloves Tournament last week at North Side high school. The twentieth annual event was under the sponsorship of the G-E Club and the Fort Wayne Journal-Gazette.

The champions include:

Flyweight—Salvador Garza, Decatur.

Bantamweight — Frank Davis, Fort Wayne.

Lightweight—Bob Thomas, Van Wert.

Welterweight—Roosevelt Dixie, Fort Wayne.

Middleweight—Jim Calland, Fort Wayne.

Light Heavyweight—Odell Billingsley, Fort Wayne.

Heavyweight—Herbert Weigold, Columbia City.

Bill Valjack, popular boxer and 18-year-old from Columbia City, was awarded the Sportsmanship Trophy this year after being eliminated from competition in the semi-finals. He lost to Bob Thomas in last year's finals.

The eight Golden Gloves champions resumed training Monday for the Tournament of Champions in Chicago Feb. 21, 22 and 23. They have been under the supervision of Trainer Frank Newport of the G-E Club.

Don't forget the annual bowling association meeting tomorrow night.

The Firemen beat the Apprentice School, 44-24, taking the Interdivision Basketball league lead with a record of three won and none lost. The Apprentice men held the lead through the first quarter, but midway through the second period the Firemen overtook them. The winners' scoring was well divided with each man getting at least three points.

G-E To Broadcast Two High School Basketball Games

The Central Catholic-South Side game will be broadcast tonight over Station WANE under the sponsorship of General Electric, while tomorrow evening the Central vs. Concordia game will be aired. Dick Buckley will be the announcer for both games.

Last Friday, the city champs, North Side chalked up their seventh straight win by defeating Concordia, 41-33, at the Redskin gym. The Central Tigers won its second straight game from South Side at the North Side gym, Saturday. The score for the game was 55-52.

A man in Ohio socked a bus driver for asking him to take a back seat. He took affront!

Winter St., after dropping their first two starts of the second half, trimmed Fractional Horsepower, 55-22. The Squares trailing for three quarters of the ball game came fast in the last period to top Transformer, 35-36. Tool and Die dropped a 43-18 decision to Small Motors.

Boxing Tournament Sponsored By G-E Club, Journal-Gazette

Photo by Bob Smith, Journal-Gazette

A portion of the sellout crowd in North Side gym last week is shown above at the twentieth annual Golden Gloves Tournament, sponsored by the G-E Club and the Fort Wayne Journal-Gazette.

Eight Teams Vie In Interdivision Volleyball

In the Interdivision Volleyball League, Friday, Feb. 11, the Squares won two games out of three from the Apprentice Machinists on scores of 7-15, 15-9 and 15-13. The Main Office team won all three games from Winter St. with scores of 15-5, 15-1 and 15-3.

Small Motor team was defeated by Taylor St. in games of 1-15, 9-15 and 3-15. An unusual series was played by General Tool and Apprentice Draftsmen. The scores of all three games were the same, 15-2 in favor of the General Tool team.

The Greeks enjoyed wrestling 2500 years ago—and they're still welcome to it.

Happy birthday to Neva Lutz and many happy returns of the day. . . . Jackie Elder was on our sick list the first part of the week, but we hope that she is feeling O.K. now. . . . Someone overheard Kenny "Baldy" Brown telling how much gravel is in a ton. This certain someone wonders if Brownie has purchased a gravel pit, as he is always trying to sell something, and if he doesn't have it, he knows where he can get it for you. Just a natural born salesman, aren't you, Brownie? . . . Gordon Smith and Glenn Miller were seen recently with their heads together so it shouldn't be long until they'll be telling us of another adventure they undertook. Those two really get some wild ideas. . . . We asked Harry Welches one day why he always wore two pairs of suspenders. He is probably the most Safety Minded man we know, as this is the answer we got: He wears one to keep up his underwear and the other to keep up his trousers, and says that way he is pretty sure that if he would happen to lose one of them he would still have the other. . . . We now have a "Floating Tester." Orrie Ogden floats back and forth between stator test and final heat run. . . . Dick Graham makes a very good lookout since he has been moved closer to the aisle. Nobody gets by him without a whistle. . . . Earl Fredericks and Fred Young received comic Valentines from (they would like to know just who they were from) someone. Earl's was about his fancy shirts and Fred's was something about watching a clock. Wonder why they would have sent you one like that, Fred? . . . The gang wonders what Clyde Cowan has been up to that he has to hide behind that "mustache" lately. . . . Melvin Riley finally got his new Mercury Special so that it will run. Congratulations, Melvin, we didn't think you could do it. . . . A happy birthday to Herman Watters, who is the same age as Jack Benny, he says. . . . Joe Cline has asked me to please ask the person who borrowed his cigarette lighter last Thursday to please return it, as it is a gift from his daughter and is very valuable to Joe.

Students Display 'Light Sorcery' Projects

C. H. Matson, Works Manager, is shown above looking at some of the displays prepared at L. C. Ward School by the sixth grade students of Mrs. Melvin Bill. Mrs. Bill's husband is a leading operator in the Wire and Insulation Division at Taylor St.

Sixth grade students at L. C. Ward School entertained C. H. Matson, Works Manager, last week. Mr. Matson received an invitation to visit their classroom and receive letters of appreciation for the "Light Sorcery" show. These students were among 800 that were guests of Fort Wayne General Electric at a special showing Tuesday, Feb. 1.

In addition to presenting their individual letters, the students also displayed drawings and charts that illustrated various phases of the "Light Sorcery" demonstrations. These displays will later be bound as books as an additional remembrance of the occasion.

Among those present at the class meeting were Mrs. Melvin Bill, their teacher; Catherine Daley, Principal of L. C. Ward School, and representatives of the Superintendent of Schools. Mr. Matson was accompanied by J. E. Estabrook, Assistant to the Works Manager.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

Have you been wondering lately why Packards are becoming so plentiful? You too can own a Packard if your name ends in "meyer." To prove this, look up Proxmire, Mittermaier and Driftmeyer. . . . The Service Bureau had a potluck last week celebrating Solona Hunter's birthday. Lee Stein was in charge and everything turned out very nicely. . . . Virginia Harris, formerly of Bldg. 4-4, is the new girl in the Service Bureau. She was welcomed last Thursday. . . . Bouquets to Mr. and Mrs. R. J. Kilian for placing third in the G-E Square's Bridge Tournament. Vera received a lovely sewing box and Dick a package of golf balls. . . . Ginny Winegart has been assisting her Mother with some interior decorating. You're doing a fine job, Ginny, but just put the paint on the woodwork! . . . Dick Birkenbeul, Wayne Bergman and Homer Carson are leaving the Drafting Division and will go to the Motor Generator Divisions Jack Kirlin is also leaving, but he is going to the Fractional AC Division. . . . Thanks to F. T. Game and C. E. Starke for the new coat rack in the Service Bureau. . . R. M. Donnell is leaving the Planning Division.

Forest Grimm was startled one day when he tried to start his tractor. We understand he was cranking it in the barn and it took off. When it finally stopped it had run through the door and was dangling over the edge of the barn. . . . Rev. Tucher was found weighing himself the other morning in the dark. It seems he must lose a few pounds before he can fit a television screen. . . . Wonder why George Miller's (feuding uncle) came down to see him last Friday? . . . If Elmer Buuck doesn't stop associating with Arlo Hawk and Fred Vogt his co-workers are afraid he will be a gambler. . . . Anyone interested in the finer arts should be sure to contact Johnny Wilson. . . . Lowell Arnold says one sure way to stay out of the dog house is not to buy bubble gum for his children. . . . Roger Green is walking heavy on one leg again. He claims he was kicked playing basketball. Is it a mule you play basketball with, Roger? . . . "Two Loves Have I" should be Sophia Bodigan's theme. Sophia will move to Detroit after her marriage this spring, and she wanted to find a home for her "Pooch, Tootsie." Myrtle Barfell was very happy to take the little fellow, but Sophia couldn't adapt herself without the puppy. She stood it for three days and asked Myrtle to give it back to her. We feel a certain gentleman in Detroit will have to share an apartment with Tootsie. . . . Louie Botteron certainly has had a lot of callers to see about renting his apartment, but no new tenants. How come, Louie? . . . Lottie McFarlan and Louise Roberts got new sewing machines last Thursday. Louise didn't make it in to work the next day. . . . Margaret Lepper is coming closer to that 500 series. She rolled 475 and 497 last week. . . . Mildred Orr is certainly a good housekeeper, according to her co-workers. . . . Best wishes to Helen Keims who was married last Saturday. . . . Happy Birthday to Nellie Ruger and Glenna Hyatt.

120 Suggestors Share $1,542

This week 120 employees were presented suggestion awards totaling $1,542.50. Roy E. Woods, FHP Motor Division 15, headed the list with an award of $270 for his idea for packing motors.

Next in line of high award receivers is Robert J. Shirey, FHP Motor Division 13, who was awarded $100 for his suggestion about changes on end-punching materials. A Tiffin, O., employee, Alton P. Lonsway, received $55 for his suggestion to make double-wedge pressings automatic. Robert Maxwell, FHP Motor Division 1, made $35 on his idea to eliminate stamping the model number on motors and $15 for suggesting a bull ring on leads.

Thirty dollars went to Edward Cristallo, DeKalb plant, whose suggestion involved rotor and stator

(Continued on Page 3)

Roy Woods, FHP Motor Div. 15, has received the top suggestion award for this period of $270 for his idea of a better method of packing motors. He is shown in the center of the above picture demonstrating the application of his suggestion. Looking on, left to right, are Lawrence Chesterman, W. W. Ropa and H. G. Siebold, Div. Supt.

Wilson Gives Views To Senate Group On Labor Legislation

G-E President Urges Law With Equal Responsibilities, Rights For Unions, Employers

"Protection of the Public" is the first consideration in the adoption of any adequate and fair labor law, President Charles E. Wilson told the Senate Committee on Labor and Public Welfare at a hearing in Washington last week.

In a prepared statement read to the committee, Mr. Wilson emphasized half a dozen principles he considered necessary in a labor law, regardless of the name the law may bear. They are:

1. Protection of the public.
2. Protection of the rights of individual employees from abuses either by employers or unions.
3. Protection of legitimate rights of both unions and employers.
4. Requirement of equal responsibility on the parts of both employers and unions.
5. Protection of free speech for both employers and unions.
6. Protection of freedom to earn a livelihood.

Voicing his apprehensions about the bill now under consideration by the Senate committee, Mr. Wilson declared that he is "genuinely alarmed" because of what seemed to him to be "its threat to our

Red Cross Chairmen Appointed

Solicitors To Conduct Campaign March 7-11 At Fort Wayne Works

Campaign chairmen for the annual Red Cross Fund-Raising campaign at the Fort Wayne Works were announced today by K. W. Michael, Works General Chairman of the drive.

The divisional chairmen include Dwight M. Myers, Motor and Generator division; Robert J. Duras, Fractional Horsepower Motor divisions; R. W. Kent, Works Contributing and Service divisions, and R. L. Soughan, Specialty Transformer and Ballast divisions.

Each will serve on a coordinating committee in making the arrangements for the plant-wide campaign.

500 Solicitors

The solicitation will be conducted again this year by nearly 500 persons throughout the Broadway and Taylor St. plants. These solicitors will be selected by the superintendents in each division.

The drive is scheduled to begin Monday, March 7, and will continue through Friday, March 11. The Winter St. plant will hold its solicitation during the same week.

(Continued on Page 3)

New Telephone Directory Is Distributed This Week

David Thiebolt, messenger, gives a new telephone directory to H. K. Zuber, Bldg. 19-2, last man listed in the book. The first man, A. J. Adams, Bldg. 27, leafs through the new directory, at the right.

The new Fort Wayne Works telephone directory for the Broadway and Taylor St. plants was distributed this week.

The directory has 12 pages and is bound in a tan cover. An index for frequent numbers has been provided on the cover, as well as information for making special phone calls.

For each phone, the telephone number, person's name, plant and division, classification and building is given.

The inside cover contains a list

(Continued on Page 3)

Apprentice Alumni Plan Two Meetings

The Apprentice Alumni Association will have a smoker Tuesday, March 8, at 7:30 p.m. in Kreis Stoltzenau hall. A business meeting, the first under the direction of the new officers, will be held as a part of the program; a buffet lunch will conclude the meeting.

(Continued on Page 3)

SUPERVISORS PLAN MEETING FOR MARCH 14

The G-E Supervisors' Club will meet Monday, March 14, at 8 p.m. in the Squares Hall.

The program will include a speaker, business meeting, lunch and refreshments. The committee from Group Three, sponsors of the meeting, consists of M. M. Ray and F. E. West, co-chairmen; A. C. Jenne, F. M. Gibson, Willis Lautzenheiser and W. R. Blomker.

Superintendents To Give Talks At Foremen's Ass'n

Superintendents at the Fort Wayne Works will address the Foremen's Association Wednesday, March 9, at 8 p.m. in Kreis Stoltzenau hall, it was announced today by Everett Lindeman, president.

Each superintendent will give a brief talk on a subject of his own choosing.

Installation of new officers and a buffet lunch will complete the program.

G-E Club Committee To Sponsor Square Dance For Family Night

"Alamande left, grand right, and left. Promenade, then swing your partner up and down. . . . Swing your ma. Swing your pa. Swing your gal from Arkansas."

These are some of the calls that will be heard tonight at the G-E Club's square dance. Erven Huth and Charles Ream are co-chairmen of the dance.

Admission will be free of charge to G-E employees and their families. Tickets are available at the G-E Club and Bldg. 18-B candy stands and at the personnel offices at the Taylor St. and Winter St. plants.

The dance, which is being planned as part of the Family Night series, will begin at 8 p.m. Joe Taylor, Bldg. 27, and his Red Bird recording band will furnish the music.

There will be special groups for those who are new in the art of square dancing. Ed Parker, Bldg. 24, will pipe the sets to the gay music of some real hoosier fiddle-busters.

Charles Ream, left, co-chairman of the square dance, is shown above talking over plans for the G-E Club's Family Night with Joe Taylor, band leader. The picture was taken last Saturday during Taylor's broadcast over Station WFTW.

G-E Employee's Son Writes Prize Essay On Democracy

Editor's Note: A 17-year-old high school senior, whose parents are employed at G-E's Electronics Park, took top honors for his essay in a contest, "Letters for Democracy," at Syracuse. The winner, Richard Pierce, received a $300 Savings Bond and a recording by WSYR of the letter, addressed to "Friends of Freedom," was used in the State Department's overseas broadcast, "Voice of America." The prize- winning essay follows:

Dear Friends of Freedom:

I am writing as an American to all peoples of the world who want freedom for themselves and their families. For you are the kind of people that created America. There is no separate race of Americans. We are English, Russian, French and German; white, brown and black; Catholics, Protestants and Jews; representatives of every race, color and creed in the world, united by our desire for liberty. But this ideal, this determination, has been a real and vital force which has survived three centuries of wars and depressions, and is still growing stronger.

Many of us are trying to build a better life in homelands destroyed by war. Others are looking for a new home, for escape from depression. My story will be understood by all of you, for Americans are both refugees and builders. The first displaced persons came to America in 1620, seeking the opportunity to worship in their own way, to build a new world and put their ideals of freedom into practice.

A century went by and they were again threatened by the oppression and they came to America to escape. They were faced with a decision whether to give up their dream of a new kind of nation, or to put it to the test, where the odds were all against them. Yet, in 1776 these people issued a statement that astounded the world, a document that had all the strength of the people who believe in it.

It was idealistic, this Declaration of Independence, but it was direct and realistic at the same time. In it the colonies affirmed their belief that all are equal because they have certain rights, that these rights may be suppressed but can never be taken away. They said that the one purpose of a government is to protect these rights, and that a government's just powers to do this are given only by the people. They concluded that when a government ceases to serve the people it must be replaced by a new government, based on the principle of human rights.

The words were not original, but this document represented more than a passive hope for freedom. It expressed the determination of these people to stand or fall by their principles. They declared themselves forever independent—to be free to rule themselves. These people asked no help from rulers or nations. They were responsible only to God and mankind.

These were noble words, but were they practical? Was a people's dream of freedom worth the risk of their lives, their fortunes and their sacred honor? Could this tiny group strung along the edge of an unmapped wilderness, hope to succeed in the unheard-of project of a nation ruled by the people?

Today, the privileges, the rights, the liberties that I and every other American take for granted are answers enough to questions like these. To think and speak and write freely, without restriction . . . to worship God as I see fit . . . to participate in the governing of my country and in the shaping of its destiny . . . to plan my own life, to educate myself in the profession or trade of my own choosing . . . that is the meaning of America.

Privileges like these that are established and guaranteed by a government of my own making permit the enjoying of a life that is fuller, richer, more worthwhile. I acknowledge my share of personal responsibility in the continuance of democratic government, realizing its imperfections but believing thoroughly in its power of self-remedy, knowing it a continuous endeavor, not an achievement. It makes me glad I am an American . . . proud I am an American, for I believe in democracy, its past, its present, its future.

Wrought In The Flames

HUGH CRANE *discusses* Television

NEW YORK—This television baby is certainly growing by leaps and bounds.

But it isn't so much how fast it's growing that matters as the changes it may make in the American way of life—or at least in our American ways of spending our spare time.

Faster Than Expected

Television keeps outgrowing its most optimistic friends. A year ago they predicted that 1948 might see an output of perhaps 700,000 sets. It went round 850,000. They were predicting 1,500,000 sets produced and sold this year; now the guesses are 2,000,000. The Federal Communications Commission gave it the wave bands of 44 to 88 and 174 to 216 megacycles; but the Commission had so many applications for that station permits that last September it had to call a halt on any more licenses until it could figure out how to get them all in and whether to go up to UHF (ultra-high-frequency) between 475 and 950 megacycles, where it refused to let them go only a couple of years ago. And now some authorities claim video set sales this year will beat radio set sales in dollar volume, and the video people kid the radio people by calling the latter "sightless radio." And they say that in a few years the country will have 15,000,000 television sets. Or maybe 18,000,000.

Changing Living Habits

The thing that video is doing is changing the recreation habits of the American people, and giving the heebie-jeebies to, among others, the movie people and the radio people, and even worrying the petroleum industry (people can stay home to look at the television set on Sunday afternoon instead of taking that ride in the country).

The movie business hasn't been doing so well anyway in the last year or two. In addition to losing a good deal of foreign sales, movie magnates find that people are staying away from the movies in droves—and one reason offered is that they are staying home looking at their television sets.

The radio people are also worried. They find that if people have a television set they would rather look at the weakest video show than listen to the biggest-pulling radio show. Even the stars in radio lose a proportion of their audience when there's a video set near-by.

And as the ownership of video sets runs up into the millions it will eat into the radio audience until advertisers may not want to spend anywhere near the money they used to spend on radio. The radio people feel somewhat indignant; they say that radio is still supporting television but that the baby threatens to displace its parent. As one observer said recently, "radio is about to undergo severe dislocations causing the quality of its shows to deterioriate just at the time when they should be improved to compete with video."

Some people even say that in 10 years or so, due to television, radio will survive chiefly by providing classical music and foreign-language broadcasts.

Effect on Advertising

Even the newspapers are giving it thought. Not that they'll lose readers, but for the possible effect on advertisers. Some things can be advertised much more effectively by television than in a printed picture; and television shows, it turns out, have a terrific "pulling power" for advertisers.

It all goes to show that in the American economic system "the only permanent element is the element of change." You may have a half-nelson on a particular industry, and get yourself way up at the top in a particular line, but some other industry may come along and pull the competitive rug right out from under you.

But in the last analysis it's a good thing that American industry is that way. It keeps everybody on his toes. It makes life more zestful for the producer, and more comfortable for the consumer. While we're exporting our goods and machinery to other countries, to raise their standard of living, it would be a good idea if we also exported this idea that competition is still the life of trade.

Meet the President

Receives $25 Award

William R. Epperson, Bldg. 17-1, has received $25 for his suggestion pertaining to cold head screws.

Red Cross

(Continued from page 1)

The Decatur plant will conduct its campaign Thursday and Friday, March 10-11.

The national goal has been set at $60,000,000. The Fort Wayne-Allen County quota is $110,225. Those making a donation will receive Red Cross lapel pins and window stickers, as well as a national membership card if the donation is $1 or more.

Aid To Storm Victims

The Red Cross has been on the job recently bringing relief and care to people in western states hit by severe winter storms.

Here are a few highlights from the record of the last fiscal year: 303 domestic disaster relief operations, with assistance to more than 300,000 persons . . . $17,000,000 in lifesaving blood products distributed . . . assistance to 1,700,000 veterans and their families . . . service to 700,000 men in uniform . . . a half million Junior Red Cross gift boxes sent to children abroad.

This is only a part of the overall story—the report to the American people of how they helped, what their contributions and volunteer hours achieved through Red Cross missions.

Active In Disaster Relief

Since 1920 the Red Cross has assisted in 3,761 disaster operations in the United States and has expended $125,542,000 for disaster relief.

The Red Cross is also responsible for the National Blood Program. Based on current commercial values, $3,800,000 worth of immune serum globulin for the prevention and treatment of measles has been distributed by the Red Cross to state health departments throughout the nation — together with plasma worth $11,600,000 and serum albumin valued at $1,500,000. Already, 12 regional programs and one state-wide mobile unit program, operating with the participation of more than 300 chapters, serve an estimated population of 16,000,000 people.

There are many other Red Cross activities that help millions of people. For the first peace-time year in the history of the Red Cross Safety Services, certificates issued in first aid, water safety and accident prevention exceeded the one million mark. Teachers of more than 2,000,000 children in elementary grades last year received American Red Cross guides for safety instruction to prevent the large number of child accidents that occur enroute to and from school.

Home Service Program

A monthly average of more than 14,100 paid and volunteer Red Cross workers last year carried on the home service program in 3,746 chapters. This program provides counseling, emergency communications, assistance with applications for government benefits, financial assistance under certain circumstances and other services to veterans, servicemen, their dependents and civilians.

New Directory

(Continued from page 1)

of the phone numbers of other plants; the back has a sketch of the leased telegraph network.

First Man Listed

A. J. Adams has the distinction of being the first person listed in the directory.

Mr. Adams started with the Company in 1929 at the Winter St. plant in inspection work. He transferred to the Motor and Generator division at the Broadway plant in 1938 and has had the same job since that time. He resides at 1420 N. Anthony Blvd. and has three children, two boys and a girl. His hobby is fishing and working at his cottage on Clear Lake.

The last name in the book is that of H. K. Zuber. Mr. Zuber has worked in the stock room of the Motor and Generator division since 1941. He is the father of twins, boy and girl.

The telephone section will accumulate the changes in telephone numbers, which will then be published periodically in the WORKS NEWS.

120 Suggestors

(Continued from page 1)

magazine feeds. This was an additional award. Howard C. Taylor, FHP Motor Division 1; Arthur L. Bear, FHP Motor Division 14; Mary F. Rose, FHP Motor Division 17; William Epperson, FHP Motor Division 19; and Theresa Lindenberg, Transformer Division 93, each received $25 awards for their recent suggestions.

The following employees received awards amounting to various denominations ranging from $5 to $20:

FHP Motor Div. 1: Kenneth Bainbridge, Lillian Harris, Arthur M. McNamara (two awards), Carl W. Harmon, Billie M. Tucker, and Melvin R. Payne.

FHP Motor Div. 13: P. A. Schoppman, Sidney E. Hanson, Carl P. Snyder, H. G. Cowan, Paul J. Rummel, Charles Hayden (three awards), Louis A. Gocke, Arthur F. Sorg, Theodore C. Reed (two awards), and John F. Driver.

FHP Motor Div. 14: James O. Robinson, Delos Martin and Cecil E. Tarney.

FHP Motor Div. 15: Lloyd F. Ernest (two awards), Walter Amacher, Carl Maxfield, Franklin McCague, Kenneth L. Guisinger, Martha Smeader, Kenneth L. Allen, Paul Kennerk, Park E. Schemehorn, and Galen E. Krieg.

FHP Motor Div. 16: George Eshelman.

FHP Motor Div. 17: Eugene P. Kelsey, Lloyd A. Garrison (two awards), Harold Miller, Wilfred J. Yant, Ralph T. Martz, Howard D. Household, Florence Minnich, Darold H. Emrich (two awards), Red R. Boehm, Paul A. LeCoque, Melvin R. Payne, Marvin E. Fields, Charles Bell, Denver L. Coolman, Zella L. Witte and Maurice Roe.

FHP Motor Div. 19: Nora Williams, Elmer J. Jockel, Albertus F. Brown, Glen Buckmaster, H. Eldridge Gillum and Novis E. Hopkins.

FHP Motor Div. 10: Cleon O. Oyer, Richard C. Nix, Everett C. Smith, M. D. Warner, and John F. Driver.

Decatur Plant: Jason Moser, Raymond Bleeke, and Archie Smitley.

Tiffin Plant: Paul J. Raitz, Hiram I. Hippler, Gordon N. Reinhart, Alameda Oder, Hugh W. Hinsman (two awards), John C. Hepp, Malcolm C. Hamilton and Ann M. Rathburn.

DeKalb Plant: Alice Cooksey, Myrle Luoma, William Paseka (two awards), and June Bennett.

Specialty Transformer Div. 93: David F. Mannix, James T. Keller, Erma M. Wilkin, Mary B. Reed, Mildred A. Strickler, Cora Karnes and Harold J. McGary.

Specialty Transformer Div. 94: George W. Harmeyer, Paul B. Gressley, Frank C. Schlotter, and Mary E. Odom.

Specialty Transformer Div. 95: Agnes M. Jump, Ethel I. Hullinger, Max W. Lydy, Harold J. McGary, Walter E. Sorg, Robert R. Malone, Edward M. Dullaghan, Mary Fletter, and Harold C. Josse.

Wire and Insulation Div.; A. B. Corson, Albert Penrod, Ralph Remenschneider, Austin J. Garman, Harry Arnold, Jr., Ralph G. Lindeman (two awards), and Amel D. Beck.

General Tool Division: Glenn O. Hoon, Marion Williams, and Chester S. Burgette.

Distribution: William C. Miller, James H. Uhrick, Harry S. Price, and Richard J. Robertson.

Miscellaneous: Lester B. Redding and August J. Delagrange.

Gets $100 For Idea

Robert J. Shirey, FHP Motor Div. 13 at Taylor St., recently received a $100 suggestion award for his idea pertaining to changing of end-punching material.

Elex To Present Two Spring Hats At Breakfast Party

Two spring hats will be given as attendance prizes for the Elex Spring Bonnet Breakfast Saturday, March 5, at the Y.W.C.A. Breakfast for this combined meeting of the day and night girls will be served from 10:30 until 11 a.m.

During the party the Sunshine Islanders will furnish music. Tickets are $1 and can be obtained from contact girls on or before Wednesday, March 2.

Two Employees' Daughters At Decatur Plant Awarded Legion Oratorical Honors

Coleen McConnell, daughter of Mrs. Ercie McConnell, Bldg. 2 at the Decatur plant, recently won first place and a cash prize in the American Legion District Oratorical contest. Miss McConnell is a student at Decatur high school and will compete for further honors in the coming regional contest.

Joan York, daughter of Mrs. Marie York, also of Bldg. 2, took second place honors and cash prize, after being edged out by Miss McConnell in a one point decision. Miss York is a student at Decatur Catholic high school.

Apprentice Alumni

(Continued from page 1)

A Civic Theater party will be held Wednesday, March 23, for members and their families. The group will see the play, "Spring Planting." Curtain time is 8:30 p.m.

"The expert fault-finder has no reason to be proud of his accomplishment."

George Miller, now known as the "Rookie," got the name from Art Maske. George was going to repair an outboard motor for Art; but after tearing it down, he had to return it in a bushel basket. . . . Dale Springer seems to be having his usual good times at square dances. . . . Don Shroyer was standing in a doorway the other day with his hand just a little too close to where the door closed and had a bone fractured in one of his fingers. He's using it O. K. now, but it's sort of uncomfortable. . . . We extend birthday greetings to Mary Beaman who celebrated on Washington's birthday. . . . John Lissius had to repair some plumbing the other day. It seems as though he was having some new floor put in and the nails used were long enough to put some holes in the lead pipe plumbing he has in his home. . . . Dick Maxton had planned to get a different car one Saturday. He took the children with him for the ride but the bank was closed for Lincoln's birthday. He took the family to the show and still drives the old car. . . . If there is anything you want to know about the Navy just ask Herb Langer or Charlie Laymon. They both belong to the Navy Reserve. . . . George Holthouse has a large kitchen sink he would like to sell. It is practically new and the price is very low. . . . The cigar business should never go under as long as Jerry Wert and Bill Huffman are able to smoke. One rarely sees either one of them without a big cigar in his mouth. . . . We wouldn't want to call Dorothy Kell "grandma," but her daughter became the mother of a baby boy last week. . . . Ed Meyer likes his Swiss cheese. He sent over to eastern Ohio for nine pounds of it. The samples were good.

Elex To Hold Bingo Party

The Elex Club will hold a Bingo party Friday, March 18, in the G-E Club gym, starting at 8:30 p.m. Tickets are 35 cents and can be purchased from contact girls and the personnel offices at Broadway and Taylor St. No tickets will be sold at the door, the evening of the bingo.

There will be cash prizes and various attendance prizes given during the evening.

Hilda Walda is chairman of the party. She will be assisted by Thelma Stone, Bldg. 18-1; Helen White, Bldg. 4-4; Loretta Bloom, Bldg. 26-5; Eva Tucker, Bldg. 16-1; Helen Miller, Partizan Chapter; Mable Miller, Taylor St.; Mary Leiter, Winter St.; Peggy Turschmann, Taylor St.; Loraine Von Behren, Bldg. 26-3; Olive Walters, Taylor St.; Jo Alles, Bldg. 4-2; Gladys McMillan, Bldg. 19-2; Dewey Wickliffe, Bldg. 91-2; Clara Gidley, Taylor St.; Josephine Eme, Taylor St.; Betty Garber, Bldg 4-6; Wilma Williams, Taylor St., and Alice Kreiselmeyer, Bldg. 17-3.

Luncheon Given For Grueb

Herbert Grueb, Supervisor of Office, Distribution Div., Bldg. 6-2, was honored Thursday, Feb. 17, with a luncheon on the occasion of his 35th anniversary with General Electric. Seated at the table, left to right, are Chester Kowalski, Asst. General Foreman; C. D. Uncapher, Supt. of the division; Mr. Grueb, D. R. Graybill and Charles F. Buchanan.

Waide McCutchen, 66, Dies Last Saturday

Waide McCutcheon, 66, died at 5 a.m. Saturday at his home, 1224 Oak St. A retired General Electric employee, he began his service with the Company in 1925 as a helper in Bldg. 17-1. He then became a packer at the Winter St. plant, and at the time of his retirement in 1946 was a helper in Bldg. 26.

He is survived by his wife, Bessie L.; a daughter, Mrs. Marion Weathers, Jackson, Mich.; and two sons, Alvin and Lester, also of Jackson; a step-daughter, Mrs. Ferney Lough, of South Whitley; 10 grandchildren and seven great grandchildren.

Services were held at the residence at 1:30 p.m. Monday, the Rev. R. E. Vance officiating. Burial was in the South Whitley Cemetery.

Wilson Views

(Continued from page 1)

individual and collective freedoms through removal of safeguards now so wisely in force."

He added: "I have come more and more to see and to believe in both the human and the material values of our freedoms.

"My assumption is that what we all seek here is a labor law that serves the public interest—that is fair to employees, to unions, to employers—while adequately protecting innocent bystanders and the whole public."

Cites Freedom to Work

Regarding the freedoms he viewed as threatened by the labor bill now under consideration, Mr. Wilson said:

"The first of these threatcned freedoms is—the freedom to work.

"The present law's banning of the closed shop, together with the provisions protecting a man from losing his job because he may have offended those in power in his union, were important return steps toward again guaranteeing to the working force of our nation this basic right—the right to work.

"Such provisions need to be strengthened. To remove them would be to take a step backward. To permit a man or woman to be arbitrarily deprived of the very means of livelihood on someone else's whim—or to give one organization an entire monopoly on jobs—simply is not in accord with what public policy should permit.

"The second of our threatened freedoms is—freedom of speech.

Men Denied Rights

"In this respect, prior to the present law, one of the darkest areas in the whole country existed in certain union practices where economic oppressions and reprisals were heaped upon a member who dared oppose the group in power or boldly exercised freedom of speech, or who asked for an accounting of how his money had been spent, or for an honest election, or in some cases for an election at all. To say such practices were unusual or few in number is no answer. The fact is—men were denied their rights.

"Further, management certainly should have the right, equally with unions, to state its case to its employees and the public. Either side should be permitted free speech equally, as long as no unfair promises or benefits are held out and no threats of reprisals made.

"Third—freedom from waste, human and economic.

Labor Monopolies Hit

"The jurisdictional strike has no defenders. Likewise the true secondary boycott is, often, an effort to enforce labor monopoly practically at pistol point. Granted, the President has asked some curbing of these. To be effective, the machinery to do so must be instantly available and promptly used, so that the remedy is at hand before the damage is done.

"Featherbedding, also, is a burden on the backs of the whole public. Adding costs and delays that the public should not be asked to bear and that, in the end, benefit no one.

Stop Paralyzing Strikes

"Fourth—freedom from national paralysis.

"The whole prosperity of our people, our whole standard of living, rests on the use of our productive capacity. The entire productive facilities of the nation should not be subject all at once to stoppage by some strategically-placed union group. I believe in the right to strike, but I do not believe this right should be so abused by a relatively small group as to tie up and damage the whole country.

"The present power of the President to protect the nation from strikes that threaten the national health and safety certainly must not be weakened. On the contrary, you probably will want to explore how it may be strengthened and made more effective. Since General Electric operates the great plutonium plant for the AEC at Hanford, we naturally watched with concern during the atomic energy dispute at Oak Ridge last year, in which the President felt he needed all the teeth in the present law and used all six steps the act contemplates. Not only for atomic energy, but in other vital industries, the public interest must have effective protection. We have all seen the President need—and use—the machinery of the present law in what seems to be his annual coal problem and his periodic shipping problem."

Found No Abuses of Act

In cross-examination by committee members about his views on the present law, Mr. Wilson declared that he considered that the present law provided "Balance in the bargaining arrangements between labor and management" that was lacking under the Wagner. Act. He said that he was "honestly unable to find any abuses in the operation of the Taft-Hartley act," adding:

"I have talked to a great many of our people in shops and all over the United States, and I can tell you honestly that I have yet to find a man who freely uses the term 'Slave Labor Bill' that is applied to the Taft-Hartley Act. I have yet to find a man in the shops, the men really affected by this legislation, who object to the pattern of it in any specific thing. Indeed, they are for it, and I honestly do not know of any phase of it that the men really regard as unfair. I cannot think of anything in it that is unfair to the unions with which we have to do business."

Accompanying Mr. Wilson in the crowded committee room were L. R. Boulware, Vice President in charge of Employee Relations, and George H. Pfeif, Manager of Union Relations.

Boulware Testifies

Following Mr. Wilson's reading of his statement, Mr. Boulware presented detailed testimony on 12 subjects which expanded upon the general principles advocated by Mr. Wilson. They included non-communist affidavits, jurisdictional strikes, secondary boycotts, featherbedding practices, national emergency strikes, the closed shop, mass picketing and violence, free speech, mutual responsibility of employers and unions, political contributions, separation of the functions of advocate and judge (with respect to the N.L.R.B. and the U.S. Conciliation Service), and exemption of supervisors from unionization.

Mr. Boulware described for the committee actual examples of labor difficulties that illustrated weaknesses to be considered in forming new legislation. He concluded his testimony with the declaration that "despite any impressions you may have obtained from my testimony thus far, we are not here to defend each and every provision of the Taft-Hartley Act as such."

Proposes Two Revisions

He added:

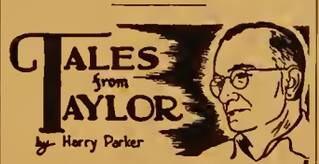
"We believe an objective fresh appraisal of each of the ingredients of the present labor-management relations act will indicate that, although it is a good law and contains a great many important advances in the public interest which need to be retained, there is also need for two types of revisions.

"First of all, careful attention should be given to any specific instances in which the law is claimed to have operated unfairly against unions, employees, employers, or the public.

"Second, careful attention should be given to those instances in which the present law needs to be strengthened, in order to prevent such abuses brought to light in this testimony, which are not adequately provided for under the present law. The law should provide better protection against violent and coercive mass picketing and against monopolistic practices which can be effectuated through the use of secondary boycotts, closed shops, jurisdictional strikes, and the like."

We extend our sympathy to the family of Charles Gordon who died at his home in Churubusco on Feb. 15 following a heart attack. For the past 10 years he has been employed on this floor at the annealing ovens. . . . We also express our sympathy to True Sheets whose brother died in Decatur last Tuesday. . . . George Seabold, who has returned to work following a brief illness, is now in the hospital. We hope it won't be too long until he's on the road to real recovery. . . . Glad to have Charles Reed back to work after an absence of six weeks recovering from a broken bone in his foot; also Mary Mowry who has returned following a five weeks absence while recuperating from an operation. . . . One day last week the blue coats in a squad car stopped two of our solid citizens on their way home from work. For a while it looked like Roy Bracht and Clarence James might be on the way to the lock-up but it turned out to be only our old friend Bob (Red) Smith giving the boys a look at him in his nice new uniform. . . . Have you ever noticed the collection of pipes Charlie Curtis has displayed on his desk? Almost as many in his collection as Ed Glusenkamp has. . . . Arnie Johnson is still buying the cigars for Park Schemehorn and Ed Lothamer. It would be cheaper to buy them by the box and just give them away, but Arnie says it's more fun this way. . . . Ed Gebhart celebrated his birthday on Friday, Feb. 18. On Saturday Mrs. Gebhart wanted the windows washed, but somehow climbing a ladder didn't appeal to Ed so he washed the car instead. Many happy returns! . . . Birthday greetings also to Clara Outlaw who celebrated Monday. . . . Nothing in Dave Dulin's locker is safe from Lelia Byall and Evelyn Daugherty anymore. They even took their share of the "Kaffie Kuchen" he bought last week from the Partizan Chapter.

The Receiving Office of Bldg. 6-1 is still in the dumps over the loss of their "Dream Boy" Chris Rciz. However, they are sure that their loss is Bldg. 8-1 office's gain. Anyhow Chris, you are always welcome back to the Bldg. 6-1 fold. . . . There seems to be a big "blowout" in the air since a certain party in Bldg. 6-1 recently purchased a 10-ft. G-E refrigerator. For any details, see Tom Dent. Perhaps it is to hold those "Big Ones" he catches at Lake George. . . . The latest addition to the Bldg. 6-1 office family is a fine new boy, Michael, at the home of the Dick Robertsons. Congratulations, Maxine and Dick. . . . Frank Parker spends all his spare time hunting his cake. He buys it fresh off the candy wagon; but, by the time he locates it, it has green mold. Phyllis, now quit picking on Frank like that. . . . Anyone having any old safety pins please donate them to Harry Beatty. Just in case he gets in such a hurry and forgets his belt again. Those days of suspense are nerve-racking to all concerned. . . . Last week we had a sweet day around here. We still don't know if someone got married or had a new arrival, anyhow we sure enjoyed the candy. . . . A familiar face belonging to John Hensler (Bldg. 19-5 Tool Crib attendant) made its appearance in Bldg. 8 last week. We are very glad to see John back after an absence of six months of illness. Drop in and see us anytime, John. . . . We always regret goodbyes, but we must say so long and the best of luck to Jay Cornell, Jesse Sircle, Chester Gilliam and Al Buchheit who are now working in other parts of the plant. . . . Happy Birthday to Henry Guenther, Catherine Hirschman and Dennis O'Connell. . . . The price of automobiles is so high that when Norman Haugk went to buy a new car he thought the salesman was trying to sell him two. Result: Norman will continue to drive his old car just a while longer. . . . Fred Divelbiss' generosity will get him in trouble yet. Upon leaving lodge one night last week he invited some of the Grinding Room fellows down to his house for a few drinks. Not thinking the gang would accept his invitation that night, Fred left early, proceeded homeward and retired. About 1 a.m. Crash! Slam! Bang! was heard at the front door. The gang had arrived! Fred arose and invited them in for refreshments. Either the refreshments were too strong or the night was too long, especially for Al McCullough and Mell Rose, because they didn't make it to work the next day. . . . The boys in the Tool Cribs at Taylor Street would like to thank Fred Bishop for the Valentines he sent them. They were very appropriate. . . . Does anyone know how many knots a row boat makes? Howard McMaken has promised to break all records around Crooked Lake this spring by rowing around the entire lake in less than two hours. Keep us posted, Howard. We're anxious to see how you make out. . . . Every man should keep a fair-sized cemetery in which to bury the faults of his friends.



Celebrates 35th Anniversary

Mrs. Ruth Distel, Bldg. 16-3, celebrated her 35th anniversary with the Company recently. Starting in 1914, she has been with the Service Engineering Division the entire time. Standing behind Mrs. Distel, left to right are: R. P. Cheesman, Engineer, Service Engineering Div. at Ft. Wayne; W. C. Plumer, Asst. Mgr. of Service Engineering, Schenectary; and L. C. Yapp, Engineer, Service Engineering Div., Ft. Wayne, until his retirement.

Herb Grueb's 35th anniversary dinner not only proved to be a huge success, but it also brought out some real talent in the form of Gerald (Shorty) Becker. Shorty did a great job as MC and added to that talent he also boasts of his square dancing ability. It seems that some folks just have talent to burn; anyway here's a low bow, from the waist, to Mr. Becker for a job well done. . . . My spies report that several phone calls to and from Sherm (The General) Welch reveal that he is feeling some better, thank you, and would like to hear from all his friends. Hurry up and get back, Sherman, we all miss that hearty laugh. . . . Another anniversary for Shirley Hughes. Gee, seems like those birthdays really roll around, don't they? Don't despair, Shirley, they say life begins at 40. . . . The new face at the duplicator is that of Donna Grimmer. Welcome to the Shipping Division, Donna. . . . "Here Comes the Bride," and what a pretty bride Pat Newlin will make. Tomorrow is the big day. Pat is leaving us today to devote all her time to her new job. Best of luck to you both, and may you have every happiness. . . . If you noticed a speedy man last week during lunch hour it was no doubt Mart Witte, one of our packers in Bldg. 6-3, rushing during his lunch period to obtain some new seal-beam headlights for his truck. Mart purchased the lights and that evening after a good snack (dinner that is) proceeded to take off the old lights and replace them with the new ones. Was Mart surprised when after considerable work he discovered that the old lights were really seal-beams but all out of focus. Wasn't but a few days 'till Mart was seen trying to retrieve his money on those new seal-beams. . . . I tell this next yarn to save any of Harvey Adair's fellow colleagues from a similar fate which befell him recently when he missed his bus. Seems Harvey decided his best bet, and quickest transportation to the plant would be an automobile, so he thumbed a ride with a very willing fellow who offered to take him right to the plant. Now here, thought Harvey, is a man with a kind heart. For conversational purposes he asked the man if he was on his way to work and the man said he was working right then. Can you guess who Harvey had hailed—if you guessed a taxi driver you are absolutely right. "We both laughed heartily," says Harvey, "but he laughed longest because I had to pay the bill anyway." . . . There's a sure sign of spring in the atmosphere, and if you don't believe me ask Buck Buchanan, he's started spring redecoration already. So if it appears that Buck is always gazing upward it's only because he's spent the week painting the bedroom ceiling. They say liniment is good for aching muscles, Buck.

All of you will recall my telling a story about Sam Allmandinger's dog some time ago. The pooch that daily made the round of the neighborhood and brought home everything that was not nailed down and deposited it upon Sam's porch. The other day after work as he approached his home, he noticed the dog tusseling with a gigantic bone. This looked pretty good to Sam so he immediately yanked it away from poochie, took it into the house and suggested to his wife that she use it in brewing some soup. . . . Leo Herber, being in the market for some pigs and knowing that Charley Ruppert had some to sell, tried to make a deal with Charley. It seemed that they could not come to an agreement as to qualifications, as Leo was just a little too cranky about the pigs. He had to know the exact weight, color of their eyes, length of tail and snoot, how much swill they could consume and lastly how many grunts per minute they could emit. . . . Henry Bubb tells us that his shoe repair bill last Saturday was quite costly. He parked his car in front of a downtown shoe repair shop and not noticing the yellow line on the curb entered said shop, only to turn around and see a cop writing a nice ticket for him. . . . Last week Brice Martin told everyone in the switch section that he was going to butcher a beef and to get their orders in early. Basil Bowley gave him a big order, Brice delivered it, but when Mrs. Bowley tried to cook it, well, it just would not cook through. Basil suggested that they grind it up. This they tried, but the meat being so tough it broke the grinder blades. They now are in a quandary as to what to do with all this bull meat. We suggested that a corn shredder might do the trick. . . . Last Monday Phillip "Tiny" Schoppman appeared upon the scene wearing red trousers. When he ambled down the aisle he resembled the east end of a fire truck going west. Archie Boren opined that he must have filched them from Santa Claus. . . . Fur bearing lips seem to be the vogue. The latest addition to the already large number raising a mustache is Newton Poland and we'll say that it looks real good, but it could be greatly improved by the addition of a goatee.

Apprentice BROADCAST

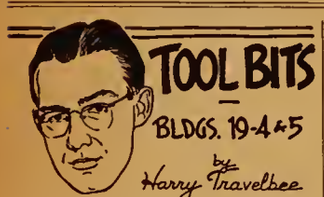
By Myron Auer

"Someone get the key," "Open up," and "Where's Jess," were the morning cries early Monday morning as the school was locked up tight as a drum. Next to this, fishing was the next topic discussed. If you strike out the first syllable of the last word in my last sentence you have the fish story covered. . . . The past week we celebrated a great man's birthday. I think it only fair and appropriate we mention him now. so here goes:

Feb. 22. it comes once each year.
That is the day this great man came here.
The Army he led, in the hot battle spree.
All this he did, just to keep our America free.
He was a leader in war, with peace as his goal.
As he got equal rights, for each living soul.
We should all pay him tribute, as a great man he stands,
His name echoes far, to all other lands.
After the war, and victory was won
He naturally became, U.S. Pres. one.
He always was wise in each thing he had done.
His name of course is GEORGE WASHINGTON.

This algebra stuff is getting the best of me. I used to get the problems with the answer in the book correct. The book was wrong last week. It just goes to show you. "Ya can't depend on nuten." . . . Fred Stoup was reading the morning "Journal" one day. It must have been hot news the way I pictured it. Fred got frantic when it warmed his hand. It must have been a real story. . . . The Kendallville Kid Dick Wagner boasted squirrel tails last fall. Now that fishing season is open he shut up like a clam. What hails here, Dick? Is Rome city fished out or has it gone dry? . . . After several hours of work, Bill Jones, accompanied with the assistance of Dick Wagner, completed a tough job. The completion was proclaimed with a song and a drink of water. . . . The fairer sex hasn't a thing over on us fellows when it comes to coat designs. Don Macke came up with a humdusey. Usually in a coat the sleeve is open at either end. Mac's was open only at one. It looks neat but tell me, "How do you wear it?" . . . The two Einsteins and a fellow called Mortonstein solved a math problem. After several hours of study and research they came to a conclusion of .129. The Einsteins were the brains of the outfit. They said and I quote: "We took the other fellow along just for—for awhile as Paul Wuttke would say." . . . Gene Werling made a grand return last Friday afternoon. The finale was topped with a graceful bow and a round of applause. The big fellow has a smile a mile wide. . . . They tell me Kenny Zurbuch takes a swell picture. Just look in last month's Safety Report Manual and see. . . . The sectional draw—Discrimination galore was cast all over the school. Breaks? Were there any? I don't know. All I know is Morton's version is all wet. The winner of the North vs. South game will represent Fort Wayne, providing Central doesn't beat them to it. Monroeville? Not a chance. Monday if you don't know who won just look at one of the following faces, Merle Aughinbaugh, Paul Mischo or Myron Auer, one will tell you. (If you can bear the sight.) Millie was a very popular girl when she posted the complete data on the sectional. Thank you, Mildred.

Joan Aubrey Edits 'It's Windy Here'



Joan Aubrey

Joan Aubrey, FHP Motor Division 17, is in the limelight this week as the Division Editor of the week. The column she writes is "It's Windy Here, FHP Motor Division 17 Office."

Having started in Bldg. 26-4, Joan's General Electric career began in 1939. She later transferred to FHP Motor Division 1 office to work in the wage rate section on operation planning. In 1947, Joan became associated with Division 17 in the wage rate section as a stenographer-typist.

Although she has no specific hobby, she helps her husband in his photographer's studio at their home. Joan helps apply make-up on the models for "glamour shots." She also sings in her church choir and is active in her sorority.

Russell Sage claims that he never has cared too much for taxis, but since last Friday he dislikes them a lot more. We have looked close, Russell, but we haven't noticed any grey hairs appearing. Maybe that taxi cab didn't scare you so much after all. . . . Bob Goers believes in giving his wife the best implements possible to do a good job. We hear he bought his wife a brand new washboard the other day. In fact, he asked one of the boys at the shop to write it down so he wouldn't forget to buy one. . . . We hear that John Roemer was dissipating over the week-end. The story is that he drank seven cups of coffee at one sitting. Better take it easy, John, or you won't be able to pick up your hat the next time it blows off. . . . Mr. and Mrs. John Stetler spent a pleasant Sunday afternoon and evening with their son Richard, who has just finished his boot training and will be sent to sea for 18 months. The Stetlers drove to Chicago where they met their son. Then they drove to Kenosha, Wis., and back to Chicago where they had their evening meal at the Naval Training Base. John says it really looks like winter up around Great Lakes as it is much colder and there is plenty of snow on the ground.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Our boy, Frankie Enderle, has created news again. It seems that after he bade the girl friend good-night, he used to cut across the neighbor's lawn on his way home. One day unbeknown to Frankie, the neighbor in question, stretched a wire along his property line. That night as Frank tripped gaily along the short cut, the wire caught him 10 inches up on the shin, and down went our Romeo on his pan. That was bad, but the next evening after leaving his Juliet, he repeated the stunt, and went down a second time. From now on he's going to use the sidewalk. . . . Howard Musselman celebrated his birthday Feb. 14. A valentine baby. . . . Charles McCormick, our foreman, is on sick leave for a while. We wish him a speedy recovery and good luck. . . . A bachelor's version of "I'd Like to Get You on a Slow Boat to China" is "All Alone on a Slow Boat to China." Quote: Dewey McDowell. . . . Overheard one morning this week: Rodney Dush to Martha Musselman, "Where were you last night?" "Baby sitting," sez Martha. "Oh boy! I wouldn't mind a few nights a week baby sitting with a good looking blond," answered Rodney. . . . Who would think that our vivacious Mary McMonigal is a grandmother. Congratulations, Mary. . . . It is said that Stan Stults never misses a "shoot 'em up" picture at the Indiana theater. To make the evening complete, he munches on pop corn, but liking more butter on his corn, Stan carries a jar of butter with him. Just another bit of indoor sports.

It's nice to have Gus Hirschmann back with us after a long absence, and hope your health continues to improve, Gus; also Bob Hughes, who is back from Taylor St. Last week was Don Helleman's last and Frank Woehnker, apprentice draftsman, leaves for the Tool Division. Good luck, boys. . . . Our sincere sympathy to Bob Hatfield, whose mother died Monday morning. . . . Congratulations to Harold Stirlen and Jacob Hoelle, our new Quarter Century members. . . . Bill Buckner went ice fishing recently, and whether he'll admit it or not, folks, this is what actually happened. We find Bill sitting on a box with his lantern and trusty poles and one of those extra long lines in hopes of catching a "big one" when suddenly a friendly hell-diver splashed into a hole behind him. Bill let go of the poles, fell off the box and into some mighty cold water and, of course, lost his fish. Now we don't think that hell-diver was really picking on you, Bill, it probably just wanted a little tobacco from your hip pocket. . . . Since Frank Edmunds has passed the 40 (?) year mark, even the die-hard cupids have all but given him up. He was presented with a bow and 10 arrows on Valentine's Day, since he is obviously a poor marksman. . . . Jack Hostetler can't understand why he received several valentines accusing him of being a wolf. . . . When John Lare got back to Bldg. 20-2 the other night he found that his hat and coat had been locked in the office, so, without further ado, he broke the glass and unlocked the door, got his duds and calmly proceeded downstairs to have the boys fix the broken glass. Just one "durn" thing after another, huh, Johnny! . . . When the fellows moved Bob Hatfield's desk and files over to Bldg. 20-1 last week, they really moved everything, including old light bulbs, bolts and not a little of that Bldg. 10-1 dirt—just to make Bob feel at home. Speaking of moving, Gibby Hilt has moved his bags (two under his eyes, that is) and belongings back to Somers' office. . . . The Power House is glad to have Joe G. Banks back after a two weeks' illness. . . . George Delfs decided it was too much when it came to carrying a new G-E radio and his lunch bucket home from work, so he told his wife to pack a few sandwiches in a paper sack. After doing this she placed them in the refrigerator beside a similar sack of candy and cookies. The next noon found George munching unhappily on a diet of—guess what, candy and cookies (wrong sack). . . . Happy birthday to Wiley Shockney, Jim Hubbard, Jay Greer, Bill Buckner and Erv Huth.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Meet your fellow-worker: It is nice to know your fellow-worker and just what he is really like outside the shop. So the fellows in Group 15, Div. 91 decided to have a party and get acquainted. Nearly all the fellows attended except a few like Lavern Schultz whose wife wouldn't let him out, and Rudolph Jackson who came too early and left the same way. There was John Kennell who thought he should go to New Haven instead. There was a floor show which all the boys enjoyed very much. There was Joseph "Flipper Ears" Ort; every time the girl would dance by, his ears would wiggle like the flippers on a pin ball machine. . . . Then there was John J. Beatty who brought his wife along for protection, and I can't say I blame him much. . . . Russel C. Ackers had to pick up his eyes and put them back. . . . You, no doubt, have all read Smokey in the paper and how his teeth are always out about two feet. Carl Stout was crawling around the floor looking for his teeth after the show. . . . Quicky Freeman was also there and when they named him "Quicky" they hit it right on the nose. . . . Paul Conrad was there but strictly business and could not stay long. . . . Then there was Albert Campton who was there with his wife, and I understand Al's little boy is getting more like him every day. . . . Then came Bill Edmund, who could hardly stay in his seat, but with a little force and a straight jacket we were able to hold him down or should I say back. Bill is getting acquainted with his chickens. He has been reading where you can write a note and have a chicken lay it in the eggs so Bill and his chickens are getting quite chummy. . . . Bob Quinn was totally paralyzed after the show. . . . "Glamor Pants" Barker was also there but not for long. . . . Ferdinand Reaser was also there but was too good to associate with the boys. That's about all with the party, but all the boys are looking forward to another get-together. . . . Mac McConehey is looking for a late model car, a '47, '48, '49 for about $200 or $300. I see where Mac has been promoted now. He is checking the dies in Group 15. . . . Doyle Miller just can't understand what these yellow lines mean on the curb uptown. At least that's what the ticket says. . . . Jacob Fullner is in the hospital for an operation. On behalf of the fellows and myself we wish you a speedy recovery. . . . Speaking of Valentine's Day, the boys from Bldg. 26-1, punch press section, never quite realized the friendship that existed between the operators and the foreman. That is until last week, when Ted Mullen received a beautifully phrased valentine through the mail. It was postmarked Uniondale, Ind., Feb. 9. You can figure out the rest for yourself. . . . Judging from the patch George Horner was wearing on his eye last week, we would say that either George is very unhandy around his house, or his wife is getting very handy.

Money doesn't go as far as it did, but it still does a swell job of going.

General Electric engineers have long been noted for their progressive thinking, and we've long wondered how it could be that they were so far ahead of the pack. The other day, we finally found the answer—it's all in your mental attitude! But, let's show you what we mean: During one of the recent spells of balmy spring weather, Engineer Kronmiller was walking with Sales Managers Stonehill and Pritchard. The conversation naturally turned to the beautiful weather, and Engineer Kronmiller said, "Another day like TOMORROW, and I'll get my golf clubs out!" You see what we mean? That's what we call forward-looking engineering! . . . Another-Good-Man-Falls-By-The-Wayside Dept. Johnny Cunningham, the bane of the Ford Motor Co., invested some cash in a hunk of engagement ring last week-end, and successfully attached same to the proper finger of a girl—in St. Louis, no less! The lucky girl was quoted as saying, "I'm real happy!" We cite this as a typical feminine reaction. But, Johnny, did she mean about you—or the ring? . . . Thought while pushing my wheelbarrow: Arearyrogersandherbeatonapplyingformembershipinthebrotherhoodofrailroadtrainmenastheresultoftheirexperienceswiththetrainsatcystonehillshouse? . . . Our apologies to Miss Wade and Mr. Ondrovik—we couldn't find a thing to say about them this week!

Charley Brubaker has moved to his new farm. We wish you lots of luck with those tomatoes and potatoes, Charley. If you need any help just call on us. We will be glad to help you eat them up. . . . Vaughn Sheets is the conservative type when he starts making something especially if a hole is required. Vaughn always cuts it small enough, then fits and cuts some more 'till it finally fits, he hopes. . . . Steve Bobay has been working with Virgil Nash so long now that Steve does everything Virgil does. Since Steve found out Virgil put his wife to work, Steve has now put his wife to work driving posts around the driveway to keep him from running into the corn field. . . . Belated birthday greetings to Bill Irwin and Martha Meeker. . . . Congratulations to Virgil Howell who got hitched last Saturday. Were those key rings with the beautiful things in them a wedding present, Virgil?

Speaking his piece at home is a fine way for a husband to get himself ignored.

Practically everybody contributes to the national tax kitty—at so much purr.

GENERAL ELECTRIC NEWS SUPPLEMENT

Candid Camera

VOLUME 14 FEBRUARY 25, 1949 No. 2

All Wrapped Up in His Work . . . The recent West Coast cold spell didn't seem to bother Jack S. Boren, Sales Engineer of the Los Angeles Office. In an office never designed for such unheard of temperatures in Los Angeles, he bundles up in an effort to keep up his correspondence.

House Warming . . . The new San Jose Motor Plant of the G-E Oakland Works held Open House recently with nearly 5,000 people in attendance. Ice cream bars were distributed to the guests by Personnel Supervisor, N. A. Stone.

High Aviation Honor . . . C. A. Salmonsen, head of the Aircraft Gas Turbine Divisions at the Lynn River Works, congratulates a group of assemblers on the TG-190 line for their efforts in helping General Electric to win the Federal Aeronautique Internationale award. This award was presented to G-E. for designing and building the "190" engine which powered the North Americon plane on its record-breaking speed test. Left to right: Pete Sintetos, Mr. Salmonsen, Frank Carpenter, John Sanderson, Dino Pantanella, Roland Pearl and Bill Walker in rear.

Parade of Pretties . . . These comely lassies of the Philadelphia Switchgear Divisions were on hond to serve as ushers at recent Rice Club Male Chorus winter concert. Left to right: Jeanne Bowles, Jean Koran, Joyce Ulshafer, Doris Spera, Jeon Spera, Adele Shilladay and Marie O'Brien.

Children of Employees

Typifying the students who are benefitting under the various divisions of the G. E. Education program is Chester Roush, Jr., shown here in the Boker library at Harvard. Working toward his masters degree in the Graduate School of Business Administration, he is receiving assistance throuah a Gerard Swope Fellowship.

Chet is shown here with his wife, who is a tolented ortist. He is enthusiostic about the G. E. Education Loan ond Scholarship Plan and the opportunity for advancement that is offered.

Vincent Beksha, third from left, discusses a completed exam with fellow students at Tufts College, Medford, Mass. He is the holder of an award under the Employees Education Foundation, studying mechanical engineering.

One of Vincent's extra-curricular activities is swimming and he is shown here receiving instruction from the swimming coach at Tufts. Vince's father is employed at Lynn River Works.

Attending Simmons College, Boston, under G. E. Employees Education Foundation, Gloria Clark prepares specimens in the biology loboratory. Her fother is a chemist at the Lynn River Works.

Richard N. Sewell, whose father is employed at Lynn River Works, is studying at Stevens Institute of Technology under a Richord H. Rice Memorial Scholarship. He is at left, in the front row.

Employed at Bloomfield G. E. prior to entering Upsala College at East Orange, N. J., Robert Bilby is studying under a Fellowship award. Here he is studying at his home in Nutley, N. J.

ouraged to Attend College by G-E Education Plan

FOR many years Generol Electric hos helped its employees ond their children to enter college and to continue their college educotions by providing loans, scholorships, and fellowships to cover at least part of the expense involved. Funds were first set oside for fellowships in 1923 when the Charles A. Coffin Foundation was created in honor of the founder and first president of the Company. Income for this foundotion was used to ossist college graduotes to continue with their studies and research work. The plan was so successful that the Company decided to prepare o program which would encourage employees and their children in their under-graduote work. In 1945, the General Electric Educotional Fund was estoblished with assets of a million dollors, in honor of two of the Company's former presidents, Charles A. Coffin and Gerard Swope. This fund has made it possible for many high school graduates to continue their education in accredited colleges or universities, obtoin their degrees, ond, in some cases, continue with their research work for groduate degrees. Recently, our Candid Camera photographer visited some of the campuses where members of the G-E fomily are enrolled and took the following pictures.

Loons ond Scholorship applications for the 1949-50 academic yeor will be occepted until April 1, 1949. For odditional information see your supervisor.

Emil Slawinski, winner af a Charles A. Caffin Fellawship award, is a graduate student in chemistry at Massachusetts Institute af Technalagy. Here he aperates Raman equipment in the lab.

Rabert Davidsan, alsa a Caffin Fellowship winner studying at M.I.T., is analyzing malecular structure in the lab. Bath Bab and Emil are graduate students in physical chemistry there.

Relaxing after the day's study, Bab and Emil play chess under the interested eye af Everett M. Baker, dean af students at M.I.T. Such activities as this aften create lasting friendships.

Five af the fifteen students studying at Unian College, Schenectady, N. Y., are shawn above in a discussian: (l. ta r.) Ranald Huber, Jahn Matern and Bill Ernest who came under the Swope Fund; Chuck Vallett and Frank Laving wha hove Charles P. Steinmetz Schalarships.

Frances Conway, majoring in Spanish at Barnard College, New Yark City, is shawn here relaxing with classmotes. Halder af an Educatian Fellawship award, her father was employed at the Schenectady Warks. Frances is active in a varied schedule af campus student activities.

Trying it aut far size, Narman Chadbaurne sits in the chair belonging ta Mr. William W. Trench, secretary af the Campany. He, tagether with Clarence Drams, Jahn Kilcain and Walt Thiessen, standing, left ta right, graduated fram Unian College with the aid af the G. E. Educatianal fund. They discuss their plans far future advancement with Mr. Trench, seated an desk.

Candid Camera

Golden Gloves . . . Lessons in the art of boxing were given by coach Fronk Newport, for right, of the Fort Wayne Works G-E Club prior to the Golden Gloves tournament. This amoteur boxing clossic was recently sponsored by the G-E Club and Fort Wayne Journol-Gazette.

Picture This . . . A new television picture tube 8½ inches in diameter will offer 50 percent more picture area, while costing no more to build than the 7-inch tube now used in low-priced sets. Robert McCreadie of Electronics Park at Syracuse, adjusts the image on the new tube.

Cops Tops Award . . . Winner of the largest award for 1948 at the Schenectady Works, armature winder John Maslowski, fourth from left, receives $1500 suggestion check from foremon H. C. Consaul for suggesting improved method in assembly of armatures for turbine generators. Looking on, are, from left: F. H. MacIntosh, J. P. Keller, A. J. Hart and W. E. Soupe.

Domicile for Dolls . . . After thirteen years of collecting dolls as a hobby, Mrs. Verai Hyland of Bridgeport Works now has over 1,200 of them on display ot her home. Visitors come the year oround to see her volued collection, which includes a wooden doll dating back to 1700. Her dolls range in size from one-eighth inches in height, called flea dolls, to six-foot mannequins.

New Building Has Its Beginning . . . H. V. Erben, Vice President and Manager of the Apparatus Deportment, handles the controls of the steam shovel now at work in early stages of construction of the new Administration and Engineering Building at the West Lynn Works. Stonding by ot recent ground-breaking ceremonies are, from left: two construction company men; N. M. DuChemin, Divisions' Manager; I. F. Kinnard, Manager of Engineering; Vice President H. A. Winne; and Mayor Stuart A. Tarr of Lynn, Moss. Inset is architect's sketch of building.

Call A Doctor!

. . . but it may mean life to your patient if you are trained to know what to do and what not to do immediately. Ed Cade, FHP Motor Test, and Veda Orff, R. N., Bldg. 8-1, in above picture, qualified First Aid Instructors have volunteered to donate their personal time to assist our local Red Cross in training you in the standard 18-hour First Aid Course.

Classes starting Monday, March 7, will be as follows:

Place—St. John's Lutheran Church Hall, Corner of Washington and Van Buren Streets.

Day of Week—Mondays and Thursdays.

Time of Day—1 p.m. to 3 p.m.
4 p.m. to 6 p.m.
7 p.m. to 9 p.m.

(These schedules permit all employees to take the courses on their own time.)

Who can enroll?—Anyone over 12 years of age (classes open to the public).

Enrollment Requirements—None. Just attend the class of your choice March 7.

HERSCHEL L. SMITH,

Necessity is the mother of invention. The necessity arose; "Pop" Castle was the inventor. He broke a cigar while attending a meeting and it just wouldn't burn. After wrapping a cigarette paper securely over the broken section, the old stogie gave forth again. . . . We always wondered why Jack Dennis went home at 2:30. The truth is out. He cooks supper for the Mrs. . . . You can call Marge Ponsot "auntie" now. She has a little nephew. . . . Doris Ryan is going to Iron Mountain to the skiing jump. She will also visit Frieda DeArmand, one of our former co-workers. . . . We are glad to report that Betty Lupton is improving, and that Neoma Bodle and Caroline Becker have returned to work. . . . Sorry about our long sick list though. On the sick list this week is Marie Dunfee, Geneva Curtis, Josephine Motte and Ethel Perry. . . . It's a happy birthday to Bertha Furge. . . . We bid farewell to Otto (out of my way, there's a fire) Brandt. . . . The inspectors are now being pestered by Adrian Weaver. . . . They say Nellie Truesdell has joined the early bird shift. . . . During a pinochle session at the Bill Martins, Joe Jensen says the men were the best. The women would like to prove that this is a misstatement. By the way, Joe Jensen must have turned over a new leaf. Did you notice him really helping the girls with their stators? . . . Lola McCague had a party last week for some of her co-workers. . . . We didn't know Harold Bowker had a blond daughter. You must keep us informed, Harold.

The personnel of the General Superintendent's office seem to be quite mum about their activities—but in listening to the noon hour conversations I find that Jean Rose has contributed to the production activities of G-E by installing a new refrigerator. . . . A. "Sid" Johnson spends his leisure hours pining for the hills of Kentucky. . . . Ralph Bailey would like to have suggestions on how to keep a playful kitten off a newly painted floor. . . . Milt Kline and Mildred Whitmer are patiently awaiting "lake weather" so they can start building and building. . . . Ralph Clark comes in at five o'clock with travel folders—planning an August vacation. . . . A. W. Howard, having completed his building project, is concentrating on planning his summer garden. It would seem that spring is just around the corner—these are sure signs.

Celebrity in Bldg. 16-3

Last week it was Chester Lichtenberg who was the celebrity in Bldg. 16-3, when he supervised the reception for General Jacob Devers, for the General Anthony Wayne Chapter of Reserve Officers Association. This week a different slant, but a celebrity just the same. . . . Francis Richards has now realized the dream of every basketball official, he received an appointment to referee for the sectional basketball tournament this week-end at Farmland. He has been refereeing eight years. Last year he received a reserve contract which made him subject to call. This year he was one of 22 officials to receive an assignment in the Northern Indiana Conference. . . . Recently we noted the comments in the WORKS NEWS about Boy Scout activities and it was surprising to note the absence of any Bldg. 18 names in the list, so I did a little scouting of my own and I find that there are at least three men in our building who spend considerable time in scout work, i.e. A. W. Howard, M. H. Kline and Al. Tharpe. . . . The girls in Bldg. 18-B and I respectfully submit their thanks to the Management for a nicely painted restroom. . . . Richard Fry of Works Service Internal Audit is convalescing at the Methodist Hospital following an appendectomy. . . . Everyone has heard the story of grandpa looking high and low for his glasses and finally finding them on his forehead. The same story applies to Julie Waldrop, Bldg. 18-1 Payroll, only it was her earrings she was looking for and to her chagrin she found them—guess where! . . . Thelma Stone of Bldg. 18-1 Payroll had Lois Tritch and Betty Garber of Fractional Payroll as her guests at her home in Peru, Ind., over the week-end. . . . Valentine Day brought forth many "secret pal" gifts in the Bldg. 18-1 Payroll group, along with many "guess who" guesses. . . . Spring housecleaning blues were being sung by Gladys Forst, Nila Hansen and Estelle Monroe, Monday. It seems they all cleaned a front porch over the week-end and the results were not good. . . . Carl Olson of Bldg. 18-2 spent several uncomfortable hours last week with an infected tooth. . . . Florence Mulaney formerly of Bldg. 18-1, now in Bldg. 4-6, is proud of her daughter, Arlene who is now a registered nurse.

Seems that someone pulled a good joke on Wayne Worman last week. This certain person put a sign on the time clock saying that Wayne wanted to sell his '39 Buick reasonably. In fact, all you had to do to buy it was to make an offer. One of our co-workers (no names, please) saw the sign and went to see Wayne about it and told him that her boy-friend was looking for a car and that it sounded as though this Buick was just the thing he was looking for. It took Wayne by surprise as he had no intention of selling his pride and joy, and after a heated argument, Wayne convinced this co-worker that someone was pulling a joke. We won't say who put the sign up, but we will say that the person who did is really sweating and is looking forward to a trip he doesn't care a bit about taking. Earl Fredericks and Bill Buuck wants it to be known that it wasn't them. Hm-m-m now that only leaves one other person. . . . Congratulations to Helen Landin on her marriage last Saturday and thanks for the candy and cigars, Helen. . . . Last Friday Andy Anderson was telling Bill Pappert that he was going ice fishing Saturday and Bill upped and told Andy that he hoped he would fall in. The last thing Bill said before quitting time Friday was " I still hope you fall in, Andy." Andy came into work Monday with a dandy cold. When the fellows asked him how he got it, all he did was glare at Bill. Aren't you ashamed, Bill, for doing that to Andy? . . . You didn't make any wishes for Moe too, did you, Bill? Moe was another one of our casualties over the week-end. It seems he tried to hurry a sandwich which was in the sandwich grill and found out that those things get really hot on top as well as in the inside. Next time you will know better, Moe.

It isn't the noise of the baby's crying at night—it's the upkeep.

Have you ever seen such euchre playing since Ray Leitz joined the group. Some people really have the luck or should we say cards. . . . Birthday wishes for John F. Welch. May you have many more, Mr. Welch. . . . The GeCode Club has decided to drop their party for the month of March. Please take note GeCode Club members, and don't forget the date, Monday, Feb. 28, reservations for Chicago trip must be in. . . . Have you ever watched Julie Baker bowl? He might be small but oh, how mighty. . . . Mary Ann Laurent is better known as the "Pumpernickel Girl." . . . Did you hear Ray Leitz and Chet Kleinknight argue about whether you should drive your new car or leave it set in the drive? Quite some argument. . . . Chet Kleinknight drove his car to work the other morning, and what ah's and oh's he got from everyone. Very nice looking car you have there, Chet. . . . We understand Millie Geimer has a new passenger in her car. For full details just see Millie she will give them all to you from beginning to end. . . . Decatur G-E basketball fans really have a right to "get up and holler" for their favorite high school team in the local sectional tournament. Bob Worthman and Deane Dorwin, coaches at Decatur high school were valuable part-time temporary employees at General Electric during the war. Myron Lehman, coach of the Monmouth high school, served two wartime summers at G-E. Ned Shuck, Berne high school coach, spent one summer with us during the war., David Terveer, coach at Decatur Catholic, is the son of G-E employee, Mrs. Frances Terveer. In addition to the above named coaches, Decatur G-E dads and mothers have sons on practically everyone of the 10 high school teams in this sectional. G-E is proud of its basketball representatives, and we urge all of you to get out and pull for your favorites as genuine G-E sportsmen. May the best team win. . . . It's a sure sign of spring as all the Tool Room men's interest has turned to art. . . . Our sincere sympathy goes to Rita Smitley upon the death of her father.

Motor and Generator Static

Thought for the week:

Sleep not when others speak, sit not when others stand, speak not when you should hold your peace, walk not when others stop.

Since the bat episode and the walking elephants, Joe Ehrler, Safety Director, Fort Wayne International Harvester Co., casts a doubtful eye at Stanley Marquardt, his neighbor. . . . Arthur Voelker paid us a visit Feb. 21 from Camp Breckenridge, Ky. He looks very fit. If any of you folks want to write him, call us for his address. . . . We are sorry to say that last Monday someone collided with the candy cart of the President of The American Greek Society. Candy flew in all directions. No one was injured. . . . Big John, president of Ed Foley's American Greeks, was the victim of a first class swindle. Some character approached him with the proposition that he take chances on a washing machine. With visions of winning an up-to-date machine, our hero invested one dollar for three tickets. After a short wait John was informed that he was the winner and presented with his prize, a miniature washing machine about 4 inches tall. That means he is not only out a dollar, but he must continue to launder his unmentionables in the old fashioned way. . . . Mike Sorgen is in a quandary. According to his story, he called Ruth Talbert on the telephone. Their conversation had barely started when Ruth gave vent to a wild shriek of distress. "What's the matter?" inquired Mike. "I got a shock from the receiver," replied Ruth. "I can't figure it out," Mike informed his listeners. To which one replied, "Perhaps it's the way you talk." "No," said Mike, "I was very polite." "That would be a shock to anyone," we remarked.

Ramblings 31-2

Members of the Motor-Generator Engineering Div. gathered at Sears' Pavillion last evening for a potluck supper. Dancing and card playing furnished the evening's entertainment. . . . We recognize that most of the new apprentices have been with our Division before. However, we welcome the new faces of Robert M. Birkenbeul and Hilliard F. Butcher. Greetings to those returning including Robert D. Finton, John L. Leffers, Wayne H. Bergman, Homer L. Carson, Everett F. Schmidt, Donald R. Miller, Fred R. Borton, and Warren G. Brown. . . . Has Casanova (Curly) Mannan moved? One noon the street car inspector said to him: "Do you live in Lakeside?" Curly replied, "Sure do, sure do." Then he boarded the Lakeside car. Whom is he trying to kid? . . . Now it can be told, that is, the story of Tisivic's big fish, which he almost caught in Canada. When "Tis" pulled the fish out of the water, the lake dropped 1½ inches. When he put it in the boat, the boat swamped and the fish swam away. Now we want to know who rescued "Tis." . . . That's not a State Police officer in our drafting room, but Bob Wahlworth in his motorcycle togs. Bob and his wife went all the way to Florida and the Keys on their motorcycle last vacation. They will probably try to make it to California next time. . . . Good news for equestrians. Paul McKeeman is a real for sure bronc buster. He can ride any animal that can walk, run, gallop or jump. If you want your horse tamed, call Paul. . . . An outsider saw Chuggy Mungovan and Vic Blomenberg together and asked them if they were brothers. They each said, "Heck! I'm better looking than he is." . . . Anyone getting homesick for John Felmlee's voice, just call Art Shull. He has a cold and his voice even scares Ross Van Horn.

The mind is like the stomach. It is not how much you put into it that counts, but how much it digests.

Education is a good thing, but it doesn't go far enough. It merely teaches a man how to speak—not when or how long.

Sleuthing IN BLDG. 4-6

by TEDDY NEDS

When Esther Batchelder, Production Section, answered her telephone last Wednesday evening and said "fried ham," she won a prize on the "Dinner Winner" program. It just goes to show you, even though you do feel strange greeting everyone who calls between 6:30 and 6:45 with your dinner menu, that at times it pays. The prize consisted of a basket of groceries including 10 pounds of meat. . . . We are glad to see Delores Soule again. She has just returned to work after a three weeks' leave due to illness. . . . We women are especially glad that the designers of men's neckties have decided to add a little color this season. They brighten up our men! Ken Parks, Commercial, has an extremely gay and vivid one. It has been said that Ken's wife will take no responsibility for his new tie. . . . Last Friday noon, Feb. 18, Mildred Bosserman, FHP Motor Sales Ediphone Room, and Mary Jo Capps, Sales Division of Taylor Street, were honored with a farewell luncheon at Manochio's Grill. Both girls received lovely gifts. Milly and her husband are moving to Seattle, Wash., where her husband is employed with Boeing Aircraft. Mary Jo has decided to become a full-time housewife. We shall miss both of you, but we wish you much enjoyment in your new occupations. . . . Here's double congratulations for Bob Winner, FHP Sales Division of Taylor Street and formerly of Bldg. 4-6. Bob became the surprised and proud father of twin boys, Jeffery and Timothy, born on Tuesday, Feb. 15, at the Lutheran Hospital. Just a little late for Valentine's Day, weren't they? . . . The A. C. Division bids farewell to "Bertie" Bevington, who left last Friday for San Jose, Calif., where she will continue to work for G-E. We wish her good luck on her new assignment, and envy her that California sunshine. . . . Correction: Last week we reported Glen Stapleton would like to have extra copies of the WORKS NEWS. He thought his picture would be in that issue; however, whenever his picture is printed (sketched), this is the copy you should send him so he can paper his doghouse. . . . The DC Div. says goodbye to Vic and Bob Zoller. We have all enjoyed working with you and wish you the best of luck. . . . Wade Tyler received a unique Valentine Day card—that is, it is unique if you can call paying a 50-cent parking fine a Valentine. Oh, well, it all happened on Valentine Day. . . . Walter Hahn, wouldn't you like to invite all your fellow workers out to your house for a "teeny" taste of that smoked ham you won as an attendance prize? We heard it weighed all of two and one-half pounds. . . . Happy Birthday to Sam Moore, that distinguished looking man from Georgia with the Southern drawl. . . . We are happy to announce that the Long Winded Champ for the month is a newcomer, Bob Sharrow. We certainly have lots of competition now in the Wire and Insulation group. . . . We hear that Fred Suhr was the big winner at the Squares Bridge Party Saturday night. Congratulations, Fred. . . . First signs of spring: a few sunshiny and balmy days, an occasional robin and Lela Omspach with that becoming new short hair cut.

OUT OF THE BLUE in 26-2 Office

by Delores Patterson

Did one ever wonder how some of the men from the Specialty Transformer Engineering Division looked when they were in college? If so, go see D. W. Merchant and ask to see the book he brought to work called "Purdue Alumni with the G-E." M. O. Marsh, C. W. Kronmiller, E. C. Hill and D. W. Merchant were some of those whose pictures appeared in this book. My, boys, how you have changed! . . . The Transformer Drafting Section is very happy to welcome Skeets Lahrman and Carl Lommatzsch. . . . We couldn't quite decide whether E. C. Hill was happy or blue over the Valentine he received at work. It had no name signed and was very, very sweet. Arriving home that night, he learned it was from his wife. After being told, his very words were, "What a revoltin' development this is!" . . . We are very glad to learn that Herb Driftmeyer is back "in the pink!" Hope to see you soon, Herb. . . . Kay Jettinghoff, Mr. Rinne's secretary, is leaving this week and was honored at a dinner party held in the G-E restaurant. Also leaving are Vivian Smith and Francis Clifton of the Service Bureau. Goodbye and good luck, girls! . . . Betty Spitler of Payroll and her parents moved into their new home in Kirkwood Park recently. Betty was thrilled over the new surroundings, but her pet cat, Boots, wasn't quite so happy about it and left a few scratches on Betty. . . . Ray Soughan is keeping his fingers crossed anxiously awaiting the outcome of the Main Office volleyball game with the Squares. . . . And, last but not least, is the potluck held Valentine's Day. Those who attended were Isabelle Hausbach, Phyl Fisher, Helen Brindle, Betty Carter, Ginny Winegart, Martha Newell, Viola Brooks, Katherine Ernsberger, Vivian O'Neill, Therese Lindenberg, Dorothy Bartholomew and Yours Truly!

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, February 28, 1949

BROADWAY LOST AND FOUND

FOUND—Nine keys and a can opener on a bar. Found on west side of Broadway near 18 gate.

FURNISHED ROOM—With Twin beds, modern. To share with young man. 1243 Fletcher Ave.

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

Most people think wire recordings are fun and we can take them in our stride, but not so with Millie Snyder. We hear you did look quite fetching in your black formal as you warbled for the guests at a recent party, Millie. . . . We are curious to know who gave Lela Seibert that gorgeous Valentine gift. How about letting us in on the secret, Lela. . . . Anna Lee is very proud of her prowess as a euchre player, and Ruth Stone and Marie Wilson seem to be her favorite opponents. Gus makes a pretty good partner for Anna, and they admit that they are indubitably the female champs of the world. Speaking of Gus, she and Mitzie have taken a new chum into the exclusive circle of "The Chicken Coup Clique," this new member answers to the name of "Vik." . . . Tommy Williams was all smiles Monday morning as she and Charlotte Stanford placed in the doubles event last Saturday. We hope you hold your placing and here's to more good bowling, Tommy. . . . Congratulations to Norm Wolf, who will celebrate his birthday Sunday. . . . We hear that Dortha Ramsey and Arveda Neal and their husbands were late Saturday night (or early Sunday morning) callers at Rachel Mounsey's house last week-end. Rachel says she hopes you will let your husband stay for breakfast the next time, Dortha. . . . We are glad to see Mildred Ely back in our ranks. . . . Ernie Raypole says he spent a quiet week-end at home. It must have really been quiet, as Ernie couldn't hear so well yet on Monday. . . . Iris Hebble says that seeing "The Boy with Green Hair" didn't give her any ideas for becoming the "Girl with Blue Hair." . . . Blanche Mulligan really bakes a mean cake, but we hear that her appetite fails when it comes to eating it. She just doesn't care for "sour buttermilk" it seems. . . . Belated Birthday Wishes to Anita Fitch and Mary Cuellar who are now "just sweet sixteen" so they say. . . . We wish a speedy recovery to Gayle Goff and Charlotte Brunner who are on our sick list, also to Elsie Miller, one of our new co-workers who is now recovering from an operation. . . . Irma Beard, our new Elex Contact girl, has proven her excellent salesmanship in the club's Jello sale. Nice work, Irma. . . . Charlie Prine had an indoor swimming pool recently, much to his disgust. Late that night he tried his art at the plumbing game. From what we hear, we should have referred him to Ruth Leverton, who has had some experience in plumbing. . . . Don't you think that Daisy Tannas will really be a slick chick in those new blue shoes?

Let's Eat!

CAFETERIA and RESTAURANT MENUS

FEBRUARY 28 THROUGH MARCH 4

BROADWAY	TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant—16-2 12:00 M. - 1:00 P.M.

Special dinners and parties arranged upon request.
Menus Subject to Change

P's and Q's of 17-1

by Joe Kramer

"Those who deny freedom to others deserve it not for themselves and under a just God cannot retain it."—Lincoln.

Cliff (Tidy) Combs led the opening salute to the observance of National Brotherhood Week. If his enthusiasm holds out, there are sure to be some sore arms due to Cliff's experience on the farm pumping water. . . . William Grimm believes in safety and purchased safety shoes to wear around the house, where Bill says most of the accidents occur. . . . Although Valentine's Day has passed, Ralph (Pop) Beerman received a valentine which was a reminder of a famous coffee that is good to the last drop. Ralph says the valentine was not what Henry Wichern thought it was. . . . Kurt Harz, after reading a story in **Life** Magazine, contemplates on going into the business of raising opposums because of the quick turnover. Kurt says a fast nickel is better than a slow dime. . . . No, Helene (Dancing Girl) Evanoff is not on a diet, that is, you really can't call it a diet. She just isn't eating as much as she used to. . . . George (Goldie Locks) Mosshammer, better known as "Baby Sitter," is in the market for news—"dirt to you"—about your reporter or his dirt catchers. George says the recent baby sitting valentine he received has increased his business 60 per cent. . . . Johnny Junk got tired of waiting on that old man car and purchased one through Frank (Nature Boy) Martin Agency. Remember that Buick you bought, Johnny? . . . With the extensive farming going on in the south end of Bldg. 17-1, a new agency opened up to eliminate the disagreeable odors that go with certain chores of hauling you know what. Frank Martin has just the right aroma to use for fumigating, deodorizing or, take note, girls, alluring. . . . The new cost supervisor in Bldg. 17-1 is Virgil G. Hartman, recently of our Tiffin Plant. Virg is here as a replacement for Carl Reiter. All members of the N.H.P.C. welcome Virg and invite him to partake in the noon-day sessions. . . . Helen Dawson has left us to take up full-time duties as a housewife. Goodby and good luck, Helen. . . . That far away glint in Tavie Popa's eyes Monday morning was not due so much to lack of sleep, as reminiscing of the past week-end she had in Chicago. . . . The way some people are examining maps and time tables, you would think vacation was just around the corner instead of 20 weeks away. Betty Sue Morris is singing "California Here I Come." We don't know whether that is a hint as to where Sue is going on her vacation or not. . . . Ending with a bit of advice, our philosopher, Argend Denney, reminds us that there are two classes of people—people who do the work and those who take credit for it. Which class are you?

Said the girdle to the hat, "You go ahead, I'll bring up the rear."

Inquiring Reporter

SEVEN G-E EMPLOYEES LOST THEIR LIVES IN 1948 DURING TIME AWAY FROM THE PLANT.

WHAT CAN BE DONE TO REDUCE THESE OFF-THE-JOB ACCIDENTS?

GULEIA BROWN

Bldg. 26-2

"Most accidents happen on the highway. Be sure your car is in perfect running condition and never take any chances. You also have to keep a sharp eye on the other fellow, for you never know what he will do."

ARLAND W. BELL

Taylor St.

"I think if we would all work harder to practice safety after working hours, this would reduce a lot of off-time accidents."

GLORIA MECHLING

Bldg. 4-4

"If people would be more careful and practice the safety laws that are set up for them, I believe the number of accidents could be lowered."

CARL J. SCHONE

Bldg. 19-5

"If people would slow down a little and think twice before taking chances on or off the highway, then there would be less accidents."

REBECCA B. WEAVER

Taylor St.

"When going and coming to work, take your time, look both ways before crossing streets, cross over at corners, walk with the light. In driving a car take your time, don't drive over 50 miles an hour, give correct hand signals and come to a complete stop at stop streets."

Ruth Freeland, if you wouldn't stay out so late, you wouldn't have to have Velma Rose call you by phone in the mornings. . . . Dale Stuckey and Ernie Clark both received a cute valentine last week; It suited them. . . . Frank Clibon, what does the other guy look like? . . . Peggy Reynolds, we think that your dress looks better without the cape. . . . Lonnie Rockstroh, how did you rate getting a dozen roses on Valentine Day? . . . Garnet Curie, we advise you to wear your rain coat all evening when you go out. . . . Cbarlie Wrish, Peggy Reynolds thinks you can't smile. Let's show her, huh? . . . They added a new addition to the Sample Shop. She weighed about fifteen pounds and it took seven men to lift her, but with a hard struggle they finally made it. P.S. It was a steel table. . . . We wonder if everybody knows the excuse Carl Fletcher gave Jim Young in order to get out of helping move the table. That was a good excuse, Carl, too bad it didn't work. . . . Jean Fry got a lovely necklace and earrings for her birthday. . . . I think tbat it would be a good idea if we take up a collection and buy Jim Young a row boat so he can get down in his basement to fire the furnace. . . . We hear that the fellows in the tool room had an exciting card game tbe other noon and drew quite an audience. . . . Lucille was just telling me about a present she received this year. You folks ought to hear it, I'm sure you would all get a big laugh out of it. . . . Here's a tip to all you girls who do up your hair. Get your husband to fix it like Rosie McKinney does and in case it doesn't turn out just rigbt, you can always blame the better half. . . . Has anyone seen John Altekruse lately? He may be hard to identify under that Florida sunshine tan he has, yet we all know be hasn't been out of Fort Wayne. . . . Johnny Freeze has been unhappy lately. Arnold sure set tbe pace as a safety committeeman the other day. He was star-gazing up in the air and a pair of pliers flew from nowhere and peeled him on the forehead. . . . Cliff Schwarz is getting the new car fever since he bas the old one in the garage most of the time. . . . Howard Ulrich, our boss, has a faraway look in his eyes lately. He gets a new room down in the west end of the building soon. . . . Gladys Suter gets so wrapped up in her work that she doesn't watch the clock. She worked a good hour overtime the other night. . . . This week we welcome a new T.E. Lewis Allendorph and bid farewell to Herbert L. McLaughlin.

Elex Sells Cook Books

The Elex Club has cook hooks for sale at $4 each. These books can be obtained at either personnel office at Broadway or Taylor St.

Americans bave more time-saving devices and less time than any other people in the world.

Fractional Fiction 4-5

By Elaine Sutter

A lot of you wondered why we didn't have a column last week. We cannot bave a column without your help. Please don't fail us again. . . . We congratulate Mr. and Mrs. Walter Gusching upon the arrival of a baby girl born Feb. 17. Also Dorothy Oury had a baby girl Feb. 13. Dorothy was our blueprint girl. Last but not least, Forest Bunner has every right to be proud, he bas a new granddaughter. . . . We welcome Audrey Turney back to work. She recovered very nicely from an automobile accident. . . . Henry Burch is doing his own plumbing. Henry smashed his finger and he figured it was cheaper to see a doctor than hire a plumber. . . . The Bldg. 4-5 office girls have organized their own pinochle club. By their groans and laughter sounds like they are having fun. . . . Joan Meyer bas a confession to make. She sent tbose valentines. . . . "We know the month of February bave important people's birthdays," say Dewald Slater, Pearl Noble and O'Brien. Congratulations and many more returns. . . . Forest Bunner enjoys his new car so much that the other day he was so anxious to get into it that he broke off two door keys. The result he was late for work. . . . Anyone wisbing to know how to pile brush, see Dick Young. He had them piled so close, when he burned them the fire got so hot it singed his eye lashes under his glasses. . . . Mr. and Mrs. Pat O'Brien spent last week-end with their son Jack of Cleveland, O. Since it was Pat's birthday they were highly entertained. They saw their first hockey game and various interesting parts of Cleveland. . . . Happiness? It is an illusion to think that more comfort means more happiness. Happiness comes of the capacity to feel deeply, to enjoy simply, to think freely, to risk life and to be needed.

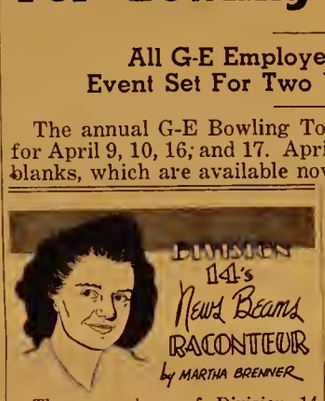
Orders Being Taken For Kindling

Kindling orders are now being taken at the Employees' storc in Bldg. 8-1.

Entry Blanks Available For Bowling Tournament

All G-E Employees Are Eligible; Event Set For Two Weekends In April

The annual G-E Bowling Tournament has been scheduled for April 9, 10, 16, and 17. April 2 is the deadline for all entry blanks, which are available now at the G-E Club.



The team event will be held on Saturday, April 9 and 16, with squads at 3:30, 6:30, and 8:45 p.m. Doubles and singles will also be rolled these two Saturdays, with a squad each day at 1:30 p.m. They will also be held on Sunday, April 10 and 17, with squads at 1, 3, 5:30, and 7:30 p.m.

It will be an A.B.C. sanctioned tournament and all G-E employees and G-E Club bowlers are eligible.

Handicap will be 70% up to 1020 for teams, 420 on doubles, and 210 on singles with the maximum of 35 pins per game, per man. Eligibility will be based on each bowler's established average regardless of what alleys. Bowlers should use the highest league average of 1948. Those with no average for last year should use the highest league average as of April 1.

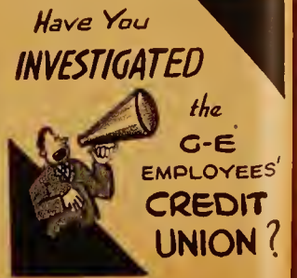
Bowlers can compete only once in each event.

Guaranteed first prizes are team, $85; doubles, $35; singlcs, $20, and all events (actual pins), $10. The money is being donated by the G-E Club.

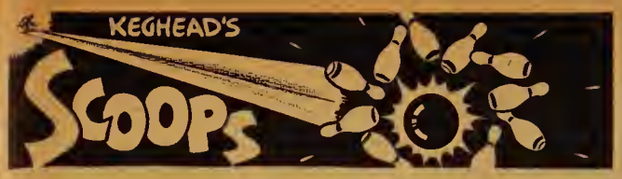
The co-workers of Division 14 wish Miles Cameron a lot of good luck and loads of success in his new position. . . . Welcome, Carl Reiter, to our Division. . . . With the Sectional Tournament well under way we would like to at this time express our appreciation to the General Electric Co. for making it possible for everyone to listen to the basketball games during the past season. . . . If anyone is still wondering about the ability of the South Side team, just ask Mr. Skevington. . . . We also are wondering just why Gus Weisenburger is such an Elmhurst fan? . . . It seems Paul Smith came to work the other day with a stiff neck and the following day was absent. The next day he returned with a cut over his eye. Just what is going on, Paul? . . . Estel Grier has been strutting around with a new pipe, and Dale Irwin has been trying to find out just what kind of "cracker jack" he bought to get such a pipe. . . . Gay Huey was in an awful hurry the other morning and came in the gate on both elbows. . . . Ina Armey and Zella Sheehan would like to buy an old "Toonerville Trolley" so they can ride the last mile each morning. . . . What's this we hear about Zella Sheehan suddenly taking a liking for turnips? . . . We are told through the "grapevine" Mr. Campbell was really "off the beam" the other night. He rolled a perfect gutter ball. . . . Orville Robinson has found out his youngest boy can outdo him in wrestling. One round and Orville comes to work with a "kink" in his back. . . . Bill LaVine finally got the front door of his living room hung, and now it's so heavy he is wondering just who will help him open and close it. . . . How come Mac has changed his nickname from "Dogwood" to "Skippy Hot Spurs?" . . . Rosamond Schooley walked from the post office to Howard's for some film. How come your hubby wouldn't drive any closer to Wayne St., Rosey? . . . Marcielle Bantel has trouble on the bus after work.

Personnel-ities

by Iris Knapp



"He is a fool who cannot be angry; but he is a wise man who will not."



Flash! Flash! and more Flash! We have just seen a very unusual invitation. Herschel Smith has been invited to attend President Truman's Conference on Industrial Safety at Washington, D.C., during March 23, 24 and 25. Congratulations, Uncle Herschel, and when can I get a job in Washington? . . . A friendly welcome is extended to Harold Hoffman who is spending the next few days with the Personnel Division. . . . Veda Orff and Ed Cade are to be congratulated on giving their services to the Red Cross during the coming weeks. They will be instructors of First Aid Classes at St. John's Lutheran Church. By the way, these classes are open to the public for anyone over 12 years old. (Since you're interested in safety, etc., Herschel Smith, perhaps they'd make special arrangements for you.) We think Herschel deserves honorable mention here as he really helped put this project over. . . . Jean Smith has taken over some responsibility in the Elex Club organization, as she was recently appointed treasurer, succeeding Lucile Salas. . . . We're glad to have Eva Tucker of the Restaurant leading her natural life, after a pretty hard week. She was involved in a serious accident from which she escaped injury, but in which a relative of hers was less fortunate, and was hurt somewhat seriously, we understand. Sorry to hear of the bad news Eva, but we're thankful it wasn't worse. . . . Don Campbell enjoyed Thursday and Friday in Chicago last week at an Industrial Editors' Association Institute. Don tells us there were some 150 editors attending the conference, somc coming from such distances as Texas. Could you find enough entertainment during the leisure minutes, Don, or were you forced to drive into New York for evenings? . . . To be remembered on Valentine's Day is an honor, especially when the remembrance is an orchid, and more especially when it's from your husband—as was Mae Mulvane's good fortune. . . . We don't know what the Employment Office has that we don't have in Bldg. 8-2, Mr. Stauffer, unless it's that nice cozy little private office you found over there. Of course it's situated conveniently too, for "scenery," that is. . . . Marian Davies and Jean Smith are to be commended for thc part they played in making a success of the supper at the "Y" last week. . . . It is plain to see that "delegates to the United Nations should be paid salaries, as they are absolutely no good at peace-work."

G-E Bowlers Win City Titles

Two G-E men walked off with top honors recently in the City Bowling Tournament. Walter Mertz, Bldg. 26-5, won the doubles championship with his brother, Andy, left, an employee of the Tokheim Oil Tank & Pump Co. Ross Smith, Bldg. 27, at the right, won first place in the singles competition. He had a 744 total with a 105 handicap.

Orval Doherty of the Office League came through with a 602 count on scores of 210, 209 and 183 to remain in the groove. Wonder what the boys will be digging up now to show him.

The Rump boys sort of stole the show with big counts. Clarence getting 248 and Vic a 231. Other 200 counts were rolled by Bob Hanna, 201; "Barefoot" Fanning, 222 and 200; Don Waldrop, 208; Bill Piercy, 204; Paul Perry, 200; Frank Schlink, 214, and Wiley Shockney, 213.

G-E Masonic League

The Patrols are out in front with a 14-4 record. The boys really got warm Tuesday evening with sixteen 200 counts. paced by Bill's 257 and 633 total. Other 200 scores were made by May, 211; Somerville, 227; Dale, 203; Larson, 206; Martz, 233; "Sapp" Quinn, 202; Gidley, 201; J. Smith, 208; H. Smith, 200; M. Bailey, 211; Howard Hickman, 200; "Homeless" Garrett, 221 (every week since they started those pot games); Chevelier, 209; Hoelle, 202, and Bob Hickman, 213.

Small Motor League

Lowell Welker stayed in the groove getting his third straight 600 series. Lowell had games of 226, 201 and 212 for a 639 total. The Models and Production teams are tied for first this week.

Two hundred scores were rolled by Jim Daley, 237; Walt Mertz, 224 (Champion); Fletter, 221; Hinton, 221; Bill Walt, 214; Frank Gitter, 213; Paul Boedeker, 212; Erv Aumann, 212, and Kammeyer, 209.

Interdivision League

The feature of the week was the 2981 actual pin series shot by Brouwer's Screwballs on games of 1004, 987 and 990. Their total was swelled by Les Shroyer's 694 and George Luedeman's 608, Keghead's coming on games of 234, 258 and 202, and George's on counts of 197, 215 and 196.

There were plenty of 200 scores with no less than 21. They were rolled by Herb Habig, 230, and 224; Tutman, 212 and 204, "Barefoot" Fanning, 201 and 200; Andy Anderson, 233; Jerry Saylor, 220; Ivan Parrish, 218; Walt "Champ" Mertz, 216; Adam "Lazonga" Farrell, 213; "Worried" Kuntz, 209; Clarence Rump, 205; Johnson, 204; Bill Glenn, 204; Lee Crowell, 203; Bill Nickerson, 202; "Do Do" Matthews, 201; Walt Starke, 200; Don Dimke, 200, and Bainbridge, 200.

Transformer Bowling League

Teams M and Toys are out in front with six wins and no losses each. Two hundred games were kegled by Rowe, 202; Johnson, 203; Oberlin, 210; Staley, 226; Bond, 231, and Lenz, 203 and 235.

Ladies Monday Night League

Emma Vaughn came up with high series on games of 181, 189 and 171 for a 541 total.

High games were rolled by Helen Studler, 191; Vivian Fleckenstein, 187; Margaret Lepper, 181, and Esther Muzzillo, 180.

Decatur Bowling League

H. Murphy of the Monday Night League rolled a 646 series. Two hundred games were piled up by Gage, 230, and 200; Geasel, 201; Longworth, 217; Strickler, 203; Laurent, 200 and 226, and Cook, 202.

In the G-E Fraternal League high scores were rolled by Wolpert, 201; Miller, 220; Faulkner, 214 and 201; Laurent, 213; H. Murphy, 204; Lord, 201; O. Schultz, 209 and 204, and Zelt, 213.

H. Murphy and G. Laurent rolled the high series for the Mixed Doubles League with 641 and 674 totals respectively. Zelt rolled a 210 for the men while the high scores for the women are B. Faurote, 179; V. Murphy, 159; and H. Schultz, 176.

Bowling and Stuff

Don't forget those entries for the annual G-E Employees Tournament with guaranteed first prizes of team $85; Doubles, $35; Singles, $20; and all events (actual pins) $10.

It seems that the Motor Generator team brings good luck to the Screwballs as both times they have met this year, they have been hotter than a little red wagon.

High scores for those trophies are Les Shroyer, 694; Helen Wagner, 594; Orval Doherty, 219; and Tommy Williams, 247.

Let's hope we stumble onto a ghost writer for next week.

Mary Murphy really had a red ear when answering the phone in the green room. She also had a grand fall in the office. Wasn't it for the fellows, Mary? . . . We have seen Darreld Hirschfelder angry and even furious, but last Wednesday he was burned up. He neglected to read the line on a book of matches that very clearly reads, "Close Cover Before Striking." . . . By the looks of Edna Bailey's fingers, she was playing with fire too. . . . Famous last words, "The best job that ever hit G-E," by "Monroeville" Orie. . . . Hilda Vance has been taking her work seriously lately. Her husband says he doesn't mind her doing her work in the daytime, but when she works all night and keeps him awake, that's too much. . . . What next? We hear Otto Fultz has a deodorizer in his ash tray. . . . Our transformer division sure is getting modern. They even put drawers on the horses. Another of Wayne Weimer's masterpieces. . . . The girls in the green room think the valentine box was a real success. . . . Wonder where Martha Foelber and Marian Hardwick were last Monday. We don't think they had dollar day again. . . . Otto Fultz and Millie Kouder sure are some birds. . . . We hear Les Redding always manages to get a ringside seat at all the floor shows he goes to. . . . The candy lady had better sell teeth with her hard candy bars, because Johnny Byrie just can't eat them.

Basketball Team Wins Two Games

G-E Club Defeats Ind.-Mich. Elec., Wheatley Center

The G-E Club basketball team ended its losing streak last week by winning games from Indiana-Michigan Electric Co. and Wheatley Center. In the game with the I-M team, G-E came out on top, 39-12, with Bucher as top scorer for General Electric. The Club defeated Wheatley Center, 48-35. Carr was high man for G-E with 20 points, and Blanks high scorer for the Center with 16 points.

With the two wins of last week, the season record so far is 21 wins and 14 losses. There are 12 games yet to play.

The next games will be played Monday, Feb. 28, at 8 p.m. in the G-E Club against Roberts Truck Rental; and Thursday, March 3, in the Club gym, at 9:30 p.m. against the G-E Firemen.

Box Scores:

G-E Club	G.	F.	T.	Ind.-Mich.	G.	F.	T.
Bucher	5	3	13	Kibiger	0	0	0

Open Bowling

EVERY SATURDAY
3 P.M. - 11 P.M.
At The
G-E CLUB

FHP got the week's games of the Interdivision Basketball League going with a 41-39 win over Taylor St. The winners, with Trabel hitting very well, piled up a big lead and then withstood a strong finish by their opponents. Taylor St., sparked by Perry Esterline, looked like an improved ball club.

Howard Schultz isn't too good with an eye dropper. We just hope that his wife doesn't ask him to put eye drops in the children's eyes. . . . We are glad to have Marvelene Butts back at her desk after a siege of illness. . . . Anytime you think that Bob Esterline is getting old you just didn't see him at the George Washington dance the other night. He has a perfect pair of feet and knows how to handle them. . . . After much time and discussion, Pres Slack has bought that new home and after this week he will be at home in Elmhurst Addition. We are all expecting an invitation to chicken dinner some Sunday soon. . . . Paul Merkey says that it isn't that he doesn't need his money but just absentmindedness that caused him to throw his check away. You want to watch that, Paul, people will say that you are getting old. . . . Jess Hahan has the most unusual washing machine. It not only washes, rinses and damp dries but also serves as a cocktail shaker and a bar. In fact that machine is so busy that it sounds like "Mr. Bones" doing "Sweet Georgia Brown."

The man with a burning ambition is seldom fired.

Manager Yentes' Tool and Die men gave their all but were no match for Winter St. and dropped a 90-21 decision. The winners were hitting from all over the floor and showed they have really pulled out of their slump. Blauvelt totaled 27 points and Beneke got 19.

The Firemen got past another tough team this week, defeating Transformer, 55-34. The Firemen took the lead in the first quarter on some nice shooting by Morkoetter and Moodie and held it all the way.

The Squares beat Small Motors, 42-34, to hold second place with a record of three wins and no defeats.

OUT OUR WAY

By J. R. WILLIAMS

G-E Ends Series Of Broadcasts

The Fort Wayne General Electric ended their series of G-E sponsored broadcasts of the outstanding high school basketball games last week. These broadcasts were aired over Station WANE with Dick Buckley giving the play-by-play accounts of each game.

Friday, Feb. 18, the South Side Archers dropped the Central Catholic Irish, 50-31. The next night, Central handed Concordia a 56-51 defeat.

Transformer Quartet Wins Trophy At Squares' Party

Men's voices filled the air with old songs and gay melodies during the Squares' stag party Wednesday evening, Feb. 16, at the Squares Hall. The Transformer quartet snatched the Howard Miller trophy away from their only competitors, the Works Lab quartet, in the annual Barbershop Quartet contest.

At the top left, above, are the Works Lab quartet members: Bob Etchison, Bill Skinner, Bob Drake and Marion Halleck. The judges, in the center, ponder over the abilities of both quartets. The judges include C. M. Schnieders, J. F. Formanek and F. F. Hagadorn, head judge and a representative from the local SPEBSQA. The winners, at the right, are George Culp, Paul Vance, Herb Eaton and Dick Kimball.

In the lower right picture, the Indiana Tech Glee Club entertains the crowd with its songs and leads in community singing. Varner M. Chance is its director, at the right. A comedy duet of Bob Loveland and Dick Thomas stepped forward to offer a song as an impromptu part of the program, in the center photo. At the bottom right, the Transformer quartet receives the Howard Miller trophy from Mr. Hagadorn.

HERE and THERE in BUILDING 17-4

by Maxine Baker

The ice fishermen all have a pretty long look on their faces. The balmy weather is taking away the ice. Cy Seymour will appreciate that. It seems as though Cy does not have a very good opinion of ice fishermen and claims they catch all the fish in the wintertime and he can't catch any during the summer. Oh well, it just isn't possible to catch fish in the summertime by sitting under a shade tree. . . . It's been all basketball this week with the Sectional in full swing this week-end. "Ten-frame" Herb is pulling for his Archers while "Punch-press" Reed puts his nickel on the Tigers. . . . Some of the girls in the Winding Section got some cute valentines, but now we are wishing Ed would hold his feet up higher so Clara wouldn't have to stoop so low. . . . The $64 question is "Why can't Leona keep up with Cora and Marjorie at lunch?" . . . Norb Lose has acquired a new nickname, "rabbit eye." It seems at times Norb's eyes have a pinkish tint like that of a white rabbit's eyes. This is especially noticeable on Thursday mornings. . . . The boys kicked in a few pennies for Ray Solga to buy some razor blades. He took the hint and the pennies and came in next morning with a fresh shave. (Wonder if we should help out Azar?) He hadn't better get any ideas about us taking up a collection to buy him a hair cut. . . . Lawrence Baker put some mercury on a dime, then dropped it into his pocket where it rested against his cigarette lighter. The lighter had an aluminum case and when the mercury touched the case it started a chemical action. Was he surprised when he reached in his pocket and came out with a handful of what looked to be flour but was actually an oxide of aluminum. This continued to grow out of the lighter case until it was actually three inches high. Looked very pretty too. . . . Was there a new girl in Bldg. 17-4 Monday morning? No, it was Pauline Nau. We just didn't recognize her with that new hair style. . . . Two more famous people have their birthdays in February, Esther Hakes last Tuesday and Ruby Lydy, Friday. Esther, you may have many more happy years. Ruby is also wished many happy returns, and we hope she likes that special gift. . . . Why does Jean Forst stare in the window of the 20th Century on Saturdays? Anyone having an extra flashlight case please give it to Dorothy Beasley. We'll furnish batteries for it. Maybe that will help to find her valentine. . . . Don Thomas had heartbreaking news over the phone last week. Coming back to his bench with tear stained cheeks we learned Pat had died. After well chosen words of sympathy, Don forced a smile saying, "Oh well, now we won't have to feed her, she didn't sing much anyway." It was then we found out "Pat" was the Thomas' canary! . . . Things that don't-get-told-when-we-aren't-here department: The Berdell Smiths have a charming new daughter. Congratulations from us to you.

TAYLOR MADE TOOLS

by Charlie Winans

Sooner or later a man, if he is wise, discovers that life is a mixture of good days and bad, success and failure, give and take. . . . He learns that it doesn't pay to be a sensitive soul, that he should let some things go over his head like water off a duck's back. . . . He learns that all men have burned toast for breakfast now and then, and that he shouldn't take the other fellow's grouch too seriously. . . . He learns that he who loses his temper, usually loses. He learns that carrying a chip on his shoulder is the easiest way to get into a fight. . . . He learns that the quickest way to become unpopular is to carry tales of gossip about others. He learns that it doesn't matter so much who get the credit so long as the job is done right. . . . He comes to realize that the world would run along perfectly well without him. He learns to sympathize with the young people, because he remembers how bewildered he was when he first started out on his own. . . . He learns not to worry when he loses because his experience has shown that if he gives his best, his average will break pretty well. . . . He learns that no man ever got to first base alone, and that it is only through co-operative effort that we move on to better things. He learns that folks are not any harder to get along with in one place than another and that getting along depends 98 per cent on his own behavior. . . . John Bastian brought in the above, and I thought it was worth passing on. . . . That Lyle Claphan as publicity chairman of the Northwestern Community Association sure does all right for himself as he got his picture in the paper again. . . . Paul Armstrong and Ray Bowers had John Bastian bring in his book of Hoyle so they could study up on their euchre rules, then proceeded to get skunked the first game after reading the rules. At this writing they have two legs on permanent possession of the burlap bags, three times and they win possession. . . . We are glad to see Charles Masel and Eldon Slater, a couple pensioners back greeting old friends recently. . . . While eating dinner in the cafeteria one day last week we heard someone extoling the qualities of one Bill Johnson, by name. Looking up we noticed it was Joe Matis. Of course, that's one man's opinion.

Thisa and Thata "SPECIALTY MOTOR"

by Helen Engle

Just wondering if Lavon Furnish makes a run on the Pennsy Railroad before coming to work. He wears a light blue denim engineers cap. . . . Glad to have Ruth Hive around again. She came back after helping in Bldg. 17-1 during an employee's illness. Also we have a new one in our section in the person of Opal Brayton. Ilene Case is now working at Taylor St. . . . Grace Ober and husband attended a professional hockey game over the week-end. Grace says if anyone wants to see something different and slightly on the rough side, that is it. . . . Alice Claymiller returned Monday after a few days' illness. . . . Esther Madden was beaming Monday as she showed off the pictures of her granddaughter. . . . We are very sorry to hear our division editor Helen Engle has the mumps. Go easy on those sour pickles, Helen. . . . Alva Foulks was in a bad way the first of the week: Speechless, no talkie. Diagnosis: Laryngitis. . . . Has anyone seen a horse or pony tied to a post on the floor. Echoes ring out during the day. . . . Detective J. J. Malone Castor really dug deep into case history to find the sender of his latest valentine. . . . Three of our tool makers have moved into new homes in the last week, namely Don Greenler to Getz road; Wayne Boester to E. Washington, and Richard Clancey to Sunnymead drive.

FORT WAYNE WORKS
GE NEWS

The question "Who ought to be boss?" is like asking "Who ought to be the tenor in the quartet?" Obviously, the man who can sing tenor.

Volume 32 FORT WAYNE, INDIANA, FRIDAY, MARCH 4, 1949 No. 9

$12,000 Quota Is Set For Red Cross Drive

The chairmen of the annual Red Cross campaign for the Fort Wayne Works and Winter St. plant are shown above mapping plans for the solicitation. They are, from left to right, R. L. Soughan, Specialty Transformer and Ballast divisions; Robert J. Ouras, Fractional Horsepower Motor Divisions; R. W. Kent, Works Contributing and Service divisions; J. W. E. Humphrey, Winter St. plant; Dwight M. Myers, Motor and Generator division, and K. W. Michael, Works General chairman.

Leading Solicitors Meet For Kick-Off Session Wednesday

A $12,000 quota has been set for the Fort Wayne plants in its Red Cross Fund-Raising campaign, which begins Monday at the Broadway, Taylor St., and Winter St. plants.

Nearly 500 employee solicitors have been appointed to canvass the two plants in an effort to obtain 100 per cent participation of all G-E employees.

The drive will be conducted at the Decatur plant Thursday and Friday.

Hold Session Wednesday

The preliminary kick-off meeting was held Wednesday afternoon in Bldg. 8-2 for the 45 leading solicitors. Glenn Reynolds, executive director of the local Red Cross chapter, gave a short talk and presented a movie sbowing the higblights of Red Cross activities for last year.

Mimeographed sheets of instructions and information concerning the work of the local Red Cross chapter were distributed at the meeting. There is a leading solicitor for each section. All bave about 20 solicitors under them.

The $12,000 goal does not include the Company's contribution to the Red Cross.

Tbe following is a partial list of the employees wbo are solicitors for this year's campaign:

RETENTION OF NON-COMMUNIST AFFIDAVIT CLAUSE URGED IN ANY LABOR LEGISLATION

EDITOR'S NOTE: *Following are parts of the testimony of L. R. Boulware, Vice President in charge of Employee Relations, before the Senate Committee on Labor and Public Welfare in Washington, Feb. 17. The Committee hearings concerned the pending bill on a new labor law to replace the Taft-Hartley Act. The highlights of the testimony of President Charles E. Wilson before the Committee on the same day were published last week. Mr. Wilson read a prepared statement to the Committee in which he specified certain provisions to be included in any labor legislation that will be adequate and fair to all. Mr. Boulware described the experiences of General Electric Company in its dealings with various unions. Specific instances, under a dozen separate headings, were detailed tending to illustrate the weaknesses and the strengths of the present law.*

"General Electric Company believes that the labor law should require affidavits of "both company and union officials that they do not belong to the Communist party or to any party which plans, teaches, or advocates the use of force or violence to overthrow the Government of the United States," L. R. Boulware, Vice President in charge of Employee Relations, declared before the Senate Committee on Labor and Public Welfare, during hearings on the pending bill to supplant the Taft-Hartley Act.

Mr. Boulware placed the subject of Communism first in his testimony which was presented to the Senate Committee under 12 separate headings. The others were jurisdictional strikes, secondary boycotts, featherbedding, national emergency strikes, the closed shop, mass picketing and violence, free speech, mutual responsibility of employers and unions, political contributions, separation of the functions of advocate and judge (respecting the NLRB and the U. S. Conciliation Service), and the exemption of supervisors.

Effect Of Clause

Mr. Boulware said that in speaking for the Company's position "not only as a private employer, but as a contractor for the Atomic Energy Commission" that General

(Continued on Page 4)

Squares Plan Dance Tonight

The G-E Squares Club is sponsoring an open house with square dancing tonight at 8 p.m. There will be no admission charge and coaching will be provided for those who are inexperienced. Everyone is requested to wear sports clothes or hillbilly costumes. A prize will be awarded for the most appropriately costumed couple.

A three act, musical comedy starring men from the Works Lab will be staged at a Squares stag party Wednesday, March 16, at 8 p.m.

G-E Veterans Open Membership Drive

The G-E World War Veterans' Association opened its annual membership drive today. The canvass of all buildings for probable members will continue until Marcb 25.

A chief contact man has been appointed for each division, with several assistants cooperating in the larger divisions. Any employee who served in one of the armed services during either of the two world wars and was honorably discharged is eligible for membership in the association. Annual dues are 25 cents.

Memorial services are conducted by the group on Memorial Day, V-J Day, and Armistice Day. Tbe organization also sponsors two social functions during the year.

Miller Appointed To Succeed Tuttle

Summers Named Engineer, Works Laboratory

W. H. Miller

C. M. Summers

William Howard Miller has been named Assistant to Manager, Engineering, Fort Wayne Works. He succeeds V. J. Tuttle, who retired this week after 42 years of service. Claude Summers was appointed to succeed Mr. Miller as Engineer, Works Laboratory.

Mr. Miller was first employed by the Company in 1907 as a stenographer in E. A. Barnes' office.

It was through J. V. Hunter, a chemist, that Mr. Miller became interested in chemistry. When in 1912 Mr. Hunter left the Company, Mr. Miller was named in charge of the testing laboratory. Since that time Mr. Miller has built the Works Laboratory to its present status, with a staff of 90 persons at two plants. He was given tbe title of Engineer of the Works Lab in 1928, when the position was created throughout the Company.

Mr. Miller resides at 1232 W. Washington Blvd. He is a member of the American Society for Testing Material, the American Society for Metals, local chapter of the A.I.E.E., Chemical Society, Fort Wayne Engineers' Club, Kiwanis Club, Orchard Ridge Country Club, Chamber of Commerce, Izaak Walton League, General Electric Engineers, Squares and Supervisors clubs.

Joined G-E in 1927

A 1927 graduate of the University of Colorado, Mr. Summers came to the Fort Wayne Works as a test engineer in the Transformer Experimental Laboratory. The following year he was assigned to the Transformer Engineering Division as a design engineer. In

Apprentice Alumni To Hear Address By Reid Erekson

Reid Erekson, director of tbe Fort Wayne Civic Theater, will speak at a meeting of the Apprentice Alumni Association, Tuesday, Marcb 8, at 7:30 p.m. in Kreis Stoltzenau hall.

The meeting will also include a presentation of attendance prizes, business session, and buffet lunch.

Foremen's Meeting To Feature Talks By Superintendents

"Superintendents Night" bas been planned for the Foremen's Association Wednesday, March 9, at 8 p.m. in Kreis Stoltzenau ball.

All superintendents at the Fort Wayne and Decatur plants have been invited to give brief talks.

The meeting will also feature the installation of new officers and a buffet lunch.

FORT WAYNE WORKS NEWS

Don Campbell ..... Editor

Volume 32 Friday, March 4, 1949 No. 9

Many Services In City, County Are Rendered By Red Cross

The services rendered during last year by the Fort Wayne-Allen County chapter have been real "Missions of Mercy" for many G-E folks. A report of the chapter's activities for last year includes:

HOME SERVICE

Each month of the past year, an average of 264 persons or families (3,169 in all) have sought help through Home Service. They have come for assistance in securing government benefits, such as family allowances, disability pay, hospitalization; or for help in getting a serviceman home because of an emergency in the family and for consultation about their personal and family problems. Both Military and Veterans Administrations have used the Home Service Department in assisting them in making decisions relative to the needs of servicemen and veterans.

During the year, 392 persons or famiiles received financial assistance totalling $6,292.79. This financial help went to veterans with service connected disabilities who were awaiting government benefits and to servicemen's families whose family allowances had been delayed.

COMMUNITY BLOOD CENTER

During the past year, 1,989 pints of life-giving blood have been made available to the Fort Wayne and Allen County hospitals. Many are known to have had their lives saved through the generosity of the citizens of Fort Wayne and Allen County in providing whole blood. The three hospitals in Fort Wayne use an average of 60 to 80 pints of blood per week for transfusions; and it is the desire of the Community Blood Program, through the Red Cross, to meet the needs of the patients by having available the right type of whole blood.

SAFETY SERVICES

Safety Services include First Aid and Water Safety. It is through the Red Cross that people are trained to save someone else's life, or perhaps their own, by having adequate knowledge on how to treat injuries or swim safely.

There have been 38 classes in First Aid, training 598 individuals how to care for injuries before the doctor arrives. Industrial classes are conducted through safety directors in the various plants, and the community has available many trained instructors to conduct classes with community groups.

It is the goal of Water Safety to "waterproof Allen County." This can only be accomplished through making available trained instructors to teach Life Saving classes. Twenty-five classes have been conducted the past year, training 229 individuals as certified life guards. Sixty-six classes have been conducted, teaching 715 individuals how to enjoy the recreation of swimming. There are 43 First Aid Instructors and 36 Water Safety Instructors who volunteer their time to make these services possible.

Safety Services have 15 trained First Aiders operating Mobile Units on the highways of Allen County and have established two First Aid Highway Stations for the protection of the traveling public.

Through the number of exhibits, events, Emergency First Aid Stations, approximately 137,615 people have in the past year been more informed of the work provided for their safety through Red Cross.

HOME NURSING

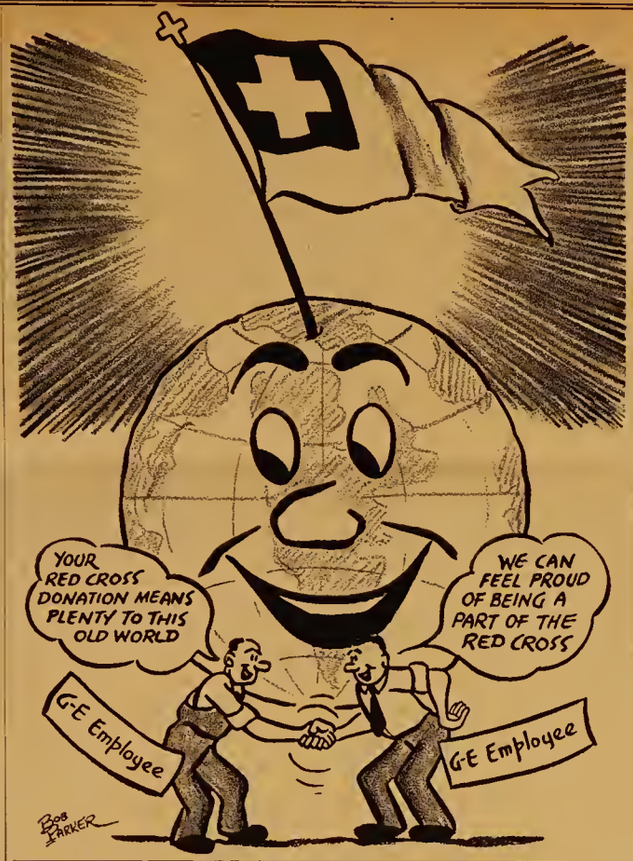
Home Nursing classes are offered to the citizens of Fort Wayne and Allen County through the Red Cross, in order that someone in each family might know the techniques necessary in caring for the sick.

This past year, there have been seven classes, training 108 individuals in how to care for the sick in their own home.

Seven Volunteer Home Nursing Instructors are available for classes when there is a request.

VOLUNTEER SERVICES

Volunteer Services of the local chapter train many people to do specific jobs for the community. The life and blood of Red Cross are its interested volunteers who, through Red Cross, render a community service. There are six services in Volunteer Service which train individuals in specific duties.



There are 97 active Nurses' Aides, with from 80 to 90 being assigned every month in the Community Blood Center, assisting the nurses with the operation of the center.

There are 50 active Staff Aides serving at the Chapter House including the Community Blood Center and other community agencies.

There are two trained Social Welfare Aide Volunteers who assist the Home Service Department in making contacts with servicemen and veterans' families.

Motor Service has 19 active members. They are scheduled each day from 10 a.m. until 4 p.m., delivering blood from the Community Blood Center to the three hospitals, assist in transporting crippled children for swimming classes, and delivering dressings for the Allen County Cancer Society.

Canteen Service has 37 active members who serve at the Community Blood Center daily and are prepared to serve in event of disaster.

HUGH CRANE discusses Management—Labor In Denmark

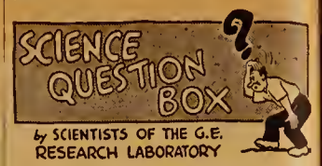
COPENHAGEN—I dropped over here to Denmark the other day. And I still can't believe that I'm here yet. Because I said "day" and I meant one day. We left New York at noon on Friday and we were in Copenhagen at noon the next day—and we lost six hours in the bargain by flying east, so it really only took 18 hours. We went to sleep just out of Newfoundland and woke up just arriving in Scotland. It's a small world.

Miniature Country

And Denmark is a small country. You could pack its population into Manhattan and its area into Connecticut and Rhode Island. And everything is on the same scale. The average farm is 25 acres and the average automobile is a bicycle. There seem to be millions of 'em, and yesterday I saw a chimney-sweep in a top hat riding one.

But Denmark is the mighty midget of peacetime Europe. With its pint-size farms and its Tom Thumb creameries and packing plants it manages to feed itself and provide a good part of the butter and bacon for England, Germany, and even some points north and east.

And it manages to do this though the Germans, while they had their heel on the Dane, drained out nearly three billion dollars worth of food, machinery, and other things from his country for which they have never paid. Yet the Danes have been feeding, until recently, several hundred thousand German refugees, free for nothing and solely out of the goodness of their very big hearts.



Danes Are Cooperative

How they do it is their own secret, but I think there are some fairly obvious reasons.

The first one is that they are perhaps the most democratic and cooperative people in the world.

It isn't such a bad pun to say

(Continued on Page 3)

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. Why can't I use a light motor oil in the radiator of my automobile as an anti-freeze?

A. Such a substitution is not recommended. The oil would soften the rubber gaskets and hose connections. It would be a fire hazard, for if oil leaked out it would fall on the hot engine. Furthermore, oil has a much lower heat capacity than water (or the usual anti-freeze agents) so it might not be able to carry the heat away fast enough to prevent overheating of the engine.

Q. How do insects breathe?

A. Most insects breathe through a system of tubes known as tracheae. These open at the sides of the body through valve-like structures called spiracles. Oxygen is drawn in and distributed through the tracheae, and then through finer tubes called tracheoles, to all the tissues. The same system also carries away the carbon dioxide that is formed.

Q: How far away can lightning be seen?

A: It is hard to give any definite figures, as visibility would be limited by the curvature of the Earth and the type of terrain over which one observes. In general, 15 miles would probably be the limit for strokes from clouds to the ground. So-called "heat lightning," which consists of distant strokes between clouds, might be visible up to 20 miles or more.

Meet the President

Hugh Crane

(Continued from page 2)

that you can see how cooperative they are from the number of cooperatives they have. The country is full of them. They have cooperative creameries, cooperative farm machinery unions, cooperative stores and coopcrative factories. They seem to know how to work together.

And they carry this cooperation into their international affairs. I asked one of them, "How can you people even mention the Germans without loathing after what they did to you?" and he said, "We have to trade with them to live." And as for cooperating with the United States and the Marshall Plan, they fall all over themselves to be reasonable and to see that what they get goes where it will do the most good.

Respect Capital, Labor

Another evidence of their cooperative ways is the relation between capital and labor. The first night we were here we were the guests of the Chamber of Commerce, the second night of the Central Trades Union Council. And the labor men spoke nearly as good English as the business men. In the United States travelling groups of newspaper men don't often get entertained by the local labor people; the Chamber of Commerce and the Rotary Club monopolize them. But when some of us asked "How come?" the Danes said, "Well, you see, in our country management and the union people cooperate." And they gave us a book and an armful of pamphlets to prove it.

The economic troubles of the hard-working Danes are a good illustration of what ails Europe and what the Marshall Plan is all about.

The first trouble is of course what the Germans did to everybody before their goose was cooked.

But the trouble now and from here on is trade and currency trouble.

In the old days the Danes used to buy feed for their cows and pigs from this country, make it into butter and bacon, sell the butter and bacon to England and Germany, and then use the pounds and marks they got for it to pay us and buy more feed.

System Isn't Working

But today they can't make this system work again. They keep on selling as much butter and bacon to their neighbor countries as they can get feed for, but the money they get isn't convertible into dollars. So we're loaning and granting them the dollars, to build up their herds and droves and barns and creameries and packing plants: and that's what they're using it for. But they can't sell the resulting butter and bacon to us, and when they sell it to the "soft currency" countries the money they get is frozen and they can't buy either dollars or feed or machinery with it.

One partial solution would be for us to lower our tariffs. A bigger help would be for Denmark's neighbors to give up some of their tariffs, quotas, currency restrictions, and government red tape. But the more we "journalists" (as they call us here) look into this thing, the more complicated it seems to get.

New Appointments Announced In FHP Financial Sections

M. R. Cameron

M. R. Cameron has been made Assistant to the Supervisor of Cost, Fractional Horsepower Motor Divisions.

Mr. Cameron began working for General Electric in 1936 as an assembler in Bldg. 4-2. In the spring of 1937 he transferred to the Cost Section of FHP Motor Division 15. In 1943 he became a cost leader on billing and detail in Bldg. 2-3. Prior to his recent appointment Mr. Cameron was Supervisor of Cost, FHP Motor Division 14.

He is married and has two daughters. The Camerons live at 1316 Morton St. His hobbies are fishing and target shooting.

C. W. Reiter

C. W. Reiter has been appointed Supervisor of Cost, FHP Motor Division 14.

Mr. Reiter began at G-E in August, 1943, as a member of the Internal Auditing staff in Bldg. 18-3. He was then transferred to Bldg. 17-1, where he was Supervisor of Cost in FHP Motor Divisions 19 and 20, the position he held previous to his recent appointment.

Interested in sports, he especially enjoys softball, baseball, fishing and golf. Mr. Reiter is married, and has two daughters and a son. They live at 1318 Park Ave.

V. G. Hartman

V. G. Hartman, has been named Supervisor of Cost, Fractional Horsepower Motor Divisions 19 and 20.

Beginning work for General Electric in 1943, Mr. Hartman first worked as a cost statistician in the Power Drive Division at Winter St. He then became a termination cost auditor at the Taylor St. plant in 1945. In 1946, Mr. Hartman was sent to the Tiffin plant as a cost clerk. He was appointed Supervisor of Cost at that plant. He returned to Fort Wayne this month to take over his new duties.

Mr. Hartman is single and resides at 622 E. Wayne St. His hobby is model railroading.

126 Pensioners Get Benefits Under Hospitalization Plan

Payment In First 15 Weeks Total $9,185 Under Experimental Plan To Help Retired Employees Meet Their Hospital Expenses

Financial aid for an aggregate of 1,636 days of hospitalization for 126 pensioners during the first 15 weeks' operation of the G-E Pensioners Hospitalization Plan was announced this week by William W. Trench, Chairman of the Pension Board.

A preliminary report on the experimental plan placed into operation last September shows benefits amounting to $9,185 paid out through Dec. 31.

Receiving benefits under the new plan were pensioners from: Schenectady Works, Pittsfield Works, Lynn River Works, Fort Wayne Works, Bloomfield Works, Erie Works, the Lamp, Chemical and Appliance and Merchandise Departments, Apparatus (General Office), Tube Division (Schenectady), General Office Administrative, the New England, Central and Pacific districts, G-E X-Ray Corp., Maqua Co., G-E Supply Corp., International General Electric, Locke, Inc., and Tumbull Electric Manufacturing Company.

Of the total pensioners benefiting under the plan, 118 were men and the remaining eight were women.

The G-E Pensioners Hospitalization Plan provides, wholly without cost to the pensioner, $5 for each day he is a bed patient in a hospital and $25 for special services. The $25 for special services is applicable to each separate admission to a hospital, even though the pensioner may not be a bed patient.

In his announcement of establishment of the plan last Fall, President Wilson said benefits for any one pensioner are limited to a maximum of $250 during the pensioner's lifetime. At the same time, he also pointed out that the plan "is intended to be temporary, instituted with the understanding that attempts will be made to have Mutual Benefit associations and insurance companies establish arrangements to provide pensioned employees with hospitalization insurance."

Careful records are being compiled by the Company to determine costs covering this older age group, lack of such data having stalled development of plans in the past.

Approximately 7,500 on pension and eligible for benefits were notified of the plan's adoption last Fall.

Miller Appointed

(Continued from page 1)

1931 he transferred to the Works Laboratory in the electrical section, and in 1944 became Section Engineer. Since 1945 he has been Assistant Works Laboratory Engineer.

Mr. Summers is a member of the Exchange Club, has held all offices in the local chapter of the A.I.E.E., was secretary of the Fort Wayne Engineers' Club, and is a member of the G-E Squares Club. He has delved into the study of atomic engineering, having given nearly 65 lectures with the showing of a film, "Operation Crossroads." He also has prepared and presented numerous papers on subjects pertaining to mathematics and non-linear circuits at A.I.E.E. conventions.

He lives on the Washington road, is married, and has three children.

Mr. Miller and Mr. Summers have sponsored and were the creators of the "House of Wonders," which has been presented to many civic, social, church and school groups throughout the area. The show is similar to the Company's "House of Magic."

WHAT'S NEW IN PLANTS & LABS

A G-E (KXI) transformer and a G-E tube (CRT 1-2) provide the source of the x-rays used with a new x-ray movie apparatus that is believed to hold great promise for clinical use in many fields, as well as for medical education, according to the Department of Radiology of the University of Rochester School of Medicine and Dentistry. Up to now cumbersome equipment, slow lens and screen and unsatisfactory film emulsion have handicapped effectiveness of x-ray movies. The new apparatus limits the amount of x-ray dosage by diaphragming the x-ray beam to cover the part of the patient that is under study and synchronizing the x-ray output with the camera movement so that the patient receives radiation only when the film is being exposed. Among the several advantages of the new apparatus to medical science is that it affords a permanent record of rapidly moving body activities, such as swallowing, joint motion as in arthritis, the movement of an x-ray opaque contrast medium through the arteries and veins, heart motion, and many other uses.

An X-ray device designed to measure the tetraethyl lead content of gasoline now is being used to control the amount of unpleasant odor introduced into natural gas to protect housewives and industrial workers. The odor in the gas makes it possible for nearby persons to notice any leak in a natural gas line before it becomes dangerous. The smell comes from sulphur compounds known chemically as mercaptans, which scientists have found are the chief contributor to the smell from an irate skunk. The development is made possible through the use of an "X-ray photometer" devised by G-E engineers several years ago.

SCHENECTADY — A high-intensity runway lighting system now being installed on the runway at the Albany Municipal Airport will make the local airport one of the safest fields in the country. The new 20-kilowatt constant current system, including brightness control, will make possible landings in weather conditions as severe as one-eighth mile visibility and ceiling zero, according to G-E engineers who designed the control system. The new elevated lights (making obsolete former lighting flush with the ground) are effective even under severe snow conditions. Improvements in lighting are expected to eliminate at least 90 per cent of all bad-weather flight cancellations.

Red Cross Drive

(Continued from page 1)

Robert J. Duras is chairman of the Fractional Horsepower Motor divisions, which have a goal of $4,900:

DIVISION 10

H. J. Murphy, leading solicitor; F. B. Thomas, and W. C. Kruekeberg.

DIVISION 12

Arnold Bowers, leading solicitor; Dorothy Lisius, Pat Holmes, Marilyn Miller, and Virginia Stoner.

DIVISION 13

R. O. Dunfee leading solicitor; J. Turley, V. Davidson, A. Ufheil, M. Bledsoe, R. Merchant, E. Fischer, E. Roembke, R. Shinn, F. Bunnell, L. Wolf, H. Bubb, I. Romey, R. Fuller, P. Hille, A. Lindenberg, F. Erickson, C. Winans, R. Shirey, N. Bell, and L. Rickert.

DIVISION 16

Herb Koch, leading solicitor; Marvelene Butts, Dorothy Askren, Florence Knight, Joan Seery, Wilhelmina Beeth, Leota Hollis, Madaline Briggs, Jessie Rogers, Irene Blank, Lorene Buuck, Henry Pliett, Harry Rinker, Herb Lemmel, Jay Ripps, Herb Hailey, Lee Shanabarger, Eileen Foor, Melvin Cools, Don Myers, and Ross Domer.

DIVISION 17

L. A. Shattuck, leading solicitor; Warren Hawley, Roy Orr, Maxine Luker, Olka Johnson, Ruby Stoops, Martha Keokuk, Dorothy Richards, Anna Cook, Marion Ballinger, Robert Boone, Harry Slater, Wilfred Yant, Louise Sinn, Glenn Miller, Dorothy Heinzelmann, Thelma Stapleton, Mildred Snyder, Helen Orr, Betty Boidt, Virgil France, Dorothy Hart, Denver Coolman, and Harold Walters.

DIVISION 19 & 20

V. Hartman, leading solicitor; C. Gebhart, P. Waters, T. Kundred, E. Riley, C. Combs, C. Henricks, H. Tons, J. Miles, D. Mosier, C. Hosier, E. Lallak, C. Fryer, D. Sanith, B. Neuman, L. Pion, V. Brumbaugh, W. Henricks, L. Hesse, H. Wengert, R. Stanger, C. Hazen, W. Davis, and P. Jeffries.

DIVISION 33

E. G. Stock, leading solicitor; B. E. Jacobs, L. R. Baker, R. J. Noll, E. D. Stauffer, W. Richardson, and C. B. Crankshaw.

DIVISION 83

Jane Winebrenner, leading solicitor; Judy Clark, Lydia Swift, and Lela Omspach.

DIVISION 1

Everett Lindeman, leading solicitor; Russel Rose, George Allen, William Tennyson, Phillip Zimmerman, William Dinkel, Hilda Seiler, Margaret Hilgeman, Gilbert Walker, Dillon Kable, Lorinda Beyerlein, Ervin Zollinger, Richard Clancy, John Pumphery, Lester Hubbard, William Schultz, Ann Immel, and Robert Garrison.

DIVISION 14

Carl W. Reiter, leading solicitor; Virginia Plummer, Ivan Osterman, Mary Louise Smiley, Russel Johnson, Mearl Dukes, Howard Poorman, Catherine Auker, Anna Johnson, Carl Hemsoth, L. Green, Lottie McFarland, George Angle, John Wilson, Robert Crosley, Theodore Kitchen, Virgil Hammons, and August Weisenburger.

FHP COMMERCIAL

C. J. Monroe is the leading solicitor.

DIVISION 15

C. H. Curtis, leading solicitor; Ray Dotzer, Fred Schaaf, Roy Berdieman, Elaine Sutter, Sam Buckley, Mary Stewart, Virginia Gebbart, Paul Kennerk, Harry Anderson, Ray Lepper, Joan Hartwig, Cecelia Horstman, Herbert Cook, Charlotte Clover, Herbert Landstoffer, Lloyd Covault, Joan Meyer, Harold Struver, and Willard Ropa.

Ray Soughan is chairman of the Specialty Transformer and Ballast divisions, which have a quota of $1,900:

DIVISION 91

E. Bobay, leading solicitor; J. Hughes, P. Noffze, H. Habig, G. Schafer, J. McMaken, C. Tuttle, L. Haller, and Margaret Taylor.

DIVISION 93

M. Reynolds, leading solicitor; M. Reed, G. Kummerant, W. Nickerson, H. Scott, M. Hasiup, C. Schwartz, E. Armstrong, D. Hirschhiei, Pat Lahr, and R. McKinney.

DIVISION 94

P. Gressley, leading solicitor; P. Borkenstein, N. Spencer, R. James, R. Horstman, R. Onstatt, M. Ely, M. Fawcett, and T. Lauterberg.

DIVISION 95

W. Mills, leading solicitor; A. Miller, G. Bolyard, H. Bennett, E. Miller, R. Wibel, W. Gordon, and Eva Hickman.

OFFICE

Commercial—Ann Rastetter is the leading solicitor.

Financial—R. L. Soughan, leading solicitor; V. O'Neill, and Bob Williams.

Manufarturing General—D. Bartholomew, leading solicitor; V. Winegart, and E. Parkison.

Engineering and Drafting—G. Wagner, leading solicitor; W. Miller, R. Henry, B. Dolson, and G. Doolittle.

D. M. Myers is chairman of the Motor and Generator Divisions, which have a goal of $1,100:

Joe Burton, Chalmer Steele, Stanley Amstutz, and C. Ariand Werker are the leading solicitors. The other solicitors include J. Formanek, Jack Newton, Ray Weese, Fred McIntyre, Maurice Cook, Al Nahrwold, Ray Prince, Leo Christle, Orville Gambie, John Butler, Jr., John Hoelle, Al Adams, Joe Dahman, Paul Walker, Jake Mattes, Francis McBride, W. Wickliffe, and E. Kahlenbeck.

R. W. Kent is chairman of the Works Service and Contrihuting divisions, which have a combined quota of $3,200:

DIVISION 40

F. R. Somers, leading solicitor; J. Bendel, W. Morebous, D. Lawson, C. McClure, H. Stirlen, H. Steinbacher, J. Birchmeyer, C. Campbell, J. Storer, L. Dove, C. Scheiman, A. Lantz, C. Dunifon, L. Woodward, R. Pierson, H. Dewart, T. Raypole, D. Mumma, H. Tucker, A. Beck, E. Ream, J. Niedermeyer, R. Kreigh, R. Wilkinson, and V. Kline.

Power House—C. Gelier, J. Banks, and C. Blair.

Plant Protection—G. Crouse, H. Gooley, C. Bartaway, and J. Gutermuth.

Plant Engineering—A. Frank and F. Bendel.

General Service at Tayior St.—E. Reed, A. Pranger, W. Chaney, C. Banks, and H. Markley.

PRODUCTION

Frank Goetz and George Welker, leading solicitors; Carol Levy, Phyllis Grace, Paul Kiege, Carl Oberwitte, Joe Hambrock, William Kline, Robert Whonsetier, Frank Yarman, Douglas Blessing, George Jones, Fred DeVillbiss, and Ward Staley.

GENERAL TOOL

H. C. Foreman, leading solicitor; H. Buell, W. Fruechtenict, R. Zimmerman, J. Dennis, J. Schemehorn, A. Webur, C. Weideman, H. Nagel, A. Weigand, G. Houser, R. Trueiove, E. Sauerwein, P. Brinkroeger, P. Richter, R. Schafer, J. McFeeley, P. Bauman, F. Druhot, and L. Welker.

The leading solicitors in the otber sections include:

Technical Service—Herman Kappel and Patricia Olinger.

Works Laboratory—Martha Wesner.

Personnel—Iris Knapp.

Employment—Helen Rose.

Dispensary—Minnie Fryback.

G-E Club—Hazel O'Brien.

Tayior St. Cafeteria—Charles Sawyer.

Broadway Cafeteria—Clara Linderman.

Financial—Ruth Fritz.

Wire and Insulation—Jim Gargett.

Wage Rate Produrt Quality—Joan Miller.

Apprentice Schooi—Richard Sieboid.

Administration—Vivian Bond.

WINTER ST. PLANT

W. C. Guelzo is the campaign chairman of the Winter St. plant, which has a goal of $900:

The leading solicitors include Anthony Hancher and Rudoiph Brown, Bldg. 8; W. C. Bock, Engineering; Art Slane, Fairfield, and Joe Carrier, John Fletter, Don Traster, and Art Bienz, Factory.

Tuttle Retires After 42 Years

V. J. Tuttle retired Tuesday after 42 years of service. Last Friday he was honored with a luncheon by his former associates from the Motor and Generator Engineering Division. Then Monday he again was given a luncheon by a group of engineers from the Works Service and Product Divisions. Seated in the above picture, which was taken at the Monday luncheon, are J. J. Clarkson, W. B. Kruse, Mr. Tuttle, P. S. Stough, and R. G. Irish from Schenectady. Standing are G. R. Lindemuth, L. A. March, M. L. Schmidt, C. W. Kronmiller, C. A. Ellis, C. W. Leegard of Winter St., W. Howard Miller and W. H. Sunier.

"Many a man wouldn't mind his wife having the last word if she wouldn't go on repeating it."

The Personnel Division is very sorry to lose Val Miller to the Office Methods Division in Bldg. 18-4. However, we do hope you enjoy your work along that line, Mr. Miller, and give you our very best wishes. . . . Also stepping out of the picture was Ruth Dingman, T. E., who has been on assignment in our division for a few weeks. She has returned to Schenectady for future assignment. It was fun knowing you, Ruth. . . . Ed Witte always seems to know the right people at the right time. Not mentioning names, of course, an acquaintance came in real handy last week when Ed received a parking ticket. As he decided later, though, Ed may as well have paid the fee, because said acquaintance accepted a token of appreciation at Tooie's. That is, he has accepted if Ed will keep his word and take the fellow out. . . . From all reports, G-E was well represented at the Sports Show Sunday afternoon. . . . The Elex Club wishes to announce that they have received a new shipment of Everyday Cards and that wonderful jello they sell. . . . Our globe-trotter has accomplished his aim for the week. This time it's Louisville, Ky., for Himself Smith. He will preside over the National Safety Council, Power Press Section. Mammoth Cave doesn't open for a few weeks, for your information, Herschel. You should have tried New Orleans with the Mardi Gras about now, hmmm? . . . With a very serious thought, we are approaching another year for doing our part to our neighbors and friends, and even relatives, perhaps, by our contributions to the Red Cross. When your solicitor gives you your opportunity, he is not asking for your "hard earned" money for charity, hut is asking if you'd like to help an unfortunate family or group of families get back on their feet so they can help themselves and their community. If you helieve in this, you'll huy your share in the Red Cross, gladly.

If you want information on the "latest" equipment to use for washing windows at home, just ask "Oschy" Ochsenrider. . . . Mart Reinking really enjoyed his visit with Cliff Pond last week-end. No wonder—Cliff paid all of the expenses, plus—. . . . Joe Weher recently had a slight mishap with his new Olds. Joe, you'd hetter keep your mind on your driving. . . . One fellow who really hates to see the basketball season come to a close is Charlie Omlor. He wonders what excuse he is going to use to get out with the gang. . . . The latest news from Russ Weldy is encouraging. Russ has shown some recent improvement at the Vet Hospital in Indianapolis. . . . Doris Shaffer, of Bldg. 2, is on the sick list. Hurry, hack Doris, we miss you. . . . The condition of Eileen Reed, who has been seriously ill, is reported as somewhat improved, but still serious. We thank those employees who so generously contributed hlood to help Eileen through a recent crisis. . . . We are happy to see Lydia Lehrman hack at work after a few days of illness. . . . Everyone was very pleased to see Bob Houser the other day when he stopped in at the office to say "hello" to his many friends. . . . As you all know, the main topic of discussion at the present time is—you guessed it—basketball. Some of the remarks you hear are—"Now, how did he get a ticket?" "Who do you think is going to win this year?" "Do you know of anyone who has an extra ticket for the game?" "Are you going to the game?" . . . George Buckley is very proud of the basketball announcer, Dick Buckley, who is giving us a play by play description of the game over WANE, since he is none other than George's son. . . . We understand Joan Liechty really took quite a "razzing" about her team. . . . It seems Lew Gossman was very unhappy about his favorite team. Cheer up, Lew, better days are coming. . . . Get a load of this, and we understand it costs you 50 cents a look. Lohnas McIntosh is the proud owner of a Packard. That's right, we said a Packard.

Labor Legislation

(Continued from page 1)

Electric considers the non-Communist affidavit clause in the present law influential in stirring union membership to combat Communist domination in their unions.

Senator Taft, Committee member and co-author of the present law, asked for instances where the non-Communist provision had any specific effect.

In answer, Mr. Boulware related the Atomic Energy Commission's action last Fall in directing General Electric not to recognize the United Electrical, Radio and Machine Workers of America, CIO (UE) as the bargaining representative of any persons on atomic energy work at the Knolls Atomic Power Lahoratory, Schenectady, N. Y.

Cites Some Progress

The directives of the Atomic Energy Commission were made part of the records of the hearings. In response to further questioning, Mr. Boulware replied:

"We believe we see, at various places, some examples of members in unions having been aided—by the non-Communist affidavit requirement—in making progress towards hetter local and top leadership in their unions.

"Certainly, the very wonder by union members at some officials' refusal to sign has led to a great deal of new local consideration of the national problem. In a great many cases they have elected new officers where the determining factor seemed to be the belief of the membership that it would be getting new leadership with less Communist taint or certainly with less public suspicion of that taint.

"I strongly urge that the non-Communist affidavit requirement be extended to all union officials from top officers to stewards and, in order to prevent circumvention, to all paid representatives of the unions—and likewise to all corporate officials and company representatives who meet them in hargaining. The employer should he expressly excused from dealing with the representatives of a union which has not met these non-Communist affidavit requirements, as well as those about filing of financial and other information."

Offers Press Reports

Queried as to instances of internal union struggles surrounding the Communist question, Mr. Boulware referred to published reports in the press of anti-Communist action of union members in several cities. He presented to the Committee photostatic copies of newspaper stories on revolts of locals against alleged Communist domination in such cities as Pittsburgh, Lima, Ohio, and Fairmont, West Virginia. In addition, he referred to other internal union struggles over the Communist question in Schenectady, Fort Wayne, Pittsfield, and Dayton.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Nearly every person in Indiana was either seeing or listening to the basketball games over the week-end. It was quite a surprise when Central came through winning the sectionals. There were many people who were made glad and some sad such as Bill Gepfert who has a small lake in his field from his tears. I also understand that you can't get near Monroeville unless you have a row boat. Well, so much for the ball game this week. . . . It seems the office force at the west end of Bldg. 26-1 were glad to see Roe Ormiston leave only because now they have more room to hang their coats. . . . Bill Holloway seems to be having a little bad luck lately, as he lost another one of his wild bets on the North and South game. . . . Adam L. Ragon was disappointed because he did not get his name in the paper with the rest of the fellows last week. I am sorry, but for once Ragon was speechless. It just didn't seem like he was there. I also missed Wilber Shaffer, who was there with his wife and was very quiet. . . . Al Campton is well on his way to the nut house as he is now cutting out paper dolls. . . . Everyone would like to know what McConnehey is doing with all the coffee pots he is buying, but he won't talk. . . . I see Sam Macy left the family home again last Friday. He must still be blaming them for his bad bowling. . . . One of our boys in the punch press section has been taking a few hard knocks on his head recently, so the rest of the gang are going to pass the hat and buy this fine gentleman a football helmet to wear while he works. We're speaking, of course, of John Laymon, Sr., and figure that this rates publicity because at least John has been using his head for something. . . . Ted Mullen has had his desk located in a queer spot in Bldg. 26-1. We're just wondering why he was evicted from the big office. Was it because he didn't pay his rent or was it because he couldn't get along with our office girls? . . . Caryl O. Tuttle, more commonly known as King Tut, bought several one dozen egg cartons because he can only count to 10. He knows when the box is full he has a dozen, and doesn't want to give any extra ones away. . . . We're just wondering if Bob Bunyan is still holding down the job as custodian downtown. It was reported a couple of weeks ago that he was seen in one of our local night spots mopping up the floor with his top coat. . . . Someone must have robbed the Uniondale stage coach a short time ago, and no doubt there was some mail destroyed. At least 25 valentines that were on their way to Gerald Crum came up missing. . . . Robert "Minnie" Mennewisch certainly had a beautiful attendance record for the month of February. That is until one day last week when he awoke at home only to find an over-heated furnace. We can't quite figure out which is the best excuse, an overheated furnace or water in the basement. . . . On behalf of myself and Div. 91 I would like to extend our deepest sympathy to Arnold Creed upon the death of his father.

Honored At Time Of Retirement

Lillian Brandenberry recently left FHP Motor Division 17 on retirement. Her co-workers presented her with several going-away gifts on her last day. Attending the presentation are, left to right: Dorothy Weiler, B. B. Gausepohl, Laura Adams, Francis Walker, Marguerite Stahl, Alice George, Geraldine Fry, Lillian Brandenberry, Elinor Laux, Bernadine Warner, Selma Voigt, Clyde Helms, Ralph Hare and Ruby Stoops.

Who said spring is coming? From the look of the snow Monday it could be winter is coming. Oh well, the calendar says only 15 days 'till spring. Let's hope it is right. . . . We send all our speedy recovery wishes to Bob Coen and hope by the time this is in print he will be back with us. . . . No one could have caused any more "hunger pains" than Marian did with her cook books. Those pictures didn't help a bit. . . . "Speed" Seymour finally adjusted all the gadgets on his car carefully, and with the help of a strong tail wind, reached a speed of 50 miles an hour. This was all accomplished at a very inopportune time as the law was watching him! Result was "Speed" said, "Good morning, Judge," and hoped for the best. . . .

Cy Seymour has a Ford
He claims it's very fast
But if the Chevy had not pushed it
He would have come in last
(He came in last anyway.)

Robert Short brought his students through the section one evening last week to show them the mysteries of testing. He is an instructor in the Apprentice School in Practical Electricity. The men on first shift were disappointed that they, too, didn't get to see the tour. . . . Last Saturday five ice fishermen from our floor started out in quest of the elusive bluegill. They finally came to a lake where they had to use a rowboat to get out where the ice was safe! The row boat was in two sections and both sections leaked. Using their spud bars for oars, they all finally reached safe ice. Washington crossing the Delaware would have looked like a boy scout next to these fishermen. Tony "Hotfoot" Miller, having previously broken all his own equipment, knocked Don Kruse's lantern over and broke both mantels so he couldn't see when he got a bite. When they were ready to leave the lake long after midnight "Hotfoot" decided he didn't care for another boat ride and decided to walk off at another place. The ice broke and "Hotfoot" got a cold foot causing him to stay in bed two days. Don got home about 3 o'clock, silently entered the house, took the fish barometer (which showed them to be biting good) off the wall and threw it out the window. Then he went out to the garage, chased the dog out, laid down and went to sleep! . . . Hoosier Hysteria (basketball, to you) is really in full swing now and until the final gun on the last State game, this madness will claim the state. By the way, who is your favorite? . . . We wish to extend to Betty Rygowski our deep sympathy in the death of her father-in-law. . . . Ruth Baker looked real chipper Monday. Glad to see you back. Be sure to stay well now.

They'll Do It Every Time. Monday eve there was a great flurry of excitement around office 4, as the word spread that the painters were paying a visit that night. The last 15 minutes of the day—which is usually spent in putting on hats and coats—was spent in cleaning off everyone's desk in anticipation of the great event. As the last bus pulled away from the Broadway entrance, each desk in the office was as bare as the small of Burlesque Queen's back. And so passed the night. Tuesday morning, our little hearts pounding with expectation, we came to work. Were all the walls a new hue? Yep—all the walls of P. M. Staehle's inner office! . . . Letter to Sam Jefferies. Dear Sam: With your exodus, our reading audience has dropped 11 per cent during the past three weeks. That's bad, but, even worse is the fact that with your leaving, both Avanel and Ann have lost 100 per cent of their chances of getting a date in the office! What a blow that must be— particularly to Avanel. Who can she chase now? Seriously, Sam, you've been a grand sport, and we'll miss you. The best of luck in your new assignment.

Those cigars Ray O'Brien smokes are so strong they could stand by themselves. . . . Last Thursday was Alice Claymiller's birthday. Thanks for the lovely cake. . . . We also wish Eleanor Whitehouse, Thelma Weps and Ray Soest happy birthdays. . . . Everything was a hurry, scurry for Erma Huhn last Tuesday after work. She took all the short cuts to the post office to pay her taxes. She rang for the elevator, but no response. A gentleman politely told her it was closed for George Washington's birthday. Better luck next time. . . . Olive Adams had several of her choppers pulled over the week-end. Now she won't be able to snap up any more bargains. It takes more than choppers. . . . They say Henry Wiegmann had to butcher two extra hogs this year so he could have enough pig tails and liver to go around. . . . Ray Snyder says the song, "Am I Blue," will be first on the hit parade next week. . . . The people out in the north end of town think Gilbert Walker makes the nicest paper boy. He gets tips from the customers all during the year. He is now thinking of extending his route west of town. . . . Lorinda Beyerlein's trick umbrella must have lost its magic spell by the looks of it last week. She had to finish her trip home in the rain. . . . Say, Elmer, how about your help in test? Does it make your work go faster that you have more help and better? . . . Ed Boedeker would a stick help keep your eyes open? How about a little more shut-eye? . . . Anyone who would like to book a good basketball team should see Ponda in Bldg. 4-3 test. We hear he is going to have a real team. How about it, Pondo? Let us in on it. . . . Emily Merman has her cottage engaged for her vacation. Don't be surprised if she comes in and says she has her worm supply also. . . . One look, left hand, third finger, you will see a lovely diamond on Wilma Krebs. Congratulations and good luck.

Now that the Sectional Tournament is over and those of us who fell by the wayside with our favorites can sit back and relax or try to pick a winner from the survivors. . . . There are two ex-Coesse players in our group, Ralph Solt and Bob Maggart, who were rightfully proud of the showing their home team made this year. Thanks too for the congratulations to Don Weinman of the New Haven Bulldags, who many of you thought was my son, Billy. I thought too, that the commentator's pronuncitation sounded like "Winans," but I'll see that Don gets your congratulations. . . . On the last ice fishing trip by the boys from our group, Bob Repine sat on the shore for an hour letting Bill Johnson and Louie Watt get a good start (or was it because you were afraid of the tbin ice, Bob?) Anyway Bob was trying for his tenth bass when the boys checked to see how he was doing and then told him the bag limit had been changed to six about 20 years ago. . . . Friday, Bob was telling the boys about someone going up north in Michigan where there was still ice. When someone said, "Yes, if you go up to the Klondike you would find ice yet," and Bob said, "Tbat's it. That's where they were going." . . . Gurney Lindley is now in another sales game. This time it is clothes pins. . . . Paul Boedeker is very quiet about his ability as a bowler since Mrs. B. placed twice in the city tournament, and became so excited she not only brought home the bacon but a bowling ball that belonged to someone else. . . . Ray Bowers and Paul Armstrong will now have to furnish a new trophy for the euchre games as they now have permanent possession of the burlap bags, by virtue of three successive skunks. Armstrong also came out second best with Richard Nix in putting permanent waves in his car fender last week. . . . Two weeks ago Chief Butch Vegalues called all his boys in blue together and instructed them to see that every employee was given a copy of the WORKS NEWS with a reminder to be sure to look at the pictures on page seven (two of them were Butch). This was the reason for the courteous news service Friday. Congratulations, Butch, that was a job well done. . . . Ted Warner is again back on the job after an extended leave. Glad to see you back, Ted. . . . George Lambroff has a very difficult job of keeping his mind on his work from 12:15 to 12:45 as a certain person goes to lunch at that time. Remember, George, faint beart never won fair lady. . . . Thanks too for the pat on the back or the bouquet of roses from the anonymous reader.

Most conventions seem to be held so that they can set the date for the next convention.

G-E Displays Products At Exhibits In Chicago

Pictured above is the G-E display booth at the Ninth International Heating and Ventilating Exposition in Chicago. In the foreground is an operating display of ignition transformers built by the Specialty Transformer and Ballasts divisions in Bldg. 26-2. These units provide 10,000 volts of power to ignite the fuel oil in an oil burner. This display consists of a rotating turntable upon which the new SM transformers are resting, and a monogram encased in plexiglas, to which attention is drawn by a stream of electric arcs at each end of the monogram. Directly behind this display is that of the Fractional Horsepower Motors divisions, which featured a complete line of motors for heating and ventilating applications. Integral horsepower motors stressed the Tri-Clad story and featured a cutaway gear motor and the totally enclosed, fan-cooled plastic model in operation. Control items included the new CR7006 and 7008 starters, push buttons and small manual starters. Motors for coal stokers, oil burners, fans and blowers, and air circulators are shown in the upper, right-hand corner. The bulletin-bar, left foreground, made it convenient for customers to obtain informational bulletins on products displayed.

Fort Wayne General Electric was represented by a display of products at the Ninth International Heating and Ventilating Exposition held recently at the International Amphitheater in Chicago.

The show, under the auspices of the American Society of Heating and Ventilating Engineers, was held in conjunction with their fifty-fifth annual meeting. Technical sessions were held at the Hotel Stevens throughout the show period, as well as over the week-end preceding the opening of the exposition.

More than 300 exhibitors participated in this show, displaying products ranging from fire brick through oil burners and air conditioners, to large stationary boilers. The show was attended by more than 25,000 manufacturers, distributors, dealers, engineers and architects. The exposition was closed to the general public.

Personnel of the Fractional Horsepower Motor Sales division, at the exhibit to discuss application problems presented by the customers, were P. H. Breimeier, M. W. Edgar, H. E. Priwer, C. J. Monroe, R. A. Thompson, J. F. Stenberg and W. F. Brunner. J. P. Coughlin, Frank Ondrovik and H. A. Dolson represented the Specialty Transformer and Ballast divisions.

Tanks To You From Plating-Two

By Marie Lantz

Some of our platers are now known as the "eager beavers." Last Saturday, Bill Walt organized a group of our men to undertake a Boy Scout project at Camp Big Island, Rome City. Among those who harkened to his call of "Hi, ho, timber" were Cliff Robinson, Jim Daley, Harry Connor, Fred Reed and Fred Zimmerman. This group made a clearing where the Boy Scouts plan to have a new building erected for next summer. While doing their good deed our platers became hardened to the adversities of Mother Nature. Since the camp is located on an island, the men had to travel per pedal digits across the partially frozen lake. As Harry Connor says, "George Washington couldn't have had a harder time crossing the Delaware." One time, he said he sank through thin ice to his knees. However, Bill Walt, the biggest Scout of all, managed to keep dry. When the day's work was done and they were ready to return to their cars on the main land, the men discovered that Mother Nature worked as hard as they had. The rise in temperature made walking across the ice impossible. The long ride back involved a seven mile trek along the rugged shore line, through roads and marshes, and up and down hilly terrain. Weary and worn, the Eager Beavers reached their cars, only to find that Jim Daley's car was stuck in the mud. Now the men find their deed well worth reminiscing. All returned with additional aches and pains; Fred acquired the name of "Abraham Zimmerman" as a result of his log splitting ability. . . . About four months ago Fred and Harry Connor became grandfathers to Renna Jo Connor, daughter of Jacob and Jo Connor Zimmerman. Now Harry boasts of having acquired more than Fred; on Wednesday, Feb. 23, Michael McCrae Connor was born to the Frank Connors of New York City. . . . We have another plater who spends his spare time along the rugged trail. As a hobby Clarence Lesh makes miniature covered wagons and stage coaches. . . . Wheee! we hope we'll hear the Tigers roar all the way down to Muncie and Indianapolis. Congratulations, Central. . . . Scoop, our biggest Boy Scout, was seen weighing himself in Bldg. 17-1. We wonder if Bill couldn't take it?

A catastrophe is when the ladies' bridge club meets with nobody absent to be talked about.

SLEUTHING in 4-6

by JOAN POOS

It seems that last week Judy Clark's well-fed "over-the-shoulder bag" wandered aimlessly into the Development Section to see Dr. A. L. Ulmer. Dr. Ulmer, as all good surgeons, performed a complete physical examination and requested that (it) lose weight before he could perform a major operation which would "fix it up like new." With the aid of Nurse T. L. Neds and a nearby drawer the feat was accomplished. I know that you will be happy to hear that (it) has recovered fully and is on the job again. . . . NOTICE: A group of men composed of Mert Edgar playing the "Devil's Fiddle"; Joe Zaza, the accordion; Bob Sharrow, the trumpet; and Ted Ross, the piano, are available for any occasion. They are better known as "The Lease Breakers" and play the sweetest music this side of Spike Jones. For reference you may ask any of the Squares wives who attended the potluck of a week or so ago. For a very vivid description of the Devil's Fiddle (in case you are wondering), consult Bob Johnson, Extension 785. . . . Hugh Folsom left Bldg. 4-6 Friday to continue his test at Taylor Street. . . . There has been considerable speculation concerning what effect enormous amounts of candy will have on the human system. For scientific data on this subject it is suggested that you consult Gladys Koelinger. . . . Note to all unfortunate males: Another familiar and very beautiful face which I know that you will be sorry to see missing is that of Helen Meador. Helen is leaving today. Goodbye and good luck, Helen! Watch those "smoes" in Kokomo! . . . In case you noticed the corsage of four white carnations which Lee Swift was sporting last Friday. No, it wasn't her birthday. No, she isn't leaving. No, she wasn't in a wedding party. Yes, she attended the Shrine formal dance Thursday night. . . . Any questions concerning the lighting problems of the Development Section may be referred to our lighting expert, Ernie Spaulding. . . . Did you note the long faces of the North Side fans after the first round of games? And then there was J. Hilbricker who thought definitely that Monroeville would win. As to bets, Abbie Hartman owes Al one hour of back scratching, as a result of a misleading venture. . . . According to reports from our prize ice fisherwoman, Delores Giltz, fishing wasn't "too hot" last week-end—no ice. . . . Welcome back to Ida Davis, FHP Motor Sales Ediphone Room. Ida had been at Taylor Street. . . . Jim Kutz, formerly of Bldg. 4-6 and now at our Syracuse office, paid us a welcome visit last week. . . . If you would like to know just what the South looks like at this time of year, contact Gert Kasimier, Payroll Section, who has just returned from a week of basking in that Florida sunshine we pleasant peasants have heard so much about. . . . Everyone in Payroll will look forward to Juanita Schrecongost's birthday again next year. Juanita celebrated by passing around delicious homemade fudge last week on her birthday. . . . A sad farewell to Betty Cutright, Payroll, and to Eileen Jacobus, A. C. Section, who are both leaving us to become full-time housewives. Both were honored at luncheons and presented remembrance gifts. We'll miss you both and envy your being able to rise at your leisure. . . . Always thought that Friday was cleaning day but I noted that Monday, Bertha McCaque was cleaning the wall. I guess it's a woman's prerogative to change her mind though. . . . The D. C. Section is hoping for Phyllis Hines' early return. She is fighting a "mean" cold at home. . . . Welcome to Richard Koop, newcomer in the DC Section. Hope you like it here with us, Dick! . . . New short haircuts seem to be becoming the vogue in Bldg. 4-6. . . . Whenever you hear that periodic rhythmic ticking like the sound of a moldy old termite eating Grandfather's clock, turn your eyes toward Bill Pringle and you will see him rocking to and fro, deep in thought or in conversation. Why don't you call the repair man, Bill? . . . We're glad to see Ruth Ann Gumpper back after a week's absence all because of a wisdom tooth. You receive a nice shining new tooth to enable you to masticate more and larger pieces of steak more fully and also to denote that you are a big girl now, and what happens—a pain in the neck and a dental bill. Everything you get you have to pay for, huh, Ruth Ann? . . . Orchids and a can of "(n)ever smell sardines" (through the courtesy of Jackie Bowers, who "cuts their noses off") to Jerry Duryee, our fireman in the Dev. Section, who is always on the alert. . . . A word to unknowing females (attention Lydia)—one blast of the fire siren means cross your fingers and hope it stops. Two blasts means an interrupted afternoon nap, walk, do not run to your assigned exit. . . . We wonder if Glen Stapleton told his wife of his repeated good luck (every other week for five weeks). Pretty close to $12, wasn't it, Glen? That would just about buy the little lady a new pair of shoes or a handbag. Some people have all the luck. . . . Tie of the week: a maroon bow tie worn by W. H. Weikart of Renewal Parts Sales. On him it looked good! . . . For a "sure cure" remedy for tired and swollen feet, girls, consult our Bldg. 4-6 podiatrist, Betty Stahl. . . . Congratulations to Ray Jones who was a master of ceremonies at the A. I. E. E. dinner last Friday night. He has a very good collection of after-dinner jokes 'tis said. . . . Corniest poem of the week:

Many people have asked how to relax
And ended up with data and facts
A new way which might work, maybe
Is that of a man, in AC, Robt. Kirby
Who wriggles his ears with a jerk
When he takes a breathing spell from work.

Famous last words of Forrest Carlson as he toils, broom in hand, mop under arm, apron intact, perspiration on his brow—"A woman's work is never done."

Hartman Named General Foreman In New Division

C. A. Hartman

C. A. Hartman has been named General Foreman of the new Fractional Horsepower Motor Division 18, now located at Taylor St. The division will later be in Bldg. 6-2.

An apprentice graduate, Mr. Hartman first came to General Electric in 1907. After leaving the apprentice school, he was assigned to the tool room until 1918. Since that time he has held the positions of Assistant Foreman, Foreman, and General Foreman in the Fractional Horsepower Motor Divisions. Mr. Hartman then transferred to the DeKalb, Ill., plant in 1946 as a General Foreman. He returned to Fort Wayne the latter part of last December.

The Hartmans have two children: William, who works in Bldg. 8-2, and a daughter. He resides at the Fulton Apartments.

News from 26-3

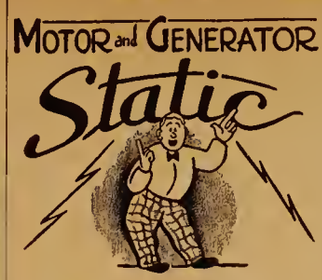
by VELMA JOHNSON

If anyone hears a loud laugh, it isn't a hyena. It's just Lola Brunner who came back into the winding section with us. . . . Say, Dale Stuckey, how did your apron get caught up on a post? . . . Lonnie Rockstroh can really swing out a mean boogie-woogie. Or should I say someone can really swing Lonnie into a boogie-woogie. . . . Ernie Clark, when are you going to invite us over for a chicken dinner? . . . Just in case you forget your keys sometime and find yourself locked out, just see Glenn Hobbs. He will tell you just how you can get in. . . . We thought duck season ended a couple of months ago, but I guess not, as every day about this same time and the same place at the west end of the building, we hear them quacking. . . . We congratulate Mr. and Mrs. Harry Rollins who were married Feb. 19. The Sample Shop gave a potluck lunch for the bride and groom Tuesday, March 1. . . . We wonder why Wayne Winters was sitting on the floor the other day. Yes, it could have been because he was busy talking and missed the chair. . . . In case any of you want any recipes just call up Brownie, especially if it has anything to do with cooking beans. . . . We would like to know if Paul Sturm would sing a song for the Sample Shop one of these Saturdays when he is on the radio. We would like to hear just any kind of song, Paul.

Mother and daughter have more trouble keeping their figures straight than the fellow working on his income tax report.

Joan Poos Is Co-Editor Of 'Sleuthing In 4-6'

Joan Poos



This week we introduce Joan Poos, Bldg. 4-2, who is Co-Editor of "Sleuthing in Bldg. 4-6" with Teddy Neds. A 1947 graduate of Purdue University with a B.S. degree, Joan has been working for General Electric since May, 1948. She works in the Developmental Division as an engineer's assistant.

Her hobby is making a scrapbook made up of a collection of poetry and odd sayings. Along the sports line, Joan likes swimming and tennis. She also has an ambition to take flying lessons.

To cover the large area in Bldg. 4-6, Joan and Teddy have a big staff of reporters. The reporters are Lydia Swift, Ray O'Keefe, Ramona Ireland, Lela Omspach, Forrest Carlson, Judy Clark, Martha Davenport, Abbie Hartman, Gil Baker, Ralph Mesing, Jim Hilfiker, Walter Gerke, Dorothy Lisius, Donnabelle Degler, and Mildred Quackenbush.

Hoosier hoop-hysteria hit our floor in full swing last week. Of course, we had the usual disappointments, but we can't all back the team that wins. That's just Indiana basketball. . . . Wanted: one warm dog house rug. Must be wool. Contact Harold Kiel. By the way, we wonder what Harold's explanation was for the fact that he didn't wear his hat home last Friday? . . . Here is a tip to Jack Dennis. The next time you light a cigar, you had better post a sign that you are smoking. Then they won't try to put out a fire. . . . Wonder what Annabelle Kensil had on her mind the other day when she kept putting the wrong leads on the stators? . . . Bob Rehrer loves tool handles covered with glue. It makes you stick to your job, doesn't it? . . . We welcome Ocie Jackson, Bea Gerardot and Hazel Lockwood to the early bird shift. Also Marie Dunfee who has returned after being ill. . . . We hope Marcille Thomas is back also by the time this goes to press. She has been ill with the flu. We also hope to see Elsie Hautz back with us soon. . . . It's a happy birthday to Alice Brockmeyer. . . . Cupid scores again. Our "we wish you happiness" mat is out for Maxine Lewis. She is getting married tomorrow. . . . Virgie Mayer came to work one morning and guesses that Santa Claus had been to see her. She found a cup at her place, but she fooled him because she really didn't need it. . . . If Frances Eckrote has window peepers, she must feel sure it is just to check up on her new reducing exercises. How about some lessons? . . . Mary Wright and Mildred Huntine were seen shopping for adjustable dress forms. Anyone unable to find someone to escort around, they will loan it in formal attire. . . . One of the girls from Taylor St. who rides the same bus I do in the morning thinks that yours truly should go out for track this spring. I really don't think I'm eligible, just because I missed the bus and caught up with it two blocks down the line. P.S. I put the above in because of a dare.

Thought of the week: "The world is divided into people who do things and people who get the credit. Try, if you can, to belong to the first class." There is far less competition. Which reminds us of the following: God gave man five senses: touch, taste, sight, smell and hearing. The successful man has two more, horse and common. . . . Watch your step. Four thousand and seventy-six people died of gas last year. Twenty-nine inhaled it, 47 put a lighted match to it, 4,000 stepped on it. . . . One of our downtown scouts tells us that the "Stop the Music" tune is "The Seventh Cavalry March," General Custer's famous regiment. But? ? ? . . . Helen David has one of those new-fangled umbrellas that fold into a compact roll. Last week it rained, so Helen had an opportunity to try out her new gadget. With Betty Eisenacher and Irene Snyder as interested spectators, Miss David stepped out of the door of Bldg. 31 and went through the necessary operations to put the umbrella in operation. She pulled and pushed and suddenly it snapped open, only instead of stopping in the proper position the tips continued upward until the umbrella resembled a large bowl on the end of a stick. In spite of Helen's efforts and those of her chums the contraption refused to change from its unnatural position to the correct one, so the little girl continued on her way home with the umbrella collecting water instead of shedding it. . . . George Murray rides to work with one of his neighbors. The other day George sat down in the car and slammed the door. When they arrived at his home, he attempted to open the door but it refused to move. Investigation disclosed that his coat had wedged between the door and its frame. So George had to remove his coat and slide out the other door and the owner enlisted the services of a garage to separate the door and coat. . . . The other week-end Bud Fisher was driving through Ohio. Suddenly his lights went out and Bud drove off the highway onto the berm. After locating the cause of his trouble he attempted to drive back onto the pavement, but the berm being soft, his tires cut in so deep the car would not move under its own power. Seeing a house at the end of a long lane, Bud went to obtain help. After making his needs known to the owner of the farm and another man who came to the door he was asked if he had a tow rope as they did not have one. Poor Fisher answered that he did not and then went into a lengthy description of the various types of cables, ropes and chains he had seen and intended to buy. If you know Bud, you realize that he is a sticker for detail and his description of observations or happenings are very lengthy. Finally one of the men interrupted Bud's narrative saying, "Come on, I believe we can push you out." He started for the door, motioning to a third man sitting by the stove. On the long trek down the lane Bud decided this third man should know the details so launched into a recap. After he had talked for quite some time one of the other men turned and remarked, "T'won't do you no good to talk to him, he's deaf and can't hear a word you say." . . . When you admit you're wrong, it's a sign you're getting wiser.

We have been hearing all kinds of tales about what this mild winter is doing to flower and vegetable gardens, but Luella Bixler tells how she is eating fresh parsnips right out of her garden and, we believe that it is true. . . . Jean Pappert was hostess to the Birthday Club this month. She entertained with a dinner at the Victory Club and Norma Krall was the member with the birthday. Those present were Luella Bixler, Florence Knight, Belle Buchan, Marvelene Butts, Dorothy Mills, Dorothy Mills, Dorothy Askren, Eileen Hennen, Ellen Tanner, Jean Pappert, and Norma Krall. . . . There is one basketball game that you can be sure that Walt Kryder will not miss and that is the one between the Leo Lions and the G-E Rheumatic Five. . . . This is the tale of a newspaper. First it is brought in by your reporter who reads it and then lays it on her desk until 7:45 wehn several people divide it and glance through it hurriedly. At this point it is passed along to one of the girls and then it finally goes home at night with one of the fellows and here the trail grows cold. Now if there is anything to the old adage that we share, then a lot of people get a lot of happiness from that newspaper. . . . We just got word that Kate Scherer has a new son. Congratulations to the young Scherers. We will all be out to see the little fellow.

BLIND GIVE AID

STAUNTON, Va.—A blind student at Virginia School for the Deaf and Blind practices bandaging. First aid instruction at the school is provided by the Augusta County Red Cross chapter.

Monday, Feb. 28 was the last day for our friend V. J. Tuttle, who retired after 42 years of service with the Company. Bldg. 18-2 took on a festive appearance as Mr. Tuttle's desk was decorated with a beautiful bouquet of flowers, and to add humor to the occasion, a miniature ball and bat, to aid in his tryout with the "Voltmen." A luncheon at noon and a reception after 3:30 in the Bldg. 18-2 Conference Room added enjoyment to the occasion. May we join his many friends in extending our best wishes for his future health and happiness. . . . Howard Miller has been appointed Assistant to Manager, Engineering, to replace Mr. Tuttle, to whom we extend our congratulations, and welcome to Bldg. 18-2. . . . Bldg. 18-5 has a weekly "15 cents" fund which is growing quite large. Perhaps they should tie a ball and chain on Ruthie Givens—not that they don't trust her, but she has been talking of a new home lately! . . . Recently Patricia Olinger did some skiing and tobogganing at Blaney Park, Mich., (near Canada). I'll bet she had her "ups and downs," don't you? . . . We are happy to report that Rex Mericle is improving from his illness in the St. Joseph Hospital. Reports say that his whiskers are getting away from him. Shall we form a Barber's Club? . . . Jeanne and Charlyl Grant, the Bldg. 18-5 newly-weds, have purchased a new home in Uniondale. No wonder Jeanne has been in the clouds. . . . Recently, Clarice Dunten, Bldg. 18-4, and Ralph Craighead, were married at St. Patrick's. Dorothy Long, Bldg. 18-4, and Jean Ann Ehinger, Bldg. 18-1, entertained Clarice with a linen shower at Jean's home. The Data Bureau girls arranged a bachelorette luncheon for her, in the main dining room Thursday. She was presented with a copper rolling pin filled with cacti and a miscellaneous kitchen shelf shower. The Data Bureau also presented her with an automatic iron and coffeemaker, (G-E, of course!) . . . Herman Kappel, Bldg. 18-4, is more convinced, that there is no place like Florida—a land of wonders. . . . "Nickie" Hill formerly of the Data Bureau visited Bldg. 18 recently, she is now teaching at Purdue University. . . . Anyone wishing any information as to when it is good fishing, ice or otherwise, just see Ray White, Bldg. 18-4. . . . We are happy to report that Jeanette Burkhardt is home recuperating from recent surgery. . . . Our reporter, Dolores Connin, Bldg. 18-4, was home ill several days last week. . . . It is agreed (?) that Dick Kent and Dudley Snyder should be paid overtime for the dreams they have. Recently Dick was printing all night with the prints coming out crooked and torn, etc. Dudley comes up with a dream that the whole sky is pouring prints on his head. . . . We are sorry to report that Minta Cole, Bldg. 18-B mail room, had the misfortune to fall in front of Bldg. 18 and not only injured her arm but came out of the fracas with a variety of shades of black and purple. We are sorry, Minta, and hope you will soon be better.

You have all read the story of Bill Buckner who fell through the ice and got the watery bath but you haven't heard how Ed Trabel thought he could go wading through the ice when he and Elton Swank and Wallace Geller went to Rome City to do a little angling. You just can't fish that way, Ed, you have to sit on a box and not wade out to spot those bluegills. It was the Boy Scouts who came to Ed's rescue, furnishing dry clothes, etc., after helping him out of the icy waters. . . . Bill Schible still wonders what happened to his six new towels and is considering putting a "super sleuth" on the job, so watch it, boys. . . . We wish to state that the weight of Mr. and Mrs. John Root's baby was 9 lbs. and 15 oz., instead of the early report of five lbs. So sorry and we hope it won't happen again, John, (false reports, that is). . . . The "dainties" that Harold Smith and Ernie Leffler were wearing down the aisle the other day should have been just a little larger for a good fit. . . . It was really a "blue Monday" for those fans from Monroeville after the tourney. The theme song for Merritt Myers and Roy Taylor should be "Dry those tears from your eyes." Paying off to Harold Smith, they laid their money down and quietly walked away. . . . Gene Lordier is very proud of his Boy Scout Troop that recently won a national award. . . . We extend our sympathy to Ben Kiep in the recent death of his brother. . . . The fellows think that George Coffelt should be a little more careful when he puts down those pallets, especially if he wants to keep walkin'. . . . Erv Huth was pleased with the swell turnout for the square dance at the G-E Club last Friday night and reports that the crowds are cryin' for more, so watch the papers, folks. . . . Happy birthday to Harold Smith, Mark Tam and Stella Trumbower.

BROADWAY STORE HOURS
12 noon to 4 p.m. daily

TAXLOR ST. STORE HOURS
1 p.m. to 4 p.m. daily

INTERVAL TIMER

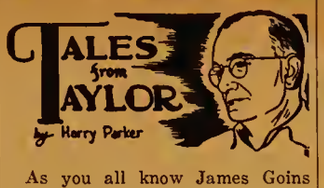
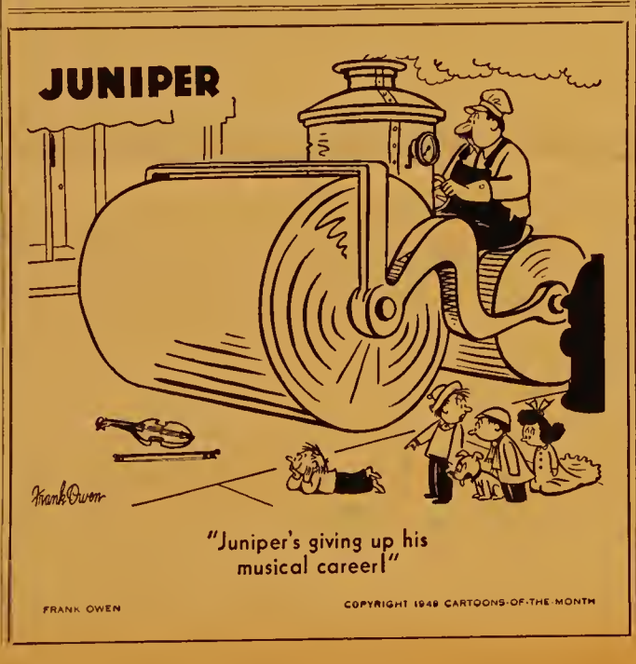
Hotplates
Interval Timers
Waffle Irons
Grills

Just what are you going to do with a guy like that? He, Bill Rohe, comes up with a pipe in his hand but behind his back and asks Dewey Wisner for a match which Dewey gladly gives him. Then pulling his hand from behind him, Bill says, "Now if I had some tobacco I could smoke my pipe." Our only advice to you, Dewey, is that you try and hide when you see this guy coming. . . . Birthday greetings to Vaughn Sheets, Jess Easterday and Harry DeWitt. . . . We notice Ralph Olinger came in very much crippled up last Monday a.m. It seems that Ralph took too long a jump out of bed. He forgot he was bedded in the top bunk. Look before you leap, Ralph.



Trumpet Tooter



Charles Sheets was awarded an excellent rating recently for his trumpet playing in a music contest held at the Harrison Hill school. Charles was also awarded a scholarship to Teachers College at Morehead, Ky. He has another year to complete his high school work. He began his training under the supervision of the late John Verweire, a retired G-E employee and leader of the Mizpah Shrine band. Charles is shown, above, with his father, Vaughn, foreman in the Wire Division, Taylor St.

We are glad to see Justin Heaston back to work after a four weeks' absence following an operation, also Evelyn Daugherty who was ill for one week. . . . On Friday we said goodbye to Alice Reuille Kelty who has left G-E to take up fulltime duties in her home. On Thursday a group entertained her for lunch at the English Terrace and presented her with a gift certificate from her co-workers. Those attending were Betty Williams, Helen Hardy, Erna Mann, Dorothea Meitz, Margie Fenstermaker, Joan Hartwig and Clara Outlaw. . . . Hazel Dilworth has offered her services and information free to newly-weds—it's a "Refresher Course for Brides." Must be something new. . . . Hilda Walda found out the hard way what route leads to Uniondale. She was making a sick call to see Evelyn Daugherty and drove several miles beyond the road where she should have turned. After retracing her steps, she turned on the right road but didn't go far enough, turned back the other way and after several miles still couldn't find the place, so in desperation she finally inquired at a filling station and found out that she was going the wrong direction, she turned again and after driving far enough finally came to Uniondale. We suggest a course in road-map reading. . . . When Park Schemehorn informed True Sheets of an odor of escaping gas at one of the ovens, True immediately made an investigation. As a result the sheet of flames removed his eyebrows and gave him a definitely professional hair singe which is supposed to make for a more luxurious growth of hair. Maybe so, but it's doubtful if it will help any on the top of his head. . . . Joe Trentadue, a loyal supporter of the Monroeville basketball team, spent a good share of Monday paying off his bets. . . . Charles Faulstick says he spends his Saturdays helping his father-in-law on the farm where he has piles of work to do and, he says, "I do mean 'piles'."

As you all know James Goins lives in an apartment and has been commissioned by the owner to look after the place and take care of any necessary repairs. The other day the tenants in the other apartment accidentally broke a window glass, so they called Jimmy, who measured the frame, procured a new glass and proceeded to install same but broke it in the attempt. Becoming disgusted he called a local glass company to come and take care of it. A small middle-aged woman answered the call, installed the new pane without any difficulty while James looked on. . . . George Rekers has always been a devout fan for a certain make of car. In fact, he is now driving the latest model, but we are afraid that his faith in this car has been somewhat shaken. The other day he was complaining about it leaking around the doors, and the trunk lid leaks so bad that the spare tire well fills with water. He is now thinking of using this well for a live box carrying his minnows with him at all times. . . . Art Brandenberger is in a bad spot at the present time. It seems that he was instrumental in selling a cow for a friend. Said friend in gratitude presented Art with a big hog. Now he is in a quandary as to what to do with this porker. We suggest he use it to augment the supply on hand in his hoggerie. . . . Henry Bubb has never been accused of being Scotch, but we are wondering. They tell us that after using his car and upon driving into the garage, he immediately suspends said car from the ceiling taking the weight off the tires to make them last much longer. . . . We thought all the time that there was only one "Black Beauty" and that it was owned by Frank Kimble. Now Kenny Miller comes forth and tells us that he has purchased the mate to Frank's ancient model. He claims that mechanically it is in just as good condition and the body finish will outshine Frank's three to one. Also he is not afraid to put it in third gear, getting more speed out of it.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, March 7, 1949

LOST AND FOUND

FOUND—Pair black cloth gloves with leather trim. Found on west side of Broadway.

FOUND—One key on a string on east side of Broadway.

FOUND—One earring with a pearl set in the center and a row of brilliant and green sets around it.

FOUND—Pair of nail clippers on east side of Broadway. Turned in at 18-Gate.

FOR SALE

HOOVER SWEEPER—Majestic hand sweeper. $20. H-79175.

DINING ROOM SUITE—China closet, buffet, light oak. Excellent condition. 224 East Foster Parkway.

HOLLYWOOD BED—And mattress, single, like new. $20. H-01983.

STUDIO COUCH—Good condition. H-69842 after 6 p.m.

HOUSE—Five rooms, bath, in Southern Heights, on Elmrow. H-24234 or A-98119 after 5 p.m. or week-ends.

REFRIGERATOR—Eight cubic ft.; Kenmore washing machine and sweeper. H-3803.

1937 FORD—85 h.p. A-1 condition. $395. H-70743.

HOME—Six rooms, bath, and breakfast nook. Southwood Park. H-46411.

1936 PLYMOUTH—Coach, runs good, two new tires, heater, very reasonable. E-2766.

THREE USED TIRES—And tubes, 6.50x16. A bargain at $7. A-76113.

BATHROOM FIXTURES—Complete set; kitchen sink. A-79081.

1938 PLYMOUTH—Good motor and five new tires. $300. H-74001 after 4 p.m.

STEEL CABINET SINK—42 in., single basin, left-hand drainboard. H-65944.

SIX OAK DINING ROOM CHAIRS—China cabinet. Reasonable. A-78851.

NEW EAGLE OUTBOARD GASOLINE CAN—2½-gal. capacity. $3. H-19425.

BASSINET—With folding legs. A-97504.

PORTABLE AUTOMATIC RECORD CHANGER—Attractive leatherette case. Good condition. H-64103.

LAYING HENS—H-76804.

1938 DESOTO TUDOR—Clean, reasonable. A-66725.

WANTED

USED G-E VACUUM SWEEPER ATTACHMENTS—A-75442.

SECOND GROWTH HICKORY—40-in. lengths and free from knots. H-58213 in the evenings.

PIANO—Spinet or baby grand, good condition. A-6592.

OLD FARM DINNER BELL—A-55741.

TRANSPORTATION

WANTS RIDE—Charles Fisher, from Laotto, Route 3. Works in Bldg. 31-1 from 8-5:15. Ext. 2241.

Chambers of Commerce seeking publicity for their cities might take a tip from Bostonians. They use their beans.

Open Bowling
EVERY SATURDAY
3 P.M. - 11 P.M.
At The
G-E CLUB

If you happen to have a surplus of any certain article and would like to get rid of it, just see Fred House. It seems that Fred wanted to buy about six or seven dozen eggs awhile ago, and the party who was selling them to him, wanted to know if he could use a case. Fred said he guessed that he could. The outcome was that instead of the wanted amount, Fred found himself with thirty dozen. Fred says that from now on he is going to be very sure of what he is buying, for he was under the impression that he was going to get a case to put the six or seven dozen in and not a "case of eggs." . . . Andy Anderson is again in the headlines. It seems that Andy is always having something happen to him and the sad part of it is that it isn't anything good. Last week he fell in the lake and now this week, it's because another fellow ran a stop sign and really tore up Andy's Chrysler. If you see Andy studying a white piece of paper, think nothing of it. It is only a trolley schedule that he is trying to figure out. He says he hasn't ridden a trolley for four or five years, and what a surprise he is in for when he sees all of the buses pass him up, and then discovers that they don't stop at all corners. . . . Ray Pickett has been trying to sell his '36 Chevie, but so far hasn't had any luck. Now if you are interested in this car but don't know anything about a '36 Chevie, we recommend that you see a certain guy who has a '36 and can tell you anything about them that you want to know. Maybe it wouldn't be a bad idea if this certain guy was to buy Ray's Chevie and try to make a good one by putting his and Ray's together. By the looks of the red ears and cold hands that this certain guy had last Monday noon, it would be a very good idea. . . . Anyone who has nothing to do tomorrow, should go down to the G-E Club alleys and watch the Mixed Doubles Tournament between the girl's and men's Taylor St. bowling teams. We are sure that it will be well worth your time.

Ambition is a longing a lot of people have for a more pleasant place in which to do nothing.

AIEE Members To Hear Talk On 'Electricity In Aircraft'

I. E. Ross, assistant division engineer in the D. C. and Specialty Motor division, will give a talk on "Electricity in Aircraft" Thursday, March 10, at a meeting of the American Institute of Electrical Engineers. The meeting will be held at 8 p.m. in the Squares club rooms.

Polly Brown now has a "matching leg" for Ginny Plummer. A few weeks ago Ginny broke her ankle and has been hobbling around in a cast, and Polly came to work with her leg bandaged due to a fall while playing table tennis. . . . One of our brides tried a cookie recipe given to her by Mike O'Grady and they wouldn't have won a prize. However, we understand it was no fault of Mary Louise's, but her oven regulator. We believe it too as she is quite a success in the art of baking. . . . Williadean Rathert has been coming to work the past week in a green chariot. When the more recent model cars fail to run there is nothing like relying on a Model A. . . . For information in the who's who in high school basketball listen any morning to Edna Marquardt and Helen Miller. They really can give you the lowdown. . . . Margaret Lepper bowled 484 again. It wouldn't surprise us to hear any of the men's teams trying to persuade Margaret to bowl with them. . . . Bill LaVine will now be known as "Atom Tom" and can be sing that "mee ow." . . . What happened to Kenny Rupp's bicycle? We see him coming to work on foot now. . . . We are very sorry that an error was in our column last week. It was Betty Harrold who was married a week ago and Helen Keims who gave a shower for her. The girls who were present were Martha Kruse, Berneil Amstutz, Stella Fagan and Loretta Treash. To you, Betty, we wish much happiness. . . . Sophia Bodigan is convalescing after an appendectomy. Best wishes for a speedy recovery. . . . Lillian Magner paid us a visit last week and we were all very happy to see her. Come back real soon, Lillian. . . . The lead section, formerly known as "The dead-end kids" will now be referred to as the K.N.E.W. section. . . . Many happy returns of the day to Hazel Henschen. . . . And goodbye to Mildred Weinman, who has left to become a full time housewife.

SUPERVISORS TO HEAR TALK ON DEVELOPMENTS OF CHEMICAL DEPARTMENT

K. W. Given will tell the Supervisors' Club about "New Chemical Developments" at its meeting Monday, March 14, at 8 p.m. in the Squares hall.

Mr. Given is a member of the Lecture and Exhibit bureau of the G-E Chemical Department in Pittsfield, Mass. He served on the administrative staffs of a number of colleges and universities before joining the General Electric Company in 1945.

His talk will include a non-technical explanation and demonstration of some of the little-known products and by-products in chemistry, with special emphasis on the development of plastics and silicones.

The program will also include entertainment by the Sentimental Four barbership quartet, a short business meeting, and buffet lunch.

Let's Eat!

CAFETERIA and RESTAURANT MENUS

MARCH 7 THROUGH MARCH 11

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant—16-2 12:00 M. - 1:00 P.M.

MONDAY, MARCH 7

Vegetable Soup	Beef Barley Soup
Beef and Noodles	Baked Ham
Ham Loaf	Italian Spaghetti
Hot Roast Pork Sandwiches	Barbecue Sandwiches
Mashed Potatoes	Whole Browned Potatoes
Buttered Wax Beans and Onions	Escalloped Corn
Harvard Beets	Creamed Tomatoes

TUESDAY, MARCH 8

Cream of Tomato Soup	Bean Soup
Roast Pork	Roast Pork and Dressing
Porcupines	Creamed Chipped Beef on Toast
Ham Sandwiches	Hot Roast Beef Sandwiches
Whole Browned Potatoes	Whipped Potatoes
Buttered Cabbage	Stewed Apples
Succotash	Buttered Green Beans
	Corn Bread

WEDNESDAY, MARCH 9

Bean Soup	Vegetable Soup
Baked Ham	Chicken and Noodles
French Fried Fish	Salmon Patties
Beef Barbecue Sandwiches	Chili
Escalloped Potatoes	Whipped Potatoes
Buttered Spinach	Buttered Squash
Glazed Apples	Harvard Beets
Sweet Potatoes	

THURSDAY, MARCH 10

Beef Broth and Noodles	Chicken Noodle Soup
Swiss Steak	Swiss Steak
Barbecued Wieners	Ham and Limas
Ham Salad Sandwiches	Chopped Beef Sandwiches
Mashed Potatoes	Whipped Potatoes
Glazed Carrots	Buttered Limas
Green Beans	Buttered Spinach

FRIDAY, MARCH 11

Cream of Potato Soup	Cream of Potato Soup
French Fried Oysters	Meat Loaf
Roast Beef	Macaroni and Cheese
Bacon and Tomato Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Steamed Potatoes
Spanish Limas	Buttered Peas
Buttered Peas	Buttered Carrots

Wide selection of home-made pies and delicious salads served daily.

Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

Menus Subject to Change

Inquiring Reporter

WHAT ARE THE OBLIGATIONS OF BEING A GOOD CITIZEN?

MARY B. STEWART
Taylor St.

"To be a good citizen, you must be quiet and peaceful in the state, true to your government and just to your country; you are not to countenance disloyalty or rebellion, but patiently submit to legal authority and conform with cheerfulness to the government and the laws of the country in which you live."

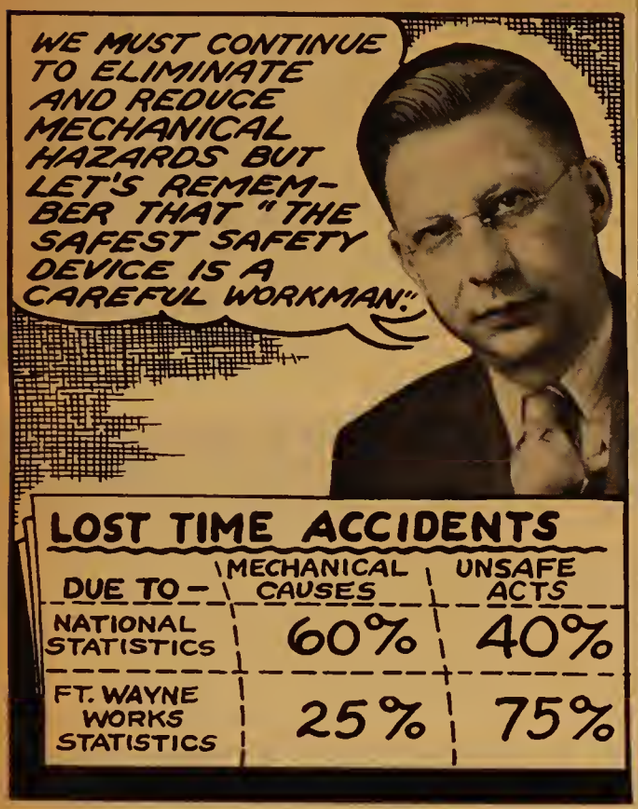
GARLAND L. MYERS
Bldg. 17-1

"I believe a person should take an active part in local and national elections, and I think the teaching of our children to be good citizens is a major obligation."

EDWARD J. SORDELET
Taylor St.

"A good name and an honored place with friends; learning the value of giving a helping hand and of building friendships; possession of a strong sense of give and take; of responsibility toward his job and his superiors. These are the obligations of a good citizen."

HELEN E. EGGEMAN
Bldg. 6-2



"The obligations of being a good citizen would be to take an active part in affairs pertaining to the betterment of all; be law abiding, and live according to the rule of having love for your fellowman."

ART FIKE
Bldg. 19-3

"To believe in and practice the Golden Rule and to uphold the Constitution of the United States are a good citizen's obligations."

SAFE—'In Spite Of Ourselves'

. . . THAT'S WHAT PEOPLE LIKE FRANK CAULKINS, PLANNER, FHP MOTOR DIV. 13, TAYLOR ST., ABOVE, TRY TO DO FOR US WHEN THEY ELIMINATE OR REDUCE MECHANICAL HAZARDS.

The Safety Section in the Personnel Division of the Fort Wayne Works has, for a number of years, concentrated on this phase of accident prevention.

The statistics in the above picture encourages us to increase our efforts in this respect.

HERSCHEL L. SMITH,
Safety Engineer

Company Develops Radar Device For Aeronautic Safety

WASHINGTON, D. C.—A new radar device helping planes to approach and land in greater safety and with fewer delays in all kinds of weather conditions has been developed by G-E. This was revealed at Washington, D. C., when the Civil Aeronautics Administration announced a $2,840,427 contract award to General Electric for 27 of the new units.

The device results from three years of research and development by G-E and is part of the CAA's new program for air navigation and traffic control.

Start Building Next Year

Installations of the new radar sets, which are to be built at Electronics Park, Syracuse, will begin early in 1950, according to present estimates. Twenty-two of them will become part of CAA airport control towers in this country, one for Hawaii, and four for Alaska.

Designed specifically for maximum performance in tracking small private planes, the new units will also be effective in bringing in larger commercial passenger planes as well as jet bombers, according to G-E and CAA engineers.

The sets may be installed anywhere up to two miles from the airport control tower with the traffic controller in the tower able to view the radar picture by means of a unique new remote system. Visible to him will be the exact position and flight path of every plane within a 30-mile radius of the airport.

Eliminates Fixed Objects

The new device is the first of this type to employ a unique method of eliminating fixed objects from the picture, leaving only moving aircraft visible. Special "video mapping" allows the controller to determine closeness of any airplane to a dangerous obstruction.

In bad weather and poor visibility the complete picture of all planes flying within the area will make it possible for the controller to conduct each plane with more safety to the blind landing radio beam by means of radio conversation and much faster than by present methods.

The contract award to G-E is one of the first steps of the CAA to effect its long-range air safety program.

Who remembers when folks used to go to movies to practice reading out loud instead of eating popcorn?

A friend says he has never been able to find a hat that really suited him. Mayhe he should change restaurants.

"Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me." John 14:6.

Someone has said give credit where credit is due and I would like to express a word of appreciation to our Volunteer Firemen. The minute that the fire siren sounds they are on their way in high gear. Last week they came through our division with all the equipment needed to put out an ordinary size fire. They are really a fine group of fellows. . . . Herb Winter and Herman Weigman have recently joined groups 16x10 and 16x41, respectively. Good luck on your new jobs, fellas. . . . The theme song of group 16x17 is, "You Are My Sunbeam." . . . Dick Madden, George Soule, Eldon Roby, Dale Springer and Joe Haas have formed a five-man team to enter the G-E Club Tournament. Soule and Roby will bowl as partners in the doubles, and Springer and Haas will match. . . . It has been fun to watch the interest in the scales that were brought down to the Punch Press section. Everyone wants to get weighed, but usually when no one is looking. It looks like men don't like to be overweight anymore than women. . . . "All angels aren't in heaven," say our "popeyes" boys. . . . Mousey Grotian will be able to apply for air pilot's license if he sees anymore live mice in his dinner bucket. He jumped a foot off the floor when he saw the last one in there. . . . Frank Waggoner stopped in to say hello, this week. He just returned from a trip to Florida. . . . Kenny Hyman is going to look toothpicks over more carefully before he uses them hereafter. Some of them have an awfully bitter taste. Emily Post has tried to tell you not to use them. . . . The Inspection group received a letter from Nora Jane Bair last week. Nora has been ill for almost a year and is recovering slowly. Now she has the mumps.

Fractional Fiction 4-5

By Elaine Sutter

We were all very glad to see Bill Koenig, who paid us a visit last week. Bill is retired and enjoying life. He told us he and his wife are going to Schenectady to visit their new granddaughter. . . . One Sunday afternoon, Carl Barber maintains he witnessed an opposum setting on a culvert drinking a can of beer. Carl? . . . Our singing troubadour is Dan Tetlow. When anyone asks him a question he sings the answer. . . . Our advice to Ed Rodenbeck is to get a bigger container so he won't spill glyptal all over the floor. . . . We were happy for Roy Woods for winning a suggestion award of $270. Keep up the good work, Roy, it really pays. Roy was quite worried about his hair not being combed for the picture. . . . Art Bashelier is quite a pipe smoker. He puts his pipe in his pocket and forgets to knock out the fire which results in a burned pocket. What will the wife say this time, Art? . . . Friends of Earl Souers wonder if the sad look is from South Side team losing. . . . Harold Cunningham has been losing bets on basketball games. Is it because Milton Roller won't bet unless he has the odds? . . . Anyone having any sparetime might teach Leonard Jenne and Milton Roller how to play euchre. All last week they won only two games. . . . If anyone wants to know about the B-29 forced landing, ask Madonna Endres. She has a wonderful version of it. . . . We say farewell to Vicki Adams, who is leaving us to take up household duties. The office girls had a luncheon for her last Friday. Lots of good luck, Vicki. . . . We welcome Leola Carrier back to work. She has recovered very nicely from her operation. Since Leloa is back she will again resume her duties as the news reporter. Please help her in getting the news, it will be up to all of you to have a column. I wish to thank all of you in helping me make a column during Leola's absence. Your past reporter, Elaine Sutter.

Microchemists Featured In Life Magazine

"Hand Held Laboratory," a four-page, picture story describing the work of microchemists in the General Electric Research Laboratory, is the science feature in the issue of "Life Magazine" which appears on the newsstands today.

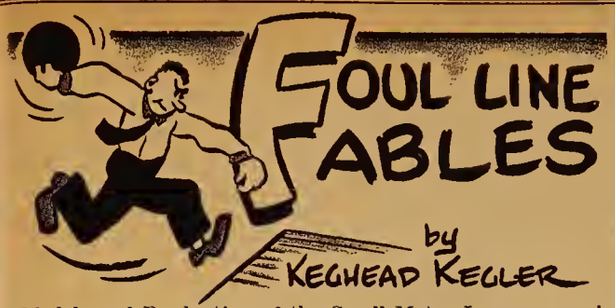
Pictures and text follow typical experiments with minute quantities performed in the Research Laboratory at Schenectady. In the seven featured pictures, a hand cradles many of the tiny instruments used by the microchemists and gives the story its title.

The microchemists performing the experiments were Dr. Earle W. Balis and Dr. Leonard P. Pepkowitz of the Research Lahoratory staff.

The article was developed by the staff of the G-E General News Bureau. The pictures were made in Bldg. 37 at Schenectady by photographer, Eric Schaal, on special assignment for "Life."

The time it takes to grow old depends a great deal on the way you go about it.

ECHOES FROM 19-2 & 19-3



By Gladys McMillan and Ed Dickty

Some of the gang in the west end of Bldg. 19-3 wonder why Glenn Goshorn spends so much time in the office lately. What's the attraction? . . . Speaking of new types of tools, Frank Enderle asked Frank Elder for the alum wrench recently. It couldn't have been an Allen wrench you wanted, could it, Enderle? . . . The other day Leroy Cook was late getting to work, and was he sharp and witty all day. Rudy Rastenberg says that extra hour of sleep did wonders to improve Cookie's wit. . . . It has been only lately brought to light that Russ Neireiter was at a party recently at which a lady remarked to Russ' wife that he was the handsomest and best dressed man there. Without meaning to be jealous or spiteful we would like to know how long Russ has been attending these parties for blind folk. . . . Pity poor Papa August, who has been spending his nights lately pacing the floor with his recalcitrant offspring. Until Ronnie gets that last tooth, Don will probably see more sunrises than he had through all his years as a bachelor. . . . Welcome back to Maurice Archbold after his two months illness. . . . If you are wondering why there is so much activity around the scales every day, Judge August will tell you it is merely the fat foursome, Amos Zollinger, Harold Greider, Norm Stoller and Van Skyock, weighing in to see how much weight they lost in the last few hours. The boys each put something in the pot, and the one who loses the most weight in three weeks gets the prize. It seems two of the boys lost five pounds the first night, and Judge August will again point out it was probably only a few bolts and nuts they happened to have in their pockets when they weighed in the first time. Anyway they are all saving money on the candy wagon, the cafeteria and the grocery bill. Rule three states specifically each contestant must walk to the scales under their own power at the deadline which is March 2, 10 a.m. . . . We are sorry to hear of the illness of Florence Weimer and Beulah Briner, and hope you will be back with us soon.

RESCUE AIRBOAT IN ACTION

MIAMI, Fla.—This eccentric-looking gadget, capable of traveling 50 miles an hour in as little as six inches of water, is used by the Dade County (Fla.) Red Cross Chapter for rescue and general transportation work in time of floods and hurricanes. Driven by an airplane propeller and guided by a rudder similar to those used on airplanes, the craft will also travel over wet grass, wet sand and mud.

Models and Production of the Small Motor League remain in a tie for first in the league standings. Walt "Belt Buckle" Mertz knocked out a 623 on games of 199, 182 and 242.

Two hundred scores were rolled by Howard Hoffman, 234; "Sapp" Quinn, 226; Lowell Welker, 214; Madden, 204; Paul Walker, 203; Adams, 202; Runyon, 201, and Orval Doherty, 200.

We wonder what happened to the Lauer-Berning feud.

Apparatus League

Team No. 5 stays way out in front of the pack with 16 wins and only two losses. Dan Oesch came up with the league's high single game. Dan shot a booming 266.

Other 200 scores were rolled by Bob Stute, 219; R. Schuelke, 212; R. Pappert, 207; Frank Gitter, 208, and Dick Blust, Paul Perry, and "Detroit" Piercy, 200.

Office League

Blueprint, paced by Oberlin's 234 and "Popeye" Patterson's 203 counts, whopped the Alternators three straight games to take over first place. The Alternators dropped back into second place with the Designers, just two games out.

Other two-hundred scores were piled up by Bob Hanna, 217; "Wee Willie" Bushong, 213; "Back Up" Hanson, 211, and Paul Hattendorf, 201.

Interdivision League

I can't tell who's in first place because I don't know myself. I do know who got the 200 counts though, so here we go: Putman, 218 and 202; Walt "Buckle" Mertz, 213 and 201; Erv "Bad Boy" Haugk, 204 and 200; Wayne Wiemer, 213; Lee Crowell, 209; Russell Rose, 203; Gail Meeks, 202; Ed Thiele, 202, and "Worried" Kuntz, 200.

G-E Masonic League

The Patrols are still out in front, enjoying a slim one game margin over the Gavels.

Two hundred scores were accumulated by Lauterberg, 219; Marion Bailey, 217; Meyer, 209; Miller, 203; Rastetter, and Cass, 200.

Transformer League

The Toys are way out in front with nine wins and no losses. The two hundred counts were made by Rowan, 211; Hamilton, 220, and Meeker, 234.

Ladies' Monday Night League

Margaret Lepper rolled the high game of the evening with her 204 count. Other high games were rolled by Helen Studler, 193, and Eleanor Phillips, Nellie Wendt, Dorothy Fuhs, and Emma Vaughn, 178 each.

Decatur League

In the G-E Fraternal League, Faulker and George Laurent rolled series of 639 and 634 respectively. Two hundred scores were made by J. Murphy, 210; Babcock, 202; Custer, 233, and H. Murphy, 226. Moose II rolled a 1076 for the season's high single game in beating G-E Club three games.

H. Murphy rolled a 603 for the high series in the Monday Night League. High scores were rolled by G. Schultz, 205 and 206; Laurent, 213; Shoaf, 204, and Gage, 200.

Bowling and Stuff

Entries for the G-E Tournament will be welcomed. First place will pay $85, team; $35, doubles; $20, singles, and $10 in the all events. Entries close April 2, so let's turn them in early and get first crack at those choice squads.

Open bowling is every Saturday from 3-11. There is a check at the Club for the FHP Motor Division 13 Bowling team.

There has been no change in the high score race for those trophies.

Don't forget that anything you do to save time and prevent confusion will result in better bowling.

Brouwer's Screwballs journeyed to Bryan, Ohio, Sunday and shot a respectable 2934 total. They seem to do better without Ole Keghead in the lineup.

Did you see where H. Dannecker, bowling in a league at the Emmaus Alleys, came up with 111 in the seventh frame in all three games of his series last Monday night. Let's make that our once-in-a-life-time story for this week.

FLOOR LORE FROM 4-4

By Voyce Brumbaugh

Our reporter, Bob Mobberly, has been transferred to Bldg. 17-1, and until a new one is appointed several of us will try to keep you posted on all the news. . . . Now that the sectional is over, and Central won, we will all be rooting—Beat 'em, Central, Beat 'em! Incidently Betty Skevington was surely picking them. Five out of five—all wrong. Now that's batting 1000 in any sportsman's language. . . . Several boys in the division have been complaining of their eyes bothering them. The nurse at the dispensary diagnosed the case as "Over-strain." P. S. Understand the floor show last week at a downtown hall was pretty good. . . . We wonder if Carl Reeves thinks his new way of filing papers is better than the usual way? We understand he files them on the floor. . . . Have you noticed the "purdy" wave in Wilbert's hair these days, and the way he wears it, sort of down over one eye? Wonder if it's that "devil may care" appearance or if he has a new Toni? . . . To Edith Venrick and Bill Morton: A bird in the hand is worth two in the basket. . . . Dorothea Swank, our little globe trotter, has once more been trotting around the country. She spent the past week in New Orleans attending the Mardi Gras. Hope she had a wonderful time. . . . We are wondering if Harold Mettler has perfected a new way of growing thorns? He had one growing out of the top of his head.

L. Bland	98	97	87	282
O. Emrick	100	94	84	278
L. May	99	91	87	277
R. Rickliffe	99	96	82	277
		Team Total		1114

The Squares won the first game of the week. They defeated Fractional, 60-36, in the Interdivision Basketball League, Monday, Feb. 21. The winners jumped to a 12-point lead at the end of the first quarter and although the Fractional boys tried hard they could not close the gap.

Winter St. beat the Apprentice School, 48-24, Feb. 23. Bencke and Richardson got 17 points each for the winners.

Small Motors threw a real scare into the league-leading Firemen, but weakened in the last quarter to lose, 31-30. Fractional came back after their Monday night loss and trounced Tool and Die, 50-22. Wilson, Bitley and Lenz hit well for the winners, getting 15, 10 and 11 points respectively.

The Squares kept up with the Firemen, winning their second game of the week, 54-24. Taylor St., the losers, were unable to score a field goal in the first half. They loosened up in the last two periods scoring 21 points, but by that time the Squares had a substantial lead. All three games were played, Thursday, Feb. 24.

G-E Club Scores 3 Victories

The G-E Club basketball team defeated Maumee Club, 51-55. The Club then handed Salisbury Axle a 35-38 defeat, after which they downed the U. S. Naval Reserve team, 50-29.

The next games are:

Tuesday, March 8, First E. V. Church team at the club gym.

Thursday, March 10, Huntington K. of C. at the club gym.

Saturday, March 12, Roberts Truck Rental at the St. Joe Center gym.

Box scores:

OUT OUR WAY

By J. R. WILLIAMS

One advantage in being dumb is that you never need have any qualms about going against your better judgment.

It's a tragedy when a man loses his best friend by marrying her.

575 Attend Square Dance

"Eight hands around," shouted the caller, as the photographer caught a group of dancers, above, at the G-E Club's square dance. Approximately 575 persons promenaded and do-si-do'd Saturday night in the G-E club gymnasium at the dance given as one of the club's Family Nights. Erven Huth and Charles Ream were co-chairmen of the event.

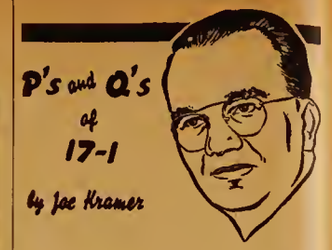
Apprentice BROADCAST

By Myron Auer

Shh—Shh—quiet please for ten seconds . . . the pause was for the disappointed Monroeville and Redskin fans who were heartbroken. It looks as though Central just beat them to the title. Both victims have exceptionally good ball clubs but only one could win, so it just had to be the Tigers. I am afraid Dick White will enter the list of "waysiders" next week. Someone move over to give him room. . . . Did you get a load of Bill Owens' hairdo? Which is it? A Toni or Marcel? I'll lay 10-1 it's a Toni. . . . It's amazing the different items you can find hiding in a gym bag. Someone said Wuttke's would talk back. It talked mostly on tho sectionals Wednesday afternoon. . . . Ronnie Allen is an excellent cook. That is providing he has a fire, hot plate, stove or some means to cook on. Two nice big juicy steaks and no place to fix them. The situation was overcome with a twin-engined hot plate which is as slow as I don't know what. Dinner was finally served at approximately 11 p.m. with all the trimmings. The four survivors looked anemic the next day. Two fellows didn't even make it to work. . . . Dick Reinking has been gunning for the No. 10 slot in bowling for weeks. He tries and tries but just can't come through. . . . "Those who laugh last laugh longest," says Dick Wagner. Wayne Bergman and Louie Brunner were disappointed when Uncle Sam didn't take a few of our latest class. Tough luck you vets. . . . Last Thursday the "rookie" class imagined they had a celebrity in their midst. What a letdown, it was only Art Rasor with his harmonica. You were O.K., Art, it sounded swell. . . . Two men escaped from Mars and crashed Bldg. 10-3 during classes last week. Bill Jones and Bill Owens bounced in with full head gear and ray guns flaring in all directions. Jim Pugh got so scared he jumped from a second story window. . . . I want a volunteer to tell poor Paul Wuttke that South Side is out of this year's tourney. He utterly gleamed as he walked down the hall yelling, "Yea! South Side! On to State." Maybe he thinks it's 1938. . . . Some of the boys had a little get-together at Fremion's cottage a week or so ago. The weather hit a foul ball, but other than that everything went off as planned. All involved seemed to have a sporting good time. . . . The draftsmen are all located in their respective new positions and all seem to be satisfied. Don Miller was telling his supervisor how he appreciated the help given him while in the division. Then to impress him a little Don went on to brag up the standardization manual which had been made up. The boss told him not to forget to turn it in. So Don reached in his desk and pulled it out, blew the heavy dust off and prepared to go about his business. Mr. Manecke halted his proceedings and asked him how he could possibly know anything about it when it looked as though it hadn't been touched for ages. That's O.K., Don, we all have days when we can't make a dime for a cup of coffee. So think nothing of it. . . . Bob Barnes announced we should get our ball gloves and spikes out of moth balls and prepare for an exceptionally good year. The Apprentice School is booked as a title contender according to top officials. Let's win one this year, fellows. Big "J" Hoppel is due to come around for his two-bit collection. Each time you pay one coin you are that much closer to home. Home being graduation day. . . . Dick Gotschall retired from the sick list and returned to work. We were all glad to receive him back into the fold. He brought a friend along, Dick Sebold. . . . I've been asked who my buddy is who attends bowling each Friday. He is Bob Ellenwood, the queen's brother. . . . The basketball team was greeted with their initial defeat. They bounced right back with another win in the week's second start. The defeat came at the hands of the Firemen. The play offs count fellows so play it cagey at the season's end. Bring the bacon home to the school. . . . Houses, houses, all kinds of houses. Millie is having a tough time selecting the house with all the advantages. She has been reading a "dream house" book for a month. Choose a good one, kid.

Broadway East Gate Closes Over Week-ends

Starting Saturday, March 5, the Broadway east gate will be closed at 7 a.m. until Monday at 6 a.m., it was announced by A. R. Vegalues, G-E Chief of Police. Closing the Broadway east gate over the week-end will continue until further notice. The Lindley and Broadway west gates will remain open every day.



The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

The 51 Frame sound room looks all perked up with pussy willows brought in by Ruth Leverton. Don't be fooled by those willows and think that it's spring cause if you do, Don Niles can set you right and tell you differently. He had his car freeze up for him last Monday night. Some of this nice weather sure does fool a guy though, doesn't it, Don? . . . There is something that seems to be bothering every one around here. It seems that someone saw Bernie Gausepohl riding a girl's bicycle last Saturday. Now what we want to know is just what were you doing on that bike, Bernie? Exercising or just riding the bike back home? . . . Ethel Koontz was all smiles when she came into work last Monday. We don't blame her, as she and her husband went bowling on Sunday and she beat him every game. That really shows who's who in the family, Ethel. . . . Evelyn Lietzke and Rose Liby were the lucky winners on the Sectional Tourney pool. We'd say pretty good guessing, gals. . . . Congratulations to Myrtle Cramer who celebrated her 28th wedding anniversary last week. She came to work wearing a pretty corsage and a great big smile. That sounds as though they have been a happy 28 years, Myrtle. . . . Ruth Raidy evidently doesn't have to count her calories like most of us gals do. She not only brings one lunch pail, but brings two no less. . . . Jerry McKown brought his little boy to the big city last Saturday to celebrate his birthday. From what we hear, we would like to know just who was supposed to do the celebrating. . . . Welcome to Bob Heinzelmann, who has joined our group, and hope that you will like it here with us, Bob. . . . Also welcome to the first trick, John Roose. . . . Congratulations to the Alvie Hills. Thelma, who used to work in the sound room, has a brand new baby girl named Judith Ann. . . . Congratulations also to the George McWilliams, who also have a new little girl named Donita Lee. . . . Esther Schladenhauffen has the newest thing for breaking in new shoes. She puts on the shoes, and then puts a pair of socks on over the shoes. The big question is, Esther, where did you get the men's sox? . . . We all enjoyed Dick Gladieux' visit last Monday morning and it was good to see you again. Dick used to work in Fan Motor and is now attending Indiana Tech. . . . Lela Seibert visited friends in Cleveland last week-end. From what we hear the train ride up there proved very interesting. . . . Anita Fitch was overheard in a restaurant saying, "I wanna spoon." Did we hear that correctly, Anita? . . . What's this we hear about Charlie Prine having the "Shmoo of all shmoos?" Let's hope that it keeps Charlie well supplied. . . . We extend our sympathy to Ann and Mary Cuellar in the death of their grandmother in Texas.

Evelyn Blakely of the Taylor St. Employment Office has asked me to please publish the following for her: "I wish to publicly express my thanks and appreciation to the following girls that so generously donated blood for my mother: Dorothy Richards, Div. 17; Geraldine Lartz, Div. 17; Hazel Hardwick, Div. 17; Blanche Mulligan, Div. 17; Olive Walters, Taylor St. Disp.; Pauline Hartman, Div. 17; Helen Moeschberger, Bldg. 31; Loretta Mulligan, Bldg. 18-1; and Mamie Allen, Bldg. 4-2.

Thank you so kindly girls,
Evelyn Blakely"

Never despair. But if you do, work on in despair.—Edmund Burke. . . . "High Ho, Silver, away," is Curly Sprague's new war cry; that is, since he received his Lone Ranger flashlight ring. Curly really gave a vivid demonstration of the uses that the ring could be put to flashing signals, secret compartment and all. For information as to how you can get your ring, we suggest you see Curly. . . . Who says that it doesn't pay to work with figures? Ask Leo Nyboer. That little number 1212 came through very handsomely for Leo during the Sectionals. . . . Bob Dent is in the market for a few chickens. Reasons are unknown but it is rumored that chickens make a good priority for getting a telephone. . . . It has been suggested that Johnnie Junk borrow a stick for holding his apple. It seems Johnnie has quite a chore holding it in his hand. . . . Charlie Griffin had a swell get-together for the second trick operators last week. Latest report says enjoyable time had by all. . . . George Mosshammer was measured for a suit of clothes by Ed Arthur. When "Baby Sitter" Mosshammer received the suit, the pants were two inches too long. We don't know for sure, but it has been rumored that the waist was a little tight. Must have been that 37 inch long yard stick Ed was using. . . . "Bingo Benney" better known as Ed (Little Lord Fauntleroy) Martin came to work Monday morning with a very sad look. When asked what the trouble was, all Ed would say was he's going to have to stay home nights and play Chinese checkers as his favorite hobby, bingo has again been suspended. . . . Clyde Crabill and Carl Fisber are looking for someone to go with them this summer on a vacation. The only requirement is a share the work plan outlined by Clyde and Carl. The couple going along must do the cooking, wash dishes, clean the fish, row the boat, and if they have any time left, they can polish Clyde's car. Address all inquiries to Clyde and Carl The Friendly Vacationists.

Volume 32 FORT WAYNE, INDIANA, FRIDAY, MARCH 11, 1949 No. 10

L. W. Kuttner, W. K. Williams Promoted To New Positions

L. W. Kuttner

W. K. Williams

The appointments of L. W. Kuttner as Assistant Manager of Manufacturing and W. K. Williams as Manufacturing Engineer was announced this week. Both are in the FHP Motor manufacturing divisions.

Mr. Kuttner started with General Electric in 1916 as a clerk in the Apprentice school. The following year he joined the U.S. Army and served until 1919, when he returned to G-E in the Cost department.

In 1920 he transferred to FHP Motor Cost, remaining in that work until 1924 when he switched to FHP Motor Planning. In 1929 he was appointed Assistant Supervisor of Wage Rates and Planning, FHP Motor division, and in 1938 became Assistant Supervisor of Cost for that division. The following year he entered the Central Cost section, where he was responsible for cost methods and procedure.

Mr. Kuttner was named Supervisor of Cost for the Fort Wayne Works in 1940. Later he returned to the FHP Motor division as Assistant to the Manufacturing Superintendent. In 1945 he became General Assistant to the Manager of Manufacturing when he was named co-ordinator of FHP Motor manufacturing.

(Continued on Page 4)

Employees Asked To Check Social Security Numbers

All employees are requested to compare the numbers on their payroll check with those given on their social security card.

The Federal Social Security office has phoned the payroll sections about a few incidents in which there have been differences in the numbers. All such discrepancies should be reported by the employee to his supervisor, who will inform the proper payroll section.

Pres. Wilson Warns Against Growing Disunity In Nation

DENOUNCES HEARINGS ON PROPOSED NEW LABOR LEGISLATION

Persistent attempts to pit one group of our society against another for the gain of a selfish few are creating a dangerous national disunity which this country can no longer afford, Charles E. Wilson, President of the General Electric Company, asserted at Cincinnati last week.

"There is no greater harm that can come to this republic than to set one group against another," Mr. Wilson said. "We could do with a little more restraint, courtesy and respect for the opinion of our fellow Americans on the part of those who participate in public radio forums, in the halls and committee rooms of the Congress, and on the convention platforms of business men and union men. Let us stop this soul-rotting business of setting one group against another in the hope of deriving some cheap immediate advantage."

Denounces Hearings

Speaking before the Chamber of Commerce forum there, Mr. Wilson denounced the recent hearings on the proposed new labor bill as having produced no substantial evidence to promote constructive legislation.

(Continued on Page 4)

Red Cross Total Goes To $4,781

The Red Cross Fund-Raising campaign at the Broadway, Taylor St. and Winter St. plants went to $4,781 yesterday morning, according to K. W. Michael, general chairman of the drive. A quota of $12,000 has been set for the campaign.

Nearly 500 solicitors canvassed the three plants this week.

The report by divisions of yesterday's accumulated totals was as follows:

Works Serv. and Contributing Div.	$1,149
Fractional Horsepower Divisions	1,880
Transformer Divisions	759
Motor and Generator Divisions	494
Winter St.	500

Mr. Michael stated today that much credit for the success of the campaign must go to the solicitors who made all the personal contacts, and contributed much in the way of selling this humanitarian organization—the Red Cross to local employees.

All employees who were not contacted or who desire to increase their donation can do so by contacting a solicitor or by sending the contribution to Mr. Michael in the Personnel office, Bldg. 8-2.

I. H. Freeman Appointed Supervisor Of Personnel

R. E. Zook Named To Employee, Community Relations Staff

I. H. Freeman

R. E. Zook

I. H. Freeman has been named Supervisor of Personnel, Fort Wayne Works. He succeeds R. E. Zook, who has been assigned to the staff of the Manager of Employee and Community Relations, Apparatus Department in Schenectady, N.Y. Both appointments become effective Friday, April 1.

In assuming the position of Supervisor of Personnel, Mr. Freeman will be returning to the division he organized in 1936. He joined General Electric in 1913 and was employed as foreman, and later cost accountant. In 1918 he started the Wage Rate division.

Mr. Freeman was named a general foreman in the FHP Motor division in 1922, then he returned to the Wage Rate division as its supervisor. In October, 1936, he was appointed Personnel Administrator. At the same time, he also was in charge of the Wage Rate division and Labor Relations.

When in October, 1936, these were made into separate divisions, Mr. Freeman was named assistant to the manager. Then because of ill health in 1945, he gave up his work in labor relations. On November 26, 1945, he was assigned to the Works Manager's office on special assignments.

(Continued on Page 3)

Annual Statement Reveals Sound Position of Company

(For detailed report of 1948 statement see page 12)

General Electric income in 1948 totalled $1,651,559,000 as compared with the 1947 figure of $1,347,544,000, it was revealed in the Company's annual statement released today. This is an increase of $304,015,000 which permitted G-E to set aside the $72,449,000 required for use in adding new equipment, stockpiling materials, getting out of debt and generally strengthening the Company.

With prospects of a "buyer's market" being possibly just ahead, this "plow-back" money takes on added significance, for it will permit the greatest possible protection of jobs in the face of current difficulties and at the same time place the Company in the most advantageous position to meet more urgent competition.

Approximately 84 percent of the total income during the year was spent for materials and wages, with $744,124,000 going to buy materials and $610,330,000 paid out in wages and salaries, the statement shows. This was an increase over 1947 of $141,082,000 and $98,739,000 respectively. Total number of employees at the end of the year (excluding those employed on nucleonics projects for the U.S. Government) was about 188,000 which indicates very little change since the previous year.

Although the possible economic

Supervisors To Hear Talk By K. W. Given

The Supervisors' Club will hear a talk by K. W. Given at its meeting Monday, March 14, at 8 p.m. in the Squares hall.

Mr. Given is a member of the Lecture and Exhibit bureau of the G-E Chemical Department in Pittsfield, Mass. His topic will be "New Chemical Developments."

The talk will include a non-technical explanation of the general types of plastics, new silicone products, and demonstrations of the remarkable characteristics of G-E dri-film and other new materials and applications which have been developed by General Electric's engineers.

The program will also include entertainment by the Sentimental Four barbershop quartet, a short business meeting, and buffet lunch.

PARTIZANS TO TOUR HISTORICAL MUSEUM

The Partizan Chapter of Elex will have a Historical Party Tuesday, March 15, at the Fort Wayne Historical Museum. Lunch will be served at 1 p.m. followed by the business meeting and a tour of the museum. Helen Thiele is chairman of the meeting with Agnes Schlotter and Jane Yergens assisting.

What This World Needs Is Such A Little Thing

What is it this world needs?

It's such a little thing, often thought of before, talked about, written about, orated upon, something within the power of each of us.

It's understanding and being understood.

A simple word—to understand. Not to tolerate, not to accept, but to understand.

It means putting yourself in the other fellow's shoes and walking in them, seeing two sides to every problem from a perch in the middle. It means, paradoxically enough, stripping oneself of every human drive and motive to become more of a human being, ridding oneself of greed and selfish cupidity, perverted ambitions, ruthless desires for pre-eminence.

Defeatists excuse failure of peaceable relations by saying there never has been peace and there never will be.

There was a time when, too, there never had been freedom of speech, marriage laws, or airplanes, or an atom bomb.

Our world is tired and sick today. But we have so fashioned it. We can make it a new world to live in. But if we want to live in it, understanding from Buffalo to Bangkok, from Buenos Aires to Berlin, is necessary so that man can eventually be a brother to his fellow man.

Suggestion System Offers Means To Get Ideas Across

Confidence and faith in self is a great asset. Most people have it to a degree necessary to get along in the world. But to win the confidence and faith of others, to the extent of getting your own ideas across, is quite something else again.

In other words, it is one thing to have ideas and originality but if you can't get them across, they are not of much use to you or anyone else. In the old days, before we had a Suggestion System, it was difficult to get ideas across. New thought moved slowly and many good ideas never saw the light of day because there was no one to tell them to without restraint.

Today that is all changed and your ideas can see the light of day by the simple method of writing them out on a piece of paper within your reach. Why not take advantage of this easy way to let someone know what you are thinking about.

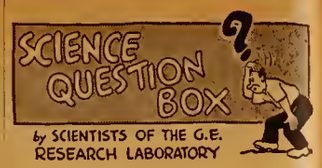
Use the Suggestion System. . . . take the Easier Way to the Better Way!

We All Have An Opportunity To Make The Most Of Our Time

Time is the most precious ingredient in the building of anything . . . be it a life or a powerful turbine. With its proper use we can achieve almost any end. When we waste it we commit the basest of crimes. Time lost can never be regained. Time misspent can never be reclaimed.

To each of us is given an allotted span to live and to each of us is given the abilities to make the most of our time upon this earth. Thus the challenge is in our direction; the goal is ours to reach. If we win, the fruits are ours. If we fail we must likewise taste the bitter cup of disillusionment, the brackish scum of dead waters.

In this daily work we all call the job, no matter whether it is sweeping the floor or keeping the books or figuring out the deepest mathematical formula, we all have an opportunity to make the most of our time. We can think of better ways to make the job easier for ourselves; better ways to make the product better for the public which must use it and better ways to make our company bigger and stronger in the field of its operations. Such use of time, earnestly pursued and steadily followed cannot help but make us grow individually and collectively. Use your time to better your job and your job will take better care of you.

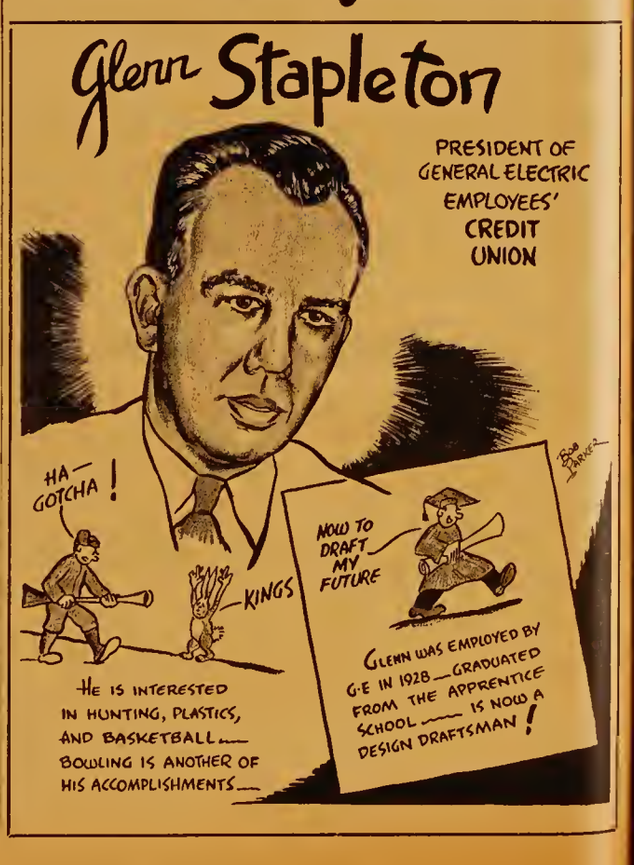


The thinking man is the growing man and who wants to stop growing?

"People who run into debt usually have to crawl out."

Max Feilitz, the playboy of the tool room, had quite an experience the other day. He was trying to show a trick ring to someone when it backfired on him. It was a water ring that would not work unless the master looked at it. How did it feel to get your face washed in the middle of the day, Max? . . . Mary Beahl was transferred to Bldg. 17-3 on the first shift, but we hope that she will be back soon. . . . Paul Koldewey was on an enforced diet last Friday. His lunch was short, of all things a sandwich. Better check before you leave home next time, Paul. . . . Don Shroyer will be inspecting in Bldg. 17-3 for the next week or so. He says he'll be back. . . . Don Witte is able to look at a person again without looking like he's twisting his neck off—he had the stiff neck for a week. . . . Bettie Foreman's husband purchased a Packard last week. . . . Someone saw Archie Evans walking down the aisle with a pipe in his mouth and carrying a package in each hand. Suddenly Archie had to sneeze and evidently didn't want to release his hold on any of the mentioned articles with the result—a broken pipe stem. That boy has a powerful sneeze. . . . Harold Hohman is happy to announce that he finally caught his limit while ice fishing. . . . Ed Meyer is the champion guesser of basketball scores. His guess for the three games played last weekend was 268 and that is the exact score. Maybe he could guess women's ages at the carnivals and fairs as a sideline. . . . John Williams hasn't said much about the Democrats since the governor threatened to resign if he doesn't get more co-operation. . . . Jim Kavanaugh is still having car troubles. It seems as though he is always running out of either gas or oil. . . . All winter Charley Thomson endured the cold in order to win a prize in the Huntington fish contest. He was awarded a pocketknife, and now he wants to sell or trade. What's your offer, fellows? . . . Don Meyers has been suffering with rheumatism so he is having his teeth pulled. We sympathize and hope he will be feeling better soon.

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY



Q. Why doesn't water from a spring freeze in cold weather?

A. The water in such a spring originates deep in the ground, where the temperature in winter remains much higher than at the surface, and is well above freezing. As water comes out it contains enough heat energy to enable it to flow for a considerable distance at the surface before it is lowered to the freezing point.

Q. What are the Fraunhofer lines?

A. These are dark lines which appear in the colored spectrum of the Sun, obtained when its light is passed through a combination of prisms and lenses forming a spectroscope. The light from the inner part of the Sun, the "photosphere," if it could be obtained by itself, would not show such lines. As this light passes through the Sun's outer layers, which form the "chromosphere," certain colors or wavelengths are absorbed. The light reaching the Earth is deficient in these colors and the dark lines appear. Each one, then, shows the presence in the Sun of a certain element. Thus, a close pair of lines in the yellow region indicates sodium, and one in the red is due to cadmium. They appear also in the spectra of other stars and enable astronomers to determine the elements they contain. Actually the lines are not completely dark, but appear so in contrast with the much brighter background of the continuous spectrum from inside the star.

Meet the President

Present Law Said To Have Helped Prevent Jurisdictional Strikes

Editor's Note: Following are excerpts from the testimony of President Wilson and Mr. Boulware, Vice President in charge of Employee Relations, before the Senate Committee on Labor and Public Welfare in Washington Feb. 17. The Committee hearings concerned the pending bill to replace the Taft-Hartley Act. Described for the Committee were the experiences of General Electric Company in its involvements with various unions. Specific instances, under a dozen separate headings, were detailed tending to illustrate the weaknesses and the strengths of the present law.

The present labor law has operated to prevent jurisdictional strikes, or has helped to bring them to a quick settlement in instances where they have cropped out, L. R. Boulware, Vice President in charge of Employee Relations, testified before the Senate Committee on Labor and Public Welfare at its hearings in Washington on proposed new labor legislation.

Presents Several Cases

Mr. Boulware presented to the Committee details of several cases where General Electric was an innocent victim in union jurisdictional disputes.

A recent instance, he said, involved a dispute between two unions during construction of the new G-E Research Laboratory at Schenectady. He explained that "we could not get the I.B.E.W. and the independent Empire State Telephone Union to agree over whose job it was to install the telephone cables."

When the telephone cables were to be laid, he pointed out, the I.B.E.W. threatened the electrical sub-contractor with a walk-out unless the New York Telephone Company permitted I.B.E.W. men to install the telephone cables, thereby replacing the telephone company's own employees who belonged to the Empire State Union. The telephone employees' union stated they would not connect the telephones if the electrical union pulled the cables. General Electric, as the innocent bystander, attempted from February to August last year to settle this jurisdictional dispute amicably, but without success.

'Walkout Not a Strike'

Despite the I.B.E.W. threat to the contractor that a strike would ensue, Mr. Boulware said, the telephone company workers eventually commenced installation of the cable and immediately "46 I.B.E.W. electrical workers walked off the job, leaving 20 workers and eight foremen." The following day only 18 electrical workers appeared on the job. The I.B.E.W. denied that it was a strike. The next day G-E filed a complaint of an unfair labor practice with the N.L.R.B., which assigned an investigator. This was followed by the I.B.E.W. representative calling G-E to the effect that the walk-out would be terminated if G-E would withdraw the charge. When the men did return to work on the following Monday morning, the charge was withdrawn with the permission of the N.L.R.B.

This unique laboratory was designed for research in microwaves for the U. S. Navy, the development of a 300,000,000 volt synchrotron for the Navy and exploration in the fields of television, nuclear physics, X-rays and many other projects under Government contract or for commercial or general scientific use, Mr. Boulware said, and added:

"Had there been no law to provide relief from such actions, irreparable damage might have been done not only to innocent bystanders but to the national well-being."

Wilson Cites Another

President Charles E. Wilson, who had previously read a prepared statement, at this point in the proceedings referred to another case concerning the turbine building now under construction at Schenectady. A Committee member asked for the details and Mr. Wilson referred the Senator to Mr. Boulware, who explained:

"We placed a temporary wall through a new 20-million-dollar factory building so that the CIO people are working on one side and the AFL people on the other, doing substantially the same work. But this technically makes it two buildings."

Other Disputes Given

Other instances of jurisdictional disputes were described in a supplementary statement, one being at the Company's Electronics Park, Syracuse. There the I.B.E.W. picketed the construction work and the electrical workers refused to continue on their jobs when the telephone company workers, members of the Empire State Union, were installing the telephone cable. The dispute was settled by a compromise agreement between the two unions. About this, the Company's statement said:

"At this time (November, 1946) there was no remedy available to those who, as innocent bystanders, might be damaged by the delay to this large construction project.

"Our company has experienced, and is experiencing, instance after instance of this practically all over the nation. But General Electric's experience is not unusual, as you know. The Committee will recall the testimony as to the CIO-AFL soft drink strike on D-Day in Detroit; the port-closing Longshoremen and Sailors Union strike in California when 25,000 tons of fresh vegetables rotted; the bomb-throwing, window-smashing, man-beating CIO-AFL Pittsburgh 'Teamsters' War;' and other instances of terrorism."

If juvenile delinquency continues to grow maybe we'll have to bring back the old woodshed.

Most of the fixed ideas the average person has can stand a lot of fixing.

G-E Safety Engineer Is Invited To Attend Truman's Conference

The Fort Wayne Works safety engineer, Herschel Smith, has been invited to attend President Truman's National Conference on Industrial Safety.

The conference will be held March 23-25 in Washington and will be attended by more than 1,500 business, labor and government officials. The President has asked that the conference be called to check industrial accidents and deaths that are estimated to take place in industry this year based on statistics for other years.

Addresses by the President and John O. Pastore, governor of Rhode Island, will be the features of the opening day. Maurice J. Tobin, Secretary of Labor, will preside over this session.

The remaining days of the conference will include the reports of committees, covering such phases of industrial safety as: Industrial Accident Records as a Measure of the Problem; The Engineering Approach to Industrial Safety; The Development of Safety Laws and Regulations; Education in Accident Prevention; Research for Safety; Labor and Management Cooperation for Safety, and Organizing for Safety.

Irving Denton, Manager of the Safety Council at the Chamber of Commerce, has also been invited to the conference. Mr. Smith is chairman of the council.

Melvin Howe Dies Sunday

Melvin Howe, 63, died at 8 a.m. Sunday at the home of a daughter, Mrs. Fred Noel, 454 Eckart St. A resident of Fort Wayne 38 years, Mr. Howe was first employed by General Electric in 1927 as a helper at Winter St. He later transferred to Broadway, where he worked on various jobs such as washing and drying in Bldg. 4-B, annealing, Japan-dipping, and as an elevator operator. When he left in 1945, he was a bale scrap collector.

Besides Mrs. Noel, he is survived by another daughter, Mrs. John Irelan, of Logansport; two brothers, John, of Latty, O., and Ray, of Lima, O.; a sister, Mrs. Gertrude Betts, of Lima; and four grandchildren.

Services were held Wednesday at 2 p.m. at the Mungovan and Sons Mortuary. Dr. Paul Miller officiated, with burial in Greenlawn Memorial Park.

Schenectady Employee Becomes Company's 10,000th Pensioner

Homer Landry, of Cohoes, N. Y., became the General Electric Company's 10,000th living pensioner, when he retired Tuesday, March 1, after 31 years of service.

Landry, who estimates he has traveled 300,000 miles in commuting to work from Cohoes to Schenectady, came to G-E in 1916, four years after inauguration of the Company's pension plan—the oldest in American industry.

During his last day on the job as a boring mill operator in the G-E Apparatus Department's turbine divisions, Landry was congratulated on his service record by William W. Trench, Company Secretary and Chairman of the G-E Pension Board.

Landry also was presented a purse of money by his fellow workers in the turbine divisions.

Recalls 'Old Days'

A commuter throughout his 31 years of service, Landry claims that present commuters who kick about their problems "should have had a taste of the old days."

He recalled that in his early years of service with the Company he arose at 4:45 a.m. each day to catch a 5:40 a.m. train with 200 other workmen, and then arrived home on the same train at 7 p.m.

"That wasn't so bad in good weather, but when the snow was deep and the train was late, we sometimes didn't see too much of home," he said. "On one occasion, a storm made the train so late that we didn't arrive in Cohoes until 5 a.m.," he recalled.

Pensioners in 42 States

More than 150,000 active General Electric employees are now participating in the Pension Plan. The present 10,000 pensions are scattered throughout the world, in 42 states and the District of Columbia, the British Isles, Canada, Italy, Lithuania, Poland, Norway, Germany and the West Indies.

Under the present terms of the Pension Plan, employees and the Company jointly contribute to the pension trust fund, from which pensions are paid for life to all retiring employees; however, regardless of the date of death of the pensioner, benefits are guaranteed for a five-year period to the employee or his beneficiary.

The amount of each participant's annual contribution is two per cent of the first $3,000 of his compensation and five per cent of all over $3,000. At the age of 65, the retiring employee will receive a pension each year of 40 per cent of all that he has contributed to the plan.

The plan was broadened in 1946, and that same year the contributory feature was introduced. The Company announced that it would pay the entire cost of pensions for all employees based on their years of service prior to the date of that amendment. These pensions are in addition to any benefits due the retiring employee through federal social security.

Appointed Supervisor

(Continued from page 1)

In organizing the Personnel division, Mr. Freeman was also instrumental in the founding of the G-E Club and Elex. He is a member of the Foremen's Association, Supervisors' Club, Squares Club, and an honorary member of the Apprentice Alumni Association.

Mr. Freeman belongs to the Chamber of Commerce and is a charter member of the Fort Wayne Personnel and Industrial Relations Association.

He is also one of the founders of the Fort Wayne Philharmonic Orchestra, President of the Philharmonic Chorus, and on the board of the Fort Wayne Musical Society.

Mr. Freeman is married and resides at 4811 Old Mill Road.

Here Since 1929

Following graduation from Purdue University in June, 1929, Mr. Zook came to the General Electric Company on the factory training course.

His assignments since that time included planning, foremanship, and various phases of personnel and labor relations. In July, 1943, Mr. Zook was named Assistant to the Personnel Administrator. Later he was appointed Assistant in the Labor Relations division, the position he held until December 1, 1948, when he was named Supervisor of Personnel.

Mr. Zook is President of the Fort Wayne Personnel and Industrial Relations Association and is a member of the Indiana Personnel Association, Chamber of Commerce, Foremen's Association, Squares and Supervisors' clubs. He is married and has two children, a boy and a girl. His residence is at 4612 Calumet Avenue.

Works Lab Men To Present Comedy For Squares Party

A scene from the three act, musical comedy to be given by the men in the Works Lab at a Squares stag party is shown above. The show, a hilarious take-off on a Gilbert and Sullivan comedy, will be presented Wednesday, March 16, at 8 p.m. in the Squares club room.

As Gracie Allen would say:

Roses are red
Violets are blue
Next Tuesday
Your Income Tax is due.

Better have it paid by then or Uncle Sam will be looking for you.

Hagenbeck and Wallace haven't a thing on us as far as trained animals are concerned. We have "Tilly Mouse" who can tell time. Yep, she takes a stroll everyday at 4:30. One day she was late and Harry Beatty thought his watch was wrong. . . . We are sorry to lose Ann Lapadot, but we are sure she will be happy in Bldg. 2-2. Good luck, Ann, you're a swell gal. . . . Play ball! Spring is in the air. Last week the Grinding Room gang was seriously thinking of organizing a baseball team. This week they decided to drop the idea—too many butter fingers in the crowd. Don't suppose they could mean Melvin Rose, do you? . . . Speaking of spring, one sign will be when Heiny Bruggeman starts removing his winter "heavies," his many coats and sweaters. . . . Mary Warren is looking for a good used pair of roller skates since she can't make connections with her bus. Poor kid, she's all worn out by the time she gets to work in the morning. . . . The Receiving Section is sorry to lose Paul Buell to Taylor Street. We'll miss you, Paul, but don't forget to drop in for a visit any time. . . . Cletus Ternet is at his home confined with the gout. I was always under the impression gout came about from overeating. How can you do it, Cletus, in these days of high prices? . . . Fred Divelbiss is starting out early to make a fisherman of his three-year-old son, Steven. Stevie was caught one day trying to clean one of his goldfish the same way Fred cleans those "big ones" he catches at Lake Webster. . . . It seems Russel Kryder was a poor authority on basketball this season. First, his home team Leo let him down so badly, then Central became his favorite. Oh, what a let-down when Auburn came to the front Saturday night. Russ, what goes—are you slipping? . . . Phyllis Nordyke is looking for a good used mattress to use for horseback riding. She has been eating from a shelf several days now. . . . Happy birthday to Harry Golden and George Jones. . . . Success is getting what you want; happiness is wanting what you get.

Annual Statement

(Continued from page 1)

trends during the immediate future depend on many unforeseeable factors, including taxes, raw material costs, wages, world conditions, and many others, it is safe to say the G-E by virtue of its careful and sound operation, stands in such top positions as is possible among American industries to face that future with confidence.

With employees and management working together, General Electric should continue to be able to offer its customers better goods at a fair price, after rewarding employees with good and proper pay, and at the same time make a reasonable return for the thousands of stockholders who have placed their confidence in us by investing their savings in our Company. This in its simplest terms, represents the road to success in business and to the best available steadiness of jobs.

Pres. Wilson

(Continued from page 1)

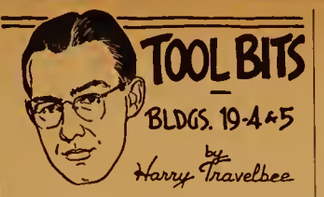
"There was almost no disposition on the part of union leaders to do anything but demand the immediate payment of an election debt. There was no desire to listen to evidence to examine the record, or to submit proof. There was no visible sense of obligation for a great policy," Mr. Wilson contended. "In my opinion there hasn't been a single straight-forward attempt, on the part of labor's bosses to negotiate an honest, workable, equitable labor bill to keep America strong and united."

Mr. Wilson termed the proponents of economic controls; price, wage and profit regulations; confiscatory tax plans; and huge public spending as advocates of "fashionable approaches to socialism and collectivism in various disguises."

"It is often difficult to tell whether they are malicious or just innocent but somehow they must be made to understand the economic bases of the American free enterprise system," he declared. "There is considerable liability for economic illiteracy in government and there it cannot be condoned."

Might Learn from Industry

Asserting that industry had "paid its way to bigness" by providing comfort, security and contentment for the American people, General Electric's president suggested that government might well consider applying some of industry's concepts of business standards to certain phases of its own operations.



"Maybe we should look at that great flood-control venture, the Tennessee Valley Authority, and ask how many floods it can control by building steam power plants and competing with private industry, on taxpayer's money," he stated. "Maybe government should divest itself on the Post Office Department, a business with a reported $300 million deficit which I am sure would derive considerable benefit if it were operated as a business. If it really wants to put the attractiveness, efficiency, and necessity of many of its proposed giant public works projects to the acid test, maybe it should invite private investment in such projects, the way it invites the public to buy U. S. Savings Bonds, and encourage the operation of these projects by suitable components of our tried and successful American system of competitive enterprise."

One of the great threats to our economic security at the moment, he said, is the tendency to exempt the lower income groups from paying taxes at all. Such short-sightedness, he contended, will produce only irresponsibility of citizenship on the part of those who are made exempt. The phenomenal growth of our government is a lasting monument to the policy of our top-heavy tax and borrowing structure, he stated.

Football Flaw Finder

The man with the earphones and "pistol" is not a disillusioned ball player out to destroy every football in sight. He is an inspector, using an electronic leak detector to find flaws in footballs as they come off the assembly line at the Collete Manufacturing Company in Amsterdam, N.Y. If there is a leak in the ball, he will hear a "peeping" in the headphones. The detector, developed by General Electric scientists, sucks in air and is extremely sensitive to the presence of smokes and gases containing fluorine, bromine, iodine, or chlorine. The balls are inflated with such a gas, and if any escapes through a leak, the detector signals the engineer. In the past, the pigskins were inflated and stored for several days to see if any were faulty. The G-E instrument is so sensitive that it has been possible to check entire cases of footballs simply by passing the pistol-shaped device over them.

The Polar Bear Club had their swim Jan. 1, but Dick Hemrick held his frigid swim Mar. 1. The other night Dick and his family were heading for the old homestead from a party. Dick claims the atmosphere got so foggy, he couldn't see the road and ran head-long into a ditch with three feet of water. Not giving up the ship, Dick took off his shoes and waded around the area to survey the situation. Our hero finally summoned help from a nearby farm and carried his family one by one from the half submerged vehicle. . . . Yours truly saw Norman Jackemeyer at a sale in Bloomingdale. Norm says everyone accuses him of buying a cement mixer for his wife at the sale. . . . You've heard of trying to squeeze blood out of a turnip. Well, Adrian Libbing isn't actually a turnip, but the medics at Bluffton gave up after several futile attempts to extract any blood. Bob Branning was on the cot next to Adrian and was having a good joke over the whole thing. The nurses asked Bob if he felt all right after giving up a pint of blood. Bob decided he never felt better in his life and walked out in the hall, only to fold up completely. . . . Lowell Welker was seen on Taylor Street with three kites and two kids. Lowell said the third kite was a demonstrator. Guess who demonstrated. . . . Cliff Clapecattle has been hearing so much about that outstanding bass catching plug, "Stoney Spinner," from the two Johns (Neukam and Roemer), that he is almost convinced that he should buy one. Cliff claims the only reason these boys want him to buy one, is because they have stock in the company. . . . Herb Thiele had plenty of fun at a recent wedding doing his own version of a dance. . . . Dick Florent and Don Martz are with the Mill Section starting this week. Welcome, boys. . . . We have been told that Russell Sage has twins—lambs that is. Maybe they'll eat that keg of herring you bought and don't like. . . . There are still some died-in-the-wool Republicans in Bldg. 19-4. Elmer Sauerwine was seen ordering his license plates from a fellow worker, rather than enter the license bureau himself. . . . Bob Truelove's old 1937 V-8 Ford finally let him down. He claims all the years he has owned Betsy, she has been forever faithful. Bob's riders didn't appreciate Betsy's service record judging from their faces as they boarded the trolley coach. . . . Jack Schemehorn's fishing partners caught him buying fish at the local fish market last week. Besides being thrown out of the Izaak Walton League, Jack is facing possible suspension of his fishing license for one year. . . . One 1948 Plymouth for sale. See our apprentice, Delbert Meyers. He says the only thing wrong is that it takes a new battery every two weeks. . . . We'd like to mention Don Martz was tenth in the city bowling and first to the trolley bus last week. Believe it or not, he claims he was in a hurry to go uptown to a sale on zippers. Why should anyone rush to a zipper sale? . . . We wonder when Elmer Sauerwine got his license to teach piano. The grapevine has it that he takes pupils one year old and up. . . . Imagine our surprise when we saw Reiny Lepper giving demonstrations on bait casting at Baer Field Sports and Travel Show. The WORKS NEWS photographer should have heard about that. . . . Lowell Welker finished a worthy second in the bowling tournament, but first place was the only place receiving a gold belt buckle. Lowell's good friends in the jig section took up a collection and bought a dime store special with Lowell's initials printed in red.

A mouse can still shorten skirts quicker than fashion lengthened them.

The time has come when dad is perfectly willing to let some one else use the sleeping porch.

Squares Plan Minstrel Show

A Squares Minstrel Show will be presented the latter part of April, it was announced today by G. C. Harvey, president.

The show will be followed by an open house at the club rooms.

Frank Gamec, Bldg. 26-2, has been named general chairman of the program; Frank Ondrovik, Bldg. 26-2, will handle the administrative details, and Joe Zasa, Taylor St., will be chairman of the show committee.

The cast will be chosen from the membership of the Squares club.

New Positions

(Continued from page 1)

In February, 1948, he was appointed Assistant to the Manager of Manufacturing, the position he has held since that time.

Mr. and Mrs. Kuttner live at 4302 Beaver Ave. They have one daughter and a son, who is on a training course in the financial section of the Specialty Transformer division.

Graduated In 1928

Mr. Williams graduated from the Apprentice school in 1928 as a machinist-toolmaker and was assigned to wage rate work in the Specialty Transformer division. In 1931 he became Supervisor of Wage Rates for that division and three years later was named Supervisor of Planning and Wage Rates in the same division.

He was appointed Assistant Superintendent of the Specialty Transformer division in 1940, and the following year became Superintendent of FHP Hermetic Motors. The same year he was named Superintendent of Bldgs. 4-2, 4-3, 17-2, 17-3, and sections of 17-4 and 2-2.

Following that assignment, Mr. Williams was named Assistant Manufacturing Superintendent, FHP Motor division, and in 1945 he joined the staff of the Manager of Manufacturing, Apparatus department in Schenectady.

Mr. Williams returned from Schenectady in February, 1948, when he was appointed Assistant to the Manager of Manufacturing, FHP Motor division.

He is married, has two childen, and resides at 2230 Muskoday Pass.

The high school basketball tournament held Feb. 26 will be one our General Foreman will not forget. Even though Monroeville lost Mr. Skevington came out a winner. Noel Young, a very talented cartoonist in our Division, certainly drew a very fine poster expressing "heart felt" sympathy of the loss of a very fine team. Thanks, Noel, we are sure your effort was really appreciated. . . . Bob Crosley and his two brothers participated in the "Amateur Fete" at the Sportsman Show and won a trip to Chicago. We understand they impersonated the "Three Mop Sisters" in a song and dance routine. Congratulations, fellows. . . . Arlo Hawk and George Miller were going to enter Elmer Buuck in Horace Heidt's amateur show, and they were willing to bet they had a winner. . . . Ginny Plummer had a "coming out party" last Saturday. She has her leg out of the cast. . . . We hear Ralph Fishback is now on a diet. Seeing is believing. . . . Dale Irwin certainly had "butterflies" last Sunday when he received a long distance call at 7:45. Could it be he thought it was the "Stop the Music Program?" . . . Why is it Bill (Van Johnson) Kurtis always acts so bashful when a strange girl stops to talk with him? . . . Elmer Buuck is trying to "weather the storm" he has finally mastered enough courage to smoke on the front porch and in the back yard. . . . Bill Roby was so tired again he had to take a couple days off. . . . Luke Shorter is one fellow very hard to convince. He wouldn't even believe one of his own fraternity brothers when he told him he had a flat tire. . . . Mike O'Grady waited until the very last day to get his license plates and waiting until the following morning to get them on his car, had to wire them on with bailing wire. To his astonishment when he returned to the house his wife told him they were on upside down. . . . Chauncey Tucker upon returning home from work and seeing dinner was not underway decided he would fix himself some mush. After making two skillets full and eating heartily, he heard cars pull up in the drive. Was he surprised to learn his friends had planned a potluck dinner for him and his wife to celebrate their 24th wedding anniversary. . . . Mike Brayer performed "But Beautiful" for the boys at the bowling alley last week, he fell flat on his face. . . . Helen Miller is at the "Top" of the list again. She rolled a 160-198-172 for a 530 series. . . . Buster Kissinger and Cleon Oyer make a good team. What one can't think of, the other one does. . . . Sophia Bodigan is recovering nicely from her operation and is now at home.

Men's neckties resembling silk are made of rubber in France. And the styles are the snappiest.

Spending most of your time hoping is a good way to wind up hopeless.

Celebrates 30th Year

Paul F. Moore, Bldg. 28-2, completed 30 years service with the General Electric Company Friday, March 4. Several of his friends in the Works Laboratory gathered Wednesday to honor him, and he received a congratulatory letter. Left to right, in the above picture, are J. H. Keith, Paula Gerding, C. M. Summers, Henry Lehman, C. D. Kenyon, Mr. Moore, C. D. Cockburn, E. F. Girvin, C. E. Winchester, S. A. Zimmerman, H. W. Hellar, W. Howard Miller, W. R. Hunt and R. H. Cole.

Bernice Miller sure looked like a cover girl Tuesday morning sporting her new permanent. . . . Cecelia Noonan returned to work after a week's vacation with relatives in Toledo. Toledo dances were her main attraction. . . . Ercie McConnell has been transferred to the KC Line. Nice group of girls around this table, but we'll miss you in group 7x80. . . . Eddie Noonan has his troubles. Will someone help him figure out why blondes are his weakness. . . . One week can be a long time but Joe Weber will be back on days Monday. . . . Seven thirty—looks like Mr. Lash is late again or is he on banker's hours? . . . Merle Riley sure is happy to be back after several weeks' absence. . . . We would suggest Guy Secaur to use 3 and 1 oil on his shoes. . . . Mr. and Mrs. Milton Brown and Mr. and Mrs. Oren Schultz attended the Sportsman's Show at Baer Field. We presume Milt was interested in one of those new flying machines. . . . Have you noticed Forest Roop's new two-toned gray Nash? It must be a super-model, buttons and bows, built-in features, even a bed that could be made in less than five counts. We'll be looking for a salesmanship demonstration, Forest. . . . Proud Grandma Eyanson was showing pictures of her grandchildren. Mighty fine children, Mable. . . . Meanest man on the Ohio-Indiana line — someone ran over Effie McGill's "Porky," her little toy Manchester. We hope you have better luck with your next dog. . . . "Spike" Cramer has a new name "Clamp Bolt" Cramer. For further details, see Patrick. . . . Cramer and Flaugh canned beef all day Monday and that "ain't" no bull. Ralph Cauble wielded the axe that floored the bovine. . . . These weeks seem to just roll around—you barely get the news in for one week when another week has passed and it's time for news once again. . . . What a beautiful spring day it was the day a farewell dinner was given for Frances Terveer. Those attending the dinner were Ardella Heare, Harriet Haines, Cathryn Steele, Mary Fennig, Irene Holthouse, Fern Passwater, Earleen Steffen, Florence Schultz, Dorothy Schumm, Barbara Roop, Dorothy Schnepf, Geneieve August, Joan Liechty, Wanda Bailey, Mary Jones, Christine Andrews, Mary Ann Laurent, Millie Geimer, Eloise Noll, Esther Meyer, Alice McBride and the honored guest Frances Terveer. Frances received a lovely gift from the group. . . . There were quite a few from the office that attended the basketball games at Huntington, practically 90 per cent. . . . We want you to know that we have a poet in our midst. Christine Andrews, our telephone operator, writes at least a poem a day so here is one of her many:

THE STORM

The storm clouds come up with a rush;
We watch them as they on do brush
Across the sky to hide the sun;
See the lightning swiftly run.
And now it's raining in a flash;
Can't you hear those thunders crash?
The lashing of the wind is strong;
Surely this won't last for long.

Rita Smitley thanks her many G-E friends for the floral contributions and expressions of condolence in the recent illness and death of her father. . . . Wanted—at Wren, Ohio, five dog houses for Red, Jay, Mac, Herm and Bufe. . . . Duana Fry reported seeing a robin on the morning of March 3, so spring must be just around the corner. . . . If anyone notices that big smile of Lohnas McIntosh's it's because of the new Packard. . . . The reason for calling Forest Roop, Jake Keller's wonder boy, is because he is always wondering where he is going to work from one minute to the next. . . . Here's hoping that everyone who wanted tickets to the sectional tourney got them because Jay Moser says he couldn't even sell all of his. How about that, Jay, or was it that those tickets belonged to some of the boys down the line? Jay says he didn't know women were so gullible. . . . Anyone interested in taking up the art of chewing tobacco see Chet McIntosh for all the details. As we get it, he's a past master.

Paul Armstrong and Ray Bowers, winning permanent possession of the burlap bags as the skunk trophy, made a new one—a cute little baby bottle and nipple with an orchid bow. . . . Bill Johnson and Dewey Erne were the first winners. It took Bill's fancy that he says he is going to keep it, so Paul brought another trophy for Bill. Bill said it really belonged to Paul and gave it back to him. . . . Jack Pollock, who has been on a diet for some time, now thinks he is eligible to write a testimonial on the virtues of graham crackers. After hearing Jack talk, one would think he could write a good one. . . . Monday morning on his way to work Lyle Claphan was approaching No. 7 fire house when a truck rolled out to answer an alarm. Paul Boedeker, who was waiting on Lyle, said it was a sight to see Lyle dodge that truck. . . . Last week Bob Hendrickson received a special delivery letter from one of our former coworkers Ray Matthews, reminding him that Monroeville was out of the running. But Bob said he had suffered a case of amnesia and that he didn't know what the tournament was. . . . Ward Staley and Noland Myers now have possession of the trophy in the tool crib by virtue of two skunks in one day. . . . Happy birthday to Russel Deveny and Henry Bradfield.

Latest hunting reports indicate that more birds and animals have been shot than hunters.

Basketball is still the chief topic of conversation even though some favorites are out of the running. To the remaining teams, good luck, and Bill Hurtt says especially Auburn. . . . Mary Ohlwine was surprised (we hope) on Thursday with a potluck in honor of her birthday. The usual array of good things were over-eaten and everyone had a very good time. . . . Norbert Losc has been searching for a competent psychiatrist to explain the reason of his son Danny's actions when playing the role of Roy Rogers or Gene Autry. It seems that Don Kruse, to Danny, is always the villain, true to fiction Norb tells us. Danny, the three-year-old gun-totin' hero, draws both six irons and plugs Kruse. Norb asks why does he shoot poor Mr. Kruse in the head—dead. This is the probable answer to the question. Danny is merely satisfying the score with Kruse for all those articles here in the news about his Dad. . . . Les Stauch is becoming quite a linguist in the appreciation of his own car. Spring is soon in the air, St. Petersburg is not too far distant. Les wants to have a new car for the trip, so anyone who hasn't a car in the test section is receiving all the merits of owning a used car from Les. . . . Speaking of cars, Carl Hattendorf hasn't found his title for his Buick he bought last summer. The State lost it, however, he didn't convince the luncheon group of Noll, Beeth, Seymour and Mellinger plus two other chowhounds of distinction that he actually bought the car, or owns the car, or—there was an ugly thought tossed into the discussion as to how he did get the car. Nevertheless he can't sell it, that much was agreed upon. . . . George Fann and Don Kruse (Note: Kruse has a guest editor this week to do his reporting, and to borrow ties from), back to subject again. These two guys have birthdays the same day Monday last. Now can you imagine a man who would; well Kruse made a trip to his birthplace at Tiffin to ask his mother the hour of his birth. While George is still making inquiries, Kruse is talking about his youth. . . . Harold Drage usually gets the majority of new T. E.'s on their arrivel to read meters for him. The other day one of the regular testers borrowed (a word usually referred to as "took" when tester is using), a meter out of the test on Drage's bench. Imagine the surprise of Harold's face when the T. E. closed the switch as Harold yelled "read, read" and the T. E. said "I haven't anything to read, meter or magazine!" . . . Just to vary the monotony of always riding all the way to work, D. H. Hanson and E. A. Linke decided (?) to park Mr. Linke's car by the roadside and walk to town. After entering town they were picked up by a public official who brought them to Broadway and Washington streets, from where they again took up the exhilarating exercise of walking!

Sleuthing

We're all looking forward to spring and a new outlook on life. But many of us who have spring fever just couldn't wait, so we bought new hats and had new hairdos. . . . Paul Berghorn, one of the male spring fever victims, bought a new sun lamp. Being just a little over enthusiastic, he forgot that it was only a sun lamp and not really "Ole Sol"; thus the very red face on Monday morning. . . . Ernie Linke now answers to the name of "Jail-bird Linke." No doubt, another spring fever victim. He forgot to put his '49 license plates on that brilliant green car which is supposed to attract females, but instead attracted a state trooper. So, Ernie was forced to stop his car and lock up and walk to work March 1. . . . Wally Clayton of the DC Division is the undisputed long-winded telephone champ and wishes to challenge the champ in the Dev. Section to outdo his record. . . . ATTENTION! C. M. Leitch, who picks a mean banjo, says he has the best round and square dance band in the country. His band is well known as the "Kendallville Rhythmaires" and is currently playing at the Eagles Lodge in Kendallville. . . . Forry Carlson bought a new bowling ball to start a new bowling career. Have your scores improved, Forry? . . . Eileen Jacobus left last Friday, Mar. 4. The Section secretaries honored her with a farewell luncheon and gave her a lovely silver platter. The girls in the AC Division surprised her with a potluck lunch and gave her a silver candy dish. Late Friday afternoon the A.C. Div. presented her with a G-E Mixer. We shall miss you, Eileen, but wish you much happiness in your new occupation. . . . Wilma Kirby, formerly of the DC Division, is now the new Section secretary for the AC Division. . . . George Kline has come up with a suggestion for tiding oneself over that "morning after" feeling or the "mid-afternoon lunch" slump. "Raise one foot from the floor about an inch and hold it there. After a minute or two, the exertion will be equivalent to a brisk run around the block. Your heart will pound with a vigor that will be sure to arouse you. When you finally lower your foot, a surge of energy is released with nothing more to do than keep you awake. If drowsiness persists repeat as necessary." . . . P. O. Noble, engineer and poet, has returned to "Sunny Indiana" after a business trip in California. . . . Betty French has returned to Bldg. 4-6 after a very interesting trip to New Orleans and the Mardi Gras. Quite a place, right, Betty? . . . We are sorry to see Marilyn Zonker, Joan Garringer, and Helen Brosche leave Bldg. 4-6, but we wish you all good luck.

Personality of the Week

We wish to introduce to you, Ray Hupp, an engineer in the Development Div. in Bldg. 4-6. Ray spent his boyhood days in Centralia, Ill. He graduated from the University of Illinois and has been employed by General Electric for a number of years. At one time, Ray was an instructor in the General Electric Apprentice School, and at present is teaching a night course at Purdue Extension. He is very active in AIEE and is a past president of the Fort Wayne Radio Club.

His main hobbies are photography and amateur radio in which he has participated for the past 20 years. His radio call number is W9CLF. He is also somewhat of a farmer and owns a small farm near Fort Wayne.

Mr. Hupp is married and resides at 2117 Brooklyn Ave. That's not all—he has a 21 year old son, Arthur, who is now a junior in the Electrical Engineering School at Purdue University. Like his father, Arthur, is also a radio amateur enthusiast and also has a call nummer, his being 9JLT. We have heard that instead of writing letters, father and son correspond by radio. Not a bad idea!

Three Join Quarter Century Club

John H. Breese
Bldg. 4-2

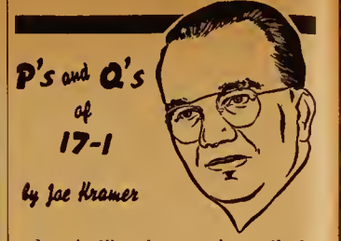
Maurice L. Sordelet
Bldg. 19-4

Harold Stirlen
Bldg. 20-1

We are now in the Holy Season of Lent; a time given to us to do penance for all our wrong doings. . . . Mrs. Steve Bobay, did you know that your better half won $25 last week? Mrs. Bobay, we don't charge for this information either, course a small donation might be nice. . . . Bob Pickett is now Dr. Robert Pickett; he treats stiff joints, lumbago, room-a-tism, etc. For reference Carly Junk's experience was that he just came in with a stiff neck after treatment by Dr. Pickett—no feeling at all just stiff all over. . . . Fritz Rudusky goes to Ohio to buy his gas because it's cheaper over there, but his old jallopy uses so much that he really doesn't save a cent. Fritz says it's just the principle of the thing. . . . Did Robert Thain lose his razor or is he planning to play with the House of David ball team this year? . . . We are happy to hear that Jake Arnold, Lloyd Cowell and Harold Sorg have left the hospital. Get well soon, fellows, we miss you. . . . Birthday greetings to Clarence Coulter, who had a birthday March 7, Willis Breese and Esther Shannon, March 8, and to Loretta Gerardot whose birthday is Sunday the good old 13th. . . . Carol Snyder has left to go into nurse's training. Sorry to see you leave, Carol. Serving humanity, Carol, is a very worthwhile ambition, and we wish you the best of everything.

Insulation News

The old school spirits came back to haunt two sectional fans in Bldg. 12-B last week. We've all heard of "seeing red," but Dorothy Baumgartner could see nothing but green during the sectionals. She was cheering full speed ahead for South Side, while Bill Hattendorf sat calmly aside and kept his faith in Central's Tigers. All we can say is that it wasn't Dorothy's fault her alma mater didn't come out on top. . . . A big, hearty welcome is extended to Bob Martin, who joined the Wire and Insulation gang recently. . . . Estella Morrolf and George Wirges are on the sick list.



FLOOR LORE FROM 4-4

By Voyce Brumbaugh

Since the basketball tournaments have been going on, we find it necessary to keep our billfolds open. Margaret Parisot has taken so many chances on the teams that she has her tickets filed alphabetically. . . . As Marie Hummel was coming to work last week she noticed several persons staring at her and many wolf-calls, but was unaware they were directed at her. Finally, after reaching the elevator, she realized what it was all about. That morning Marie had forgotten to change from her blue satin bedroom slippers to her regular work shoes. . . . Neil McNamara was having trouble locating his wife last week. He was to meet her in front of Bldg. 18 at 3:30. He was there—and so was she. Neil didn't know it though until he walked into the side of the car. Just what was across the street you were looking at, Neil? . . . Mildred Hoover's son, Pvt. Richard Jones, left Sunday for two years duty overseas with the 101st Airbourne Division. . . . We extend our deepest sympathy to Dal Smith and Cec Onion, two great Central fans. I am sure they will join the rest of us now in wishing Auburn lots of good luck. . . . That happy look on Leon Rademaker's face the past week is because he had a long-distance phone call from his son, who has arrived in the States after spending two years in China with the Marines. . . . Guess that's all for this week, folks.

By the time you are reading this column, our Red Cross Drive will have been completed. Thanks to all who helped make the drive a success, and especially I wish to thank the solicitors who helped me to sell Red Cross to the Personnel Division. They are Helen Rose, Minnie Fryback, Charley Sawyer, Clara Linderman and Hazel O'Brien. I'm sure the satisfaction you received from doing a little bit more than your share to promote neighborliness will repay you again and again through the coming year when you will see what your efforts are doing for someone else. . . . Congratulations to Laureen Phillips Procise on the occasion of her wedding last week. We wish you all the happiness in the world, Laureen, and hope that Lady Luck is right at your heels all the time. . . . Doris Dreyer never drinks—her red nose can be explained by an empty Kleenex box and Virus X. It just couldn't be the weather. . . . Our very best wishes to Mr. Zook on his new assignment in Schenectady. Needless to say, we deeply regret his leaving the Personnel Division, but we're happy to learn of his advancement. Congratulations, Mr. Zook, and we hope all your experiences in your future work will be pleasant. . . . Irene (Bugs Bunny) Meyers wants her "two front teeth" to stay right where they are. They're about the only ones she has left since she visited her dentist the other day. We wish you a very speedy recovery, Irene, and hope to see you back to work soon. . . . Lois Miller decided since she couldn't manage to take a trip just now, she'd change the scenery by moving into a different apartment. Do you get a mountain view, or are you overlooking the sea, Lois? (probably the railroad and a couple of nice smokey factories). . . . Have you noticed that Gene Moss is only half-here lately? The other half is in the Employees' Store. Same with Bill Hartman. They have been helping out in the store during rush hours, and we must say the work (or music) agrees with them. . . . Goodbyes are no good when they come to a group such as I have known in the Personnel Division. So to the wonderful people I have met and worked with, I am sorry to leave your friendly, happy atmosphere, but of course it seems to me, it's the little things in life that count.

Love's like the measles—all the worse when it comes late in life. . . . In our estimation, President Truman chose the wrong time for Brotherhood Week. With the basketball tournaments being held in Fort Wayne, it left little room to practice brotherhood among the rooters of the teams. . . . Happy Sectional winners were Wally McKay, Joe Kramer and luckier than ever Leo Nyboer. . . . Betty Sue Morris will check phone numbers to be sure she is calling the right party. At least the two parties she got out of bed hope so. . . . It appears springtime was prematurely ushered in after seeing all the washed windows in Bldg. 17-1 along the Broadway side. . . . Cliff (Tidy) Combs, the financier of the South End, has really gone wild in spending money, that is, since he is a stockholder in one of the larger electrical companies of the country. In one day Cliff threw his money away and bought two penny boxes of matches. . . . Herb Kellmeier complains about being stiff all the time. Must be the interest he is showing in his son's occupation. . . . Famous Last Words: Helen Evanoff, "I'm not on a diet, I just lost two pounds." Agnes Cordes, "No, you can't put my name in the WORKS NEWS." Addie Masbaum, "I never do anything to get my name in the WORKS NEWS." . . . It is now a known fact that Argend Denney is not only a philosopher, but his talents lead to psychology. It seems Charlie Lauer's wife called and said for Charlie to eat the lunch he bought rather than come home at noon. But bosom pal Denney forgot (?) to tell Charlie. Denney says the sandwiches tasted pretty good. . . . We are glad to see Elizabeth Love back in the Inspection Room after her recent illness. Elizabeth says she has made a new resolution and she is going to have a smile for everyone. . . . Leonard Hutson was another lucky winner in the Sectional Tourney. He has requested that no one break the good news to his wife. We won't tell a soul. . . . With the new look in dresses it means the return of the old-fashioned dance steps—Castle Walk and those romantic dances. Our Helene (Dancing Girl) Evanoff says the cheek to cheek dancing hasn't stopped. . . . Another one of those signs that spring is just around the corner was Clarence Doctor's report of a broken tractor. Wheels certainly are hard to repair at times, Doc? . . . Robert Shaefer is a newcomer on the grinder in the Tool Room. The new man on the lathe is Delvia Strickler. . . . No, kiddies, that was no bogey man on page 3 of last week's WORKS NEWS. It was Carl Reiter, our former Cost Supervisor. If the paper cares to run another picture of Carl, we suggest they see Wally McKay.

M. B. A. SICK LIST

Grace Bedsworth, William Berning, Sophia Bodigan, Jeanette Burkhart, Ernest Bultemeyer, Helen Brindle, Bob Coen, Rogerio Del Gado, Evelyn Daugherty, Paul Dunfee, Walter Esterline, Jacob Fulmer, Vera Fetro, Shirley Fisher, Fred Gerhard, Dorothy Goshorn, Marie Griffin, Fern Hartman, Della Haslup, Lavon Hilgeman, Tinafaye Jordon, Irene Kreger, Lela Kittredge, Margaret Knoll, Paul Lichtsinn, Charles McCormick, Mary Mann, Lois Miller, Gertrude Martin, Jean Pappert, Julian Stazack, Clarence Stove, Howard Schultz, Henry Tucker, Cletus Ternet, William Teagarden, Rosezella Turner, James C. Vevia, Malinda C. Waher, Florence Weimer, Gladys Walter, George Wirges and Genevieve Zimmerman.

Left Hospital

Sophia Bodigan, William Jeffries, Donald Comer, Lloyd Cowell, Harry Conners, Fred Gerhard, Josephine Matter, Harold Sorg, Mable Englert and Richard Fry.

Returned to Work

Helen Engle, Emery Tucker, Carlton Towns, Alma Merwin, Loraine Schubert, Rosalyn Cameron, Frank Fisher, Walter Fritze, Dorothy Dolin, Justine Heaston, Maric Dunfee, Elizabeth Love, Dolores Soule, Louise Perry, Robert E. Thomas, Clarence Russell, Ruby Minton, Ruth Stone, Paul Breimeier, Leonard Bresler, Charlotte Brunner, Madonna Kilgus, Donna Smith, Carlton Towns and Irene Kleber.

We all wish Wilbur Sundheimer, our test engineer, luck in his new duties at Pittsfield. . . . We feel sorry for "Tex" Sloan. He tried everything to make his luck change and it did no good. Now he is on his last straw, and is carrying a rabbit's foot in his pocket. Tex says if that doesn't help, he's going to give up. . . . Our second shift reporter "Braunie" has decided that she will be more careful the way she answers the phone. She found that it isn't always a girl friend who answers her with "Yes, dear." . . . Marcella Goyer lost her shoes one morning, and she says she knew that she had left them in just a certain place the night before. After she had looked she asked her mother where they were. Her mother replied, "What is the matter with the ones you have on." . . . Happy birthday to Vernea Morgan, Dorothy Richards, Iris Hebble and Blanche Mulligan. . . . By the way, don't you think that Blanche looks very chic with her new hair-cut? The barber was none other than Lois Burry. We think you really did a swell job, Lois. . . . Is Dorothy Richards trying to tell us a secret by signing her valentine to Gloria Tudor as "June Bride?" . . . Ray Hills plans on moving into his new house this week-end and is very excited. We don't blame you, Ray. . . . Emma Vaughn is leaving for Atlantic City the first of the week, and Norm Wolf wanted to know if she was coming back as "Miss America." We do hope that you do have a wonderful time even if you don't enter the tryouts. . . . Congratulations to John Roose who became the proud papa of a new baby girl named Gloria Jean. She weighed almost 9 pounds. . . .We are glad to see Nellie Williams back, and do hope that you are feeling swell, Nellie. . . . We also want to tell Dona Smith and Charlotte Brunner that it is nice to have them back to work. . . . Jessie Wass recently enjoyed a movie so much that she stayed to cry through it a second time. Brush those tears from your eyes, Jessie. . . . We wonder if Ralph Fetters thought there were pink bunnies in Daisy Tannas' purse recently when he disengaged her "babushka" from the zipper in her purse. It seems that Daisy had heard of his proficiency at repairing jewelry and called for his assistance. . . . We'd like to know where Helen Orr got the idea that clipping a dog's tongue would keep her toenails from getting too long. . . . Tracey Bartle and Mae Morgan believe in getting their spring housecleaning done early. Thanks, gals, we appreciate the clean drinking fountain. . . . Nellie Biltz went to Winona Lake over the week-end. Except for a little car trouble, she reports that she had a wonderful time. . . . Norm Wolf was a spectator at the mixed doubles bowling tournament Saturday. He reports that it was better than a floor show. . . . While we're on the bowling subject, we hear that the girls really did all right and that they all had a lot of fun. . . . Ethel Koontz bowled at Bluffton over the week-end, and she, too, was pleased with her results. . . . Roy Orr found out the hard way last Tuesday that when they said February 28 is the last day for old license plates, they meant it. . . . We hear that Dale Spieth has a fondness for odd combinations of food. It seems that he had quite an adequate amount of those foods the other day.

M. Alma Dodane Dies Last Week

M. Alma Dodane died after a short illness at 10 p.m. Friday at her home, 420 E. DeWald St. She was employed by General Electric in 1942 as a multiple spindle operator, and later became an assembler in Bldg. 2-2. At the time of her retirement in 1948, Miss Dodane was an assembler at the Taylor St. plant. She was a member of St. Patrick's Catholic Church.

Surviving are her mother, Mrs. Peter F. Dodane; seven sisters: Mrs. Isabel Smith, Sister Margaret Loyola, of Chelsey, Mass.; Mrs. Eugena Oddou, of Rome City; Mrs. Michael Burns; Mrs. Charles D. Wolverton, of New London, Conn.; Mrs. A. R. Oestricher, of Orlando, Fla., and Miss LaVonne A.; and, a brother, William.

Funeral services were held Tuesday at 9:30 a.m. at the Mungovan and Sons Mortuary, and at 10 a.m. at St. Patrick's Catholic Church, the Rt. Rev. Msgr. D. L. Monahan officiating. Burial was in the Catholic Cemetery.

Apprentice BROADCAST

By Myron Auer

First of all I must make several retractions. The one I regret most is the Auburn victory over my alma mater. Dick White was passing out hearty hand shakes to his fellow Auburneers early Monday morning. It was reported the city burned the street lights until midnight instead of the usual 10 p.m. shutdown. Congratulations, Auburn, you deserve to represent Fort Wayne at Muncie next Saturday. We wish you loads of good luck. Also Ronnell Allen toted a big smile which read $9. This kid must be a "silver ball" interpreter. Bob Barnes and Ron are two of a kind when it comes to this looking into the future stuff. Bob acquired a large sum also. . . . Art Braun is a river-bass salesman. In his spare time he is a fish slinger. If you care for fresh fish contact Art, he'll really fix you up. . . . If the lighting attachments on your machine is not satisfactory consult Cliff Bieber. He has a swell solution. (Good only for owls.) . . . During the week we had some visitors. The boys were B. O. Smith, John Marks and Don Hoffman. . . . In Indian language, "How" means hello or friendship to the redmen. Dick Wagner isn't an Indian so it must mean something different to him. "Howe" means tough luck and disappointment to Dick, also the whole of Kendallville. . . . Ward Staley isn't as happy as he used to be. Before the last class started, he was rated the fattest in the school. Everyone must give up the throne at sometime or another, Ward, so don't feel bad. . . . Are you troubled with mice? Paul "Mousey" Wuttke and his brilliant invention recently rocked the universe. Paul has the real thing this time—ask him to demonstrate it. . . . Howard "Hoe-Down" Morton was really pickin' 'em up and laying 'em down at the square dance at the club. He was stepping it off like a young play boy. While we are talking about Mort I might as well tell you about the fish he got. He hooked three (actually) over the week-end. His companion would pull up and take off a fish. Mort pulled up and put on more bait. Some got it and some haven't. . . . If you are interested in seeing a "cool-jewel," see Paul Mischo's new interpretation of a car. Some people doubt if it will ever run down hill. Paul usually takes three or four passengers along because he may need someone to help him carry it home. . . . This is the last week of this semester, fellows. Are all your spirits high? Or are they like your grades? I'm glad those exams are down the river, aren't you? Don't count your chicks before they hatch. We have one more semester before we celebrate all summer.

You Fellows Get A Lot Of Help . . .

. . . ON THIS SAFETY BUSINESS." This remark was made to a member of our Section when we were discussing some improvements in our accident record. This statement is certainly correct and will always be true where good safety records are maintained.

Roy Dierstein, Methods and Tool Engineer, Transformer Div. 91, in the above picture, represents a group which helps us a lot. Roy is displaying here the results of a change in punch press die design which eliminates the need for placing material in the press with pliers. It is fed in from the side mechanically which makes guarding easier and removes the operators' hands farther from the danger zone.

HERSCHEL L. SMITH
Safety Engineer

P. S. And we never see Roy in the Punch Press Section without his safety glasses.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Hello, again! There's not much to tell you this week; things are pretty quiet up here. The same old things happening, some people being ribbed until they are ready to do murder or mayhem. Then the next day it's someone else's turn, and so it goes on and on. . . . We have been toying with the idea of writing a life story of Frankie Enderle, but to date we haven't got beyond the material-gathering stage. Perhaps we'll never print it in the WORKS NEWS, since it is a publication with a high sense of moral values, but as a book that would be sure to be banned in Boston, it should make a hit. Some highlights: At the age of five, Frankie rode a mule to the mail box, a Missouri mule. You must remember that our scene is laid in Missouri. Took honors in school, although he didn't have any books, learned to wear shoes before he came to Fort Wayne. . . . George Wolfe, Commodore Wolfe from now on, attained that rank when he bought an outboard motor recently. George purchased it without his wife's knowledge, and said "My wife will probably jerk my head off" when he got it. Wolfe is commanding the Waldron Lake Yacht Club. A regatta will be held this summer, doubtless. . . . Here's the answer to that proud look on Luella Boyce's face. It was her son Jerry who made the final basket, bringing victory to his school in the CYO basketball tournament.. . . . Congratulations to the Robert Lauers on the new addition to the family—a little collie pup. Bob takes a day off now and then, since the new arrival. We're wondering if he's home playing nursemaid for the pup. In case he gets the colic. . . . Clyde Musser, Ernie Almandinger, "Dew Boy" McDowell and Steve Morrell are the barber shop quartet of Bldg. 19-2. The boys may not have the quality, but the volume is excellent. They are open for all engagements, weddings, parties or what-have-you. Their theme song is "I Wish I Was Single Again." . . . Al Johnson and John Winstrel are attending the Moose bowling tournament at Indianapolis. . . . George March is sporting a new corn cob pipe. . . . We never get too old to learn—cleaning your false teeth with the air hose, by Bill Hoke.

Elex Club To Sponsor Spring Bingo Mar. 18

Elex Club will hold its Spring Bingo Friday, March 18, at the G-E Club gymnasium, starting at 8:30 p.m. Tickets for the evening are 35 cents each, and none will be sold at the door.

Hilda Walda is chairman of the Bingo, and her committee consists of Olive Walters, Helen White, Helen Miller, Mable Miller, Mary Leiter, Thelma Stone, Loretta Bloom, Eva Tucker, Peggy Turschman, Loraine VonBehren, Clara Gidley, Betty Garber, Josephine Eme, Jo Alles, Wilma Williams and Gladys McMillan.

As an added feature of the bingo, a candy and bake sale will be held, with the Partizan Chapter in charge.

BROADWAY STORE HOURS
12 noon to 4 p.m. daily

TAYLOR ST. STORE HOURS
1 p.m. to 4 p.m. daily

The following merchandise is available for immediate sale:

Attic Fans
Automatic Blankets, single and dual control.
Foot Warmers

Portable Radios
Radios, Table Models
Clock Radios
Occasional Clocks
Alarm Clocks
Stainless Steel Sinks
Fluorescent Fixtures
Chime Clocks
Wire and Wiring Devices
Paints, Colors
Coffee Makers
Flashlights
Hotplates
Interval Timers
Waffle Irons
Grills

The Ides of March are with us. We lived through the lion-like appearance of the month, to be confronted with a bevy of solicitors for the American Red Cross membership drive. To those of us who have been interested in Red Cross work for many years the giving is a pleasure. From some others we hear: "We haven't had an emergency since the 1913 flood." "We will never have a tornado—they never hit where three rivers meet" and from some returned servicemen "The Red Cross did not give this, that or the other." To that—let me remind them The Red Cross was under Military Command and were told where to go and what to sell and what to give. It is true errors were made—because those executing the commands were human beings the same as the soldier and sailor. (Far be it from me to remind anyone of the errors made by the Administration.) Sixty percent of the proceeds of this drive will remain in Allen County—you can make a check on the activities of the local Chapter anytime. The 40 percent is turned over to the National Organization, and our papers carry a story almost daily showing the extent of their work. If you have not given do it now—if you have—there isn't a law against you going back to give the solicitor more. It isn't so much meeting the quota as it is—meeting the emergency when it comes. . . . Last week when V. J. Tuttle was feted on his retiring day, we noticed three familiar faces back in Bldg. 18. They were none other than the "three golfeteers" i.e. Charlie Johnson, Billy Wehrs and "Toppy" Moffet, paying tribute to their former Motor-Generator associate. . . . We are happy to have Minta Cole back to work after her recent fall. . . . Speaking of falls; wanted one bodyguard for Mae Lacey, (you will remember her as the girl who was locked in the Bldg. 18-1 vault). Well, she is still in her bad luck streak. Her latest was to come to a sudden-sliding stop on the floor of the Van Orman Coffee Shop which proved very embarrassing. Perhaps we should not mention how she acquired the nickname of "Perfect Circle" but we will—she made the error of sitting in wet paint! What a gal and what next will happen! . . . Jeanne Grant, Bldg. 18-4, believes in conservation. Her nylons have been "running in every direction," so to solve the problem she has resorted to bobby-socks in spite of the lower temperature. . . . Bldg. 18 really has jumped the gun on this spring house cleaning business—moving around, newly painted walls, clean shades, windows washed and the removal of the 20-year-old mail elevator. . . . This wonderful weather makes us all a bit lazy, so we seem to be short of news. Volunteer scouts would be welcome. . . . Clarice Craighead returned to Bldg. 18-4, a happy bride, to tell us about the intricacies of housekeeping. . . . Nila Hansen, Bldg. 18-1, was in Auburn Saturday night to not only help celebrate the winning of the tournament, but staging a celebration all her own for being "auntie" for the first time. . . . Julia Waldrop, Bldg. 18-1, celebrated her birthday last week with cake, gifts 'n everything. . . . Horace Heidt was the attraction for several of the payroll girls. . . . We would like to tell you about Hazel O'Brien in Bldg. 18-B, but she is always very mum about her doings. Just wait until the fishing season then she will talk. We do understand she is an expert in the line of baking cakes, rolls and pies—but wouldn't know because we have not had a sample!

Last Thursday evening Melvin "Rex" Recht, his wife and children were sitting at the supper table, when Rex's wife asked him if he smelled gas. He told her that he did, and then he looked at the stove and noticed that the pilot light was out. He got a match to relight it. When he struck the match, the gas exploded, and fire went all over the kitchen. Rex yelled at his wife to get the children out of the house and take them to the neighbors. Rex called the fire department, and then tried to put the fire out himself while waiting. He was throwing water right and left, when he happened to look out of the window and noticed his wife running back toward the house. Rex thought to himself, "Now there is a wife that sure is thoughtful, she's coming back to see if I'm all right and to help me." His wife ran into the house and grabbed the dog and right back out. What a letdown for Rex, now he doesn't know if she cares more for the dog or him. But laying all jokes aside, she probably knew that you could save yourself, so don't feel too bad. Rex had the fire completely out by the time the fire department got there. . . . The bowling tournament held last Saturday afternoon was a huge success and everyone seems to want another real soon. Jackie Elder and Hugh Neeley came in fourth, and there's been no living with them this week. Biff Long and Ceal Romary won first place; Bob Hosier and Kate O'Connor, second, and Moe and Willie Palmer won the Booby Prize. (From what I hear, I don't see how Moe even won booby prize). . . . Virginia Johnson had a birthday party for her daughter last week. Ginny says it was a lot of fun planning for it, but just lots more fun being there and playing games with the kids. . . . It seems that Fred Young talked out of turn last Saturday after Auburn won the Regional Crown. He said that he would take any kids who wanted to go to Muncie tomorrow and he really got a car full in a hurry. Now the thing that puzzles us is how much is he going to charge them. Maybe riding a bus would be cheaper, kids. . . . Happy birthday to John Lee. We hear that he received two snakes as a gift (candy snakes that is). . . . We have finally got something on Ralph Keller and his Buick. He must have thought he was driving a Jeep or his Whippet last Saturday, as he decided to take a drive through the woods. Naturally he got stuck. We don't know how he got out, but sorta imagine that he had to get the Whippet to do it. Ralph, you should know that those Buicks are made to stay on the road. . . . Congratulations to Leona Cook, a former co-worker, who has just become a proud grandmother. . . .Catherine Chilcote has taken up bowling. She likes the game so well that she is saving her pennies to buy a new bowling ball. If you contact some of the people who bowled in the tournament last Saturday you might be able to buy one real cheap, Cathy. . . . Clarabelle Castle has been transferred to the lead section. She says that she is real happy with her new job. . . . Eddie Bandt was a welcome visitor last Friday, and we hope that it won't be too long before you are back with us, Ed. . . . Oral Emrick made the 6-7-10 split last Friday bowling, and that's the reason for all those smiles this week. . . . But poor Marguerite Stahl wasn't flashing any smiles, as she says she sure felt bad to think that her team, Lancaster Township, lost their regional game.

Today winds up the Red Cross drive, folks, so if you're one of those last minute fellows, 'ya better start makin' with the hands for that money bag. . . . Glad to see some of our old friends back in the shop. Yes, that goes for you too, Dave Mumma. . . . Have you noticed the fuzz on Abe Martin's upper lip lately? For three weeks he's been trying to grow a mustache like Johnny Birchmeyers' and the results are pathetic. It only took Johnny three days to develop his cookie-duster, Abe. . . . Things were getting pretty hot for Chris Baade when the seat of his pants caught fire. Didn't bother him a bit though, he just let the smoke roll—must be that he wears asbestos un'erwear. . . . The $64 question: Is there more than one Jay Greer in our fair city? . . . Sammy Henry was pleased as punch with that picture he received of himself in the mail the other day. All done up in a gold frame with 9 cents postage paid too. . . . Happy birthday to Gerald Scott, even if we are just a little late. . . . How come Ray Quinn isn't doing any bragging about his basketball teams lately? Could it be that Bill Schible has cooled him off a bit? ('Fraid so, Ray.) . . . We welcome Walter Yopst back to Plant Engineering after having spent several years in DeKalb. . . . Did you happen to see the tiny calculator Bill Altekruse had up here last week. It dates back to the days of J. J. Woods, let's say when the G-E was still The Fort Wayne Electrical Works or better known as "The Lights."

There seem to be too many fat people around. A word to the wide is sufficient.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, March 14, 1949

LOST AND FOUND

LOST—Pair shell rimmed glasses, brown rims with flecks.

LOST—Westclock wrist watch with spring band. Left in Bldg. 4-4 men's wash room.

LOST—Two rings. One birthday ring, gold with topaz set; and one gold ring with five diamonds. Lost on Broadway. Reward offered.

LOST—Brown leather billfold containing driver's license, foreman's card with name Paul Hapner on them, and about $3 in cash.

LOST—A green and pink changeable covered button. Lost between Broadway and Bldg. 20-2.

FOUND—Pair shell rimmed glasses. Found on east dock of Bldg. 6.

FOUND—Grey covered cloth button by Bldg. 18.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

Want to buy a 1942 Dodge? Excellent condition! It could use a new right fender and, well, it might even need a new left fender, but other than that, it's in fine condition. Has never given owner any trouble. Never fails to get you where you want to go and back again. Of course, it might take you until 9:17 to get to work, but who cares about a little thing like that? Incidentally, this wonderful little car has a NEW gas pump! It was replaced just last Friday morning. See Vera Kilian if interested. After last Friday morning, you might get this 1942 Dodge very, very cheap! . . . Happy birthday to George Sowles. The Service Bureau surprised him with a brown and yellow sport shirt. . . . It was "so long" to Phil Singleton last week. Phil is now in the Works Contributing and Service Divisions. We know you'll like your new job and the new friends you'll make in Bldg. 18, but come back to Bldg. 26-2 and see us often. . . . The Service Bureau is on the move again. Louise Klinker is now working in the Ballast Engineering Division, and Ginny Harris has moved in to take Louise's place. Bob Walters is running the gelatine duplicator replacing Ginny. . . . It's a beauty! It's a honey! It's on Thelma Schmidt's third finger left hand. The lucky man is Gordon Schwab. . . . See Hank Lantz if you are interested in raising parrots. He is the only one in the Transformer Drafting Section who can get two parrots on one nest! . . . Everyone is glad to see that smiling face back with us. You're asking who? None other than Bob Thomas. Bob still tires easily, but he said his billfold was as bare as Mother Hubbard's cupboard. Yes, Bob, we all understand just what you mean! . . . The Service Bureau looks like Duffy's Tavern lately. Oh no, not bottles, just cards—all sizes. It was no small task to play with the little deck of cards that Solona Hunter has. George Sowles became disgusted trying to keep track of the small cards and brought a regular size deck. Now things are in full swing every noon. So far it seems that Ginny Harris and Roedean Dowell are beating George and Solona. Don't worry, George, perhaps you can get even a larger deck! Someone surely makes the king size! Everything else on the market has a king or giant size. King size cigarettes, giant tube dental cream and the giant size box of soap flakes.

Speeds of electric motors range from 120,000 revolutions a minute to as low as a single r.p.m. or stall.

MARCH 14 THROUGH MARCH 18

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.

Harvard Beets	

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

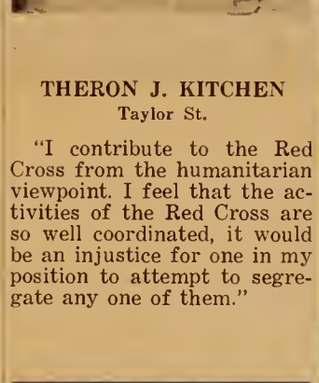
Special dinners and parties arranged upon request.

Menus Subject to Change

Have any of you noticed that super corn cob pipe Clarence Watterson is sporting. It seems that he and the Missus were dining out last Saturday evening. In the course of events his wife spied some potato chips; and asked Clarence to get her a bag. While making this purchase he spied said pipe. It had a strong appeal, so he bought it. Of course, it was not what the well-dressed gentleman would smoke, but nevertheless he managed to retain his dignity, corn cob pipe and all. . . . John Weber decided to give his "Throw Rod Eight" a general overhaul. He tore the car all down and proceeded to replace the worn parts, but in doing so became very confused. He was at a total loss as what to do with all the gadgets he had purchased, so called in Herschel Foreman, thinking that he might straighten things out, but he did not know what the score was. At this writing the old clunker is still laying all over the garage floor. . . . The other day we were talking about the high price of clothing when Jim Workman spoke up and said, "Well, here is a sweater that I think I did not do so bad on. I have worn it every winter since I have been working at the G-E and that to be exact is 29 years." We all agreed that the old sweater still looked pretty good and suggested to him that it be placed in a quarter century club museum. . . . Herbert Sauerer, self-styled crow slaying champion was furious the other day after reading an article in the local press about a mysterious dynamite explosion that layed low more than 20,000 crows. He said, "Why just look at the fun I would have had bumping those black demons off." Herb, you cannot be in all sections of this country at the same time, so a lot of crows will not have the pleasure of enjoying your expert marksmanship. . . . Tomorrow a large group belonging to one of the local Masonic bodies will journey to Chicago to take in the "Icecapades." George Cowan was asked if he was going along, and he said that he was not as the returning train would not arrive back in Fort Wayne until 2:40 a.m. Sunday and that the loss of that much sleep would set him back a week. . . . The other evening Carl Christlieb got busy and buzzed up more than a cord of scrap wood. When asked what he was going to do with it, he was at a loss for an answer as he has an oil burning furnace and cannot possibly use the wood. If any of you are interested in purchasing a load of ready-cut kindling, contact Carl as you might get it at a bargain.

Inquiring Reporter

WHY DID YOU CONTRIBUTE TO THE RED CROSS, AND WHICH ACTIVITY IT SPONSORS DO YOU CONSIDER THE MOST IMPORTANT?



MARGARET REYNOLDS
Bldg. 26-3

"'Aid in Time of Disaster' I think is the most important activity of the Red Cross, and by my contribution I hope to help those grief-stricken people."

CHALMER STEELE
Bldg. 19-1

"I contribute to the Red Cross because I feel that is one way of putting the Golden Rule into practice. I consider the relief that is given any community in time of disaster a very important activitiy."

THERON J. KITCHEN
Taylor St.

"I contribute to the Red Cross from the humanitarian viewpoint. I feel that the activities of the Red Cross are so well coordinated, it would be an injustice for one in my position to attempt to segregate any one of them."

MARTHA KEOKUK
Taylor St.

"I contributed to the Red Cross as I believe they have done a remarkable job in time of disaster for many thousands of Americans. Their activities are many; for me to point out the most important one would be hard to do."

RICHARD C. SEBOLD
Bldg. 12-2

"I realize the great need for the Red Cross in disaster areas. The Red Cross Blood Banks which supply the needs of every community in our country is the most important activity of the Red Cross."

MOTOR and GENERATOR Static

Thought for the Week:
I would rather be able to appreciate things I cannot have than to have things I am not able to appreciate.

Have you been hearing strange sounds from Mr. Bohn's section in Bldg. 31-1? It sounds like a cross between the mating call of a moose and the wail of a siren. Don't be alarmed, it's just Portia Schaaf sneezing. . . . The floors at the G-E Club are rocking these days. Our avid square dance fan has been kicking up his heels and whirling the girls around. Joe Neal, you'd better take it easy. . . . We received this note from R. E. "Chuggy" Mungovan: "WORKS NEWS, Feb. 25, Item RE: Vic Blomenberg and myself. Neither Mr. Blomenberg nor I ever use the expletive 'heck,' and both he and I would deem it an honor to be considered brothers." . . . Congratulations to Mr. and Mrs. William Kaiser. They are proud parents of a baby girl, Sharon Elaine, born Saturday, Mar. 5, at the Methodist Hospital. Sharon and her mother, the former Vivian Kimmell of Bldg. 31-1, are doing fine, and we hope the father will recover. . . . Monroe "Junior" Brosius brought his baby son home last week. Junior kept himself well supplied with toys when he had only one son, now with two excuses for buying, his cup of joy should be overflowing. They have named the baby Reed Mahlon. . . . Belated congratulations to Mr. and Mrs. John Roger, parents of a baby girl born Feb. 10. Her name is Martha Jane. . . . Also belated congratulations for E. C. and Imo Foley, whose daughter and son-in-law presented them with a little granddaughter Feb. 13. Her parents named her Kay Ellen. . . . Elex members of Bldg. 31-1 who attended breakfast Saturday at the YWCA were Edith Canfield, Elva Plattor, Mary Banks, Anna Garrison, and Erna Eley. . . . Dick Hobson, our handsome crooner, should receive a Boy Scout award for his good deed last Sunday. The Hobsons were at their cottage and Dick decided to try some fishing. Taking his rod and reel, he began casting. After casting a while without a strike, he heard a voice say, "Hey, buddy, how about helping push my car out of the mud." In spite of a rough exterior, Dick is really a helpful soul so he pushed until both the driver and his car were on solid ground. By this time it was too late for further fishing, so Mr. Hobson retired mumbling something to himself about "a couple more casts and I probably would have hooked something." . . . Here are a couple of guesses as to the new Mystery Melody. The Paramount Newsreel theme song—"The Eyes of The World Are On You" (or Upon You). Also—"The Eyes and Ears of The World Are On You. . . . FLASH—Division Editor loses pants. Perhaps this statement is a slight exaggeration, as Ed Foley did not lose his trousers in their entirety, just a large section. It all happened while Ed was checking some stock in Bldg. 19-B. He was worming his way between stock accumulations when suddenly there came a tearing sound and Ed felt a cold breeze. Ed was most embarrassed and concealed himself behind a stock pile until able to attract the attention of a passing workman whom he dispatched to the office for his overcoat. Properly concealed and protected from the cold, he made a hurried trip home, changed clothes and returned with the hope that no one would find out the truth. But as Shakespeare once wrote, "Vain hope."

We wish Clara Frede a happy birthday. . . . Dorothy McGowens came in to work this morning all smiles. Her son is home on leave from the Navy. . . . We wonder what Reggie Engeman was thinking of when she went home from work the other day? Thinking she got on an East Creighton bus (instead it was a State Street bus). That's all right, Reggie, it won't happen again because Dr. Soest is going to wait at the gate every day and see that you get on the right one. . . . The answer to last week's question that was asked in test is NO! I bet you testers and inspectors get out more and better work now that you can keep both eyes on your work. . . . Carl Harmon was so happy when he got to work last Monday morning that we are wondering if he got to keep the dog. . . . Say, Les Hubbartt, why do you carry your lunch? Is old age after you or has it got you? You still look young! . . . Birthday greetings to Edna Hergenrader, Warren Jackson, Ruth Tutwiler, Serena Slater, Ted Bain and Evelyn Petgen. . . . Evelyn Petgen celebrated her wedding anniversary last week, too. It was her third! . . . Here is a suggestion for "Skin Head" Bain to help ease those blushes—look around and see who is in listening range before you speak! . . . Evelyn Foulks visited us the other day. Sure was glad to see her. . . . Wonder when Bernie McCune, Eleanor Whitehouse and Lorinda Beyerlein are going to get a third interest in the Bon Ton. They buy enough bread, cake and cookies on sale to have an interest in the establishment! . . . Bonnie Bierley's husband, Jim, is planning on losing some weight so he can wear her slacks. The other night in his haste he grabbed a pair from the closet and tried to put them on when he discovered that he had hers! . . . Congratulations to Mabel Cryer Harding who had a baby recently. She used to work with us in Bldg. 19-5. . . . Juanita and Neal Shoppell had a boy and Ellen Gaff Knafel has a new boy, James Eugene. Both the mothers worked here in Bldg. 4-3 with us. Congratulations to you both. . . . Melba Flanders had a kink in her neck the other day, and Renna Zimmerman sure was trying to be helpful in getting it out. Hope it is OK by now! . . . Did you give to the Red Cross Drive? If not see your solicitor right away!

Some people find an advantage in enemies through blaming them for troubles they brought on themselves.

G-E Club To Sponsor "Old Timers' Night"

"Old Timers' Night," featuring games of volleyball and basketball, will be sponsored by the G-E Club Friday night, March 25, at 7:30 p.m. in the club gym. J. C. Duryee, Bldg. 4-6, has been named chairman of the event, another in the club's Family Night series.

A volleyball game between the Fort Wayne YMCA and the G-E All-Stars will be played from 7:30 p.m. to 8:15 p.m. The program will then feature a novelty basketball game between the Taylorettes and Motorettes. Members of the first team are "Penelope" Burnau, "Nicki" Hicks, "Henrietta" Nahrwald, "Becky" Dunlap, and "Clarissa" Liddy. The Motorettes lineup will include "Ola" Langenberg "Prunella" Farrel, "Hortense" McKee, "Elaine" Goodman and "Katie" Rowley.

The Old Timers' basketball game, between the Small Motor and West Side, will begin at 8:30 p.m.

The games will be presented for all club members, their families and friends.

We found out why Doris Salge acts as if she is in a cloud. Her brother was discharged from the Navy. . . . The co-workers of Reva Smith will miss her a lot since she has been transferred to Bldg. 26-3. Good luck on your new job, Reva. . . . We would all like to see Dean Lockwood wear a great big smile since his team won the regional. . . . Clara Cohagan has her new grandson. She says she could take it better than grandpa. He had to take time out. . . . Whatever it was that Frances Batzner told Rolly Fawcett last week, he must have been guilty of, because it took 15 minutes for his face to return to its normal color. . . . Easter has come around early for Henry Mueller. He has his basket at work already. . . . We think Tom Hildebrand will come through all right since he's a grandpa. . . . Frankie Schlatter claims he can't get his name in the WORKS NEWS unless he cracks a rib. . . . Max Kimball finally got his new car, a '36 Dodge. Someone lost a good bargain when he sold his '32 Chevy last weekend. . . . When Firebug Fultz starts a fire he means business. He ended up burning 30 acres instead of a little trash, which was his intention. He claims it took him and his neighbors until 5 o'clock to get the fire out. . . . Does someone happen to have a nylon blouse for Les Redding? . . . Marion Hardwick had a sample transformer in his hand and he scratched his finger. He said it was so bad the girls would have to call the service car to take him home, and he probably wouldn't be back to work in the afternoon. But he showed up anyway. He said his wife said it wasn't bad enough for him to stay home. . . . Marian Fawcett, Tubby Scheumann and Lois DeBolt are going to sewing classes to mend their ways. . . . We hear Phyllis Borkenstein is going to turn professional in her bowling. . . . Just call Eddie Murchland "useless." He will know the answer. . . . Louise Perry is back after being off work with a broken arm. . . . Congratulations to Juanita Bolyard Clay on the birth of a baby boy. She formerly was from the winding section. . . . Happy birthday to Emma Lytal. . . . Virginia Reed claims she can do the Charleston for 15 minutes, proving to the boys in the test section she isn't as old as they think. . . . Benny Keller's famous last words are "It's a beautiful day in Ossian." . . . Orie Cagnet is still replaying the Monroeville-Central game. . . . We also congratulate Mr. and Mrs. Al Reiman on the birth of a son.

Modern children are young people who like to run everything around the house—except errands.

FHP Motor Division 17 Office

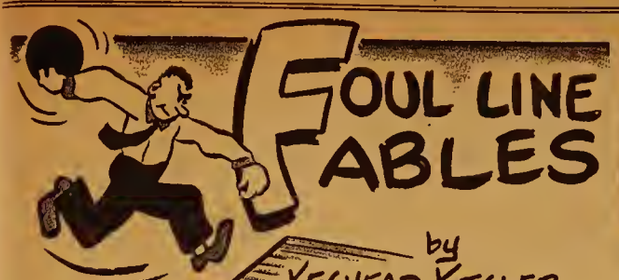
By Joan Aubrey

Now that it is beginning to look like spring all the city farmers in the office are getting the urge to get outside—Ben Fleek was saying he thought he would try planting some peas and lettuce over the week-end. . . . Gordon Smith has gotten 200 baby chicks for his farm (two acres). . . . Roy Rippe is going to keep the grass on his six acres trimmed the easy way. He has gotten some sheep to keep the grass nibbled off. . . . We were very sorry to say good-bye to Charlie Briggs who left us last week to go to Div. 15. . . . Happy birthday to Kenny Sheehan on March 7 and to Pat Dolan on March 11. May you both have many more. . . . Had you heard that Jack Angel (our mail boy) has been appointed a group leader in the mail room by A. R. Meyer? Jack, we are real proud of you. . . . Welcome to Dick Pinkham and Fred Hagadorn who have joined our little family from Div. 1. . . . Hugh Neely is real proud of the way he bowled in the mixed doubles tournament last Saturday with Jackie Elder. He and Jackie took fourth place. Congratulations, Hughie, keep it up and you may get off the bottom of "the list" yet. . . . By the way girls, don't forget your "Secret Pal" on St. Patrick's Day. That's about it for this week. See you later.

Minstrel Memories

Who said the "black face" fun shows went out with the Show Boat Days and the climax of Sophie Tucker's career? Last week there was one of the most stupendous productions this town has seen in years and brought to the footlights some local talent that will probably rise to the very top. Interlocutor James Oman and his end men gave out with the usual line of Minstrel Show jokes and "corn." The boys really gave their all to the songs from the "good old days."

We understand talent scouts are presently bidding for Mr. Gollmer's talents. Had Sophie Tucker known what Hank was doing to her song, "Some of These Days," she would wonder why she hadn't retired a long time before she did. Oscar Rodewald did his best to outshine Eddie Cantor with "Ida"; Gus Fortmeyer was in his best baritone voice with his rendition of "Asleep in the Deep," and Seaman Eggers sang that novel tune, "Boll that Possum Down."



The show will be repeated later in the spring at St. John's Lutheran hall.

In the front row, left to right, are Oscar Rodewald, Taylor St. Lab, and Seaman Eggers. In the back row: Gus Fortmeyer; Henry Gollmer, Taylor St.; James Oman, Bldg. 1-6; Paul Harmeyer, and Bill Irwin, Taylor St., Wire and Insulation Division.

ELEX PRESIDENT ANNOUNCES CLUB BOARD MEETINGS

Charlotte Stanford, President of Elex, has announced that there will be an Elex board meeting for the first shift members, Wednesday, March 16, at 7:30 p.m. in the Bldg. 8-2 Conference Room.

The second shift members will meet Wednesday, March 16, at 1:30 p.m. in the Conference Room, Bldg. 8-2. Rachel Fisher, Vice-President, will preside.

The boys in the Interdivision League really got warm this week, knocking out three 600 counts and twenty 200 scores. The Broadway Bread and Water team rolled a 1011 single game high with Paul Iannelly and Harold Spath showing the way with a 223 and 237 respectively.

The 600 scores were headed by Walt Buesking's 183, 226 and 222 for a 631 total. Others were Wayne Wiemer, 224, 191 and 213, 618 total and Paul Walker, 226, 180, 198 for a 604.

The rest of the 200 counts are as follows: Walt Seidel, 223; Jerry Saylor, 222; Frank Kopp, 212; Putman, 211; Junior Berning, 209; "Buckle" Mertz, 203; Paul Merkert, 202; Erv Haugk, 202; Herb Habig, 202; Murray Johnson, 201; "Adam Lazonga" Farrell, 201; Don Dimke, 201, and Erv France, 200.

We understand Walt Seidel will do anything for a nickel, as he clipped Carl Miller for a buffalo coin by shooting a 223 score right after rolling a couple of stinkers.

Small Motor League

Models and Production teams are still tied up for the league lead. Paul Walker came through with a 634 total on games of 222, ugh 164, ah 248, mmm 634.

Ty Cook felt better as he came up with his first 600 this year, a 614 on games of 192, 216 and 206.

Two hundred scores were rolled by Bob Walt, 232; Don "Shorty" Kaiser, 225; Ife Holmes, 219; Lowell Welker, 212; Erv Aumann, 210, and Walt Whonsettler, 201.

Masonic League

The Gavels and Ionic teams are deadlocked for the league lead with a record of 16 wins and eight defeats.

Archer snagged two 200 counts this week to lead the individual firing with a 223 and 200. Other 200's were Hoelle, 232; Cox, 224; Ed Crabill, 222; Manor, 215, and Willis Lautzenheiser, 203.

Office League

The Blueprint team is still out in front. Two hundred scores were rolled by Walt Nitz, 246; Vic Rump, 233, Frankie Schlink, 233; Paul Hattendorf, 213; Dick Hanson, 212; Bob Knepple, 211; Parks, 210; "Popeye" Patterson, 215 and 203; Don Waldrop, 204, and Miller, 201.

Ladies' Monday League

Vivian Fleckenstein came up with the high series for the evening with games of 189, 169 and 180 for a 538 total. Maxine Root had a 505 total on games of 154, 192 and 159.

Other high games were rolled by Frances Miller, 184; Octavia Popa, 173; Nellie Wendt, 171, and Helen Studler, 202.

Transformer League

Toys are leading the league with 10 wins and only two losses. Two hundred games were kegled by Feaser, 200; Rogers, 206; Hamilton, 207; Peterson, 212; Dowine, 219, and France, 220.

Bowling and Stuff

Pertaining to the annual G-E Employees tournament, we announce that the Sunday, April 17, will be scratched, due to Easter Sunday. Saturday, April 23, will be added for doubles and singles shooting with squads rolling at 1, 3, 5:30, and 7:30 p.m.

Five-man bowling will be on Saturdays, April 9 and 16, with squads at 3:30, 6:30, and 8:45 p.m.

Doubles and singles will be on Saturdays, April 9 and 16, with one squad at 1:30 p.m.; on Saturday, April 23, with squads at 1, 3, 5:30, and 7:30 p.m.; and Sunday, April 10 with squads at 1, 3, 5:30, and 7:30 p.m.

Don't forget to turn those entries in early and get those choice squads. Entries close April 2.

We understand that Biff Long and Ceal Romary won the Taylor St. Mixed Doubles Tournament held last Saturday. An aftermath of the tournament was the bowling lesson handed out by Tommy Williams and Charlotte Stanford. Without handicap they stuck "Moe" Satterwaite and Glen Stapleton for stickage. Glen would like to know if Moe has any good ideas.

The Brouwer Screwballs will bowl in the Scott Sweepstakes this Saturday.

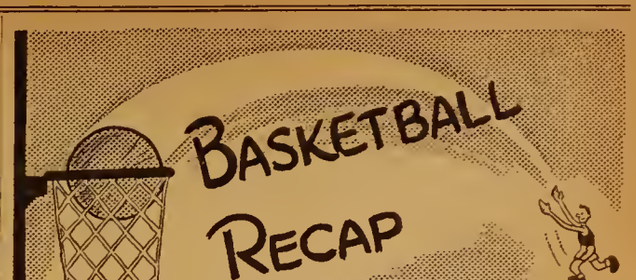
Some couples get along fine because the wife has a will of their own.

G-E Club Downs Two More Teams

WINS 12 GAMES IN INTER-CITY HOOP SERIES

The G-E Club basketball team has now stretched their winning streak to 12 in a row. Having won two games this week the Club defeated Roberts Truck Rental, 59-39. They then went ahead to down the G-E Firemen, 59-48.

The next games are Monday, Mar. 14, at 8 p.m. against St. Joe A.C. and Thursday, Mar. 17, at 9:30 p.m. at the G-E Club gym against Essex Wire.



Box Scores:

Roberts	G.	F.	T.	G-E Club	G.	F.	T.

Yesterday Lola McCague turned in her tools and wrote the last page of the book, "Twenty-five years with the General Electric Family." After the words, "The End" we will add "and well done." Your friends in Bldg. 17-3 will miss you, Lola, and we wish you the best of health to enjoy your retirement. Her co-workers had a farewell potluck dinner for her and gave her a gift. . . . Thelma Culler must have thought we were having a cold wave. She came to work all bundled up. She wore a suit skirt and also a dress. . . . Lola McCague is different. She was seen sitting on a wet cloth to keep cool. It just shows that no matter what the temperature is, not everyone is satisfied. . . . New faces on the early bird shift are Wilfred Myers, Miles Bryant, Robert Montgomery and Gene Aspy. . . . Last Friday Everett Souders came up to visit us. A former co-worker he is now a student at Manchester College in North Manchester. . . . Elsie Klemm has a right to smile. She has a new granddaughter. . . . Betty Pressler likes vinegar in bean soup, but the other night she seasoned her soup with pancake syrup by mistake. No wonder it didn't taste right. . . . Do you have any stray sewing machine parts around? If so, just give them to Dick Madden. . . . We noticed Walter Kryder was chewing gum for a change. . . . It's happy birthday to Willodene Hall, Geneva Farrell and Eileen Steinacker. A potluck was given for Eileen by Minnie McCague, Fern Monroe, Mary Zirkle, Violet Adams and Verna Bullerman. . . . Fern Monroe thinks she needs her glasses changed. Instead of sitting on a chair in the cafeteria, she sat on the floor. At least you can't fall off of the floor. . . . Glad to report that Geneva Curtis and Marge Ponsot have returned to work. . . . Sorry to hear that Agnes Brubaker has left us. . . . Harold Kiel must have had his last week's ad answered. He has a dog for sale.

With two more weeks of competition remaining in the Interdivision Basketball league, the race for top spot in the second half is very close. The Firemen and Squares have been neck and neck all the way. Each team possesses six wins and no losses. However, since they play this week, the tie will soon be broken.

Transformer with two games scheduled for this week won both by forfeit when Taylor St. and Tool and Die had only four men at game time.

Winter St. beat Small Motors, 48-37, to extend their winning streak to four in a row. The Firemen had just too much power for Taylor St. and dropped them, 61-25.

The Squares had plenty of trouble with the Apprentice Men in the first half of their game, but pulled away in the third period and won, 47-26.

Say, Loraine, is honey still for sale or did she already get sold? . . . Anyone wanting information about deep freeze, see either Dorothy Linsky or Ruth Freeland. . . . A few of us would like to know if the Wiehe's joined the office force or did they think we changed to daylight time already. . . . Say, Stucky, how's the diet? By the looks of the results you must be cheating somewhere. . . . Wayne Henderson, one of the engineers better known to us in the Sample Shop as "Oklahoma," was around the other day taking orders for fresh vegetables for this summer. He didn't say a word about raising any watermelons, and I think we should ask him why? . . . Last Tuesday the Sample Shop had a potluck, and Mr. Hobles took a bun. It was so hard he and Louie Miller had a little fun at playing catch. (Mr. Miller brought the buns for the lunch). Miller ducked just in time to let it rest on Blondie's lap so that ought to teach you a lesson, Miller, and the next time you better make sure they are soft before the lunch starts. . . . We hope Mr. and Mrs. Rollins liked their unusual gifts that we gave them. We had quite a laugh out of them but we meant it all in fun, kids. . . . We hear that Ralph Van Osdale had a boat in the Sportsman Show. Sorry, we didn't get to see it, Ralph. . . . Say, some of you fellows, I would like to hear some of those fish stories so I would have more to write about. So come on and give me the latest stories.

Judging by the talk he stirred up, maybe Alexander Graham Bell is the world's greatest man.

How Did We All Make Out in '48?

How Much Money Did We Take In and What Did We Do With It?

LAST YEAR, General Electric's thousands of customers took 1 billion 632 million 701 thousand dollars worth of our products. In addition, other income amounted to 18 million 858 thousand dollars, so total income was 1 billion 651 million 559 thousand dollars.

The income on General Electric products was at prices averaging for the year only 4% higher than in 1947 and only 37% higher than in 1940 . . . compared to an increase since 1940 of 95% in the prices of all manufactured goods . . . a 71% increase in the cost of living . . . and an 83% increase in the take-home of hourly employees at General Electric.

What did we do with this money?

1. How much did we have to pay out or set aside for materials, supplies and other aids to production and customer service?

To run our plants and for the materials out of which we built our products we paid other companies and suppliers *735 million 851 thousand dollars*. After setting aside an additional *38 million 273 thousand* for replacement of worn-out plant and equipment, we had left a balance of 877 million 435 thousand dollars.

2. How much did our payrolls take? (There are about 188,000 of us.)*

Out of what we had left after paying suppliers for materials and services needed to make our products, plus provision for replacement of equipment, our payrolls took a total of *610 million 330 thousand dollars* . . . leaving us a balance of 267 million 105 thousand dollars.

3. How much additional did we put into pensions, insurance and other employee benefits?

After paying others for materials needed to build our products and providing for worn-out equipment, and after paying our wages and salaries we also put aside an additional sum of *49 million 570 thousand dollars* for pensions, insurance and other employee benefits . . . leaving a balance of 217 million 535 thousand dollars.

4. How much did we have to set aside in taxes to support the Federal Government and its many projects at home and in other lands?

After taking care of materials, replacement of equipment, wages and salaries, pensions and insurance, social security and so forth, we set aside the sum of *93 million 700 thousand dollars* for Federal income taxes . . . leaving a profit of *123 million 835 thousand dollars*—what the company saved out of the money taken in.

5. How much of this profit did we feel had to be used for new equipment, stockpiling of materials, getting out of debt, and strengthening the company to give good values and keep jobs as safe as possible in the coming "buyers' market"?

After subtracting the items of materials, wages and salaries, pensions and benefits, and taxes—all of which are in the costs of operating our business—we felt we must "plow back" into our company for new equipment and materials and other strengthening investments the sum of *72 million 449 thousand dollars* . . . leaving a balance of 51 million 386 thousand dollars.

6. How much did we then have left to reward our 250,000 stockholders for risking their savings dollars to back up our plans and production?

General Electric—its people, jobs and products—exists only through the stockholders' willingness to exchange their money for a share of ownership. After we have paid out or provided for materials, replacements, wages and salaries, pensions and benefits, taxes and "plow back" money . . . our stockholders got this last sum remaining from our income—*51 million 386 thousand dollars*. But the individual stockholders will pay from 17% to 82% of these dividends to the government in taxes.

* All data in this report exclude the number of, and amounts earned by, employees on Nucleonics projects operated for the U. S. Government.

Compare How We All Made Out In '48 With How We Did The Year Before

	How Much More In '48?	1948	1947
Total Income	$304,015,000	$1,651,559,000	$1,347,544,000
Materials	141,082,000	774,124,000	633,042,000
Payrolls	98,739,000	610,330,000	511,591,000
Pensions and Benefits	6,756,000	49,570,000	42,814,000
Federal Taxes	28,902,000	93,700,000	64,798,000
"Plow-Back" Money	23,257,000	72,449,000	49,192,000
Dividends	5,279,000	51,386,000	46,107,000

Eifrid Receives Top Award Of $350 For His Suggestion

146 EMPLOYEES SHARE $2,041.50

Joseph Eifrid, a machine operator in FHP Motor Div. 17 at Taylor St., led the list of 146 suggestors announced this week. The list totaled $2,041.50. Mr. Eifrid's suggestion to improve methods of machining shafts for unit bearing motors earned him an award of $350.

Next on the list is Russell Kryder of Specialty Transformer Div. 91, who received a $180 award for his idea to salvage waste steel sheet. One hundred and five dollars went to Carl C. Clevenger, FHP Motor Div. 16, for his suggestion pertaining to grinding wheels.

(Continued on Page 4)

Joseph Eifrid, FHP Motor Div. 17, topped the suggestion list this week with his idea that brought an award amounting to $350. He suggested a way to improve methods of machining shafts for unit bearing motors. Receiving suggestion awards is nothing new for Mr. Eifrid. Since becoming an employee of the Company, he has submitted 124 suggestions of which 39 have been adopted with awards totaling $667. Pictured above are, left to right: Oscar Schelper, foreman; Ralph Dennison, Superintendent of FHP Motor Div. 17; Mr. Eifrid, and B. B. Gausepohl, General Foreman, looking over the application of Mr. Eifrid's suggestion.

Red Cross Drive Collects $9,859

A total of $9,859 was collected by 500 solicitors last week in the annual Red Cross Fund-Raising drive at the Broadway, Taylor St. and Winter St. plants.

The final report of total amount and percentage of quota reached by each division is as follows:

Motor and Gen. Div. ..... $1,007.27—92%
Winter St. ..... $800.00—89%
Fractional Horsepower Div. ..... $4,183—85%
Transformer Divisions ..... $1,450.15—76%
Works Service and Contributing Divisions ..... $2,418.58—76%

Solicitors that reported 100 percent participation included:

Marvelene Butts, Bldg. 2-2; Dorothy Askren, Bldg. 2-2; Don Myers, Bldg. 17-2; John Miles, Bldg. 17-1; Ernest Riley, Bldg. 17-1; Ray Stanger, Bldg. 17-1; Ruth Baker, Bldg. 17-4; Arnold Bowers, Taylor St.; B. R. McClure, Taylor St.; Richard Merchant, Taylor St.; Larry Rickert, Taylor St.; Noble Bell, Taylor St.; Ralph Dunfee, Taylor St.; Ann Rastetter, Bldg. 26-2; Ray Fisher, Taylor St.; Roger Pierson, Bldg. 20; George Welker, Bldg. 8-1; Vivian Bond, Bldg. 18-1; Roy Fields, Taylor St., and Loretta Gerardot, Taylor St.

W. C. Bock, engineering, and W. C. Guelzo, office, both at Winter St., reported that they had reached their goals, which were set by sections at the Winter St. plant.

Prices Reduced On Many G-E Products

Economies Made Possible By Extended Production Passed On To Consumers

This week the Company announced lower prices on many of its major lines of home appliances and construction materials. New models on several major consumer products are being introduced at prices substantially below those of the models they replace.

In making the announcement, President Charles E. Wilson called attention to a new, table-model, television receiver with a 10-inch tube priced at $239.95. Another example given by Mr. Wilson is a new automatic clothes washer which will sell at $70 below the model which has been in heavy demand for the last two years.

Mr. Wilson said that similar reductions had been made or were being made in store coolers, commercial refrigerators, and in construction materials such as building wire and wiring devices.

(Continued on Page 3)

Employees' Stores Close For Inventory

The Employees' Stores at the Broadway and Taylor St. plants will be closed Wednesday, March 30; Thursday, March 31, and Friday, April 1, for inventory. Both stores will be open for business, as usual, Monday, April 4.

W. H. Connor, H. R. Korte Appointed To New Positions

W. H. Connor

H. R. Korte

W. H. Connor has been named Manufacturing Engineer of the Specialty Transformer and Ballasts Divisions. At the same time, H. R. Korte was appointed Supervisor of Planning and Wage Rates. Both appointments become effective Monday, March 21.

Mr. Connor is a graduate of the University of Vermont with a B.S.M.E. degree. He entered the employ of the Company in 1936 as a test engineer at Schenectady. He then transferred to Fort Wayne with test assignments in the Motor and Generator Division and Plant Engineering.

Following the test course, he was assigned to the Plant Engineering Division and in 1938 became associated with the Motor and Generator Planning section. Mr. Connor

Elex Club Plans Easter Parties

An Easter Party for the Elex Club's day girls will be held Monday, April 4, at the G-E Club gym. Dinner will be served from 4:45 until 6 p.m., followed by a program.

Wednesday, April 6, the night girls will have their Easter Party at the YWCA with luncheon at 12 noon. Tickets for both parties are $1 and may be purchased from contact girls. Reservations must be in by Wednesday, March 30.

The Spring Bingo will be held tonight at the G-E Club gym, at 8:30 o'clock.

Apprentice Alumni Plan Theatre Party

The Apprentice Alumni Association will have a Civic Theatre party Wednesday, March 23, at 8:30 p.m. The play will be "The Hasty Heart" by John Patrick. Starring Harvey Cocks Collins and Cam Applegate, the production is a three-act comedy.

G-E Club Plans Sports Event For Family Night On March 25

A sports extravaganza guaranteed to give G-E Club members and their friends an evening of hardwood hilarity has been scheduled for Friday night, March 25, at 7:30 p.m. in the club gym.

Another in the G-E Club's Family Night series, the sports event is free to all club members, their families and friends. There will be no ticket distribution, according to J. C. Duryee, chairman.

The gala sports event will start at 7:30 p.m. with a thrilling volleyball game between the Fort Wayne YMCA and the G-E All-Stars. Following this game, a slapstick basketball game will be played by the Taylorettes and Motorettes. The Old Timers' basketball game, the stellar attraction of the evening, will feature the Small Motor and West Side teams.

Mapping plans, above, for the G-E Club's next Family Night are W. F. Weber, J. C. Duryee, C. W. Reynolds and Hubert Myers.

Company's Educational Fund Offers Scholarships, Loans

For many years the Company has helped its employees and their children to enter college and to continue their college educations by providing loans, scholarships, and fellowships to cover at least part of the expense involved.

The funds set aside for these fellowships were first made available in 1923, when the Charles A. Coffin Foundation was created in honor of the founder and first president of the Company. Income from this foundation was used to assist college graduates to continue with their studies and research work.

This plan was so successful that the Company decided to prepare a program which would give financial assistance to employees and their children in their undergraduate work. Over the years various types of assistance were made available, and in 1945 General Electric established the Educational Fund, with assets of a million dollars, in honor of two of its former presidents, Charles A. Coffin and Gerard Swope. This fund has made it possible for many high school graduates to continue their education in accredited colleges or universities and obtain their degrees or, in some cases, to continue their research work for graduate degrees.

Educational assistance is offered in two classes: (1) for undergraduate study, and (2) research fellowships for graduate students.

In addition to the Education Foundation, separate trusts provide for other scholarships and loans. These include the Charles P. Steinmetz Memorial Scholarships, Gerard Swope Loan Fund, and Richard H. Rice Memorial Scholarship.

Loans under the Education Foundation are granted in two ways: (1) to students, up to a maximum of $250 a year on which there will be an interest charge of 3 per cent a year on the unpaid balance after the recipient leaves school. No interest is payable for or during the years the recipient remains in school. (2) to parents of students, up to $300 a year with repayments to begin immediately by payroll deductions and be completed within 12 months at an interest rate of 3 per cent a year.

The deadline for application for these scholarships and loans is Friday, April 1. Application forms and further information may be secured from K. W. Michael, Assistant to the Supervisor of Personnel, Bldg. 8-2.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. Does keeping the door of an electric refrigerator open help keep the room cool?

A. No, not if it is a refrigerator of the usual type, which plugs into the electric outlet on the wall and has no plumbing connections. In such a refrigerator the mechanism takes heat energy from inside the box and gets rid of it by heating the surrounding air, so there is no cooling effect for the room as a whole. If the refrigerator has a water connection to carry the heat away, there would be some cooling of the room. This would also be the case where the refrigerator has no mechanism of its own but is supplied through pipes with refrigerant from some central location.

HUGH CRANE discusses Homeward Bound

NEW YORK—Home again, and — 's wonderful.

I suppose that any man—Greek, Argentine or Russian—"as homeward he his footsteps turns, from wandering in a foreign strand" feels elation and comfort. But for an American, something has been added. The superficial aspect of it is—no rations; no passports; no shadow of war across his door. More vaguely, it adds up to a feeling of freedom. But also there is the feeling of being a citizen of the most powerful, the most admired, and the most envied nation in the world today.

You may be tired of hearing of foreign doings, ways, and problems. But I want to make one more observation of what I saw and heard on my trip through Scandinavia last month.

Looking to America

The eyes of the world are on America today. You could see it, hear it, and get it through the pores all over Scandinavia. But while we were there we got the Paris Tribune and the London papers, and you could read it in and between the lines of those papers.

It is not simply that the United States is pouring out its wealth to put these countries back on their feet, (while Russia is sucking the blood of those countries it can reach and muddying the political waters of those it can't). It isn't just that "nobody shoots Santa Claus."

Want To Speak "American"

It is chiefly that "America"—meaning the United States—has engulfed the imagination of these foreign peoples.

For instance. English is now the second language in Scandinavia. Every educated person speaks it. I found policemen in small towns and railway porters in big towns, who could stumble along in English. The more fortunately educated people speak it fluently wherever you go. But there is a controversy raging, over the differ-

(Continued on Page 3)

Did you ever notice how deceiving some song titles are?

The other evening I was eating in a local restaurant and two boys caught my eye. They were coaxing their father to reach deep into his pocket for a small nickel to insert in the colorful music-box in front of them. After completing this task, the two young boys were read the titles given on the front of the nickelodeon. Each melody title received only a far-away look from the boys, until their father hit upon "Lemon Drop." Then their eyes lit up like a slot machine window, each hitting the all-lemon jackpot.

The nickel was swallowed up by the mechanical music-box and the boys settled back to dream about those tasty, sugar-coated, lemon morsels.

"BEEDLE - BOP - BOOP; BOTTLE-BOP - BOOP; WHEEDLEY-BUM-BOOP" burst forth from the loudspeakers and extinguished their dreams. Trombones and trumpets were conducting a feud with the drum and saxophone and soon the whole restaurant formed a battleground of notes. And the two boys both fell victim to the barrage, as they sat startled at the jumbled music filling the air.

Music and Politics

Sometimes I think the music-makers know as much about what John Q. Public wants in the way of music as Gallup knows what he wants in the way of politics.

For instance, I've been told that the new hit, "Cruising Down the River," was written by two old maids in England. They went from one publisher to another and couldn't give it away. Each publisher claimed it was not the kind of music that people like. "Too old-fashioned," they said. How wrong they turned out to be is best illustrated by noting that "Cruising Down the River" is that tune you've been hearing the cute girl down the hall, the messenger boy, and the boss humming of late.

Jive Music Is Dying

This modern music, I claim, is losing out more and more every day.

Any three-year-old can slide his feet or jump around like the so-called modern dancer, but how many could square dance. Now there's dancing that is both sensible and scientific. You not only have fun and follow the music, but you get good exercise as well.

And anyone who doesn't think it is a science, just ask someone who attended either the Squares' or G-E Club's square dance. At both dances, the good turnout and general hilarity gave the clubs cause for making plans for some more.

Just another instance in which "old-fashioned" music has come out the victor over this modern stuff. The evidence in favor of the old-timer-tunes could include an endless list, such as the hit of the Sentimental Four barbershop quartet at the Supervisors' meeting Monday night; the success of the Squares' party recently when the attraction included the Indiana Tech Glee Club and barbershop quartet contest; and everyone remembers the stars of the Quarter Century Club outing last summer—the Noble-aires quartet from Kendallville.

Meet the President

Prices Reduced

(Continued from Page 1)

Results of Production

"These price reductions are in keeping with the Company's continuing policy of passing on to the consumer the cost economies made possible by expanded production," said Mr. Wilson.

The 1949 eight cubic-foot refrigerator (Model NB8-F) has been reduced from $259 to $245. Similar reductions have been made on six other models. The four cubic-foot home freezer (Model NA4-F) has been reduced from $239.75 to $219; while the eight cubic-foot freezer (Model NA8-F) has been reduced from $330 to $319.

The new automatic washer retails for $299.95 which is $70 less than the former comparable model. Two ranges (Models DD1-F1 and DD1-F2) have been reduced from $289.95 to $274.95. Three other models have been similarly reduced. A new model (CD2-F1) is being offered at the same price as previous model CP1-F1, in spite of the fact that three storage drawers have been added. It is the only electric range on the market today which has so much storage space at such a low price. Another model (CD3-F1) has been reduced from $249.95 to $239.95.

Sixteen models of water heaters have all been reduced in price by substantial amounts.

States Need for Efficiency

In commenting on the price reduction announcement made by President Wilson, C. C. Walker, Vice President in charge of the Construction Materials Department, pointed out that price cuts made since the first of the year in construction materials items will necessitate even greater plant efficiencies in the utilization of labor, material and supplies to the end that the operation can continue to support employment and still show a profit. There has been a sharp 11.2% slash in prices of wire and cable in recent months, Mr. Walker said. Prices of some G-E construction materials products before this week's cut were already below those prevailing before the war, he revealed, citing mercury switches which are selling at 22% less than in 1940, thermoplastic building wire, and moisture-resistant building wire as examples.

Emphasizing the importance of construction materials items in providing housing so vitally required throughout the nation, Mr. Walker said that recent price slashes include a reduction of almost 8% in galvanized rigid conduit which cannot yet be made in sufficient quantity to satisfy the demand. BX armored cable, used extensively in both private and commercial building, has been reduced 10.8%; service entrance cable 10%; rubber braided building wire 11.6%; thermoplastic building wire 11.6%; galvanized switch and outlet boxes 5.3%; range cord sets 9.1%; rip cord sets 24.6%; and many other items have been reduced.

Forty Million Dollars

It was estimated by the Company that the price reductions announced this week and others made since January 1 would amount to more than 40 million dollars for the balance of the year at the retail level, based on current volume.

Corresponding reductions will be made in the employee prices of these items available to employees, and these new prices may be obtained from the employees stores at the various Company locations.

175 Supervisors Hear Talk By K. W. Given

Approximately 175 members of the Supervisors' Club heard a talk on new chemical developments by K. W. Given, head of the G-E Chemical Department's lecture and exhibit bureau, Monday night at the Squares hall. Mr. Given is shown above talking with some of the members. Left to right: Lewis J. Barney, A. J. Lange, Mr. Given, Robert L. Mace, and M. M. Ray.

Hugh Crane—

(Continued from page 2)

ences between British and American pronunciation. And everybody wants to speak—American.

For another instance. You will not go a block, anywhere, without seeing something American. It may be a sign "Kodak," "Esso," "Gulf," or "American Bar." Most of the cars are American. The hotels serve "cocktails" (they call them that)—an American gadget. If you go out to dance, three out of four tunes the orchestra plays will be familiar American pieces (fashionable today is "My Bonnie Lies Over the Ocean" and the Norwegians in the fashion know the words better than you or me). I have heard Danes in Danish towns (Aalborg, Odense) that I never heard of before, sing more verses of "Working on the Railroad" and "Red River Valley" than I or my colleagues could recollect.

"Dollar Shortage" is Topic

For further instances. Everybody—but everybody—in Europe talks about "dollar shortage." Rightly or wrongly they think their major problem is how to get more dollars. (We told them when they rode the subject too hard, that we had a chronic dollar shortage in America, too). Again: they worry about how much military aid America will give them. Again: they know twenty times as much about this country as we know about them. Again: they worry about the state of business in America. Will America have a depression? That would be terrible for them. Are American prices high—that's good for what they sell to us, bad for what they have to buy.

Thinking these things over on the way home, in the comfortable cabin of a DC-6 in the middle of the Atlantic (we left Scotland at one, were in Newfoundland at eleven) I remembered President Truman's opening words in his January "State of the Union Message." He said something to the effect that "To begin with, the state of the Union is good." And it surely is, in spite of some fall in prices and some shortening in demand, compared with anything you are likely to see or hear when you get a passport and fare to foreign lands.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

Everyone is reading about the turtle that is making Churubusco famous. Dick Stoner says he is going to lead an expedition to get the turtle. Ralph Pappert is the guide to catch the "Busco Beast." We wish you boys all the luck in the world 'cause you'll need it when you match your wits against a 400 pound turtle. . . . The fellows in Ballast Engineering have tried every trick in the book to get Gail Doolittle to tell when she is getting married, but so far she "ain't" talkin'! . . . We are very happy to have back Helen Brindle of Purchasing and Ilene Meyers of Engineering. They were both ill several days. . . . Engineering is happy to welcome Louise Klinker as the new Ediphone operator. She celebrated her birthday along with her new job. The Service Bureau gave her a beautiful blue-lace blouse and a rose corsage. . . . Remember to always check to see that you don't forget a thing when leaving on a trip, especially money! Walt Hein was leaving for Chicago and didn't think about the money situation 'til the last minute and had to borrow some from Les Denham. That'll teach ya! . . . Lunch hours have flowered into dog-eat-dog card games.

Purdue To Start Registration For Spring Quarter

Registration for classes at Purdue University Center, Jefferson at Barr, will be held March 28, 29 and 30. The spring quarter starts Thursday, March 31, and continues until Wednesday, June 29. A wide variety of courses that pertain to industry are being offered during the afternoon and evening sessions. Further information may be obtained from K. W. Michael, Assistant to the Supervisor of Personnel, Bldg. 8-2.

New Positions

(Continued from Page 1)

left the Company in 1939 to work at the Boeing Aircraft Co. of Seattle. Returning to General Electric in 1940, he worked in the Plant Engineering Division.

In 1941 he was appointed Supervisor of Forging Planning of the Supercharger, and in 1945 became a staff assistant in the General Superintendents' office. Then later he was named Supervisor of Planning of the Specialty Transformer and Ballast Division.

Mr. Connor is married, has two daughters and one son. He lives at 723 Kinsmoor. He is President of the Fort Wayne Engineering Club, and a sustaining member of the Civic Theatre, a member of the Squares and Supervisors' clubs. He is also a registered professional engineer of Indiana.

Apprentice Graduate

A graduate of the Apprentice School, Mr. Korte enrolled in the machinist-toolmaker course in 1928. Following his graduation, he was assigned to the General Tool Division. In 1937 he transferred to the Specialty Transformer Division, doing time-study work. Two years later he became associated with the methods and Equipment Planning section. He was made Assistant Supervisor of the section in 1942 and two years later was promoted to supervisor.

In 1947 Mr. Korte became the Assistant Superintendent of Bldgs. 26-B and 26-1 in the Transformer Division. Last year, prior to his new appointment, he was made Superintendent of Specialty Transformer and Ballast Division 91.

Mr. Korte is married and has two girls. The Kortes make their bome at 4808 South Wayne Ave. He is interested in golf and baseball and is a member of the Supervisors' Club, Apprentice Alumni and Foremen's associations.

Civic Theater Director Is Speaker At Apprentice Alumni Association Meeting

Reid Erekson, director of the Fort Wayne Civic Theatre, was the speaker Tuesday night, March 8, at a meeting of the Apprentice Alumni Association in Kreis Stoltzenau hall. Mr. Erekson, at the left, is shown talking with David Bartle, president.

Idea Brings $105

Verne Castle, General Foreman; Harold Hohman, Foreman, and Carl Clevenger, FHP Motor Div. 16, are shown above looking over the application of the suggestion that brought Mr. Clevenger $105. Through Mr. Clevenger's suggestion, the Company was able to purchase grinding wheels which were far superior to the ones formerly used.

Share $2,041

(Continued from Page 1)

John D. McMaken, Specialty Transformer Div. 91, received an award amounting to $75 for his suggestion of changes to annealing ovens to prevent breaking annealing boxes. For his suggestion on Leeds and Northrup motors, L. A. Hubartt, FHP Motor Div. 1, received $50; while Earl A. Lamboley, Motor-Generator Div., is $30 richer for his suggestion on shipping braces.

Awards amounting to $25 went to Bard E. Zwayer, FHP Motor Div. 16; Dallas Patten, FHP Motor Div. 17; Orland D. Marschand, FHP Motor Div. 17; Melvin H. Borcherding, FHP Motor Div. 33; Fred Rohe, Tiffin Plant; Owen R. Allen, Specialty Transformer Div. 91, and Waldo A. Greider, Specialty Transformer Div. 91.

The following employees received awards of various amounts from $5 to $20:

FHP Motor Div. 1: Mildred Greene, Esther A. Paper and Arthur McNamara.

FHP Motor Div. 13: Thomas D. Cowan (two awards); Arthur F. Sorg, George Kapp (two awards), Herschel S. Foreman, Charles L. Boyce, P. A. Schoppman, Alfred B. Renz, William A. Sivits, Joseph F. Doust, and Charles E. Clawson.

FHP Motor Div. 14: Harold Richmond, Forest E. Grim, Cecil E. Tarney, Waldo D. Martin and Howard L. Poorman.

FHP Motor Div. 15: Joe E. Tricker, Charles H. Gordon, Dale M. Fredrick, Thyral L. Neu, Merrell S. Pettit, Justin W. Heaston, Vergie Stephen, Fred F. Bailey, Bryan D. Brown, Milton E. Roller, Lewis Hutchinson. Paul F. Boyer, R. Richard Raber, and Charles Trey.

FHP Motor Div. 16: Junior L. Wappes, Dorothy Johnson, Roy R. Hans, Donald Williams, Russell A. Bowdy and Clifford B. Smead, Jr.

FHP Motor Div. 17: Ralph J. Begue, Frank D. Cox, Carl Scott, Ernest Etzler, Charles Arnett, Chester Carey, Ralph D. Fetters, Louis P. Klotz, Russell L. Poorman, Raymond A. Pickett, Orland D. Marschand (two awards), Harold W. Miller, William Baker, Fred E. House (two awards), Orton B. Anderson, Jr., William Wiegmann, Norman Wolf (two awards), Eugene P. Kelsey, and Gerald E. Gamble.

FHP Motor Div. 19: Lloyd Runyon, Bernard P. Kramer, William J. Stolp, John R. Miles, Glen Buckmaster, and Merlin E. Wagner.

FHP Motor Div. 33: Clem L. Miller.

Tiffin Plant: James M. Turner, Paul J. Raitz, Hugh Hinsman, George George, and Joseph J. Matsick.

DeKalb Plant: Maurice Uplinger, Ward Christiansen, Alice Cooksey (two awards), Fredricka Siebauer, Duaine Thurlby, Clyde Bennett, John Wagley, Hughie W. Kind, and W. E. White.

Specialty Transformer Div. 91: Hubert Habig, Charles Druce and Hovy L. Schrader.

Specialty Transformer Div. 93: Levi C. Carpenter (two awards), Frank F. Schultz, Jr., James T. Keller, Homer C. Meeker, and Morris A. Felger.

Specialty Transformer Div. 94: C. Doyle Johnson, Fletcher Cumbey, Lester B. Redding, Paul B. Gressley, Russell W. James, and Joseph T. Troendly.

Danville Plant: Alfred L. Everingham (two awards), Wilson D. Halls (two awards), Lingle E. Riggle, Jr., Donald J. Russell, Ted Henderson, Glenn Brown, Robert Hicks, Elbert E. Gardner, Paul A. Fleming and Charles Wagner.

Motor and Generator Div.: Waymond L. Morton, Herman F. Kuhn, Paul Walker, Ernest E. Allmandinger, John G. Momper, Russell M. Grim, Harry W. Heuer, Paul F. Bryan, and William G. Hoelle.

Wire and Insulation Div.: Max J. Lawrence, Ralph G. Lindeman (two awards), Clarence E. Coulter (two awards), Edwin E. White, Franklin W. Jacobs (two awards), Earl E. Glass, Harry Arnold, Jr., Ralph N. Hoover, Lynn A. Wilson, Carl M. Junk (two awards), Harrold V. Barrick, Herman Bertsch, Felix J. Neuman, and E. J. Norris.

General Service Div.: John N. Schreiber, Eugene Page, Thomas E. Doell, Tony W. Arthur, Fred E. House, Rosco C. Hamilton, and Homer A. Markley (two awards).

General Tool Div.: W. J. Rauner.

Students Reminded Of Deadline For G-E Loans, Scholarships

Students are urged to apply for G-E loans and scholarships before the April 1 deadline for filing. Forty-three applications have been received to date. These loans and scholarships, supplied from the million dollar G-E Employee Educational Fund, are available to all Company employees, their children, and children of retired employees. Application forms can be secured from and submitted to K. W. Michael, Assistant to the Supervisor of Personnel, Bldg. 8-2.

Appointed Assistant Manager Of Specialty Transformer Sales Div.

J. P. Coughlin

J. P. Coughlin has been appointed Assistant Manager of the Specialty Transformer Sales Division.

Following his graduation from Pratt Institute School of Science and Technology with a B.S.E.E. degree, Mr. Coughlin entered the Company's test program in 1941 at the Lynn Works in the Steam Turbine and Battleship Gears Division. He then took a test at Pittsfield in the Power and Distribution Transformer Divisions, followed by an assignment at Schenectady. While at Schenectady, he worked in the Motor-Generator and Control Equipment Division and spent some time in the General Engineering Laboratory working on Submarine detection equipment.

He went off test in 1942 and transferred to the Design Engineering Section of the Distribution Transformer Engineering Division at Pittsfield. The next year he came to Fort Wayne to do application engineering and sales work in the Specialty Transformer and Ballast Divisions.

Mr. Coughlin is active in the sales training program. He teaches two classes, one on sales methods and the other on effective presentation of business ideas.

He is married and has one child. He and his family live near Roanoke. Mr. Coughlin is interested in all kind of sports, and is a member of the Orchard Ridge Country Club and the Squares.

Tales from Taylor

by Harry Parker

Ward Grim was all agog the other day over the report that a gigantic turtle was sighted in Fulks Lake. It is said that this turtle measures approximately five feet across and will no doubt weigh in the neighborhood of 400 pounds. So strong is he that he bent iron bars that some fishermen had driven into the lake bottom in an effort to capture him, but he broke right through them. Now they have enlisted the services of a pile driver and are trying to drive heavy piling around him. If successful Ward claims that a heavy duty dredging outfit will be necessary to lift him out of the lake. After removing said turtle the lake level will probably drop several feet. Buck Adams tells us that a farmer has already captured it and is using it to pull his plow. . . . A few weeks ago Buck Kline had all of his teeth removed, but is unmindful of the fact so much that the other a.m. before leaving for work he took some toothpicks from the holder on the table and put them in his pocket. His wife asked him what he was going to do with them, and brought to his mind the fact that he was minus teeth. . . . Clarence Hartman's home is owned by a certain downtown business establishment. When he pays his rent he usually parks his car back of said place of business, then goes in and pays his rent. Last Saturday he went through this proceeding, but when he returned to his car, there upon the windshield was a notice that he owed this business a parking bill for all the times he had parked there. This burned him to a cinder. . . . On his way to work one afternoon the past week, Joe Turley purchased a new spray head for his shower. Some of the boys wishing to play a joke on him hid it, discovering this Joe told them that they were the ones who would suffer as he would not take a bath until it was returned. Joe is quite a schemer and has a novel plan for obtaining a seat in a crowded bus. After getting on he stands close to a seat occupied by some women, then begins complaining in a loud tone of voice about how hard he has worked and how tired he is and about his feet nearly killing him, until some woman feeling sorry for him gets up and gives him her seat. . . . Josephine Eme and husband were dinner guests of Arthur and Mable Miller last Saturday evening. Mable served a sumptuous repast—the main dish consisting of baked white fish stuffed with sauerkraut and garnished with sardines, olives and radishes topped with a big shot of extra strong horseradish. Jo said that she would rather have had chicken, but nevertheless suffered no ill effects from this high powered meal, so saying the evening passed off pleasantly. . . . "Big Chaw" Schooley is in the limelight again. The other night Clarence got on the bus, forgetting to discard his chew. Some of the boys noticed him sitting there tight-lipped and sensed what was wrong, so they began razzing him. All poor Clarence could do was to sit there with a red face and grin.

Our idea of a pessimist is a bachelor who thinks that he has as many troubles as a married man.

Given $75 Award

John McMaken, Specialty Transformer Div. 91, is shown above pointing out various features of the suggestion that netted him $75. His foreman, Freeman Rohlfing, is at the right. Mr. McMaken's idea involved changes on annealing ovens to avoid breaking of annealing trays.

Motor and Generator Static

Thought for the week: The school of experience never changes. It always has and always will issue its diplomas on the roughest grade of sandpaper."

Here is another guess on the Mystery Melody: "Paramount On Parade." . . . Worry is a lot like a rocking chair, it gives you something to do, but won't get you anyplace. . . . Charley McAfee, our rambling Irishman, made a startling discovery last week. He was driving to work when his car started spouting steam, so Charley stopped at a filling station and filled the radiator with water. After driving a few blocks another cloud of steam poured out. After another filling, Mr. McAfee finally arrived at a garage where he was informed that a freeze plug had gone out. "Freeze plug," sez Mr. McAfee, "Faith and I have driven cars, boy and man, for some 20 years, and this is the first time I ever learned they had contraptions like that." . . . Stan (Captain to you) Marquardt is a betting fool. He will bet on anything from a card game to whether the baby will be a boy or girl and what the weather will be a week from now. One day he passed Ruth Schafenacker, he turned around and said, "Ruth, I'll bet you 50 cents I can get your shoe on my foot." A bet was made and Stan lost. After observing Ruth's and Stan's foot sizes, we are convinced that Lloyd's of London wouldn't take a chance like that. . . . The other day it rained and Doris Olinger carried her umbrella to work. She entered the west door of Bldg. 27 and walked its entire length with the umbrella over her head. When she discovered what she had done, she remarked, "Hope no one saw me." That girl is really a dreamer. . . . Paul Bohn celebrated a birthday Saturday. On Friday his co-workers showered Paul with greetings and gifts. Remarked Paul, "Finest birthday I ever had, thanks everybody." . . .

Luncheon Honors Lola McCague

Lola McCague, Bldg. 17-3, was honored at a luncheon Thursday, March 10, on the occasion of her retirement April 1. As a parting gift, she received twin table lamps from her co-workers. Attending the lunch, which was held in Bldg. 17-3, were:

Front row, left to right: Beulah Hoff, Laura Starner, Mrs. McCague and Bertha Witham. Second row: Helen Biddle, Belle Buchan, Ilo Souder, Gertrude Dammeier, Violet Brower, Rose Heche and Clarabelle Sapp. Back row: Margaret Swain, Ruth Lemert, Kathryn Weigele, Ann Kensill, Charles Rice, and Verne Castle.

G-E Announces New Line Of FHP Motor Construction Kits As Training Aids

Some of the unassembled parts included in the new General Electric educational FHP motor construction kits are shown above. These kits, which contain all the components necessary to build a regulation motor, were designed as an aid in teaching school children the principles of the electric motor.

A new line of FHP motor construction kits for use as teaching aids in school shops and laboratories has been announced by the Educational Section of General Electric's Apparatus Department.

Each kit contains the necessary components, completely machined for assembling a full size, regulation motor; including stator and rotor cores, bearings, starting switch, capacitor, shaft, frame, end shields, etc. Wire and varnish are not included in the kits because these can be inexpensively obtained locally.

The kits are available in four sizes: ¼- and ½-hp single phase capacitor-start type, ½-hp three-phase, and a d-c unit suitable for use as a 300 watt generator or ½-hp motor.

Several preliminary models of these kits have already been delivered to the San Diego Electrical Club for use in a club-sponsored contest among school children. Prizes will be awarded in this contest to those children who assemble the best motors.

Stan Marquardt is a guy who believes in the luxuries of life. The other noon he entered a nearby restaurant. After obtaining his meal he sat down to dine but the meal tasted flat, something was missing. He looked around and finally observed a large candelabrum used for decorative purposes. Mr. Marquardt arose, walked over, picked up the candelabrum and returning to his table lighted the candles and settled down to enjoy a meal in the proper atmosphere.

Ramblings 31-2

The Engineers are interested in knowing the formula which Howard Naslund uses in getting his friends to work for him. Howard recently rented a house. Three couples went out one Saturday morning and washed woodwork, walls, and floors. Then the fellows used their cars to move the Naslund's belongings. Another evening one of the fellows helped Howard paint a room. Friends in need are friends indeed. . . . We have a new draftsman and a new engineer. The draftsman is James R. Meeks; the engineer, Earl D. Elwonger. Earl is a graduate of the University of Nebraska. . . . Kitty McIntee, ex-draftswoman, has a baby girl named Catherine Antoinette. . . . Everett McKeeman is now the proud owner of a bungalow on Raymond Street. . . . One of our commuting engineers is Paul Gratny. Paul drives to Kansas every other week-end in his 1949 Chevy. . . . We are trying to get a copy of the masterpiece, that is, the letter from our Army friend, Bob Gillum. Not having succeeded, you will have to ask Bob for his opinion of the New Army. From all indications Bob is glad to be back and we are glad to have him back. . . . The bidding at the noon hour bridge game is so confusing. It has been suggested that "Grampa" (because he won't roller skate) Gratny and Maurice Emling should be partners. Perhaps they could understand each other's bidding, since no one else can. . . . Fred Eisenbiegler and Maurice Emling have a set of golf clubs in partnership. Now each is trying to sell his half to the other. Wonder who will come out with a set of golf clubs. Isn't there a third party who wants to buy two halves?

Happy birthday to Ruth Hine last Thursday. Thanks for the luscious cake. . . . Emily Nierman attended the semi-finals at Muncie Saturday. . . . Great games in the p.m. Grace Ober got in on the celebration after the games in the evening. . . . Esther Madden is one tooth less this week. Seems as though the dentist needed another one for his collection. . . . James Harter has left, and we do miss him. Good luck and good health. . . . Opal Burton has returned after a week's illness, and Vera Fetro has returned after a two weeks' illness. . . . If Kathryn Hepker would bring cookies or cake, Bernie McCune, Eleanor Whitehouse, and Lorinda Beyerlein wouldn't have to hang around the Bon Ton for the sales! . . . Birthday greetings to Clara Krauskopf. . . . Every Wednesday afternoon you can see Irma Hamy walking past the peanut store that hands out free samples of peanuts. He fooled Irma the other day, he wasn't out because of bad weather. . . . Thelma Wyss was looking at wedding dresses in a downtown window the other day. Is she getting ideas for her little daughter already? . . . That was a nice picture of Helen Hine that appeared in Sunday's paper. Congratulations! . . . George Louthan retired last Thursday after working here 26 years. He has been on our sick list for three months. We wish you a speedy recovery, George, and hope that you can enjoy your retirement! . . . I've heard of people being in a hurry but it is unusual for someone to get ready for bed and then show up here ready for work as Betty Kummer did last week. . . . Veva Healy went to see a Jolson picture again. I think she sees every one at least three times. . . . Ruby Kinsey, who used to work with us but now lives in California, had a baby girl the other week. She named her Barbara Louise. . . . That man who looked so different the other Monday was Mardo Tobias. He shaved his mustache off, and he did look different. His wife didn't like the looks of him without it so he is growing it again. . . . Since Bill Dinkle is too modest to report on himself I guess I'll have to do it. Congratulations on two accounts. He is getting married in the spring, and he won a trophy in the church league bowling tournament. . . .

Beast of 'Busco?

No, not the "Beast of 'Busco." This turtle doesn't weigh 400 lbs., just 50 lbs. Harry Haberkorn, Supervisor of Inspection and Test in FHP Div. 1, and his wife were fishing at Wolf River in Wisconsin, when Mrs. Haberkorn caught the big turtle shown here. The boards of the pier were 14 inches wide and the turtle spread over the width of two of them.

Lee Raver can't seem to tell the sound of a train from that of an airplane. She kept saying, "Gee, that plane's flying low" when all the time it was the trains going by! . . . That man with the dark hair who ate Edna's and Jackson's birthday dinner was Cecil Foor. Several of the people didn't know who he was when he took his cap off!

The Way We Do It . . .

. . . . IS A REFLECTION OF OUR INTEREST IN WHAT WE ARE DOING, whether it's operating a hydraulic press or playing the keys of an organ. And what does this have to do with SAFETY? Just about everything!

Interest in what we are doing compels interest in what we are doing it with and everything else related to the job, the machine, tools, material, SAFETY, quality, quantity, HOUSEKEEPING, etc.

NILE REYNOLDS, hydraulic die cast press operator, FHP Motor Div. 13, Taylor St., in the above picture, was appropriately recommended to help us call this safety thought to your attention.

HERSCHEL L. SMITH Safety Enginecr

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

By now you all have heard a lot about "Oscar" the giant turtle. If Oscar hasn't been captured yet by the time this issue of the NEWS is printed, we expect to see Fred Thieme loading up his Ford with all his special underwater equipment, and perhaps some new devices he has dreamed up and head for Churubusco in an attempt to put Oscar into captivity. With a capable outdoorman like Thieme on the job we can all sit back and relax and rest assured that old Mr. Turtle will be brought out of the lake. . . . Eddie Prince is fast becoming a key man in the division so far as the "streamliners" are concerned. He not only welds them, but also blocks, forms, and notches them. In fact he does about everything but shear the material. . . . Sam Rhoades was lucky a couple of weeks ago and won a pool, but wasn't so lucky when he received the cash. It was all in pennies, nickels, and dimes and was in a metal container which was welded shut. I guess from now on we can just call him "Hack Saw Sammy." . . . "Gorgeous" George Barker has his eyes trained on Winter St. again. We figure it is either because there is too much noise in here or that he is getting tired of handling those heavy pliers all day. . . . Attention all real estate brokers and new car salesmen: Floyd Null has signed up with the Pyramid Club. Naturally we expect to see him go on a big buying spree one of these days. . . . Harold Franz seldom has very much to say and instead just uses some little expression to convey his ideas or thoughts. His latest expression is, "just call me Minnie." . . . It looks like Ted Mullen will have to start charging rent to Stauffer and Rofhling since he can't get them to move some of their material out of the punch press section. . . . We notice that Don and Ed are still pushing their dies and tools around on a "Sheet Steel" wagon. What's the matter, boys, aren't you able to get what you would like to have in the way of transportation for your equipment? . . . Just a little note for safety's sake—watch those crane control boxes. We hear that they are made of pretty hard stuff, in fact harder than most of the heads we have on this floor. Ask Bob Bunyan, he knows. . . . We sincerely hope that Gerald Crum gets his new car soon. We're afraid that the strain of having to wait for it is beginning to show, because we have noticed that he is having to take his medicine regularly again. . . . Here is one for Mr. Ripley. Bill Edmunds' chickens are starting to lay eggs especially for the Easter baskets. To prove it, Bill brought in one of the colored eggs. In the past there has been some pretty tall tales told about his chickens but we'll have to admit that he has proof-positive this time. . . . Anyone interested in a free demonstration of the new drill press that arrived at the east end of Bldg. 26-1 last week see Don George . . . If some night you see what looks like a Christmas tree on wheels going down the street, don't be alarmed. It is only the new colored lights that Al Hamilton has added to the wheels of his motorcycle. . . . If you noticed a swelling in William Gepfert's chest last week it was because he had just become the proud father of an 8 lb. 6 oz. baby boy. So our congratulations go to "Hermetic Bill." . . . This week "Tricks" were written by a guest writer, Tom Woodward.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

It is said that Art Swain, Jr., would appreciate the donation of a serviceable girdle that would help take him from size 44 to 36, so that he can get into that old air corps uniform of his. . . . Clayton Dafforn was observed using a pair of pliers to unzip his leather jacket the other morning. . . . Some men's wives don't seem to trust them on payday. Does Mrs. Cook make it an every Wednesday afternoon custom to be on the trolley coach to see that you come home with the paycheck intact, LeRoy? . . . Paul Lichtsinn was off duty for some time with the measles recently. He still looks a bit spotty. . . . Clarence Nichter refuses to believe the story about the mammoth turtle near Churubusco. Even if it was so, and somebody caught him, there wouldn't be a cooking pot big enough to cook him in, says Nick.

Larry Gase got a nice stick of gum from a well-wishing friend. It was a bit tough it is true, but Larry being a good Joe did not complain. He just got a good laugh watching Mel Kiessling trying to open his desk drawer which seemed to want to stick for some reason. . . . Darwin may be right after all. Anyway we will know when we see Verne Castle climbing that new ladder. . . . Floyd Garland is sporting a new crew haircut. We haven't decided if it is a means of protection or if he is getting ready for the hot weather. . . . Anna Lapadot is a newcomer to our office, and we are happy to have her with us. . . . Paul Clendenen and Harold Boles are two of the more fortunate owners of new cars. They are already making big plans for vacation. . . . Now that Walt Kryder has simmered down for another week maybe we can all work. You see Walt was one of the lucky fellows that got tickets to the basketball games Saturday.

Superintendents Speak At Foremen's Meeting

Superintendents at the Fort Wayne and Decatur plants gave short talks at a meeting of the Foremen's Association Wednesday night, March 9, at Kreis Stoltezenau hall. The pictures below and at the right show some of the informal groups that gathered for discussion after the meeting.

In the two pictures at the right are: F. R. Hoffman, Otto Rodenbeck, W. L. Paulson and Ewald Steinsmuehlen; Paul Traub, H. E. Boles, W. H. Crouse, Cecil Sible and Walter Wolf.

Below, left to right, are: Clarence Gardt, L. A. Arnold and Russell Owens; W. K. Williams, R. M. Hartigan, R. W. Swartzel and H. G. Siebold; R. E. Morris, L. W. O'Brien and Everett Lindeman.

Rounds Out 30 Years Of Service

Leo J. Neuman, Bldg. 20-1, completed three decades of service at General Electric. Several of his friends gathered at the presentation of his 30-year service letter, Thursday, March 10, in the office of Bldg. 20-1. Left to right, in the above picture, are: John Henry, George Thimlar, John Lare, Winfred Luebke, Ed Bauer, Frank Voirol, Rudy Dressler, Mr. Neuman, Wilbur Morehead, George Danehy, John Bell, Robert Hatfield, Donald Stanley and Otis Fitch.

Bernard Penkul has been married only three short months, but he already knows how to do the family washing. He has been giving old timer Melvin Bill many new pointers, but when Berny starts taking ironing lessons he must see Fritz Dudasky who has this job mastered to perfection. In fact Fritz demonstrates most any place, even along Taylor street. . . .If you have any extra cash we advise you not to give it to Ora Birely, who performs tricks of magic. He can make your money disappear faster than you can say, "skat" . . . Herman Bertsch bought a new car and new pair of shoes. Herman says the new shoes are to keep the car from getting dirty. Couldn't be you're afraid you might have to walk is it, Herman? . . . Warren Langmeyer and his bride have just returned from their honeymoon spent in Florida. Good luck, kids. . . . Al Swift is spending his week-ends at Cedar Creek trying to catch those red horse. Al says they're really delicious about this time of the year. How do we know. Samples, please. . . . Were you wondering too why Guy Oberlin seems so put out lately? Well you would be if you went a fishin' and a fishin' every week-end and came home skunked. . . . No, it's not true, Orville Doherty did not have the swell head. He just had a wisdom tooth pulled which did him dirt. . . . Norb Engleman claims he got that nice black eye by running into a tree. Now everybody who believes that please stand on your heads. . . . It took Steve Bobay a long time before he made the news. Now he can't keep out. That tired old worn-out nag of his finally worked up enough ambition to bite his wife's hand. We bet it wasn't the nag's ambition at all. It was Steve poking the old nag in the ribs with a stick. . . . What was it, George Gettle? The height of ambition when we saw you writing with a pencil in your hand and one in your mouth, or was the one in your mouth to keep you from making conversations? . . . Bill Rohe, remember when you wanted to go along just for the ride when Bill Skinner and Dewey Wisner went fishing. You agreed to row the boat and after rowing a short distance you got sea sick and all Bill and Dewey had to do was to hit the fish over the head with an oar as they came up for air. Remember, Willie? . . . Happy birthday to Forrest Gill, March 12, and Ralph Remenscheider, March 17, St. Patrick's Day. . . . Vaughn Sheets, just how could you do such a thing to your best friend? We mean that picture. Shame on you.

Insulation News

Happy birthday to Earl Gebert, March 14.

Little Al

"You Must Have Been A Beautiful Baby" and "Happy Birthday" are the songs the Wire gang is singing to Al Hambrock today. Mr. Hambrock was one year old when the picture above was taken. He is celebrating his 50th birthday today.

GOD'S FROZEN PEOPLE

When the lakes are frozen over
And the frigid breezes blow
Venture forth—"God's Frozen People."
Trudging thru the drifting snow.
Neatly then a hole is spudded,
Hooks are draped with precious bait,
Lines are dropped thru icy water,
Stand they then to freeze and wait.
Watching for the slightest movement
Of the bobber, oh, so light.
Watching, waiting, freezing, hoping
That today the fish will bite.
Truly, they're "God's Frozen People."
Hardiest of the fishing clan,
Just survive one winter season
Believe me, brother, you're a man.

COUNT OFF 10-20-30

Taylor Street
DIVISION 17
By Dorothy Hengelman

Dora Smith has added the feminine touch to the Test and Inspection Office. Dora received a new desk last week and she was so proud of it that she started to clean the office so that it would be a fitting place for her desk. When you used to walk in the office, you couldn't see any desks for the piles of paper and etc. After Dora got her new desk in order, she called a conference with all of the foremen and told them that they were going to start good housekeeping. It worked, as the office is now as clean as a pin. Congratulations, Dora, and now we can see that all that office needed was a woman's touch. . . . That well known "Club" has finally hit Taylor St. It seems that some of the people were caught off balance (or were very easily influenced) anyway they gave their dollar, but when it came to finding two other people with dollars, they couldn't be found. Now if some of these people don't find two more people soon, it looks as though they will lose that two thousand dollars (or so they tell us.) . . . Last Friday noon Ed Brockhall was presented with a large fish hook so that he could go to Busco and catch the monster that has everyone arguing as to its size. We haven't seen Ed yet to see if he had any luck, but the story was out last Monday morning that it had been caught and weighed 275 lbs. . . . Fred Young was going around looking for a three-volt battery last Monday and someone found one for him. Fred must not have appreciated it, as he sent it to Ralph Keller. . . . While we're on the subject of Ralph, it is reported that some of our readers are following this column to see what happens to a Buick. Here's one thing that happens to them, so take note, Ralph broke a shock absorber on the Buick last week, and he was on the phone most part of one evening trying to locate a replacement. Finally after about 20 calls he found one, and then made the mistake of saying, "Boy, when you break a part in a Buick it really costs." Better not talk so loud the next time, Ralph. You know you could trade it for a Jeep, as they don't get stuck, or a Whippet, as they don't have shock absorbers, Ralph. . . . Harold Fletter was really a mess the other afternoon, when the joke he was playing on someone backfired. Better be careful from now on, Harold. . . . It sure is good to see Andy Anderson all smiles again now that he has his Chrysler out of the garage. It is reported that it looks like a new car with the new paint job. . . . Your editor rushes around like mad in the A.M. to get to work early for a change, and then we have to stop and view a truck which overturned, and almost be late for work anyhow. . . . It's good to have Bob Robertson back after his recent transfer to Div. 13. . . . Also good to see Eddie Bandt back to work. Congratulations to Mary Ulrich who became Mrs. Ray Shreve on March 3. We wish you all of the luck in the world, Mary. . . . "Pinky" Sordelet bought a new Kaiser last week, and besides that, he was then presented with another new car from his co-workers. Of course, it would be a trifle hard trying to drive around in the one from the co-workers.

If you don't dot your i's you're not the punctual type, says a handwriting expert. In other words, not right on the dot.

Receives Congratulatory Letter

Willis Rupert, Bldg. 19-1, recently celebrated his 30th anniversary with General Electric. At that time he received a congratulatory letter from the Company and several of his co-workers attended the presentation. Left to right are: Ernest Brown, Philip Lydy, Lyle Johns, R. M. Hartigan, Manager of Manufacturing of the Large Motor and Generator Div.; Mr. Rupert, Adam Farrell, General Foreman; Arthur Druce, Foreman, and George Golden.

Welcome to Bldg. 4-5 office, Vernon Robinson and Charles Briggs. . . . Birthday greetings of the week go to Henry Burch, Chris Stauffer and Floyd Brown. . . . Congratulations to Mr. and Mrs. Arthur Boltom who are the proud parents of a baby boy. . . . The co-workers who would like to be let in on a secret of Paul Haffner. He was caught passing out cigars. He also was complaining in the last week of a terrible toothache. Paul got his upper and lower teeth mixed. Where he had the ache, his teeth were false. . . . Elaine Sutter is taking up a new hobby—catching mice in her desk. The old saying is "catching two birds with one stone." She had two mice in one trap one morning when she came to work. Keep up the good work, Elaine. . . . We hope to see Ruth Cutter back soon. She recently injured her finger in her electric mixer. . . . Last Friday evening Henry Burch entertained a group of friends from small lot at his home. The main event was a small euchre game at which Herbert Cook trumped Bob Lowe's ace. Later on, if you heard any foreign stations on the radio, it must have been a few of the boys singing. The fellows left wishing for another enjoyable evening soon with Henry.

The Ossian folks entertained the boys on their basketball team the other night with a banquet, followed by a game between the boys and their Dads. Would you believe it—Ralph Sample was high scorer, bringing the old boys to victory with a score of 18-17. (Betcha' Ralph will never be the same, though, 'cause he wasn't able to sit down for a week after he took that spill.) . . . Bob Kelker was passing the "It's a boy" cigars around. Congrats, Bob. . . . Remember Phil Phillips who used to work here? He's the guy who started all the publicity on this huge "turtle" that has the whole place in such a dither. Can't understand why John Hall isn't up there giving Harris a hand, since he's past master at catching those "big ones." "Well, blow me down and call me Oscar," says Mesing, as he crawled out of the lake. "I was only taking a bath!" . . . Is that just a shadow on Harry Hawthorn's face, or is he, too, trying to grow a mustache? Time will tell (much time, that is). . . . Ed Trabel has been working on his cottage and had the misfortune of sliding off the roof while working on the chimney, hurting his shoulder, (poor Ed.) The important thing is—he saved the bricks and trowel. . . . "Barefoot Boy with cheeks of tan" is a familiar poem, but to Philipp Vorholzer it has become a reality. It seems the heel came off his shoe the other day and he was seen walking around in his bare feet. (What, no socks?) Cold, wasn't it, Philipp? . . . We are sorry to hear that Don Marshall is on the sick list again. . . . Jim Hubbard and Jack Hostetler have left. Good luck, boys. . . . After more years than he wishes to remember, crawling in and out of boilers, Sam Mastro is now on an easier job. He also has a new name, "Porky," wonder why? Could it be because you've taken on some weight, Sam? . . . Happy birthday to Bob Whitaker. . . . The following is a letter received from Walter McKinney to General Service. Dear Friends: It is not going to be easy to thank you properly and adequately for the stunning parting remembrance you boys gave me. I really didn't deserve it. Nevertheless, I do thank you, over and over, for the interest and concern that you have shown for me, and I shall not forget any of you or cease to regard you as true friends in all senses of the word. Very gratefully yours, Walter F. McKinney.

Whoever heard of a pigeon taking a car ride? Lewis DeVoe claims he obliged one in this way. Do you suppose he had a shot of champagne, used in the play "John Loves Mary," which he attended. . . . Bill Butts is going to bring a mouse trap in to work. He stuck his hand in a drawer and was bit on the thumb. . . . When Eldon Bell was asked by the "Inquiring Reporter" what the most important major appliance was to the housewife—he replied—the husband. . . . Danny Daniel and Bill Curtis' wives were seen waiting on the corner of Lafayette and Dalmon streets for a bus. Ladies, there isn't any bus stop there. . . . Rev. Tucker should get in touch with Cleon Oyer, about him singing in the church choir. Sweeter notes were never heard. . . . Anyone interested in being glamorous contact Mabel Fisher. . . . Gus Weisenburger was very quiet the morning following their bowling game. It seems the Assembly team won three straight and sent the Rotor team home talking to themselves. . . . Helen Miller certainly isn't going to be outdone by anyone; she bowled 205 last week. . . . Margaret Lepper didn't make that 200 mark so she consoled herself with a trip to Chicago last week to see the "Ice Capades." . . . Hurrah for our side. Kathryn Norr turned the tables on Cleon Oyer. Usually Cleon plays the tricks on Kate but this time you could have heard Oyer for miles. . . . Helen Achliman had a surprise one rainy day last week, when she found no umbrella at the end of the cord on her arm. . . . Bernice Trautman joined the "Fall" club last week when she fell out the front gate. . . . What's this we hear about Ernest Cutter having dishpan hands? . . . Russell Scherrer is so tired of eating soup. Don't give up, Russ, one of these fine days you will get your "choppers." . . . It seems a few of the boys stopped after work one evening for a "snifter" and Mr. Crosley not wanting more than one was told he could buy the first round. However, Bob was still there when it was Arlo Hawk's turn to buy, and Bob leaving said "Boys, just give me the 17 cents." Much to Arlo's amazement Bob took it and walked out. . . . The fellows in the Assembly group have had some very fine ideas as to how the "turtle" should be caught that has been seen around Churubusco. . . . Our deepest sympathy to Helen Burns in the death of her sister.

If we had a few more nice days, baseball would take up where basketball left off and the battle would be on again. . . . By the way, did you ask Bill Hurtt how they got the turtle up? Well don't! . . . Bob Coen returned Monday looking practically like new. Let's hope you have real good luck this time. . . . Bob Olson is very proud of his new Ford and well he may be. It isn't everyone who is so lucky, so pleasant driving, Bob. . . . Mary Burkholder is the new time clerk you have been seeing lately. She will take the place of Imogene Hortenstein who will be leaving us soon. To both girls our best wishes. . . . 'Twould be better if Clara Gehring and Alice Pflueger would talk about the same person in their discussions. Seems as if Alice was talking about the husband and Clara was referring to his wife. That made interesting conversation, but also quite confusing. . . . Elinor Laymon did you get that certain package to its destination in good condition last Thursday? . . . Decatur School is a touchy subject where C. J. C. is concerned. Maybe "Arnie" could get a transfer to Coesse, they seem to have a pretty good basketball team. . . . We were glad that the prowlers didn't gain entrance to the house of Cliff Imbody but you should have seen him shift into high gear and lite out for home! No ten second man could have gone faster. . . . Anybody want a "half and half" pup? See Paul Schlie. He might even throw in his Chevy!

Top Floor Topics

DIVISION 95

By Walter E. Pohler

Well, well, folks, again, after several weeks, we have a column headed "Top Floor Topics." As you all know our capable Editor Mabel Odel transferred. Since that time comments have been heard, such as, why no news from Div. 95?, why don't we have a news column?, etc. . . . The other day one of the big brass, we are not permitted to mention his name but his initials are P.P., confronted us with the proposition that we assume the responsibilities of writing this column. We came up with all of the stock reasons as to why we weren't qualified and didn't have the time to handle the job. Herein lies the story. Your writer has always had a high regard for his literary ability. Having lived in Washington, D.C., for a short period of time, it was possible to hobnob with such celebrities as Drew Pearson, and others. We have always felt that we could write a better column than Pearson, but to have someone else make similar remarks was overwhelming. Now if any of you could have sat in on the above mentioned conversation you, too, would know that not just a few but all of the famous reporters are just pikers. All this was seconded by a third party who is also one of the big brass. We were completely out-maneuvered in this deal, so, here goes. . . . Friday was moving day. The time clerks and the cost section couldn't pay their rent, so we had to throw them out. It is rumored that some other people are in arrears in their rent also. A word to the wise is sufficient. Either pay up or get thrown out. . . . It is also rumored that Bert Gruber is blackmailing Francis Gnau—don't know the reason. . . . It appears that the announcement in Bob Reed's column in the Journal on last Saturday morning, which stated that the Pistons were out of the playoff, was quite a blow to Dick Pierce. Dick still had hopes of bringing them in under the wire. . . . Betty Haines paid us a brief visit Friday afternoon. We are not sure but from her appearance it would seem that she is not sick at all and is just pulling a fast one on Bud. We are all glad that you are looking better, Betty, and we hope you will continue to improve so that you can join us soon. . . . Seriously folks, our floor is pretty long, if you doubt this statement try pounding up and down its length a few times some day. It is possible that some people at one end don't get to see acquaintances at the other end of the floor for days at a time. The purpose of this column is to let each of you know what is happening to his or her co-workers. We have asked several people on the floor to keep their ears to the ground for news items. In this manner we hope to be able to have items of interest to all. Your cooperation in this matter will be greatly appreciated.

Since one of the main topics of conversation now centers around the "Beast of Busco" the large turtle, the fellows in the crib are wondering why they haven't called on Art Haberstock for the use of his thoroughbred turtle hound. . . . They are also wondering how the riding deputy Cecil Strong is getting along with all that traffic. . . . Last week Chris Delagrange won the trophy. Before they could pass it onto John Bastian and Jack Pollock, Chris dropped it and broke the bottle. . . . Another topic of conversation was the rumor that Russ Deveny and Clarence Stolte were to see which drove the fastest car—but Stolte doesn't have the new Packard yet. . . . This week we bid goodbye to Richard Nix who goes back to the Apprentice School. Good luck, Dick, and we hope we have been able to help you along. In his place we have B. O. Smith. There has been a lot of speculation as to what the "B. O." stands for. . . . We also have temporarily John Stettler in the lathe section and Courtland Anderberg who is helping with the die grinding, while Walter Schuler is off on account of illness. . . . We were paid a visit by one of our former co-workers, Cliff Imbody, last Friday. . . . Boy meets girl! George Lambroff was finally able to get a formal introduction to that certain party. George says it was a real thrill. . . . Harold Whonsetler gave a special demonstration on how to saw angles in the power saw by putting the blade in on an angle.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, March 21, 1949

LOST AND FOUND

FOUND—Pair white wool gloves. Turned in at 19 Gate.

FOUND—G-E clock. Left in Cafeteria, Bldg. 16.

FOR SALE

HOUSE—Five rooms, bath, in Southern Heights, on Elmrow. H-24234 or A-89119 after 5 p.m. or week-ends.

LIVING ROOM SUITE — Two-piece, green velour, $35. Gas stove, $5. E-4340 after 5:30.

1937 OLDSMOBILE SEDAN—Very good condition; five good tires; reasonable. H-28435.

REFRIGERATOR—6½ cu. ft.; good condition; ideal for lake cottage. A-95325.

DINING ROOM SUITE—Eight-piece, walnut, two wall and two base cabinets. H-48803.

COLSON TRICYCLE—16-in.; good condition. $10. H-8742.

MEN'S SUITS, ETC.—Like new. Churubusco 4157 after 5 p.m.

OUTBOARD MOTOR—Wizard, 6 h.p., twin, like new; will sacrifice. A-86256.

GAS WATER HEATER—30-gal., zinc-lined, complete with insulating jacket. $15. A-86104.

50-EGG KEROSENE INCUBATOR—Girl's bicycle. Mercury outboard motor. H-76804.

UNDERWOOD PORTABLE TYPEWRITER—Lady's jodphurs, 6½AA; jodphur britches, medium. H-70563.

REFRIGERATOR—C-E Monitor top, 6 cu. ft. H-39282 after 6 p.m.

PAINTED MAPLE BREAKFAST SET—Six oil drums, reasonable. H-57905.

TWO POCKET WATCHES—Seven-jewel Elgin, 17-jewel Illinois. H-48685.

FIVE 6.00x16 TIRES AND TUBES—$1 each, good. H-24723.

WASHING MACHINE—Needs minor repairs. Any reasonable offer. H-8653.

GOLF CLUBS—Set of eight matched irons; fair condition. $25. H-69053.

TWO BED SPRINGS—Heavy duty, full bed size. $10. H-79923.

"BESSLER" DISAPPEARING STAIRWAY—C-E Portable radio Model LB700. E-40172.

1937 FORD—$95 or best offer. 1109 W. Wayne, Apt. 3.

SUIT—Black wool, size 22½; worn twice. H-48522 after 4 p.m.

WANTED

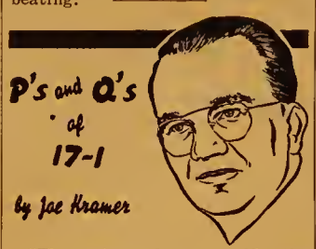
BOY'S 24" BICYCLE—Louis Lee, R. R. 7, Fort Wayne.

CABINETMAKERS OR WOODWORKING VICE—E-55741.

TRANSPORTATION

WANTS RIDE—Laureen Procise, from 3330 Raymond. Works in Bldg. 8-2, from 8-5:15, Ext. 363.

WANTS RIDE OR EXCHANGE DRIVING—E. L. McDaniel, from Auburn. Works for A. Landis, Taylor St., General Service, from 6:48-3:18.



SLEUTHING in 4-6

by JOAN POOS

CLUBS—Bob Loveland, DC Section, feeling weak from lack of breakfast, succumbed to the force of gravity again and becomes a member of the "Chief Floor Sitters" Club. Third time is a charm, Bob! . . . Jack O. Kirlin, AC Section, became a member of the "Almost But Not Quite" chapter of the "Floor Sitters" Club. . . . The "Rumble the Phone" Club seems to be one of the most popular of 1949. Fred Suhr recently joined the ranks. He accredited his fortune to his proximity to a charter member, Jim Capps, who did a little more thorough job than Fred. . . . CARS—Wednesday night Gil Baker's car refused to listen to reason so Walt Gerke had to persuade his little Pontiac Six to push Baker's extra large 12-cylinder Lincoln. . . . Anyone wanting info about Pontiacs, should consult Denton Manecke. . . . A week ago last Saturday, the M. Bennets of Waynedale, bought an Oldsmobile "76". . . . Bill Pringle is the man sporting the new green Hudson. He says that THE CAR sold him—not Claude Voss or Sam Moore, who already have Hudsons. . . . FISHING—The snow and cold weather 'roused our ice fishermen's entbusiasm again. I'm afraid though that it's going to have to get colder than that, fellows. A week ago last Sunday M. C. Oetting went fishing all day. He came home with a small six-incher to boost his ego slightly, but minus his best pipe and gloves. . . . ATTENTION—For information and price lists on a new bousehold gadget to keep your walls clean and draperies uncrushed, see Bob Sharrow, who will give you the name of his distributor. Mr. Sharrow is going all out for this lil' brain storm. . . . HOUSES—D. Willits has moved into his new home. Lots of luck with your new project. . . . ANIMALS—Anyone interested in "Wabbits"—consult W. Anderson. He has been talking about 25 pounders lately. . . . Tabulation and Production wishes to nominate Al Volz as the best dressed young man of Bldg. 4-6.

Parents usually say "You can't win"
When viewing their new born twin(s)
But Grandma (Reba) Coppock next in kin
Knows that her battle is won
And raves on over *their* "wee one(s)".

Mary Olson was forced into a "Command Decision." She's on a two weeks' leave of absence, for she's in the Naval Reserve. . . . There are two new faces in the Commercial Division. They are Gordon Lee and Ken Bernhagen, both on test assignments. . . . We extend our sympathy to Jo Ann Ansberry, whose sister died recently. . . . Welcome to Nancy Woodhull in the file room. . . . Happy birthday to Dora Holycross and Isabel Bartholomew, Payroll, and also to Gladys Koehlinger and Ingrid Swanson, of the Motor Sales Division. Ingrid is now at Taylor Street, was formerly in Bldg. 4-6. . . . Bob Groot should be caught up by now on his fishing after a two weeks' vacation in Florida. . . . A most enticing and glamorous calendar belonging to the "Unfair" sex, very mysteriously made its appearance on the east wall of the DC Division last week. Looks like fair competition to the Rev. Div me thinks. . . . It was a lonesome week for all of us in the DC Section, especially Don Spaulding, because his desk is located between Delores Giltz and Mabel Waggoner's. Mabel and Delores were both out all of last week with the flu, but could be that Don deserved the punishment, since we think that he may have introduced the flu bug to them the previous week. We missed you though, and are happy to have you back feeling almost as good as new, though slightly "woozy." . . . A lot of excellent suggestions have been offered to Glen Stapleton as to the best possible results which might be obtained from the display of his picture in various locations, such as in basements, attics, garages, and desk drawers for rat and mice eradication. A little contradictory info was published about Glen. With his picture was the comment on his excellent bowling achievements, yet on the back page, in a certain column, appeared an item that Glen had taken a beating.

"The actions of men are like the index of a book, they point out what is the most remarkable in them." . . . As handicapped as a thumbless hitch-hiker, Herb Tons, Red Cross solicitor, in the Tool Room came down with laryngitis on the day of the big drive. . . . Harry Kessler's famous last word, "You can't win for losing." . . . Attention is called to the Virus X repeller found at the service window of the Tool Crib. It is rumored that a patent has been applied for by George (Goldilocks) Mosshammer. . . . Ed Huhn was the recipient of the grand prize, consisting of a slightly tarnished gold watch and chain. Ed turned the watch into ready cash, making a 500 per cent profit on his investment. . . . Charlie Griffith's new hat style has a Red Cross sticker on the hat band, plus two pheasant feathers draped toward the back. . . . Frank Quinn is batching it this week. His wife has taken a vacation; that means dish washing and window washing for Frank, instead of bowling and playing cards. Don't get out of practice, Frank. . . . Tickets for the Century Club Dance, April 24 can be purchased from Helene Evanoff. Helene has all the details. . . . Fred Shutt claims that he, recently, pushed Elmer Brown's 1942 Ford and Vic Hall's 1949 Buick out of a snow drift with his 1929 Essex. Since it only snowed one-half inch that day, and Fred sold his Essex 15 years ago, we begin to wonder if, maybe, Fred had not better put his engineer's hat back on. . . . We are wondering if Arthur Murray is starting to give dancing lessons in telephone booths. Helene (dancing girl) Evanoff was seen coming out of a telephone booth last Monday noon. "It was not a telephone call," Helene said, "but a dancing lesson." . . . We wonder if Ed Arthur is batching and had dog biscuits for breakfast, instead of Southern baked biscuits. It seems Ed was doing quite a bit of barking the other day.

Say, Jim Young and Louie Miler, aren't you fellows a little too young to be sitting on the floor. I think it would be a good idea if you fellows would have your chairs bolted to the floor and then maybe you could sit on your chairs without falling off. We would like to see those two fellows riding a horse. . . . We hear that Mac McCray gave duck call imitations at the Sports Show recently and was very good. . . . We wonder what Red Smith was doing with all those tobacco cans that he suddenly decided to throw in the scrap can. Too bad there isn't any ice left so you could use those nice bait cans, Red, but it seems like 91 cans would last anybody a lifetime. . . . We would like to know if the fellows at the west end of Bldg. 26-2 are planning an amateur hour all their own as we could hear all sorts of animal imitations down that way about noon. . . . We wonder what Millie lost out at the parking lot the other day. Could it have been her car? Why don't you paint it red, Millie, and it will be easier to find. . . . Say, Earl Munson, how can you sleep every noon with all those coats and towels over your head? Are you afraid someone will take them?

So you don't believe that "Oscar" (that's THE Turtle) is as big as you've heard he is! Well, your reporter has the inside story from two very reliable gentlemen. These two turtlemen have a fool proof method for capturing the Fulk lake monster. Naturally they refuse to reveal their plans, but it has leaked out that it has something to do with a lasso. I think it is entirely unnecessary to say who these two stalwart (?) gentlemen are, but for the benefit of any outsiders the men in question are Ed (yes sir, pulled me right in) David and Fred (Hoot) Humbrech. . . . "Oscar" and Auburn didn't hold the complete spotlight this past week-end. Mr. and Mrs. Howard Sauers were basking in it also. The Sauers were married Saturday and the whole gang was at the reception which was a grand affair. We all wish the bride and groom the very best of luck and all the happiness in the world. . . . Speaking of the bride and groom, Emma Meyers and the girls in mailing had several cards from the honeymooning Langmeyers. Mr. and Mrs. Warren Langmeyer are enjoying the sunny glory of the state of Florida. Mrs. Langmeyer was very recently known as Pat Newlin. . . . 'Tis sure nice to see Norma Book back after her recent illness. . . . We are just a wee bit late but we wish Mr. and Mrs. Herman Ebel a happy anniversary last Friday.

Nothing cooks your goose quicker than a boiling temper.

Inquiring Reporter

WHAT ACTIVITY OF THE G-E CLUB DO YOU ENJOY MOST?

HAROLD H. FLETTER

Taylor St.

"I enjoy bowling the most as it is the only club activity that I actively participate in. It is a wholesome sport that all employees, men and women, may relax themselves throughout the winter season."

K. A. LONGENBERGER

Bldg. 2-1

"Since sports is my favorite hobby, I enjoy most the sports program sponsored by the G-E Club. I certainly am glad to know that we are going to have a baseball club again next season. However, the spring festival and fall revue are hard to beat."

GLORIA ERHARDT

Bldg. 18-3

"The Spring and Fall Revues given each year are my favorite G-E Club activities because they bring talented performers from other cities who are very entertaining; and also this type of show is rarely seen in our theaters."

GRACE HOON

Bldg. 26-5

"I enjoy basketball as a good sport and something that everyone isn't able to do. It is fast and exciting (sometimes) and no rain checks just when you think you are going to see a game."

BILL SCHINNERER

Taylor St.

"I enjoy the movies and other stage activities most. Also I think it gives many G-E employees and their families an opportunity to see shows which otherwise they might not be able to afford by paid admissions."

Celebrates 30th Year At G-E

Ford C. Zimmer, Taylor St. Laboratory, received a congratulatory letter upon the completion of 30 years service with the Company. Those attending the presentation Thursday, March 10, were (seated, left to right), W. Howard Miller, Assistant to Works Manager, Engineering; Mr. Zimmer, and Claude Summers, Engineer, Works Laboratory. Standing from left to right are: R. E. Kohl, S. A. Zimmermann, Howard Orr, C. E. Ream, Louis Reith and W. E. Histed.

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Hainzelmann

"Carmen" Dominique serenaded Ann Cuellar on her birthday the other day with an operatic tune. We urge you to accept Guy Lombardo's offer to join his band, and then he would have two "Carmens." In addition he would certainly have something different. . . . Didn't our half-pint girl friend Donna Smith look cute in her blue nylon sweater the other night? . . . Ginny Free says that piecrust has to be just so-o-o for her taste. You see Ginny never eats the filling, only the crust. . . . ATTENTION LADIES! Have a run in your nylons? Les Dunfee can stop those runs in a hurry. No pushing in line, please. . . . Irma Beard, who answers to the name "Jay Bird," believes in the old addage, "the early bird gets the worm." To prove it, she got two glasses of orange juice at our recent Elex breakfast. . . . Wonder who presented the fancy decorated birthday cake to Charlie Rockey. It seems to be a burning question around these parts, Charlie. . . . Art Horstmann has taken up carpentry as a hobby, and from what we hear about those cabinets he built, he must be really doing O. K. . . . Vic and Mitzie are trying to convince Gus to clean out the back seat of the "Chicken Coupe." Vic is tired of sitting in the rear seat with Gus's old wolfskin jacket, and besides Mitzie is so-o-o afraid of fire. . . . Maxine Luker is still trying to get straightened up in her new farm home. She says that if the company keeps coming, she will be a long time getting it done. Why not put the company to work, Maxine? . . . Happy birthday to Nellie Biltz and Roy Orr. . . . How about a light from that new lighter you received from your wife, Roy? . . . Did you notice Ernie Raypole's lip last Monday? He says his little boy hit him. Hm-m-m, we wonder. . . . Ellen Saul was all elated last Monday a.m., as she got to drive her Dad's new Mercury last Saturday. She reports that there is nothing like them. . . . Maggie Moore entertained company from Indianapolis last week-end and says that it was sure good to see the gang again. . . . Wonder why Jessie Wass had to climb through her window in the wee hours of the morning? . . . Lela Seibert, Berneta Welbaum, Mary Heymann, and "Braunie" will be more careful where they park the car in the future when they stop on the highway for a late chicken supper. . . . Congratulations to Jerry McKown, who finally broke down and got a different car. Sure hope that you like it, Jerry. . . . Gayle Goff tells us that she lost her whistle. We could supply you with a "wolf whistle" if it would help any, Gayle.

Beer, Zook Are Members Of Vocational Guidance Panel

W. E. Beer, Supervisor of Employment, and R. E. Zook, Supervisor of Personnel, were members of a panel at the fourth meeting of the Northeastern Indiana Branch of the National Vocational Guidance Association at the YWCA Monday. Mr. Beer served as chairman of the panel, which discussed "What Business and Industry Can Do for Vocational Guidance."

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

The first thing we would like to know is when Charlie Gable is going to bring in a few samples of his ceramics? After all, Charlie, how can we recommend your work to our friends when you won't even bring some ash trays for our desks. . . . The main topic of conversation this week still is high school basketball. All the fellows would give their right arm for a ticket to tomorrow's games, but they will have to be satisfied with just listening from their arm chairs at home. We want to wish Auburn a lot of luck in their final games and we hope they make good. . . . Anyone wanting information on the Pyramid Club should see Gene Foster. Gene is sure he is going to get a bushel-basket full of money one of these days and he is willing to share his chances with anyone willing to invest a dollar. Be sure to let us know when you get this money, Gene, and we will all help you celebrate. . . . We are sorry to see Ed Jenkins leave our Planning Section this week, and we wish him all the luck in the world on his new job. . . . I heard that Gordon Smith's dog nearly had a new playmate the other evening, Gordon discovered just in time that it was a black and white "Kittie" of the type that he didn't care to have around the house. We are glad, too, Gordon, that Duke left the "Kittie" alone, we would have hated to move your desk out on the roof. . . . That's it for this week, see you later.

Squares Women Plan Bridge, Style Show

A style show and bridge party has been planned by the Women's Division of the Squares Club to be held at 8 p.m. Thursday, March 21, in the Squares club rooms.

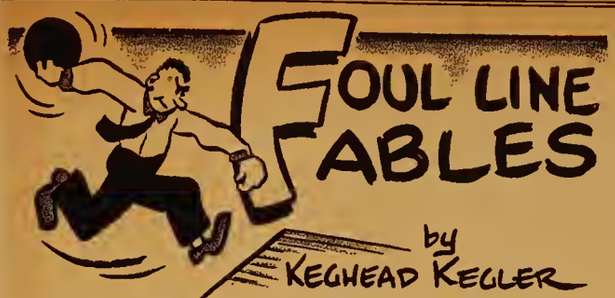
The committee chairmen are: Mrs. Marion Halleck, bridge; Mrs. Donald Motter, prizes, and Mrs. G. E. Hicks, food.

Assisting the chairmen are: Mrs. Jay B. Greer, Mrs. Ted Guglar, Mrs. Reese Gwillum, Mrs. Richard Hartigan, Mrs. George Hoopingarner, Mrs. Robert Huffman, Mrs. Wendall Hughes, Mrs. William Hunt, Mrs. Phil S. Potts, Mrs. Hodge Vineyard, Mrs. Charles Johnson, Mrs. Charles Koomjohn, Mrs. Walter Kruse, Mrs. Clifford Leegard, Mrs. Lewis Nelson and Mrs. Elliot Nesvig.

The style show will be presented by the Grand Leader department store.

HI-SPOTS OF BUILDING 4-2

by Marie Allen



Saturday morning, March 12, Fern Harshbarger and Doyle Roe of Zanesville were married at the Grace Lutheran Church in Columbia City attended by Mr. and Mrs. Charles Reed. They returned after a short trip to make their home on a farm near Zanesville. Our very best wishes to them. . . . People have more fun than anybody—especially people like Ed Glusenkamp. Last Friday noon while driving west on Berry street his old Buick stalled and no amount of coaxing could make it go again. Two big policemen ordered him to get moving. He told them he would be only too glad to do so, if they could move the thing he would be very thankful. He complied with their suggestion to call repair service, then settled down to wait for the tow car. In a short time sirens sounded and when the police patrol drove up, Ed had visions of a ride to jail, but instead of coming after him six big cops went into the bank. Ed avidly awaited the attending excitement, possibly the arrest of bank robbers but all he saw was an undersized slightly inebriated individual emerge from the building with hands high in the air surrounded by the six policemen. It seems he had wandered in and became confused and unable to find his way out. A search of him uncovered a bottle of spirits which was confiscated before he was loaded in the patrol to take him to the lockup. Grateful for the diversion of witnessing the discomfort of another and thankful that he was still a free man, greeted the approaching repair truck. . . . We are pleased to report that John Craig is improving following an emergency operation and is able to receive visitors. . . . Those peculiar sounds heard in the commutator group come from Bill Widdifield limbering up his vocal chords to get in form for his spring yodeling. . . . Floyd Loraine received a telephone message from his wife telling him to call for his shoes at the repair shop. He thought she had made a mistake until he looked at the ones he was wearing which he had picked up the night before at the repair shop, and discovered they were not his own shoes. Must be wonderful to have feet that will just wear any old shoes. . . . We have our Harry Anderson's word for it that the Harry Anderson picked up for speeding was not he. Who are we to dispute his word?

17-3 NEWSIES

by WILHELMINA BEETH—

Didn't Bldg. 17-3 have a ghost-like appearance last Friday? It didn't take long to get everything covered up so that they could clean the air-conditioning system. . . . Yesterday was wearin' of the green time. The bow of green was in the hair of many a colleen. . . . Next Monday if you have a heavy settled feeling, it is just Miss Spring touching you with a feverish hand. Just a note of warning. It is catching. . . . Joe Jensen was really digging down deep last week to pay his basketball bets. By the way, Joe is now a jack of all trades. He turned locksmith this last week. . . . Happy birthday to Gertie Wheat, Mabel Schaaf, Beulah Johnson and Esther Fox. . . . It's "hello" to Arthur Cromie and Roy Hans, newcomers to the early bird shift. . . . Congratulations to Arthur and Vivian Bottoms for their blue-bootied tax deduction. Also to Lois Sible Phares and her husband for their pink-bootied tax deduction. Both mothers are former co-workers. . . . Alberta Foulks was really ready to go home at noon last Friday. Too bad you had to fish your card out of the box and stay another three hours. . . . If you wondered why Leona Hollis was late the other morning, it was the small matter of having a flat tire. It was only flat on one side too. . . . Callie Sanders was a visitor last Monday. Tillie Nuttle visited us Wednesday and Ida Wilson Thursday. We were glad to see them. . . . Someone else we were glad to see was Betty Lupton after an extended illness. . . . Harry Chism has come up with a way of getting the Churubusco turtle. It seems that down at Kokomo they have the world's largest bull. Get this bull, feed it salt for a couple of days, lead it up to the lake for a good drink. By that time the lake would be drained. Give the turtle a kick in the posterior, and it would amble out on dry ground. Nothing to it at all. You can make up your own mind as to whether that is a lot of turtle or a lot of bull. . . . The confusion on the 536 line was because a mouse decided to build a nest among some coils. . . . Bertha McCague and Frances Hart gave a surprise party last Tuesday for their mother Lola McCague. She received many pretty gifts from her former co-workers. . . . Our sincerest sympathy to Marge Kennel in the death of her father, Ruby Minton in the death of her son, and Goldie DeLong in the death of her father-in-law. . . . Have you noticed the streamlining job Alice Brockmeyer has done? We really should turn her in as a Powers model. . . . Margaret Swain was helping Hap Hazard the other day when she fell.

Team No. 8 of the Apparatus League, with the help of Charlie Briggs' first 600 count and Don Waldrop's 254, rolled a season single high game of 1046 and second high three game of 2819. Charlie's 600 came on games of 194, 195 and 218 for a 607. The first one's the toughest, Chollie.

We have 200 counts of the last two weeks to report so here goes: Ross "Champ" Smith, 231; Harold Spath, 226; D. Pappert, 217 and 207; Dan Oesch, 220; Howard Hickman, 213; Don Waldrop, 213; Andy Anderson, 212; Johnny Aumiller, 212; Harold Fanning, 211; R. Roberts, 209; A. Thompson, 207; R. Dunten, 206; Charlie Briggs, 204, Larry O'Shaughnessy, 203; Erwin Aumann, Bob Blomker and R. Bressler, 201.

Masonic League

The League is developing another one of those close battles for first place. The Ionic, Gavels, Levels and Doric teams are all tied up for first. The Patrols and Composite teams are right behind just one and two games respectively.

There were only four 200 counts this week, but they are big ones: Jones, 229; Miller, 227; Art Crayton, 221, and Martz, 212.

Office League

The Blueprint team is enjoying a comfortable three-game lead over the Designers, Alternators and a virtually unknown team by the name of Dickason's Barber shop.

The new wood put a stop to the 200 counts this week as there were only six. Harry Goheen, 229; Frank Schlink, 224; Bill Piercy, 205; "Willie" Bushong, 203; Don "Red Hot" Waldrop, 202, and Vic Rump, 201.

Small Motor League

The battle of the first place teams, Production and Models, was won by Production three games to zero.

Lowell Welker bounced back into those 600 totals after a brief spell. Lowell shot games of 205, 183 and 215 for a 603.

Two hundred scores were rolled by Parks, 221; Hoffman, 214; Doehrman, 212; Matthews, 211, Erwin Auman, 206, and Ray "Lucky" Lindemuth, 201.

Bowling and Stuff

Hurry, hurry, hurry, get those entries in for the annual G-E Employees Tournament.

The G-E Club trophies given to men and women for high single and high three game totals are now on display at the club. The high scores are 279 and 247; the high totals are 694 and 596.

Let's hope we have some good scores to report next week, as the Brouwer Screwballs take off for Atlantic City to participate in the A.B.C. Tournament. A little old 3,000 count would do.

Eddie Kraft led the All Star Keglers of this city to victory over the famous Strohs Detroit Five. In a six game battle the All Stars toppled a total of 5,937 pins compared to the Strohs 5,894 total. Ed had the following 200 counts: 258, 232, 206 and 205. High man for the Strohs was Kenet with 200 scores of 253, 227, 205 and 201.

G-E Club Wins Two, Drops Two

The G-E Club basketball team played four games last week, winning two and losing two. They traveled to Tecumseh, Mich., last Monday and lost a 15-point decision to the Tecumseh Products team. Tuesday, March 8, they played First E. V. Church and won, 66-61. The following Thursday the club lost a close game to Wilshire American Legion, 47-50.

Monday they outplayed a strong St. Joe A. C. team to win 66-52.

M. B. A. SICK LIST

Robert Benz, Charles Johnloz, Joseph Moritz, Bertha Miller, Leo E. Miller, John D. Lamle, Magdalen Perrey, Joseph Rodermund, Christian Schwise, Basil Stephens, Gertrude Sunday, Waldo Barkley, James A. Clark, Clarence Duhamell and Warren Garman.

The Squares after winning six straight games dropped a 47-40 decision to the Firemen in the Interdivision Basketball League. This makes the Firemen champs of the second half with a record of eight wins against no defeats. They will meet Winter St., first half champs, in a three game playoff. The Firemen piled up a 17-1 lead in the first quarter. Although the Squares narrowed the margin, the winners led all the way.

Winter St. sharpened up for the playoffs by beating Taylor St., 57-17.

The Apprentice Men dropped one to Transformer, 33-26. The game was decided in the third quarter when Transformer made eight points while holding their opponents to none.

Fractional HP led for three quarters, but finally ran out of steam and lost to Small Motors, 29-20.

G-E Rod, Gun Club Beats International Harvester

The G-E Rod and Gun Club defeated the International Harvester team in a rifle match held at South Side high school, Tuesday, March 8. The Club team shot a 1,101 total, while Harvester's score was 1,062.

G-E ROD AND GUN CLUB

Two Bowling Teams Journey To Atlantic City

Fort Wayne General Electric will be represented at the American Bowling Congress Tournament in Atlantic City, N. J. The Brouwers' Screwballs will try their luck this week end, while the Fan Motor team hopes to bowl "its weight" the week end of April 1.

At the left are the team members of the Screwballs: Walt Mertz, Vic Rump, George Luedeman, Frank Matthews, and Les Shroyer. The other picture shows the Fan Motor team: Joe Eifrid, Merle Bennett, Andy Anderson, Larry O'Shaughnessy, and Hal Fanning.

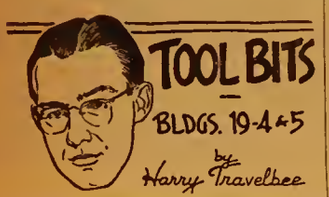
Main Office Tops Volleyball League

The volleyball season ended with the Main Office team losing only one out of 42 games played. The players on the Main Office team are Captain Ray Soughan, Jack Fox, Tom Fox, Kenneth Arnold, Arthur Rasor and Richard Wagner.

All eight teams of the league have maintained a good competitive spirit throughout the season. Each team brought new men into the league this year and are looking forward to having a good league next season.

The scores for the games played Friday, March 11, are as follows:

Main Office 15, 15 and 15: General Tool 1, 1 and 3.



Small Motor 13, 15 and 15: Squares, 15, 4 and 11.

Apprentice Draftsmen, 15, 7 and 16: Apprentice Machinists 4, 15 and 14.

Winter St. 11, 14 and 11: Taylor St. 15, 15 and 15.

STANDINGS

	WON	LOST
Main Office	41	1
Squares	32	10
Winter St.	22	17
Taylor St.	23	19
Small Motors	17	21
Apprentice Machinists	17	25
Apprentice Draftsmen	9	33
General Tool	4	38

"Oscar," the turtle, seems to be the main topic this week. We have reports that Vic Barcus is off work with a very bad cold as the result of being thrown out of the boat while on Fulks Lake hunting that 400(?) pound turtle. Swede Moser has talked Glen Hoon into flying him over the lake to see if they can spot the giant. Frank Druhot is raising some over-sized nightcrawlers. He claims there isn't anything in Indiana lakes that he can't catch on a hook and line—including the turtle. . . . Today I'd like to pay tribute to the never-say-die Tool Room basketball team. They didn't win many games this year, but with the material available, we think Coach Paul Yentes did a good job. . . . We had a recent visit from one of our war-time employees, John Aldrich, who worked for Ed Schafenacher. John is now working hard at the carpenter's trade. . . . We have some good news about Dave Lewis. Dave expects to be back on the job in the near future. Also, we hear that Bill Jeffries is at home and feeling much better. . . . Harold Lehman tells me that just because Mart Walsh refused to pay $10 for planing a board, he didn't think the lumber yard employee had grounds to call Mart a Scotchman. So that's why the chips are flying out on Rekeweg Road. . . . Don't be surprised if you see enough smoke rising out of Ray Renfrew's section to be considered a three-alarm fire. Clearing the atmosphere slightly you'll see it's only Ray smoking the foot long cigar that Walter Griener gave him for taking care of his section while at Tiffin on business. . . . If you think something smells fishy around here, think nothing about it. It's just Charlie Abbott, Lowell Welker, and Carl Einsiedel eating sardines and Norwegian herring out of the can. . . . Franklin Lebrecht and family are nervously awaiting the arrival of a new offspring. Yes, Franklin's old pet cow is expecting a calf in a week or two. . . . Norman Jackemeyer's new cement mixer is making so much noise that it even started the frogs croaking ahead of time.

Mill and Lathe Bldg. 19-5

Bob Goers has been transferred to Bldg. 17-4. To give him a good send off some of the boys in the lathe section brought in pie and cake for a little party. Good luck, Bob, and be sure to take good care of your fish and your railroading. . . . John Stetler will be at the Taylor St. plant for five or six weeks. . . . Russell Sage has a new device that may be used either to wash your eye glasses (when you have them on) or to wash out your eyes. All this is being done while you enjoy an attractive picture. . . . Harold Hoffman is getting so far back in his reading of the daily paper that it is going to take him a month of solid reading to catch up. One of the boys on the lathe asked him if he had read about the end of World War II to which he answered, "Yes," but he hadn't got to the story of the Beast of Busco yet. . . . One of the first things we heard about Myron Auer, a newcomer to the lathe section, was that he is a Central fan. Don't feel too bad about Central, our team lost also. . . . Everyone has been talking or reading about that terrible beast of Busco so much that the boys in Bldg. 19-5 are forming a pool to try to guess his weight. The guesses are from 50 to 600 pounds. Word has come to us that the Armory has been engaged to display the turtle when it is caught.

Receives Gift At Retirement

When Ross A. Hindman left last week for retirement, his friends and co-workers at the Taylor St. plant gave him a wallet as a going-away gift. Attending the presentation were: William Smith, John Heine, John Schlicter, Jackson Binkley, William Kizer, Jesse Devaux, William Alt, Mr. Hindman, Lester Green, Evan Alton, Carl Heemsoth, Clarence Rothgeb, Pearl Chenoweth and John Burnett.

Today, the 18th, is an anniversary day. You may have forgotten the date—and you may not want to be reminded of it—but we returned to work just three years ago after a forced nine week vacation(?)! . . . History in the making—the announcement of the appointment of R. E. Zook to new duties in Schenectady was received with both delight and regret. We are sorry to have Mr. Zook leave and delighted with his advancement. We congratulate I. H. Freeman on his appointment as Supervisor of Personnel, we are sorry you are leaving Bldg. 18. . . . Emily Guth who has been working with Mr. Freeman is now in Bldg. 18-3 with L. N. Schneiders in the Transformer Accounting Section. . . . We hear, via the grapevine, that Helen Gellert, Bldg. 18-2, is a member of the Bldg. 18 "Building Club"—a ranch type house is in the making out Foster Parkway. . . . I hope that you were not a victim of the Federal Income Tax penalty percentage after the 15th. I suppose you made a resolution (just like shopping early for Christmas) that you won't wait until the last minute next year. . . . With Income Tax, Red Cross over and basketball almost finished we have nothing much to worry about. . . . Welcome to Chester Kowalski of Bldg. 6-2 who is now on the General Superintendent's Staff. Thursday night of last week a group of his friends gathered at the home of A. E. Leider to wish him success in his new assignment. . . . We have just learned of the injury sustained by Mrs. T. T. King, who with Mr. King, our former second shift supervisor, have been spending the winter with their daughter, and family in Lincoln, Nebr. We are very sorry and hope that she will soon be able to return home. . . . J. T. Fredendall, a former Bldg. 18 employee who retired a few years ago, with Mrs. Fredendall are living at 399 State Street, Albany, N. Y. . . . The Data Bureau in Bldg. 18-4 was invaded by the "Busco Turtle" as early as last week. Dorothy Long brought in fantastic tales of this wonder. How it travelled from one body of water to another and finally settled in its present location. Time will tell! . . . We welcome Jeanette Burkhardt back to Bldg. 18-4 after a four weeks' illness. . . . Did you notice a hushed silence in Bldg. 18-2? It was all caused by C. O. Olson losing his voice—at this writing he is still having difficulty. . . . Judy Gregory Lowe, formerly of Data Bureau, now living in Phoenix, Ariz., has a brand new nine pound son. . . . The girls in the Accounts Receivable section of Works Service Accounting enjoyed a potluck Monday. . . . The Bldg. 18-1 Payroll girls must have had a quiet weekend and nothing happened to Mae Lacey so the spell is broken. . . . Mary Cooper and Lucile Curie, as well as Mart Einseidel, Elmer DeBolt, Frank Peternell of Labor Relations are all very mum on their news—so to get their names in this column I will have to start manufacturing some, Luella Parsons type. . . . I have heard it said that what this country needs is less stress on dollars and more on sense! . . . Have you seen the little sign cards which J. E. Estabrook, Bldg. 18-2, hangs on his desk each day? If you have not, you should. They are a great help to anyone who must approach him—for instance last Friday the card read "I feel lousy, Thank you!" On Monday the good news was "I feel better—lots better." I would suggest that this idea be adopted by others—'twould be a great help in selecting the right approach tactics.

Apprentice BROADCAST

By Myron Auer

Well, all you lucky students, relax. You needn't worry about reading this lingo from me after today for this is my last article. Aren't you zipped up about that? I am. . . . The third and final semester of this year is one week old. Just one more set of those pesky tests and then we can rest. I've noticed Dick Gebert is steering clear of the school since the tests. Come on back, Dick, we won't waylay you. You can come around in peace, honest. . . . "Curley" Mannan had a really brilliant drawing class. One problem in his test had nary one correct guess. He sure slipped one in on us that time, fellows. . . . "Dig in" and "Hit the dirt" were the commands early last week in the grinding section as the fireworks really cut loose. There were fox holes everywhere in the near vicinity. Zollinger can give further details if desired. . . . Dewey, our successor to Jess, is leaving for Bldg. 8. They come, they go, but it seems to me they're always going. . . . The reason White, Wagner and Aughinbaugh catch so many fish is because they catch them over and over during the week. Wagner has caught the same bass at least four times. Let's eat him and forget him, Dick. . . . Not to be outdone, Mort tells of a fish jumping into his boat while he was rowing to sbore. He came fairly close to land when a rough storm blew up and lightning struck nearby and it scared this fish so bad it jumped right into Mort's lap. How about that? Fact or Fiction? . . . Don Macke's wife wanted Don to have that "New" look about him. We know those long stragley skirts are in style, but please shorten his apron just a little. . . . Bob "Errol, Simon Lagree" Barnes bowls much better with his life's companion behind him. Either he hits 170 or she gets a new hat. (Boy, is she supplicd). . . . Zurbuch got his signals crossed on a certain rush job. Stop looking cross-eyed at these special assignments and you'll fare better, Kenny. . . . The draftsmen have been pretty busy these days with tests and children to occupy their time, so we have little in the way of news. . . . Frank Woenker is busy getting softball rolling, however, Frank claims he is going to have uniforms and all for the boys this year. The way the guys talk you are really going to have to know your ins and outs about the game to get on the team this year. We hope you get results, Frank. . . . Jack Kirlin and Carl Hubartt are busy building a sail boat to use this summer. They acquired the bug from Lew Davis. Jack claims they even had to make a beam compass 13 feet long. We hope you guys have good results with them. . . . John Leffers is still plugging away at his bowling game. He has been bringing his average up steadily this year. He needs only six pins to match his wife. Keep going, John.

FORT WAYNE WORKS
GE NEWS

Whosoever shall deny Me before men, him will I also deny before my Father which is in heaven.

—Matthew 10:33

Volume 32 FORT WAYNE, INDIANA, FRIDAY, MARCH 25, 1949 No. 12

11 Securities Corp. Directors Honored At Dinner Monday

Company To Present Certificates To Local Men For Their Service

Eleven directors from Fort Wayne of the G-E Employees Securities Corporation will be presented certificates from the Company at a dinner Monday noon, March 28. The certificates express appreciation for their long and faithful service in handling Fort Wayne Works employee savings through this plan.

A total of 78 men, from throughout the Company, have served a total of 279 years as directors or representatives of the Securities Corporation during the 25 years of its operation.

The men from Fort Wayne and the years they have served are as follows:

F. G. Duryee (retired), 1923-24 and 1926; W. F. Koenig (retired), 1927-28; H. E. Zimmerman, 1929-

(Continued on Page 4)

Apparatus Dept. Shows Reduction In Severity Of Accidents Last Year

General Electric has recently released its safety report for 1948, which shows an improvement in the reduction of the severity of accidents for the Appartus department of .445 in 1947 to .279 in 1948. The severity of accidents is based

Wilson Testifies On Labor Law Before House Sub-Committee

G-E President, Vice-President Suggest Fair Labor Legislation

Appearing before a special sub-committee of the House Committee on Education and Labor in Washington late Tuesday night of last week, G-E President C. E. Wilson and Vice President L. R. Boulware re-affirmed their conviction that any new labor legislation should be in the interest of the whole public.

Mr. Wilson, in his opening statement, said:

"My assumption is that what we all seek here is a labor law that serves the public interest—that is fair to employees, to unions, to employers—while adequately protecting innocent bystanders and the whole public.

"Three years ago, when I testified on this same subject before this

Immediate Cash Payment Given To Beneficiaries Of Deceased Employees

Immediate payment of as much as $200 to the beneficiary of a deceased employee to meet urgent cash needs of the beneficiary is now possible under a special arrangement made between the Company and the Metropolitan Life Insurance Company, it was announced today by William W. Trench, Secretary of the Company.

The payment, made only if desired by the beneficiary, would become an advance against the amount of the death benefits owing to the beneficiary under the terms applying to the "Free" insurance of the Group Life Insurance Plan.

In announcing the new arrangement, Mr. Trench said:

"Although normally it is possible to complete arrangements for payment of the full amount of the Group Life Insurance within a relatively short time, in many cases the immediate need of funds for making funeral arrangements, and other matters, is most acute."

The advance of money will be only where there exists no doubt about the status of the beneficiary.

The Group Life Insurance Plan provides for "Free" insurance, paid

Decatur Employees Give $367 To Red Cross Drive

Employees at the Decatur plant contributed $367 to the Red Cross Fund-Raising campaign, held from March 9 to 18. This does not include the Company's contribution to the drive held in Adams county.

Father, Son Are Members Of Quarter Century Club

Joe and Jack Fox are shown above looking over a copy of the WORKS NEWS from 25 years ago.

Joe Fox, retired, and his son, Jack, Bldg. 6-2, have the unique distinction of being the only father and son combination in the Quarter Century Club.

The elder Mr. Fox, before his retirement in 1941, was a telephone maintenance man 28 years. Prior to his engagement at General Electric, he worked at the Home Telephone Company. He worked there 14 years.

Since his retirement, Mr. Fox has had a hobby of growing flowers. He has a large garden the size of two lots, and besides flowers, he also has a goldfish pond. In his earlier days, Mr. Fox was active

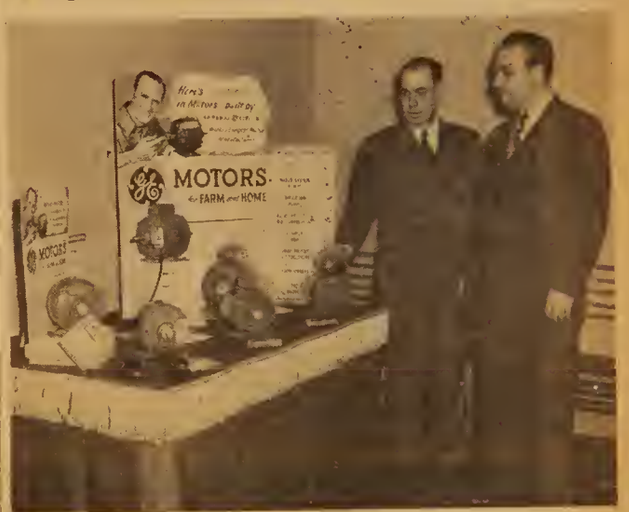
SQUARES CLUB TO HAVE QUIZ PROGRAM TONIGHT

A 20-Question Quiz program will be the feature of a Squares Club open house tonight at 8 o'clock in the Squares hall. Prizes will be awarded to the winning contestants, it was announced today by W. H. Connor, program chairman. Members, their families and friends are invited.

Elex To Hold Rummage Sale



The Elex Club will have a rummage sale Friday and Saturday, April 8 and 9, at the home of Dorothea Slyby, 308 W. Brackenridge St.

The Partizan chapter will be in charge of the Friday sales, while Elex will supervise the sales for Saturday. Anyone desiring to contribute clothing or household goods for the sale should contact the Personnel offices at the Broadway or Taylor St. plants.

Reservations for the two Elex Easter parties—Monday, April 4, for the day girls and Wednesday, April 6, for the night girls—is Wednesday, March 30. Tickets are $1 and can be purchased from the contact girls.

The Melody Trio will be the featured attraction for both parties. Dolores Patterson, vocalist from Bldg. 26-2, will also sing for the day girls' affair.

FHP Teamwork Brings Company Large Order For Utility Motors

A. W. Bartling, Manager of Sales for the FHP Motor divisions, discusses promotional aids and quality features of FHP Utility Motors with W. B. Davis, buyer for the Western Auto Supply Company, Kansas City, Mo.

W. R. Boggess of the FHP Motor Sales Divisions announced today that an order for a substantial quantity of FHP Utility Motors has been secured from the Western Auto Supply Company.

Close teamwork between the Engineering, Manufacturing, and Sales divisions helped in obtaining the order when W. B. Davis, buyer for Western Auto Supply Co., recently visited the Fort Wayne Works.

Prior to Mr. Davis' visit, J. H. Behm and Charles Koomjohn made preliminary design calculations on a rush basis to enable the Company to meet the needs of Western Auto as to the best values possible for their market. Through the efforts of F. H. Campbell, Superintendent of Div. 14, a sample motor, in which Mr. Davis was interested, was made available within four hours without taking the time of making a requisition or drawings. Mr. Davis visited the Decatur plant where E. W. Lankenau and

Every Easter Seal You Buy Helps A Crippled Child

There are approximately 200,000 crippled children under the age of 21 in the State of Indiana. The Indiana Society for Crippled Children and its affiliated county chapters is the only agency in the state giving all kinds of service to individuals with all kinds of crippling conditions. A great many children after best physical correction are able to adjust to normal life, but there are thousands who are unable to do this. Cerebral palsied children, children with rheumatic heart, those who have speech defects, impaired hearing, defective vision, victims of poliomyelitis, and those of many other disabilities make it necessary for them to have special education and training. There will always be a few who will not be self-supporting, but they are certainly entitled to the best kind of life that we can give them.

The Society does not duplicate the service of other agencies, but cooperates with them in giving a complete program and using their funds where the funds and facilities of other agencies cannot reach.

The five points of the Society is: (1) Early Discovery; (2) Medical Care and Treatment; (3) Education; (4) Camping and other recreational programs; (5) Vocational Training and Training Employment. The Society plans a very flexible program in order to meet the needs of each individual.

The sale of Easter seals provides funds to carry on the Society's direct service program. Forty-four counties, including Allen County, are now organized. Only 8.3% of the Easter seal sales go to the National Society for their service program. Therefore, 91.7% from the sale of seals remain in Indiana.

The Rev. H. H. Backs, president of the Allen County Society for Crippled Children, states that approximately 100 children and many crippled adults will be assisted in Allen County through the agency of the Allen County Society for Crippled Children.

Every Easter Seal you buy helps a crippled child

HUGH CRANE discusses Employment, Production, Prices

NEW YORK—A lot of people are arguing about whether we're having a "recession" or not.

And no wonder. It's like the story of the three blind Indians who described the elephant. One felt his hind leg, one his ribs and one his trunk, so they all came up with different answers. And the United States is an elephant of a country. Out in Pittsburgh they're still running full blast piling up new records in steel production trying to meet the demand; but up in New England they're down to one shift and less in the cotton and woolen mills with thousands of people out of work.

Conditions Generally Good

How bad has the set-back been? Well, here are some reasons why is hasn't been so bad, except in certain special cases.

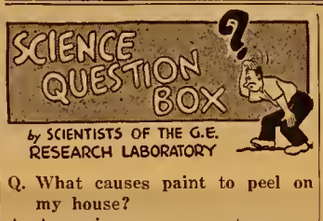
To begin with, it's been prices, not production rates, that have tumbled. Farm prices have slid below support levels (farmers have been selling grains that couldn't qualify for support loans). Gray market prices have sagged toward mill and list prices. Some items like industrial alcohol and cocoa have taken dizzy falls. And even nonferrous metal prices have turned down for the first time since before the war.

But that's not necessarily bad. As an instance, the oil companies have been inching prices down for several months now—but oil production and consumption are both still well above last year. And that not only isn't bad but it's what we've been hoping for—an end of inflation without an end to high production and consumption.

Production Picture Good

As for the general production picture, it doesn't look so bad either. National income, steel production, electric power output, and even total employment are still running ahead of last year.

But here you get into statistical complications. For while total employment is still larger than a year ago (by a very small amount), total unemployment is also above last year. The explanation is that the population of working age has increased slightly, and most of this slight increase has been added to the unemployment, not to the employment figures.



That looks good—but then you get into another complication. True, as many people are working now as a year ago. But they aren't working as many hours a week. There's been a good deal of spreading some abrasive powder, such as emery, silicon carbide or even fine sand, suspended in water or oil as a carrying agent, should be applied to the cutting edge. Move the rotating tube back and forth from the bottom frequently, so as to feed the abrasive into the hole. It is a good idea to have a support inside the bottle, so that the piece cut out does not break through too quickly.

the work. The average work-week is down between one and two hours.

Productivity Increasing

You would think that would show up in the production figures. But here you get into another complication. For its possible for the figures on production to go up slightly while employment (in total hours worked) goes down slightly. This is because productivity has been increasing in the last year as American industry has spent billions of dollars on new and more efficient machinery.

Gist of the story is that so far as the country as a whole is concerned, the recession to date has been of such small proportions that the statisticians have to take micrometers to measure it. There is unemployment in New England, in New York City, and in a few places in the South and Far West. But the rest of the country is going full blast.

Q. What causes paint to peel on my house?

A. Assuming you are not near a factory or chemical plant that generates fumes that affect the paint, it is probably due to moisture in the wood. This may come from the wood being too green when it was painted, or from moisture which penetrates from the inside. The type of paint used should not make any difference. Waterproofing the wall before painting will probably help.

Q. How can I make a one-inch-hole in the bottom of a bottle?

A. Get a thin wall metal tube about an inch in diameter. Place it in a drill or some other device by which it can be rotated while in contact with the bottom of the bottle. While it is turn-

The OLD PHILOSOPHER Says:

In the newspaper business some one is always asking a reporter, "What is news?" You'd think everybody knew what news is. It happens all the time and all around us but somebody's always asking the question. Well, news is notbing more than what happens to you and me and all the rest of us in this world or what happens to our possessions. And that brings in another constantly asked question, "What is an accident?" Everywhere you go you hear someone ask it. We've gotten pretty conscious of that word "accident" and you might think everyone knew what it is.

Well, as good as the accident record is compared with a few years ago, it would appear tbat lots of folks don't know what the answer to the question, "What is an accident." About the best definition I've heard in a long time is this: "An accident is something that happened when you didn't think it was going to happen." I don't believe you could find a clearer answer. Accidents are always like that. Just when we get sure nothing can happen to us, then is the time to watch out.

Meet the President

Welcome, Sweet Springtime! Comes a warm day, and Art Rowe begins talking about golf. It you'd like some of that Good Golf Gas, see Art. We overheard him discussing his scores, and he mentioned shooting in the eighties! That's pretty good, Art—how'd you make out on the second hole? . . . To Konvalescent Krakower: Hurry and get well, fellow, we're all saving our tonk money for you. . . . With Spring comes Easter, and with Easter comes Easter Seals—for the aid of crippled children. Buy Easter Seals, and you're buying a better tomorrow for a lot of unfortunate kids. Is there a better investment in the future of this wonderful America of ours? . . .And speaking of Spring: We can't seem to get ourselves away from this subject, so we thought we'd pass on a story concerning this lovely season. This tale was found after examining three joke books, searching for a Spring joke—we were surprised by the apparent absence of jokes about Spring, this was the only one we found! It was a warm Spring night, and the young man was overcome with amour. "Darling, be mine," he pleaded. "If you refuse me, I'll die!" She refused him, and 50 years later he died. . . . Welcome to Bob Eddy in the Ballast Sales Div. Bob, you strike us as being a man who already knows a nickel from a dime, so we'll not bother with the usual set of warnings—just relax and enjoy us! . . . Ah, yes, Spring! Oops —that reminds us—gotta take a bath!

Three Granted Patents

C. A. Thomas

A patent has been granted to Charles A. Thomas on an improvement in brush construction for commutator-type motors. Mr. Thomas is a group leader in the FHP Motor Development Engineering Division. His invention consists in splitting the brushes of the motor into two equal halves, inserting insulation between the halves, and inserting a rectifier in series with one of the halves in such a manner as to prevent short circuit currents from flowing between the brush halves during commutation. Mr. Thomas has been employed by General Electric since 1935 and has worked in the FHP Motor Engineering Divisions since that time. This is his fifth patent. He filed his patent application Feb. 5, 1948.

K. M. Feiertag

Karl M. Feiertag has been granted a patent by the United States Patent Office on his invention of an improved device for assembling motor cases. Mr. Feiertag is a draftsman in the FHP Motor Development Engineering Division. His invention consists of a novel construction of a case and means for holding the motor in the case. It was particularly designed for SMY inductor motors, but is being extended to apply to larger size motors at the present time. Six claims were allowed by the Patent Office covering the new features embodied in this invention. This is Mr. Feiertag's first patent. The patent was one of 670 that were issued last week.

H. M. Stephenson

The United States Patent Office has granted a patent to Hugh M. Stephenson on his invention of a combination overload coupling and limit switch. Mr. Stephenson is a group leader in the FHP Motor Development Engineering Division and has been employed by General Electric since 1916. His invention consists of a novel design for a device to couple a motor to its load, which has the ability to stop the motor whenever the load exceeds a predetermined value for either direction of rotation; or when the mechanism reaches any preset limit of its motion. It is intended for controlling aircraft motor mechanisms. Twelve claims have been allowed covering the unique features of the device.

Wilson Testifies

(Continued from Page 1)

Committee in the 79th Congress, I stated my belief that in this country we have passed the era of considering the interest of either management or unions as being pre-eminent. I urged then that the interest of the whole public should be accepted as paramount. I urge it again today."

Assuring the Committee that G-E had always attempted to be completely objective in its approach to employee and union relations, Mr. Wilson pointed out that the company was among the first, if not the first, to be genuinely receptive to the formation of some of the newer national unions in the mid-1930's. He said, further, "We believe that fair, able, and independent representation of employees by unions is thoroughly in keeping with the principals and actualities of such a highly industrial republic as ours."

Room For Improvement

Concerning the proposed labor legislation before Congress, Mr. Wilson stated that he felt the present law is a substantial improvement over the Wagner Act. "However," he said, "I think there may well be room for some improvement in the present law."

Concluding his prepared statement before the Committee, Mr. Wilson remarked that his testimony was substantially the same as that which he had presented before a Senate committee recently. He said that, in his opinion, "An adequate and fair labor law—by whatever name—should provide at least the following:

"1. Protection of the public."

"2. Protection of the rights of individual employees from abuses by employers or unions."

"3. Protection of legitimate rights of both unions and employers."

"4. Requirement of equal responsibility on the part of both employers and unions."

"5. Protection of free speech for both employers and unions."

"6. Protection of freedom to earn a livelihood."

Boulware Presents Brief

Mr. Wilson at this point introduced Mr. Boulware, who presented a prepared brief containing the G-E recommendations for adding to and strengthening the present labor law.

Mr. Boulware prefaced his testimony by emphasizing that G-E was offering these suggestions merely as conclusions based upon the Company's experience in the field of labor and union relations, with the hope that they might prove of value to the committee in reaching a decision on any new legislation.

Among the points suggested were the following:

Banning of the closed shop.

Continuation of the ban on secondary boycotts.

Strengthening of the present law covering featherbedding practices.

Strengthening provision of the law giving greater protection to the public in so-called "national emergency strikes."

Provide adequate protection against mass picketing and violence.

Extending the non-communist affidavit requirement to cover all officers and paid representatives of the unions as well as to all corporate officials who meet with them in bargaining.

Retention of the present safeguards for free speech to both management and unions.

Retention of present requirements for mutual responsibility of employers and unions.

Continuation of the ban on political contributions from the treasury of unions and by corporations.

Separation of the functions of the counsel and the board.

Exemption of supervisors from bargaining with employers, as in the present law.

Instances Cited

Mr. Boulware cited specific instances of G-E's experiences with these points and recommend their careful consideration by the Committee.

Following presentation of the prepared statements a period of questioning by the Committee was carried on in spirit of mutual respect and confidence. Due to the lateness of the hour, it being after midnight the brunt of the Committee's examination was handled by one man, Congressman Jacobs of Indiana.

The major portion of the time was given over to a discussion of the recent questionnaire which General Electric prepared and mailed to all employees and to citizens in various parts of the country.

This was the questionnaire which asked persons who received them to answer 18 questions about the proposed new labor legislation by writing in "yes" or "no", and then mailing the sheet to congressmen or senators.

Received Many Forms

Mr. Jacobs indicated that he had received a considerable number of these forms and he was concerned as to their accuracy.

He asked Mr. Wilson if he felt that such matters as this weren't too involved with legal complications to be answered by a simple "yes" and "no" questionnaire.

Mr. Wilson stated that there was no attempt to influence the Congress as to the means or legal approaches to their solution. Rather, he said the idea was to attempt to get the public viewpoint on the broad general principles involved. And he felt that was possible through the questions contained in the questionnaire.

Further discussion by Mr. Boulware brought out the point that G-E did not have in mind the "selling" of the present law, but instead the attitude of the public on any new labor legislation.

Held in High Esteem

The session was marked with several statements by committee members to Mr. Wilson that they held him in high esteem as a man and a citizen, and that his statements would therefore be given sincere consideration.

At the conclusion of the hearing, Mr. Wilson made a statement to the Committee assuring them of General Electric's approval of legislation leading to the elimination of discrimination of any kind in the matter of a person's right to earn a livelihood.

Manners easily and rapidly mature into morals.

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

We have the first week of Spring tucked under our belts. Everyone is really getting into the swing of things, the gals with their spring housecleaning, and the guys are all getting those casting and fly rods in shape. Last Monday was really a perfect Spring day, but, of course, we never know what that Ole Man Weather has up his sleeve. Here's hoping he gives us lots more of the same. . . . Those three little girls, Vera Keefer, Lois Burry, and Anita Fitch, are again planning a tennis match for this summer. We advise Anita to get plenty of sleep before the big day, as we remember what happened to her last year. . . . We understand that Helen Moring does some fancy acrobatic stunts when she cleans house. . . . Joyce Schroeder seems to know all the answers on medical problems. She has an excellent remedy which she recommends for the perpetual pill consumer. . . . By the looks of Helen Fraser's lunch pail, we decided her appetite must be growing. Helen now ties a string around it to keep it from opening. . . . Ducky Drake seems to be a busy guy these days. We hear that he is remodeling his home and also giving his furniture the "new look." . . . WANTED: A coffee pot for Mae Morgan. Mae told us that she forgot to turn off the gas under her coffee pot when she went away from home the other day. . . . A belated birthday wish goes to Art Luessenhop last Sunday. Many happy returns of the day, Art. . . . We are seeing a lot of new and old faces in our Inspection and Test section. We welcome them all. Among them are Edmee Dowden, Kathryn Landis, Lucy Woodward, Lois Burry, Ollie McBride, and Joyce Boyd. . . . We also welcome our new student engineer, Dave Chambers; and hope that you will enjoy your stay with us, Dave. . . . An open letter to the girls on the second shift: I deeply appreciate the lovely St. Patrick's birthday party held in my honor. Many thanks to the following girls who participated: Margaret Kenyon, Helen Moring, Mabel Parker, Charlotte Brunner, Daisy Tannas, Vera Keefer, Joyce Schroeder, Anita Fitch, Helen Orr, Irma Beard, Jessie Wass, Lela Siebert, and Millie Snyder. . . . Your second shift reporter, "Braunie."

Immediate Benefits

(Continued from Page 1)

wholly by the Company, and "Additional" insurance, paid for by the employee. The plan provides that payment of the full amount of the "Free" insurance will be made when the named beneficiary is a dependent. The full amount of "additional" insurance is paid regardless of the dependency status of the beneficiary.

Mr. Trench, in commenting on the Group Insurance Plan, stated that at the present time more than 158,000 G-E men and women are participating in the Plan, and that since the Plan first became effective over 29 years ago more than $34,000,000 has been paid to families of G-E employees.

COUNT OFF 10-20-30

Taylor Street DIVISION 17

by Dorothy Heinzelmann

We extend our best wishes to Gerry Fry, who quit last Saturday, and who will become Mrs. Robert Simmerman, April 2. We will all miss you, Gerry. . . . Ed Saxton went bowling at the G-E Club alleys last Friday night and he forgot his bowling shoes, so he rented a pair at the club. When it came his turn to bowl, he got up, poised, threw the ball, and plop he went over the foul line, and the ball went into the gutter. Ed picked himself up, retrieved his ball and went through the same motions again, and again he went plop, and said ball into the gutter. Of course, Ed is one of those guys who says "if first you don't succeed try, try again," so he again picked himself up and again he went plop. By this time he was getting just a mite disgusted, and then he happened to notice that he had on left-handed bowling shoes, so off comes the shoes, Ed proceeded to bowl in his stocking feet, but then he found that the floor was too hard for that. He finally called home and had his sister bring him his own bowling shoes, and from that point on he got along fine. No more plops, and no more gutter balls. . . . Another new idea has hit Div. 17, and this time it is the guessing of the weight of the "Busco Beast." The guesses turned in so far have been anywhere from 10 lbs. to 400 lbs. and someone even guessed that it is an Old Model "T" car top. So step right up and place your guesses, folks. . . . Neva Lutz was feeling very low last Monday as someone poisoned their dog last Saturday and they had had him 13 years. We don't blame you, Neva, and in our estimation that is about the lowest thing a person could do. . . . Andy Anderson sojurned to Gary, Ind., last Saturday to bowl in the State Tournament, and Monday he was very unhappy about the whole thing. He not only was unhappy with his bowling which consisted of two 200 games (the third you will have to ask Andy in person) but he was also unhappy to think that he was a 45-minute drive from Chicago and didn't go. . . . It seems as though that well-known club that was making the rounds a week ago has fizzeled out, but we hear that they have a new one started called the "Nickle Sap Club." Wonder why they had to put the "Nickel" in it? . . . Charlie Engle says he has just about run out of stories, and if they don't get that "Turtle" soon he won't know what to say next.

FHP Teamwork

(Continued from Page 1)

his organization demonstrated the careful workmanship and testing given to the Utility Motors. He was especially impressed with the high efficiency and ingenious mechanization employed at Decatur.

The Western Auto Supply Co. will sell these motors through its many stores throughout the nation.

Some men drop a few copper cents in the collection plate and expect them to buy him a golden harp.

Completes 30 Years Service

Esther R. Walborn, FHP Motor Division No. 1, completed 30 years' service with General Electric, Friday, March 18. On this anniversary, she received a congratulatory letter for her service with the Company. Attending the presentation were Walter H. Sunier, Supervisor of FHP Motor Inspection and Test divisions; Esther Walborn, Harry Haberkorn, Ted Bain, and O. J. Mettler, Supt. of the division.

Apparatus Dept.

(Continued from Page 1)

on the number of lost-time accidents for one million man-hours.

In comparison with the other departments of the Company, the Apparatus department ranked seventh in frequency of accidents, fifth in severity, and seventh in a combination of frequency and severity of accidents. The frequency of accidents is the number of lost-time accidents for one million man-hours.

The Fort Wayne Works ranked first in the Apparatus department in its reduction of the severity of accidents with .076. Fort Wayne was third in frequency with 3.20 and in the two combined with .24.

Securities Corp.

(Continued from Page 1)

30; H. C. Prange (retired), 1931-32; W. P. Altekruse, 1933-34; C. F. Braun (retired), 1935 and 1942; W. C. Buuck, 1938-39; E. G. Sauerwein, 1940-41; L. D. Hopper, 1943-45; G. W. Kline, 1946, and E. R. Blotkamp, 1947-48.

Three Sign Certificates

Signed by President Charles E. Wilson, Chairman of the Board, Philip D. Reed, and W. O. Hay, Jr., President of the Securities Corporation at its liquidation last August, the framed certificates bear this inscription:

"On the occasion of the retirement from active service of a great institution, the G-E Employees Securities Corporation, which has cared for the savings of tens of thousands of G-E employees in the period 1923 to 1948, thus giving them help in times of sickness, heavy educational costs, old age and other periods of personal need, we the undersigned award this certificate to ..... for his able service and interest in his fellow employees."

The 78 recipients of certificates included 12 stock directors, 42 bond directors, eight representatives, and 16 who held office both as bond directors and representatives.

Ended Last August

The Corporation ended its existence last August by paying a premium of 15 per cent on the face value of the bonds in the hands of 21,000 bondholders. This, with interest, meant a payment of $116.40 for every $100 of bonds outstanding. In addition to the bondholders approximately 26,600 employees benefitted in the premium payment by their participation in Additional Pension Trust.

President Wilson announced last year that the liquidation was decided upon because the Corporation could no longer serve the investment needs of the greatly expanded total of employees of the Company, which was nearly 200,000. The Securities Corporation was replaced last October with the G-E Employees Savings and Stock Bonus Plan.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

We have heard of the absent-minded professor doing some crazy things, but when Earl Wynn put black drawing ink in his fountain pen, that was about the tops. Next time you want to fill your pen, Earl, ask someone to read the labels on the bottles for you. . . . Gene Foster has a new theme song these days "All I Want For Christmas Is My Two Front Teeth." Christmas is a long way off, Gene, maybe Santa will visit you earlier if you are real good. . . . Perry "Dog House" O'Neill was really true to the Irish on St. Patrick's Day with his green shirt and tie but Gordon O'Smith had him beat because he not only had a green shirt and tie but he had the trousers too. . . . Who is going to bring the birthday cake in to celebrate all the birthdays we have this month? We want to say Happy Birthday to Ann Smith on the 26th, Charlie Gable on the 27th, and Hugh Neely on the 29th. . . . Peggy Turschman had quite a freak accident the other day, but for some reason she is having a hard time making people believe that it was a chicken liver popping out of the skillet that made the marks on her forehead. It's a good story, Peg, and you stick to it. . . . Welcome to Francis Thomas who has joined our Planning section this week. . . . Kenny Sheehan said he enjoyed his trip to Detroit last Friday and only wishes he could find an excuse to go more often. . . . That's about all for this week, see you later.

Three Elected To Society Of Professional Engineers

Marvin A. Baker, Warren B. Brighty and Erwin W. F. Aumann have been elected to membership in the Indiana Society of Professional Engineers. All three are design engineers in the Motor and Generator divisions, Bldg. 31-2.

Tanks To You From Plating-Two

By Marie Lantz

According to our transit passes, Little Turtle launched his career in these parts as an Indian chieftain some 169 yrs. ago. Though famous for bloody battles and massacres, we know now that he rests in peace. What we don't know, however, is whether or not the BIG TURTLE, who has gained fame as the "Beast of Busco," rests at all. At least, if he does, he moves his resting place and leaves the farmers of Fulks Lake and their fans at unrest. . . . The art of ad-libbing seems to be another one of "BINGO" Walt's aptitudes. Some of our friends, non-G-E'ers, attend both Firemen and Elex Bingos just to enjoy Bill's antics. Sure, they would like to win, but they consider they're well repaid by Walt's walloping wordage. As an M. C. (more clowning), they say, he's really O.K. Just the life of the party by his bright repartee. . . . There were a few here who showed their true colors last Thursday. Some of the descendants of Erin were a wearing o' the green. There were others, who, for a' that, showed their love for St. Pat, though his color was not seen. Irishman Jim Daley sported a green bow-tie, but Harry Connor celebrated with Irish stew for supper where his daughters were dressed in native color. Though "Frosty" Forest Barker says he, too, is part Irish, he bore no visible green to honor this part of his heritage. But he doesn't need to, his name does that. . . . None other than our Kenny Longenberger was looking up at you from the Inquiring Reporter's column in last week's issue. . . . Oh, this Spring weather—we'll never be knowing. One day it's warm, the next day it's snowing.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

Has anyone noticed the way Ginny Winegart straightens up her cabinet that holds her papers and important books? If there is a sheet of paper sticking out of the folder, instead of putting it back in place, she throws it away. Ginny, that is not being saving! . . . People seem to be having very bad luck, especially with their own eyes. Hank Lantz of the drafting group has his eye all patched up. Jim Locker's eye is just red (no patch). He was fixing his hot water system and the steam hit his eye and as of Thursday he says, "It's still burning." . . . We are very happy to welcome a few new people. Dick Koop came from Winter Street to Fractional and now is in drafting in Bldg. 26-2. Best of luck, Dick, but just watch yourself with that bunch of boys. They're always up to something! Another new boy is Dick Walters, formerly of Bldg. 6-2. He is taking over the duplicating job that his brother had. . . . We are very sorry to hear that last Friday Vera Kilian had an operation but she is recuperating very well. . . . Last week-end Dick Rump traveled to Atlantic City to compete in the National Bowling Meet. . . . Would anyone like to join Ginny Winegart in a sundae? Dorothy Bartholomew said if no one would see her she would like to have one with all the trimmings at Reiff's, but she is afraid she might be seen by her fellow workers. . . . We're very glad to have Herb Driftmeyer back, after a two-months' illness. . . . Now since Spring is in the air and everyone is so-o ambitious let's all do our bit in the Easter Seal Drive.

Father, Son

(Continued from Page 1)

in sports, having played shortstop for the Fort Wayne Shamrocks. One of his team mates was Chick Stahl, fielder, who later went on to the Major Leagues.

Mr. Fox has two sons and five grandchildren. Both sons work at General Electric. Jack works in Bldg. 6-2. and his brother, Thomas, works in the Regional Warehouse. Mr. Fox lives at 311 W. Superior, where he and Mrs. Fox have resided the last 48 years.

Jack first came to General Electric in 1923, when he worked in the cost section of the old Meter Department. When the department was moved to West Lynn in 1931, Jack transferred to Winter St. where he worked again in the cost section. Four years later he became associated with the Regional Warehouse cost and billing section. Since June, 1948, he has been Supervisor of Billing for the Fort Wayne Works Service and Contributing Divisions.

Having an interest in all kinds of sports, Jack was a gymnasium instructor at the Fort Wayne Turners 10 years. His favorite sports at the present time are fishing and baseball.

He is married and has two children, a boy and a girl. The Foxes live at 1622 Barthold.

G-E Employees Share Total Of $277,218 Awarded For Suggestions During 1948

Paid $180 For Suggestion

Russell Kryder, Specialty Transformer Div. 91, received $180 for his suggestion on salvaging sheet steel. Some months ago, the procurement of ⅛ inch sheet steel was critical and production on certain transformer lines was being held up due to lack of material. Mr. Kryder noticed that the Motor and Generator Division had a large amount of short ends on hand which could be used for covers in the Transformer Div. He suggested that this scrap material be secured from Motor and Generator and used in the Transformer Div. His recommendation not only salvaged this material, which would have gone to the scrap pile, but also kept production going.

The above picture shows Mr. Kryder receiving the check for his suggestion. Seated, left to right, are: Walter Wolf, Foreman; Mr. Kryder, and Robert Mann. Standing: Herman Korte, and S. A. Macy.

Biggest Distribution In Any Peacetime Year

A total of $277,218 was paid during 1948 to employees of General Electric Company for ideas submitted under the Company's suggestion awards system, it has been announced by A. D. Marshall, Assistant Secretary of the Company and Chairman of the Suggestions Committee.

Marking the highest total amount awarded under the system for any peacetime year, Mr. Marshall said that the sum was paid for 17,629 different ideas submitted by employees of the Company, including those of some of the affiliated companies. In a number of instances, more than one award was paid to an individual for separate suggestions made.

2½ Million Dollars

The Company has paid out in suggestion awards approximately two and one-half million dollars since the suggestion system was first adopted in 1906. Last year's awards, Mr. Marshall pointed out, equalled the peak year of 1943. The latter year, he said, probably reflected the stimulus growing out of the pressures of war, and the heightened opportunities for making suggestions in connection with conversion processes and speedier production needs. He added:

"There is every indication that the suggestion system is gaining wider recognition and more employees are benefiting from the cash rewards paid for suggesting improvements in production, safety factors, better products, and other ways that advance company techniques in many directions.

"Experience shows that one out of every four employees submits at least one idea and that about one-third of the ideas submitted are adopted and receive an award."

Largest Single Award

The largest single award last year amounted to $2,285 and was paid to Charles Bendig, in the refrigerator division of the Erie Works, for an idea to improve the finishing operation on refrigerator cabinets. A $2,000 award was paid to Arthur Scipione, Fitchburg plant, for an idea to improve the method of fabricating nozzle boxes on superchargers.

American Welding Society To See 'Light Fantasy'

The new G-E traveling stage show, "Light Fantasy," will be presented tonight at the Chamber of Commerce following a banquet of the American Welding Society.

C. M. Summers, M. C. Halleck and Paul Moore will demonstrate the show, which deals with light and sound phenomena.

Singleton Named Assistant Supervisor Of Procedures

P. G. Singleton

P. G. Singleton has been appointed Assistant Supervisor of Procedures, Fort Wayne Works Contributing and Service divisions.

Beginning his G-E career in 1929, Mr. Singleton first worked as a messenger in the mail room. He then transferred to the pay roll section in 1931, becoming section leader seven years later. He went to the accounting section in 1941 as a section leader and later became a statistician in the budget profit and loss section.

In May 1945, he became section leader on the termination of government contracts in the accounting section. The following year Mr. Singleton was named Assistant Supervisor of cost in the Specialty Transformer division. In 1947 he was made a member of the financial staff in the Specialty Transformer and Ballasts divisions, doing methods and procedures work.

For hobbies, Mr. Singleton likes to fish and play golf. He is a member of the Supervisors' Club, is married and has one daughter. The Singletons reside at 320 West Oakdale drive.

William W. Coggeshall Dies After Long Illness

William W. Coggeshall, 50, died at 11 a.m. Saturday, March 19, at the Lawton Place Nursing Home after two and a half years of illness. He resided at 313 West Main St.

He was first employed at General Electric in 1920 as a drill press operator, and had worked on various jobs including crane operator, machine hand, and machinist. When he left in 1929, he was a machine hand. Mr. Coggeshall returned to G-E in 1940 as a mill operator in Bldg. 27. He was a sweeper at the time he left due to illness in 1948.

Private services were held Tuesday at 10:30 a.m., at the C. M. Sloan Funeral Home.

Top Floor Topics

DIVISION 95

By Walter E. Pohler

Last week's column contained no items of interest about co-workers on the second shift because we had no reporter to collect news. Our good friend Wimpy suggested that Wyonetta Gerdom had previously handled this assignment very satisfactorily, and he felt sure she would be willing to carry on. This she agreed to do and here are the items. . . . A birthday surprise potluck was given in honor of Beulah Brown. Gifts were presented to the honored guest. No mention was made of age. . . . Everyone is wondering what Helen Thieme had to drink that was stronger than coffee. 'Tis said she fell down in the bus. . . . It is reported that Mary Jane is a Potato Queen. Please tell us how this may be accomplished so that the other girls may become Queens also. . . . It seems that Ray is always very quiet on Monday evenings. Could it be attributed to a large week-end? . . . Co-workers are wondering what happened to the Pyramid Club Lillian Bradmiller was interested in. Also if friend hubby enjoyed it.

Notes on First Shift

Birthday congratulations were in order for Ethel Hullinger on the 14th. Like all young ladies no mention was made of the number of years, but someone stated she probably wouldn't see 32 again. . . . It seems that we have several young ladies who are skating enthusiasts. Namely Betty Sapp, Maxine George and Joan Detweiler. It appears that it was Betty's first time out and some mention was made of a new boy friend. Anyway it is reported that the floor didn't need sweeping the next day. . . . Velma Meads is back at her post after being off several days with a cold. . . . We have always known that Loretta Bloom was inclined to be religious. What we didn't know was that she was so serious about it that she prayed on the streets of our fair city. She was seen on her knees on Broadway, the other evening, apparently praying to Allah. Could it have been the snow, Loretta? . . . Bob Bubb was all smiles last Friday. The reason—Michael Patrick was born on St. Patrick's day. Weight eight pounds. Congratulations, Bob. . . . Someone has suggested that Hazel Bennett refrain from carrying her lunch in her purse. . . . Famous last words of Emma Regan who resides in "Cheribusco"—"No turtle yet." . . . We all extend our sympathy to Beulah Smith in the death of her father.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Rudy Rastenburg and Russell Neireiter recently celebrated their birthdays. The birthday paddle was liberally used on both, especially on Russell. . . . If you haven't seen Howard Musselman's new cheaters yet, do so. They make him look like somebody who just stepped out of a clothing store on Barr St. . . . Frank Elder won't trust Russ Neireiter with his new mechanical pencil anymore, since he has found out that the Neireiter offsprings are looking for new pencils. . . . Frankie Enderle, wonder boy, Don Juan and financial genius, has stated to this reporter that he does not want to see his name in the WORKS NEWS any more. Too much undesirable publicity and ensuing embarrassment is more than his delicate spirit can stand, says Frank. . . . In response to numerous inquiries we wish to state that Commodore Wolfe is enjoying excellent health and is looking forward to a full season of zestful yachting on Waldron Lake this summer. . . . What's new with Glenn Goshorn this week?

Pohler Is New Editor Of 'Top Floor Topics'

W. E. Pohler

Walter E. Pohler is the new division editor for Specialty Transformer and Ballast Div. 95. He edits "Top Floor Topics, Div. 95." His first job with General Electric was in 1923 as drill press operator in Bldg. 27. Between that time and 1941 he held various jobs, including time clerk, set-up man, leading operator, bench man and dispatcher.

In 1941 he reported for active military duty, serving first in the infantry and later in the air corps. During the last three years of his service, Walter was detailed in the Inspector General's office, Headquarters, Strategic Air Command at Andrews Field, Washington, D. C. At the time of his discharge in 1947 he was a lieutenant-colonel.

Walter returned to G-E in September, 1947, and was assigned as a dispatcher on final assembly in the luminous tube and ignition assembly in Div. 95. He is now floor dispatcher for the division. In January, 1948, he joined the Quarter Century Club.

While he was in the air corps, Walter was interested in building model airplanes.

We had a visitor on the floor last Monday. No it wasn't "Oscar the Turtle" but "Tabby the cat." . . . Tom Dickenson had better join the window washers—he sure did a swell job. . . . We welcome Trease Trout and Marie Griffin back after being off on sick leave. It's good to see you again, girls. . . . Glen Carney (in his second childhood) returned to work after a siege of the mumps. . . . Clara Frede is back after a week's illness. . . . Frank Brindle had his new car parked out here on South Broadway last Friday night and he can't say it is his new car anymore. Some guy smacked into it and tore off the fender and bumper. . . . We wish Dorothy Comer a speedy recovery from her illness. . . . Birthday greetings to Eleanor Kohrman, Margaret Hilgeman, Hilda Seiler, and Ruth Baker, thanks for the lovely cake. . . . We are wondering if the teeth that Sam Beer has are better to eat with or without them. They say he has a better place to use them and we would like to know where. Are you sure you feel O.K., Sam? You don't look too good and we suggest that you see Doc right away and he will probably tell you where and how to use the teeth. . . . We are wondering which Ed Boedeker likes best to do—ride the rails or test motors? . . . Les Hubartt is carrying his dinner so he won't have to help his wife clean house during his lunch hour. More power to you, Les, if you can get away with it. . . . It is too bad that Louie Clark packs his own lunch or he probably would have raised holy-ned when he got home after he found that stale sandwich in his lunch bucket. . . . Cecil liked his stale cake too. . . . We suggest that Carl Metker eat all of his lunch from now on. . . . They say that clothes make the man but, boy, what a difference they make in Pondo Valscheff! When he gets a white shirt and tie on he sure doesn't look like the guy who wears that apron up here on the floor. No wonder the gals fall for you! . . . Sunday was the first day of spring. Don't let the FEVER get you—make good use of the nice weather!

Sing while you drive: At 45 miles an hour, "Highways Are Happy Ways;" At 55 "I Am But A Stranger Here, Heaven Is My Home;" At 65 "Nearer My God To Thee;" At 75 "When the Roll Is Called Up Yonder, I'll Be There;" At 85 "Lord, I'm Coming Home." Speeding at 90 the car gave a jerk, services Monday at the "Little White Church." . . . Johnny (Injun) Wilson had better get a timer on his sun lamp, or he will be a cooked "goose." . . . We are hoping the "turtle" is removed from Fulk's lake soon as "Slim" Miller has it so large it is eating humans. . . . "Churubusco can have its turtle," says Bill Swafford, "as the frogs are so large in the lake at Kendallville that the lake actually drops when one jumps on land." . . . Fred Vogt should give Dale Irwin some of his "famous" hair tonic for disappearing hair. . . . Louie Botteron must have his apartment rented as he is talking about the new Buicks. Be sure and give all of us a ride, Louie. . . . Herb Habig just can't hold his new Pontiac down. He passed a car the other night speeding at 12 m.p.h. Suddenly a voice was heard (The Boss) "don't get reckless, honey." . . . We have heard Johnny Burnett is really interested in the "Pyramid Club." Anyone with any information as to its function be sure and get in touch with him. Since this club was formed Vern Dassler is known as "Doubting Thomas." . . . Leonard Kinley passed Luke Shorter up like a dirty shirt the other morning. Mr. Kinley is supposed to pick up Luke and bring him to work but for some reason he forgot all about him one morning last week. So now Luke has his wife standing on the front porch to flag him down. . . . Elmer Buuck is planning on retiring since his wife has joined the Pyramid Club. . . . It was heard Mr. and Mrs. Robert Turschman motored to Churubusco last Sunday to visit Fulk's lake, but returned to the city to attend the all popular Pyramid Club meeting. . . . Noble Bell wore a green tie to work St. Patrick's Day and Eldon Bell and Mike O'Grady "clipped" it for him. Since the incident Noble has been receiving "hand-me-down ties" from his fellow workers. . . . Bill LaVine always knows when Friday rolls around as that's the day Margaret Lepper has her hair in a scarf. . . . Katherine Irwin didn't let St. Pat down; she was all decked out in a pretty green bow streamers and all. . . . Did anyone notice the red face Harold Amstutz had at the Employees' Store. It seems he was explaining to the clerk the type of flash bulb he wanted and opening the package he bad to show the salesman he found someone had taken the flash bulb out and replaced it with a 100 watt light bulb. . . . After 25 years of cooking Myrtle Barfell was seen going home with two cook books Elex is selling. . . . The girls in the 14x3B wish Delores Ranley a happy birthday. . . . Also Effie Wyatt celebrated her birthday last week. Her co-workers remembered her with very lovely gifts. . . . Harvey Chen, a Test Engineer, is leaving our division and we wish him a lot of good luck. . . . We welcome Dorothy White, Lucille Bates, Margaret Bahde, Lora Rhoads, Ruth Jacobs, and Mae Sucker.

Spring has sprung, the grass is rizz—wonder where the turtle is! Do you suppose Abe Martin is making a trap for "Oscar"—he sure has been a busy little bee collecting some mighty suspicious looking pieces of material. . . . Erv Huth probably thought this was going to slip by unnoticed but not so. Not when a couple of sleuths happened to be walking behind him on his way to the parking lot to get his car the other night, when he remembered he hadn't driven that day. With a turn-about-face (and a red one) our little friend started pounding the pavement towards home. . . . Should Ruth Luther wake up some morning with a "toothache in her heel," it won't surprise her in the least, since she swallowed a tooth the other day. . . . Our conference room up here in Bldg. 20-2 sure looks nifty since it had a bath—sticks out like a sore thumb now. . . . Tragedy struck in the Altekruse family when Bill's son-in-law was killed at Kendallville last week. We extend our sympathy to them and to Leo Miller, whose sister died recently. . . . Today we bid adieu to Wiley Shockney and Marge Ditmar, both are leaving the Company. Good luck, kids, and drop in and see us sometime. Joan Florstedt is the new gal, taking Marge's place. Hope you like it here, Joan. . . . A word to the wise is sufficient—from now on, folks, when Patterson's around, keep an eye on your fountain pen. (He likes it, too.) . . . The following is a ditty Carlos Campbell posted on the bulletin board in Standardizing after giving the boys the "works."

I thank everyone who helped in this thankless task.
——— Carlos ———
I thank you whether you gave or not.
I enjoyed your griping and bellering a lot.
And with joy I look forward to hearing you holler
Next March, when the Red Cross wants a dollar.

P.S. Erv says he has $6.40 in the "Busco Beast" pool now, with weights ranging from a 14 lb. automobile top to 676 lbs. of turtle.

FLOOR LORE FROM 4-4

By Voyce Brumbaugh

Spring is here at last. Now that the basketball season is over our thoughts will have to turn to housecleaning and making gardens. . . . Speaking of basketball games, the gals in the Repair and Return section had some luck in the various pools. The winners this week—Betty Skevington, Bertha Burnau, Ruth Barnes, Margaret Parisot and June Martin. As for the winners among the men it was rather concentrated. Earl Johnson and Lloyd Runyon were the big winners. . . . Advice to Edith Venrick—always read the fine print. Last week she was taken for 75 cents on the basketball pool instead of 30 cents. . . . To Florence Behrens—the door handle is always on the right. . . . We welcome back to the section John Stanek and Bob Mobberly. We are very glad to have you back, fellows. Also we put out the welcome mat for a newcomer to the section—Merlin Gromeaux. . . . Belated congratulations to Perry Jeffries. He has a new daughter. . . . Mildred Hoover had a birthday last week—St. Patrick's Day to be exact. We celebrated by having some delicious chocolate chiffon cake. . . . Anyone looking for an easy bet of a carton of cigarettes—just see one of the gals in the section. Mainly Margaret Parisot. Everyone is calling her P.O.P.—"Push Over Parisot". . . . Congratulations to June Martin on becoming a new aunt. All the time we thought she was worrying about her dog having puppies. . . . We think Harold Mettler will be sure to see that the car doors are closed the next time he goes to the lake. Seems he and his two boys went to the lake last Saturday and his wife packed them a nice big lunch. The sad part is the dogs ate the lunch. Harold forgot to close the car door—result they had to eat at a restaurant. . . . So long for this time, folks.

We wonder where Brownie's mind was the other day when she asked one of the girls for a black crayon and they gave her a dried prune. She started to fill in the terminal board with the prune, but didn't have very good results. . . . What makes Glenn Hobbs (not Hobbles as some people have been calling him lately) go around saying "Where am I?" What's the matter, Glenn are you lost? . . . I'll give you fellows in the Tool Room a little tip that someone passed on to me and here it is. Don't leave any candy lay around on Glenn Bower's bench, as we hear that he is taking it away from Young. . . . We wonder how Bob Bruns got the name of "The Farmer." . . . Kenny Cassleman gives out what he calls the "fisherman's handshake." If you never had the opportunity of catching fish you wouldn't understand. . . . Is Danny Reuille a bird fancier or was he just waiting on a bus. Anyway he missed the special and came in late for work. . . . Why do they all call Dorothy Linsky, "Curly?" . . . Spring is here, Stuckey came in all dressed up in a light blue suit, and Charlie in a dark blue suit. . . . When Velma Rose saves a seat for a certain person, it seems like someone always takes it before he gets there. . . . We hear Vera Hoover was on a vacation. Where to, Vera? . . . We wonder why Wanda Grim keeps waltzing and smiling at her coils when she is working. Could you be practicing, Wanda? . . . The question of the week is: Should we give Stuckey his money from the final after accusing Peggy Reynolds of cheating? Jasper wasn't so bad after all, were they, Stuckey? . . . Everyone would like to know who Ruth Freeland's card partner is?

At a political convention, nothing is flatter than a sour keynote.

GENERAL ELECTRIC NEWS SUPPLEMENT

Candid Camera

VOLUME 14 MARCH 25, 1949 No. 3

"Thar She Blows" . . . Six surviving Edison pioneers were honored at a dinner at Schenectady marking the 102nd anniversary of the birth of Thomas A. Edison. Tom Dempster, who as a boy had been allowed occasionally to pull the whistle cord at Edison's factory blew the whistle again. Left to right are: Fred Wilson, August Tinnerholm, John Weber, Mr. Dempster, David Miller ond Peter Kirsch. Below, Walter E. Kruesi, President of Edison Pioneers, congratulates Vice President C. G. Suits (left), following his speech ot the Pioneers Annual Luncheon. Looking on is Thomas Edison's son, the Honorable Charles Edison, one time Secretary of the Navy and former Governor of New Jersey.

"Light Sorcery" . . . Pupils of the L. C. Ward School in Fort Wayne recently entertained C. H. Matson, Manager of the Fort Wayne Works, in appreciation for the "Light Sorcery" show sponsored by G.E. These students were among eight hundred who attended a special performance.

Queen of Hearts . . . Miss Claire O'Keefe of the Transmitter Division, Electronics Dept., Syracuse, was Queen of the Valentine Dance held recently by the Electronettes Club. Crowning the Queen is Oscar Kaufman, one of the artists in the Advertising Section at Electronics Park.

They Split the Jackpot . . . The highest suggestion award ever made at Erie Works was won recently by Zigmund Golembeski, left, and John F. Wagner, extreme right. Here they show foreman Walter Vale how their $2750 winning idea will reclaim refrigerator cabinet material which formerly was scrapped, causing a loss.

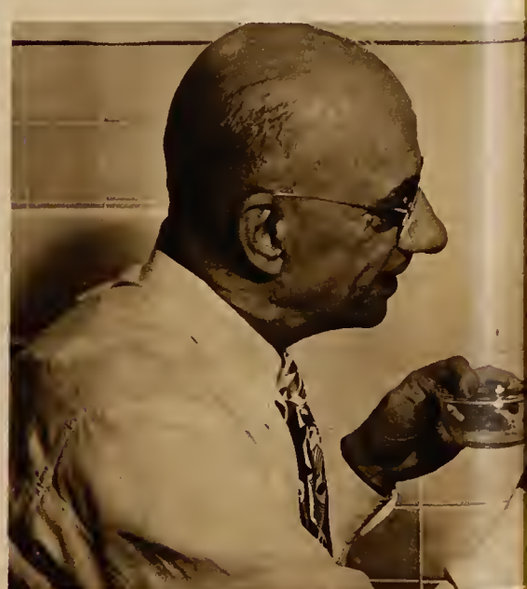
General Electric Company Honors 10,000th L

1. Here in the Pension Accounting Division Charlie Boynton, Supervisor (standing left), shows Bob Jensen, Manager, the pension application which was submitted by Homer Landry.

During the month of February, in the office which prepares the monthly checks for G-E pensioners, it was discovered that the number of checks issued each month was climbing close to the 10,000 mark. From that day on incoming applications for retirement were watched to discover just who would become the 10,000th living pensioner, and when it came in it was found to be from Homer Landry, a Boring-Mill Operator in the Turbine Division of the Schenectady Works.

Mr. Landry started to work at General Electric in 1916, just four years after the Company started its first pension plan. He joined the Additional Pension Plan in 1928, when that plan was first offered.

In 1946 the Pension Plan was amended so that Mr. Landry could apply for the refund of all the money he had paid into the Additional Pension Plan over the years, and the Company itself paid all Mr. Landry's pension benefits for his years of service up to 1946, just as it did for all other employees having more than one year's service at that time. This Company contribution to the Pension Plan totals more than $100,000,000.



In retiring now under the Amended Pension Plan, Mr. Landry is taking advantage of the optional early retirement provision. He will receive from the Company, in addition to his regular pension, an extra amount for the first few years of his retirement because his Social Security will not begin until he reaches 65 years of age.

2. Upon learning that Mr. Landry was to become the 10,000th pensioner, W. W. Trench, Secretary of the Company, L. J. Male, Schenectady Works Manager; Mr. Hotaling, Foreman; and W. E. Saupe, Manager of Manufacturing, Schenectady Turbine Division, went out to the shop to congratulate Homer, who is second from the right.

3. As the day of his retirement draws close, Homer's fellow employees gather around to wish him well, and to present a farewell gift, a well-filled purse.

4. At breakfast next morning, Grandpa dishes out the cereal to his 7-month-old grand-daugh-

...ving Pensioner

5. Lunch time arrives and Homer decides to try his hand at a little cooking. Mrs. Landry says that cooking is one of his favorite pastimes, and furthermore that he is a very excellent cook.

6. Homer expects to do a lot of fishing this spring, but Mrs. Landry has other ideas, feeling that the money Homer got back from the Additional Pension Plan can best be used to do some needed redecorating around the family home.

...ter Denise. Incidentally, Homer owns his two-family home, and rents half to his son-in-law.

7. One of the pleasures Homer now finds he has time to enjoy is to baby-sit with his granddaughter. Here he reminds his own daughter Winnifred, who worked at GE for eight years, that it hasn't been so many years ago that she used to occupy the same position on his knee.

8. After Homer finishes redecorating the house, he wants to get started on a project of his own. Here we see him looking at a piece of land with two other GE pensioners, George Andrews, left, who owns the property, and Bill Jennings, right.

9. Deciding to get some of his own pet projects started, he drops in at the local hardware store to get a few necessary tools for the tasks.

10. Later, Mrs. Helen Simonds of the personnel office drops in to deliver his first pension check, a regular procedure, and to explain the GE Pensioner's Hospitalization Plan which provides free hospital benefits for eligible pensioners.

11. "It is great to have time to do all the things I've always wanted to do", says Homer, as he tunes up his car for a long awaited trip to Montreal with Mrs. Landry to visit relatives.

Candid Camera

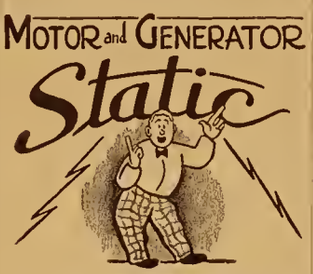
A Break For Skiers . . . Bill Rauch, left, and Erwin Boynton, G-E engineers at the Schenectady Works, recently built their own ski tow near East Berne, 20 miles from Schenectady. Here they're looking over the special clamp they devised to grab the tow rope. At right: After waiting nearly two months for an opportunity to ski on local slopes, Eastern skiers finally got a chance to get in some skiing. All set for some practice are these G-E skiers, from left: Ken Woodward of Lynn River Works, and Ray Freeman, Ray Freeman, Jr., Chuck Wheeler, and Lloyd Hendrick, all from the Fitchburg, Mass. plant.

"Gobs O' Fun" . . . This lively show was put on by employees at the Bloomfield Works recently. Going into their act are "the Andrew Sisters", Frank Grott, Leo Case and Frank Downey; and "Bing", Paul Kooiker, all of Bloomfield Works. "Gobs O' Fun", a fast-moving musical revue with a sea-going setting was thoroughly enjoyed by employees, their families and friends.

Air-Wall Heating . . . G-E recently announced a new heating system — an important step in reducing home-building costs. This method blankets the cold outer wall of the room with warm air, by using special grilles which direct the warm air upward. The model likes it fine.

Grooming A Champion . . . H. T. Montgomery of the Pittsfield Apparatus Works is the proud owner of a pair of prize-winning Irish setters and two of their pups. Here he grooms Champion Red Coat of Tercor, who has won several "Best of Breed" awards, in various dog shows.

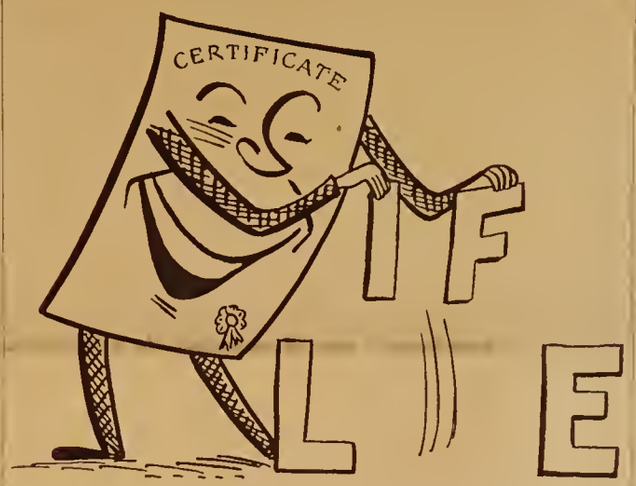
Did you get your sweetpeas planted on St. Patrick's day? I'll admit it would have been rather cold to do so. . . . As cold as it was, can you imagine anyone yelling for the iceman? . . . If you don't think that spring is here, all you have to do is drive out of town. The kids are flying kites and little lambs are frisking around. The crocuses are up, and so are the pussy willows. Those are all sure signs of spring. . . . Minnie Barr is positive that Yehudi was playing a trick. The other day she thought she came to work carrying her lunch. Noontime came and no lunch. On checking, she had left it at home and Sonny at it. The cafeteria just had an extra customer that day. . . . Happy birthday to Alice Kreiselmeyer, Kate Weigle, Floetta Zartman, Mabel King and yours truly. . . . Irene Blank and her husband attended the Sportsmen Show at Indianapolis last Sunday. . . . Newcomers to the early bird shift are Kenneth Vonderau, Mary Irvens and Eva Gangware. . . . Anne Chomey Gibson has also returned to work. . . . I hear we should install escalators between the second and third floors. Since Bill Martin is messenger boy, the steps are too much to take. . . . Verna Bullerman has joined the "I gotta new car" ranks. It even has rayon seat covers. . . . Did you have to dig up some shekels to pay off your Auburn bet? It was hard to find anyone who would bet with you, everyone was for Auburn. . . . Have you noticed the shadow following Jack Dennis? . . . Martha Rice with a bandaged finger says, "I sat on it." . . . Erma Landes was trying to get a Florida tan in Fort Wayne. She nearly cooked herself. Better not go to sleep next time. . . . Harold Bowker could see the old green backs fading away when the rumor had it that the "Busco Beast" had been nabbed. He was already to stake his farm off in parking lots. It is only a mile away as the crow flies (but who flies like a crow?) Anyway he said he could take off his shoes now. No going around without shoes as long as that beast was loose. . . . Don't know what it was Kate Weigle dropped on the elevator, but it opened out like an accordion.



A flatterer sometimes doesn't know when his line is out of order.

Fractional Fiction 4-5

By Elaine Sutter



Birthday greetings of the week go to Gladys Macon. . . . If anyone wants any ashes for their garage floor we suggest that they contact Fred "Hot Ashes" Schultz. Guaranteed to send the garage and its contents up in smoke. . . . We want to inform Henry Burch that the trolley bus fares were raised recently; instead of trying to ride free. . . . Recently a club meeting was held of the workers of Bldg. 4-5 office. There was a deep sea fisherman story on film shown of catching large fish, but it ended up showing George Seabold catching just some small bait fish. George, is that the kind of fish you always catch? We understand before they were whales instead of fish.

Thought for the week: "It wouldn't hurt so much to become angry except that, for some reason it makes your mouth work faster than your mind."

Here is a guess on the new "Mystery Melody": The Bell of St. Clemens or the Chimes of St. George. This was submitted by Jay David of Bldg. 19-1. When you admit you're wrong, it's a sign you're getting wiser. . . . Sign of Spring: Stan Marquadt, our Marine captain, is getting that "Halls of Montezuma to the Shore of Tripoli" expression in his eyes again. . . . Could be: The other day someone tried to call Dwight Myers on a matter of business, but dialed Charley McAfee's number by mistake. When Charley said, "Hello," a voice inquired, "Say, Dwight, can you fix me up?" Before further explanation was possible, our Irish friend replied, "Faith, and if you call me 'Dwight' once more, I will fix you up." . . . Dog's Life: Mrs. Druce tried to look after Art's welfare, so when she departed for California the little woman left a well-stocked larder for his convenience. Among the items was a ham bone Art could use in cooking beans, cabbage or some other delicacy. When Mr. Druce came home from work and discovered the bone, he could not visualize a use for it, so tossed the tidbit to Topper his Irish terrier. Usually when a dog gets a bone, he tries to bury it, but Topper being an "inside" dog had few opportunities to paw dirt. As Art settled down to enjoy his newspaper, he observed the pup wandering from room to room looking for a hiding place. Later Topper returned without the bone, but with a satisfied expression. When Mr. Druce retired that evening he discovered the hiding place—Topper had buried the bone in the middle of Art's bed. . . . New Monster? Jim Mitchell, proprietor of "Mitchell's Emporium" and mayor of Blue Lake, is waiting to hear final reports on the "Beast of Busco" before announcing the size and weight of the "Blue Lake Monster" he intends to discover.

Your Group Life Insurance Takes The "If" Out Of Life

Ever think of it that way? Yes, your Group Plan gives you the satisfying assurance that should the unexpected happen—if you should die—those who depend on your income would have prompt financial help. Life, of course, is made up of ifs. They are the uncertainties, the emergencies, the "rainy" days of the future. Thanks to your Group Life Insurance Plan, however, you are providing those you love with sound protection and a defense against these uncertainties.

None of us likes to think about death, because, at best, it is an unpleasant subject. However, it should certainly be reassuring for you to know that your dependents will have financial assistance should the unexpected happen. You know that your family will not have to depend on someone "passing the hat," but, rather, will have prompt help in meeting many of the ordinary expenses brought about by such an event.

What Are the Facts

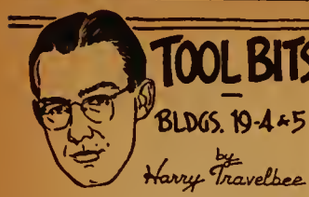
It's all very well to say that "Heck, I feel great. I've got a long way to go;" but just what are the facts? Statisticians of the Metropolitan Life Insurance Company, which underwrites our Group Insurance Plan, report that, on the average, seven out of 1,000 employees will die this year. Furthermore, their records show that one out of three employees, starting to work at age 21, will not survive to age 65. Not alarming odds, perhaps, but reason enough to stop and reflect on the valuable protection provided by your Group Life Insurance. The insurance people can tell us how many will die, but they can't tell us who. Nobody can. That's why it's comforting to know that, no matter what happens, we're protected with Group Life Insurance.

Points to Remember . . .

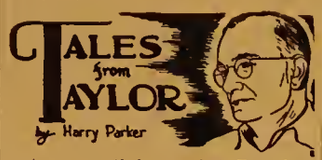
Better check your Group Certificate today to make sure that the person named as beneficiary is the one to whom you wish benefits paid in case anything should happen to you. If the person named on your Certificate has died, you will want to name a new beneficiary. Likewise, if you have been married recently or are about to be married, you may wish to change your beneficiary. If your beneficiary has changed his or her name, it is wise to have this change entered on your Certificate.

By taking care of such changes now, you will help eliminate possible delay or confusion at some time in the future. It is easy to change your beneficiary. The person in charge of the Group Plan will give you a Change of Beneficiary form and will tell you what to do.

Your Group Life Insurance Certificate should be kept in a safe place, but somewhere where a member of your family will be able to find it when it is needed.



Now that Spring is officially here, we can turn our thoughts toward getting those gardens started. . . . Last week Gurney Lindley celebrated his birthday, and this week Ted Warner celebrated another birthday. Congratulations, fellows, many more happy ones, too. . . . Harold Whonsetler isn't the only one who attracts attention on the power saw. Last week Louis Watt joined the blade breakers fraternity. After all these years, too. Confidently, Louis, I think it was a set-up. . . . On St. Patrick's day last week, Howard McMaken received a Scotch greeting card and it made him feel so good that he helped give away several card games to his opponents Ward Staley and Noland Myers. Mac was big-hearted as could be. . . . Several visitors last week were Walter Fry and Cecil Forest, formerly of this group. . . . Claude Gill formerly of this group was quite ill last week, but is reported to be O.K. again. . . . Bill Johnson owner of the "Fish Hound" extraordinary says since he has been getting so many skunks in the euchre games, the dog is even turning his nose away from him when he gets home. . . . Russell Deveny has left the group temporarily for Bldg. 4-2 to help on some winding machine repairing. Too bad C. Stolte didn't have that new Packard before you left, Russ, or did he? . . . Charles Myers, our foreman, is now an official resident of Ossian, Ind., since last Thursday.

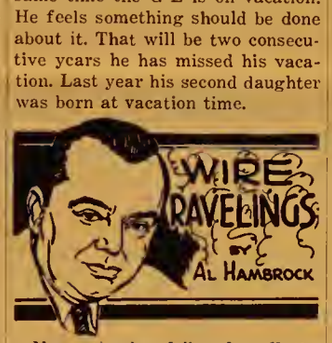


A surprise dinner party was held at the Colonial in honor of Rita Fleckenstein by the girls in the Green Room. Rita has enlisted in the WAC's and will be stationed at Camp Lee, Va. She was presented with a gift from the gang. Ask Phyllis Borkenstein how near Rita came to not receiving it. . . . We all miss our good friends Gertrude Hughes, Reva Smith, and Matilda Tuttle who were transferred to third floor. Lots of luck, girls. . . . We wonder if Freddie Lenker ever heard of the song, "The Twelfth Street Rag." . . . We are all looking forward to the time when Virginia Reed will be sporting a new mink cape, as we hear she has entered a local furrier's contest. . . . We don't know which one is more of a farmer, Zella Disler or Carrie Green. Neither one can find their way around Fort Wayne very well. . . . Bill Rectanus came to work on St. Patrick's day wearing a big green ribbon. He tells us he changed his name to McTannis for the day. . . . Tom Hildebrand says the only time he gets his name in the paper is when he's a grandpa. . . . We wonder if Wayne Weimer was AWOL last Friday. We hear he's been court martialed. . . . Congratulations to Mr. and Mrs. Bill Gepfert on the birth of a son. . . . Al Reiman has left Bldg. 26-4 and is now working in Bldg. 26-3. Good luck to you, Al. . . . The Hudson Bay Co. wants to hire "Bring 'em back alive" Lockwood to direct their trapping operations in the far north. . . . We suppose Ray Horstman and Ned Gruelach will be leaving us pretty soon, when the proceeds of the Pyramid Club start rolling in. . . . Wonder if Cupid caught up with Sam Dailey. He took two weeks' vacation. . . . Norb Sordelet is going to try to catch Oscar (the turtle) some night when everyone leaves with his three pound test leader and flyrod. . . . The boys have just found out who the biggest crabs are in the Transformer Livision. . . . Doris Fosnought has left to await the arrival of the stork. . . . Millie Kouder was transferred to Bldg. 26-2 office. . . . Bill Crouse is going to hire a dentist to fill the chips in the porcelain bushings. . . . Famous last words of Johnny Bryie, "I'm only one." . . . Gene Galloway was out to the cemetery doing a friend a good turn, when along came a car load of deputy sheriff's armed to the teeth. They thought Gene was a grave robber instead of grave digger. . . . The Bldg. 26-4 office welcome the newcomers to their office. . . . Happy birthday to Max Kimble and Johnny Robinson. . . . Belated thanks to Otto Fultz for his candy. He thought he had won the check pool and Ed Yergens won it instead. The candy was good, anyway—better luck next time. That wasn't bad enough, but then Otto had to have two wisdom teeth pulled. Poor Otto.

First comes a touching family scene—then a touch!

The difference between a statesman and a politician is that the first works for the public and the second has the public working for him.

The Jig and Fixture Section has chipped in and bought Frank Druhot a sun dial since he can't read his watch correctly. Frank rushed to the time clock to ring out only to discover it was 10:42 instead of 11:42. Better luck next time, Frank. . . . Dick Hemrick's dog, Skippy, is a pointer and a setter according to Dick's loving neighbors. They say every night "Skip" sits and barks at the moon. . . . The Tool Room has a star amateur in Paul Brinkroeger, who is appearing in the Bethlehem Church Amateur Program with his variety of 25 or 30 harmonicas. . . . We congratulate Mr. and Mrs. Elmer Sauerwein on their 25th Wedding Anniversary. . . . Russel Jones' little daughter apparently hasn't heard about inflation and the high price of butter and eggs. She was having a good time smashing eggs on the floor and had reached the two dozen mark when Mrs. J. interrupted the fun. . . . Al Devaux looks as if he had gotten caught in a buzz saw. When we finally cornered him for an explanation, he came forth with a story that he was cutting brush along the line fence and got all scratched up. . . . Clyde Spangler thinks he was swindled. Woody Hursh was supposed to have sold him two tickets to the basketball game. However, he discovered they were tickets to the Spencerville Firemen's Fish Fry. . . . B. B. Byanski thinks Mart Walsh doesn't boil his eggs long enough. Mart decided one of the eggs in his sack was boiled and gave it to Bernie to eat. Believing it was hard boiled, Bernie bashed it on his surface plate, only to see a nice fresh egg running slowly between his fingers. . . . Want to buy a duck? See Ralph Steward and country cousin Gus Kruse. . . . Granville Gorrell walked up town the other day, but decided to take the bus home. As he approached the bus, two ladies with their arms full of bundles and babies were waiting. The one said to the other, "You put a token in for me and I'll pay you later." Granville walks up to the conductor, reaches down into his pocket and pulls out two streetcar checks and drops them in the box. As it was told to us, he didn't ask for the extra one back, but quickly sat down. . . . Scott Click had the privilege Saturday of flying over Fulks Lake with his son at the controls; however, he didn't get a glimpse of "Oscar." He enjoyed the ride and avoided the traffic jam around the lake. . . . A story has reached us that we have a man of profound influence on our floor and to prove it, he told Herb Thiele that he could get him a brand new 1949 Chevrolet for $1300 complete with radio and heater. Herb has ordered five. Good deal—how's about lettin' us in on it? . . . Who needs glasses? Ray Mutton or Russell Sage? Ray crossed the street right in front of Sage's car and from all reports, it was only by inches that he missed Ray. Russell said that Ray looked right at him, but evidently something else must have caught Ray's eyes. . . . Bob Goer is no longer with us, hut he still makes news with that fast 1949 Ford. Bob says the durn thing just wants to go wide open, but doing that in Ohio is a little embarrassing—$$$ and costly too. . . . Paul Auman and Don Alcott are now working in the lathe section. Welcome to Bldg. 19-5, boys.



As you all know Art Brandenberger when constructing his new home installed electrical heating units in it. This has turned out to be a headache as the cost of operation is much higher than he expected. So now he is looking for a contractor to build a chimney so he can install a coal burning furnace. So heavy was the pull on his service lines that a new alarm clock he had purchased would not function properly. He therefore proceeded to blame the manufacturer of said clock for producing an inferior product. Now an extra service line had to be run into his home to operate the clock properly. . . . George Cowan was bemoaning the fact that someone had lifted the hub caps off his banana-colored car and is looking for some to replace them. He is casting side glances at Harold Hart's car with evil thoughts. (As you know Harold drives the same make and model as George does.) To frustrate any designs George might have on his hub caps, Harold is having them welded to the wheels. . . . Ralph "High Speed" Ecenbarger, who is always the first one in the parking lot every morning, was complaining the other day because he had to get up so early to accomplish this. He is now trying to cook up a deal with the plant guards which would make it possible for him to park his junker under the gate house canopy. He would then be able to tear out of the lot at a much greater speed than at present. . . . Herman Doehrman's old crate was just about ready to lay down and quit. Realizing that he had to do something quick or pound the pavements with shoe leather, he started looking at new cars. Asking what they would allow him for his old car, the salesman took one look at the old "Davy Jones Special" and said $10. Being very disappointed at this turn of events, he began looking at used cars and selected one of a popular make, only getting a $12.50 allowance on the deal. Nevertheless, he is happy over the fact that he will have dependable transportation this summer. . . . Since "The Beast of Busco" has aroused so much interest and a lot of our eating houses are featuring turtle in their menus, Clarence Stove thinks that it would be a good idea to establish a turtle cannery. He is going ahead with the idea and is forming a company and selling stock. The funds will be used in erection of a building suitable for this purpose and to hire lake and river scouts to scour the waters of this state and ferret out any and all kinds of turtles. Turtle caviar will be one of his specialties. . . . Archie Boen announces that he is now a grandpa, and from now on desires to be called "Gramps." The only trouble though is at his advanced age he cannot take the crying and activities that go with the raising of a baby.

"Perpetual worry will get you to one place ahead of time—the cemetery."

Speaking of turtles (and who isn't these days?) Mary Beaman brought her pet turtle in for the gang to see. It was about the size of a half-dollar when it was given to her son 18 years ago. Coincidently, it is named "Oscar," painted on its back when he received it. (Our apologies to men named "Oscar"). He now measures about six inches across the widest part of his shell. When asked how he stood his day at the G-E, Mary said she let him down on the floor and he went directly to his pallet on the register and went to sleep. Oscar had a hard day. After all, manufacturing is a little out of a turtle's line. . . . Mr. and Mrs. Robert P. Foster are proud to announce the arrival of a little daughter. Her name is Deborah Lynn, and she weighed 5 lbs. 11 oz. at birth. Congratulations. . . . George Miller is threatening to take the wheels off his tool box. It seems as though his tools run away everytime he turns his back. . . . We're glad to welcome Harry Haley and Herb Garlets back to our section. It's nice seeing them in their familiar U.S. Marine Reserves. They are required to go to camp for two weeks out of a year. This year it is at the same time the G-E is on vacation. He feels something should be done about it. That will be two consecutive years he has missed his vacation. Last year his second daughter was born at vacation time.

Many thanks, folks, for all the nice birthday cards and gifts. All were greatly appreciated and made yours truly very happy. A kind word passed on to your fellowman goes a long way in making him feel that this life isn't so bad after all. Now as to the picture about 99 per cent of the comments were, "Too bad you had to go and grow up so homely." We agree with you that's for sure. . . . Birthday greetings to Burl Teboe, March 23; Ray Kierspe and Alton Corson, March 25, and William Zierlof, March 27. . . . Get your rye bread with healing qualities from Ray Kierspe. It jerked one grateful guy (Bill Rohe) right out of his sick bed into work bright and early the next morning. . . . Porky Schoenenfeld has been working on his boy's train for the past three weeks, trying to get it to run. Porky didn't show in last Monday. The reason seems to be the train now runs and Porky had to play. . . . Slim Walters to his better half said, "Honey I think I'll go fishing today." without saying a word the Mrs. went to the basement, brought up a bucket and mop and said, "here's your fishin' equipment for today, old boy." Ain't being hitched wonderful, Slim? . . . Self- admiration caused "Wimpy" (Lemper) to say to Bill (Rohe), "say, do you realize that I am the only Wire Drawing foreman in the whole G-E Fort Wayne Plant?" Bill unimpressed reminded the inflated Wimpy that President Truman too could say, "Do you know that I am the only President of the whole U. S. A., ain't that something?"

Ah, Spring, beautiful Spring, it's here at last (only officially, however) but even so we have noticed several cases of spring fever the past week. The symptoms of this very common fever are a decided slowing down of a step, followed by long periods of staring into space, and most cases usually develop into long sighs when the peak is reached. The best cure, outside of a good dose of sulphur and molasses, is to allow the fever to run its course which usually takes until summer. . . . There's more secrets connected with our complete file. We have discovered, through a very good source, that it all has to do with a new language that Helen Eggeman, and Doris Smith speak. But beware, girls, Bob Gebert knows about this new language. . . . My, what a pretty pin Betty Millhouse has from Atlantic City. I didn't know Betty had been in Atlantic City lately. Wonder if there's more to this than meets the eye. . . . How about this! Dottie Fletter not only gets a ride home, but one to work also. Imagine that door to door service. . . . The General is back; That smiling Irishman, Sherm Welch, returned to the fold Monday after a two-months' leave of absence and looks just dandy. Glad to have you back with us, Sherm. . . . Little Eva (Eva Westrick that is) became an Aunt again Friday, and we'll have you know that this is the 32nd time. Think of that 32 little nieces and nephews. That wasn't Eva's only good fortune Friday, she attended the Elex bingo party and won a new Spring Bonnet. Teresa Arend also hit it lucky and won the jackpot at bingo the same night. . . . Maureen Horn paid us a nice visit Monday. She's living in Evansville, Ind., now but decided to say hello to all the gang while in Fort Wayne. . . . Harriet Springer is wearing the season's first and deepest tan, and a very becoming little tan it is too. Nice having you back, Harriet.

If you are in doubt about Spring, let us help you—the tie Carroll Elder wore on Monday was proof enough that Spring had arrived. A new tie, complete with butterflies, what more could you ask. . . . We had three visitors last week, Sherman Nyffler, "Hobby" Haberkorn and Carl Cochren. Welcome back, folks, and don't forget to come again. . . . Last week conversation centered around basketball and the "The Beast of Busco!" Now it's the turtle and baseball—oh well, it all helps nickels to change hands. . . . Is spring cleaning worrying you? Do you have nightmares about it? If a window washer will help—contact Dale Hobson. We even have proof of his work. For rates better see him. . . . We are sending our get well wishes this week to Bill Decker who has been sick in the hospital. Hurry up and get well; summer's coming, besides we need you back. . . . This will probably be our last opportunity to wish Imogene Hortenstein the best of luck in her new occupation of housewife and mother, so we will make the best of it and say good luck and best of everything from all the gang. The girls surprised her with a shower last week, and the pictures are proof of the good time everyone had during the evening. Let's hope you remember us at least once in a while and don't forget to write. . . . From all the noise heard at noon, that must be a hot euchre game in the Conference Room; how about that? . . . We hear Paul Schlie had to withdraw the offer for the Chevy before he got rid of any "half and half" pups!

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

CLOSING DATE FOR NEXT ISSUE
Monday, March 28, 1949

LOST AND FOUND

FOUND—One key on Lindley Ave. parking lot.

FOUND—Pearl beads between Bldg. 4 and 18 Gate.

FOUND—Pearl beads.

FOR SALE

BOY'S BLUE WOOL SUIT—Size 9-10. Like new. $5 H-66332.

G-E UPRIGHT VACUUM SWEEPER—E-38255 after 6 p.m.

LADIES SUIT—Blue pin stripe, size 40; grill and sandwich toaster. Telephone 34X Zanesville, Ind.

BOY'S BLUE CHECKED SUIT—Size 15-16. Like new. A-76785.

V&K ELECTRIC SOFT WATER PUMP—$20. H-60533.

RABBITS—Does, bucks and hutches. H-74113.

CHIME CLOCK—$5; chest of drawers $5. H-70855.

GIRL'S SUITS AND DRESSES—Size 10-12, reasonable. A-1 condition. H-17602.

APT. WASHER—Toidey seat; floor, table and vanity lamps; smoking table. A-68714.

G-E SWEEPER—In very good condition. Very reasonable. H-66483.

TRANSPORTATION

RIDERS WANTED—Can haul two riders from county line north on State road 1 coming in through Leo. E. S. Kelley, works for Vic Hall, Bldg. 17-1, from 7-3:30. Ext. 2208.

by Mamie Allen

Latest news from the sick: John Craig has recovered sufficiently to leave the hospital and will be glad to receive callers at his home. . . . George Seibold is still in the hospital but improving. . . . David Dulin also is ill at home. To all of them we send best wishes for a speedy complete recovery. . . . We extend sympathy to Gertrude Markley whose sister died last week. . . . Carl Stadelman feels he has a perfect right to show special pride in the 1949 Indiana State basketball champions because his wife hails from Jasper. . . . About this time of year Bob Bennett starts talking about his garden. These last few days must have been an incentive to get out the tools and seeds and draw up plans for this year's planting. . . . When Bill Widdifield has a job to do nothing can stop him. He had planned to trim his grapes last week and when that day came he went about the job even though the vines were covered with a couple of inches of snow. . . . Our Irishman Roy (O') Bracht came to work on St. Patrick's day wearing a beautiful green tie. Three other Irishmen (?) Andy Nichter, Bill Doell and Virg Allmandinger didn't think he showed proper respect for the day so they proceeded to cut the tie off, close to Roy's Adam's apple. . . . We have no way of knowing, so it could have been anything from fish bait to lard in the big can Mary Rupp was getting from Martin (Brownie) Brown in the parking lot the other day. . . . The distressed look of Paul Monroe's was caused by the breaking up of a beautiful friendship between him and the team of mules, which he was forced to dispose of. He hasn't made up his mind yet what method he will use to do his plowing from now on. . . . Now that spring has come we listen for Edna Mowery's daily report of new lambs. As of today the total is 17—seven pairs of twins and three singles. . . . Congratulations to Hilda Walda who so ably conducted the Elex bingo of last Friday. Through her efforts and those of her committee she collected a large group of interesting and useful attendance prizes. . . . Elsie Fabian who had an orchid on display at the Elex Spring Bonnet breakfast is taking this opportunity to report that it was not won by an Elex number—the lucky number belonged to a man.

Employees' Stores Close For Inventory

The Employees' Stores at the Broadway and Taylor St. plants will be closed Wednesday, March 30; Thursday, March 31, and Friday, April 1, for inventory. Both stores will be open for business, as usual, Monday, April 4.

by Vivian Bond

The "Old Timers" basketball game scheduled for tonight at the G-E Club should provide entertainment for the whole family. I understand many special sports features have been arranged, so take the whole family over to the G-E Club gym for an evening of good fun. . . . The following burst of original poetry is presented with permission of the author and the assurance that any reference of the late episodes of Mae Lacy, Works Service Accounting, is surely intentional.

You're pretty nice,
But there has been more than twice
That you have been in trouble,
Others do, but that's not you; You're always in there double.
And on parties you are a wow
We'll have to have you show us how.
We must inform Emily that she is not right—
You looked so cute waving your porkchop that night.
In perfect circles you are a pip—
But be more careful where you sit.
Cum and paint—you were a mess.
What you'll do next is anybody's guess.

If this keeps up, Mae Lacey, will be as well known as the "Busco Turtle."

Bldg. 18-3

The two new faces in Specialty Transformer Cost Section are Margaret E. Ford and Rose Marie Smead. Please accept our belated welcome. . . . I am told that Clara Thiesman is quite a bowler, would suggest an exhibition. . . . Sophia Jesse, with friends, spent last weekend in Chicago, dividing their time between the Palmer House and doing their spring shopping on Maxwell Street. How were the bargains? By the way—do they still sell dill pickles and pups from the same stand? . . . Irene Draper believes in early shopping. She has quite an array of Easter novelties ready for the day. . . . Happy birthday to Ruth Hunt and thanks for the candy. . . . Anyone interested in seeing a very pretty Buick—just stand in front of Bldg. 18 most any morning and you will see Paul Kissinger being dropped off for his day of hard labor, in grand style.

Bldg. 18-4

We are sorry to learn that Esther Sears' husband is home again with foot trouble. . . . Today is the last day for Mary Alice Herber, who is leaving to accept a Civil Service appointment in either Germany or Austria. She served several years with the WAC's during the war. . . . Barbara Meyers is leaving this week to work in the office of Tom Dent, Bldg. 6-1. Best of luck, Barbara. . . . Happy birthday to Annabell Redding. . . . Our welcome to Frances Thomas, who has moved up from Bldg. 18-3. . . . Congratulations to our reporter Dolores Connin who will be installed as an officer of Fort Wayne Chapter 432, Order of Eastern Star, March 25, at the Masonic Temple. . . . Barbara, the daughter of Mr. and Mrs. Al Tharp, listened to wedding bells Saturday, March 19 when she was married to Richard Hartigan, Jr., son of Mr. and Mrs. R. M. Hartigan. They left immediately for Beloit, Wis., where they will make their future home. Our congratulations to the young couple as well as the two fathers who are both well known in General Electric. . . . Karl Reid leaves early Friday, with his family, to visit in Columbus, Ohio. But no escape from "The Turtle." It is becoming a national affair.

Let's Eat!

CAFETERIA and RESTAURANT MENUS

MARCH 28 THROUGH APRIL 1

BROADWAY	TAYLOR STREET
Serving Hours:	
Cafeteria—16-1 11:00 A.M. - 1:00 P.M.	10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.	
16-1 6:45 P.M. - 8:12 P.M.	6:45 P.M. - 7:30 P.M.
Restaurant—16-2 12:00 M. - 1:00 P.M.	

MONDAY, MARCH 28

Beef Broth and Noodles	Tomato Noodle Soup

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

Menus Subject to Change

Inquiring Reporter

WHICH OF THE MAJOR G-E APPLIANCES IS THE GREATEST LABOR-SAVER FOR THE HOUSEWIFE?

ELDON K. BELL

Taylor St.

"I believe, without a doubt, the washing machine is the greatest labor-saving appliance to the housewife. We have come a long way from the tub-and-board day."

MARTHA E. RICE

Bldg. 17-3

"I think the electric refrigerator is because it really works for the housewife 24 hours per day, saving money as well as labor."

ROSALIE GERMANN

Bldg. 26-4

"All the G-E appliances are a big help to the housewife, but for myself I think the automatic washer is the greatest labor-saver in time and energy."

WALTER R. DUHN

Bldg. 19-2

"We have had our G-E flat-ironer 10 years, which we think is the greatest labor-saver in our home. My wife has cut her time spent at ironing in half since its purchase. Probably its best feature is the end of those long hours of standing while using a hand iron."

GRACE WALL

Taylor St.

"In my opinion the washing machine is the greatest labor-saving appliance G-E has to offer the housewife. After the laundry is finished for the week the other household tasks seem small, but I don't like to think of the many inconveniences if it were not for all G-E appliances."

Flip, flip, such swift shutting of lights, but it must be urgent as Waymon says, "Must hurry and get a beeah, before Al closes for the night." . . . We suggest Wilbur Fuelling move to California to his red-headed fiancee or have her move to Decatur R. R. before Ali Ghan sees her and gets a Humpty Dumpty heart. . . . The two little Drakes—Max and Virginia moved in their new home in Berne. From reports it must be a wonderful set up. How about a housewarming? . . . Norma Bower loves big juicy steaks, Kokomo Joe relishes minute steaks and lots of butter and milk, Carl Fisher devours raisin pies, Wilbur Fuelling prefers corn pone, and Pete Fairchild munches chicken, light or dark; oh well, invite the whole KH Line and make hash. . . . Why does Carl Schnepp always go back to Nashville, Tenn., about 9:30? Could it be that his spirit is inspired from that new book he sent for by mail order concerning Roy Acuff? Don't be surprised after a few easy lessons he'll be on television with Charlie McCarthy. . . . Wilbur Steele, speedball of the KH Line, says they'll get the motors out if George doesn't wear out before. . . . Charlie Zimmerman was seen shopping in Fort Wayne, Saturday. Did you get the missus her Easter bonnet? . . . Earl Mounsey sure is a good navigator. He traveled five miles through Franke Park to make a short cut of one-half block to get on the California Road. He sure is a homing pigeon when it comes to taking a short cut. . . . Jerry Light wants to know why they are always out of anything he wants at the cage. Must be Grade A products. . . . Jenny Snider is now on vacation at home—having taken the Optional Retirement Pension. . . . Sherman Zimmerman, that bow tie is sure snazzy. . . . Jake Baker sleeps during noon hours. He claims those early morning milking hours keeps him hustling on the run. . . . Bob Shoup is back on the job again, let us have some news in print, Bob. . . . We hear Carl Fisher has become literary-minded these days, those Popular Science books are sure educational. . . . Reggie Geisler takes it quite serious when it comes to fishing. He'll not fish when the snows on the ground, he thinks everybody will spot the good fishing places after his tracks. Don't worry, Reggie, bears were seen roaming along that vicinity. . . . Eddie Noonan is giving up women, that's his resolution for 40 days. Presume he'll take up poetry. How about an inspirational poem for the WORKS NEWS? . . . Hello, Folks! Here I am back again and I can't keep my fingers from pecking you out a few of the happenings around this place that has occurred in the last few weeks. . . . To start with Mickey McDougal really celebrated St. Patrick's Day by going down to Pete Fairchilds where he and others put in a new cement driveway and was demonstrating Pete's new power mower by running it up and down the driveway. Mickey is so Irish that he probably thought there was green grass there instead of cement. . . . And what do you know? Bob Brown, the pasteboard peril, is just recently a father and I believe he went overboard because he was seen at two o'clock in the morning taking french fries to the youngster out at the hospital. One thing for sure, Bob is going to see it will not go hungry. . . . Boy, that sure is a swell radio that Pete Fairchild has. I wish I had one just like it. . . . Do you know Gladys McBride? Huh, she probably doesn't know you either since she has that new Ford. . . . My, oh my, is there a doctor in the house? Surely Nellie White very nearly needed one very recently. A bone was lodged in her throat and it wasn't a fish bone either. . . . We don't blame Merle Burkhead for strutting his stuff as their first baby girl arrived at the Burkheads last Tuesday. . . . I feel so sorry for Al Windmiller, the Geneva Whirlwind, as he is away off over there in a corner by himself and nobody comes to see him. Never worry, Al, we haven't forgotten you. . . . We wish to inform friends of John Knott being in the hospital and any callers will be appreciated. His condition is not too serious. . . . The St. Patrick's motif was nicely carried out in the shop as there were several Irishmen present by wearing of the green. Yeah, even Ira Huber, test pilot, wore a very green shirt. . . . We also want to tell you of the baby boy born to Bert Scott, formerly Bert Stump of the Flange Line. The baby was born in February. . . . This paper would not be up to par if it did not mention Plymouth Fisher, otherwise known as Orval. I suppose he now has his Plymouth and is up inspecting the new car. . . . Folks, this is all and I will probably give you some more after the Easter Parade and if you have any items that you would like to have printed just let me have them. . . . Our sincere sympathy to Beatrice Coffelt upon the death of her sister.

A department store official says that women are the ones who always want bargains. Is that why they like to make husbands feel cheap?

G-E Club Gymnasium Is Scene Of Gala Sports Event Tonight

Plotting their tactics for beating the Motorettes are Ted "Nicki" Hicks and Ralph "Becky" Dunlap, members of the Taylorettes basketball team.

The G-E Club gym will be the scene tonight of a sports event that will long be remembered, according to J. C. Duryee, chairman.

Volleyball and basketball games will be featured as another in the G-E Club's Family Night series. The games are being presented free of charge to all club members, their families and friends.

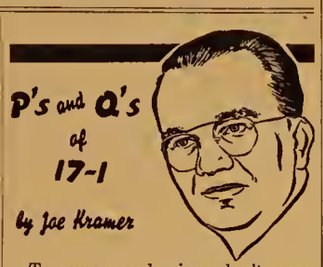
The series will start at 7:30 p.m. with a volleyball game between the Fort Wayne YMCA and the G-E All-Stars. The latter team includes Dick Wagner, Tom Fox, Ray Soughan, Jack Fox, Hal Robertson, Hugh Folsom, Paul Berghorn, Ralph Mesing, Glen Macy, Leon Lahrman and George Cowan.

Novelty 'Girls' Game

The program will then feature a novelty basketball game between the Taylorettes and Motorettes. The members of these teams are:

Taylorettes—"Penelope" Burnau, "Nicki" Hicks, "Henrietta" Nahrwold, "Becky" Dunlap and "Clarissa" Liddy.

Motorettes—"Ola" Langenberg, "Prunella" Farrell, "Hortense" McKee, "Elaine" Goodman and "Katie" Rowley.



Old Timers To Play

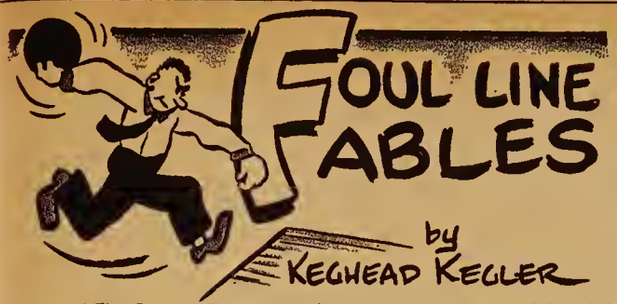
The Old Timers' basketball game, stellar attraction of the evening, will feature a hoop contest between the Small Motor and West Side teams at 8:30 p.m.

The Small Motor team consists of Paul Burnau, Jim Oman, George Langenberg, Merton Edgar, Ted Hicks, Ken Wheatley, H. J. Nahrwold, Ralph Dunlap, Les Menze, Preston Slack, Tom Fox, Vic Leakey, Earl Souers, Everett McKee, Carl Rider, Bob Dent, Russell Poorman, Joe Henry, Perry O'Neill, Loyal Liddy and John Anspach.

Players on the West Side team include Bill Hattendorf, Bob Glenn, Bufford Long, Bill Schible, Erv France, Lowell Welker, Adam Farrell, Charles Lammiman, Bill Mosshammer, Glenn Macy, Francis Richards, Joe Goodman, Ray Soughan, Dennis O'Connell, Gail Rowley, Erven Hutb, Bob Crosley, Charles McAfee, Harold Braden, Bob Griffin and Sam Baumgartner.

The Crosley "Sisters" will entertain during the intermissions.

To some people signs don't mean a thing, and one of those persons is Betty Sue Morris. Sue walked into the Tool Room the other day and boldly asked Vic Hall if he could please direct her to, of all things, the Tool Room. Just like we said, signs don't mean a thing. There was a big sign hanging right above Sue's head that says Tool Room. . . . We want to welcome Verna Meyers to Bldg. 17-1. Verna came to us from Bldg. 4-4, and we hope she enjoys working with us. . . . Helene Evanoff asked that we retract the statement we made last week. We said Helene was taking a dancing lesson in the telephone booth. Helene says she wasn't. . . . All that Edmond Tickel would say was that it wasn't a door that caused that discolored mouse on his right eye. We wonder. . . . Now that the turtle is the talk of Bldg. 17-1, and numerous weight guessing contests have been started, it was up to the Tool Room to go all out. A walking contest is to be staged by Ed Huhn and Jack Lewis or John Braden and Ralph Pettit. If the turtle weighs less than 100 lbs., Ralph and John will walk from Churubusco to Fort Wayne; and if he weighs more than 100 lbs., Jack and Ed had better get their walking shoes limbered up. All we hope is that they get the turtle out, if there is a turtle. . . . The wearing of the green was very much in evidence last Thursday in Bldg. 17-1. We didn't know there were so many Irishmen and Irish ladies working in Div. 19. . . . A belated birthday greeting to Bernard Patrick Kramer. Happy birthday, Mike, sorry it's late. . . . Mary Gerhard has asked the question of the week—Would someone please explain how to tell a hard boiled egg from a raw egg without breaking the shell? Address all answers, Mary Gerhard, Bldg. 17-1. Thank you. . . .



If anyone has any questions about the riding qualities of a Buick, see Vic Hall. Vic is now the proud possessor of a 1949 Super Buick. . . . The scale in the bond room really gets a work out on Monday morning. People seen using the scale Monday morning were Ruth Meeks, Addie Masbaum, Agnes Cordes and Bill Walt. If you want to know how to keep the weight down on the scales, see Richard Evans.

Apprentice BROADCAST

By Mildred Ellis

Spring is here (we hope). Spring has a new meaning to some of our newlyweds. They are learning the trials of spring housecleaning. Oh, to be single again. . . . Thursday was a big day for the Irish. McNulty and Barnes each sported beautiful green ties. Spots before my eyes again, this time it was just O'Gebert with his new green polka dot bow tie—classy eh? Barnes claimed that the shirt he had on Thursday was the nearest he had to green. Me thinks he'd better have his eyes checked. . . . Some traveling was done by our apprentices over the week-end. We hear that Paul Mischo went to see the "Beast of Busco." No beast did he see—where's Busco. . . . Paul Wuttke spent the week-end in Chicago. While there he saw the Chicago Relays and Tony Martin. Paul claims that the relays get better every year. . . . Mr. Wolf was out of town on business Thursday and Friday. . . . Robert Zollinger makes the news this week by introducing a new Oil Bath. Confidentially, I don't believe the idea will go over very big with the fairer sex. . . . The "lunch gang" miss Don Macke. . . . When bad luck strikes once, it sometimes strikes twice but in the Raupfer household it usually strikes three times. This time the Chicken Pox. . . . Question of the Week—"What happened to Barnes' 'stinky' old pipe." Too bad it was found—hanging out the window for air, of course, no one in the mill section knew who "dood it." . . . Congratulations to Mr. and Mrs. Wilbur Jones who are the proud parents of a baby girl. . . . Yes, the draftsmen are still around. With the basketball pools and turtle pools the boys have been keeping pretty busy. Well! John's wife guessed the right number again to walk off with $11.50. What is the matter with you, John. I guess Dorothy should do all of your gambling. . . . The boys sure looked sharp in the volleyball game last week. They looked like a new team altogether. Even some of the machinist's said they sure had improved. . . . The draftsmen have entered a team in the G-E bowling tournament. The boys elected Carl Hubartt captain. The other members of the team are John Leffers, Warren Berkheiser, Leon Lahrman and Joe Rowan. Good luck, boys, we hope you all have a good day at the same time. . . . Final test grades came back and the "front row" boys did it again. This time they came out on the long end instead of the usual short end. That Metallurgy test almost threw one of the draftsmen because he didn't notice the questions were scrambled. . . . The final in pools is the one about the turtle of Fulks Lake. The weights range from 47 to 414 lbs. Homer Carson figured the turtle weight by specific gravity or submarine or something, at any rate his scientific guess is 414 lbs. . . . Warren Brown's alarm clock (a Rhode Island Rooster) must be on the rampage, because Brownie has been to work on time for a full week now. Methinks he oiled the clock with cod liver oil.

In the Office League Erv Aumann's 603 count on games of 211, 202 and 190 helped the Dickason Barber Shop Boys to a three game sweep Monday eve over the Blueprint boys. This left the two of them all tied up for first.

There were only three 200 scores rolled (You'd think they were bowling at Atlantic City) 224 by Walt Gerke, 204 for Ted Ross and 202 snagged by Don Waldrop.

Small Motor League

The Production boys still lead the league. Two hundred scores were kegled by Bill Walt, 220; Parks, 200; Paul Berghorn, 213; Ife Holmes, 202; Paul Walker, 226; C. Holmes, 202, and Boedeker, 213.

Interdivision League

The following scores were rolled two weeks ago, but better later than never.

The Series and Specialty boys banged out a 1029 for high single game this half.

Don Dimke paced the 600 counts with a bulging 656 on games of 200, 198 and 258. Russ Rose was right behind with a 635 on counts of 208, 169 and 258. Other 600 counts were rolled by Walt Mertz, 191, 201 and 225 for a 617 and Erv "Bad Boy" Haugk 224, 168, 216 for a 608.

Berning, Jr., led the 200 list with his 255 count. Others were Wayne Wiemer, 234; Junghaus, 224; Milt Marks, 222; Erv France, 221, Putman, 219; Lee Crowell, 210; Thurm Leichty, 206; Geise, 203; Paul Walker, 202; Walt Starke, 202; Jerry Saylor 201; Adam "Lazonga" Farrell, 200, and Andy Koorsen, 200.

This week's 600 parade was led by Habig with games of 215, 178 and 237 for a 630 total. Close behind was Rump on counts of 221, 211 and 194 for a 626.

Two hundred games were rolled by Iannelly, 248 and 216; Buck, 232; Billman, 228; Mertz, 217; Les Shroyer, 215; Matthews, 215; France, 214; Tobias, 213; Starke, 212; Kuntz, 211; Buesking, 207; Putman, 207; Schmidt, 206; Allmandinger, 205, and W. Seidel, 201.

Ladies' Monday Night League

Margaret Lepper rolled the high series of the week with her 500 count. For her total she kegled games of 151, 177 and 172. Other high games were made by Maxine Root, 173; Esther Muzzillo, 170, and Emma Vaughn, 180.

Transformer Division League

France and Hobbs led the league with their 200 games of 200 and 219 respectively.

Decatur Bowling Leagues

In the Mixed Doubles League, the high men were G. Schultz, 607 for a series; H. Murphy, 255, and George Laurent, 224. In the women's divisions were V. Murphy, 152; F. Schultz, 169, and H. Schultz, 167 and 162.

George Laurent rolled a 621 series in the Monday Night League with G. Schultz rolling 231 and H. Murphy, 200.

Again George Laurent led the G-E Fraternal League with a 620 three game series. Two hundred games were kegled by McIntosh, 211; H. Murphy, 210; E. Faulkner, 226; F. Wolpert, 212, and Zelt, 206.

Bowling and Stuff

No 3,000 count to report, but we do have a neat 1261 count to report in the doubles by Ed Kraft and his partner Chick Carr, Ed getting a big 690 count as his share. The 1261 put them in ninth place on the big scoreboard at Convention hall, home of the 1949 ABC Tournament.

George Luedeman led the singles division with a 601 count. Ed Kraft was right behind with a 598 and leading the all-events was also Ed Kraft with a 1841 total.

Bill Doehrman, Ed Kraft and Chick Carr were honored by the ABC last Saturday evening for having participated in 39, 29 and 27 ABC tournaments respectively.

Old Keghead had more hecklers on the train home than Ed had well-wishers, as Keghead came up with a measly 422 count. The ABC gave me credit for a 462 just to prove they make mistakes also. I'm quite sure everyone enjoyed the trip, unless it was "Breakfast In Bed" Mertz.

Have you entered the G-E Employees Annual Bowling Tournament? Entries close April 2, so hurry, hurry, hurry.

Good luck to the Fan Motor Team this coming week at the ABC Tournament.

There's no use for Brouwer's to go to the State Tournament with the Motor-Generator team unless it's to have a good time, because the M.G. boys always get the wood.

Winter St. Beats Firemen, 46-42, In First Playoff

Winter St. won the first game of the playoffs Monday in the Interdivision Basketball League by defeating the Firemen, 46-42.

As the score indicates, it was a close battle all the way. The winners took a slight lead at the start and held it. The star of the game was "Tex" Beneke with 22 points. Most of his buckets were from well out. The Firemen held the score close; but each time they threatened, Winter St. rallied.

Box Score:

Firemen	G.	F.	T.	Winter St.	G.	F.	T.
Moodie	2	0	4	W. Reitdorf	0	2	2
Stemmler	2	4	8	Kent	0	1	1
Morkoetter	5	4	14	Richardson	0	2	2
Etter	1	0	2	D. Reitdorf	2	1	5
Baals	1	0	2	Schinbeckler	0	1	1
Meyer	2	0	4	Fisher	0	0	0
Vance	2	1	6	Blauvelt	1	2	4
Lambroff	0	0	0	Gallmeier	4	1	9
Somers	1	1	3	Beneke	9	4	22
Schible	0	0	0				
Totals	16	10	42	Totals	16	14	46

It's spring again! Several of our most enthusiastic golfers have been thinking all the long winter months of their golf clubs stored away in their closets. It won't be long anymore, fellas, until you can get them out on tbe green. . . . Then, also there are many of us who have been long ready to haul out our fishing tackle and poles to go on those summer picnic and fishing trips. . . . Do you realize that it's only 18 weeks until vacation? . . . R. W. Kaeck, A. C. Division, didn't quite make the exclusive "Floor Sitters Club," when he fell last week, but the floor was so close, he could almost feel it. . . . The close associates of Norm Oetting wish to thank him for buying a new pipe. But, Norm, please be careful and don't wash this new one in Duz! . . . Glen Stapleton and Harry Balz, D. C. Division, have just about decided that it is a good thing it is "spring" and housecleaning time. They both had unwelcome visitors in their desks over the week-end who ate some of their candy bars. . . . Joe Gardt brings home tbe groceries. He won a basketball at the Elex Bingo the other night. . . . Charlie Thomas has been seen lunching here quite often lately. We heard the explanation was that his wife is now on a diet. Could it be he likes his game of checkers, too? . . . Art Wilson was the lucky winner of the raffle in which the tool chest belonging to the late Paul Menze was the prize. . . . Happy birthday to Glen Stapleton, Max Barrows, and Mildred Hartman. . . . Lucile Zimmerman, Purchasing Section, has been wearing a pretty diamond on the third finger of her left hand for over a week. The lucky man is Edwin "Red" Mourey. . . . We hear that Gladys Knauer has a wonderful technique on "How to Catch a Man." Tell us more, Gladys! . . . We in Bldg. 4-6 bid farewell to the Purchasing Section, which is now in the process of moving to Taylor Street. We extend our wishes for a speedy recovery to Arlene Dillinger, Renewal Parts Division. Arlene is in the Van Wert Hospital recovering from an appendectomy. . . . We also wish a speedy recovery to Mrs. Dick Killian from her recent operation. . . . We still wonder what caused Hazel Rowe to fall flat on the floor in the Production Section, but we are glad she wasn't injured. . . . With the approach of spring, a young woman's fancy turns to love, and since the most readily available creature in Bldg. 4-6 is Meat Ball or Nature Boy O'Keefe (Sometimes called Ray), we assume his prefumed mail will far outweigh his business correspondence. . . . We in Northern Indiana are quite proud of the Auburn High School Basketball team, and, of course, were all rooting for them when they played in the finals in Indianapolis last Saturday. We are doubly proud of Jim Schooley, who won the Trester Award, which is the highest award given to a High School Basketball star.

Personality of the Week

We introduce Ernie Hicks, draftsman in the D. C. Division. Ernie graduated from Indiana Technical College and the G-E Apprentice School and has been employed with the Company nine years. Ernie's favorite hobbies are refinishing furniture (which incidently requires a great deal of skill) and record players. Ernie is married and has two children, one is in the first grade at Forest Park School and the other has not yet reached school age. The Hicks reside at 1026 N. Anthony.

The regular Interdivision Basketball League season ended last week leaving only the payoffs. While the race was not as close as it has been in some previous years, the spirit was excellent.

Taylor St., after losing all of its seven previous starts in the second half, never gave up. They won their last game of the season, beating Tool and Die, 36-26.

Tool and Die was down to five players the biggest part of the second half, but Manager Yentes had them out for almost every game.

Transformer and Small Motors, two teams that ran hot and cold all season had a close game with the former winning, 37-33.

The Apprentice School piled up a 10-point lead in the first quarter over Fractional and held it all the way winning, 44-32.

The Squares and Winter St. played the season's finale with Winter St. coming out on top, 34-24.

Box Scores:

OUT OUR WAY

By J. R. WILLIAMS

G-E Rod, Gun Defeats Huntington Rifle Club

A match was held Thursday, March 17, at the Huntington YMCA between G-E and the Huntington Rifle Club.

E. Allmandinger and F. Reed tied for fourth place with each having the exact score for eacb relay. They shot off the tie at standing position with F. Reed out in front 78-77.

G-E Rod And Gun Club				
O. Emrick	98	95	82	275
K. Hart	97	92	81	270

H. Carr	97	95	69	261
C. Sauers	96	86	70	252
Team Total				1,054

Signs of Spring

Spring is here! According to the calendar, Sunday was the first day of spring. The next day Pa began painting the screens, Ma got her spring cleaning started, Uncle Ed started resurrecting his golf clubs and fishing tackle from the hall closet, and Aunt Suzie spotted the first robin of the season.

Other signs of spring came from the children. To record their reactions to the warmer weather, the WORKS NEWS photographer caught the scenes above:

1. Bobby, 8, helps his sister Nancy, 12, on with her roller skates. They are the children of R. C. Cowan, Taylor St.

2. Having a little string difficulty while building his kite is Jack Hirschfelder, 5, son of Darreld J. Hirschfelder, Bldg. 26-4.

3. Watch out for neighbors' windows and worn-out trousers when the boys take off for the nearest lot and a game of baseball. Trying out a brand new bat, Danny Somers, 14, gets ready to crack the first ball out into center field. His father, Forest, works in Bldg. 20-2.

4. No spring is complete without its lovers. Karen Sonday, 9, receives some flowers from an admirer, Monty Lepper, 8. Karen's father, Edwin, and Monty's father, Ray, are both employed in Bldg. 4-2.

5. Neil Bracht, 13, goes whistling down a lane to catch one of those big ones. He is the son of Roy F. Bracht, Bldg. 4-2.

6. Big sister, Dianne, 12, decides that if she is going to do any swimming this year, she is going to have to hand her swimming suit down to Colleen, 8, and buy a new one for herself. Daughters of George M. Murray, Bldg. 31-1, the two discover they have grown since last summer.

7. Andra Jeanne, 8, and Sue Ann, 12, daughters of William P. Schible of Bldg. 20-1, look over all the latest seed catalogues to plan their new garden.

Medical Memos

By Mary Heymann

Until another name has been found, our new column will remain "Medical Memos." There have been several suggestions for a name to be used as a title for the column telling of the activities of the Medical Section. To be fair with all concerned, it has been decided to have a CONTEST! All entries will be filed immediately in the nearest wastebasket. No box tops necessary. The winner will be given his (or her) choice of either one package of cold pills or six bandaids. So Enter Now. Do Not Delay! . . . Red Cross First Aid classes are in full swing. Our section is well represented. Veda Orff is one of the instructors, while Berneta Welbaum, Alta Bishop, Lyle Rupert and Mary Heymann are attending classes. There was some confusion, I understand, at the first class. It seems someone went to the wrong church! Do you suppose a city map would help, Veda? . . . Thelma Harrison, Taylor Street, recently became an aunt. Her niece is named Patricia. . . . Several of our group have been having what is known as "the common cold." Berneta Welbaum and Bertha Schrader of Bldg. 21-1 and Mabel Wilson, Winter Street, were off work but are back now. . . . Dust and the smell of paint are flying high and low in Bldg. 21 where new floors and general housecleaning are in order. Everything's topsy-turvy, but soon you won't know the old place. . . . Wanted: to trade even, my new Nash for an Austin or horse and buggy—Signed: Duane Stroud. Have a heart, Duane, the garage repairmen need work too! . . . Minnie Fryback of the Aboite Center road entertained at 6 o'clock dinner on Saturday night for some of the former nurses and co-workers of the Methodist Hospital. . . . Would like to use this litle poem as a closing thought:

When there is righteousness in the heart,
There is beauty in the character,
When there is beauty in the character,
There is harmony in the home,
When there is harmony in the home,
There is order in the nation,
When there is order in the nation,
There will be peace in the world.

Anon.

May we keep this thought ever in our minds and hearts.

FORT WAYNE WORKS
NEWS

He was wounded for our transgressions, He was bruised for our iniquities.

Voltmen Announce Schedule of Games

Semi-pro Champions Open Season Against Michigan City Here May 15

The G-E Voltmen, twice national semi-pro baseball champions, will open their home season against the Michigan City Cubs Sunday afternoon, May 15, at Dwenger park.

The complete league schedule for the ensuing year was announced this week and includes 50 battles. A number of exhibition games with leading clubs from throughout the country will be added to the schedule later.

The league schedule ends Aug. 21 to allow the Voltmen to invade Wichita, Kan., and defend their semi-pro championship title in the annual National Baseball Congress tournament.

To Sign New Players

John (Red) Braden, now in his eighth year as manager of the Voltmen, has been busy the past few weeks signing new ball players.

Average of Nearly 50% Of Employees Investing In Payroll Savings Plan

The United States Treasury Department announced today that employees of the General Electric Company were investing in U. S. Savings Bonds at the annual rate of $30,005,270 as of Dec. 31. Participating in this automatic Payroll Savings Plan were 86,384 workers, an average of nearly 50 per cent of total employment. This is a gain of almost 100 per cent over 1947 when 45,000 employees participated.

City Traffic Departments Place Safety Lane Across Broadway

Wilbur Babcock, of the City Traffic Engineering Dept.; A. R. Vegalues, G-E Chief of Police, and Gregor H. Klug, Captain of Traffic for the City Police Dept., watch one of the city workmen paint a safety lane across Broadway before placing the white blocks.

Work was started last week by the city of placing permanent safety lanes for pedestrians across Broadway and in front of the gates to the plant.

The project was arranged by the Company in co-operation with officials of the city traffic and police departments and bus companies.

REPORT IS AVAILABLE AT EMPLOYEES' STORES

Copies of the General Electric Company's Annual Report and Yearbook for 1948 are available to all employees at the Decatur, Broadway and Taylor St. Employees' stores.

MBA Benefits Nearly Double Under New Plan

2,348 EMPLOYEES, DEPENDENTS RECEIVE $284,714 LAST YEAR

During 1948 a total of 2,348 employees and their dependents received $284,715.53 in disability, hospital, death and surgical benefits from the General Electric Mutual Benefit Association. There were 1,498 employees and 850 dependents that benefited from the plan.

The total amount paid in 1947 was $166,472.90. The amount has increased over 1947 because of the expanded MBA plan. This new plan increased hospital benefits and added surgical benefits for employees and hospital and surgical benefits for dependents.

The average paid to each employee this year was $146.32 and to each dependent, $77.08.

Employees or their dependents that received more than one of the benefits were counted as one person in the total report, as were those who received benefits for two or more separate reasons.

Benefits totaling $136,591.15 were paid on 1,371 employee disability cases. Hospital benefits amounting to $38,489.16 were paid on 662 cases. Payments to 62 employee beneficiaries for death benefits amounted to $12,200. Surgical benefits were paid on 574 cases and totaled $31,911.55.

Benefit payments in 1948 exceeded 1947 payments by $52,718.96.

Elex Plans Trip To Niagara Falls

The Elex Club will sponsor an excursion to Niagara Falls June 11 and 12. Mary Leiter, Winter St., has been named chairman of the trip.

Mary Leiter

A special train will leave the Wabash station at 1 a.m. Breakfast will be served enroute after leaving Detroit. The train will arrive at Port Huron, Mich. at 7:30 a.m. and will then go by tunnel to Sarnia, Ont., where Elex members will pass immigration and customs lines. Arriving at Niagara Falls, Ont., at 12:30 p.m., the girls will transfer to the General Brock Hotel, overlooking the falls. They will be housed there.

The girls will have all day Saturday and Sunday morning free. From the Canadian side, some of the outstanding points of interest are the front view of the American Falls, Horseshoe Falls and Canadian Rapids. The falls are illuminated during the evening.

After Sunday dinner, there will be a special bus tour arranged to see other points of interest. Following the sightseeing trip, at 3:15 p.m. they will board the train and arrive in Fort Wayne Monday, June 13, at 12:45 a.m.

The cost of the trip is $31.50. The price includes round-trip railroad fare, breakfast and dinner enroute, hotel accommodations at the hotel, two to a room, transfers to hotel and station, sightseeing trip,

Red Cross Drive

A total of $10,171.88 was contributed to the Red Cross during the fund-raising drive recently completed at the Broadway, Taylor St. and Winter St. plants.

Fractional Horsepower Div.	$4,313.28
Works Service, Contributing Div.	2,539.68
Transformer Divisions	1,480.15
Motor-Generator Div.	1,038.77
Winter St.	800.00

Production Methods Conference Held Here

Eight production supervisors and assistants from the Schenectady, West Lynn and Pittsfield Works were guests of the Specialty Transformer and Ballast divisions and the Contributing and Service divisions of the Fort Wayne Works this week at a conference in Bldg. 16-2.

A part of a course on Production Methods, the conference was held as one in a series of four which are being conducted at each of the participating works in this group. There are six groups altogether in the General Electric Company taking the course and each group includes about four works.

The first session of this group was held at Schenectady last February. They will meet at Pittsfield in May and at Lynn in June.

Gamec Opens Conference

F. T. Gamec, Production Manager of the Specialty Transformer

(Continued on Page 3)

Seated: (l. to r.) L. E. Bradbury, Schenectady; W. J. DiGerolamo, West Lynn; C. R. Stevens, West Lynn; T. W. Jones, Fort Wayne, and Clifford Thiebolt, Fort Wayne. Standing: (l. to r.) M. S. Fay, Schenectady; J. J. Lavin, Schenectady; C. W. Prowse, Pittsfield; J. J. Derven, Schenectady, and H. Desmond, Pittsfield.

What's Good For The Goose Is Good For The Gander

Politicians smart in the ways of public reactions have widely sold the idea that if a company raises prices, it's an outrage to the consumer, and if it cuts prices, it's a plot to prevent the paying of higher wages. Under this theory, business, never government, always takes the rap.

Take the matter of profits, which are at an all-time peak. Wages, costs and turnover are also at an all-time peak. The basic reason is that the rubber dollar is now worth approximately 50 cents, and it takes twice as many dollars to operate. Employees believe that twice as many rubber dollars for wages is O.K., but do they admit the stockholders should also receive twice as many rubber dollars? Not so you could notice it. Yet that's the real answer. The percentage of profit to the amount of business done is about the same as when the dollar was worth 100 cents.

One of the weakest arguments used by economists for the CIO and other labor groups is that wages can be raised without raising prices simply by making up the difference out of profits. What that would mean is that the pay of the stockholder would be cut. Profit, in the form of dividends, is what the stockholder gets for the use of his money—precisely as the worker gets a return, in the form of wages, for the use of his time and his skill. Both are absolutely vital to a free and progressive economic system.

The argument that good profits rob workers, consumers or any other group, is one of the weakest conceivable theories. Today, a very large part of the profit earned by industry goes, not to stockholders, but into new plants and other physical facilities. And it is those plants which will provide employment, at good wages, to workers in the future—and it is those plants which will provide goods and services the people want, and produce them at the most reasonable possible price. Suppose, for instance, that we taxed profits 100 per cent. How long do you think it would be before an economic depression, with soaring unemployment, dropping living standards, and all the other manifestations of bad times, would get a firm grip on the country?

This nation was built on good wages for workers and good profits for owners. It's just another example of the truism that what's good for the goose is good for the gander.

Take It Easy, Doc

Jackie is a normal boy except for hearing and speech difficulties. He's receiving speech and hearing treatment regularly that will help him communicate with others and adjust his handicap to everyday life. You help boys and girls like Jackie as well as those with other handicaps when you buy Easter Seals from the Allen County Society for Crippled Children.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q: What is a gas turbine?

A: In the ordinary gasoline engine used in automobiles, a mixture of gasoline vapor and air is admitted to the cylinder and exploded, the expanding gases pushing on the piston and turning the crankshaft. With a gas turbine, however, air is compressed and led to a combustion chamber into which the fuel is injected and burned, so that the temperature of the air is raised and the pressure increased still more. The stream of hot gas pushes on blades of a turbine, which turn a shaft. Part of the power has to be used to drive the compressor, but the rest is left over to do useful work. The idea of a gas turbine is a very old one, but only in recent years has progress in aerodynamic design and metallurgy made it practicable.

HUGH CRANE *discusses* State of the Nation

NEW YORK—The other night I was over at Ed's and his Missus' for dinner. Afterward we were having a quiet after-dinner-coffee talk about baseball, pyramid clubs, Ed's boss, the kids, and such things, when in walked Joe Aiglon and Elmer Pettengill, just through bowling.

So in no time at all the usual argument started up, about "conditions," the state of the world, and such high-flying subjects of conversation. Joe likes to talk about them because he always has either a gripe or a bright idea, while Elmer likes such talk because it gives him a chance to show that he doesn't believe in anything that anybody says.

"The government ought to do something," said Joe. "People in the Blank Department are being laid off for lack of orders. We're going into a depression. Why doesn't somebody in Washington get busy about it?"

Who Is "The Government"?

"What do you mean, 'the Government?'" asked Elmer. "Do you mean the President, or Congress, or the Federal Communications Commission, or the Bureau of Wild Life—or what?"

"Oh, anybody," said Joe. "Somebody, anybody. They ought to make some jobs. Guys are out of work."

"That's bad," said Ed's Missus.

"Sure, it's bad," said Joe. "It doesn't make sense. The country needs everything; but instead these guys sit around and bite their nails. 'No orders, no work,' says the foreman. Can you beat it? Where's the President of the United States, why doesn't he do something about it?"

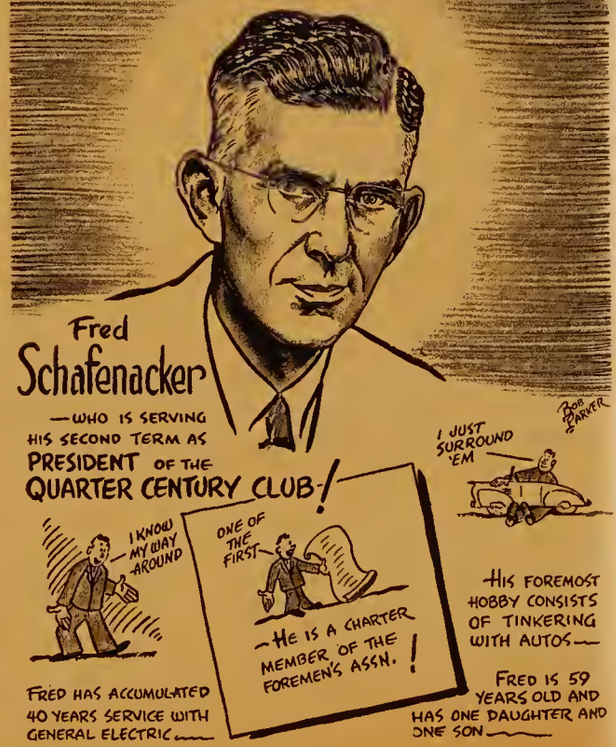
"Pass the butter," says Elmer, handing himself some crackers and cheese. "I hear the price of butter has come down."

Should President Do More?

"Don't you think the President ought to do something to stop the recession?" says Ed to Elmer. "It might get bad if it goes much further."

"What can he do that he hasn't done already?" says Elmer. "He's asked for more money for everything he can think of, from old-age benefits to aid-to-Europe. Give him what he asks for and there'll be

(Continued on Page 3)



Our Faces Are Red

Last week there was a story on the front page telling about the "only father and son combination in the Quarter Century Club."

We had checked the authenticity of this story with proper authorities and were assured it was accurate.

Since its publication, however, we have learned of at least one other father-son combination in the club. To remedy our error, we would like to hear about all the others so that we might run another story.

Meet the President

P's and Q's of 17-1

by Joe Kramer

In spring a young man's fancy turns to what young girls have been thinking of all winter. . . . It must have been spring that caused Addie Masbaum to walk to the Fairfield parking lot before she realized she had left her car at Brouwers service station (notc the commercial) to be washed. . . . Speaking of spring, Vic Hall is looking for a musical horn to put on that super Buick. We wonder if he wants a whistle or wolf howl. . . . Ed (Bring-'em-back-alive) Huhn will be more careful in the future about unchaining certain animals. It seems, so the story goes, that Ed was playing with a coon on a chain. Being of a democratic nature, Ed couldn't see any reason to keep the coon chained up. The scratches on his arm and back will testify to his misjudgment. . . . Carl Fisher is looking for an instructor to give him 10 easy lessons in how to land fish. It seems he is able to get them up to the boat, but unable to get them in the boat. . . . Curly Sprague is now in the jewelry business. If you have any watches to be demagnatized, or old rings to be mended, get your order in early and avoid the Easter rush. . . . Paul Geiger missed out on the 7 a.m. gab session last week due to Johnnie Junk not coming along in time to bring him to work. Paul was out of sorts all day due to missing the pep session. Maybe he should try standing on the right corner next time. . . . If anyone knows the steps of the new dance, the BeBop, Helene Evanoff would like to take a few lessons. . . . We wondered where Ed Brosche got all of his playful boyhood ideas. It finally came to light this year that Ed's birthday occurs during National Boys' Week. Ed was a playful 29 yesterday. Happy birthday, Ed. We also extend best wishes to Paul Geiger. Paul is celebrating his 28th birthday. . . . Ed Martin has changed his name to Captain Cupcake. It so happens that everytime Frank (Nature Boy) Martin's wife bakes cupcakes, the Captain sticks his nose out the door and says, "Let's go for Vesey Avenue." Ed gets there before the cork is out of the vanilla bottle and can be seen taking home a sack of cupcakes. . . . George (Goldie Locks) Mosshammer is in the market for a new hat to go with his Easter suit, but he does not know what kind of flowers to have on the hat. George has a new pen and pencil set to put in the pocket to make him look dignified, so he says. . . . Another person looking forward to Easter Sunday is Charlie Niblick. Charlie is all set with his Ed Arthur suit. We have no reports as to where he got his hat, but we do know it did not come equipped with flowers. . . . We wonder why some people won't take a copy of the WORKS NEWS home, and if they do, we wonder why the page that this column appears on is missing. We won't put your name in the WORKS NEWS anymore, Mr. Tickel. . . . We don't know whether it was a dancing lesson or a modeling demonstration that Wally McKay was giving in the office last Monday noon.

Bob Drake Receives Tickets For Naming Minstrel Revue

Bob Schulte, publicity chairman of the Squares Club, presents two tickets to Bob Drake, Bldg. 28-2, for his winning entry in a contest to name the minstrel show which the club will sponsor later this month. Mr. Drake proposed the title "Plantation Capers."

Test Engineers Hear Address By C. E. Slater

Charles E. Slater, of the Labor Relations division, addressed the Test Engineers' bi-monthly meeting Tuesday at the Chamber of Commerce. Mr. Slater's topic was "Human Relations in Industry."

In his address, Mr. Slater discussed the organization of the Labor Relations division and the background necessary for labor relations personnel. He then pointed out the need for mutual respect and understanding by both labor and management. He stated that as a result of this understanding there are better working conditions, is more job security, and better community and personnel relations.

G-E Engineers To Hear Talk By Paul Robbins At Annual Meeting

The Fort Wayne Association of General Electric Engineers has announced plans for their annual meeting to be held at the Fort Wayne Chamber of Commerce Wednesday evening, April 13, in collaboration with the Anthony Wayne Chapter of the Indiana Society of Professional Engineers.

The special feature of the meeting will be an address by Paul H. Robbins, Executive Director of the National Society of Professional Engineers. He will tell of the steps which have been taken and are being taken by the National Society toward obtaining adequate recognition for professional engineers. It is expected that Mr. Robbins will also relate his experiences in presenting information concerning engineers to committees of Congress during the formulation of the Taft-Hartley Law and the current revisions being considered for that law.

Production

(Continued from Page 1)

and Ballast divisions, opened the conference Tuesday morning and introduced C. E. Slater, of the Labor Relations Division. Mr. Slater discussed the importance of the production function as related to labor relations.

Before conducting a tour of Specialty Transformer Div. 93, W. H. Connor explained the floor layout of this division in terms of objectives, capacity and realization. Mr. Connor is the Manufacturing Engineer in the Specialty Transformer and Ballast divisions.

T. W. Jones, Assistant to the Supervisor of Production in charge of Order Service in the Specialty Transformer and Ballast divisions, discussed the operation of layout and production methods of Div. 93 Tuesday afternoon.

A dinner at the Hotel Van Orman concluded the Tuesday session.

Maintenance Problems Given

A. E. Leider, Production Manager of the Works Service division, opened the meeting Wednesday and introduced Clifford Thiebolt, Supervisor of Production in the General Service division. Mr. Thiebolt explained some problems of maintenance related to production.

A tour was then made of the General Service division.

W. C. Wichman, Manager of the Specialty Transformer and Ballast divisions, talked on the subject, "What does a product manager feel is the responsibility of the production function?"

A talk on office methods and their applications by E. J. Horstman, Supervisor of Procedures in the Specialty Transformer divisions, concluded the conference Wednesday afternoon.

Elex Plans

(Continued from Page 1)

bridge tolls, tips and handling of baggage at the hotel.

Reservations can be made either with Irene Meyers at Broadway, or at the Taylor St. Personnel office by making a $5 payment. When making reservations, the following information must be given: Name, address, age, birthplace, and marital status. If any naturalized citizens are taking the trip, they must have their naturalization papers. Everyone must have some means of identification for the customs officials.

Hugh Crane

(Continued from page 2)

pie in the sky for everybody from Norway to Mississippi."

"Yeah," says Joe. "That's inflationary. That'll drive prices up through the roof."

"Listen," says Elmer, "What do you want Joe? You do want deflation. You do want inflation. You want everybody should have jobs, but you don't want high prices. Which do you want?"

"Neither," says Ed's wife.

"Stability," says Ed. They both spoke at once.—I suppose because they're both stable people.

"All right," says Elmer, who seemed to be quite riled for some reason and had stopped eating crackers. "All right, I'll tell you how to get stability."

"I know," said Joe, "you get stability by having the President and his advisors do something."

"Not at all," says Elmer. "Not at all. Quite a different way. You're way behind the times."

"How's that"" I said. "We try to keep up with things. The Full Employment Act and all that. Shouldn't something be done to take care of inflation, if inflation's the problem, and of deflation, if deflation's the problem?"

"Not Do Something"

"Mh, Mh," said Elmer. "Quite the contrary. Something has to be not done."

"What do you mean?" asked Joe.

"Just this," said Elmer. "The President has already asked for everything you can imagine—on either side. More spending than the country can stand, and more taxes than the country can afford. He's got a heavy foot on the accelerator and a heavy foot on the brake. Congress will have to decide. If it decides that inflation's the problem, then it's less spending. If deflation's the problem, it's less taxing. Either way, something has to be subtracted.

"And it's Congress that has to do it," he continued. "Not Harry. The President is our hope of everything; Congress is our hope of stability. Just let's not condemn. . . ."

But at this point Ed's Missus interrupted by saying, "You boys must be tired arguing; would you like some scrambled eggs?"

Anybody who wants any new methods of cooking see Earl Munson, the chef of the tool crib. Say, Earl, if you care to, you can bring us samples of your cooking, since we are always pretty hungry about 9 a.m. . . . Ah, spring is here, as the birds are singing, the bees are buzzing, and so is Red Smith. He is always whistling "Cruising Down the River." Red, why don't you learn all of it. . . . It seems like a "Mr. Bruns" had a little nose trouble and had to pay for it. He stood up on his bench to look over the top of the new engineering test room and stepped on Wayne Gilliom's nice $7 pipe, breaking the stem and was Brun's face red. He was willing to pay for the damage that was done, but poor Mr. Gilliom was out of pipe smoking for the afternoon. Wayne, you ought to carry a spare as you know accidents will happen. . . . Can you imagine Louie Miller trying to pay the candy lady with 1/4-20 nuts instead of money? Too bad it didn't work, Louie. . . . We see that Paul Sturm came into work this morning wearing his cowboy boots and they sure had a shine on them. Paul, the fellows want to know, "where you keep your horse?" . . . "Life Gets Tedious," so I'll have to sign off for this week and save some gossip for the next time.

Decimal Minute Men Hold Annual Election

Perry Esterline has been elected president of the Decimal Minute Men.

Other officers elected are William Meyers, vice president; Edson Dickey, secretary; Hobart Retter, treasurer, and Gail Kreager, sick and welfare. The steering committee was also elected and includes Neal Hench, Eugene Foster and John Laymon. Installation of officers will be held Monday night, April 18, at the Chamber of Commerce.

Plan to get your Voltmen ticket early.

It's Windy Here

FHP Motor Division 17 Office

By Joan Auhrey

Joan Lebig had decided that the next time she feels like a little outdoor exercise she is going to stick to her bicycle and leave the horses to the cowboys. She said everytime she would let out with a moan, the horse thought she was saying "Whoa" and there she would be standing still again. . . . Perry O'Neill played on one of the "Old Timers" basketball teams the other night at the G-E Club, and he too discovered some muscles he hadn't used for awhile. Perry, you are getting too old for that sort of thing, you had better stick to fishing off the bridge. . . . The very best of luck to Earl Wynn who is leaving our group this week. Earl, we really do hate to see you leave. . . . Have you noticed the cushion on Dick Pinkham's chair? That is really solid comfort. When are you going to get the footstool to go with it, Dick?. . . What happened to your scores in the bowling tournament last Saturday, Hughie? Guess you should stick to fishin' too. . . . See you next week.

Fractional Fiction 4-5

By Leola Carrier

Birthday greetings of the week go to Lucinda Pettit, Olga Hart, Louis Hutchinson and yours truly. . . . Spring is here in some ways. Ilo Kraft is serenading the roads by taking driving lessons. So be on the lookout, if you see a fast or slow driver, it might be Ilo. . . . We understand we have another good fisherman on the floor. He is Everett Shull. He recently caught 26 catfish in one fishing. . . . The co-workers of the packing section wish Joe Moritz a speedy recovery. He is on the sick list. . . . Old news is still good. One morning Francis Gerardot came to work with his shirt on the wrong side, and Ruth Leeuw with hose that were not mates. Could it be spring fever or the alarm didn't ring and they had to hurry. . . . Lucinda Pettit spent the week-end in Chicago and Neva Scott in Buffalo. They had a wonderful time. . . . George "Ola" Langenberg put on a good exhibition last Friday night at the old-timers basketball game. Other members of "her" team had difficulty with their wearing apparel, but Ola managed to keep her wig and clothes on. The whole team was dressed as girls and they had the house in an uproar all during the game.

First Joint Meeting of Trainees Is Held This Week In Schenectady

"Leadership—Key to the Future"

This was the theme for the first annual joint meeting for men on the Advanced Manufacturing Leadership Program. The meeting was held in Schenectady, March 30 and 31.

Men attending the meeting represented the three phases of the training program: the Advanced Manufacturing Program, the Advanced Production Program, and the Advanced Methods, Planning and Wage Rate Program.

The objective of the meeting was to provide an opportunity for the trainees to hear several members of Apparatus Department management discuss the various phases of the Company's business and the part effective leadership plays in meeting these business challenges. Trainees actively participated in the meeting by asking questions of the speakers and discussing between themselves the contents of the various talks.

W. W. Trench, Secretary of the Company, highlighted the two-day meeting with a dinner talk Wednesday evening at the Hotel Van Curler. His subject dealt with the importance of leadership to the Company in the past and what it will mean in the future.

The Wednesday meeting was devoted principally to talks and discussion on some of the major functions of the Apparatus Department, such as, Sales, Engineering, and Employee and Community Relations. Speakers for this day were: N. Currie, Jr., C. H. Lang, B. A. Case, J. A. Spencer, H. V. Erben, K. O. Schulte, T. D. Foy, and A. M. Webster.

The second day of the meeting was devoted to talks on such functions of manufacturing as: Methods and Equipment, Quality Control, and Production. Talks were presented on this day by: C. H. Linder, C. W. Fuller, A. V. Feigenbaum, L. J. Male, T. F. Garahan, and F. T. Lewis.

Men sponsored by the Fort Wayne Works who attended the meeting were:

Advanced Production Program—B. F. Brickley and E. S. Sembroski.

Advanced Methods, Planning and Wage Rate Program—M. F. Trott, J. T. Howerton and R. D. Olson.

Others, who are now located at Fort Wayne but sponsored by other works, are:

Advanced Manufacturing Program—T. B. Greenman.

Advanced Production Program—W. R. David, R. G. Loecher, R. F. Richard, W. L. Scanlan and E. C. Hazelwood.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

The Service Bureau welcomes Helen Folsom from Taylor St. She has taken over Vera Killian's place. Vera is doing well and if anyone desires to see her, she's in room 258 at the Lutheran Hospital. . . . Just think what a li'l bit of teasing can do. Thelma Schmidt has been teasing Bob Thomas and George Sawles about dressing up instead of always wearing their sport clothes. To her surprise they came to work Thursday each with a tie and suit on. Boys, you did look nice. . . . The Production office of Bldg. 26-2 welcomes Velma Meads and Millie Kouder both from Bldg. 26-4. . . . The Drafting division welcomes back Ralph Pappert. He had been ill several days. . . . Have you ever heard of a kissing transformer? Roedean Dowell was typing a quotation and in the body she was supposed to type about "vertical blocking oscillator transformers," instead she typed "Osculator transformers" — osculating means kissing, so they now have kissing transformers in Bldg. 26-2. . . . Last week Les Denham went to Chicago and while there the hotel was so crowded he spent the night on a cot in the powder room —cost $2.50. Did you have a restful and peaceful night? . . . With the surplus of girls in Fort Wayne, why don't John Oldenkamp and Chet Krasienko give more than just one gal (and the same one at that) a break? With all their charm it hardly seems fair that one girl should get all the advantage of it (Quarter please.) . . . The fellows in Ballast Engineering were wondering where Gordon Harvey's tan was when he returned from two weeks in the "land of sunshine," (California, that is). It was strictly a business trip though, so consequently, Mr. Harvey still has on his Indiana complexion.

Elex Club Holds Sale, Plans Easter Parties

The Elex Club rummage sale is being held today and tomorrow at the home of Dorothea Slyby, 308 W. Brackenridge St. The Partizan chapter is supervising today's sale, with Elex members clerking tomorrow.

The Melody Trio will sing for the Elex Easter parties Monday, April 4, for the day girls and Wednesday, April 6, for the night girls. Delores Patterson, Bldg. 26-2, will also sing for the Monday evening program.

Supper will be served from 4:45 until 6 p.m. for the day girls' meeting at the G-E Club gym. The night girls' luncheon will be at 12 noon in the YWCA.

George Steinacker Dies At Hospital

George J. Steinacker, 52, 2016 Oakley St., died at 4:45 p.m. Friday, March 25, at St. Joseph's hospital where he had been a patient since Wednesday.

A lifetime resident of Fort Wayne, he was a member of St. Paul's Catholic Church and its Holy Name Society. He managed a grocery and meat market with his father before coming to General Electric in 1942.

Mr. Steinacker is survived by his father, Frank J.; a son, James J.; a daughter, Mary Theresa, and a sister, Mrs. Veneta Doescher.

Five Employees Go On Retirement

Lola McCague

Lola McCague, Bldg. 17-2, left today for retirement. Mrs. McCague first came to General Electric in 1922, when she did armature work in Bldg. 4-5. During her service with the Company she has worked as an assembler, inspector, gager and finisher. At the time of her retirement she was an insulator.

Mrs. McCague is living at 1113 E. Wayne St.

C. O. Tuttle

Caryl O. Tuttle, Bldg. 26-1, retired today after 23 years service with the Company.

Mr. Tuttle was first employed in 1916 as a punch press operator, and later became a punch and die setter. In 1921 he transferred to Bldg. 17-3 as an assembler. Mr. Tuttle then was a punch press operator in Bldgs. 4-1 and 26-4. Since 1925 he has been working in Bldg. 26-1.

He lives on Arbor Ave.

Arba Kurtz

Arba Kurtz, Taylor St., retires today after 21 years of service. She was first employed in Bldg. 17-4, doing armature work. She later did hand winding, stacking, burring, and cleaning after having been employed at molding in the Plastic division. Since 1948 she worked in assembly at the Taylor St. plant.

Miss Kurtz lives at 1825 Webster Street.

W. F. McKinney

W. F. McKinney, foreman of the carpenter and box shop, Bldg. 10-1, retired recently. He started at General Electric April 6, 1925. He has been a foreman since 1939. He previously worked in the factory methods shipping division and in the carpenter shop. Prior to his G-E service, Mr. McKinney served as an officer in the U.S. Coast Artillery.

He resides at Hazelhurst Dr., is married and has a daughter who is a student at Indiana University.

Effie Wyatt

Effie Wyatt, Taylor St. plant, retires today after 22 years with General Electric. Her employment service dates to January, 1926, and her first job was an insulator in Bldg. 10-3. She has worked as leads and cables maker, field wedger, finisher, assembler, and tier. At the time of her retirement she was a carton packer.

Miss Wyatt resides at 506 Lavina Street.

70 Suggestors Share $901 In Awards

Thompson Earns $50

Fred Thompson, FHP Motor Div. 16, made a suggestion to install a system of electrical switches on annealing ovens which netted him $50. Mr. Thompson, at the right, points out a few features of his suggestion to Jack Dobson, his foreman.

Seventy suggestors shared $901 in awards this week. Top man for the list is Harold L. Gick, FHP Motor Div. 13, who received $145 for his suggestion about the finish on jet pumps.

Next in line is Fred Thompson, FHP Motor Div. 16, with a $50 award. Mr. Thompson's suggestion pertained to the installation of a system of electrical switches on annealing ovens. Chet McIntosh, Decatur plant, was awarded $45 for his suggestion on testing overloads. Forty dollars went to Robert M. Turschman, FHP Motor Div. 14, for suggesting the purchase of tubing in 35 inch lengths.

Those who received $25 awards are Ardell W. Hambrock, FHP Motor Div. 13; Roy J. Burris, FHP Motor Div. 14; T. H. Gehrig, Decatur plant, and John A. C. Lea, Specialty Transformer Div. 95.

The following employees received awards amounting from $5 to $20:

FHP Motor Div. 13: Donald I. Macon, Bertha Albrecht, Charles A. Sherland, Paul L. Brandt, Ruth M. Smith and Brice Martin.

FHP Motor Div. 15: Christian Stauffer, Ralph Dilworth, William B. Widdifield, Paul K. Habecker, Park E. Schemehorn (two awards), Lola M. Whitackre, Donald E. Rose, Sylbert Heaston, Carl W. Barber, Willis K. Dillman (two awards), Roy W. Molthan, Roy F. Bracht, Merl E. Bryie, Francis F. Fann and Harry C. Grimm.

FHP Motor Div. 16: George Eshelman, Owen W. Cartwright, Adrian H. Weaver, Eunice Zehr, John Anderson, and Art Maske.

FHP Motor Div. 17: James J. Carey.

FHP Motor Div. 10: Charles E. Gable.

Decatur Plant: T. H. Gehrig (two awards), Cecil Franklin and Josephine Ivetich.

DeKalb Plant: William H. Walsh and Jack Wise.

Specialty Transformer Div. 91: Doyle D. Miller, J. H. Plescher, Hovy L. Schrader, Robert A. Bunyan, George E. Barker and Glenn R. Kaylor.

Specialty Transformer Div. 94: Norman R. Voelker, John R. Darnall, Murray J. Sherman, Lester B. Redding, Paul B. Gressely, and Helen L. Eger.

Specialty Transformer Div. 95: Harold Niemeyer (two awards), Dorothy M. Luellen, Max W. Lydy, Catherine Parkins (two awards), Loretta G. Bloom, Ernest A. Kern, Anthony M. Luke and Nicholas E. Derloshon.

Motor and Generator: Lawrence E. Flickinger, Lloyd F. McClure, Alfred H. Woehnker, Ralph E. Jacobs, Leo P. Christle and Marvin A. VanSkyock.

Miscellaneous: Frank W. Hopper and William M. Lipp.

Gick Receives $145

Harold Gick, FHP Motor Div. 13, suggested changes in the method of finishing jet pump motors and earned $145 in a suggestion award for his idea. He is at the left showing a motor, finished according to his suggestion, to Edward Kimmel.

April Fool! Bet you thought I wouldn't write any news today. . . . Better get all your garden tools sharpened. Our farmers and would-be farmers will soon be having spade and spud troubles. Oh, my aching back. . . . Spring may be bursting out all over, but on the early bird shift, it's new faces. Hello to Irene Ely, Eliza Page, Velora Drury, John Doenges, Eliza Fowler, Fane Clingenpeel, Florence Lehman, Ada Gatlin, Gleniveer Grimm, Betty Kummer, Marcella Rodman, Mary Harper, Clara Thompson, Vernon Baker, Roy Houtz, Jr., Callie Broks, Ethel Carr, Ivah Grandstaff and Pauline Kirchner. . . . We say hello and goodbye in the same breath to Paul LeCoque. He was called back to Taylor St. Nice knowing you. . . . Returning to work are Madalyn Lake, Guy Johnson, Rose Hughes and Jenny Zimmerman. Rosa Collier has returned to first and Gertrude Martin and Mary Irven have gone on second. . . . Sorry to report that Pauline Stocks has taken a leave of absence. . . . If I have missed anyone, I'm sorry and a hello to you, too. . . . Anyone wishing the color of your kitchen changed every week, see John Anderson. That's his hobby. . . . If you see a pair of lowers floating down the St. Mary's river, they belong to Gertie. . . . Mary Wright came tripping in with a couple dozen eggs (raw) took a spill and so did the humpty-dumpties. We didn't even have a skillet or breakfast would have been served. . . . Happy birthday to Jeanette Breinfalk. . . . A new fad on the 534 line —Not new Easter togs, but new cushions for their chairs. They seem to think it will save them in the end. . . . Jerry Snyder cut her bair and I do mean cut. She can't get a permanent, it is so G.I.ish. . . . A few of Floetta Zartman's friends had a surprise birthday party for her last Sunday. . . . Corrine Martin (Bill's wife) celebrated with Floetta. We would like to see some of those pictures that were taken. . . . Jack Dennis has been chewing wedge cuttings in his tobacco. He would be very happy to know who is the culprit. . . . Our sincerest sympathy to Grace Jones in the death of her sister-in-law.

Plan to get your Voltmen ticket early.

Just get too important in your own way if you want to get in the way of others.

There's only one state that allows women to work 15 hours a day—the state of matrimony.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Spring is here and with it came a bouncing baby boy to Robert J. Bubb. Congratulations, Bob. . . . Adam L. Ragan celebrated his silver wedding anniversary last week. He brought in some of his anniversary cake to a select few. Congratulations, Adam, and many more happy anniversaries. Adam says when everyone else is done trying to catch the Beast of Busco, then he will catch it. . . . Luther McConnehey is now reading the funnies to Ruben Dewart. . . . It seems as thougb Paul Noffze has a part-time job as an insurance claims adjuster. Recently Paul estimated the loss of the big Avilla fire, but comparing his figures with the ones from a local newspaper we found tbat he was only $17,000 higher than the actual loss. . . . It is rumored that Ted Mullens laid off Tuesday in order to get a look at the Beast of Busco. . . . There must be some secret connected with the envelope that Floyd Null keeps locked up in his locker. We don't know what it is, but will take a guess and say that it has something to do with the daily noon time recreational session. . . . John Layman Sr., and Gerald Crum have teamed up and are practising the mystic art of magic. It is not an uncommon sight to see either one of these boys pull some unforeseen object from an empty container. At present it looks like Crum might be taking his magic a little more seriously than his partner because we observed that he was successful in pulling a new car out of the bag for himself last week. . . . Someone in the division has tagged Paul Noffze as having an original quotation and one that he uses quite frequently is "I'm only human." . . . Now that spring is here Fred Thieme will be taking orders for fresh fish again. . . . Bob Bunyan and Fred Wellensiek seem to have a lot in common in the fact that both like to run "clamp jobs." . . . Our division wishes to extend our heartiest welcome to a past supervisor who in recent years has attained an unknown number of friends in the division. We speak of Fred Banks who has returned as our superintendent. . . . We would all like to extend our best wishes to Caryl Tuttle upon his retirement. Good luck, Tut.

Be on your guard as this is the day when the foolish who think they are wise are out to trick you. . . . That sure was a "smelly" trick that was pulled up here last last week. We never did like limburger. . . . They tell me that Edna Hergernrader and Ann Hershberger enjoy working so much more now and I say "Why not?" . . . Some people are lucky like Ruth Tutwiler and get all the bargains. I think they see me coming and boost all the prices. . . . Your reporter sure isn't on the ball when one of the girls is an attendant at a wedding and we don't know about it. How about a little more cooperation? I bet Ruth Reed made a pretty attendant. . . . We are wondering what has become of Merl Keeslers' Pyramid Club. We are all waiting to help him spend his winnings! . . . That girl with the many talents, Clarice Woodruff, is at it again. First it was knitting mittens, then socks, then sewing. Now cream puffs! They seem more interesting than any of her other talents. How about a sample? . . . Esther Fagan is going to take up dressmaking. She likes the new necklines this season. . . . Florence Reckeweg and Eleanor Whitehouse are our big time bowlers. They are always comparing scores. Who is ahead now, girls? . . . Happy birthday to Ann Hershberger.

Motor and Generator Static

THOUGHT FOR THE WEEK

"Our thought is the key which unlocks the doors of the world. There is something in us which corresponds to that which is around us, beneath us, and above us."

Alhert Spencer, Bldg. 31-1, tells us that the Mystery Melody is "Saint Paul's Steeple.". (?) . . The man who rows a hoat generally doesn't have time to rock it. . . . Iona Goodin, formerly Iona Dawson, became the proud mamma of a baby girl Monday, March 28, 11 a.m., at the St. Joseph hospital. Mother and baby are doing fine. Aunt Donahelle is expected to recover. . . . Ye Olde Editor just received a card from Art Voelker. Here is Art's new address:

Rect. A. L. Voelker, U.S. 52005797
Co. B, 8908 Class No. 109
TSOTAG
Camp Lee, Virginia

How True: If you're a man of few words, you won't have to take so many of them back. . . . Overheard at the dinner tahle: Marion Bailey, "I hope next Saturday is as nice as today; I know where I'll he." Friend, "Going fishing?" M.B. "Gosh, no, golfing." F. "Oh, hit it and go find, huh?" M.B. "When I hit it I don't have to look for it; I know where it is." . . When is a cat a rat? Jim Mitchell has a cat he feels would qualify for either title. Sez Jim, "I kept this cat to protect the Emporium from rodents, but she turned out to he a rat." James purchased a large angel food cake for a customer and Tabhy, discovering this bit of pastry, decided it would make a nice place to nap. So Tabby nested down for a sleep and on awakening decided she needed food, so ate part of the cake. This developed her appetite so going over to the doughnut box she pulled several out and took a few bites out of each. By this time Tabby decided she needed another rest, so climbed up to the shelf where cereal was displayed. Feeling this space was too crowded, kitty kicked boxes off the shelf until she felt there was plenty of room, then stretched out to nap. Last week Jim announced he intended to discover the "Monster of Blue Lake." This writer feels that James has made that discovery . . . Roscoe Markley, our big ham and egg man, had a narrow escape. He crawled into the pig house to check on his stock and frightened the pigs who started squealing. A mother hog hearing their cries rushed at Roscoe who escaped hy pushing his head through the roof and enlarging this hole crawled to safety. There are times when it pays to have a good solid head on your shoulders . . . Boh Kite, our cowboy, intends to give lessons on riding and bronco husting at Buck Lake Ranch. Anyone desiring lessons contact, "Two Gun Kite" who for a nominal fee will teach them all the tricks . . . Ed Homan is a fast thinker, far faster than Ed Foley is, under certain conditions. A few weeks ago we told of Ed Foley's rip in his trousers, his trip home to change clothes and his hopes that no one would discover the truth. Ed Homan had a similar accident but thinking fast, he procured some masking tape and made temporary repairs, also hoping no one would find out the truth . . . Dick Hobson didn't forget the little woman's hirthday. He hought flowers hut sent them a day early. When he discovered his mistake he purchased a large hirthday cake. "This will he a surprise," he remarked.

RAMBLINGS 31-2

APRIL is here. Now is the time to plant grass seed, to spade the garden, to paint those screens, to polish the golf cluhs, to start spring cleaning, to clean out the closets and hring those too short, too tight, or too faded things in for the Elex rummage sale next week. . . . We hope the return of spring will hring Chick Waltemath back to the office. Chick has been ill for sometime. He is still improving though and we want to see him soon at Bldg. 31-2. Say, fellows, how about stopping in to see Chick sometime; vistors are welcome. . . . Speaking of spring, "Marv" Baker was not trying to be stylish by wearing mitts on his hands. He was doing a little painting and got some on his hands. Marv washed his hands in turpentine and soon discovered he was allergic to something. Either the paint or turpentine caused his hands to turn very red. . . . Paul Gratny has taken a position in our Commercial Section, working for Mr. Kissell. . . . Howard Naslund is sad. All his friends, who helped him with his work on the house, are leaving town. . . . The windows of Bldg. 31 will he washed today. —Loof lirpa!

Your Roving Reporter

Ouch!

THAT HURTS LIKE—LIKE BEING SHOT FROM AN AIR RIFLE! Of course it does, and it has, in many instances, as great a penetrating power when given a suitahle firing chamber with a propelling charge of compressed air from one of our TOO MANY factory air line outlets throughout the Works.The firing chamber would be a tapped or drilled hole, a corner or slot in the machine, work bench, etc., or any similar place where the air can he trapped and then "bounce" back out at you or your neighbor. Or it may he the direct blast from the ⅛" air gun nozzle which propels the particle of metal, emery, dust, etc., against you. Particles thus propelled HAVE CAUSED BLINDNESS OR PARTIAL BLINDNESS TO FORT WAYNE WORKS EMPLOYEES.

Why did we select Art Thieme, Foreman, and Safety Leader, General Tool division, and the Safety Committeemen in this division to help us with this article? Because this division helped us "start off" our current program of REDUCING THE NUMBER OF AIR GUN INSTALLATIONS AND INCREASING THE SAFETY IN THE USE OF THOSE REMAINING.

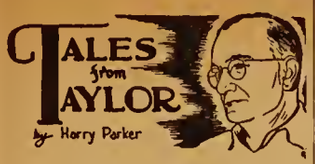
HERSCHEL L. SMITH
Safety Engineer

The Puhlicity Department of General Electric has just issued a hooklet "Electrical Developments of 1948." It is thrilling to read of achievements made during the year and it should be a matter of satisfaction to every employee to know that he had a part in making this record possihle. I am sorry to turn poetic on you two weeks in succession but the following seems to fit in so well. So, with my apologies to an unknown author—

YOUR JOB

Wherever you are working—in office or shop,
And however far you may be from the top
And though you may think you are treading the mill,
Don't ever belittle the job that you fill;
For however little your job may appear
You're just as important as some little gear
That meshes with others in some big machine,
That helps keep it going—though never is seen.
They could do without you, we'll have to admit,
But business keeps on, when the big fellows quit!
And always remember, my lad, if you can,
The job's more important (oh, yes) than the man!
So if it's your hope to stay off the sheif,
Think more of your job than you do yourself.
Your job is important—don't think that it is not
So try hard to give it the best that you've got!
And don't think ever that you are of little account.
If they didn't need you, you wouldn't be there.
So, aiways, my lad, keep your chin in the air.
A digger of ditches, mechanic or clerk,
Think well of your company, yourself and your work.

In these days of uncertainties and unrest the world over, this advice is timely and should behoove us one and all to—maybe read it again—and apply it to ourselves. . . . Claire Theisman, Bldg. 18-3, celebrated her birthday last week with ice cream, cake 'n things. . . . Doris Rhonemus, Bldg. 18-3, and her husband were "caught" looking over the open house on Maple Grove recently. Could it be they are planning to move in from Leo? . . . A. S. Johnson, Bldg. 18-1, has been the center of discussion with regard to the Kentucky haskethall team standing. Needless to say, being a "Southern Kernal" he was right proud of his home state. . . . Ed Trabel, Jr., Bldg. 18-B, messenger, has difficulty keeping his balance. The floor comes right up to meet him every now and then—Happy Landings! . . . Wanted a "walkie-talkie, alarm clock" for Marion Champion, Bldg. 18-B. She likes to sleep on the hus going home, hut she should have the alarm or she may have a long ride to the end of the line. . . . Ruth Ann Ryan and Donna Walters, Bldg. 18-B, have a good running howling record at the G-E Cluh alleys at noon each day. . . . Thanks, Hazel O'Brien, Bldg. 18-B. She proved beyond any douht in my mind that she really can hake good cakes! . . . Betty Carper, Works Service Payroll, and Vickie Bickis, Accounting, are leaving today. We understand Vickie will "center aisle" to a well known tune early in June. We are sorry to say goodbye hut wish you both all the success and happiness in the world. . . . It would seem that the farewell party for W. Blomenherg held Friday night at the Squares hall must have been quite an affair. He is leaving G-E to explore the great state of California. Our very best wishes to you in your husiness adventure in the sunny state. . . . Mrs. Lawver, mother of Jeanne Grant, Bldg. 18-4, who has heen quite ill is now improving nicely. . . . Ronnie, son of Ray White, Bldg. 18-4, was the youngest contestant from Fort Wayne in the Public Schools Musical Contest. He is in the sixth grade and plays a baritone. As only junior high and high schools were represented, Ray is very proud that Ronnie was selected. . . . The March wind blew until it finally took over Bldg. 18-4. It captured papers from the Data Bureau. Al Tharpe raced downstairs and upstairs but the papers were always two paces ahead of him. . . . Spring is definitely in the air—as evidenced hy the heautiful crocus in hloom. With the heauty comes the dreaded spring housecleaning for the ladies and for the men, the joyful thoughts of golf are overshadowed by the gentle hints of the painting, etc.



Medical Memos

By Mary Heymann

Some kind person suggested the title for our column, and if the contributor will walk, not run, to the nearest dispensary, we will he glad to award the prize. . . . Signs of spring are noticed everywhere. In practically all of the dispensaries new uniforms, furnished by the Company, have heen blossoming right and left! Some are very attractive and hecoming and we do appreciate them. . . . Mabel Wilson and Mae Mulvane have been enjoying being out in their yards these nice spring-like days. 'Tis good to breathe in that fresh Ossian air. . . . We regret to say that Thelma Harrison, second shift nurse at Taylor Street is leaving. She was presented a gift by her fellow-workers. We shall miss you, Thelma, and come in to see us soon and often. Alta Bishop has been assigned her duties on second shift at Taylor Street. . . . Sunday, March 27, is to he the day for the long-awaited bowling match to be held at Waynedale. Our bowlers, Berneta Welbaum and Mary Heymann, and the girls from Bldg. 17-3, are getting in practice so they will be competition for the men's team. The girls' team has quite a name; why not ask them about it some time? . . . Alta Bishop attended the state nurses meeting in Indianapolis, March 24-26. She is one of the candidates for chairman on the industrial section hallot. Lyle Rupert and Veda Orff attended the meetings Saturday. . . . We think a good old fashioned hoe-down would he fitting for the new floors just completed in Bldg. 21. How ahout "Birdie in the Cage?" . . . We would suggest cart attendants for the new Rogers Market. The purpose of this suggestion is to eliminate the "nipping" of other folks' carts, just in case the food looked better in the other guy's cart, and also the emharrassment of having to give it hack with the enumerating of groceries and meats. Of course, might result in heing short a pound of hutter—Could be, Berneta?

For Worriers Only

Worry is like a rocking chair. It will give you something to do, but it won't get you anywhere.

Otto "Whitey" Nahrwold is a great believer in the game of chance. Anyone who comes forth with a get-rich-quick scheme has Whitey for a follower. A week ago he invested $2 in one of these so-called bonanzas with the assurance of a quick return of about $4,000. He told the boys that he could just picture himself basking in the Florida sun watching the swaying palm trees, but something happened that shook his confidence and he asked for his $2 back. Now all he can do is look at pictures of the palm trees. . . . About a year ago Ray Quandt was busy talking about his plans to construct a garden tractor. Nothing ever came of it, so now he has dragged it out of the mothballs with bigger and better plans for it this year. He is trying to obtain a low priced motor to install in it and wonders if a Whizzer motor bike engine would do the job. . . . When it comes to daily work attire, Jean Reynolds is a devout devotee of shirt waists and dungarees. The other day someone in the cafeteria ventured a wager that she never wore a dress. So now it is up to you, Jean, to settle this by appearing upon the scene attired in an all-feminine costume. . . . A few weeks ago Gaylord Evans was in a playlet at one of our local churches, and in this he was required to dress in feminine attire. He was so well pleased about the whole thing that he had pictures taken of himself in this get-up. He is now thinking seriously of taking up ballet dancing. . . . Paul Wilcoxson was observed the other day talking, laughing and gesticulating to the bearing press. Some of the boys thought that he had gone off the beam and asked for an explanation. He told them that it was a lot more fun to do this as the press was good company and never gave you an argument. . . . Joe Turley is very proud of the fact that he is soon to become a grandfather and eternally reminds the boys of it. He was telling us that it would happen the week just past, but so far neither grandson or granddaughter have put in an appearance. All of us are just as anxious for the arrival as Joe is; for this reason, we will not have to listen to him talk about it any longer.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Scoop! It has been reported that an announcement was made via the public address system at a certain Calhoun St. night spot March 19, that Frankie Enderle and his lovely companion were soon to be merged in marital bliss. Our congratulations, Frankie, we thought you'd never make it. . . . Can anyone verify the report that Russell Neireiter does the dishes and the laundry at his home? I wonder how he is on ironing white shirts. Rastenberg states that Russ even "Luxes" his dainties. . . . Frank Elder entered the hospital last week for some necessary repair and overhaul work. Good luck and be back soon, lad. . . . Here's our guess on the mystery melody. It's "Canterbury Bells." . . . We are sorry to hear that Florence Weimer's condition is not so good, she has entered the Methodist Hospital. . . . Also sorry to hear of the auto accident of Rosemary Daugherity's husband. . . . Mary Secrist had some bad luck this week, getting a sprained ankle when she stepped off the bus. . . . Welcome to Bldg. 19-2 Emelie Droege and Frank Matthews. . . . Ray Horstman just returned from a two weeks' naval cruise at Great Lake, Ill. . . . Lee Anderson has that worried look; seems that middle age spread is under way. . . . We're glad to have Wally Snyder back after a month's illness. . . . Sometimes we think Nort Stoller has been a policeman. He continually goes around and about putting stickers of all sorts on the boys who happen to be showing him the back of their neck. Don August finally got in the mood, and slapped a sticker on Norm's protruding pate. Now Don has proof that a sticker won't stick when there is nothing to stick to. . . . Wayne and Irene Nichols are the proud possessors of a pretty green Plymouth.

Top Floor Topics

DIVISION 95

By Walter E. Pohler

Last week we mentioned that several of our young ladies were roller skating enthusiasts. The plot thickens. Three of these ladies were skating together. It is believed they were trying to attract the attention of the opposite sex and were doing some fancy dado's, when lo and behold there was a big spill. The next day Maxine George had her knees painted red. She stated it was a new fad for lipstick. Joan Detweiller and Doris Connett were also moving around in a cautious manner. . . . Our genial friend Al Miller was off sick several days recently. He reported, on his return to work, that an attempt had been made to pull the Churubusco turtle out of the lake with a Model T Ford. The Model T stalled and the turtle pulled it into the lake. Were you really sick, Al? . . . With the advent of spring it is expected that some people will blossom out with new clothes. We suggest that Maurie Mastin make sure he has all of the tags removed from the clothes he buys before he wears them. . . . Our advice to either pay the rent or be thrown out was not heeded. Our office is practically bare. Some folks still-think it is cheaper to move than pay rent. . . . Irene Shively put her hand into a can the other night and then had to have help in removing it. What was in the can, Irene? . . . Claire Weisel, who lives near the Gale Harris' turtle farm, has been absent several days. Is the hot dog business good, Claire? . . . Alta Franklin has been receiving telephone calls from a gentleman whose name is reported to be Barefoot Willie. . . . Some of the people on second shift expected to leave recently. A potluck was planned in their honor. When plans were changed, and the people didn't leave, the potluck was cancelled. This caused our genial friend Wimpy to have a face a mile long. In view of this fact the potluck was held as scheduled. That man loves to eat. . . . Gertrude Haflick has had her head in the clouds and all the buttons were popping off her clothes. The reason—a new granddaughter. Congratulations, Gertrude, we know that grandchildren are always more important than one's own children. If you doubt this statement just observe some of our other grandparents. A good example is Buss Groves. . . . We need a little help from the people in the stacking section. Francis Gnau has a good story about Bert Bruber which should be published. But he can't pass it onto us because Bert has him blackmailed. Will someone please help us to get this story? . . . By next week we hope to be able to include in our column the names of the assistant editors for the first shift. . . . Anyone desiring information about joining a pyramid club are referred to either Jack Lee or Bill Mills.

Plan to get your Voltmen ticket early.

600 Attend Family Night

Nearly 600 spectators saw the volleyball and basketball games last Saturday at the G-E Club's Family Night. The sports event featured a volleyball game between the Fort Wayne YMCA and the G-E All-Stars, a novelty basketball game between the Taylorettes and Motorettes, and the Old Timers' basketball game.

Your reporter's life has been threatened if the following article is printed, but the story seemed too interesting not to be published, so we are giving it to you in spite of the danger involved. It seems that Mr. and Mrs. Ed Glusenkamp are very fond of the two cats they own, especially Mrs. G. To make things convenient for them she props the outside door open so they can have free access in and out of the house these mild spring days. One day last week while she was talking on the telephone she heard a series of unfamiliar growls and on looking around discovered not two but three cats, a stranger was in their midst, and all were making quite a fuss. Abruptly closing the conversation Mrs. G., armed with a broom, started after the intruder. Up the curtains, over chairs and tables went the animals goaded by her broom, and when the smoke had cleared after the stray was finally evicted, the house was a mess. Shortly after, when Ed arrived home, he found his spouse in a very bad mood which wasn't improved a bit by some of his side remarks. The next evening the atmosphere was still a bit chilly in their household when the telephone rang. Mrs. G. started to answer when Ed happened to think it might be "Dinner winner" calling, so he said answer "Fish." Taking the receiver down she said "Fish" only to find a very surprised party at the other end of the line who had never even heard of that program. This embarrassment served only to complicate conditions of the night before which didn't help things, so after a few futile attempts at making peace Ed, realizing that discretion is the better part of valor, put on his hat and coat and went to visit the sick. Might be a good thing for him to build a dog-house but no doubt if he did the cats would usurp even that. . . . Kenny Guisinger spent Saturday and Sunday overhauling the old car in hopes it will run just like a new one. . . . Joe Trentadue is inviting all his friends to come to the Methodist Church in Monroeville on Sunday, April 10, to hear a musical program in which he will participate. It's FREE too. . . . Mary Rupp says that lard can transaction in the parking lot wasn't anything compared to the time she mislaid her car keys. She called her landlady to bring a key only to be told she had mislaid hers too, then she called a locksmith. In the meantime the landlady found her key and arrived at the lot just ahead of the locksmith. His trip cost her $2 which didn't even include the key. She does have an extra one now though—got it from Santa Claus. . . . Roy Bracht is about the only fellow in Tool Maintenance that isn't an ardent fisherman. The boys are wondering if he will get some pointers from his son Neil whose picture appeared in last week's WORKS NEWS. The group also include pictures of Karen Sonday and Monty Lepper whose fathers are employed in this division.

The age of wonders is certainly with us. We refer to the now overly-popular "Beast of Busco" and the "Creighton Ave. Creeper." The latter, it seems, is the discovery of Gloria Wiebke, who claims she found a night crawler which looks like an oversize baloney and weighs over four and a half pounds. This mighty wiggler makes its abode in Gloria's backyard. Discovery of the nasty worm was made when she found large holes chewed in her basement walls. As in the case of the first beast, this one is also to be commercialized. The owner is looking for a sausage cutter with which she intends to make live bait. . . . The scene shifts to a booth at a local music store, where we find our Fire Chief, Ernie Hanauer and Mr. Glidden busily engaged in selecting some choice "classical" recordings. Was it just his imagination, or did Ernie actually smell smoke? Sure 'nuff, the smoke began to roll and the Chief immediately went into action, grabbed Glidden's hat off the light bulb where it had been hanging, and doused the fire. No damage, outside of a slightly air-conditioned hat and two red faces. . . . Sure signs of Spring: Johnny Bell sporting his annual hair cut. Good to see your face once again, Johnny. Charlie MacKay tripping the light fantastic out in the hall one fine morning. Bill Schible on the alert for lawn seed —and not the sawdust he got stuck with last year at this time. . . . Our best wishes to Juanita Morningstar in the Telephone Room. Juanita was married last Saturday. . . . Good luck Art Davis, who leaves today. . . . We hope Larry Woodward will soon be leaving the hospital and fully recovered from the heart attack he suffered at work recently. . . . Even with his new glasses, Sam "Porky" Mastro, after reading the paper two hours, didn't discover it was at least six months old. His usual smiling face turned a bit sour when so informed. . . . Otto Borkenstein is on a special diet—one good tooth with his noon lunch. Isn't that a little rough on your plate, Otto? . . . Everything just went black for John Hall the other night when he went to go home and couldn't get his car started. Seems like John had sealed beam lights installed on that super deluxe Dodge and so many gadgets must have confused him. Anyway instead of using the starter he kept riding the dimmer switch and couldn't understand why it wouldn't start. After considerable time and much mumbling, he called a garage man over to see what was amiss. John crawled in the car to demonstrate and tries more of the same. He was soon straightened out and told which was which. How about one of those nice fluid-drive jobs, Johnny? . . . Birthday greetings to Henrietta Walburn and Wally Howard. . . . Dallas "Little Joe" Broxon had the start of a beautiful mustache. When the rest of the fellows noticed, it lasted just a little over a week. Wonder how long Walt Chaney's will last. . . . Wonder what makes the girls scream when George Hughes walks down the aisle. . . . Seems Merle Morkoetter decided to teach Harold Smith the finer points of playing euchre. As the game progressed and the evening wore on it became quite evident that Mr. Smith didn't need lessons. Anyone wishing to teach euchre please contact Mr. Morkoetter. . . . Could the big smile on Bob Pion's face be because of that '49 Plymouth?

Today is April Fool's day, but we are not fooling when we remind you that Lent is half over. If you haven't started yours yet why not start right now? Go to services, go early and get the choice seats. . . . The following should have made the NEWS several weeks ago. We knew, but just failed to do our job and follow through. Mr. and Mrs. John Hine are the proud parents of their first child, a son. God saw fit, Johnny and Evelyn, to give you a child because He knew the same as all of us know that you will be among the finest parents. The best of everything to you from all of us. Mrs. Hine was the former Evelyn Hewes of our wire production office. . . . Jane Kay is the name of the new eight pound four ounce granddaughter of Betty Pickett and is Betty ever proud. We know how you feel, Betty. . . . Lois Connett is raising "Jews" now. We mean the wandering kind. Sure makes that old office look more like home. Thanks for your interest. . . . Mr. and Mrs. Truman Buckles are planning a new home in Indian Village. But "Sewer, sewer, who's got the sewer." Truman has had all the city brass and brains out on his lot to look for it. But to date still no sewer. Call in the detectives, we say, maybe the Indians have it. . . . It's usually a new suit for Easter, but not for Steve Bobay until his old nag gets a new pair of shoes (so says Steve). Seems to us that's just a lot of waste of time and money; just to get that old nag over to a soap or glue factory. . . . Vaughn Sheets, Buck Buckles and Pappy Rasor all wonder why they pay as much for a hair cut as everyone else. We got the answer, gents, you have to pay for the time it takes to find your hair. Sounds reasonable, doesn't it? . . . Nolan Riley had nose troubles. He had to go to "Busco" to see Oscar. Nosey Nolan caught a cold while nosing around. Now he's really got nose troubles. Serves you right, Nosey.

Insulation News

Happy birthday to Josephine Balsamo March 21. Jo treated the gang to candy, ice cream and chocolate cake with pecan fudge icing. Unfortunately, Jo placed the food just a little too close to Bill Glenn. Consequently, the rest of us had to really get there early before Bill took over. Better run fast, Bill, those calories are bound to catch up with you. . . . The way Bill Hattendorf is limping lately, we figure he must have bumped his leg on the side of a boat. . . . Anybody in the mood for a good wager? See Marie Gehle. Marie is willing to bet anybody that since the snow's stopped snowin, and the breeze has quit blowin', that the windows in Bldg. 12-B will stay sealed fast. Guess the fresh air fiends hibernate in the spring, Marie. . . . We all send our best wishes for a speedy recovery to Grace Bedsworth. . . . We knew that one of these days Joe Kramer's desk would speak up. We received this poem from it for Joe the other day.

"Once I was a brand new desk
And worth my weight in gold,
Time it's true has marred my looks
But it's Joe who has made me old.

"If you'll dust in all the corners,
Why you're just bound to see,
That underneath this ugly top
I'm still the same old me."

Remember, Joe, that desk may be somebody's pine tree.

Oot keew siht·Eniper Trebor ot yadhtrib yppah. . . . Yar, ti tuoba woh? Smaet eugael eht fo eno yb gnicnuort doog a nevig saw maet gnilwob Swehttam Yar. . . . APRIL FOOL. . . . George Houck and Cris Delagrange have been so proud of their jobs lately that they have been taking them home to show their wives what good work they do. . . . Fred Vietmeyer has been doing a lot of looking at the new Dodge. Be careful, Fred, that new car bug will bite you if you don't watch out. . . . Ray Bowers has been exposed as a Dr. Jekyl and Mr. Hyde, or how could he be at work and also parked downtown at the same time. Anyway he was given his choice of appearing in court to defend his innocence or pay a 50 cents traffic ticket. Although being innocent, he decided it would be much cheaper to pay the 50 cents than lose the time necessary to prove his innocence. . . . Ward Staley is anxiously awaiting the arrival of those baby chicks and ducklings from those eggs he has under the light bulb. . . . Last Friday morning Jess Batchelder came to work looking more tired than usual, and when panned about his looks he told this one: "I had to pick my wife up after a party. Upon arrival at the place I was to get her, the lights were burning brightly so I decided to take a nap until the party was over. At 2:30 a.m. my wife woke me up and told me she had returned home with some friends and had been looking for me since that time." . . . One thing we would liked to have seen was Ray Matthews hanging on that arbor press handle in Bldg. 17-4. . . . The "Old-Timers Night" Friday at the G-E Club was really an old-timers night. Those of you who missed those games would have recalled a lot of pleasant memories seeing those veterans of the interdivision leagues. Many of them played their games at Library hall before the club was built. . . . I have also been told that Ray Matthews' bowling team was given a good trouncing by one of the Junior League's teams. How about it, Ray? . . . Happy birtbday to Bob Rapine this week, too.

Plan to get your Voltmen ticket early.

FLOOR LORE FROM 4-4

By Voyce Brumbaugh

What has happened, folks, not very much news this week, but a little is better than none, I guess. . . . Congratulations to Wendal Hoflich who is the proud father of a baby girl. Even though it is the first one, he still has all the buttons on his vest. . . . Bernie Kelher, formerly of this section, has opened a grocery store at Main and Fulton St. I'm sure he would welcome your patronage if you are ever out that way. . . . If Byron Neuman pays off a bet, where in the world will Miller put his "buck" sheep? . . . We had two birthdays last week, Ruth Lange and Betty Skevington. Ruth served some very good individual cakes, while Miss Skevington outdid herself by having a delicious chicken dinner. . . . Suggestion for Ionena Foster: The next time you want to give Carl Reeves the newspaper during lunch period, it might be better to hand it to him instead of throwing it. That way you won't knock his coffee cup over and spill it on his desk and trousers.

We have a new employee you should meet. We mean Joe Schmoe. If you haven't met him yet, see Larry Reed for Joe Schmoe is his new name. You see he wanted to meet the new man too so "Emmie" Stock just stopped him in front of a mirror. Neat, huh? . . . Our sick list this week includes Sol Andorfer and Floyd Shellenbarger along with Bill Decker. Our best wishes for a speedy recovery and we're hoping these spring days will help a lot. . . . We extend to Blanche Allen our deepest sympathy in the death of her father. . . . This is the story of a motor, an exceptional motor which surprised Ed Klomp. It seems a motor came back from inspection with so many reasons for failure, poor Ed was about ready for the man with the net. After some stewing, Ed learned it was intentional and all the boys were having a good laugh. When this gag dawned on Ed, his smile just grew and grew and grew. . . . Marian Leiter read a closing notice which went "Tester Scrapped." Now this intrigued her, especially when the dictionary said a "tester" was "an earthen pot or an ancient coin worth 12 cents." Some description of our testers! . . . Clarence Nussel got a new member for Sky King's Airplane Club. It seems that after Nussel proudly displayed his new Sky King ring, Dale Hobson sent in his box top and only 15 cents and anxiously awaited his. It came last week and proud Dale brought it in for all to see. It has a ball pen and a magnifying glass all built right in the ring. Lucky sonny boys, Nussel and Hobson. . . . Clara Metcalf tells us she's been married 29 years and all of them to one man! Congratulations and we think you deserve a medal. Try for 50, Clara, sounds wonderful! . . . Edith Childer's favorite song is, "All I Want For Easter Is My Two Front Teeth." After being informed it should be Christmas, she says she doesn't care to wait that long! . . . Cora J. Conrad received a sympathy card 'tother day. After knowing they celebrated their first wedding anniversary, thought the card fitting for the occasion. We imagine it was sent for "Poor Arnie's" benefit. We really do wish you both many more years of wedded bliss.

Pome of the Weak

Spring is here to stay,
You can always tell they say,
By someone's smiling face,
The face belongs to Esther Hakes,
The smile is caused by a flame,
The flame's name is Wayne,
He really keeps her on the run,
After acquiring the Plymouth '41.

By "Anymouse"

Sometime ago we told about the Ford Mouse Exterminator Co. He has taken in a partner who is none other than George (double "N") Fann. They don't guarantee their work!

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, April 4, 1949

LOST AND FOUND

LOST—Two separate keys.

LOST—Ronson cigarette lighter, leather bound. Lost between Bldgs. 19-5 and 20-1.

LOST—Three keys on a chain, two door keys and one medical key.

FOUND—One earring with brilliant sets. Found back of Bldg. 18.

FOUND—Pair white mittens. Found in cafeteria, Bldg. 16.

FOUND—One gold colored button.

FOUND—Pair of glasses in a blue case. Found in Jones St. parking lot.

FOR SALE

ELECTRIC RAZOR—Remington Threesome. H-8995.

SHOWER STALL—Complete, $20; gas stove, side oven, $25, good condition. H-65522.

DOUBLE COIL BED SPRINGS—Good condition, reasonable. H-8025.

SINGLE SIZE METAL BED—Complete; small vanity, reasonable. A-75442.

GIRLS' SUITS, DRESSES—Red Coat, A-1 condition, size 12-14, reasonable. H-35932.

1936 FORD V-8—Fair condition; house-trailer, good condition; both $750. H-28621.

1946 FORD—Four-door, deluxe, $1,000. 1832 W. Fourth St.

ELEX RUMMAGE SALE — 308 W. Brackenridge, Friday and Saturday, April 8 and 9.

WANTED

UNFURNISHED APARTMENT — Three rooms, private bath. A-85855 between 10 a.m. and 1 p.m.

8MM MOVIE OUTFIT—H-50672.

FOR RENT

CEMENT MIXER—Three cu. ft., electric motor powered. H-76004.

PERSONAL

THANK YOU—To everyone for being so thoughtful during my shut-in days. Irene Meyers.

MISCELLANEOUS

HELIUM FOR BALLOONS—Any school or church carnival committee wishing to share a bottle of helium during April or May, call H-81327.

TRANSPORTATION

WANTS RIDE—May Sucher, from Kendallville to Taylor St. Works for Lowell Arnold, from 6:48-3:18. Extension, Taylor St. 375.

WANTS RIDE—Ralph E. Jacobs, from Liberty Center, Ind., or within a five mile area. Works from 8-5:15 in Bldg. 31-1. Extension 565.

WANTS RIDE—Mary Irven, from 4 mi. north on 427, Leo rd. Works for Frank Shidler, Bldg. 17-3, 3:30-11:43. Ext. 372.

Welcome to Decatur, Al Reynolds, the new test engineer. . . . Duane Fry, our test engineer, is going to take the fatal step to the altar soon we hear. We wish you much happiness, Duane. . . . The subject that is most talked about at the present among the girls is, "What are you buying for Easter this year?" By what we hear there are going to be some mighty pretty outfits Easter morning. . . . The GeCode Club girls are having their Easter party April 5 at the Zion Lutheran Church. The day girls' party is to start at 6 p.m. and the night girls' at 12:00 noon. Keep that date in mind, girls. Day girls, take note in change of time of party from 6:30 p.m. to 6 p.m. And don't forget the Chicago trip scheduled for April 2 and 3. . . . Spring is really here when you look at the yellow and purple crocus that are blooming beside the office door. The person who planted those lovely flowers is Ray Johnston. . . . The church choir that Dave Embler directs is presenting the Lenten oratorio "The Crucifixion" Palm Sunday. Mary Ann Laurent read about this in the paper and the next day she asked Dave what this Ontario was they were going to sing. Mary Ann changed different colors when she found she had read "Oratorio" wrong. . . . Yours truly was very proud of the eleven strikes he had the other week in bowling. If it wouldn't have been for the spare he had in the sixth frame he would have had a 300. Of course the 279 he ended up with wasn't hard to take. . . . Have you noticed the big smile Doyle Steele has lately. The reason, no doubt, is that his wife presented him with a baby girl recently. She has been named Phyllis Ann. . . . Flash, Bill Beard, the master operator on the far end of heat run, hopes for another Dollar Day, so he can refill his gas tank. They tell us he found a real buy, seven gallons for $1. . . . Happy birthday to Rosemary Miller, Irene Schafer, Mickey Dougal, Josephine Ivetich, and Leona Fruechte. We probably missed a few others unintentionally. . . . Our retired employee, John Knott has spent a little time in the hospital recently. A speedy recovery to John from his fellow employees. . . . Emma Goldner motored to Detroit recently to visit with her brother and children. Her new Ford performed well, according to her speed demon record reports. . . . Orilla Parr of the KH Line is taking a short period off for a much needed rest. . . . Cupid is going to be busy this Saturday when Rita Smitley will wed her fiance from Huntington, also when Alma Kiefer will take the sacred vows. . . . Dagwood Bumstead has a competitor in the local G-E. Mr. Bogner, Tool Room Section is the No. 2 comedian when it comes to that last minute take-off. . . . The new 1949 chassis are far more perfect, according to Milton Brown's recent report from an Indianapolis trip. He stated there is even less play in the framework than the '48 model. . . . Another patient has returned to work after being ill for some time. We hope you are in A-1 condition now, Doris Shaffer. . . . Anyone needing a good recipe on how to corral a crying baby around midnight see Eloise Noll for full instructions. . . . The Jack Gray family had an addition to their family this month. Do you think Junior will make a good plumber like his father or do you think he has symptoms of a banker? . . . Helen Liniger Drake has presented her husband with a son. Mr. Drake is an employee of the G-E. . . . Have you heard the latest? Duke Keller has taken steps to make himself an unavailable lad. Recently, Duke gave a third finger, left hand, sparkler to Joan Brunton. Congratulations, Duke. . . . Saw Elmer Beer the other day and he seems to be getting along pretty good, and we will be glad when Elmer gets back. Cliff Hakey has an enviable record of which he is proud. In six and one-half years he has never lost a day's work nor been late for work.

Jim Pugh says that anyone leading a dull life should get a bulldog pup. The other morning, Jim put a cap on (which he hadn't worn a long time) and was ready to kiss his wife goodbye when his dog rushed up to him and almost took a bite of his leg. You see the dog didn't know him with this cap. Guess he thought there was a strange man in the house. The last Sunday Jim was at the lake he and his pup were having a little game of tag along the sea wall when Jim lost his balance and fell in the water. Short game, folks! . . . Don't mention "The Egg and I" to John Hensler. Seems Mrs. Hensler had sent two hard boiled eggs in John's lunch. When he cracked the first one, a form of a chicken appeared—an unusual one to say the least. It's being sent to Purdue to be analyzed, and we may have a story on this later. . . . Myron Auer is trying to reduce, but his friends aren't cooperating. He was ready to retire the other evening, when three of his buddies brought three and a half gallons of ice cream. The only polite thing to do was to eat a little (LITTLE?) . . . In the comic strip "The Nebbs" Willie Nebb's wife always says "My Willie can do anything." Chet Stoner is using the same expression about his new tractor. Boys, you're invited to his farm for a demonstration. . . . We are not sure but Mrs. Wiedleman must have been shrinking some garment when she did her washing last week 'cause Gus's apron sure is a lot shorter than usual. . . . It has such a delicate pink shade too. Getting ready for Easter, Gus? . . . One of the better square dancers in our division is Agnes Ditlinger. She has been seen quite frequently at the Hoagland Arena kicking up her heels in fine style. . . . The Easter Parade is around the corner and Jack Roesener has a hobby that brings up something dear to every kid's heart. Yep! Easter baskets of all colors. . . . Since when did Wilson Garman start backing up the Auburn Red Devils? We heard a telegram read at tournament time wishing Auburn good luck and it was signed Willie Garman. Willie's friends call him a plain old publicity hound. . . . We would like to inquire as to what grade coal Henry Frey is burning in his car. When Hank moves out from an intersection, it seems like the day turns into night. . . . Mr. and Mrs. Carl Ahlersmeyer celebrated their 25th wedding anniversary Saturday. Entertainment was furnished by Charlie Abbott's Swingsters. Some of the guests present were Mr. and Mrs. Ed Steward, Mr. and Mrs. Del Rehm and Mr. and Mrs. Walter Greiner. . . . The old fishing story you heard so often last summer was repeated last Saturday by Joe Mettler and Swede Moser, who as usual had to report no fish, and Art Dicke as usual had to report he couldn't get out again. . . . We noticed Ed Shafenacker's picture in a local newspaper, posing by the wreckage of two cars. One report has it that Ed was buying one of the wrecks for spare parts for his pick-up truck. . . . Jim Ehresman tells us the twins are packing a mighty wallop. He showed your reporter a bill for a new pair of specs.

In the Spotlight

AT YOUR G-E CLUB

By Bill Allen

The third in a series of family night programs for the entertainment of G-E families and friends was presented last Friday in the Club Gymnasium.

Labeled as "Old Timers" night this program was truly misnamed, as a title of "Squeaky Joints on Parade" or "Basketball Waltz" would have been more appropriate.

The highlight of the evening was a long basketball game of two four-minute halves featuring such "little known" women stars as Katie Dent, Becky Dunlap, Prunella Farrell, Penelope Burnau, was a laugh riot from beginning to end. Katie Dent handicapped by tons of padding was usually found parked in the north end of the gym floor—he couldn't move. Prunella Farrell of Bldg. 27, caught going through the line on an off tackle play in the 1st half was severely lectured by referee Junior Weber, only to return in the second half with a flying tackle that nearly dropped him through to the bowling alleys.

A good sized crowd of some 600 rabid fans roared as "big" Ife Holmes and "Pee Wee" Pres Slack with their Mutt and Jeff appearance showed signs of their former basketball powers with some deadly accurate passing. Bob "Fullback" Starkel not to be outdone by Adam "Workhorse" Farrell came through with several brilliant "line plunges" only to find that someone else had the ball.

Basketball was not alone in the G-E Club Spotlight Friday night, as an interesting Volleyball exhibition featured the G-E Club All-Stars and a team from the YMCA. Volleyball is another of many sports promoted by your G-E Club for General Electric employees. The Y team brought numerous bursts of applause from the crowd with their setups, "spikes" and all-around teamwork.

Inquiring Reporter

WHAT IS THE MOST UNUSUAL APRIL FOOL'S DAY PRANK YOU REMEMBER?

CARL H. SMITH

Taylor St.

"A co-worker came into work one day limping quite badly. We asked him what was wrong, so he just pulled his pant leg up and motioned for everyone to come and see. After he had quite a crowd there, he raised it a little higher and on his knee he had 'April Fool' painted."

BETTY FOREMAN

Bldg. 17-2

"I recall the April Fool's day when I was working in a candy factory dipping chocolates. The girl I was working with took little balls of snow, and dipped them to look like regular chocolates. Then we put them in a pretty candy box, and passed them to everyone who came in. It was really funny to see the amazed expressions on their faces when they bit into the chocolates, and the water ran down their chins."

EDMUND J. BAUER

Bldg. 20-1

"As a boy at home, I recall an occasion when we had pancakes. After considerable struggle trying to cut them, I discovered mother had inserted cardboard discs in the batter and then fried them as an April Fool joke."

GOLDIA LUTZ

Bldg. 31-1

"The most unusual April Fool's day prank I know is to have a delicious box of candy passed to you, only to find it filled with cotton."

ANNABELLE BARRICK

Taylor St.

"A few years ago one of the employees left his No. 13 boots in the coat locker. They were too tempting and were found by him at 5:15 p.m., glued to the floor."

Winter St., Firemen Clash Tonight In League Play-off

In the Interdivision basketball league, Winter St. first-half champs, and the Firemen, winners of the second-half, are battling for the season championship in a three-game play-off. The series is now even with each team winning a game. The deciding game will be played this evening at 7 o'clock in the G-E Club gym.

The Winter St. team is shown in the picture to the left. The members are (l. to r.), first row: Arnold Beneke, Jr., Donald Reitdorf, Dick Kent and Bib Shinbeckler. Standing (l. to r.) are Stuart Fisher, Wayne Reitdorf, Dick Gallmeyer, Leland Richardson, Harold Blauvelt, and Gayle Griffith, coach.

In the photograph at the right are the members of the Firemen squad. Kneeling (l. to r.) are Henry Vance, Bob Baals, Gene Etter and Paul Stemmler. Standing (l. to r.) are Art Lindenberg, coach; Joe Schible, George Lambroff, Merle Morkoetter, Jr., Ray Moodie, and Harold Somers.

SLEUTHING in 4-6

by JOAN POOS

Mary Smoak is really convinced that she lives in the country, not only because of the muddy road, but three crows may be seen parked having a "confab" in her back yard every morning. Mary, a "big city gal," called them black birds, but her husband informed her differently. . . . Harvey VonGunten has finally found a way to stay away from tobacco. He now has a four foot extension on his pipe. . . . Al Ulmer and Jim Capps' "Temptation Project" had its first birthday March 22. As of March 28 it had grown from a penny to two silver dollars. . . . If anyone has heard Helen Conrad scream, it was because she "spied" the alternative of the male sex—a mouse. She in turn scared a few other people. . . . The D.C. Section has an abundance of talent. Among other things they have three rattlebone experts, S. L. Moore, A. W. Wilson, and R. P. Loveland, who gave the section a demonstration. Contact "The Three Rattlers" for auditions. . . . Last Friday during the snack period (about 10:00 a.m.) Norm Oetting gave John Chipko an apple. John is not onc to forget a favor and during the noon hour he bought a bar of polishing rouge, which resembles a bar of fudge and presented it to Norm. One would have had to be present to have appreciated the outcome. Norm has been convinced that teeth polishing is a dentist's job. . . . Delayed, but none the less sincere, sympathy to Dan Geary because of the death of his father. . . . Irene Whelan must have been daydreaming about vacation time the other noon. She boarded a G-E Special (she thought) and found herself on the North Side. The basketball games are over, Irene! . . . Happy birthday to Delores Soule and to Don Porter. . . . Helen Brosche, formerly of the Bldg. 4-6 file room, is sporting an engagement ring—'tis said. More power to you, Helen, and best wishes. . . . Jane Winebrenner who will be married Saturday, was honored at a luncheon shower Wednesday noon. . . . Warning to all gamblers. Al Volz doesn't pay his bets. . . . A lot of fellows seem to be "Cruising Down the River" these days for one can always here someone whistling the tune, it seems. . . . Another indication of spring(?) Some of the engineers already are making preliminary plans for their annual outing in June. . . . Congratulations to Stan Tomkinson and C. F. Voss, who are the latest recipients of licenses as Professional Engineers. . . . Our best wishes to Tom Turner, who is transferring to the Works Laboratory next week. . . . Ned Hackney attended the regional conference meeting of the ASME on the 28th and 29th at the Van Orman Hotel as a representative of the Fort Wayne section. This is the first time the local section has been a host to a convention of this sort. . . . Ed Whipple attended the Company's bi-monthly meeting of the Gear Coordinating Committee at New York City on March 22 and 23. . . . Welcome back to Judy Clark, who had pneumonia. Sure it wasn't "spring fever," Judy? . . . Eric Hoppe is looking dapper these days in bow ties. The girls think you look "terrific" Eric! . . . Another talented member of the D.C. Section is Forrest Carlson. It seemed that "Forrey" has kept his talents as an actor secret until last Sunday night when he gave a command performance as Charles Laughton, which was really wonderful!

In Dev. there's a cute little blonde named Puff
Who always goes dashing around in a huff
As an editor she's great
And at bowling she's no stalemate.

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

We hear the girls in the sound room seem to be quite fond of their pet fish named "Eva". . . . Betty Boldt thought she had a unique hobby, but then decided it didn't pay in the end. . . . Belated Birthday wishes go to Mary DeVries who treated the gang to some of her delicious homemade fudge last Friday. . . . Ethel Koontz was all smiles Monday, as she and Charlie Briggs won the mixed doubles tournament last Saturday at the club. . . . Harold Mosshammer really has a good-looking son, but then Harold says, "Well why not, he looks just like his Dad." . . . Kenny Frick is going into the "pig" business in a big way. He bought a pig over the week-end, but says that's just the start. . . . Welcome back to Carol Teleschow and Ruby Stucky. Ruby came back on her birthday, some celebration, but belated birthday wishes go to you, Ruby. . . . We also want to welcome Fred Adams to our division. . . . Maggie Moore entertained her brother and family from Coldwater, Mich., over the week-end. . . . Kate O'Connor had a new job last Saturday. She was working for Charlie Wilt and spent the day wiping up every alley she bowled on. Kate says she was glad she was prepared for that sort of work, by wearing her slacks. . . . Bob Federspiel feels very low since Roy Orr sold his car, as now Bob has nothing to push, maybe Roy will get another soon, Bob, just to make you happy. . . . Here's wishing Joe Eifrid, Andy Anderson, Merle Bennett, Larry O'Shaughnessey, and Hal Vanning loads of luck in the ABC Tournament in Atlantic City. . . . Last Monday afternoon, Howard McVay's wife called in and asked for Howard. However, he wasn't around so Frank Beatty said he would take the message for him if she wanted him to. Mrs. McVay was a little hesitant but finally told Frank what it was she wanted. It wasn't so bad that your face had to get that red was it, Frank?

COUNT OFF

Taylor Street
DIVISION 17
10-20-30
Dorothy Heinzelmann

Marguerite Stahl and her daughter, Elizabeth Ann, went to visit Marguerite's mother last week-end. After they had finished eating dinner Marguerite wanted to wash the dishes, and she told her daughter to get a dish towel and wipe the dishes, as it wouldn't hurt her. Elizabeth got the towel and started helping, but Marguerite noticed that she wasn't in a very good mood about it and so she said, "When I was a little girl I always liked to help with the dishes." On that, Marguerite's mother spoke up and said, "Don't let her kid you, when she was a little girl, she would eat out of a saucer to keep from washing the plates." They have a way of remembering, don't they, Marguerite? . . . Peggy Bandt went home one evening last week and discovered she didn't have her key with her. She tried all of the doors and windows, but they were all locked. However, she knew that the bathroom window was unlocked, but that was on the second floor. She tried to figure out a way to get up to it, and then finally decided to borrow a ladder from her neighbor. She got the ladder and also the neighbor to hold the ladder and up to the second story she went. She opened the window and crawled in, but what we would like to know is whether she missed the tub or fell in it as she went through the window? . . . Did everyone see Ed Brockhall's picture in the paper last Sunday? And, by the way, if you still happen to have the paper around the house please bring it in as we hear that Ed is going to re-paper his kitchen with his picture. All kidding aside Ed, that was really a dandy mess of fish. We are sort of wondering if you took one of them over to Al Mettler's, who is on a sick leave, 'cause you remember how he used to put you on for telling him how big the fish was that you caught, but all you ever gave him was the little skinny ones. . . . Congratulations to Jackie Elder and Andy Anderson, who took second place in the mixed doubles tournament last Saturday. . . . Neva Lutz should start going to cooking school so she could learn the proper way to open a tin can. . . . It sure is nice to see Rose Cuney back with us. . . . Congratulations to Louise Sinn on her birthday last Monday, and the candy bars were delicious, Louise. . . . Ruby Stoops was a busy little gal over the week-end. She spent last Friday night at Bluffton with Marguerite Stahl and attended the junior class play at Lancaster Center. Marguerite's son was in the cast. Then Ruby spent Sunday in Huntington where she attended the wedding of her niece. . . . Anyone who would like to have their bus schedule changed, should contact Eddie Bandt. . . . Mel Riley is again in the market for a car, but he says a Crosley is out. . . . Hope you didn't have too many April Fool's pulled on you today.

Main Office Volleyball Team Captures Interdivision Title

The Main Office volleyball team won the Interdivision League championship for the 1948-1949 season with 41 wins and one loss. The team's only defeat was to the Squares, who were runners-up.

Members of the championship squad are (l. to r.) Dick Wagner, Ray Soughan, Tom Fox, Art Rasor and Jack Fox. Kenny Arnold, the sixth man, was absent when the picture was taken.

G-E Club Loses To City Marksmen

A rifle match was held at South Side high school Tuesday, March 22, between the Fort Wayne Rifle Club and General Electric Rod and Gun Club. The club team lost to the city marksmen 1110 to 1116.

FORT WAYNE RIFLE CLUB

	Prone	Sit	Stand.

G-E ROD AND GUN

	Prone	Sit	Stand.
L. Bland	98	99	82
F. Reed	100	94	84
K. Hart	99	94	84
O. Emrick	100	96	80

Team Total 1110

The Taylor St. boys of the Interdivision League are still out in front. In a dog-eat-dog affair Wednesday evening, the Brouwers took two games from the Broadway Beer and Wine boys. In another match the Doodlebugs clipped the Motor-Generator men (?) games. These are the M-G boys that always get the wood.

Six hundred series: George Luedeman, 157, 231 and 234 for a 622 total; Walter Mertz, 201, 195 and 213—609; and Don Dimke, 200, 208 and 195—603.

Two hundred scores: Frank Matthews, 202 and 202; Russ Rose, 244; Murry Johnson, 225; Walt Seidel, 223; Milt Marks, 214; Bainbridge and Erv Haugk, 209, Bob Buck and Burnau 206; Lee Crowell, 205; Paul Walker, 202; and Tobias, 204.

Masonic League

The Ionic five is leading the league by two games over the Levels and Patrols.

Two hundred scores: May, 226; Briant, 220; Frank Quinn, 215; J. Smith, 210; M. Bailey, 210; Schaberg, 209; Braden, 208 and Trevey, 200.

Small Motor League

The Production boys are still out in front.

Two hundred scores: Ray Matthews, 202, and 205; Anderberg, 237; Paul Walker, 223; Walt Whonsetler, 220; Highland, 217; Don "Shorty" Kaiser, 213; Orv Doherty, 213; Frank Quinn, 212; Kaade, 204; Erv Aumann, 204; Ty Cook, 204; Bob Walt, 201, and Ife Holmes, 201.

Office League

The Blueprint boys slipped back into first by a single game over the Dickason Barber Shop team.

Six hundred series: Erv Aumann, 191, 220 and 223—634.

Two hundred games: Frank Schlink, 200 and 213; Paul Perry, 202 and 201; Vic Rump, 214 and Clarence Rump, 206.

Apparatus League

Team No. 5 is leading the league by seven big games. Bob Knepple bagged his first 600 with games of 212, 179 and 216 for a 607.

Two hundred scores: Dick Blust, 214; W. Wright, 211; Larry O'Shaughnessy, 210; Bill Piercy, 207; R. Alcott, 207; W. Pappert, 205; R. Horner, 202, and Bob Hickman, 201.

Decatur League

George Laurent came through with the highest single game rolled in Decatur during the season with a big 279 in the G-E Fraternal league. Five strikes, a spare and six strikes accounted for the record. Other 200's included E. Falkner, 203; T. Murphy, 214; Lord, 213; and 200; M. Brown, 204; Werling, 221; Beery, 222, and Baumgartner, 229.

Charlie Cook piled up a high game of 256 in the Monday Night league. Other 200's were Shoaf, 212; Schultz, 214, and T. Murphy, 213.

Paced by Tim's consistant bowling (177, 149 and 214) the Murphys defeated Hiltys three games. Nelsons won three from Bakers. Appleman and Faurote won two from Laurents and Schultzs won two from Basharas. Fred Bashara outdid himself in the last game and rolled a score almost equal to the spot. Two hundred games: Murphy, 214; Laurent, 204; Appleman, 210, and Nelson (near miss, 198).

Ladies Monday Night League

Esther Muzzillo leads the high game parade with a 188. Other high games were rolled by Virginia Buuck, 178 and 186; Ethel Koontz, 176; Vivian Fleckenstein, 172; Louise Fanning, 175; Ann Lee, 173 and Margaret Lepper, 173.

Transformer Division League

France made a 600 series with games of 174, 226 and 206 for a 606 total.

Two hundred scores: Smith, 205; Beery, 209; and Feaser, 213.

Bowling and Stuff

Tomorrow at midnight is the deadline for the annual G-E Employees Tournament entries to be filed.

High scores for those trophies are 279, Orv Doherty; 247, "Tommie" Williams; 694, Les Shroyer, and 594, Helen Wagner.

G-E Club To Enter Main Auto League Again This Season

Charles Wilt, G-E Club president, announced today that the G-E Club would again be represented in the Main Auto Major League, Class A Softball. All games will be played at the Municipal Beach diamond.

Perry Esterline has been retained as manager, with Tom Anderson, coach, and Ivan Parrish, publicity manager.

The G-E Club Majors captured the second half championship last year, but lost the championship playoff to the Reserve Club. Manager Esterline will be able to start this season with a veteran and hustling team, signing all of last year's regulars. He is busy trying to sign one more infielder and a hard-hitting outfielder.

The first call for practice will be about the middle of April, the exact date to be announced in the near future.

Voltmen Schedule 50 League Games

(Continued from Page 1)

Don Runge, former two-sport star at South Side high school, was signed last week to replace John Corriden in the outfield. Corriden now manages a Pittsburgh Pirate farm team club.

Runge, 23-year-old, 5-10, 175-pounder, starred in football and track at South Side. He began a three-year hitch in organized baseball in 1944, when he played in the Class D Pony League and Newport News in the Piedmont League. After serving a year in the armed services, Runge split last season between the Fort Worth Cats of the Texas League and Mobile of the Southern Association, both Class AA loops.

Braden announced this week that there will be two new catchers, three new pitchers, a new third baseman, and at least two new members in the outfield. The holdover players will include Hugh Orphan, Al (Lefty) Hazel and Bill Brandt, pitchers; Olin Smith, Bill Hardy and Stan Shargey, infielders, and Paul Dyke, outfielder.

Coach Dee Hamilton will assist Braden for the third year.

Slated As Tough League

The Michigan-Indiana Baseball League, headed by President Gordon Graham of Lafayette, is slated as one of the toughest semi-pro organizations in the nation. All six clubs are reported strong this year with many new additions.

Negotiations are being completed with the following teams for exhibition tilts:

New York Cubans, Indianapolis Clowns, Harlem Globe Trotters, Homestead Greys, House of David, Cleveland Buckeyes, Kansas City Monarchs, and the Chicago American Giants.

All home games will be played at Dwenger park.

Tickets On Sale Later

"We would consider it a successful season if every employee would see at least one game," Charles Wilt, G-E Club president, stated today.

Booster tickets will go on sale for one dollar at the G-E Club office sometime later this month. General admission will be 50 cents with a booster ticket, or 74 cents without a booster ticket. The G-E Club will continue its policy of admitting free of charge all children under 12 years of age.

The league schedule is as follows:

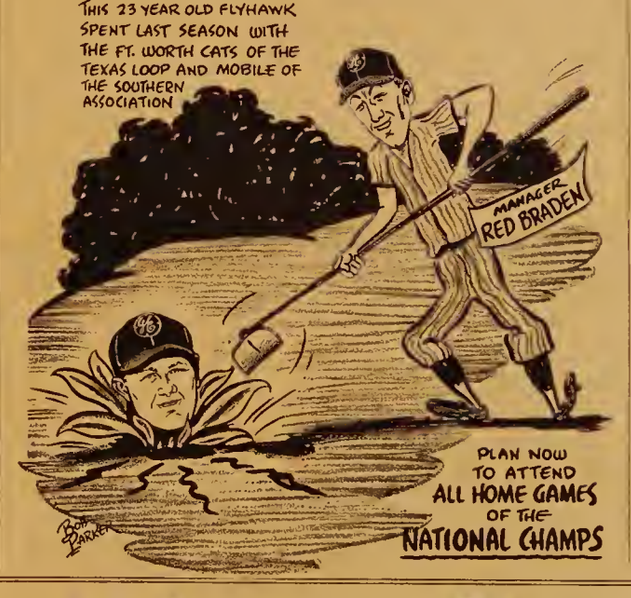
At Home

Sunday, May 15—Michigan City, 2:30 p.m.
Thursday, May 19—Benton Harbor, 8:30 p.m.
Sunday, May 22—Lafayette, 2:30 p.m.
Wednesday, May 25—South Bend, 8:30 p.m.
Saturday, June 4—St. Joseph, 8:30 p.m.
Thursday, June 9—Michigan City, 8:30 p.m.
Saturday, June 11—Benton Harbor, 8:30 p.m.
Tuesday, June 14—South Bend, 8:30 p.m.
Tuesday, June 28—St. Joseph, 8:30 p.m.
Saturday, July 2—Lafayette, 8:30 p.m.
Tuesday, July 12—South Bend, 8:30 p.m.
Thursday, July 14—Lafayette, 8:30 p.m.
Tuesday, July 19—St. Joseph, 3:30 p.m.
Friday, July 22—Benton Harbor, 8:30 p.m.
Tuesday, August 2—Benton Harbor, 8:30 p.m.
Tuesday, Aug. 9—St. Joseph, 3:30 p.m.
Saturday, Aug. 13—South Bend, 8:30 p.m.
Tuesday, Aug. 16—Benton Harbor, 8:30 p.m.
Friday, Aug. 19—Michigan City, 8:30 p.m.
Sunday, Aug. 21—South Bend, 2:30 p.m.

Out-of-Town Games

Friday, May 27—At Benton Harbor.
Sunday, May 29—At Lafayette.
Monday, May 30—At Benton Harbor.
Friday, June 3—At St. Joseph.
Sunday, June 6—At South Bend.
Wednesday, June 8—At Michigan City.
Sunday, June 12—At Benton Harbor.
Friday, June 17—At St. Joseph.
Saturday, June 18—At South Bend.
Sunday, June 19—At Lafayette.
Friday, June 24—At Michigan City.
Saturday, June 25—At South Bend.
Sunday, June 26—At Benton Harbor.
Wednesday, June 29—At Lafayette.
Friday, July 1—At St. Joseph.
Sunday, July 3—At Michigan City.
Monday, July 4—At Lafayette.
Thursday, July 7—At St. Joseph.
Sunday, July 10—At Michigan City.
Sunday, July 24—At Lafayette.
Wednesday, July 27—At St. Joseph.
Friday, July 29—At Michigan City.
Saturday, July 30—At South Bend.
Sunday, July 31—At Michigan City.
Friday, Aug. 5—At Benton Harbor.
Saturday, Aug. 6—At South Bend.
Sunday, Aug. 7—At St. Joseph.
Friday, Aug. 12—At Michigan City.
Sunday, Aug. 14—At Lafayette.
Wednesday, Aug. 17—At Lafayette.

The Firemen beat Winter St. in the second game of the Interdivision Basketball league play-off, 42-22. This gives each team one victory and everything depends on the last game.



The Firemen took an early lead and held it. Paul Stemmler was high point man with 13. Both teams were off on their shooting, but the Firemen did a fine job of guarding the Winter St. boys, never letting them get set. The final game will be played tonight at 7 p.m.

Box Score:

Firemen	G.	F.	T.	Winter St.	G.	F.	T.
Moodie	2	0	4	Beneke	0	1	1
Stemmler	5	3	12	W. Reitdorf	1	1	3
Morkoetter	2	1	5	D. Kent	1	2	4
Etter	1	1	3	D. Reitdorf	1	4	6
Baals	2	3	7	Schinbeckler	0	1	1
Meyers	0	5	5	Blauvelt	1	2	4
Vance	0	1	1	Gallmeyer	0	0	0
Lambroff	1	0	2	Richardson	1	1	3
Somers	1	0	2	Fisher	0	0	0
Schible	0	0	0				
Totals	14	14	42	Totals	5	12	22

Model Racing Fans Invited To Meetings

All model-midget-racer enthusiasts are invited to attend weekly meetings Tuesdays at 7:30 p.m. in the garage at Taylor St., where a thimble-down race track has been constructed.

Stronger Nine For '49

Apprentice BROADCAST

By Mildred Ellis

Spring has sprung
The grass has riz
I wonder where all the flowers is

Spring fever has hit the Apprentice School, especially the lathe section. It seems that Wagner just can't complete a job in the time allowed him? . . . Today was field day for all of our practical jokers. Methinks one little joke back-fired. Early in the week Rasor fixed it so that Barnes would be given an order for an anonymous job, but it wasn't quite so funny when Barnes gave Rasor the job to do. . . . Speaking of jokes? After last semester's grades were passed out there was no doubt in at least one instructor's mind how his class felt about their grades. When he entered the classroom he was greeted by a paper dummy with a noose around its neck strung up to the light fixture. Just so there would be no doubt who it represented, the instructor's name was attached. . . . Something new is to be added. Zurbuch announces that each Monday morning we will be greeted with a new safety poster. You may even be greeted with a new poster during the week if an appropriate occasion arises. Just ask "Lefty" Wuttke. Let's all read and obey these posters that we may have a safer school to work in and that we may live a longer fuller life. . . . Evidently Mr. Wolf has picked up a few good pointers from his son-in-law. At least I have been informed he made a perfect three-point landing in the bench section, probably still all excited about that new granddaughter. . . . I forgot to tell you last week about Morton bowling a 211 game, best I tell you now it may never happen again. . . . Birthday greeting this week to Art Braun and belated greetings to Bob Finton, Fred Borton, Wayne Bergman and H. Morton. . . . Perry Zahn's class in industrial organization really appreciated the fine talks given them by A. S. Johnson and R. J. Hoffman. The General Electric huge family tree really has the boys out on a limb, so to speak. . . . We are glad to have Paul Mischo back again after being ill for a few days. . . . We wish a very speedy recovery to Mrs. Merton Allen who is ill in the Garrett Hospital. . . . Since the state basketball tournament is over, Homer Carson is available as a small loan department. For an extra small fee, he gives advice on "How to invest your money wisely." Joe Rowan also picked up $18. . . . It's easy to see that sheep shearing time is here, because the boys in M-G appeared with fresh-cut-hair-dos. Could it be there was a fire sale on hair cuts last week? . . . For the latest in "hot rods" see Butch. He's had his "Chevy" on M.B.A. all winter. After sweating and scraping to get enough money for the major repair, he learned his trouble wasn't much at all. "Ain't that sumphin?" he says. . . . It's sure hard for the fellows to stay in class these nice spring evenings, because everything the instructor says seems to get compared to fishing in some way. . . . Woenker reports that he has Brouwers Service Station talked into sponsoring the Apprentice softball team. So the team should look quite "classy" in their new shirts and caps. Frank is getting quite pepped up about this season. Since we have been having such swell weather, he claims he will have the boys out any day getting the fat run off them. We can just see the pounds melting on such sturdy guys as Birkenbeul, Leffers, etc. Just think all winter's consumption of 3.2 going to waste.

"The fool hath said in his heart, there is no God."—Psalm 14:1.

We think the printer played an April Fool's joke on "Rovings" last week. One line was omitted and it did not say who the fellow belonging to the Marine Reserves is. His name is Joe Haas and he thinks something should be done about having his two weeks of camp at the same time as the G-E vacation shutdown. Cheer up, Joe, maybe something can be worked out yet. . . . The fellows in Group 16x40 would like to have a ride in Jerry Wert's new car. So far he hasn't taken anyone with him. . . . Betty Foreman's picture is in "Inquiring Reporter" column today. Would anyone suspect Betty of playing the sort of trick she describes? . . . Roy Hans is back in our section and very happy about it too. . . . Paul Koldewey and wife were two of the fortunate people that saw the final game at the state basketball tournament. They said it was a thrill of a lifetime. . . . Max Feilitz can be seen in front of a mirror almost any time of day polishing his bald spot. He claims he has a special cream that gives the extra gloss. . . . Though a little late we learn Barbara Wilson has been wearing a diamond for over a month. The lucky fellow is Robert Montgomery. . . . We're glad to report that Mrs. Dave Slater is making a steady improvement in her search for health. She is able to get out doors again and also take short rides. We wish her a complete recovery. . . . Gus Motz makes it easy for his boss to locate him. He has been wearing a bright red cap for the last couple of weeks. . . . Bob Foster stopped in to say "hello" last Monday and reports that little Deborah Lynn is keeping her dad awake at night. He seems very proud and happy in spite of the crying. . . . Dick Madden is spending all of his leisure(?) making and painting new kitchen cupboards. . . . We neglected to mention when telling about Mary Beaman's pet turtle last week that he also is a barometer. If it's going to be a cold or rainy day he hides under the furniture and if it's going to be fair weather, he gets as near the window as possible. He is just the thing to have for washday.

Volunteer Firemen Install New Officers

M. L. Spade

Maynard Spade was installed as the Volunteer Firemen's new president, Saturday evening at the Squares hall. The other officers installed were Troy Long, vice president; Ray Soughan, secretary, and Harry Zimmerman, treasurer.

Mr. Spade and Mr. Long automatically become the new leaders of the Board of Management. New members elected to the board were Mr. Long and Verland Patterson.

The entertainment committee for the year is headed by Mr. Long, assisted by Walter Lydy, John McMaken, Ora Martin, George Lambroff, Harold Mosshammer, Merle Morkoetter, Jr., Harold Karmer, Herbert Dial, Floyd Snyder, Frank Gitter and Leo Reffelt.

Cecil Rose is chairman of the athletic committee. His committee members are Jim Daley and Art Lindenberg.

(Two views of the activity following the meeting are shown below.)

Rumors are flying and our most talked about person is our basketball star, Herb Jesse. Herb was the star player in a basketball game recently at Ossian when the fathers decided to show their sons how the game really should be played. Rumor has it we will be losing Herb to the Zollner Pistons, the manager having asked him to sign a 10 year contract to play one exhibition game a year. From the groans around the office the next day, we think Herb should sign a 100 year contract for one game each 10 years. . . . What has happened to Cecil Strong and his 'Busco Terrier'? No news? Your Taylor Street pals would like to know, Cecil. . . . I wonder what game Ward Staley and Noland Meyers will take up next? They've been euchered so much lately they've decided to retire from that game temporarily. If interested in the finer points of pinochle, see Kenny Redding. . . . Doyal Huffman has "spring fever" or is it "building fever?" Anyway spring is in the air. . . . The welcome mat is out to Barbara Meyers who recently transferred to Bldg. 6-1 replacing Phyllis Nordyke. Best of luck to you, Barb, on your new job. . . . We have a new angle on the "Beast of 'Busco" as contributed by Jim Laisure, Bldg. 8-1 Grinding Room. "The Fluke of Fulks Lake."—It was a cool sunny Saturday afternoon and there was quite a crowd of spectators gathered at Fulks lake. Every nerve was centered upon catching the giant turtle. The diver was there with his trusty everleak diving suit and the cable and turtle harness were in readiness. Approaching the lake was a man driving a team of big mules. The diver entered the water with the contraptions and readily spotted Mr. Turtle. He approached the turtle very cautiously and prepared to put the harness upon him. Mr. Turtle very slyly watched out of one eye and if one could have understood turtle talk you might have heard him say, "Hurry up, I'm getting hungry." Now the diver has the harness attached and to this he affixes a light, but very strong cable and proceeds out of the water. His helmet is removed and they affix the cable to the double tree of the waiting mule team. Everything seems to be in complete readiness. The driver starts the mules, the cable tightens and moves. But WAIT! The mules aren't going forward anymore. They are pulling frantically but are being dragged back toward the water. Everybody is in hysterics as the mules are being pulled back farther and farther and finally into the lake and they disappear below the murky waters of Fulks lake. Dismay is rife. What would be the outcome? What had happened? Suddenly someone shouted and the crowd turned to stare at the opposite shore. There sat Mr. Turtle, calm as a knot on a log, nonchalantly picking his teeth with a single tree." So much for the Beast of 'Busco.

Effie Wyatt was given a farewell dinner. Our very best wishes to a swell gal, who is retiring. . . . We hear Margaret Lepper made the 500 series, congratulations. . . . Sophia Bodigan gave a shower for Helen Horstmeyer our bride-elect of April. . . . Johnny Burnett was a "lucky" guy when he drew Jasper to win the state basketball championship. However, we understand Johnny tried to persuade his brother-in-law to buy the ticket when Jasper was slated to play Madison in the evening game. . . . Maxine Daniels received a beautiful birthday cake from Lucy Whitlock. Lucy made the cake in the shape of a lamb, and it was really a work of art. . . . Danny Daniels certainly calmed down Herb Habig a week ago. What happened, Herb, did your team lose? . . . Bob and Peggy Turschman have had the "blues" all week. Their dog was struck by a car. . . . Spring must really be here. We have noted some of the girls are "showing" bare feet again. . . . Esther Watson had her granddaughter in a dither last week. It seems she had a dress in lay-a-way and Esther being very thoughtful picked it up for her one evening after work. A few minutes later her grandchild stopped in the store to get it. After some excitement the clerk finally convinced her that it must have been her grandmother who had picked up the dress. . . . Janet Hier was built up for an awful let-down. It seems her husband had purchased two luscious T-bone steaks. Janet preparing them just "right" had her heart set on a very wonderful dinner. However, they were so tough they couldn't eat them. The next night they had beef stew. . . . We are wondering just what Gatha Hartman did with the four dozen doughnuts she bought a week ago Friday?

Often the greatest trouble with middle age is that that is where it affects you.

Plan to get your Voltmen ticket early.

Firemen Have Card Party

The camera played kibitzer at two card games during the social period of the Volunteer Firemen's meeting Saturday evening at the Squares hall. Shown in the picture on the left are (clockwise, from lower left) Elmer Hamilton, Fred Duryee, Harry Zimmerman and Ahe Koch trying to get the most 'meld' from their hands. Waiting for the deal in the picture on the right are (l. to r.) Ora Martin, Jack Kurtz, Louis Hopper and Norman Culler.

General Electric's Anti-Inflation Ads Receive Recognition

The General Electric Company and the advertising agency, Fred Rudge, Inc., were presented one of 12 bronze medal awards for General Electric's advertising campaign to combat inflation. The announcement was made in the recent issue of **Advertising & Selling.**

The Annual Advertising Awards are based on the criterion: Advertising as a Social Force.

The series of General Electric ads appeared in the WORKS NEWS and city newspapers in an effort to enlist the cooperation of 15,000 supervisors, 200,000 employees, and 6,500,000 community neighbors in 45 G-E plant towns in the battle against inflation. They were designed to give readers a clear picture of existing conditions and to discuss matters found to be of the greatest current interest to them.

Ads Illustrate Data

Most of these were captioned by question headlines, such as "Should Pay Be Equal Everywhere?" and "Should Wages Go Up—and Down—With Profits?" All of the advertisements carried cartoon or diagrammatic cuts supplementing the copy. In many cases special material was high-lighted as in the

G-E Employees Donate $10,180 To Red Cross

The presentation of a check for $10,180 was made this week to Red Cross officials by C. H. Matson, Works Manager, on behalf of the G-E employees who contributed to the 1949 fund-raising campaign at the Broadway, Taylor St. and Winter St. plants. In the picture above are (l. to r.) K. W. Michael, chairman of the Fort Wayne Works campaign; Mr. Matson; D. K. Huntress, general chairman of the Red Cross drive in Allen County, and Glenn Reynolds, executive director of the local Red Cross chapter.

WKJG's Hilliard Gates To Give Talk On Sports At Supervisors' Club

Hilliard Gates, manager of Station WKJG, will be the speaker at a meeting of the Supervisors' Club at 8 p.m. Monday, April 18, in the Squares' hall. "The Local Sports Picture" will be his topic.

Mr. Gates traveled 12,000 miles to provide radio coverage of 125 basketball games this season. A short discussion will follow his talk.

M. L. Crouse will present "Magic Is Fun," a show of legerdemain, as another feature of the program.

A business session and social activities have also been planned by P. A. Vance and W. H. Crouse, co-chairmen of the evening. Other members of the committee are O. B. Fultz, L. B. McNamara and W. W. Weimer. A buffet lunch will be served at the close of the formal meeting.

Hodell Writes Feature For BRIEF Magazine

The latest issue of **Brief**, magazine for foremen and supervisors of the Apparatus Dept., contains a story by Lisle Hodell, Manager of Manufacturing in the FHP Motor division, as its feature for this month.

"Synchronized Flow" is the subject of Mr. Hodell's story, which is illustrated by a group of pictures taken at the Taylor St. plant.

The Fort Wayne Works is also represented by a story about Charles A. Schild, a 1948 Coffin Award winner. Mr. Schild was a

(Continued on Page 3)

Plastic Models Solve Homemakers' Problems

Clarence Kruse, employees' store clerk, shows Mr. and Mrs. John Leininger, both of Bldg. 18, how easy it is to plan an ideal kitchen of G-E appliances with an Applianset.

An ingenious method for planning attractive, step-saving General Electric kitchens and laundries has been developed by two G-E engineers at the Bridgeport Works.

It used to be a big problem to plan your kitchen and laundry, but those days are past. With an Applianset—like the one on display at the Broadway Employees' Store—you can see your dream kitchen, complete to the last detail, before you begin working on the real thing.

The Applianset was devised by

F. T. Clarke Named Safety Supervisor Of Apparatus Dept.

Frederick T. Clarke has been appointed Supervisor of Safety for the Apparatus Department at Schenectady, it was announced by J. A. Spencer, in charge of Employee Relations for the department. Mr. Clarke has 20 years of experience with General Electric and was formerly Safety Supervisor of the Apparatus Department's Switchgear Divisions at the Philadelphia Works.

Mr. Clarke, who studied engineering at Drexel Institute of Technology in Philadelphia, Pa., and safety engineering for one year at the University of Pennsylvania, joined General Electric in 1929. He started in Relay Tests at the Philadelphia Works and was transferred to Automatic Panel Test the following year. He remained in that position until 1937 when he became a Requisition Engineer.

In 1939 he was transferred back to the Relay Test Section of the Apparatus Department's Switchgear Divisions in Philadelphia, and in 1941 was named Foreman of the

ELEX RUMMAGE SALE

The Elex Club's rummage sale will be held today and tomorrow, April 8 and 9, at 308 W. Brackenridge St. Supervising the sale today are members of the Partizan Chapter. Elex members will be in charge during the sale tomorrow.

Foremen To Hear Speech By State Representative

W. O. Hughes

W. O. Hughes, state representative from Allen County, will be the speaker at a meeting of the Foremen's Association at 8 p.m. Wednesday, April 13, in Kreis Stoltzenau hall.

Mr. Hughes is a Fort Wayne attorney and was the minority leader in the last session of the Indiana General Assembly. He will discuss such topics as the Soldiers' Bonus, the Railroad Elevation bill, and others of interest that were considered by the Assembly.

"It is expected that the discussion will be kept on a non-partisan basis and good government will be the theme," it was pointed out by Everett Lindeman, president.

Non-members who are eligible for membership are invited.

Religion, Like Liberty, Will Not Maintain Itself

A group of conscientious men started out to do a big job nine years ago. They wanted to remind the American public that religion, like liberty, will not maintain itself. When one goes, the other follows. And they've done something about it.

The Laymen's National Committee is a non-profit, nonsectarian organization of laymen of all faiths. They are not connected with any other organization.

Out of their determination to bring about a more sober realization that "man cannot live by bread alone . . ." developed an annual movement which today is not only accepted as here to stay, but receiving more and more plaudits each day —National Sunday School Week—which will be observed this year from April 11 to 17.

Moral decay is being carefully nurtured by those who would replace American ideals with alien, godless ideologies. The aim of setting aside this special week is to increase Sunday School attendance with the idea that religion must be so important that Communism will be unimportant.

Let Us Never Be Content With Things We Do Today

A famous author, pressed by an interviewer for his secret of success smiled and said, "I write to please myself." Further he said, "If the story doesn't sound right to me, I re-write it until it does. I am my own critic and I hope, the severest one I'll ever meet."

In those words are worlds of wisdom. We must all be our own critics. No one will ever be as tough on us as we ourselves . . . if we only apply the courage necessary to action. Never be satisfied with what you have done. Today's job must be better tomorrow and so on until the end of time, if progress is to be made.

Once we understand what Burns, the Scottish poet meant when he prayed for the gift "to see ourselves as others see us," we have gone a long way on the road to better things. Let us never be content with the things we do today. Let us always search for, until we find, the better way.

REMEMBER . . . . .

. . . . When electrical maintenance was located in the basement of Bldg. 16. . . . . When testing of large generators was performed in Bldg. 2, where the Plating Section is now located. . . . . When the FHP Motor Division was located in Bldg. 3-2 in a space about 50 ft. x 100 ft. . . . . When distribution of power was overhead, between buildings. . . . . When Link Johnson and his gang were the motive power for hauling large products between buildings. . . . . When "Billy" Wehrs ran the shaft lathe in Bldg. 8. . . . . When Bill Bracht helped the breakers kick out when you approached your estimated load requirement. . . . . When bi-polar generator and exciters were built in Fort Wayne. . . . . When Walter Wolf milled commutator bars and Bill Rehling would send a 6 inch length back for credit. . . . . When we manufactured direct current watthour meters and prepayment meters. . . . . When Killian Vorndran was watchman at the Pennsylvania Broadway crossing. . . . . When the Spanish American War flagpole fell across the Pennsy tracks. . . . . J. J. Wood's diamond ring with a stone as big as your thumbnail. . . . . E. A. Barnes' Oldsmobile. . . . . Our experiments with X-Ray transformers. . . . . When we manufactured switchboard instruments of all descriptions. . . . . When we built the first revolving field alternator. . . . . When spinning of copper and aluminum was an art in Bldg. 3-1. . . . . When the safety movement was in its infancy.

It's The Wasteline That Bothers Us

HUGH CRANE discusses Government Price Support

NEW YORK—News from the farm is out-of-this-world.

The U. S. Department of Agriculture keeps tabs every spring, beginning as of March 1, of American farmers' "intentions to plant."

Last year we had a bumper crop of wheat and a super-duper crop of corn. That's one main reason why the prices of eggs, chicken, pork and beef have been coming down and will probably come down still further. But these crops were so large that in spite of our exporting an enormous amount of grain this year we'll still have nearly half a year's domestic requirements of wheat left over at the end of July when the new crop comes in, and the government will be holding the bag not only for most of this grain but also for several million bales of unused cotton and a whole lot of other surplus crops.

More Acreage This Year

But now comes the news that farmers are planting even more acreage to wheat this year than last year and only a shade less corn. And their total intentions to plant all crops come to around 360 million acres against only around 300 million acres last year.

That means that with only average weather the country will have another huge crop of nearly everything this summer, on top of the leftover from last year. And that means that while we're knee-deep in grain this year we'll be waist-deep in it a year from now.

Will Cost Billions

It's happened before in recent years that bumper crops have overflowed into garage floors, empty churches and open fields; but this year it'll be worse than ever. There'll be more grain than can possibly be stored or than the railroads can carry; and the government will have to lay out billions to take over the surplus.

What to do with it? We can't expect to export it all; the European crops are good this year; so are the Canadian. We can't feed it all to livestock; there's a limit to the amount you can use to feed a hog or fatten a steer and it takes time to grow more pigs and cows.

What Caused Situation?

How did this come about? Well, there are three principal reasons.

In the first place the law requires the government to support the price of grain at levels which farmers still seem to find quite attractive.

Secondly, it became again during the war a free country so far as acreage is concerned and a farmer can plant all he wants to of the principal grains.

And thirdly, there's talk of acreage control next year, but if it comes the farmer's future acreage will be determined by his past acreage, so he might as well keep it up now while Congress lets him.

This kind of thing didn't happen

(Continued on Page 3)

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. How does an "electric eye" work?

A. This term is usually applied to the photoelectric cell or phototube, an evacuated bulb containing a surface of sodium, potassium or some other material which emits electrons when light strikes it. Also sealed in the bulb is a wire called the anode. Connected in the proper circuit, an electrical current (a stream of electrons) will flow through the phototube when illuminated, and variations in light cause corresponding variations in current. Another type of light-sensitive element, called the photovoltaic cell, converts the light energy falling on it directly to a current. These are used in the common photographic exposure meters.

Meet the President

Charlotte STANFORD

PRESIDENT OF THE ELEX CLUB

CHARLOTTE IS ACTIVE IN SPORTS—BOWLING AND ACTING AS SECRETARY OF TWO LEAGUES—SHE ALSO MANAGED THE GIRLS' BASKETBALL TEAM—

— WORKS IN FHP MOTOR DIV. 13 AT TAYLOR ST.

YE OLD METER GIRLS TO HAVE SPRING PARTY

Ye Old Meter Girls will have a spring party at 8 p.m. Tuesday, April 26, in the Dehler-Hughes hall. Mrs. Wilbur Lec and Mrs. Willard Stephen are co-chairmen of the affair, assisted by Catherine Wise, president of the group.

Tickets for the party are 50 cents each. Reservations can be made at the Personnel offices at Broadway and Taylor St. plants or with any of the committee members.

Receive Recognition

(Continued from Page 1)

case of one captioned "Prices Will Keep On Going Down," which ran a column of up-to-date instances in which price cuts were being put into effect all over the country. In many cases boxed recapitulations at the bottom of the page offered the reader specific instructions as to what measures he could take individually.

In announcing the award, the magazine stated:

"G-E never failed to pledge its own total support of the actions it advocated, the point of view set forth being one of continually abetting production in industry for the good of individuals everywhere, whether as members of management, labor, or simply as consumers."

The awards were founded by Edward Bok in 1924 and until 1930 administered by the Harvard Graduate School of Business Administration. After a lapse of four years they were renewed in 1935 under the sponsorship of Advertising & Selling, and since that time have been called the Annual Advertising Awards.

Fractional Fiction 4-5

By Leola Carrier

We wonder if anybody saw an unchaperoned trailer going down Rudisill Blvd. last Saturday. It belongs to Gordon Parmalec. . . . Notice: Martha Smeader declares nobody ever noticed her hair cut. . . . A lot of fooling went on during the past week, especially when Charley Trey tried to pick up a nickel that was nailed to the floor. Better luck next time, Charley. . . . Wanted: A seamstress in case of emergency of moving platforms out of the way for safety. See Herman Macke for the information. . . . Co-workers of Eileen Magers presented her a nice parting gift. She is leaving for her new home in Chicago. . . . Charles Brown, who is now retired, gave his friends a vist last week. . . . Accidents do happen according to Augusta Gallmeyer who spilled coffee on herself and lost a half day's work. Were you trying to fool yourself on April Fool's Day, Augusta. . . . We wish to express our sympathy to Forrest Allman on the death of his father.

Writes Feature

(Continued from Page 1)

foreman in the FHP Motor Engineering Development section before his retirement on March 1.

Named as a "Mr. General Electric," Hilbert J. Nahrwold, Tool Maintenanee foreman at Taylor St., is congratulated by the magazine for his participation in civic affairs as a city councilman.

Coil Winding Group Holds Meeting Here

Seated: (l. to r.) J. A. LaCasse, Pittsfield; P. H. DuBois, Lynn River; R. M. Kramer, West Lynn; G. G. Fasake, Schenectady, and L. C. Sterling, Schenectady. H. J. Proxmire, Fort Wayne, is addressing the group. Standing: (l. to r.) T. L. Winestock, Pittsfield; L. H. Driftmeyer, Fort Wayne; J. F. Schreiner, Schenectady; A. F. Mittermaier, Fort Wayne; Karl Twele, Philadelphia; A. D. Cranner, Philadelphia, and W. W. Winn, Erie.

The Transformer, Instrument and Control Coil Winding Committee for the Apparatus Dept. met at the Fort Wayne Works Tuesday and Wednesday, April 5-6.

The sessions opened Tuesday morning in the Central Planning conference room, Bldg. 26-2, with a short talk by W. F. Oswalt, Assistant Manager of Manufacturing, Specialty Transformer and Ballast divisions.

Tours of Bldg. 26 were held during both mornings of the conference.

The Tuesday afternoon session included a discussion of the morning tour, agenda items, Bobbin manufacturing and procurement, and Works Laboratory activities.

A discussion of the morning tour, new items, and cost reductions concluded the conference. The next meeting of the committee will be held in September at the Schenectady Works.

Reinking, Allen Are Appointed To New FHP Payroll Positions

H. H. Reinking

J. L. Allen

H. H. Reinking has been appointed Supervisor of Payroll and J. L. Allen was named Assistant to the Supervisor, Payroll, FHP Motor divisions.

Mr. Reinking began his General Electric career in 1926 as a messenger. Later that year, he transfered to the payroll section, and in 1936 was assigned to the accounting division in Bldg. 18-3. He returned to payroll the following year as a clerk. Mr. Reinking was then promoted leader in the gross payroll and distribution section.

In 1946 he was appointed assistant to the Paymaster in charge of gross payroll, distribution and payroll statistics. A year ago he became Assistant to the Supervisor of Payroll, FHP Motor divisions, the position he held prior to his recent appointment.

He is married and has two sons and two daughters. The Reinkings live at 2315 Broadway. An accomplished pianist, his hobby is music.

Joins G-E In 1942

Mr. Allen was first employed by the Company in 1942. He started working in the cost section, Bldg. 4-6. Six months later he left for service in the air corps and saw overseas action on Guam. He returned to General Electric in 1946, working in the payroll section at the DeKalb, Ill., plant. He later was appointed Supervisor of that section, the position he had before transferring to Fort Wayne to take over his new duties.

He has purchased a home at 7404 Beatty Ave. in Waynedale, and his family, Mrs. Allen and two sons, plan to move there soon. Gardening is one of Mr. Allen's chief interests.

Elex Partizan Chapter Plans Luncheon Meeting

The Partizan Chapter of Elex will its monthly meeting Tuesday, April 19, at the new Hobby House on E. Wayne St. A luneheon will be served at 1:45 p.m. A business meeting and social period will be held following the meal.

Margaret Tomson is chairman of the meeting. Her committee consists of Edna and Luella Tarmon.

F. T. Clarke

(Continued from Page 1)

Acronautic Equipment Test Department.

A year later he was transferred to the Darby, Penn., Works, returning to the Philadelphia Plant in 1944 as Safety Supervisor.

Mr. Clarke is a member of the American Standards Association, and is on the Executive Committee of the Electrical Section of the National Safety Council. He is married and has two sons, Fred, Jr., and Richard.

Hugh Crane

(Continued from page 2)

in the old days and in fact couldn't, for a very obvious reason. When crops began to get too big, prices would begin to slide and they would keep on sliding until they got so low that farmers didn't find it worth while to plant so much. The trouble was, though, that the prices would slide so far that they would drive honest hard-working farmers into bankruptcy, so the country gave up that system. Nowadays the government supports the price.

Has Its Faults, Too

But the new system doesn't fully make sense either, so far. This surplus business seems likely to continue not just this year but for some years to come. Congress is now working round toward continuing the present support levels (90 per cent of 'parity' for most crops). And everybody is very reluctant to go overboard and vote for acreage or production controls such as we had in the 1930's. Farmers don't like them, and besides, it just naturally sounds bad and goes against the grain of most Americans to prevent a man from producing something. Yet if you offer a man a good price for his product, and undertake to buy all he produces, you're liable to get a good deal more production than you thought you were bargaining for.

You may think this is all highbrow stuff, but it isn't. It affects the price of groceries. And you'll see and hear more and more talk about it as the months roll by between now and harvest time.

Elex Board Meetings Scheduled For April 20

Elex Club board meetings will be held Wednesday, April 20. The second shift girls will convene in Room 204, Bldg. 8-2, at 1:30 p.m. with Rachel Fisher presiding. Charlotte Stanford will preside at the day girls' meeting, which will be held at 7:30 p.m. in the large conference room of Bldg. 8-2.

You never know whether to take some politicians at their face or two-faced value.

Some people can hear a rattle in their cars quicker than one in their heads.

Plastic Models

(Continued from Page 1)

Victor Civkin, who is in charge of architectural engineering at Bridgeport, and his co-worker, Gerald Macari.

Models Prove More Practical

While working in the Appliance and Merchandise Department's Home Bureau several years ago, these two architectural engineers developed the idea of using models of G-E appliances to work out arrangement problems. Up until then, all the pictures used in advertising appliances were pictures of actual kitchens. Variety in arrangement was difficult because it was impractical to move the heavy pieces.

The first models used by the two engineers were made of wood. All the appliances were scaled to one inch to the foot. The only difficulty was that cupboards which had to be put on the walls often jarred out of place before the picture was taken.

Civkin and Macari then hit on the idea of having them made of plastic, because it is light, attractive and versatile. They learned that the Chemical Department at Pittsfield had the facilities for turning them out, so they soon received their cooperation in the project.

Wall Fixtures Are Problem

At first the wall fixtures were equipped with metal brackets which looped over the side walls. There was still liable to be an unsightly gap between cupboards, unless the whole model was on an absolute level.

The problem of making the pieces fit closely together was finally solved by a Chemical Department representative, who suggested magnets.

The walls of the Applianset are metal and by attaching a tiny magnet to the back of each corner cupboard, cabinet, and clock, these unruly fixtures now stay where they are put as firmly as if they were glued. They're easily moved and placed where the homemaker wants them, to complete the dream kitchen.

There's no fun achieving success when everybody is looking the other way.

The trouble with Father Time is he doesn't make any round trips.

The first wedding anniversary of Louella Hockemeyer left her up in the clouds. Monday she was seen wearing two gay colored aprons. . . . Who is the new boy with the Florida tan? Namely Harold Dalman. Welcome home, stranger. . . . What is all the mystery about the Hoover armature? Who has it? Where is it? That's the $64 question. . . . Glen Fernwalt is the new capable packer. . . . Freda Copeland and Bea Helm paid us a visit last week. It was nice seeing you again, girls. . . . Dorothy Comer, who has been on the sick list, is recovering quite nicely. . . . The Easter bunny has paid us an early visit. Esther Fagan was given a live rabbit and some colored eggs last Friday. Everybody thinking it was an April Fool joke found out it was the real thing. . . . We welcome Helen White. Hope you like us, Helen. . . . Billie Tucker brought some toast to work the other morning. She put it under a heat lamp to get warm. She told one of the girls to watch it so it didn't burn. They watched it all right, watched it go up in smoke. If you want your toast, Billie, you had better eat it cold. . . . Test and Inspection boys went out to a party at Fred Clark's last Friday night. Just a little party on Sam Beers. Say, can that Clark guy put on a feed! If you don't think so ask Harry Berry, I doubt if he could get in the door when he got home 'cause he sure put it away. . . . Say, Ed Boedeker, how do you like Carl Harmon for a card partner? It's ok, Ed, you don't have to say it out loud. . . . Lester Hubbart better keep quiet and help his wife with the housecleaning this week. . . . Elmer Koehlinger was the big-boy Friday night or should we say lucky. . . . Clarence Nahrwold didn't do bad either! . . . We sure missed Pondo's singing Friday night. Since there wasn't any girls present I guess he didn't think it worth his time and effort after working so hard all day. . . . Bob Blee has been put on the spot and X marks the spot. So sorry, Bob, you have been such a good boy too. . . . Ray O'Brian says his nickel cigars put off plenty of smoke. . . . Jim Hargis had an expensive fishing trip. He leaned over to put some bait on his hook and along came a gust of wind, and good-by hat. It was the third time he wore the hat too! . . . Paul Ginder doesn't live right. Whirlwinds usually blow a great distanee or so I've been told, but this one didn't. It stopped when it hit his freshly painted car. He had to do the job completely over. . . . The cooking Clarks are at it again. Louie was helping Clara bake some lemon pies to take to Michigan with them and she doesn't know what made her taste it but imagine her surprise when she found out she had left the sugar out! P.S. she dumped it back in the pan and added the sugar. . . . Lee Raver sure is an early riser—she got up at 1:30 a.m., put the coffee on and started dressing when she looked at the clock again and back to bed she went. . . . Mary Nute was explaining to Thelma Purdue and Thelma Harter just how to hold the bowling ball when bowling. Later they found out that she had told them wrong and our conclusion is that she wanted to be sure no one else beat her. She says that Purdue woman is a born bowler! . . . We had a farewell dinner party for Clara Krudop who is retiring today.

Given Presents At Retirement

Arba Kurtz, Taylor St. plant, is shown receiving presents given during the luncheon in honor of her retirement April 1. Left to right are Adeline Muzzillo, Louise Reinhart, Miss Kurtz, Mary Kneubuhler, Bonnie Rothgeb, Irene Michel and Bessie Monroe.

Kathryn Erwin gave a farewell dinner party for Effie Wyatt, who retired last week. Effie, who has been employed by the Company for 23 years, has not been late to work at any time. We feel this is an excellent record. Also last Thursday her co-workers had a party for her in the cafeteria and presented to her some beautiful luggage. We extend to Effie our very best wishes for a very happy future. . . . It seems Janet Hirer and Ginny Plummer were discussing monkeys one day, and a couple of days later Clayton Culver asked Janet if she had remembered their discussion, and she replied, "yes, why?" Mr. Culver very nonchalantly said, "Oh, I saw one uptown last night and thought of you." CRASH! . . . We understand Lowell Arnold has very willingly offered his assistance to one of our employees, just in ease she is a lucky winner in a certain club. . . . Spring is really here. Virgil Snyder his been boasting about his tomato plants. Could it be he has fresh sliced tomatoes already? . . . We wonder if old age is creeping upon Arlo Hawk, or is he just absentminded? It seems while trying to find just who had taken his cigarette lighter, he found he had it in his hand. . . . Hurrah for Ann Johnson, she bowled a 584 series. . . . Lottie McFarland has her garden all planted and soon will have a diet of lettuce and roses. . . . Why is it Ife Holmes always breaks all the teeth out of the combs he buys? . . . Mable Staley took the wrong bottle out of the medicine cabinet, but whatever it was, her cold is getting mueh better. . . . "Slim" Miller needs a bib. The average person eats his food, but not Slim he just dribbles it down the front of his shirt. . . . Sophia Bodigan had a shower on our bride of April, Helen Horstmeyer. Helen received many lovely gifts. . . . It looks as though Walter Doctor is a wee bit jealous of Elmer Buuck's purple shirt. Anyway he is trying to prove himself eligible to wear one. . . . The next time the boys are out for an enjoyable evening and they flip a coin to see just who will buy, they are going to check the coin Bill Kurtis has to see if it doesn't have "heads" on both sides. . . . Happy birthdays for the month go to Kenneth Rupp, Beatrice Hans, Irene Bowman, Esther Watson, May Schnitt, Myrtle Barfell, Glen McNamara, Leonard Kinley, Kathryn Norr and Kathryn Erwin.

Frank Morgan Retires With 24 Years Service

Frank Morgan

Frank Morgan retired Friday, April 1, after 24 years service with the Company. He was employed the entire period by the General Tool division, starting as a machinist. When he left for a leave of absence in 1944, he was a universal mill operator.

Mr. Morgan lives at 4214 S. Calhoun St.

Ward Staley's incubator failed or the rheostat failed to work, so all Ward got for his efforts was some cooked eggs. Better luck next time, or you might be more successful if you started with the live birds. . . . John Repine learned a new trick last Friday (April Fool's Day) and is now in the market for some paraphernalia consisting of one funnel, one penny and a glass of cold water. He says when he gets the stuff he will show us how to drop a penny off his nose in the funnel placed in his belt. . . . There is a theme song about hydromatic drive. Ray Bowers is singing it since he pulled the gear shift lever off his car. . . . The decoration in the grinding section last week was the result of Ted Warner's birthday. Ted's children presented their dad with a beautiful shirt and Ted was very proud of the gift too. . . . Marcellus Junk is back on the job after a couple days tussel with old man flu. . . . Also back after several weeks' illness is Walter Schuler. You can't keep a good man down long. . . . Courtland Anderberg has returned to Bldg. 19-4 after pinch hitting for Walter Schuler. It was nice having you out, Andy, come again sometime. . . . Frank Phillips was kicking about no threads on a job from the lathe last Monday and upon checking the sketch found he had failed to put them on the sketch. . . . John Bastian and wife celebrated another wedding anniversary last week. Don't those years slip around quickly? Congratulations and many more happy ones, too. . . . Ernie Brown was given a nice birthday gift this week by being elected governor of the Moose Lodge. Congratulations and many happy returns.

Once again death has visited our group and taken away a friend and co-worker. Although Paul Redmerski had been ill for quite a few months he was never forgotten. His cheerful smile and friendly hail was as sure as the sunshine. To his family we extend our deep sympathy. . . . We also extend our sympathy to Don Kruse whose brother died last week. . . . All of our best of luck to you went to the bowling congress with Roger Crabill. Hope they did some good. . . . Paul Baker and Bill Hoefer are leaving us today, and we wish them lots of luck. . . . Ross Harter is now a Winter Street man again—our loss for sure, but in his place we have Bob Lauer and our best hello to him. . . . We bid farewell to Polly Van Horn, who is leaving us and taken up housekeeping as a full time job. Sincere wishes for good luck go with you, Polly, it's the little things in life that really count. . . . Did Ruby Lydy and Clara Metcalf like the gifts they received April 1? . . . Someone must have given Alice "Farmer" Pflueger a bum steer when she was a kid. . . .

Here I sit, but all in vain,
To think up an item for the ole
WORKS NEWS
Nothing even on Charlie Crain
So I guess I'll just have to take the
boos! . . .

Top Floor Topics

DIVISION 95

By Walter E. Pohler

As we collect our thoughts to write a few lines for our column this week, we wonder how many of our readers realize that probably one of the really big moments in the history of our country has just taken place a few days ago. We are referring to the signing, April 4, 1949, of the Atlantic Pact. Only history will tell whether or not this pact will serve its intended purpose. The point we are trying to make is that most of us go our normal way, not taking too much interest in anything other than the things which effect our way of life. We have heard little or no comment from any of our co-workers regarding this matter, and your writer must admit he has not taken time to become familiar with the provisions of this treaty. As a point for consideration we feel that all of us should take a more active interest in the affairs of state. By so doing we could vote more intelligently, and it is quite possible that our country could be an even better place in which to live. . . . Eva Bobbish reported back to work on Monday after being off since Jan. 13. We tried to get her to tell us all about her operation, but the story was too long to publish in this column. Anyway we are glad to see you back, Eva. . . . Bill Braun completed his first semester at Purdue Center with straight A grades. Nice going, Bill. . . . Speaking of Purdue Center, why don't some of the rest of you ex-G.I.'s take advantage of the opportunity of attending night school, under the G.I. Bill?

Squares To Hold Minstrel Show April 20

Don Motter, orchestra director, and Glenn Seabold, chorus director, scan some of the orchestrations they will use in the Squares minstrel show, Plantation Capers.

Plantation Capers, the Squares minstrel show, will be presented Wednesday, April 20, at the Civic Theatre, it was announced today.

Different groups have been rehearsing the past few weeks and soon combined rehearsals will start. A number of professional acts will be included in the show, but the major portion of the cast will feature members of the Squares Club.

Rehearsals for the chorus are being held every Tuesday at 5:15 p.m. in Bldg. 16-2 cafeteria, and every Thursday at 12:30 p.m. in the G-E Club auditorium.

Tickets are available from club members for 50 cents. There will be an open house at the club rooms after the show.

Discussing plans for the show, above, are Frank Gamec, general chairman; Joe Zasa, show chairman, and Frank Ondrovik, administrative chairman.

Last week was party week in Bldg. 18-1. The Accounting Girls entertained with a luncheon for Vickie Bickis, who is now at Taylor Street; and Betty Carper was feted with a luncheon by the Works Service Payroll girls. . . . Our sympathy to Mr. and Mrs. Robert Hawkins, Bldg. 18-5, in the death of one of their twins. We understand that little Ann is much improved from her siege of pneumonia. . . . The fishing season is here, as a witness, these Monday morning conferences in Bldg. 18-4, as to ways and means of snaring the victims. See Al Tharp or Ray White for particulars. Understand that Mr. Tharp is promoting a fishing school. I do not know whether it is for anglers or otherwise. (H. B. Leach, Bldg. 18-1 please take notice). . . . Speaking of Mr. Leach's fishing ability, I notice that the Purdue Center fishing school held a fishing derby at Fletcher's Cedar Shores last Sunday. However, I fail to see our Mr. Leach listed as a winner. Could it be that his practice is not as good as his theory? Now don't tell us you did not enter the contest. . . . April Fool is here and past, but the people in Bldg. 18-4 are still wondering what it was about the phone call that Karl Reid received to make him grin from ear to ear, also, the "private" heavy mail received by Messrs. Kappel and Tharp. . . . Then too, Julia Waldrop, Bldg. 18-1, had to leave early Friday evening to pick up a certain piece of wearing apparel she had lost—that was not an April Fool! That was serious. . . . By the way, Elizabeth Carnell, Bldg. 18-1, has a new parking place for her new (?) car. Oh, well, it is safer in the filling station anyway. She says it's carburetor trouble. . . . We are all pleased to know that Rex Mericle has returned to his work in Bldg. 18-5 after several weeks illness. . . . Ralph Bailey, Bldg. 18-1, as far as we know, is the golf addict this spring. Of course, he and Mrs. Bailey had to travel all the way to Springfield, O., just to play the game. . . . Phyllis Morrison, Bldg. 18-3, celebrated her birthday last week. . . . Not everyone can take one ride on last week's pass, as Florence Badger, Bldg. 18-4 did—no foolin' . . . The FHP Orders and Sales section, Bldg. 18-3, extends welcome to Charley Hooley, who was recently transferred from the Air Conditioning Dept.

"Remember, there has never been an over-production of kind words."

Mr. and Mrs. Frank Wilson are the proud parents of a baby son, Dennis Eugene, born Friday morning, April 1. Congratulations. . . . We wish Noble Dinger belated birthday greetings. His birthday was March 31. . . . If Joe Griffin had as much luck in everything else as he does in playing cards, he would be sitting on top of the world. . . . Speaking of cards, Jim Kavanaugh and his partner took third place in a bridge tournament recently. . . . Bob Rehrer really moved fast last week-end when he looked out of the window and saw one of his sons out in about five feet of water. Bob lives at Tri Lakes. . . . Arlouine Wise brought a pair of dolls that she had made to work. They were really cute and she must have spent many hours making them. . . . Earl Yoquelet's wife made him an April Fool sandwich for his lunch. . . . J. Rippe had quite an experience trying to hang wallpaper, not only on the walls but on the ceiling also. Some fun, eh, Rippe? . . . Miles Rupert's wife caught him before he was really awake with the old April Fool joke of a quarter that wasn't there. Get on your toes, Miles. . . . Glen Keck and wife attended a golden wedding celebration with 114 people held at Jonesville, Mich., last week-end. The couple honored was Mr. and Mrs. Charles Keck, Glen's aunt and uncle. . . . Carmelita Fough and Bettie Foreman have swapped shifts. Carmelita is with the early risers and Bettie is on second. . . . Charlie Laymon now calls himself the "Admiral of the Fleet." Fleet of dies for repair, that is. . . . Frank Brohman was going to start redecorating his house April 1, but he decided it was too close to "that" time so he's going to start in May now.

Design Engineer Receives Patent

A. F. Ordas

A. F. Ordas, design engineer in Motor and Generator Engineering, Bldg. 31-2, has recently been granted a patent on an improved type of stator core utilizing random wound coils. The new stator core has slot openings which are initially wide for ease in winding and may thereafter be closed to any desired degree to provide characteristics of a closed slot construction. This is Mr. Ordas' first patent.

After obtaining his degree of B.S. in E.E. from the University of Illinois in 1935, he attended Massachusetts Institute of Technology in Boston where he obtained the degree of M.S. in E.E. in 1937.

Mr. Ordas began working for G-E as a student engineer while attending M.I.T. in 1936. He has worked in the Induction Motor Engineering divisions at Lynn, Schenectady, and Oakland.

From the Oakland Works he was transferred to the Motor and Generator Engineering division at Fort Wayne in February, 1939, and has been associated with that division to this date.

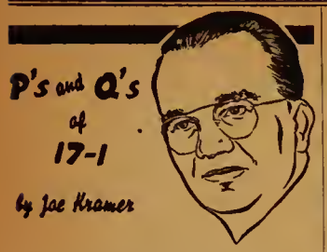
Mr. Ordas is married, has two children, and resides at Huntertown, Ind., R. R. 1.

Elex Club Announces Niagara Falls Trip Open to Non-Members

The Elex Club's Niagara Falls trip, June 11 and 12, has been opened to non-members. The fare is $33.50 for non-members, while the cost for members is $31.50.

The train will leave the Wabash station at 1 a.m. Saturday, passing immigration and customs at Sarnia, Ont. The girls will stay at the General Brock hotel, and have free time until Sunday afternoon. Then they will go on a sight-seeing trip of the various points of interest at the falls. They will board the train at 3:15 p.m. for the return trip to Fort Wayne.

The excursion rate includes round-trip railroad fare; two meals enroute; hotel accommodations, two to a room; bus to hotel and train; sightseeing tour; bridge tolls; tips, and handling of baggage at the hotel.



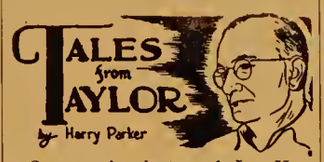
Reservations, with a $5 deposit, can be made at the Personnel offices at Broadway or Taylor St. The following information must be given when making reservations: Name, address, age, birthplace and marital status. Naturalized citizens must have their naturalization papers. Everyone must carry some means of identification for customs officials.

Eveleen Bennett is thinking of raising her own orange trees so that she will have all of the juice she can hold. . . . We are happy to hear that Marvelene Butts has taken her husband home from the hospital and that he is doing nicely. . . . Wanna buy a pig? Hugh Reynold does. He is going around buying up all of the little fellows that he can find. Smart fellow, that Reynolds. . . . Pres Slack and Howard Schultz are real farmers now they are both buying tractors. Could it be just spring fever or do they have that much acreage. . . . Paul Traub was seen observing very closely a rug-cleaning demonstration Saturday. Do you suppose that he is going to use that knowledge himself or pass it onto Mrs. Traub. . . . We were already to send booties to Walt Kryder when we found out that the new baby at his house was not a baby at all but a calf.

Bill Ort's dream of making a hit in the Easter parade vanished the other day on his way home from the cleaners with his new gabardine suit. He was also carrying a bottle of Clorox. It kept slipping from his grasp and he regained it a few times but finally it got away from him, crashing on the sidewalk. Bill's only hope was that the protective bag might save his suit but when he arrived home he found the worst had happened and the trousers were definitely a polka dot pattern of many different sizes. . . . And speaking of clothes, the paper skirt Joan France wore out of here one evening last week was only to protect her pleated skirt from the rain, not the start of a new fad. . . . Velma Smith has left us. She and her husband have bought a farm near Bourbon where she expects to be plenty busy. . . . Joe Trentadue gave the wrong information about the concert for last week's paper. It was held last Sunday, April 3, instead of next Sunday. . . . We were glad to see John Craig able to be in to see us last week. Hope it won't be long until he will be well enough to return to work. . . . Bill Shuler was a leetle mite unhappy while in Chicago last week-end. He couldn't understand why he was picked up by a traffic cop and fined $20. All he was doing was speeding, driving the wrong way on a one-way street and running a red light. The law sure doesn't have a sense of humor. . . . Erna Mann also spent Saturday in Chicago, where she did some shopping and took in a couple of stage shows.

There has been much said in the way of comments on the use of this column to advertise the wares of the farmers in the south end of Bldg. 17-1, such as Mike Kramer's and Ralph Beerman's livestock, Clarence Doctor's tomatoes and Paul Geiger, the great corn king. Now a new addition Kurt Hartz is looking, not for livestock or poultry, but fertilizer without so much sand as a filler. . . . We have a request to devote more space to the raising of gold fish. If anyone can furnish information on the subject, please direct answers to this column or to Mary (Pete) Gerhard. . . . Ralph (Pop) Beerman was passing out cigars marked "Baby Boy." It is rumored the boy will be named Randall Poe. Congratulations to the new mom and pop. . . . No, that isn't a new girl in the office. Ruth Meeks just lost a battle with some of that stuff called henna rinse. At least, Ruth didn't try to blame it onto a heat lamp. What say, Helene? . . . The April Fool joke they tried to pull on Ernie backfired. Ernie knew all along that he hadn't packed a hard boiled egg in his lunch Friday morning. Ernie says, "Try again, fellows." . . . Speaking of eggs, we wonder who the "Goldie Lock" individual was that gave Frank (Nature Boy) Martin a soft boiled egg one noon. . . . Cliff (Tidy) Combes was serenading the fellows in 19x72 group by singing the well known "Happy Birthday" song. . . . Ed Brosche, the well known play boy of Bldg. 17-1, furnished the appropriate toupee for George Mosshammer to wear for his retirement picture. . . . George Kaade suggests that a klaxon be put on the hand trucks to make the people who block the aisles move. . . . Question of the week directed to Ermond Tickel: What are wind breakers? . . . The honor of the greatest story teller in Bldg. 17-1 goes to Howard Reinking. . . . Advance notice to the baseball teams: Elizabeth Love and Agnes Cordes were seen practicing up for the coming season. We wonder who baked the cake they were using? . . . Congratulations to Verna Meyers. She won $30 in the mink counting contest. . . . There are some people that believe that the string used for holding pearls could be made out of steel rather than fine thread, especially when the thread breaks and the pearls go all over the floor. Betty Sue Morris said she really had a hard time trying to find her pearls. . . . The pass word now being used by the husbandry men in the south end of Bldg. 17-1 is "Have you got your oats sowed yet?" . . . We are wondering if that trip that E. P. Tickel took last Friday to see Ed Kronmiller in such a big hurry was absolutely necessary. . . . Meriam Valentine gave us a new excuse for being late. It wasn't the failure of the alarm clock to ring, but it was due to the battery being dead. You should quit playing the car radio so much, Meriam. . . . The signs of spring in Bldg. 17-1 office brought out when Addie Masbaum and Tavie Popa put flower displays on their desks. . . . Harold (Red) Braden, or maybe we should just call him the golf-playing Braden, just can't wait to get out and swing those clubs. He was seen in the wash room practicing with the broom handle. . . . Just 16 more weeks and vacation starts. From the looks of the maps and folders floating around Bldg. 17-1, you would think it was next week.

Effie Wyatt Honored At Luncheon



Effie Wyatt, FHP Motor Div. 14, retired Friday, April 1. A luncheon was given in her honor at the Taylor St. cafeteria by her friends and co-workers. She is shown above receiving the luggage given as a farewell gift. At the presentation were (l. to r.) Dale Irwin, Clara Lake, Effie Wyatt, Kathryn Erwin, Mable Staley, Ethel Evans, Beulah Hogle and Mildred Orr.

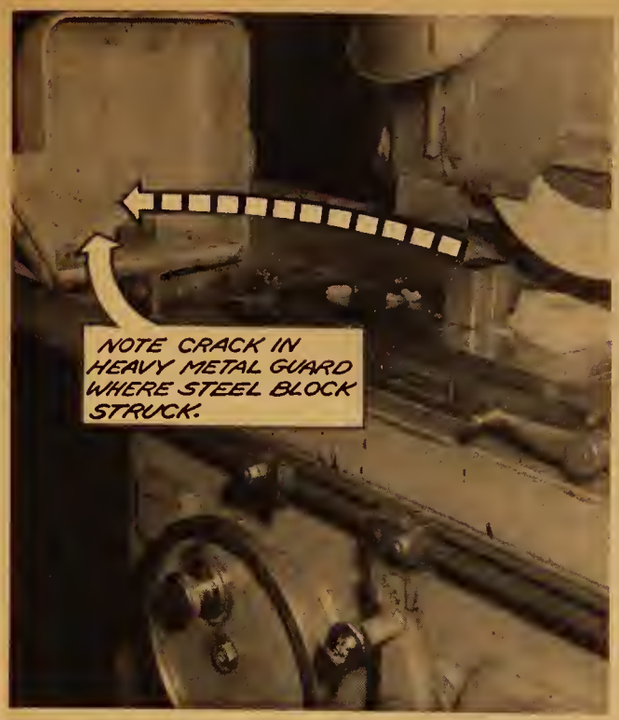
ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

Russell Neireiter, well known in municipal and lodge circles at Poe, Ind., lists electrical house wiring among his many accomplishments. Russ says if he wires your house he'll guarantee you'll never be bothered with light bills again. . . . We wonder what Charley Dixon and Jim McClain plan to do with all the profits they'll make on hogs that they intend to raise this summer. . . . For shame, girls! Last week we appealed for only one girdle for Art Swain, Jr., but not even one did Art receive. Surely, among the thousands of female employees, one or two could spare an oversize girdle for Art. . . . George Foerster returned to work last week after being off because of a prolonged illness. . . . Famous last words: "Take my thimbles, for instance," Harold Mundt. . . . Frankie Enderle (Oops, we forgot that he was not to be mentioned in this column, ANY MORE,) admits to having fallen down a flight of stairs recently, but refuses to divulge any of the details of where, when and why. . . . What was Daisy Rickford doing sitting in the aisle of a Broadway bus, one day this week? When the bus makes a quickie around a curve, better brace yourself next time, Daisy. . . . We're glad to hear Florence Weimer is improving. . . . Stan Stults has the urge to go fishing, so he jumps in his little bus and goes to Waldron lake. He caught 25 pounds of carp; at least he tried.

One evening last week Leo Herber was observed in a local used car lot looking at a light delivery truck. We have no idea what he wants with it unless he is going to do ash hauling on the side. In this case if any of you have ashes to be carted away this spring, you had better see Leo and get your order placed early. . . . Last Sunday at church Willard Hull hung his overcoat containing his house key in the cloak room. After services he returned to the cloak room for his coat, putting it on he and the Mrs. proceeded homeward; arriving there he felt in the pockets for said key which was not there. Taking a good look at the coat he discovered he had taken the wrong one. So he got back into his famous old Kettle and drove madly to the church. He arrived just in time to see some other man putting on his benny. . . . Last week while "Popeye" Patterson was busy with bowling activities Fritz Bergman had to pinch hit for him and was a very busy man. He seems to like the nickname of "Popeye" and is wondering if he might annex it for himself. He told Phil Schoppman it sounds much prettier than "Baldy." . . . James Goins was told by someone, we cannot recall just who, that if you held a guinea pig up by its tail its eyes would fall out. Jim said that he did not know this but would ask his wife who has had experience raising these little animals. We would wager a bet that his wife gave him a horse laugh because a guinea pig does not have a tail. . . . Mable Miller and her husband have purchased a home on Baker St. and will soon move to this new location. She was telling us all about it the other evening and said that in the basement was a vehicle that resembled a chariot of the type used by the Roman gladiators. She is going to have it reconditioned, purchase a span of horses, then she and Art will take their evening constitutional by racing up and down that thoroughfare. . . . Now that Bill Sivits had all of his teeth out he finds it very difficult to hold his pipe in his mouth. He has to support it by hand. He is now trying to get a general service man to construct a sort of halter made out of heavy wire that will fit on over his ears, thereby supporting said pipe and leaving his hands free to do other things.

Apprentice BROADCAST



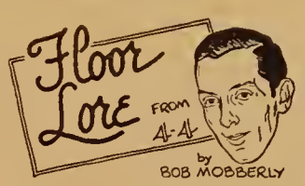
By Mildred Ellis

In the springtime a young man's fancy turns to — softball. Ev Schmidt and Don Miller have very generously offered to get this year's team in shape, for free. All they expect the team to do is dig up and haul away all the excess dirt in the yards around their new homes. They will even let the team keep all the fish worms they find. . . . Since Dick White is busy week-ends cutting wood on his new property, we don't hear many big fish stories on Monday mornings, but now he has something to show for his efforts. . . . It's not that Leffers has gone to the dogs—they keep coming to him. M and G pets seem especially fond of John. . . . Speaking of dogs: On one of those nice days last week it seems that Birkenbeul's feet were too warm so he slipped his shoes off. He claims his shoes disappeared. Really, Bob, don't you think you're a bit too old to be running around barefooted. . . . Mr. and Mrs. Robert Zollinger are the proud possessors of a new Mercury. . . . Why is Donald Konow always so eager to run errands when they are to Bldg. 18? . . . It makes us sad to see Kenny have to don an apron and go back to work. . . . Dick Sebold is back on pension again. . . . We bragged on Warren Brown getting to work on time too soon, he had another bad week. Some one had better re-set that "old rooster," it must be running slow again. . . . Mark McNulty bought his little girl a tricycle for her third birthday. Now he is wondering why he couldn't buy a basket for it and let her go to work delivering groceries. Mark "claims" to be Irish! . . . Stoup would have more time to spend with that certain someone in Danville if Ron Allen would give that old Ford of his some vitamins. . . . Birthday greetings to Merle Aughinbaugh. . . . Did everyone see Dick Wagner and Art Rasor's picture in last week's WORKS NEWS? They were on the team that won the Interdivision Volleyball Championship. Congratulations, fellows. . . . Last Friday Bob Barnes' daughters played the old trick of mixing sox. At noon Bob became aware that he was wearing two different kinds of sox. We hear that Homer Carson also fell for the same trick. "Wake up," fellows. . . . Donald Miller found out (the hard way) that cardboard sandwiches are quite filling but not very tasty.

Andy Anderson came into work last Monday morning feeling pretty good after his long trip to Atlantic City to bowl in the ABC. As a team Andy didn't do so good, but by the time the singles rolled around he was ready to cut loose. His first game was 223 and ended up with a big 611 count. The reason he feels so good is that in his first ABC tournament he collected. Next year it will be in Indianapolis and already Andy is making plans. . . . Clark Holmes also took a trip east. He didn't take his bowling ball along, as he says this is his off year; Clark went to Washington, D.C., to see the cherry trees. We are still waiting for him to get back so he can tell us all about it; no doubt he will have some tall tales, such as "Harry wanted him to stay for dinner." . . . Marguerite Stahl's mother has been ill, so last Saturday Marg went over to her mother's house and baked her a cherry pie. Marg is now known as "pie face Stahl." . . . Jimmie Lynn has the latest Busco turtle tale. Jimmie says he was up to the lake last Saturday and saw a team of horses pull the turtle out but while the fellows were arguing where to take it to get it weighed it crawled back in the lake. . . . Newt Melching drove his truck to Bluffton the other day. When he had finished shopping, Newt went back to where he had the truck parked but no truck. If you see a truck going around without a driver, please grab it and bring it to Newt; he doesn't like to walk. . . . Congratulations to Laura Schroeder. She celebrated her birthday last week by passing candy. . . . We sure missed Dorothy Heinzelmann (our editor) last Monday, we hear she has a cold but until she gets back we'll have Butch Witte pinch hit for her. . . . We are wondering why Francis Walker didn't put her little dog through her tricks Saturday night. . . . Those attending the wedding of Jerry Fry at Zion Lutheran Church Saturday evening were Jackie Elder, Peggy Bandt, Gladys Pantizen, Ruby Stoops, Marguerite Stahl, Elinor Laux, Francis Walker and Selma Voight. Selma was Matron of Honor. We sure wish Jerry a happy life. . . . We were all surprised to see Selma Voight at work today. We thought sure she was on her way to Chicago.

Grinder Operators....

. . . . . WILL ESPECIALLY APPRECIATE THIS STORY.

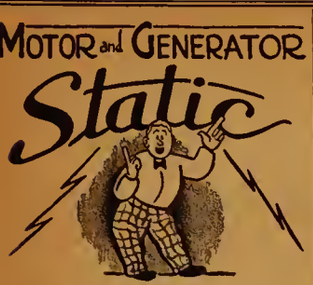


The above picture, taken in the Apprentice School, depicts a no-injury accident; however, there could easily have been one if the GUARD HAD NOT SERVED ITS PURPOSE SO WELL. It stopped the steel block shown under the wheel with parts of the broken wheel involved in the accident. The block was not properly secured, consequently, when contacted by the rotating wheel it was thrown against the guard. The grinding wheel was also broken in several pieces.

INCIDENTS LIKE THIS PROVE THE INDISPENSABILITY OF GUARDS AND OTHER SAFETY DEVICES TO PROTECT US FROM HUMAN ERROR.

HERSCHEL L. SMITH
Safety Engineer

Alva Vorhees says he is getting younger every day. He must have borrowed Carl Fisher's educational scientific magazine. . . . Pete is interested in the new Nash. He had his mind made up on a Cadillac but changed after finding a wonderful extra feature. . . . Yes, Marcia Martin, it is not so good to work without gloves, so let us be more careful on remembering where we put them. . . . You'd think we were in the North Pole the other day when Sherm Zimmerman came to work in his winter coat. You can put your coat in moth balls, Sherm, you probably can get along without it several months. . . . It's about time Paul Gause's name is mentioned. How about something for the News? . . . Mina Lampy, tires flat on the bottom are flat also in 30 miles an hour zones. Say, Mina, your new Nash is sure a super model. . . . Pete Koenig can even crack hickory nuts with his teeth. Those new molars look like super sure grip performers plus that new deeper bite. . . . The next time you lose your dinner, Alma Fruchte, you may not be as lucky to recover it so soon. . . . Chicken Gumbo Soup — m-m-m-m — Geo. Womack sure loves it, after midnight or anytime. . . . That beautiful floral birthday present from Mrs. Waltke to Mrs. McBeth sure was thoughtful. Happy birthday. . . . Dale Harshman sure is a model farmer, if anyone can get a Berkshire hog to lay down by tickling his ribs, he has farming mastered. Do you furnish music for the cows and chickens? They say it increases milk and egg production. . . . Leonard Meyers and Alton Andrews were last week's birthday victims. . . . Let us add the Schurgers to the list of proud parents. Johnny, the baby boy's father, works in the Test section. Congratulations. . . . Anyone needing insurance, see super salesman, Arlo Lehman. . . . The night KH Line want to know how Don Morrison can get so much grub in such a small sack. . . . It would be a good idea to adjust your working fixture on a pedestal, Junior Lake, instead of cutting a hole in the floor to fit your work. . . . The new super micrometer in Ralph Stanley's office sure is a wonder machine. Don't let us get any slips on it, Ralph. . . . Fannie Amstutz of the KC Line has been on the sick list. She is reported recuperating very well from her recent operation. . . . Germaine Straub has taken up household duties full time; her successor on testing is Evelyn Plasterer. . . . Louis Drake has been sighted once more in Plant 2. . . . Let us try to remember our sick friends. Did you send that sick card to Warren Kleinknight, Russ Weldy, and don't forget to drop Ann Murtaugh a card. We all know she had been our nurse and has been on the sick list some time. . . . If you see a new copper uptown it probably will be Maurice Teeple. He was appointed to his new position a few weeks ago. . . . Well the Saints be presarved, if that "Ole" McDougal just hasn't gone and got himself a 40th birthday. Yes, sir, Mickey has now entered the place where life begins and it all happened March 30. Lots of luck, Irishman, and we hope you can live for another 40. . . . I always told you that Fisher would have trouble with that Plymouth. Do you know that last week the old cat was in the top of the garage and had no place to jump down, so he just naturally jumped down on the top of the old Plymouth and right through the top. . . . Clarence "Riggy" Geisler was off last week with a sore arm, but he'll be coming back soon. . . . Talk about identical ailments, Okeleah Stetler and Iola Hamrick were carrying around wrapped up fingers last week. I hope they get well, girls. . . . And do you know Henry Krueckeberg has at last traded off that bright shiny Chevy. I think he is getting a brand new Pontiac. I'll bet it isn't nearly as good as the Chevy. What about it, Henry? . . . Say people, if you would accidentally want to see your old friend Joan Oliver Workinger, all you have to do is drive out to Coppes Corner and there she will be. Believe me she is doing swell for an old married woman. Hi, Jo! . . . It is rumored that Warren Harden is casting his eye on a new Chrysler. . . . And if you want to subscribe for the Sunday Journal see Pete Fairchild and he will deliver it to you in his Merry Oldsmobile. . . . And speaking of new car owners, we shouldn't forget to mention Wilbur Fuelling and his new Ford, . . . Winter is over and now Pauly Myers' worries are over. Yeah, he won't have to be pulled so often and Jake Eady will save on his gas mileage with that Yaller Hudson. . . . Mel Baumgartner, who recently underwent surgery, at the St. Joseph Hospital in Fort Wayne, is recovering very nicely at this time and is able to receive visitors. Come on, Bummy, we would like to see you. . . . April 1 passed by and there weren't too many pranks pulled on any one. We understand Eloise Noll was one that happened to get fooled. . . . It seems Jim Staley has a new way of playing euchre, after he has the first two tricks in he throws in his hand. For further details see Jim. . . . It never fails, Dorothy Schnepf washed her car again and it rained. . . . Mr. Welch and his family have moved into their new home at 133 Porter Vista. We hope you will like living in Decatur, Mr. Welch. . . . Esther Meyer is an aunt for the second time and is quite proud of her sister's new baby. . . . Joan Liechty and her husband celebrated their third wedding anniversary (three months that is). . . . Everyone is giving Ray Leitz advice as to what he should do with his car since he has been having trouble with it. . . . There was quite a group that attended the concert given by the Westminster Choir at the Quimby Auditorium last week. Those that attended were Mr. and Mrs. Paul Hancher, Mr. and Mrs. Ray Leitz, Mr. and Mrs. George Myers, Mr. and Mrs. George Roop, Mr. and Mrs. Richard Steele, Ola Kistler, Eloise Noll, Martha Myers, Tom Haubold, Dorothy Schumm, Millie Geimer, Mary Ann Laurent, Mr. and Mrs. Dave Embler, Mr. and Mrs. Dan Foreman, Harriet Pollock and Madge Jones. . . . We offer sympathies to Al Schneider, whose mother died recently. . . . The body of PFC Robert Holloway who was killed in the Battle of the Bulge, was recently returned to Decatur for burial; our sympathies to the parents, Mr. and Mrs. C. Murray Holloway, both of whom are employees at Decatur Plant. . . . Russell Weldy visited the plant last week, while on a short leave from the Veterans' Hospital at Indianapolis. We enjoyed your visit, Russ.



April is noted as a variable month, a month of many changes and surprises. And so is today, we arrive back in print with our former column, after several weeks' absence, with news and briefs of the members of the Repair and Return section. . . . We extend a sincere wish for the speedy recovery of Bill Putt's father, who recently underwent an eye operation. . . . In the future we believe Nena Foster will heed the weatherman's report! Nena had her wash on the line last week complete with several pairs of silk curtains. She was expecting her parents home early enough to take the clothes down should it begin to rain. Our last report Neva was feverishly telephoning home every few minutes to see if her parents had arrived home, and worried about doing the wash all over again. . . . Ray Schuckel hopes that henceforth Leon Rademaker can remember the stories exactly as Ray tells them. They just don't have the "Schuckel punch" unless they are repeated word for word, Leon! . . . Don't say we didn't warn you, Edith! We said you should eat the box and throw the raisins away — Remember? We're all sure you would be money ahead. . . . Speaking of jokes, we witnessed an "anti-Dal Smith joke gadget." Come now, fellows, those jokes can't all be that bad! . . . At a distance it appeared to be a gate-legged table. But as one reached the scene, it was Clara Heaston and Ruth Lange trying to pick up a penny, which had been nailed to the floor as an April Fool's joke. . . . Attention to lookalike fans: The Smith named Raymond bears a remarkable resemblance to the President. The second shift has begun calling him Harry and are awaiting the day he wears a bowtie! . . . June Martin knows that some people would walk a mile for a Camel, but in her case the party merely walked to her bench! . . . Ed Bowser has added the word "chum" to his vocabulary hut the recipient of the term doesn't appreciate it. Perhaps you should get a Smoo, Ed. . . . Don't get excited folksies—you're not having your picture taken; it's just "Franky" Fogwell "blowin'" a fuse! . . . Bill Putt really should appreciate this nice spring weather. It should give him a very good chance to break in that new Plymouth he got last week. . . . Our parting thought: The man who has nothing to boast of but his illustrious ancestors is like a potato—the only good belonging to him is underground.

Delfs Retires After 31 Years

George M. Delfs is shown above getting ready to pull a switch for the last time at the powerhouse before leaving on retirement Friday, April 1. He has been with the General Electric Company 31 years.

Thought for the week, "Being kind is like a boomerang. It comes back to us. Our kindness changes the whole world for the better." . . . We are sticking to what we stated last week regarding the Mystery Melody, "Saint Paul's Steeple." . . . Big John Gianoulis, president of the Fort Wayne chapter American Greek Society, had the honor of serving as best man at a Greek wedding. The happy couple came from Toledo, Ohio, just to have Uncle John serve. Alex and Harry Makraes say it was the best wedding they ever attended. . . . Do you ever take time out to read the historical message on the back of your weekly pass? I wonder. The bigger a man's head gets, the easier it is to fill his shoes. . . . Doris Olinger requested that the following death notice be published: Albert Louis Gater, her pet alligator, was found dead in bed April 1. Friends please omit flowers. . . . Art Druce says he can't understand some people. Frank Rathert and Art Druce are buddies of sorts. The other evening the boys stopped at a downtown store to make a few purchases on their way home. Frank, being a shrewd buyer, took exception to some prices and started to argue with the cashier over a few pennies difference. As the argument increased in tempo Mr. Rathert became excited and laid his wallet on the counter. When the dispute was settled to someone's satisfaction, Frank, in not too good a mood, left without picking up the billfold. Art, who was next in line, noted this oversight and picking up the wallet placed it in his pocket. After they arrived at the bus stop Frank placed his parcels on the sidewalk and started searching his pockets. "My wallet is gone," he remarked. "My, my," murmured Mr. Druce, who with a sympathetic look on his face watched Frank practically disrobe himself in the search. When Mr. Rathert had given himself a thorough going over and was ready to return to the store to continue the hunt, Art handed him the missing wallet. "Can't understand," says Art, "he didn't display the proper spirit of appreciation." . . . Dick Hobson, the reporter's delight, did nothing we can publish this week so his name must remain out of the NEWS. . . . Marion Bailey, our golfer of note, shot a trial round Sunday. The ground was so soft his tee shots were buried and he did his putting with a No. 9 iron. Jim Mitchell claims he carried a trench spade to dig his ball out of the ground. His score? None of your business! . . . "Pappy" Archbold has not made the news for quite some time. Can't understand what happened that caused him to reform and keep out of mischief. T'ain't natural. . . . Elex members from Bldg. 31-1 who attended the Easter party and supper were Mary Banks, Ruth Talbert, Mary Louise Foulks, Goldia Lutz, Beatrice Collar, Marilyn Keller, Edith Mennewisch, Irene Schaadt, Helen Huffman, Wanda Snyder, Elva Plattor, Edith Canfield, Geneview Wiener, Erna Eley.

Tuttle Honored By Friends

When Caryl O. Tuttle, Bldg. 26-1, left the Company last week for retirement, his friends in Transformer Div. 91 gave him a gift. Mr. Tuttle is shown opening his present. Left to right are John McMaken, Ruben Dewart, Delmar Dewart, Robert Miller, Samuel Rhoades, Doyle Miller, Raymond Farrell, R. V. Reed, Mr. Tuttle, Fred Thieme, Russell Aker and Glenn Robinette.

Ramblings 31-2

Last week Maurine Vetter was honored at a luncheon given at the Victory Club by the girls in the M and G Engineering division. Following lunch the girls presented Maurine with a lovely farewell gift. . . . Minerva Russell is taking a three months' leave of absence.

A wee bit late, as usual: Happy birthday to Rosemary Flenner, and also a big thank you for tbe delicious cupcakes she baked for us all. With such a technique I think Rosemary missed her calling, she should have been a baker. . . . Today we say farewell to Donna Grimmer, a newcomer herself, and hello to her successor, Beverly Springer. Beverly comes to Shipping from Regional Warehouse. Nice to have you with us, Beverly. . . . Now we know spring is here to stay. How? Cause "Dutch" Wilson was hauling in the big ones last Saturday. As you all know Dutch is our No. 1 fisherman, so naturally when those warm days arrive he gets out his tackle. . . . Helen Elbert was another individual who took advantage of this weather to do her housecleaning. As a result she has a very good case of aching muscles. Is there a bottle of linament in the house? . . . Herb Grueb has more trouble with handles than anyone we know. Seems that while rolling the lawn the handle broke in the roller. To remedy this he took the handle out of the lawnmower and put it in the roller. Now he's looking for a handle for the lawnmower. Life gets tedious, doesn't it?

We are sorry to hear of Merle Morkoetter's wife's illness, and sincerely hope she has shown some improvement at this time. . . . Our deepest sympathy to Donald Shoner in the death of his wife. . . . Our best to Ruth Luther, who left us last week, and a big hello to Pearl Coulter in the telephone room. . . . Leo Miller was quite perturbed one night when he was playing euchre with the boys. Off the record, folks, he threw the cards in the air and mumbled something about Ed Trabel falling in and coming out with a new suit on—or words to that effect. . . . Bob Hatfield picks the darndest places to fall asleep. Was the air a bit stuffy, Bob, or were you just catching up on a little shut eye last Friday afternoon? . . . Who else would stay up 'till 4 a.m. trying to figure out how the boys skinned you out of $3 at a poker game — nobody but Andy Frank. You just can't win fer losin' Andy, even when it is your lucky night. However, it would be a good idea to check with the calendar when it gets to be around April from now on, Chum. Fred Altekruse takes things pretty serious at times and last Friday was one of those days. It was a familiar sight to see Fred down on his hands and knees chiseling the pennies off of the floor that the fellows had nailed fast for April Fool's Day. . . . We're sure Mr. Greer must be proud of his young daughter, Jeanne Ann, winning a scholarship to Indiana State Teachers College. . . . Happy birthday to Frank Kilcoin and Don Stoneman. . . . After lodge meeting the other night, the fellows decided to get something to eat. Charlie Hartman was elected to pay the bill. Now poor Charlie only had a dollar and some odd cents in his pocket and found himself in quite a picklement. After being accused of trying to pay the bill with the waitress' tip and threatened with a stack of dirty dishes, each paid their own bill, and Charlie started breathing once again. . . . In case you didn't know, that's Walt Chaney without the mustache. Didn't last long, did it, Walt? . . . Glad to see Harold Smith back to work after being off because of illness. Seems someone saw him coming out of the Fort Wayne Tent and Awning the other day and thought it was quite a joke. Mr. Smith says it's no joke, he had a brace made to hang himself in every night—"Scares me," says Mary.

Ed Lauer has a new way of making coffee. He took the sink strainer from the green room and put it in the bottom of the pot. The people who drank the coffee said it had a real flavor, although it made them rather ill thinking about it later. . . . It so happened on April Fool's Day that someone nailed a nickel to the floor. Among the nickel grabbers for the day were Bertha Wollert, Jim McGill, Francis Nelson, Mary Odom, Al Mathieu, Helen Hunt and Louise Perry. Otto Fultz also tried to pick up a penny which was nailed to the floor. . . . What was the matter with Frances Batzner last Monday morning? She got off the elevator on the third floor, went to the clock to ring in, and even remarked how things were changed around. When it dawned on her she was on the wrong floor, she finally got on the elevator again and landed on the right floor. . . . We welcome Mary Carver back to work after a year's leave. . . . Darreld Hirshfelder got Oscar (the turtle) last week. . . . We hear Bill Crouse got a new toy, but a rather expensive one at that (a Pontiac). We wonder if he knows how to back it up yet. . . . Congratulations to Mr. and Mrs. Wendell Haflich on the birth of a daughter, Carol Dianne, also to Mr. and Mrs. Bob Enz, a daughter. . . . Fletcher Cumbey played an April Fool's joke on his kids. It was an empty gum package. Too bad he couldn't pick on someone his size. . . . Dick Moore is celebrating. His wife has gone to Baltimore for the week. . . . The boys would like to know why Glen Keck was chasing a bunch of sheep down the road the other night. . . . We wonder what the prescription is for Faye Russel's cough. . . . Ralph Smith has a new Plymouth and all you can hear him sing is "Far Away Places." . . . Jay Wickliffe wants to thank his co-workers for the kindness expressed during his illness. . . . Congratulations to Otto Braun who has worked with the Company 30 years. . . . Dorothy Halleck was transferred to the third floor. . . . Wonder why Martha Foelber didn't pass the candy she got last week.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, April 11, 1949

BROADWAY LOST AND FOUND

FOUND—Blue fountain pen in Lindley Ave. parking lot.

FOUND—Gold earring with brilliant sets and gold piece through the center. Found on west side of Broadway.

FOUND—Revlon lipstick. Found on Fort Wayne Transit Co. bus in front of Bldg. 18-Gate.

FOUND—Tie clasp on Broadway.

LADIES' SUIT—Black pinstripe, size 38; Junior suit, green, size 16. H-37255.

LA TOSCA ACCORDION—White, 120 bass. E-2627.

ICE BOX—White enamel, Econom-icer, capacity 100 lb. ice. Ideal for cottage. H-69685.

BOY'S SPORT JACKET—Girl's dress, skirt, coat, size 14. Bird cage. A-80365.

FIVE TIRES AND TUBES—550x16, real bargain. H-15645.

IRISH MAIL CAR—Or hand car, excellent condition. $5. A-1755.

CHILD'S SPRING COAT — Red; rain coat. Size 5, both $7. H-57155.

G-E MOTOR—Type KC, ½ hp, welded base. A-68274.

UPRIGHT PIANO—Bond, good condition, $50. H-66715.

WALNUT FINISHED DESK—And chair. H-57912 after 5 p.m.

G-E TANK TYPE SWEEPER — Girl's spring coat, size 10-12. H-75784.

WANTED

DAYBED—And mattress, or separate mattress. H-79386.

COLSON TRICYCLE — Three-wheel, chain-drive. H-46631.

USED TARPAULIN—Also approximately 300 sq. ft. lawn sod. A-75442.

TRANSPORTATION

WANTS RIDE—George More, from Huntertown, Route 3. Works for Gayle Stripe, Bldg. 4-2, from 7-3:30. Ext. 358.

WANTS RIDE—Don Carrier, from Paulding Road and Wayne Trace. Works from 3:30-11:48 p.m. Ext. 495.

Our deepest sympathy to the family of Paul Redmerski, Sr. Paul died Thursday evening, Mar. 31. He was an employee of the Tool division and a very fine friend of ours. . . . Cleo Crowe and the gang in the stock section have taken pity on Vaughn Sheets. They decided that he has finally proven himself and is now qualified to have his desk next to theirs. So that's just where it is. Everyone is now happy and in good company. After quite a lengthy discussion on "Which women are the easiest to get along with" a poll was taken. Gallup had nothing to do with it. Believe it or not Ripley. The married women came out on top by a very large majority. This should make you married girls very happy and give encouragement to others, especially those in the O.M. class. We forgot to tell you it was an all-man poll. Better give that swell hubby of yours an extra quarter to spend this week, girls. If you can't afford that give him an extra great big hug and smutcher sometime. . . . Lloyd Cowell is still off due to illness. . . . Jake Arnold is back and looking fine. . . . Harold Sorg paid us a visit and plans to return to work by the end of this month. . . . Seems like Wimpy Lemper is never satisfied. He gets 54 eggs a day. He still says they're only laying fair. You don't think they are ground out like sausage or by perpetual motion, do you, Wimpy? . . . Ray Anselman says he really enjoys helping his wife with housecleaning. Are you sure your thinking was straight when you made that statement, Ray? If it wasn't look out now she knows. . . . Al Eisenacker would be a hard man to track down. He also goes by waxy-wacky-baldy-soapy. Oh, we could go on forever. . . . Clarence Coulter's curbstone setter had six little puppies. One night last week one of them came up missing. Clarence looked high and low, finally he opened the refrigerator. There it was, Clarence's son had a hunch that daddy was getting ready to sell them, so he put one away for safe keeping. Good idea, sonny boy. . . . Last Sunday afternoon our good neighbor and former Cost Supervisor, Bob Meyers, his wife and their dog was seen in a scene something like this. Bob in his car coming from the corner ice cream parlor, hurriedly drives into driveway, and the garage. Next down the street comes the dog with a poke in his mouth most likely carrying the ice cream. Mrs. Meyers followed with her purse on arm who, no doubt had to pay. Here's what we think happened: Bob hurried home to unlock doors and set out the dishes and spoons so the dog could have the ice cream served by the time the Missus got home. . . . Congratulations to Harry Beltz, Elmer Hamilton and Vaughn Sheets on their wedding anniversaries.

Insulation News

Earl Gebert tried his best to catch an April Fool, but we were all too wise for him. He looked so disappointed when everyone failed to call their own telephone number Friday. Guess we're too smart in Bldg. 12-B. (At least that's what we keep telling them down at the office.) . . . Dorothy Baumgartner wants everyone to check if they have two pair of scissors. If so, the best pair belongs to her. She has been looking for them for two weeks. I hope she finds them soon, before we all develop a guilt complex. . . . Last week Bill Glenn became confused and thought he was the absent-minded professor. He accidentally left the keys to his desk on his key ring, which he locked in his car. Some say it is just absent-mindedness, some say to check a psychiatrist, but we claim it is just proof positive that spring is really here. . . . We extend a hearty welcome to Dorothy Lebrecht, who has joined the gang in the wood section. At the same time, we have to bid farewell to Edna Gage, who is leaving Friday. All best wishes and good luck, Edna.

We had the usual April Fool jokes last Friday. Even the mice knew it was April Fool's Day—must be educated mice. They ate all of Ted Gall's cookies and never even said, "Thank you." Personally I think they had only two legs. . . . Yours truly presented Mary Wright with an April Fool gift, a bunch of hay. Now Mary is debating whether to make an Easter bunny nest or share it with her stablemates. . . . The birds go south in the fall, but two birds from Bluffton are going to Florida for a vacation. They must be love birds and don't care what time of year it is. We hope Mr. and Mrs. Echrote have a very nice trip. . . . Glendale Rose arrived to take up residence at the Walter Kryders. She isn't a pink-bootied tax deduction, but is maroon and has hoofs. . . . Bill Martin wants to become a "Justice of the Peace" so that he can make a fee on the side. 'Smatter, Bill, frog-hair business bad these days? . . . Some people bring the most peculiar lunches. Kate Weigle came in the other day with a big sack of grass seed. . . . Bertha Furge was so anxious to go home, that she was seen carrying a coat hanger on her way out. . . . Jerry Snyder has been practicing "be kind to animals." The other day a little bird fell out of its nest. Jerry, to the rescue, fed it bread and milk. . . . It's a happy birthday to Minnie McCague. Helping her celebrate at Columbia City were Verna Bullerman, Fern Monroe and Eileen Steinacker. . . . New faces on the early bird shift include Tillie Nuttle, Verena Mitchell, Opal Longenecker, Mary Murphy, Evelyn King, Lenora Gillard, Nora Summers and Mada Caudle. . . . Sorry to hear that Thelma Oswald's husband is so ill. We hope that by the time this goes to press that he is well on the road to recover. Also Goldie DeLong will be off on our sick list. . . . We were sorry to bid Oliva Toor farewell this week. We will miss that smiling face. . . . Our sincerest sympathy to Nellie Bellamy in the death of her aunt.

Propaganda: The Squares are staging a minstrel show, "Plantation Capers," April 20, at the Civic Theatre. Dick Thomas and Bob Loveland are the "End Men." A question seems to have arisen in connection with this show, what is Frank Fleischer going to (be) do? . . .

Thank You: Esther Batchelder thanks her cohorts in the tabulating office for the cheery greetings and beautiful flowers, which welcomed her husband home. He had been a patient in a hospital in Cincinnati for nine weeks. . . .

Happy birthday to Mary Ellen Duer, April 5, D. C. Division; Jo Biddle, April 7, Renewal Parts Division; Pauline Meehan and Marjoric Bear, Payroll Division. . . .

Best Wishes: To Deloris Soule, who is displaying a new diamond on her third finger, left hand. . . .

Admirer: Everyone is wondering, especially Nina Andrews, who the man with the red mustache is, who so obviously tried to flirt with her last week. . . .

Good Luck: To Mary Hume and William Roney, who left Payroll last Friday. . . .

A speedy recovery to Arlene Dellinger, who is now recuperating from an appendectomy, and to Betty Garber, who is ill at home. . . .

Laughs: For a fine selection of moron jokes, contact Judy Clark's mental file. Ask Denton Manccke about his "Glorious Past." . . .

Losses and Gains: Developmental lost Teddy Neds to the AC division. "Buzz" Braswell left the AC division to continue test at Schenectady. Welcome to: Harold P. Kestner, a newcomer to the DC division. He came from Erie, and his home is in Houghton, Mich. Bill Jamison, Developmental, and Cary Creamer, Inspection and Test. . .

Mighty Mouse: Rita Strack, who was delivering mail to the Payroll section, was startled by a mouse which made another appearance later under June Gaunt's desk. Either the original mouse had an "awful" lot of descendants or it's time for someone to design a bigger and better mouse trap. . . .

Ernie Hix went with his daughter to have her tonsils removed. She came along fine, but Ernie almost passed out. The question is, who went along with whom? . . .

Blue Skies: The weather man finally 'called one' right and gained the confidence of H. P. Love. . . .

Latest Arrival: Robert Knepple is the proud papa of a 1947 Studebaker. . . .

We wonder if Hugh Stevenson believes that the gas which was in his car when he bought it will last forever? Or is he waiting for gas to come down! . . .

The DC division wonders if Walter Brake finished his wife's spring housecleaning while he was gone?

April Fool: Lela Omspach's face was as red as her hair when Mr. Joncs asked her about Glen Stapleton's check. It seems that Lela gave Glen Stapleton and Harry Balz envelopes with a piece of green paper enclosed made out like their checks, with "April Fool" on one end. Harry unknowingly gave his to his wife as usual.

Inquiring Reporter

WHICH OF THE G-E BENEFIT PLANS DO YOU THINK DOES THE MOST FOR THE EMPLOYEE?

NED TROUT

Bldg. 24

"I like the MBA as it is 'on the job' when you are off the job."

BELVA IMEL

Taylor St.

"It seems to me the Pension Plan is one of the best because it is a plan from which most everyone will receive benefits, especially since the age limits were modified. We all have to look forward to the time when we shall need some source of income and the Pension Plan is a guarantee of some income."

CHARLES W. STRONG

Bldg. 6-1

"I think buying Bonds on the Savings and Stock Bonus Plan is most beneficial to employees because taking money out of employees' pay each week is an easy way to save money; for when you get old enough to get a pension these bonds and stock will be very useful. When you are working every day, it is a good time to save for a rainy day."

HELEN M. FRANKLIN

Bldg. 4-2

"The MBA is most beneficial because it helps in illness—when you need help the most."

MARGARET KENYON

Taylor St.

"The MBA seems most important to me. In case of illness, the weekly benefit check helps out so much until one is able to return to work. The G-E benefit plans are all good."

G-E Bowling Tournament Schedules Are Announced

Schedules were announced today for the annual G-E Bowling Tournament to be held April 9, 10, 16 and 23 at the G-E Club bowling alleys.

Five-man bowling will be held on Saturdays, April 9 and 16, with squads at 3:30, 6:30, and 8:45 p.m. Doubles and singles will also be rolled these two Saturdays, with squads at 1:30 p.m.; Saturday, April 23, with squads at 1, 3, 5:30, and 7:30 p.m., and Sunday, April 10, with squads at 1, 3, 5:30, and 7:30 p.m.

The tournament has been sanctioned by the American Bowling Congress and all G-E employees and G-E Club bowlers are eligible. The deadline for all entry blanks was April 2.

Handicap will be 70% up to 1020 for teams, 420 on doubles, and 210 on singles with the maximum of 35 pins per game, per man. Eligibility has been based on each bowler's established average regardless of what alleys. Entries used the highest league average of 1948. Those with no average for last year used the highest league average as of April 1.

Bowlers can compete only once in each event.

Guaranteed first prizes are team, $85; doubles, $35; singles, $20, and all events (actual pins), $10. The G-E Club is furnishing these awards.

The schedules are as follows:

TEAM EVENT

Saturday, April 9

3:30 Squad

Strohs—Scotts Thurs. Owl.....R. English

G-E TO ENTER SOFTBALL TEAM IN HAM LEAGUE

The G-E Club will have a team in the Ham Softball League again this year. The first call for players will be Tuesday, April 12, at 7 p.m. in the G-E Club gym. Bill Schible has been named manager again this year, and Sam Baumgartner, coach.

Those players 35 years old or over who wish to play on the Ham team this year are requested to fill out the application blank below and send it to Bill Schible, Bldg. 20-1.

All are requested to wear gym shoes during the indoor sessions.

HAM LEAGUE APPLICATION BLANK

Bill Schible
Bldg. 20-1

I would like to apply for a position on the Ham softball team.

Name .....

Bldg. ..... Floor.....

Age.....

Home Address.....

Kraft Takes All-Events Lead In State Bowling Tournament

Eddie Kraft, Taylor St. Shipping section and playing for the Worthman Home Builders bowling team, took over the all-events lead in the Men's State Bowling Tournament at Gary, Sunday, April 3, with a 2,010 total. It was the third highest all-events total in state tournament history.

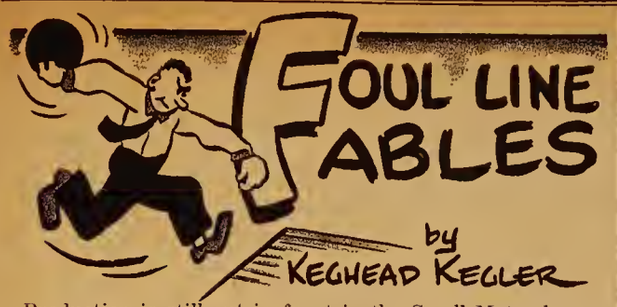
He missed a perfect game Saturday night by one stroke in the team event. Eddie missed a strike in the ninth frame, ending with a 279 game. This game put his team in ninth place with a 2,801 total. He then rolled a 688 series in the team competition Saturday, followed by a 635 in the doubles and 686 in the singles Sunday. These games placed him third place in that division. Eddie ended his singles bid with a 274.

G-E Club To Sponsor Boxing Exhibitions

A series of exhibition bouts has been offered to local city organizations by Frank Newport, G-E Club boxing manager.

Mr. Newport hopes to schedule an exhibition every two weeks to give the members of his classes an opportunity to display their skill. The bouts will include a few Golden Glove champions.

The first exhibition bout has been scheduled for Tuesday at 8:30 p.m. in the Local 901 club rooms.



Medical Memos

By Mary Heymann

"Spring fever" seems to be one of our main ailments these lovely, balmy days. After searching through our shelves of medicines, I can't seem to find any remedy. Who cares, anyway, as long as it's spring? . . . There will be no mention made of the recent bowling match. The girls on the team are weaving new hair styles to hide their ears which were pinned back! It was fun, anyway, and maybe next time it might be a different story. . . . We are living in a confused world, it seems. Even the Easter bunny was mixed up and called early in the Bldg. 8-1 Dispensary. Maybe he had been using a 1948 calendar. . . . The fish at Turkey lake had better be on their guard. Mabel Wilson will soon be going up there to catch some of those famous bluegills. . . . If the new Nash could only talk now it would probably say to Duane, "you got me fixed at last and just to show you how much I appreciate it, I won't even stop for red lights!" . . . First aid classes ended Monday with final exams and a potluck dinner. The classes have been very beneficial. It has been interesting to note the changes in treatment from year to year. . . . Remember way back when Dr. Garton, during an unusually busy morning when the telephones had buzzed almost constantly, put the stethoscope to an patient's chest and said "Hello?" . . . Joy that isn't shared with someone else dies young.

Myron Auer thinks that motoring is a very pleasant pastime except when you have two flat tires on one trip. Myron figured his trip a total loss until he passed a big Buick parked along the road that had run hot and was out of water, so "Good Deed Auer" brought the stalled car water. Myron ordinarily doesn't accept cash for these deeds, but in this case, the owner of the Buick forced a dollar onto him. Doesn't that make you boil, Myron? . . . We don't usually write about the boys on the fourth floor, but this is too good to keep. Seems that a lathe man was walking to the parking lot with Bernie Byanski. As usual, Bernie had the cigar in his mouth, but as he walked along the cigar jarred loose and fell to the ground. Byanski made a dive for it and started to smoke it again when a fellow worker said to him, "So that is where you get all those cigars." From what we gather, Bernie's face was a little on the scarlet side. . . . We hear that Herb Thiele is giving up cigarettes. That's hard to believe. . . . Cliff Clapesattle is in the market for a new casting rod, but he is still waiting for that Stoney Spinner that Roemer and Neukam promised to buy him. Better come across, boys, cuz he has witnesses to your statement. . . . All tree cutters see Nolan Lowden. Seems that he has a big oak tree on his lot that he wants cut, but doesn't quite know how. Clem Huguenard was trying to tell him, but Nolan didn't seem to think too much of his ideas, so step up experts and give. . . . Here is one of the oddities of the daily euchre game. Imagine, Henry Frey leading with his nose. As it happened, Hank was merely an innocent kibitzer, standing directly behind Eldon Moodie, who in a burst of excitement, swung a roundhouse with the ace of spades, right on Mr. Frey's nose. . . . The value of the penny seems to have made a gain, if last April Fool's Day is to be considered. Someone soldered a nail on a penny and as usual, everyone was watching to see who attempted to pick it up. Homer Meeker was the victim. Since he couldn't pick it or kick it, he immediately went to the nearest bench and got a hammer with which he removed the one cent piece and put it in his pocket with the rest of his April Fool's change. Homer believes the old saying, "He who laughs last, laughs best." . . . How to stop a trolley coach? Just make sure you have some tool room buddies standing by. According to Rufus Niblich, if they can't yell loud enough one of them will lay down in front of the coach to make it stop.

Production is still out in front in the Small Motor league. Lowell remains warm, as he had games of 227, 190 and 200 for a 617. Paul Boedeker had a 605 on games of 193, 205 and 207.

Two hundred scores: Walt Mertz, 212 and 200; Leo Elward, 205; Paul Berghorn, 204; Hinton, 213; "Slug" Lauer and "Sapp" Quinn, 201.

Office League

Blueprint and the Dickason Barbershop boys are tied for first with just two nights to go.

Bob "Sore Thumb" Blomker had the only 600 count, a 606 with games of 229, 185 and 192.

Two hundred scores: Bill Piercy, 212 and 232; Don "Elmhurst" Waldrop, 247; Bob Hanna, 222; Les Shroyer, 211; Bob Kallmyer, 207; Maury Cox, 205; Vic Rump, 204; Walt Nitz, 202; Miller, 201; Bob Knepple, 200, and Orv Doherty, 213.

Masonic League

The Ionic team is out in front by two games.

Two hundred scores: Lauterberg, 248; Boerger, 244; Miller, 236; May, 219; H. Smith, 218 and 200; Somerville, 206; Archer, 205, and R. Crabill, 203.

Transformer League

The M team is leading with 17 wins and 7 losses.

Two hundred games: Wyckoff, 201; Oberlin, 202; France, 205; Rogers, 228, and Lieberenz, 231.

Monday Night Ladies' League

Ethel Koontz lead the league with a 521 series on games of 187, 173 and 161.

High games: Justine Luyben, 187; Esther Muzzillo, 184; Pauline Hartman, 180; Margaret Fletcher, 173, and Nellie Wendt, 171.

Decatur Plant Bowling Leagues

Monday Night League scores: Cook, 263; H. Murphy, 225, and Laurent, 214.

Fraternal Bowling scores: A. Miller, 204; Babcock, 214; Laurent, 235, and Lord, 214. Lord got the high series with a 500 total.

Mixed Doubles bowling scores: Men, Laurent, 212. Women, M. Baker, 149, and B. Faurote, 247.

Bowling and Stuff

Still the hottest bowler in town is Ed Kraft, who shot the third highest all-events total in state tournament history over the weekend, a rousing 2,010 total. Ed just missed a 300 game by a ten pin in the ninth frame.

Bill "Willy" Doehrman after a dismal 445 in the team event came back to shoot a 676 in the singles. The Brouwer Screwballs warped the Motor-Generator Boys. It seems they are not the ones that get all the wood. We understand that they do have fun though.

Now's the time to sign up for your charter membership in the Fort Wayne Bowlers Welfare Association. By signing up now you can become a member regardless of age. After May 1, bowlers over 50 will not be accepted. Death benefits are $200 and sick benefits are also available. The bright side is that the dues are only $1. See your league secretary and sign up.

Tuesday evening Isabelle Hausbach found that it isn't so much the beauty of a thing but the sentiment behind the giving. A surprise party was given for Isie by the Purchasing section girls. She was given a corsage made with two old gardenias, a blown-up balloon and a wooden whistle. To confuse and excite her more, her gift was concealed in the balloon, but not to her knowledge. The girls had her go on a treasure hunt first locating notes hidden in the house telling her what to do and, of course, the last note told her to prick the balloon to see what she would find. Isie, being very skeptical, wasn't going to prick it for she had visions of the balloon being filled with water but, after a little coaxing, she pricked it and found a lovely scatter pin. Remember to always trust your friends and a happy birthday, Isie! . . . Last week Bob Henry had the advantage over lots of us. His wife was called on the "Keep the Music" program. She was asked about a tempo on a bolero. She was unable to answer correctly, but will receive a box of candy for six weeks from the Wayne Candy Company. "If you do not succeed the first time," they say, "try, try again." . . . Happy birthday, Mary Mickey. She received a beautiful corsage from the Requisition Engineering division. . . . Monday noon a potluck was held in honor of Theresa Lindenberg, who is leaving for Bldg. 26-3, and Isabelle Hausbach, whose birthday was Tuesday. The girls present were Phyl Fisher, Viola Brooks, Millie Kouder, Velma Meads, Ginny Winegart, Katherine Ernsbarger, Martha Newell, Vivian O'Neill, Betty Carter, Helen Brindle, Dorothy Bartholomew and Yours Truly. . . . Molly Hile never knows what to expect from the draftsmen. "Slippery" Pape caught a mouse, put it in a box and put it on Molly's desk. Wendell Miller opened the box, out of curiosity,-just as innocent Molly was sitting down to begin her day's work. To her surprise the mouse jumped right in her lap! . . . Barbara Dolson is quite the gal in the Engineering Division. To keep up with the latest style, she had her long bob cut. She is really becoming in her short bob, too!

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

The "Beast of Busco" had better look out now. If they don't catch him very soon, Ralph Dennison is going to take the fishing tackle sent him last summer and go try his luck. Mr. Dennison also has a hobby of toy auto racers. The hobby was started by his son but when pop became interested Dick didn't have a chance. We understand they do have some very classy fast jobs. . . . Fred Hagadorn had some beautiful pink sweetpeas on his desk the other day. Are you going to keep it up all spring and summer, Fred? We would sure appreciate it. . . . Anyone knowing a good name for a stray dog, see Peggy Turschman. It seems a strange mutt came to her house one day and she has tried every name she can think of and he doesn't answer to any. If you can suggest a name she hasn't tried she would be very happy to try it. . . . What's the talk we have been hearing about the "Strange Dark Man" in Thelma Stapelton's life? Don't keep it a secret, Thelma, tell us all about it. . . . Welcome to Bob Olson, who has joined the Wage Rate section for a few weeks. Nice to have you with us, Bob. . . . We are going to have to keep a closer watch over Francis Thomas from now on. It seems he got all the way home the other day and then discovered he had left the Ford back here in the parking lot. Come, come, Tommy, you are not that old. . . . Happy birthday to Melrose Bryson today, and to Louis Shattuck on April 13.

A real estate promoter is a fellow who buys outlying property by the acre and sells it by the yard.

Winter St. became the Interdivision Basketball league champs for the second straight season. Playing one of the best games of the year, they stopped the Firemen, 55-38. It was a close game up to the end of the half, but from there on it was all Winter St.'s show.

It would be difficult to pick out any one player as the star of the game. It was a nice bit of teamwork. Richardson's work under the basket was very good, while Tex Beneke and the Reitdorf brothers did most of the scoring. A lot of credit is due Gayle Griffith, manager and coach of the Winter St. team. Year after year he turns out winning basketball teams.

The Firemen, softball and touch football champs, came withiu one game of sweeping the Interdivision athletic activities. Bob Baals and Merle Morkoetter tried hard to provide the necessary spark to get the team off on one of its scoring paces, but it wasn't their night.

Box Score:

Firemen	G.	F.	T.	Winter St.	G.	F.	T.
Moody	0	2	2	W. Reitdorf	3	2	8
Stemmler	0	0	0	Kent	3	0	6
Morkoetter	4	2	10	Richardson	3	2	8
Etter	0	1	1	D. Reitdorf	5	4	14
Baals	4	4	12	Schinbeckler	0	0	0
Meyers	2	1	5	Fisher	0	0	0
Vance	0	1	1	Blauvelt	0	3	3
Lambroff	2	1	5	Gallmeyer	0	0	0
Somers	0	0	0	Bencke	5	6	16
Schible	1	0	2				
Totals	13	12	38	Totals	19	17	55

G-E Club Majors To Start Practice Tryouts April 14

Manager Perry Esterline announced today that softball players interested in trying out for the G-E Club Major softball team should report for practice at the G-E Club gym between 5:30 and 7 p.m. Thursday, April 14.

He stated that he would like to sign two infielders and one outfielder to fill key positions. He hopes to recruit these needed players early so he will be able to get off to a fast start in the league play this season. All of last year's players are to report for the first workout.

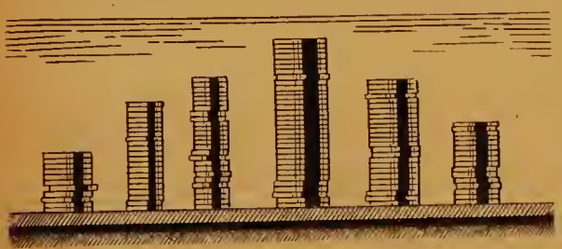
Manager Esterline stressed that all positions are open and can be filled by some hustling ball players. Any player desiring to play topflight softball this season is invited to be at the G-E Club gym Thursday.

Rumor has it some of the girls in the winding section are taking up bridge. Let's hear more about it. . . . Bertha Thimlar is interested in law these days. Wonder why? . . . Say, Al Colbert, if you pay 34 cents for two six-watt starters, how much does one cost you? We think you ought to do all your shopping at Murphys. . . . We wonder who Dean Smith has a pull with as he can get all the nails he needs to build with and all the rest of us can only get five pounds. Why don't you introduce some of your friends to us, Dean? . . . McKinney sounds as if some frogs have jumped into her throat, or is her voice changing? . . . Anyone getting an invitation from Louie Miller to visit him in his new home when he gets moved, be careful and not accept too soon; there is a catch to it. He says he is going to invite everybody he knows and then charge them a donation of a few groceries to look the inside over. That isn't such a bad idea, Miller, if you can get away with it. . . . If any of you people would like a new main dish for your menu ask Glenn Hobbs. He told us that when he was a boy he tried roasted grasshoppers but he said he didn't care for them. We always wondered what made you hop around so fast, Glenn. Glenn was also comparing grasshoppers with shrimp, and Millie (the shrimp eater) didn't seem to agree with him at all.

A REPORT to our employees and neighbors

The local operations of General Electric in Fort Wayne resulted in many favorable accomplishments in 1948. The payroll last year amounted to more than $32,500,000. More than $6,100,000 of services and supplies was purchased from local dealers and manufacturers. Our local taxes amounted to more than $525,000. But these are only a few of the highlights. Thinking that our employees and neighbors would be interested in the part played by G-E as a neighborly industrial citizen, we publish the following facts and figures from our 1948 diary of activities here in Fort Wayne.

PAYROLL—More than $32,500,000 in wages and salaries was paid to the General Electric employees in Fort Wayne during 1948, including the Broadway, Taylor Street and Winter Street plants. We think this amount of purchasing power played an important part in the economic well-being of the community.

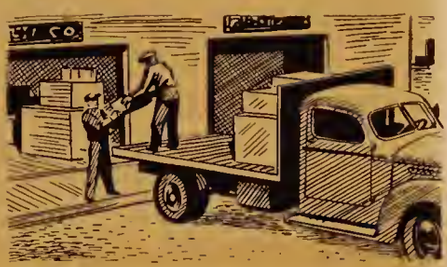


JOB DIVIDENDS—In addition to the wages and salaries paid in 1948, G-E employees also received extra "Job Dividends" in the form of: Pension Plans, Group Life Insurance, Mutual Benefit Association, Social Security, and education programs.

In addition, there were two new employee benefit plans offered to employees in 1948. The G-E Pensioners Hospitalization Plan which will provide hospitalization benefits for retired employees at no cost to them, and the Savings and Stock Bonus Plan which offers employees shares of General Electric stock.

One of our oldest Employee Benefit Plans is the Suggestion System. In 1948, more than $26,000 in Suggestion Awards was paid to employees for their suggestions involving improvements in their jobs, manufacturing methods, and working conditions.

A total of $76,000 was contributed by the Company to the support of Employee organizations, such as Elex Club, Volunteer Firemen, G-E Club, etc.



TAXES—A total of more than $525,000 was paid in taxes attributable to our local operations during 1948.

CONTRIBUTIONS—Employees indicated their desire to be good neighbors by their contributions of over $63,000 to the community sponsored social welfare activities in plant wide campaigns. It would be difficult to estimate the additional thousands of dollars contributed by individuals to church organizations and other groups in which they are personally interested. Company contributions were in excess of $20,000.

SERVICES AND SUPPLIES—To aid in the maintenance of our plants and the manufacturing of our products, General Electric purchased $6,100,000 in services and supplies from local dealers, manufacturers, contractors and public utilities. In this manner, we contributed to the maintenance and growth of local business responsible for the employment of many neighbors here in Fort Wayne.

EDUCATION—More than 2,000 employees participated in various company sponsored educational courses. These included apprentice training courses, cultural classes, sales courses, economic classes, business management classes, and many others.

In addition to the company-sponsored courses our employees helped local educational activities in every way possible through participation in the programs of city and county Parent Teachers' Associations.

We also made available to our employees and their children the benefits of our scholarship, fellowship and loan fund. Under this program, many students are encouraged to attend the college of their choice.

COMMUNITY RELATIONS—Our employees were good neighbors wherever community work was being done. Personal contributions of time and effort made to the local civic organizations was in keeping with the G-E policy that good citizenship demands an active interest in programs devoted to community betterment and advancement.

We wish we could say that our employment remained constant throughout the year, but this was not the case. Reductions in orders for our products because of a slackening off of the post-war demand caused a drop in employment below the previous year's peaks. However, at the close of the year, we were still providing many more jobs than pre-war. New product development made possible through the re-investment of profit created a number of new jobs and prevented employment from going as low as might have been the case. We sincerely hope that through 1949 employment will become more stable as we emerge from the uncertainties of post-war demand and production. We pledge our efforts to the accomplishing of this desirable end.

You can put your confidence in—

Hosanna to the Son of David! Blessed is He that cometh in the name of the Lord: Hosanna in the highest.

Matthew 21:9

Easter Sunday

My Faith Looks Up To Thee

My faith looks up to Thee, Thou Lamb of Calvary, Saviour divine!
Now hear me while I pray, Take all my guilt away,
O let me from this day Be wholly Thine.

May Thy rich grace impart Strength to my fainting heart, My zeal inspire;
As Thou hast died for me, O may my love to Thee
Pure, warm and changeless be, A living fire!

While life's dark maze I tread, And griefs around me spread, Be Thou my guide;
Bid darkness turn to day, Wipe sorrow's tears away,
Nor let me ever stray From Thee aside.

. . . Roy Palmer.

Company Acquires DeKalb Plant From War Assets Administration

Arrangements were completed yesterday for the purchase by the General Electric Company of the DeKalb, Ill., plant from the War Assets Administration.

The Company has been operating the plant since 1946 under a leasing agreement with the WAA.

Title to the plant was given to General Electric at a meeting held at the offices of the War Assets Administration in Chicago. The purchase price was $475,000.

Emil Peters, of the General Electric Company's legal division in Schenectady, and Clifton Duncan, DeKalb plant accountant, represented the Company.

The General Electric Company has been operating the DeKalb plant in the manufacture of fractional horsepower motors for use in domestic laundry equipment since Feb. 1, 1946, under a five-year lease with the government agency. In October, 1948, the plant was offered for sale.

The General Electric Company's bid of $475,000 was accepted, subject to the satisfactory clearance of several conditions of sale. These conditions have since been met by the purchaser which permitted transfer of the title yesterday.

Over $7,500 Is Paid To Suggestors During First Quarter Of '49

Over $7,500 has been paid for suggestions adopted during the first quarter of the year, it was revealed today by A. C. Hartman, chairman of the Works Suggestion System.

The quarterly report shows that more than 38 per cent of all suggestions submitted have been adopted.

In a comparison with last year, records indicate that 150 suggestions per 1,000 employees were submitted for the quarter; as compared with 123 per 1,000 employees during the same period in 1948.

"Never in the history of the Fort Wayne Works has there been more interest shown in the suggestion system," Mr. Hartman stated.

While upwards of 500 suggestions are processed each month, he

Elex Officers Plan Spring Conference

The Elex Club's Spring Conference of Officers will be held Saturday and Sunday, April 30 and May 1, at the Keys Hotel. Delegates from Decatur, DeKalb, Danville, Elex and Partizan Chapters will attend. Charlotte Stanford, Elex President, will preside over the meetings.

The Conference will open at 1 p.m. Saturday, April 30, with Decatur in charge of the dinner served at 5:30 p.m. in the Keys grill. The theme of the meal will be "Loo-Ah-OO, GeCode Style." Elex will have charge of the appointments for the May Day Breakfast at 10 a.m. Sunday. The two-day conclave will close at 2 p.m. Sunday.

Although the conference is primarily for officers, all members are invited to attend. The cost for

G-E Teamwork Averts Layoff Of Workers at DuPont Plant

Repair Of Anode Transformer Made In Record Time

A spectacular display of G-E teamwork here last weekend averted a layoff of employees at a DuPont factory in Pompton, N.J., it was revealed today.

An anode transformer failed last Friday at the DuPont plant, causing a complete shutdown of one assembly line and a reduction of 50 per cent in capacity. The anode transformer is a vital part of the factory's elaborate control system.

R. W. Beach, of the DuPont Company, immediately phoned Bob Schulte, of the local Works Service Engineering division, and informed him that the damaged transformer would arrive in Fort Wayne that night by air express. He needed it back at the factory early Monday morning, if he expected to resume production.

(Continued on page 5)

Captain of the plane and Otto Fultz, Production Supervisor in Bldg. 26-4, are shown loading repaired transformer for shipment to the DuPont plant in Pompton, N.J.

God's Proof All Men Who Believe Shall Have Everlasting Life

Christianity throughout the world is again privileged to observe the most reverent of all holy festivals—Easter Day—the day on which our Lord, Jesus Christ, was resurrected from the tomb, God's proof that all men who believe shall have life everlasting.

Each man, woman and child should rededicate his life to the preservation of the faith and love for which God's Holy Son lived and died on Calvary's cross.

As we go to our respective sanctuaries on Easter Morn may we do so with love in our hearts for all mankind and with personal humility for the Great Trinity, the Father, the Son and the Holy Ghost.

Human Society Would Be Wrecked If The Earth Failed

In Pearl Buck's "The Good Earth" famous best seller of a few years back she tells what the earth does for Chinese people. Well, when you stop to think about it the earth hasn't done as much for the Chinese as it has for us. Practically everything we have springs from the earth. Doesn't seem so at first glance. But what if the earth had ever failed us?

Henry Ford 25 years ago brought that thought out in the open and expressed it mighty well in these words:

"If the Earth had at any time failed, the basis of human society would have been wrecked beyond repair. But there have been seed time and harvest continuously, and though there have been local crop failures, never has a failure occurred that would have prevented the whole world's being satisfied if transportation conditions had been equal to the need. The Earth has always yielded enough to feed the people on it: the Earth goes on doing so year by year."

HUGH CRANE discusses Farm Crops and Price Support

NEW YORK—There is something rather absurd going on in Washington which every voter could do a little thinking about—and particularly every voter who works in a factory or machine shop.

I wrote you last week about how our good friends the farmers turned out bumper crops last year, more than anybody could use, and now seem likely to produce another bumper crop this year of everything from grain to cotton—also more than anybody is likely to take. So the government will take it, at taxpayers' expense, and what the government will do with it is anybody's guess. Dump it in the ocean perhaps, or bury it in a bunch of budget statistics. There won't be a market for it.

Why Such Big Crops?

The reason for the bumper crops is a simple one. Congress has promised the farmer that his grain and cotton will have 90 per cent of the purchasing power, per bushel or bale, that grain and cotton had between 1909 and 1914; and if he can't sell it for that, the government will take it. But since 1914 the American farmer has bought millions of tractors, combines, haybinders, and such-like machinery, has learned to use fertilizer and hybrid corn, has doubled his yield per acre and tripled his output per man-hour. As a result he is in almost the same position as the General Electric Company would be if Congress provided that it could get 90 per cent as much in buying power for its light bulbs as it got in 1914, and backed that promise up with a further promise that the government would buy at such price all electric light bulbs that G-E (or any of its competitors) could produce but couldn't sell to consumers at this old-fashioned price.

And this can go on. A big block of Congressmen want to continue this 90 per cent guarantee indefinitely. That would mean, with modern farming methods and with modern wage rates and farm-machine costs, surpluses every year, forever.

Taxes to Keep Prices Up

And these surpluses every year, taken over by the government, would mean that people who don't work on farms would every year be paying taxes to enable the government to take over surplus crops so as to hold up the price these people would have to pay for food at the corner grocers. Pa would be paying taxes so that Ma would have to pay more for groceries.

What should be done?

Give up all farm price supports? Not today. That's as old-fashioned as 1909-1914 purchasing power. Besides, farmers are people. Also, they have votes. And politics is "the science of the possible."

One idea a lot of people like is to keep the present price supports, but control the farmer's acreage. "A stick in every field." Henry Wallace tried that when he was Secretary of Agriculture. But there are a lot of things against it. First objection is that it would freeze production areas; California grows better cotton with less manpower than Alahama and would be crimped. The thing would work like a cartel to hamper the most enterprising farmers. Second, farmers would get around it. Acreage control is not production control. Good farmers could use better seed and more fertilizer. Third, it's un-American; it would kill competition.

Present Plan Is Best

The best plan in sight seems to be the one that's written into the law today. It says that after next New Year's, if a crop is too large the support price is lowered; if it's not too large, the support price sticks.

This seems to make more sense. It doesn't seem right for the government to keep on holding prices up at a level where they bring out more crops than we want.

But even this has one drawback. It's too bad that we can't seem to have anything fixed in this economic world. There would be a lot of advantages in a fixed price for, say, wheat, or corn. Like we used to have a fixed price for gold. Only nobody but bankers and hoarders cared about the fixed price of gold. It's a steady value for the dollar in bread, butter, eggs, meat and milk that really matters.

Easter Sunday

In the face of a child leaving church is reflected the full glory of Easter; in her radiant smile, her sparkling eyes, are the holy music and the reverent prayers.

Sandra, 3, is the little girl in the picture on the front page. She is the daughter of W. P. Schible, Bldg. 20-1.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q. Is it possible to shatter a glass vase by producing a certain sound?

A. Yes. It will shatter when stresses inside the glass exceed the breakage stress. The glass has a natural frequency, which can be found by striking it with the fingers to make it ring. A sound of the same pitch consists of air waves which are in step with the natural rate of vibration of the vase. Hence, each oscillation of the air molecules in contact with the glass give it a small additional push until it is vibrating enough to break. A sound of a slightly different pitch will soon get out of step with the natural vibration period, and then it tends to stop the glass from vibrating.

Meet the President

Sportsman's Show To Be Presented At Family Night In G-E Club Gym

Members of the committee in charge of arrangements are shown giving a demonstration in pantomime of a few of the sports activities that will be represented at the Sportsman's Show Thursday, April 21, in the G-E Club gym. The men and the sports they are demonstrating are: (Standing l. to r.) Al Tharp, casting; Oral Emrick, skeet shooting; George Hoopingarner, archery, and John McComb, target shooting. The man rowing the boat is Bill Hunt, chairman of the show, his passenger fishing out of the boat is Bill Skinner.

A Sportsman's Show will be the feature of the next Family Night at the G-E Club gym. The show is being sponsored at 8 p.m. Thursday, April 21, by the G-E Squares and Rod-Gun clubs.

Bill Hunt, chairman of the event, has announced that a hait casting exhibition has heen booked, with Art Wedler of Taylor St. doing trick casting.

Mr. and Mrs. Earl Anderson and Arthur Coe will put on a display of bow and arrow skill. Mrs. Anderson, formerly of Bldg. 4, was state champion several years ago. Mr. Anderson works in Bldg. 20-2.

The program will also include two films about fishing and handling of guns. Howard Miller will show the fishing movie. The Rod and Gun cluh has ohtained the film "Trigger Happy Harry," a safety feature produced by the National Rifle Association.

Besides the exhibitions and films, numerous displays of sporting goods will he sponsored by downtown stores.

Paul Perry has also obtained a photography display and the Rod and Gun Club will have an exhibit.

Squares Women's Div. To Elect New Officers

Election of officers and a speech on interior decorating have been planned by the Women's Division of the Squares Club to be held at 8 p.m. Thursday, April 21, in the Squares club rooms.

Candidates for office are:

President
Lucy Baker
Priscilla Margerum
Vice President
Edna Beard
Helen Stenberg
Secretary
Lorena Doherty
LaVon Cutshall
Treasurer
Peggy Johnson
Mary Lou Cooper
Member-at-Large
Jeanette Clarkson
Marion Fleischer

The speech on interior decorating will be presented by a representative of Haskell & Associates, Inc.

Games of bridge will complete the program.

Mrs. James Capps and Mrs. J. H. Flickinger are co-chairmen of the meeting. Their committee includes Mrs. Frank Ondrovik, Mrs. I. E. Ross, Mrs. Marvin Hamilton, Mrs. Forrest Gibson, Mrs. Don Reek, Mrs. B. A. Rohn, Mrs. Carl Paul and Mrs. I. D. Rinehart.

Top Floor Topics

DIVISION 95

By Walter E. Pohler

The other day we saw Buss Groves with his chest thrown out so far that all the shirt buttons were ready to pop. The reason, a new grandson. Congratulations, Buss. Any good 50 cent cigar would be appropriate. . . . It seems that the Ned Biddle family had a dog. Having decided that the dog would be much better off in the country, a good country home was located for him and he departed from the Biddle premises. After several days the dog was brought back to the Biddle home. Now Ned says the children and Mrs. Biddle got lonesome for the dog and that is why he was brought back. However, we are reliably informed that Ned is the individual who was lonesome. . . . Howard Winters had a birthday Friday. He wouldn't divulge his age, probably was someplace between 30 and 50 years. Happy birthday, Howard. . . . We finally have proof that Ruby Musselman is a hard-hearted woman. She and her sister had occasion to go someplace recently on the trolley bus. Ruby had seven cents and her sister three cents. Ruby took possession of the sister's three cents and rode the bus while her sister had to walk. . . . Loretta Bloom seems to have acquired the ability to determine the speed of moving objects by sight. Loretta and Velma Meads were visiting some friends who were burning weeds on a vacant lot. While observing the fire, a rabbit was seen running out of the brush at full speed. Loretta exclaimed, "Gee, look at that rabbit running 80 miles an hour." Then she answered herself with this statement, "I suppose if my tail was on fire I would run 80 miles an hour also." . . . During this Easter season we extend the following greeting to our co-workers,

A wish for you that Easter brings
A host of lovely, happy things,
And through the season may you find
A deep content of heart and mind.

God so loved the world that He gave His only begotten Son. Today, folks, is Good Friday. The day on which that first Good Friday, Jesus was crucified, died and was buried. He gave His all so that we poor mortal human and weak beings could some day obtain Heaven and be happy with Him forever. What more can a man give than He lay down his life for another. So, folks, meditate and pray today and every day asking God to forgive us for all the sins of our past lives so that we, too, may arise on Easter Morn happy and contented knowing that we are a friend instead of an enemy of a most merciful God. . . . A very Happy Easter to everyone.

INSULATION NEWS

Come one, come all! We hear that there will be no admission charged when Bob Martin's Kaiser challenges Jim Ward's Buick to prove which is the car of the year. We aren't saying which year, though. . . . For the "new look" in bandages, see Bill Lipp. They're a bit fancy, Bill, but mighty cute. With you as the model, we just know they'll be all the rage in the medical circles. . . . Prices may be coming down, but Bldg. 12-B is going up. Up to Bldg. 12-3, that is. Before too long, we hope to be right up there with the rest of the world. And we'd like to say (if you'll excuse the expression) "Come up and see us sometime."

The popcorn business has reached almost $200,000,000 a year—and that ain't peanuts.

Elex Officers

(Continued from Page 1)

the entire week-end is $8. For those girls not staying at the hotel, the charge is $4.50. The fee for attending the Saturday sessions only is $3.50, and for Sunday, $2.50. Reservations should be made today at the Personnel Offices in Bldg. 8-2 and Taylor St.

Supervisors To Hear Talk About Sports By Hilliard Gates

Hilliard Gates

"The Local Sports Picture" will be the topic of a talk Hilliard Gates will give at a meeting of the Supervisors' Club Monday, April 18, at 8 p.m. in the Squares hall. Mr. Gates is manager of Station WKJG.

P. A. Vance and W. H. Crouse are co-chairmen of the meeting, which will also include a magic show by M. L. Crouse, a business session, social activities and a huffet lunch.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Roy Rippe got Charlie Gable's suit coat on by mistake the other day. He didn't notice it until he went to push the elevator button and discovered he couldn't find his hands in the sleeves. After all, Roy, you are just a peewee compared to that big, long, lanky Gable. . . . Joan Liebig's sailor boy friend is back in town this week, and she has had a very hard time keeping her mind on her work. . . . Happy birthday to Everett Smith on April 18. May you have many more. . . . Henry Gollmer isn't going to wonder what to do with his spare time for the next few months. He started building his house last week, so his summer is pretty well planned for him. . . . Welcome to Ed Schlatter who has joined the raw material section from Div. 1. . . . The girls in the cost section had a dinner and theater party last week to celebrate three birthdays. Those attending were Norma Bastian, Ann Smith, Melrose Bryson, Marge Stodgell, Pat Dolan and Thelma Stapleton. . . . We understand Jean Harmes has been doing a little construction work at the lake over the weekends. When you are ready to take on other jobs, Jean, let us know and we'll see what we can find for you. . . . Eleanor Lambroff's engagement and coming marriage was announced in the paper over the weekend. Congratulations, Eleanor, and that was a very nice picture. . . . Hugh Neely would like to inform everyone that his basement wall is now in and they can stop worrying. It was a struggle, but he made it. . . . Have a nice Easter, folks, and remember it's a good day to go to church if you haven't been there recently.

ELEX COMPLETE PLANS FOR TRIP

The plans for the Elex Niagara Falls trip, June 11 and 12, are being completed. The latest information on the cost of the tour is that anyone having a railroad pass is permitted to use the pass. The fare for the pass-holders is $13.15 for Elex members and $15.15 for non-members. Children are invited to accompany their parents. Their fare is $22.35.

The train will leave Fort Wayne at 1 a.m. Saturday, June 11, and will arrive at Niagara Falls, Ont., at 12:30 p.m.

There has been a sight-seeing tour scheduled for Sunday afternoon. The train will leave the Falls at 3:15 p.m. for the return trip to Fort Wayne, arriving here at 12:45 a.m., Monday, June 13.

Over $7,500

(Continued from Page 1)

pointed out that the age of each suggestion—from the date it is received until the award is made—is slightly over three weeks.

Statistics also reveal that there has been an increase of salaried employees taking part in the suggestion system. An average of 44 per cent of the larger awards issued this year were paid to salaried employees.

Recipients of the largest awards during the first quarter of 1949 were:

John O. Haggenjos, Div. 17, $435; Joe Eifrid, Div. 17, $350; Roy E. Woods, Div. 15, $270; Russell Kryder, Div. 91, $180; Harold Gick, Div. 13, $145; Fred E. House, Div. 17, $115; George A. Lewis, Motor and Generator Div., $115; Mildred Fettinger, Div. 93, $105; Carl Clevenger, Div. 16, $105, and Robert Shirey, Div. 13, $100.

Sleuthing

The A. C. Division started spring house cleaning last week with the moving of the drafting section. Everyone seems to be quite happy with their new location, and they wish to congratulate D. Manecke on his fine job of planning. . . . We've heard lately that Walter Gerke is a very eminent bridge player. Glad to hear that, Walt! . . . The "Mystery of the Missing Rotor" was solved when Bob Dobbin finally looked into his middle desk drawer after hunting all over the premises of the hermetic section. For awhile we thought we would have to call in Sherlock Holmes, but Bob did very well. We now refer you to Bob Dobbin if you need a real sleuthing job done or a mystery solved. . . . Ralph Welsh was the 26th man on the elevator the day the elevator stuck between floors, but we heard that it was all Ray Jones' fault because he coaxed Ralph to get on the elevator with him. Remember, fellas, the capacity of that elevator is only 25 passengers. . . . We in the A.C. Div. are glad to see W. Siegmiller back after a week's absence, but we are also sorry to hear of the illness of his father-in-law. . . . Glenn Stapleton, of the D.C. Division, attended the Credit Union's State Convention in Indianapolis last week. . . . Shorty Poyser, one of the member of the D.C. Drafting Section, had a fine time playing housewife and taking of the children. It was hard work, wasn't it, Shorty? Seriously, though, we are glad your wife is feeling much better. . . . Gwen Steinbarger had a birthday April 5, so we extend to her a happy belated birthday. . . . If you wish to enjoy some good entertainment, contact Shorty Poyser or Frank Ross to find out where they will be playing next. Last Saturday afternoon they played at Kendallville. Incidentally, Shorty plays the bass fiddle and trumpet and Frank plays the piano. . . . With the bowling season almost over we find Gil Baker trying his very best to catch up with Walter Gerke's scoring. You have just one week left, Gil, but we hope you do it! . . . Bill Pringle and his family attended the Cherry Blossom festival in Washington, D.C., last week. Bill says that the festival was better than usual this year due to a new method of preserving the blossoms. . . . Harry Balz proudly displayed a novel salt and pepper shaker set which he made in his home work shop during his spare moments. That's a very worthwhile hobby, Harry. . . . We are all looking forward to seeing Bob Loveland and Dick Thomas perform as "end men" in the forthcoming minstrel show, Plantation Capers, which will be presented April 20 by the Squares Club. . . . Fred Wilson, of the Commercial Division, and formerly of Bldg. 4-6, is the proud grandfather of a set of twins, girl and boy. This is a sequel to Bob Winner's happy announcement of several weeks ago. Bob also of the Commercial Div. is the father of twins. . . . Wedding bells rang out for Beth Hoover, formerly of Bldg. 4-6 Sales Division and now at Taylor St., on April 10 at 3:30 p.m. at the United Brethren Church of Wakaka, Ind. Beth was married to Russell Young. Congratulations to both of you, Beth, and we wish you many years of wedded bliss.

Who shall decide when doctors disagree.

Haberkorn To Retire May 1

Harry Haberkorn, Supervisor of Inspection and Test in Bldg. 4-3, is shown above with a number of his co-workers and friends in FHP Motor Div. 1 on the occasion of his retirement after 42 years of service. Mr. Haberkorn left last Friday for his vacation and retirement which is effective May 1. Left to right are Dorothy Rebber, May Heit, Irmgard Gehle, Daisy Ford, Mildred Carpenter, Edward Glenwith, Esther Pape, Otto Roehm, Fred Castor, Ross Strodel, William Nieman, Elmer Sible, Ted Bain, Herbert Braun, Ruth Tutwiler, Edward Robin, James Sarasien, Mr. Haberkorn, O. J. Mettler, FHP Div. 1 Supt.; A. L. Knoll, Walter Fagg, O. D. Coleman, Clara Frede, Ruth Baker, Anna Ruth Clements, Frank Laier, Elsa Frede, Clara Krudop, Frieda Farley, Vera Fetro, Glen McDonald, Viola Donahue, Agens Grosjean and Betty Minard.

Floor Lore from 4-4

On this Good Friday, 1949, we would like, once again to present an old legend to our readers. This legend is aged and has been repeated many times by many people and we have told it before in our column. Since then, however, we have received many requests to repeat it, and we would like to present it again at this Easter Tide. . . . In this modern world, where modern modes of living leave little time for legends, we think it is fitting to repeat this legend as a prime example of things that are truly beautiful, shall forever increase in their beauty and never grow old. . . . At the time of the crucifixion of Christ, the dogwood tree grew very large, sturdy and tall in the forests. It grew as large and had the strength of the oak and for this reason was chosen as the material to construct the crucifixion cross. . . . Now the dogwood tree on learning of this fate to befall it, became very distraught at the executioner's decision to use its timber for such an act of infamy. . . . God, upon learning of the humility, pity, and semi-suffering of the dogwood, made the tree a promise. Never again would the dogwood grow tall and large but would, instead, grow short in stature so that it could never again be used as a crucifixion cross. As a further reward, God promised that the blossoms of the dogwood would blossom forth in snowy white, with two short petals and two long petals in the shape of a Cross. At the tip of the petals would be rust colored nail prints surrounded by blood stains, and the center of the blossom would be marked by a crown of thorns, so that all the world would remember that Easter many years ago. . . . This spring, if you are fortunate enough to find a dogwood tree in bloom, study it carefully. All dogwood are not alike, as there are 60 varieties of the species, but the most common variety is marked exactly as God promised. Find a blossom, look at it carefully, then perhaps you too will remember.

Engineers To Hear About Gas Turbine Electric Locomotive

J. C. Rhoades

James C. Rhoades, Assistant to the Engineer, Locomotive Engineering Division, Erie Pa., will address members of the Fort Wayne Engineers' Club Thursday, April 21, describing the development of the new Gas Turbine Electric Locomotive. The meeting will be held in the dining room of the Chamber of Commerce at 8 p.m., preceded by a dinner at 6:30 p.m.

Mr. Rhoades received his engineering education at Lehigh University and M. I. T., starting with the General Electric Company in 1934. Since that time, he has taken the Advanced Engineering Program work in Schenectady, and has devoted most of his engineering career to mechanical problems associated with the design of transportation equipment. Joining the Mechanical Design Section of the Transportation Motor Engineering Division in July, 1936, he was advanced to Section Head of that group in December, 1941. Mr. Rhoades was appointed Assistant to the Engineer in December, 1945.

Marvin L. Schmidt is program chairman for the meeting.

After the dinner, Rev. Robert J. MacDanel, pastor of the Third Presbyterian church, will speak.

Taylor Made Tools

For several weeks Cecil Strong has been giving his riders (including "Red" Allsetter, one of our firemen) a build-up on how his car would hold the road at high rates of speed and how a certain curve on U. S. 33 could be taken at about 95 mph. Then came a nice evening on the return trip home and Cec began talking what a nice time to try the curve. As he talked he pressed down on the accelerator until he had reached a pretty fast gait, but instead of taking the curve he continued on the straight road and looking in his mirror he couldn't see Red. He glanced around to see what had happened and there was Red on his knees between the seats in earnest conversation with his Maker. . . . For quite some time the euchre games were going along sociably. Then last week Jess (Stormy) Batchelder went wild and was skunked twice, taking along Gene Werling who was so bewildered at Jess' playing he hasn't completely recovered yet. . . . Last week Art Haberstock had considerable trouble with his apron string always becoming tangled. After several exhausting struggles he finally let his blood pressure get the best of him and tore the apron to shreds. He came in the following day with a new apron, and hasn't had any trouble since. . . . Bill Buuck was demonstrating his penny and funnel trick to a prospective victim the other noon when one of his previous victims, Johnnie Repine, surprised him with the cold water. Was Bill surprised! . . . Jess Batchelder wasn't the only one who went wild last week. Marcellus Junk went wild in the bowling tournament Sunday. Pairing up with Don Dimke in the doubles, they rolled a neat 1390 for first place. . . . Birthday greetings of the week go to John Bastian. . . . Louie Watt and Ewald Stinsmuehlen, who all celebrate on the same day, had a little get-together in honor of the occasion at Ewald's last Saturday night. Congratulations and many happy returns. . . . To all a very happy Easter.

Tales from Taylor

Kenny Miller was in a reminiscing mood the other day so he told us a story that was quite interesting. Of course, this happened quite a few years ago. It was a beautiful day in the spring he and his lady friend (who, by the way, is now his wife) were out for a drive arriving in the vicinity of the Stellhorn bridge they drove down to the water's edge. The water being low, Kenny decided to drive out into mid stream. There they sat basking in the warm sunlight and listening to the radio when suddenly clouds loomed upon the horizon, down came one of those heavy spring showers. Deciding that they had better get out of the river he tried to start the car which had sunk deeply into the sand. The radio had used so much juice that the battery refused to turn the old klunker over, so poor Kenny had to get out into the downpour, wade ashore and seek assistance in getting the car out of the river. . . . The other morning Sam Allmandinger was commenting on the price and quality of the present day cigars. The one he was smoking at the time had a very unpleasant aroma. He said the reason cabbage was up in price was due to the fact that a large percentage was used in the manufacture of cigars. He opined that the price would probably level off just as soon as the catalpa trees were in full leaf and the mullen plants put forth their silken leaves. . . . There is a story going the rounds about Frank Blotkamp. Stop signs, driver's permits and a wild ride south on Clinton St. As our space is limited we cannot tell the whole story here but suggest you talk to Frank about it. We feel sure that he will be glad to give you all the details. . . . A week ago or so Art Brandenberger asked George Cowan if he would be kind enough to accompany him to the lake and help him take his boat off the trailer. He told George that there would not be much to it and to wear his good clothes, so George did just that. After unloading the boat, Art brought out a lot of painted boards on which the paint was not yet dry and asked George if he would help him make some repairs on the cottage. The result was that George got paint all over his good clothes. The sum and substance of the whole affair was that Art did not want George riding in his new car with soiled clothing. . . . Willard Hull was telling us about an extra large groundhog that was captured in his back yard. Of course it had not quite gained the proportions of the Beast of 'Busco, but nevertheless it was of goodly size. On hearing a commotion he went to the door, and observed several dogs worrying the woodchuck who was holding his own and had the dogs hacked off the boards. Bill called the humane officer who succeeded in rescuing the oversized rodent and took it to the country, releasing it in the haunts more to its liking. . . . Clarence Watterson purchased a new car but he did it a day too early, for the following day a nice reduction in price was announced by the maker of this car. This burned Clarence up, and he is taking a ribbing from his co-workers. He tells us that he is going to have to put in a lot of extra hours somewhere to make up for this loss, perhaps the manufacturers will give him a consolation prize.

Cars and people that knock need working on.

Thanks to "Butch" Witte for pinch hitting for me last week. It's so nice to have someone like her around to rely upon. . . . Bill Buuck's funnel joke backfired on him one day last week. He was showing some of the boys how to drop a coin in the funnel when someone slipped up and filled the funnel with water. That explains why Bill couldn't be found in the afternoon—he was drying out. . . . George Ryan's son Jim is bome on leave from the Marines. When he arrived home, he told his dad he would like to take their Ford back to the base with him. George decided that maybe it would be a good idea and anyway he wanted a different car too, so he went out and bought a Buick. It isn't a new one, but George says it's as good as new. The thing that has the boys puzzled is, how can lil' Georgie drive such a big automobile. . . . Here's hoping that Ralph Keller will be back with us Monday. Ralph has been off for the past two weeks with a very bad cold. . . . It's good to see Neva Lutz back to work after her recent fight with that can opener. . . . Virginia Johnson's little girl had spring vacation last week, so Ginny thought she just might as well have a little vacation also. . . . We hear that Velma Reiter has gone into the wallpapering business, and we hear too that she is very reasonable. If you are interested, just contact Velma. . . . Now that spring has arrived, Lloyd Garrison will be getting another one of those "butch" hair-cuts. Best that he does, 'cause he has been having trouble lately carrying those rolls of insulation on his head. When Lloyd carries one of the rolls on his head he looks like he belongs in the far east, and we don't mean New Haven. . . . If anyone has an extra dictionary lying around the house, will you please bring it in to the boys in final test. Sometimes there are such big words flying around down there, that you can't keep up with the conversation. . . . Ted Budecki took his little girl for a ride on her tricycle last week and somehow or other her foot got caught in the front wheel. Ted went end over end, and when he finally stopped rolling, he looked up to see his daughter almost splitting her sides from laughing at him. Ted said it was no laughing matter, as it took one cane, one crutch, and three rolls of bandage to repair him. Maybe you should get a tricycle of your own, Ted, and then you wouldn't have to ride on the back of hers. . . . We hear that Ed Fiedler was very unhappy when he got the WORKS NEWS last week and saw that no one had wished him a happy birthday. Here it is this week, Ed, and it is better to be late then never — happy birthday and many, many more. . . . Birthday wishes also go to Ralph Hare and Elinor Laux who both had birthdays April 9. . . . Charlie Engle has been "expecting" for quite some time now and it finally happened over the week-end. Charlie doesn't know for sure just how many there were, but he says it is five or six beagle hound puppies. Congratulations, Charlie. . . . Congratulations are also in order for Leamon Huffman's son, Joe. He not only won the Wells County spelling bee, but he also "took" his dad for $50. Didn't think he could do it, did you, Lee? He now has the chance to win $500 by competing in the spelling bee to be held in Wabash (this five isn't from Pop though). . . . If you have been wondering about the sad look which Pat Perry has had this past week, it is due to the fact that her twin calves died. We're sorry to hear that, Pat, and better luck next time. . . . If you are in need of medical advice, just contact Ruby Stoops. . . . We extend our deepest sympathy to Mabel Parker and Elvin Moser in the deaths of their brothers.

Repair Of Transformer Made In Record Time

Bob Schulte, Service Engineering division; captain of the plane; and Otto Fultz, Production Supervisor, are shown above making preparations for the flight of the repaired transformer to the DuPont plant in Pompton, N.J.

(Continued from Page 1)

Normal delivery time would be from eight to ten weeks.

It was already late in the afternoon, so Mr. Schulte at once phoned Frank Gamec, Production Manager of the Specialty Transformer and Ballast divisions. He reviewed the problem with Otto Fultz, Production Supervisor in Bldg. 26-4.

By 4:45 p.m., Mr. Fultz was arranging the production details over the telephone.

Little Time Given

C. E. Derbyshire, Engineering division, checked the design and Bob Henry, Requisition section, issued copies of the specifications to the floor. By this time, Mr. Uncapher's group had a truck at the airport to pick up the transformer and rushed it to the factory.

Dick Goller, second trick foreman, inspected the unit and parts were salvaged. Then Norman Voelker wound the coils, while Herman Rosenhahn did the core stacking. The partially completed unit was then sped to tbe treating room about midnight Friday and started through the process by the regular crew.

W. M. Smith, group leader, and John Kennell came in at 7 a.m. Saturday, and worked until 3 p.m. on the treatment. Then Donald Ford, group leader, and Paul Stiverson took over the final bake treatment. Dick Ormsbie and Glen Santon came in at 11 p.m. Saturday, completed the treatment, painted the unit and delivered it to the fourth floor for preliminary test by Lee Mohr.

Numerous Details Required

Other vital operations that took place concurrently included the following:

The traffic section prepared the necessary shipping papers, an operator was on duty to run the elevator, a guard was instructed to permit entry of a private car to transport the transformer, Division 91 prepared two new terminal boards, and miscellaneous materials were secured from stock.

Readied Sunday Morning

Early Sunday morning Everett Hamilton and Manford Adams assembled and connected the transformer. Gerald Moore and Doyle Johnson then gave it final tests.

The unit was placed in Mr. Fultz's car and sped to the airport at 1 p.m. Sunday afternoon. A last minute mixup, caused by a strike of the express company, prevented the unit from being shipped air express by one line. So arrangements were made on the spot to send it via air freight by another line.

Told Of Progress By Phone

In the meantime, Mr. Schulte had kept in touch with Mr. Beach at the DuPont plant and had told him of its progress.

The transformer arrived safely and in plenty of time to start operations Monday morning. Both tbe customer and his employees were pleased that an anticipated layoff was averted.

The entire procedure was an outstanding example of G-E teamwork—offering further proof that General Electric service and goodwill extend far beyond the sale of our products.

Myron Auer just loves lathe work in Bldg. 19-5 but says that these darn lathes play tricks on you once in a while. It seems Myron was boring out a bushing, but each time he checked it, the front end got larger and the back end stayed the same. When he asked another lathe man what was wrong, lo and behold, Myron had his taper attachment hooked up and was cutting a choice taper in the bushing. He knows what a taper attachment is for now. Right, Myron? . . . Even with white side wall tires, Ray Mutton still has flat tires and Russell Sage wouldn't help him change it either. Bring your nose down out of the air, Russell, you might trip over sumptin'. . . . We hear John Hensler's egg just turned out to be a normal egg with an enlarged blood clot. . . . The news has been coming in slow, so if you fellows in Bldg. 19-5 don't start producing, I'm going to contact your wives to get the low-down.

Die Plant

Wanted, one 10-gallon hat and one set of spurs for Waldo (Louis) Reed. He already has the pants. . . . April 1 brought the proverbial coin nailed to the floor. Among those who attempted to retrieve it were Elmer Auman and Max Hower. The only successful one was Gale Rinehart with the help of a screw driver. . . . I wonder if Chet Rennecker's buying that set of golf clubs has anything to do with that ditch he is digging. Maybe he is going to mix work with his golf. . . . Have you all heard that golden voice of Bob Roys? We wonder how he does it. . . . Since Bob "Bullseye" Sowards put a Dodge motor in his Plymouth, he calls it a Plodge. Be careful how you say it, for he is considered one of the best shots in the state. . . . Hayden Rice claims that the "Busco Beast" is now in Big Lake. He claims it got there through a four-inch tile from Fulk's Lake.

General Chairman Announces Program For Minstrel Show

The program for Plantation Capers, the Squares minstrel show, was announced today by Frank Gamec, general chairman. The show will be presented Wednesday, April 20, at the Civic Theatre.

Joe Zasa is the director and Frank Ondrovik is administrative chairman.

Johnnie Johnson has been named Interlocutor and his end men will include Bob Loveland, David Clugston, George Hoopingarner, Dick Thomas, Glenn Tobias and Herb Eaton.

The show will include a number of novelty acts:

"The Lease Breakers," instrumental quartet, featuring Mert Edgar, Jim Townsend, Walt Hein and Herb Edgar; Dick Thomas, soloist; George Hoopingarner and Herb Eaton, duet; Glenn Seabold, George Culp, Paul Vance and Frank Fleischer, barbershop quartet; Ann Adams, soft shoe dance; oriental dance by Charles Koomjohn; Bob Loveland, soloist; Marcotte, soloist; Jack Immel, marimba specialty; and "The Mop Sisters" and Glenn Seabold, featuring the antics of Frank Chayka, Max Barrows and Frank Fleischer.

The chorus, under the direction of Glenn Seabold, will provide a major portion of the music for the show. Members of the chorus are Ralph Welsh, Don Spaulding, Forry Carlson, Fred Suhr, Ron Robinson, Tony Schneble, Frank Chayka, Hugh Folson, Bill Dripps, Frank Fleischer, Joe Jamieson, Bob Dent, Bill Hunt, Bob Drake, George Martin, Marion Halleck, Charlie Brown, George Culp, Gail Rowley, Bob Altevogt, Paul Vance, Stan Antalis, Walter Hein, Andy Schevchuk, Chet Krasienko, Tom Greenman, Ted Hicks and Paul Shaefer.

Don Motter will direct the orchestra, composed of Ted Ross, Chet Smith, Bob Schulte, Bob Sharrow, Ernie Freegard, Martin Heller and Louis Pooler.

The committee in charge of properties, costumes and makeup includes Ray Rogers, Ken Parks and Ray O'Keefe. Tickets, publicity and programs are being handled by Bob Rowe, Bob Schulte and Bob Triplett. Tickets are available for 50 cents from club members.

The open house at the Squares club rooms following the show is being planned by Cliff Leegard.

Redmerski Dies

Paul Redmerski Sr., 58, died at 7:10 p.m. Thursday, March 31, at his home, 2109 S. Barr St., after a year's illness.

A model maker in Bldg. 17-4, Mr. Redmerski began his service with the Company in 1927 as a machinist. He also worked at Winter St. a short time as a toolmaker, returning to Broadway in 1936. He retired Oct. 13, 1948.

A rehearsal of part of the chorus for the Squares minstrel show is shown above.

New Column Is Edited By Nurse Mary Heymann

Mary Heymann

"Medical Memos" is one of the newest columns to appear in the WORKS NEWS. It is edited by Mary Heymann of the Bldg. 8-1 Dispensary.

Mary received her nurse's training at the Methodist Hospital and later did graduate work at a Chicago hospital. Before coming to General Electric in 1945, she was a supervisor at the Methodist Hospital. She has worked on the second shift almost the entire time since she joined G-E.

Her hobbies are determined by the seasons. Bowling and ice fishing take up quite a bit of her leisure time in the winter, and during the summer months she likes to swim and play golf. Mary also likes to do needlework and make her own Christmas cards.

Everyone in the medical section is considered a part of Mary's staff of reporters.

Another retired person from Div. 14 is in order for reporting. May Schnitt, who worked in 14x3B. Her group had a farewell dinner for her last Friday, and presented May with many beautiful gifts. Several guests were invited including Ethel Evans, Clara Lake, Nellie Hamlet, Nora Kern, Effie Wyatt, who retired two weeks ago; Lulu Heine and May's daughter, all former employees. We wish much happiness to May and lots of good luck. . . . "Grandpa" Fishback doesn't seem to think the pictures he and grandma have been receiving of their grandson are as good as they should be. He is sending grandma, camera and all, to visit the little fellow, so she can take a few snapshots of him. . . . Alice Rogers and Vickie Walzer owe a lot to their house pets. According to both girls they never have to worry about being to work on time. It seems both girls can always depend on their pets to arouse them each morning. . . . Rosamond Schooley certainly started the day out with a bang. First she dropped a bottle of milk on the kitchen floor, then came to work and dropped a bin of insulators. They say it happens in the best of families, Rosie. . . . Margaret Lepper says she hates to admit it but she threw a gutterball Thursday night (on a spare too). After spending last week-end in Dayton at a bowling tournament as a spectator, could it be she was a little nervous? . . . Helen Horstmeyer feels much better since she has an apartment. Now the wedding can proceed. . . . What's this we hear about Russell Frey making the 6-7-10 split in Thursday night bowling league. . . . Kathryn Erwin had a very nice birthday last Friday. We understand she bought a dress that had set her back plenty and was telling the girls that all she needed was a new hat to go with it, but that would have to wait. However, when her birthday rolled around, besides receiving very lovely gifts she was presented with a card and enclosed was the money for her new hat. What is it they say, Kathryn, "Ask and you shall receive?" . . . Johnny Anspach, has been struggling the past week to promote a mustache. Ruth Jacobs and Lucy Whitlock have offered to paint his lip for him, but Johnny insists on doing it the hard way. . . . What goes with the assembly group. Two men went home sick and about four more have such colds they can hardly talk. . . . The Inspection gang we believe are not lovers of music. When Cleo Oyer gives forth with some of his better renditions of the finer art, such howling has never been heard even at the dog kennels. . . . Meredith Trout and his wife have had the "blues" all week. After a long pursuit for their kitten, they found out he had entered kitty heaven. We feel quite sure that Mr. and Mrs. Robert Turschman can sympathize with you. However, they got another dog after they lost their pooch. Perhaps the same would help you.

Some goats may eat tin cans, but not the ones that are bothering Charlie Reed. They get over, under or through the fence to nibble on his prize apple trees, and so far he hasn't found a way to discourage them. Ralph Reinking went out and looked the situation over but he wasn't able to advise Charlie. If anyone can come up with a suggestion please contact Charlie, he'll surely appreciate it. . . . Oliver Tracey pulled the "absent minded professor act" when he bought his ice cream from the candy wagon. He passed up the spoons and instead returned to his bench with two straws. It must be spring! . . . Now that cars are more plentiful on the market and dealers are offering free rides to attract customers, Bob Klingel is really having fun. He has a car which is perfectly satisfactory to him but in spite of that he's making the rounds and trying out all makes of cars. He may feel qualified to publish a survey when he finishes but no doubt his readers will consider it just "one man's opinion." . . . That must have been hot music Carl Stadelman was playing for last Sunday's church service. At any rate a fuse blew out leaving the organ mute and the place in total darkness. He would like to make us believe there was too much load on the line, but we've been told that after repairs were made he really used the soft pedal. . . . We are glad to report that George Seibold, who has been ill in the hospital, has improved sufficiently to return home. . . . Luella Knoche, David Dulin and Park Schemehorn are all confined to their homes by illness. A speedy recovery to all.

M. B. A. SICK LIST

Ruth Banter, Roy F. Blessing, Fred Barve, Guy Brickley, Bruce Brown, Melvin Beucler, Sam Beer, Walter Coolman, Dorothy Comer, Goldie DeLong, Ethel Elzey, Frank Elder, Jr., Ernest Girardot, Bruce Hapner, Mike Hosler, Roy Hill, Lillian Hall, Paule Howard, Edward Jenkins, Russell Jones, Robert Kienzle, William Kramer, Vera Killian, Luella Knoche, Patricia Lahr, Elmer Lederman, Mary McManamon, Maude Mountz, Irma Miller, Claud Matteson, Marcia Neukom, Virginia Pelz, Lavonna Ryan, Virgil Royer, Austin Reimund, Mildred Rietdorf, Hattie Springer, Park Schemehorn, Mary P. Stocks, Edward J. Sordelet, Louise Sinn, Sophia Sinn, Clarence Thomas, Roy Taylor, Harley Ward, Edith Waite, Elfrieda Wolfe and Jay Yopst, Solomon S. Andorfer, Eileen Bliss, William D. Baker, Harley Bottorfs, Howard L. Beery, Edna Crow, Alma Clark, John Craig, David Dulin, Samuel Dailey, William Decker, Ora Farrell, Harry Hartman, Elmer Haugk, Mary Hake, Ann Immel, Aaron M. Krakower, Lela Line, Glenn McNamera, Pauline More, Erna Meyer, Urah Miller, Nora Nickelson, Verna Powers, Mary M. Puckett.

Two tool room employees are proud fathers. Earl Blackburn a baby boy and Elbert Fuhrman a baby girl. . . . Herman Souder's and Harve Koo's wives are improving after recent operations. . . . The Smitley's Nora and her folks attended an implement show the other week. Nora says she hates to part with her horses. . . . Don't be surprised if some day you holler "Taxi" and find Betty Frauhiger your cab driver. . . . You ought to hear Rinaker from Berne imitate Dagwood Bumstead in his call for Blondie—just like out of the funnies. . . . We don't know how this man does it, but Bill Kohls makes it regular every day one minute before the buzzer. Do you go by Swiss movement, Bill? . . . A farewell dinner was held in the private dining room for Mary Jones and Millie Geimer. They both received a lovely scatter pin from the group. . . . Irene Holthouse celebrated a birthday. Happy birthday, Irene, and may you have many more. . . . The GeCode Club girls had their Easter party April 5 and everyone who attended said they enjoyed it very much. The day girls especially liked the hats that were modeled, especially since they were modeled by Frank Braun, Eddy Hesher, Henry Krueckeberg, Tibby Gehrig, Forest Owens, and Bill Stevens. . . . Florence Schultz was very thrilled the night she got the 5-7-10 split in bowling. . . . Did you know we had a new family to move to the G-E a few weeks ago? If you take note those two stakes in the yard is where the three little brown rabbits are residing. They probably are sticking around to help Easter Bunny.

Receives Letter From Germany

Joe Sallot (center) shows the letter he received from Germany to Maurice Vonder Haar and Bob Till.

An interesting letter of thanks for a Christmas present was received recently by Joe Sallot, Taylor St., machinist maintenance. The letter was sent by Peter Balss, a German living in Russelsheim, Waldstrasse, Germany. Mr. and Mrs. Sallot sent a coat in a German relief package mailed by a neighbor. The letter was written Feb. 15 and was received in this country on March 18.

The letter is as follows:

"Just in the week before Christmas eve when I came home from my work, my wife gave me a gift parcel from U.S. The wrapping paper was rather torn, so I could not find the sender. Inside above the containing was an overcoat and in one pocket I found your address. Therefore, I write to you and thank you with all my heart. Where from you got my name is unknown to me.

"What do you read about the Germans in your papers? I guess some papers will tell you the truth. The fact is that the so-called better classes have quite a comfortable living, especially the men from the black market and the profiteers. Only we, the workers, the men who have to do hard work all day long, have a bad living.

"The prices are so high that we have not so much money to buy the things on our ration cards. We get milk once a week, fat and butter very seldom and meat less than a pound within a month, bread not enough. But the Lord our God cares for us for we are praying, "Give us our daily bread." Last autumn we got plenty of potatoes, so we can fill our stomachs with potatoes. In 1947-1948 we were nearly starving.

"I should have written earlier, but no time. We have had all the winter the bricklayers, joiners, whitewashers and so on, for we are rebuilding our house which was very badly damaged by American bombers. The state does not pay a cent. We have all to pay ourselves and have now the back full of debts. Never mind, the Lord our God has helped me so far, and He will help further on, I am quite sure.

"Our town department gave a loan of 3,000 marks at three percent, but the money from the bank is not so cheap. There I have to pay 10 percent. I do not believe that your papers write about our high prices. They paint Germany in rosy colors.

"I am not in the best health now, but my work I can do, for I can sit in a chair because I am an invalid of the war, 1914-1918. Now I must come to an end and I wish you all luck and good health.

"I remain yours truly."

P's and Q's of 17-1

by Joe Kramer

Vacation period gets in full swing this week with our genial inspector Johnny Miles starting his vacation next week. John figures he has enough painting and lawn rolling at home to keep him busy for the first couple of days, but he doesn't know what he is going to do the rest of the week. In case you have any extra painting or spring housecleaning to be done, contact Johnny today and he will be glad to work it in his schedule next week. . . . Cliff (Tidy) Coombes was late Monday morning for the daily news round up. He didn't get in until 6:45, that is just 30 minutes late for Cliff. You should get the alarm clock fixed, Cliff. . . . Ed Brosche is celebrating National Baby Week by helping John Quinn baby the Brown & Sharpes along, changes and all. . . . Tavie Popa, Addie Masbaum and Agnes Cordes got new watering pots to go with the flower pots they received last week. If we could just get some cactus for Tavie's pet horse, Old Paint, we would have everything under control. . . . It is rumored (and we want to emphasize only a rumor) that Jack Lewis is trying to talk his way out of the "Busco" turtle bet. He is offering a $5 forfeit instead of the walk to Churubusco. Red Pettit and John Braden are thinking over Jack's proposition and will let him know at a later date. . . . Addie (Just call it spring fever) Masbaum came back from lunch, walked into the wash room and instead of putting her smock on to start to work, she put her coat on again. . . . Orval Haver was seen by quite a number of people last Sunday afternoon soaking up some of that wonderful Indiana sunshine. Orval says he believes he must have walked five miles. . . . Frank Hickman can't fool us any more with that old story about arthritis. He was caught in the act of painting the ceiling and walls of his cottage. According to an eye witness, none other than Wally McKay, Frank was really swinging a wicked paint brush. Frank (Nature Boy) Martin should have told Johnny Junk that it is necessary to put gasoline in cars to make them run. John was seen walking home Sunday evening. His only excuse was that he had run out of gas. . . . The fish stories are starting to flow rather freely. Cliff (Caught a big one) Coombes brings this one back. He caught a bass that pulled on the line so hard it nearly upset the boat. At the last reports, weight of the fish has been placed at two pounds by very reliable sources. . . . Ed Martin was treated to quite a surprise last Sunday evening. It seems Ed was sitting down to rest, one of the things he does best. When the phone rang, he received an invitation to visit the Martins on Vesey Avenue. It seems that Ed was a little leary of the cupcake given him April 1 that to make up for it, a cake all decorated up with white rabbits and eggs, was set for the occasion. The occasion was none other than the 29th birthday of Ed (Bingo Benny) Martin. Happy belated birthday greetings. . . . Now that the girls in the office have just about decided where they are going on their vacation, the problem of what to wear is the topic of the day. Helene Evanoff was afraid of getting lost, so she bought some red shorts to match the red sunsets in the west. . . Congratulations are in order for all Division 19 employees for the outstanding safety record of the past year.

Given Luggage At Retirement

Lydia May Schnitt, FHP Div. 14 at Taylor St., received luggage as a going-away present from her friends at G-E on the occasion of her retirement. Attending the luncheon in her honor are (l. to r.) William Skevington, Lowell Arnold, Nellie Hamlet, Nora Kern, Mrs. Schnitt, Lulu Heine, Clara Lake, Ethel Evans and Effie Wyatt.

Two Section Supervisors Named In Large Motor, Generator Div.

E. P. Smith

L. O. Hildner

Two new section supervisors were appointed in the Large Motor and Generator Accounting division. L. O. Hildner has been named Section Supervisor, General Accounts, and E. P. Smith, Section Supervisor, Customer Billing and Statistics.

Mr. Hildner began his General Electric career in September, 1942, as a member of the power drive cost section at Winter St. He later transferred to the central cost section in Bldg. 18-3. Mr. Hildner remained there until the decentralization of divisions, when he became associated with the Large Motor and Generator Accounting division.

Bowling and fishing are Mr. Hildner's hobbies. He is married and lives at 4710 Tacoma Ave.

Coming to General Electric in 1946, Mr. Smith has been in the accounts payable section in Bldg. 18-3 until the decentralization. He was then assigned to the accounts payable section of the Large Motor and Generator Accounting division. After two months he was transferred to the section he now heads.

Mr. Smith's favorite pastime is driving. He also enjoys good music. He is single and lives in Auburn.

Tanks To You From Plating-Two

By Marie Lantz

May all the joys of Easter-tide
And grace of God with you abide;
That you may pause, your moment lost
To loving Him upon the cross,
Who, for us suffered untold woes,
Was crucified, and then arose—
That you may now, this Easter-time
Arise with Him, His heart in thine.

Last week pensioner Frank Williams spent one noon with the gang at their euchre game. In place of Pinkerton, Frank teamed with Hemrick to defeat Walt and Andrews. In the near future the Williams' plan to leave for their lake home; now Frank has a nice memory to take along. "Skunked 'em," he beamed, "just like old times." . . . We'll have a word with the weatherman. Though signs of spring are on the way, it's winter's wind that blows all day. . . . Among other things our big Boy Scout is interested in his grandson's Scouting activities. At present, long-distance hikes seem to be an important part of their schedule. In a weigh (way), it might help if Bill would join their march. . . . Those far-away places are calling, calling, not me—but the Clyde Hemricks motored to Cleveland for an enjoyable week-end, and Indianapolis lured Longenbergers.

Apprentice BROADCAST

By Mildred Ellis

Members of the school have made the limelight. Mark Junk and Don Dimke made headlines on the sports page of the Journal by taking the lead in doubles in the G-E Tournament. Keep up the good work, fellows. . . . Also due to make headlines is Mr. Gebert with his Planetary Gear System. It's guaranteed to either help or confuse the students. . . . Congratulations to Mr. and Mrs. Harry Ecenbarger, who are the proud parents of a baby boy. . . . We were glad to have Jess Sircle come back to visit the old gang. . . . Rasor found out it sometimes proves very embarrassing to check on good housekeeping around the school. . . . Movies were in order in the classrooms this week for Classes C and D. Both classes saw films on hydraulics and making of Huron die steel. . . . Class F's Industrial Organization class has had the duties of salesmen and engineers explained to them by R. C. Hanna and J. H. Behm of the FHP Division. Our thanks to them. . . . It seems that Myron Auer has become quite an expert on boring tapered holes on the lathe. . . . Frequent limps were common sights Monday. The men who weren't stiff from ball practice were stiff from shoveling dirt, huh, Schmidt and Miller? One apprentice said he was a little stiff from bowling, but his boss said he didn't care where he was from, he should work just as hard as anyone else. . . . For Sale: One large size wart. See Bob Finton. Bob had a large wart removed from his head. The wart is gone but Bob's head is swollen like a football. . . . For a little Draftsman news see John Leffers, Carl Hubartt, Jack Kirlin, Harold Fremion and all the others who gather around the pin ball machines during the lunch hours. It is rumored Charlie Wilt is looking for John and Carl to help pay a plaster bill for a pillar in the club. The boys just say—"take it out of the machine;" they should own it by now. . . . Joe tells me as the draftsmen were going on a tour through Bldg. 17, Don Miller was seen with his scale getting the size of a certain machine hanging on the wall. Through the tour all he kept saying was "what a body," "what a body." Take it easy, Don.

After all, horse sense is just good old stable thinking.

OUT OF THE BLUE in 26-2 office

by Delores Patterson

People are still going and coming in Bldg. 26-2. Donna Bachofen and Dorothy Halleck have moved down from Bldg. 26-3, and Geneva DeWitt from Bldg. 18-3 is now in the Service Bureau. . . . We would like for someone to inform Ginny Winegart that Fort Wayne does have city maps which name the different buildings in the uptown area. Ginny had to hurry to the Transfer Building; but, instead of going there, she went to the Standard Building. She just got her P's and Q's a little confused. The pay-off came when she finally located the Transfer Building only to find that the particular office she wanted was closed during the noon hour! . . . Viola Brooks, you shouldn't make Ginny work so hard at sawing down that tree in your front yard. She may be good at sawing, but she has other things to concentrate on, too! . . . Bill Pape is the fellow to see nowadays if you ever need money. He keeps it (you'll never guess) in a sock in his desk drawer! If you ever need change, just call on Bill. Wonder what would happen if you would get a hole in the sock? . . . It's a happy birthday to Dick Stoner and Pete Eberhardt of the Drafting Div. Dick received an electric razor for his birthday. Why so soon, Dick? You don't have whiskers! . . . We are all very sorry to learn that Ralph Pappert is still sick. . . . Katherine Ernsberger is not the Amazon she thought she was. She went swimming at the Purdue pool, came to work the next day, but had to go home at noon with a cold and sore throat. That'll teach ya! . . . They are now calling Martha Newell, "Battleships" Newell. Why? Because she just misunderstood. . . . BUY YOUR TICKETS FOR THE PLANTATION CAPERS TODAY.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

We have a new reporter, Rosella McKinney, who supplys us with news from the Sample Shop. . . . We see that "The Rambler" (Kenny Cassleman) has a pair of cowboy boots that he has been sporting around at work. The next day he came in wearing moccasins. What's the matter, Shortie, were the heels a little too high, and they made your feet sore, so you couldn't wear your shoes? . . . A certain fellow in the Sample Shop has acquired a new name of "Missouri Mule," but maybe I hadn't better mention any names as I have already been threatened if I write anything about him in the WORKS NEWS. . . . Once again Harry Rollins is using the egg beater to comb his hair. While we're speaking of Rollins we might add that if any of you have any cloth sugar sacks, you might save them and donate them to Rollins. He makes good use of them up at work. . . . Lucille Stover is sporting the brightest yellow shoes at work today. They sure are pretty. . . . We hear that Paul Sturm can fall asleep in any old corner during his noon hour, as long as it is a corner. You know what's good for that, don't you, Paul?

The Big WIND

DIVISION 17
TAYLOR STREET
by Dorothy Heinzelmann

The little poem which we were supposed to have in our column two weeks ago last Friday was cut due to lack of space, so we will again publish this poem in the near future. . . . It seems that Donna Smith has no trouble at all in getting her hubby to do the washing, but she just can't figure out how to entice him to do the ironing. Does anyone have any good suggestions? If so, I'm sure more gals than just Donna, will be interested. . . . A belated birthday wish to Lora Scbroeder who was pleasantly surprised on her birthday last week. Dorothy Eherman held a dinner in her honor and the guests attending were Lydia Doehrman, Dorothy Pakrywaka, Mabel Parker and Evelyn Turner. . . . Millie Snyder is having trouble deciding just what shade her hair will be next week, but we think she looks very smart with black hair. Don't we, girls? . . . We are sure that Irene Drabenstot knows enough to come in out of the rain, but we can't understand how she got her feet so wet the other night. . . . It seems that some folks throw their hats in the door first to see if they are welcome, but Jessie Wass threw her pie in the doorway of a beauty shop recently to announce her arrival. . . . We hear that Joe Eifrid had everything but a round ball at the recent ABC Tournament. From what we hear the reason he did better than the rest was due to the fact that he snored all of the way down there, and the other guys couldn't get any rest. . . . We really know that it is spring now. Maxine Jones has departed company with her old shoes. . . . Hollie Mee finally got that long needed hair-cut, and he says the barber found an extra ear. . . . Ernie Raypole had a tough time eating his sandwich a week ago Friday. When he investigated, he found that his wife had put a piece of paper in it with "April Fool" written on it. . . . It is reported that Ruby Stuckey has her housecleaning almost done. Hurry up and finish, Ruby, and you can help the rest of us. . . . We hear that Cecil Leakey, who has been on our sick list for quite some time, is not making too rapid progress, here is hoping that you get on that road to recovery soon, as we all miss you. . . . On March 29 the test section had a pot-luck dinner honoring all those who had birthdays in that month. The following having those birthdays were: Pauline Ober, Vi Minnick, Esther Schladenhauffen, Olka Johnston, Charlie Penn, and Eva Creigh. We want to wish them many happy returns of the day. The other guests who attended the dinner were Iris Allen, Ruth Leverton, June Hines, Dora Smith, Bill Roberts, Don Niles, and Dave Chambers. . . . This nice spring weather is sure tough on a lot of people. Hazel Hardwick did a little spading in the garden the other night and wasn't able to make it in to work the next day. Better watch that sacro-i-liac, Hazel. . . . Did you see that beautiful new light green Chevy which Betty Boldt has? . . . A belated welcome to Ruth Leverton on days. . . . Eva Creaigh has left the sound room gong to work on stator test. Eva's parting gift was a cute little goldfish, which the girls promptly named, "Evie." . . . If you really want to hear a turtle story, just have Vi Minnick tell you the one about her turtle. She says it stands on its hind legs and walks across the road. . . . Wonder why it was that when the time came for Harold Mosshammer to go play golf with the fellows last Saturday, he couldn't go. Marion, have you got him that buffaloed? . . . George Miller is learning all about fish life, and of all the people to teach him, he is being tutored by Harold Mosshammer. The thing is though that no one knows where Harold got all his information. . . . Roy Orr has finally traded for a new car, but the boys wish he would get one with a hood that locks so he couldn't get into it. However, Roy, you didn't fool Bob Federspiel as he also traded cars so that he is again prepared to push you. . . . We wish a speedy recovery to Mildred Reitdorf who is on our sick list; we miss you, Millie. . . . We were very sorry to hear about the accident which "Butch" Figel's little girl had, but the latest reports are that she is OK now and for that we are very happy.

Honored At Party On Last Day

Clara Krudop, Bldg. 4-3, left Friday for her vacation and retirement. On her last day with the Company, she was honored with a party attended by several of her friends from the former Meter Dept. In the picture (l. to r.) are Betty Minard, Alma Merwin, Vera Fetro, Lois Miller, Marguerite Dasher, Ruth Reed, Herbert Braun, Irmgard Gehle, Anna Ruth Clements, Ruth Tutwiler, Annette Thomas, Clara Krudop, Hilda Seiler, Esther Pape, Helen Stahl, Viola Donahue and Agnes Grosjean.

A. E. Leider, Bldg. 18-4, is sojourning in the St. Joseph Hospital. He has been undergoing a series of tests and we are hoping the doctors will soon agree, so he can return to G-E. Anyway it is nice to know that you are missed! . . . Our deepest sympathy is extended to Forrest Leighty, Bldg. 18-1. Memorial funeral services were held on Saturday for his son, Ralph, who was killed on V-E Day, and returned home for burial. There are many trials that come to us each day and are only made bearable through the understanding of our friends. . . . Phyllis Tanner of Bldg. 18-1 celebrated her birthday Tuesday. . . . Looks like the weatherman might be kind to those in the Easter Parade—better be safe and have a raincoat, umbrella, fur coat, spring coat and a flowered hat ready just in case!

The industrious person seldom has a busy tongue.

Every married man's pay envelope shows the effect of the feminine touch.

New President Is Installed By G-E Engineers

Mark Tam

Mark Tam was installed as president of the Fort Wayne Association of General Electric Engineers Wednesday evening at a joint session with the Anthony Wayne Chapter of the Indiana Society of Professional Engineers. Other officers installed during the business meeting were F. J. Chayka, vice-president; C. W. Brown, secretary, and A. L. Ulmer, treasurer.

Featured speaker of the evening was Paul H. Robbins, executive director of the National Society of Professional Engineers. His subject was "National Society of Professional Engineers in Washington Politics."

The meeting was held at the Chamber of Commerce.

What the world needs is a thermometer that can read the weatherman's forecast.

Many a man owes his success to a cool, level head—the one that's on his wife's shoulders.

Medical Memos

By Mary Heymann

May the hope of good things to come, rekindled in Nature's awakening, find its fullest realization in the Easter Spirit, and continue throughout the year.

Imo Jean Schwartz, Bldg. 21, is trying her hand at interior decorating these days. She has been busy painting and sewing, and is transforming her room at her home in Ossian. . . . Mentioning "decoration" reminds me, did you happen to notice Minnie Fryback's nose this past week? No wonder some solutions remove paint, they even peel skin! . . . Our members greatly enjoyed the Easter Elex Club party, and especially the music provided by the Melody Trio. A collection was made after the evening party at the G-E Club for Easter candy eggs to be sent to the boys at Farm School at Dousman, Wis. Warren Locker, formerly of our Employment Section is employed there as assistant superintendent of the Farm School, and recently Mr. Locker and R. E. Phillips, one of the boys at Farm School visited the Medical Section here. We appreciated having them stop in to see us and hope they will come again sometime. . . . Mabel Wilson and Mrs. John Nail (formerly Maurine Snyder), who was employed in the Medical Section, visited with Anne Murtaugh at the Irene Byron Sanatorium recently. Anne was employed in our Decatur Dispensary. The nurses report Anne in good spirits. She has gained weight and hopes to be up and about soon. . . . Bldg. 8-1 Dispensary now has a heat lamp. This will be welcome news to the people troubled with aching muscles due to housecleaning, gardening, golf, etc. . . . Mabel Wilson, Berneta Welbaum and Mr. and Mrs. J. L. Mulvane were at Bloomington Sunday attending a musical program. . . . Thelma Harrison, until recently employed as nurse on second shift, Taylor St., visited friends at Taylor St. last Wednesday, and was an evening dinner guest of Olive Walters. . . . Jean Tuttle, nurse at our Danville plant, will leave the Company today, and move to California to take up new duties there. Good luck, Jean, we'll surely miss you. . . . Happy Easter to all!

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, April 18, 1949

LOST AND FOUND

LOST—One key on a chain.

FOUND—Earring with three rows of grey pearl sets. Found by Bldg. 15.

FOR SALE

DOUBLE BASIN WITH SINK—With fixtures, A-1 condition, $25. A-8713I.

25-INCH BOY'S BICYCLE—$8. H-59353.

HORTON IRONER—A-1 condition, like new, $35. A-57373.

9x12 RED RUG—With pad, $5. A-4508I.

SIX PUPPIES—Six weeks old. Six miles west of Waynedale, Lower Huntington rd. to first white church, left side of road. Clarence Coulter.

BOY'S SPORT COAT—Size 14. 311 N. Main St., Columbia City, Ind.

GIRL'S BICYCLE—Like new, 26-inch Western Flyer. $25. A-45820.

DEMMING SHALLOW WELL PUMP—Reasonable. Phone Ossian 5-T.

SMALL BOAT—Suitable for car top. 3218 Raymond St.

WILCOX-GAY RECORDER—And record player (minus microphone). Plays 10-12 records. A-80642.

BOY'S GRAY SPRING COAT—Size 5-6; high chair. A-56474.

COPPER WINDOW SCREENS—Man's bowling ball. H-48347.

STRAWBERRY PLANTS—Gem Everbearing and Senator Dunlap. Reasonable. H-74113.

5-ROOM MODERN BUNGALOW—Built in 1944. Location, 829 McKinnie Ave. H-91202.

LADY'S DIAMOND RING—Clock radio, 4-months old. Reasonable. E-38231.

NEW GAS COIL HEATER—Copper coil, $5. H-50533.

DAVENPORT—H-8995.

WANTED

BOY SCOUT SHIRT—Knapsack, canteen and other Scout things. Size 16. H-56332.

FOR RENT

SLEEPING ROOM—Newly decorated. 121 E. Taber St. H-55072.

PERSONAL

SYMPATHY—To Bill Brandt, Voltmen pitcher, on the death of his mother, Mrs. Maggie Brandt. All his G-E friends.

TRANSPORTATION

WANTS RIDE—Ralph E. Jacobs, from Bluffton, Ind. Works from 8-5:15 in Bldg. 31-1. Ext. 565.

WANTS RIDE—C. K. Tucker, from Bluffton, Ind. Works in Div. 14 at Taylor St. from 6:48-8:18. Ext. T-372 or Bluffton 1159-R.

A Kansas man made a flying machine out of an old auto. This frequently happens on rough roads.

26-3 News

By Mabel Odel

Velma Johnson, our news editor, has been transferred to Bldg. 26-4. Her going has left a large vacancy which I, in some way, will try to fill. As you all know she did an excellent job and for me to achieve her standard, I'll have to have a lot of help from all of you. Which reminds me, Velma had to have a lot of help the other day in getting a piano out of her house. She declared the piano was brought in through that door, but it made no difference which way they turned it or how they measured it the piano still remained two or three inches larger than the door. . . .Ernie Clark would really make a wonderful outfielder on anyone's team. Lorraine Von Behren pitched him a few fancy curves, using boiled eggs for a ball. He didn't miss one, not even the raw ones. . . . It's no use going to a bingo party when Ernie Clark is there. He takes home all the prizes. . . . Lonnie Lockstroh is the lucky one. It must be nice to go on a vacation this time of the year. . . . Louie Kerns would like to buy a lot of those little frilly things at the Elex rummage sale, but he wants to try them on for size first. . . . We have finally located the cause of the disagreeable odor in Bldg. 26-3. It's the low grade of euchre being played by George Brehm, Homer Huffman, John Willet and Pfeiffer. . . . Irma Farrell has a tutor from Bldg. 26-4 to teach her how to play bridge. We hear that she is doing very well in more ways than one. . . . Congratulations to Marie Trenary, who has added "Mrs." to her name. With a little coaxing we found out the lucky guy's name is Werner Hedrick. . . . Catherine Somers and Edna Lobert are leaving us for first trick. Good luck, girls. . . . Congratulations to Mr. and Mrs. Brandenberg on a bouncing baby boy. . . . Martha Warren declares she isn't going to use that little square piece of paper she bought. Could it be an error was made in the names? . . . Ruth Freeland should wear a rose in her hair or some other identification, as they keep getting her mixed up with someone else. . . . Dorothy Whan has been holding out on us. We all agree she should wear slacks more often. . . . Happy birthday to Lonnie Lockstroh. She wouldn't say which one but we hope she has many more. . . . Leonard Pequignot does all right when it comes to picking out a nice overcoat, but someone should explain to him that those little holes in it weren't put in there for ventilation. . . . Does anyone have a safety belt that Betty Gates may use? It seems she is having trouble staying on a chair, and we don't want any lost time accident. By the way, she is a gal who can really blush.

Office Offerings

Gaylord Morris is leaving today to get a higher education. Good luck, Gaylord, and let us hear from you once in a while. . . . Donna Bachofen and Dorothy Halleck have been transferred to Bldg. 26-2. . . . We welcome Therese Lindenberg to the Cost Section. . . . Pat Lahr is still a little girl at heart. She was confined at home last week with the measles. . . . We wish a speedy recovery to Elvira Romery, who is also confined at home due to an auto accident. We have received word that she is getting along very well, and we hope that she will be back with us soon. . . . A belated birthday wish to Al Coxon. The candy was delicious. . . . Congratulations to Mr. and Mrs. Arthur Stuart, the proud parents of little Mary Anita . . . Has everyone heard that Helen Deloff has a new car and is about to become an expert driver? She doesn't have trouble turning corners. She steps on the gas and slides around. I'll tip you fellows off, she is having trouble in getting an authorized driver to go with her. Could it be she has them all scared out?

Have you seen Harold Steinbacher's dog house? It's quite the thing we hear, with very appropriate trimmins'. How's the atmosphere in there these days, Steinie? . . . Congratulations to the Earl Fees on the arrival of a little newcomer at their home. How come you held on to those cigars so long, Earl? . . . Ed Lipp's wife underwent an operation last Monday. We hope by today she is well on the way to recovery. Also Mrs. Don Price, who has been quite ill. . . . When Oscar Rodenbeck comes back to his desk on all fours, barking like a dog, he ain't kiddin' nobody. The gals all know where he has been and just sit tight until he gets back to normal before proceeding with the days business. . . . Bob Hatfield is still bemoaning the fact that he lost his leather bound cigarette lighter. Tough break, Bob. . . . The boys are wondering if Howard Treesh had his car fixed what needed fixin' or is that fender dragging on the ground just for show. How about it, Howard? . . . The other day at Taylor St., Walt Rosselot caught a mouse and decided to feed it to Milt, the alligator, in the Lab. With a small delegation, he started for the Lab. Just about there, wouldn't you know, the mouse got away from him. We hear that Milt made quite a fuss all day, wonder if he heard Walt was coming. . . . Charlie Hartman wishes to retract the statement printed in the column last week. He says that he not only had to pay all of the bill but had to tip the waitress too. . . . We all laughed when Whitie VanAuken put the hot pipe in his pocket and did a jig, but when he holds a cigarette 'till it burns him, that's the last straw. . . . A farewell party was held at George Delf's home for Ed Wheeler and George who retired April 1. There were lots of good things to eat and most of the Power House gang was there to wish them years of happiness. They received several gifts, including billfolds, money, a real twist of Virginia tobacco which was contributed by Grover Walker, and corn cob pipes; also a flower pot for George. You can ask Scotty about that. We were sorry Leo Hirshey from Bldg. 4-B couldn't be there, too. . . . What's this! Is toothache catching in the Power Plant. First it is Scotty and then it is "Porky" Mastro sporting a nice plump jaw. . . . We hear Sammy also has a new streamlined bicycle that he rides to work on Sundays.

One way to leave footprints on the sands of time is to get out and dig.

Let's Eat!

CAFETERIA and RESTAURANT MENUS

APRIL 18 THROUGH APRIL 22

BROADWAY	TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:60 A.M.

Special dinners and parties arranged upon request.

Menus Subject to Change

Inquiring Reporter

WHAT DO YOU LIKE MOST ABOUT SPRING?

LULU M. WITTE
Taylor St.

"After a cold and dreary winter, I like spring because everything comes to life. People seem to take a new slant on life. Everyone can shed their winter clothes and start to work outside. What is more enjoyable than being out in the fresh air and sunshine?"

SUE WAGNER
Bldg. 19-3

"In the spring I like most to see Nature bringing things back to life: the buds on the trees, the grass fresh and green, and little flowers peeping through the ground. Spring makes me feel more than ever that God's in his heaven and all is right with the world."

FRED W. ZEHENDNER
Bldg. 12-B

"Spring washes away all cares and worries that winter brings on. The garden, fresh air and God's nature makes one feel free and thankful."

JEANNE GLADIEUX
Taylor St.

"It is then I know that summer is not too far off."

SERENA SLATER
Bldg. 4-3

"It gives you a good feeling when you see the grass turn green and flowers start blooming; and you can be out in the fresh air and sunshine."

Motor and Generator Static

Thought for the Week: "A reputation is a personal possession frequently not discovered until lost."

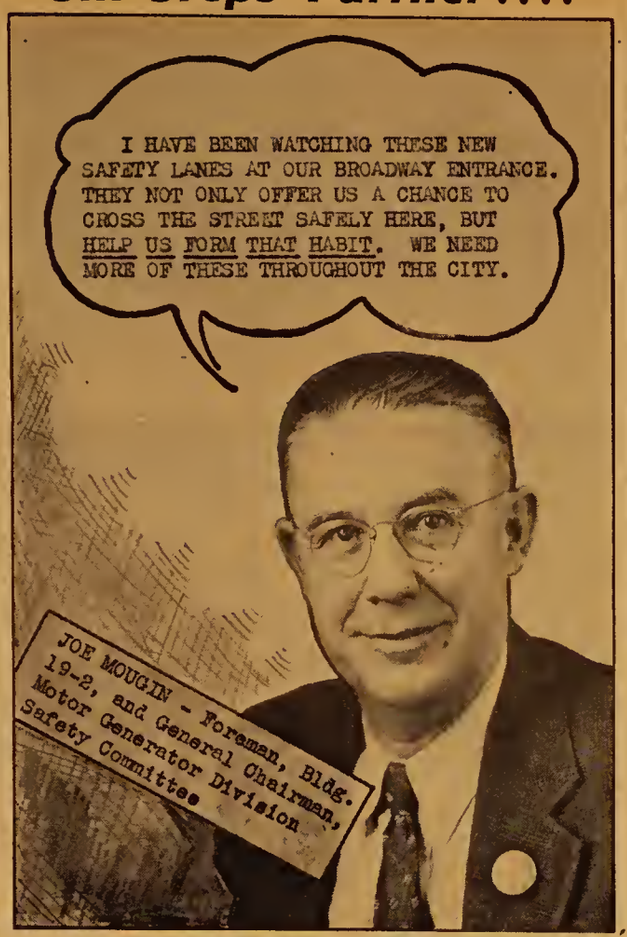
Dear Stranger, kindly doff your hat
And close your eyes to pray.
We offer solemn tribute to
An old, old man today.

His hair is gray, his teeth are gone.
He walks so stooped and slow.
Were it not for his vitality
He'd have died quite long ago.

They use to call him Poison Pen.
A writer of reknown.
But since old age is creeping
His prestige all has flown.

He may not last the summer out
He looks so pale and wan.
So we'll wish a Happy Birthday
To our Mrs. Shultz's Don.

By JIM MITCHELL.



The misdeeds of youth should be a constant reminder that we should ever try to improve ourselves, in the spiritual sense. . . . However, some men never seem to realize this fact until they feel the icy fingers of age creeping upon them. . . . It is then that some make a valiant effort to atone for their pasts. "Pappy" Archbald has been attending a lot of "tabernacle" meetings lately. . . . A dinner party was given at the Berghoff Gardens Friday, April 8, in honor of Mary Banks. Those who enjoyed the party were Helen David, Mabel Stovall, Esther Dalman, Doris Olinger, Ruth Schafenacker, Imo Foley, and Mary Banks. Miss Banks is retiring from the Company April 15. Our best wishes go with you, Mary. Let us hear from you now and then. . . . The name of the new mystery melody is? ? ? We don't have any idea. . . . "Old Poison Pen" had a birthday last Friday. Yes, this writer had a birthday and Fisher, Mitchell, Hobson and Wagner had a Roman holiday. All day long cards, greetings and "gifts" arrived, some good, some bad and some downright insulting. Perhaps the most insulting was the one from Mrs. Mitchell's son Jim that compared us with a "Mephitis mephitisa" (just plain skunk). Through the grapevine this writer learns that James, not satisfied with the indignities he heaped upon us Friday, has composed a poem about our birthday, to be printed in this weeks news. Our opinion is that this fugitive from a "Busco" lake feels the weight of age resting rather heavily on his shoulders and is jealous of our vim, vigor and vitality. . . . Dick Hobson is indeed a lad of many talents. Possessor of 31's largest tie collection, a singer and crooner of note. Mr. Hobson now tells of his athletic accomplishments. "Yes, sir," he relates, "when I was in the army, I was a member of our squadron boxing team, 'Canvas Back Hobson' I was known as in them days." . . . Roscoe Markley, Bldg. 19-1, genius, has performed another miracle. It seems that Roscoe's phone needed some repairs, so Mr. Markley attempted the repairs himself. Through some error, he connected its line to the wire fence around his hog yard. Can you imagine his surprise when he lifted his receiver and was greeted by "Stop The Music" but no dial tone? Mr. Markley, who is not adverse to making an honest dollar, calculates he will help others obtain radio entertainment by building hog lot fences for them to attach their phones to. This, of course, will be for a nominal fee. . . . Monroe Brosius reports that Dick Hobson has invited him to take a ride in his Buick at 100 miles per hour. Sez Monroe, "He can't kid me, that wagon wouldn't make 100 even if he got out and pushed."

Happy Easter. I hope it doesn't rain so that the Easter parade is of umbrellas. All the girls are busy talking of spring housecleaning. From the men's department are heard the usual groans. Of course, to them polishing the brassies would be more interesting. Along with spring housecleaning comes the usual moving. Jerry Snyder and Lucille Miller have been having moving troubles. Lucille is moving to their new place, and Jerry is moving in where Lucille lived. . . . Marie and Frank Dunfee are also moving in their new home. . . . Marcille Thomas has joined the "paint up" squad. She is painting her kitchen a Chinese red. Isn't that a dull color? . . . Verna Bullerman was in Indianapolis last week-end to bowl. Did you make the pin-setters earn their money? . . . If you noticed Alice Brockmeyer dashing around, it is due to the fact her mother and father are celebrating their Golden Wedding anniversary Easter. We sincerely hope they make the diamond jubilee. . . . Speaking of Easter reminds us of eggs, and eggs remind us of Johnny Anderson. If you have a surplus stock, maybe Johnny will help you dispose of them. . . . Harold Kiel too has a way of making money on the side. He is in the fertilizer business. Anyone need about 3,000 pounds? . . . When George Soule came into work last Monday with a black eye, he wasn't such a merry soul. He says a shower fixture got in his way. Now we've heard everything. He's stuck with that story, too. . . . Overheard in the washroom: Helen Biddle says, "Since I got my new permanent, from now on call me 'Poodles' Briddle." Hi, Poodles. . . . Safety note to Charlie Rice and Walter Kryder. When sitting on a thumb tack, for safety's sake sit on the head. . . . Anyone having a birthday and desiring a special cake, Elvira Diller is the one to see. She really takes the prize for cake baking. . . . Delores Wonderly will be more than glad to explain the art of using a milking machine to anyone who has never lived on the farm. . . . Newcomers to the early bird shift are Edna Neal, Thelma Culler, Gene Lauer and Mabel Shinn. . . . Those leaving us to go on second are Hazel Lockwood, Maude Goodrich and Sarah Sowards.

Some rich men's sons shift for themselves only when driving the old man's car.

Six Steps Farther....

. . . AND YOU HAVE FOLLOWED THE PEDESTRIAN LANE AND HAVE BEEN PLACED IN A POSITION TO GIVE YOURSELF AND OTHERS THE GREEN LIGHT. "Give yourself the green light" sounds strange, doesn't it? Nevertheless, you and I have had that unusual privilege for years when crossing Broadway at our Plant entrance.

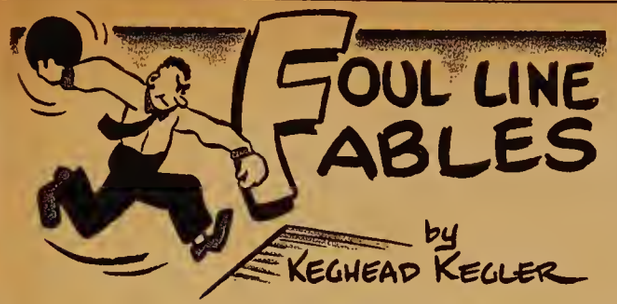
Our city Police Traffic Dept. had these lanes painted, and they are a distinct guide to tell the motorist where to stop and the pedestrian where to cross. THEY MIGHT WELL BE CALLED LIFE LINES. (At this writing, the motorists and bus operators are paying more attention to them then the pedestrians are.)

Thanks, Joe, for helping with this safety message.

HERSCHEL L. SMITH
Safety Engineer

Liby Retires After 23 Years

Grover Liby FHP Div. 13 at Taylor St., was honored last Friday on his retirement after 23 years of service. He is shown in the picture looking at one of the retirement gifts given him by his co-workers. Left to right are Paul Becker, Theodore Reed, Denver Carpenter, Arthur Sorg, Bernard Brake, Mr. Liby, Everett McKee, L. V. Stroh, Charles Sherland, Paul Brandt, Clarence Hartman, Raymond O'Neill, Walter Fruechtenicht, James Gambrell, Richard Braun, Evan Morris, Ralph Dunlap, Wilbur Hinton, and Donald Sterling.



Thisa and Thata "SPECIALTY MOTOR"

by Helen Engle

Birthday greetings to Golda Duff, Martha Scherzinger, Hazel Martz and Ilene Lantz. . . . Never ask Regmore Engeman for a hamburger sandwich. She can't tell the difference between hamburger and hammer. . . . Clarice Woodruff is spending several weeks in San Diego, Calif. with her husband. We hope you have a wonderful time, Clarice. . . . We are sorry to lose Bernice Johnson and Dorothy McGowan. Bernice was transferred to Taylor St. and Dorothy to Bldg. 4-5. . . . Eleanor Whitehouse has been kinda low in spirits and we have been wondering why. We found out that her bowling team lost. Better luck next time, Eleanor. . . . Lorinda Beyerlein has teased Erma Hanny about the peanut boy downtown. Now Erma has something on Lorinda—she saw the peanut boy following Lorinda. . . . Clara Krauskopf and the girls who work with her were bothered one day last week by a mouse. They just couldn't scare him away, so Clara brought a trap and some cheese to feed him. That's right, the next morning she had her victim. . . . Alma Merwin, they tell me, makes the best peach cream pie. How about a sample? . . . Frances Rose was so excited when the guard was in our section the other day. The excitement couldn't have anything to do with running a stop light, could it, Frances? . . . Elva Foulks is taking a week's vacation this week. We know that it isn't to help Evelyn with the housecleaning as she has that all done. He says that he is planting some strawberry plants. The fellows want to know if you are going to plant them with the sugar already on? . . . We are going to miss Clara Krudop who was retired last Friday, but we know that after working as many years as you have you really deserve a good rest. She says that she is going to raise turkeys and chickens. Get your order in now for that Thanksgiving Turkey—I have. At our dinner party for Clara on Thursday our friend Warren Jackson presented her with an orchid with the usual ceremony. She spent Friday visiting her friends in various parts of the building. When Mr. Mettler presented her with her gifts on Friday morning she was very much surprised to see her two long-time friends Helen Stahl of Bldg. 31 and Annette Thomas of Bldg. 19-1 of the old Meter Dept. in which Clara worked. Clara wanted me to be sure and tell you that she thanked each and everyone of you for her lovely gifts and for the good dinner party. . . . A banquet was given by the Specialty Motor Supervisors' Club, April 7 at the Chamber of Commerce in honor of Harry Haberkorn who retired April 8. Several presents were given Mr. Haberkorn by the supervisors and all were called upon for a few remarks. Judging from the tributes and complimentary expression of his fellow supervisors, Mr. Haberkorn can certainly feel that he has many friends and will be missed from this organization. George Prince presided at this meeting and O. J. Mettler, Supt. of Div. 1, made the presentations. Mr. Haberkorn was also presented with a beautiful wrist watch and an autograph book from his co-workers in Bldgs. 4-3 and 4-4. This presentation was also made by Mr. Mettler. All of his co-workers wish Mr. Haberkorn a long and happy life.

Oh, for the good old days when houses with high rents had that vacant look.

The Dickason's Barber Shop team is still leading the Office League by a very close shave of one game. In second place are the Designers who clipped the Blueprint boys for three games and thereby eliminated them from second half championship.

Next week's battle will be a furious one, as the feature will pit the Dickason's Barber Shop team vs. Designers team. The winner of this series will be crowned the champions of the second half and will bowl the Blueprint boys the following week for the Office League championship.

Vic Rump of the Alternators paced the 600 counts with a 627 acquired on games of 210, 193 and 224. Les Shroyer leading the Office league with a 183 average and a member of the now second place Designing team followed closely with a 622 count on games of 182, 212 and 228.

Two hundred scores: H. Goheen, 216; Dick Kent, 213; Bob Hanna, 204; Bob "Sore Thumb" Blomker, 203; Franky Schlink, 202; R. Gettys, 201, and Miller, 201.

Small Motor League

Production and Tools are tied for first place. Drafting and Models are tied for second place and are two games out of first. Two weeks bowling remains, so one can expect a close race to the last game.

Don Kaiser, a member of the Cost Team, who recently returned from Atlantic City after shooting in the 1949 ABC tournament, started burning the alleys for a high single game of 268 acquired with a spare in the first and fourth frames and the remainder strikes.

Imagine a person shooting a 268 count for one game and still not a 600 count reported in the league. Two hundred games were recorded by Les Elward, 205 and 209; "Tough Luck" Lamboley, 222; Harry Brown, 218; Ife Holmes, 214; Ray Lindemuth, 212; Vance, 208; Bob Walt, 203, and Ty Cook, 200.

Masonic League

Here again a scramble exists with two weeks to go and four teams, Ionic, Patrols, Gavels, and Levels, all tied for first place with 24 wins. Second place team, Doric, with 21 victories rests safely in fifth place as result of the four-way tie for first place.

Only one 600 count was registered in this league and that was by Larson on games of 224, 205, and 181. Two hundred games were shot by Somerville, 211; Manor, 203; Martz, 202; J. Smith, 200; Gidley, 204; Crayton, 206; Braden, 200; Trevey, 200, and Bob Hickman, 201.

The high team score for the three games was taken over by the Levels team on a count of 2755.

Apparatus League

The following report from the Apparatus League is one week old. No report received last week. At that time Team No. 5 was still holding on to first place; being six games ahead of Team No. 3, which is in second place.

Bob Langer shot his first 200 score in bowling and a pair to boot. His scores were 205 and 201. We will be looking forward to a 600 and 700 count respectively. As the saying goes, "The first 200 score is always the hardest."

Other two hundred scores: Mason Smith, 202; R. Stanley, 206; Dan Oesch, 220; J. Aumiller, 201; Paul Perry, 221; W. Bocster, 211; P. Bienz, 216; H. Spath, 228; Bill Piercy, 202 and 203, and J. James, 201.

Interdivision League

Taylor St. is still leading this league. According to the number of 600 counts shot, it puts you in mind of the ABC Tournament recently held at Atlantic City.

Bill Glenn paced the 600 counts with a sizzling 677 acquired on games of 250, 239 and 188. Other 600 scores were Westrick, 638 on games of 221, 229, and 188; Frank Matthews, 624 on games of 244, 203, and 177; Murray Johnson, 620 on games of 204, 201, and 215; Erv "Bad Boy" Haugk, 207 on games of 192, 205, and 210; Paul Walker, 604 on games of 196, 163, and 245; and finally "ABC Fame" Walt Mertz, 604 on games of 236, 176, and 192.

Two hundred scores: Les Shroyer, 235; Frank Kopp, 228; Iannelly, 220; Hal "ABC Champion" Fanning, 218; Starke, 212; Koorsen, 208; Dimke, 208; Berning, Jr., 206; Junghaus, 205, and 200; D. Miller, 203; Crowell, 203; Buck, 203; Rump, 202; Habig, 202, and Ivan Parrish, 200.

Two hundred scores from the previous week: Noah Kuntz, 236; Russell Rose, 234; J. Saylor, 230; E. France, 216, and 205; Hal Fanning, 214, and 212; Zelt, 212; George Ludeman, 211; F. Burnau, 208; Schelper, 205; Spath, 203; Iannelly, 202; Paul Walker, 201; Putman, 202, and Berning, Jr., 200.

Ladies' Monday League

Ethel Koontz paced the league with a 540 series on games of 191, 193, and 156.

High scores were rolled by Esther Muzzillo, 206; Barbara Vaughn, 193; Minerva Hofer, 190; Justine Luyben, 185; Vivian Fleckenstein, 184; Dorothy Fuhs, 184; Emma Vaughn, 179; Naomi Longsworth, 173; Edna Koester, 173, and Virginia Buuck, 170.

Decatur Bowling News

Bowling in the Monday Night league ranged from the sublime to the ridiculous. On the sublime side, Jerry Gage came through with the season's high for the league with a three-game total of 673 on games of 257, 213, and 203. Paul Hancher, on the ridiculous side, rolled the season's low with a grand three-game total of 371 (96, 133, and 142). Since misery loves company, Ray Shackley came to Paul's aid by rolling the season's low single, a huge 94. Other 200 scores: Briede, (his first 200 of the year); H. Murphy, 217; Shoaf, 209; Stetler, 209; Laurent, 200, and Cook, 212.

In the Fraternal League, Laurent rolled the high series of 617. Two hundred scores were kegled by Baumgartner, 212; Ahr, 201; Longsworth, 202; A. Miller, 209, and Leonard, 210.

High scores for the men in the Mixed Doubles league were rolled by G. Schultz, 623, and H. Murphy, 600. On the women's side of the talley, L. Nelson rolled a 455. Two hundred games were made by G. Laurent, 226, and W. Hilty, 223, and 203. V. Murphy rolled 158 to top the women.

Bowling and Stuff

The Fort Wayne Bowlers' Welfare Association have launched their Charter membership campaign, which closes April 30. Signing up now permits you to become a member regardless of age. Cost is $1 per year. After May 1, bowlers over 50 years of age will not be accepted. Death benefits amount to $200 and sick benefits are also available. See your league secretary and sign up.

Andy Anderson shot 611 in his singles at the ABC tournament in Atlantic City. Nice shooting, Andy, sorry you didn't get three seores like that.

Anyone desiring to shoot on dust free and spotless alleys without traveling to Atlantic City, see "Wee Wee" Bushong for remedy.

Fellows, Beware. Our good bowler, Hal Fanning, has discovered what is wrong with his approach. The change that is contemplated is a secret and will require some room. No more scores of 422.

Speaking of a score of 422 reminds me to congratulate Hall Fanning on his "gold plated" medal with name and score inscribed. He received it at the G-E Club alleys for obtaining such a score at the ABC Tournament. The medal was presented by fellow bowlers and admirers who also attended the tournament.

Teams and Bowlers returning from Atlantic City, where they were as cool as a cucumber, returned to their home stamping grounds and burned up the alleys. Could it be that the boys want to prove that they were better than the scores indicated, or are they trying to discourage other teams and bowlers from attending a national bowling tournament.

Divisions Enter Teams In G-E Softball League

Any division wishing to enter a team in the Interdivision Softball league this season should mail the team name and telephone numbers to Ray Quinn, Bldg. 20-2.

Kraft Scores 717 Actual In G-E Bowling Tourney

Eddie Kraft's 717 actual-pin performance featured the opening of the G-E bowling tournament last Saturday in the singles division. He had a handicap totaling 756. Second place went to Murray Johnson with a score of 717.

The leaders in the team division are the Apparatus Team No. 2 with a score of 3108. A score of 3097 rolled by the Cost team took second place in the event.

In the doubles section, Don Dimke and M. Junk tallied 1390 to take over first place. A. May and F. Manor are in second place with a score of 1351.

Star bowler Eddie Kraft leads the All-Events division with a total of 1937 acquired in a series of 586 in team, 634 in doubles and 717 in singles.

Action in the tournament will be resumed tomorrow with the following schedules:

TEAM EVENT
Saturday, April 16

In the Spotlight
AT YOUR G-E CLUB
By Bill Allen

Signs of spring . . . Bill Brandt, Paul Dyke and Stan Shargcy, members of last year's National Champion Voltmen working out daily in the club gym. . . . Ray "Pop" Quinn, Interdivision Softball League Manager, surveying the mud-swept diamonds at McMillen Park. . . . Perry Esterline, looking behind motors, transformer boxes or most anywhere around the shop in search of a good pitcher for the G-E Club Major League softball team. . . . John "Red" Braden counting noses for the 1949 Voltmen. . . . Charley "Big Deal" Wilt, Voltmen business manager, booking "big name" attractions for the season. . . . G-E Club Bowling Tournament in full swing. . . . Bill Hunt, chairman, busily engaged in finishing touches for the big all Sports Show, your next G-E Club family night attraction. . . . Warm spring days present problem for Club Steward, Harry Zimmerman as ice cream sales soar. . . . Yes, it must be spring, even the "Hams" are moving out-of-doors, meaning those ball players who ean still run will soon be trying out for Manager Bill Schible's Ham Softball League team (men over 35 years of age).

Former Ft. Wayne Man Named To New Position At Schenectady Works

Byron A. Evard has been appointed Supervisor of Procedures in the Aeronautic and Ordnance Systems divisions at the Scheneetady Works.

Mr. Evard first joined G-E at the Fort Wayne Works in 1930 and was employed in the Meter division, Motor and Generator division, and FHP Motor division here. In 1942, he was appointed Supervisor of Production in the Motor and Generator division at the Kokomo plant. He remained there until 1948, when he was transferred to the Schenectady Works in the Apparatus Manufacturing division on special assignment work.

It all amounts to a total loss when you spend all your money to prove that you have it.

HAM LEAGUE APPLICATION BLANK

Bill Schible
Bldg. 20-1

I would like to apply for a position on the Ham softball team.

Name .....

Bldg. ..... Floor .....

Age .....

Home Telephone .....

Home Address .....

Ham League Schedules First Outdoor Practice

The first outdoor practice for the Ham Softball League will be held at 6 p.m. Tuesday, April 19, at the McMillen park. All ball players are to report promptly at 6 p.m.

There are still a number of openings for team positions. Anyone interested is requested to fill out the blank at left and mail it to Bill Schible, Bldg. 20-1.

Fred Waring Show Brings Top Entertainment To G-E Listeners

"The Fred Waring Show," heard locally every Thursday evening at 9:30 o'clock over NBC's Station WGL, brings to the airwaves the best in musical entertainment through the sponsorship of General Electric. The show has also been signed by G-E for a series of one-hour Sunday night programs on the CBS television network.

There are crowded years of experience, thousands of rehearsals and performances, hours upon hours of composing, arranging and working with his musical organization which go to make up the Fred Waring who puts on the Thursday and Sunday night shows for General Electric, as well as five daytime, half-hour broadcasts for other sponsors.

At first glance it seems an impossible task to keep the broadcasts up to the high Waring level with such a busy schedule. But a look at those years of Waring in the making, shows how it came to be done.

Gets Early Start

Waring made his first stage appearance at the age of six in a church play in his home town, Tyrone, Pa. His first musical performance was as leader of the Boy Scout Drum and Bugle Corps.

Waring started to study electrical engineering at Penn State, but he was distracted from his studies by his brother Tom and two other friends. The four started a rhythm band in which Fred played the banjo. Since all the instruments were rhythmic, the fellows sang the melodies. That was the beginning of the Waring Glee Club idea.

Music gradually assumed the dominant influence in his life when Waring's band started playing dance and theater engagements. By 1921 the band had grown to 10 men and all of them sang in addition to playing 40 instruments. An engagement to play at the University of Michigan and a subsequent Detroit theater date set Waring on the road to success, which he has traveled ever since.

Band Gains Fame

Theater dates, recordings and dance appearances filled in the next 10 years and the Fred Waring Pennsylvanians became one of the best known popular musical organizations in America.

In the early 1930's however, prospective radio employers couldn't see Fred Waring, or anyone else, blending a glee club, orchestra, and soloists into one musical ensemble. They wanted the orchestra, but not the glee club. "Choirs are fine for church, but no good for radio," they said, "Besides it would cost too much." But Fred remained adamant in a battle of "no's" that lasted through 32 separate auditions. It wasn't until the Pennsylvanians auditioned for the thirty-third time—in 1933—that they got the nod.

Since that time Waring has been regularly on the air. His first radio appearance, however, had been made as far back at 1921 on Detroit's WWJ.

Music Library Is Huge

Up to 1922 Fred Waring's orchestra played everything by ear. When you hear the Pennsylvanians now they may use eight or nine intricate arrangements of 50 or more voice and instrument parts each. Over the course of years they have accumulated a library of more than 6,000 of the arrangements that have made the Pennsylvanians one of the most famous musical organizations.

This mountain of music contains at least 400,000 separate sheets. While the library is insured for $500,000, it's real value is without price to the Pennsylvanians, since much of it could not be duplicated. The Waring library is generally acknowledged to be the most extensive and valuable collection belonging to an organization in the popular musical field.

Under the care of Librarians Bill Townsend and Earl Sisson, the arrangements occupy scores of file cabinets in Waring's New York office. There is no such thing as a "dead section" in this library. Townsend and Sisson must be able to lay their hands instantly on any arrangement the versatile Waring group calls for. When a song of the 1920's—such as "Little White Lies"—was revived, the Waring arrangers called for the old score from which to extract a chorus to play in contrast with the modern treatment.

Take Music Along On Tours

One of the music library's most important tasks is to supply arrangements for the Waring personal appearance tours. On a recent trip the Pennsylvanians carried more than 650 numbers, complete with all parts, alphabetized and indexed for quick reference. Even then Waring found he wanted some numbers that were left in New York. So the librarians twice made flying trips to supply the desired copies.

When a new arrangement is accepted by Waring it is the library's job to have it copied into parts for the various voices and instruments. With the intricate arrangements for which Waring is famous, this alone is a tremendous task. Sometimes it is a race against time, and the arrangements reach the singers and instrumentalists with the ink still damp on them.

Who's Who With Waring

Members of the Fred Waring organization includes:

Don Craig, who worked after class hours as a radio disc jockey while he was in high school, is a choral assistant. He also sings bass, and is master of ceremonies when Fred is absent.

Lara Hoggard, another choral assistant, and **Gordon Berger**, featured baritone, were both music professors at the University of Oklahoma before joining the group.

Roy Ringwald, who is famous for his "Battle Hymn of the Republic" arrangement, lives in New Mexico, and sends his work in by air mail.

Poley McClintock drums with a twinkle in his eyes, croaks choice remarks in a frog voice, and is adept at a "not me, teacher" expression. Poley played drums in the Boy Scout Fife and Drum Corps which Waring led at 12 years of age.

Hugh Brannum, famous as "Uncle Lumpy" who creates and tells the "Little Orley" stories, was a Marine in World War II.

Joe Marine, ballad singer, fought through the Battle of the Bulge and joined the Pennsylvanians after he returned from the service.

Virgil Davis does some of the Waring arrangements. He also is an instrumentalist with the orchestra—equally adept at playing the saxophone, flute, piccolo, clarinet, and trombone.

"Buss" Dillon, percussion and sound effects, was a drummer in his high school orchestra, and a professional musician at 13.

Virginia Morley and **Livingston Gearhart**, talented duo-pianist team, met and formed a partnership in France a few months before the war began.

Jane Wilson, lyric soprano, and **Dave Glisman**, bass, are both graduates of Northwestern University. Jane studied journalism in college and turned an interview with Fred Waring into a successful audition when Fred was more impressed by her singing than by her interviewing. She makes a hobby of designing her own costumes.

Gordon Goodman, former boy soprano, was auditioned by Fred and is now the Pennsylvanians' stratospheric tenor. His phenomenal singing range gives his sweet ballads a style of their own. His hobbies, acquired as a boy in his own native Rocky Mountains, are hunting and fishing.

These are but a few of the members of the Fred Waring organization, which brings you the best in musical entertainment under the sponsorship of General Electric every Thursday evening at 9:30 o'clock over Station WGL.

FORT WAYNE WORKS

Volume 32 FORT WAYNE, INDIANA, FRIDAY, APRIL 22, 1949 No. 16

155 Share $1,555 For Suggestions

A total of 155 employees shared $1,555 in suggestion awards this week.

Harry H. Hire, Specialty Transformer Div. 93, received a $50 award for his suggestion on finishing coils. M. D. Warner and Clarence Shanebeck, FHP Div. 14, divided $50 for their suggestion on changing pump motor and shields. Also sharing $50 are Roy Braser and Clifford Smith of the DeKalb plant. Their suggestion pertained to the rotor die indicator gauge for punches.

Forty dollars went to Edwin W. Stute, FHP Div. 13, for his idea to change the die for back plates. Glen Davidson and Gerald Wilson, DeKalb plant, split a $30 award for their suggestion on needle valves for Norton grinders. Joseph A. Burton, Motor and Generator Div., received $27.50 for his suggestion on salvaging cooler plates.

Those receiving $25 awards were Warren G. Jackson, FHP Div. 1; Sylvia M. Baughman, FHP Div. 13; Edward Brockhall, FHP Div. 17; Walter Beeth, FHP Div. 33; Rex Michael, FHP Div. 33; Raymond Bleeke, Decatur plant; Madge Jones and Bernice Miller, Decatur; and Ruth Shull, Bldg. 8-2.

The following suggestors received awards ranging from $5 to $20:

FHP Motor Div. 1: Arthur M. McNamara, Delphos A. Winter,

Number Of Stockholders Increases Over Last Year

The General Electric Company had a total of 249,886 stockholders as of March 18, 1949, the record date of the dividend payable April 25, William W. Trench, Company secretary, has just announced.

This notes an increase of 287 stockholders over the total of 249,599 reported for the corresponding period of 1948, Mr. Trench said.

More than 25 per cent of the stockholders are small holders owning from one to ten shares, the Company secretary said. Brokers, banks, bank nominees, and other business enterprises total less than two per cent of all stockholders,

(Continued on Page 3)

Daylight Saving Schedule

At midnight Saturday, April 30, clocks throughout the city will be set forward one hour to Eastern Standard Time. However, the Broadway and Taylor St. plants of the Fort Wayne Works will not change their clocks to Eastern Standard Time until midnight, Sunday, May 1, at which time the least number of people are working.

Any third shift operators working on Sunday night will ring in on Central Standard Time and ring out on Daylight Saving or Eastern Standard Time, so that the interval worked will be one hour less than the clock card registration. The Payroll sections will take care of this adjustment in time.

This also applies to the Decatur plant.

C. A. Matson

Works Manager

Announces Price Reductions On Definite-Purpose Motors

FHP Manager States Price Cut Is Result Of Standardization In Some Lines

Price reductions ranging from 3 to 14 per cent on certain definite-purpose models of fractional-horsepower motors were announced here recently by the General Electric Company.

M. E. Lord, Manager of the Fractional Horsepower Motor divisions, said that the reductions affect standard sump-pump motors, oil-burner motors, belt-drive fan motors, and certain horsepower ratings of standard jet pump motors.

According to Mr. Lord, the reductions were made possible through cost improvements resulting from standardization in these definite-purpose motor lines. He emphasized that the price reductions apply only to these definite-purpose models and that no general price chance is contemplated.

Fractional - horsepower motors affected by the price cut include:

The standard ½ horsepower, single-phase, sump-pump motor which was reduced five per cent,

Wire Machinery To Be Moved Here From York, Penn.

The transfer here of all glass-insulation equipment from the wire division at the York, Penn., plant, was announced today by Robert Wylie, General Superintendent.

The equipment will be moved to the Wire Mill at the Taylor St. plant starting next month. Part of the machinery will be moved during the first half of May, and the remainder will be transferred early in June.

There are four insulation machines and two re-spoolers.

Second Shift Foremen To Hold Party April 29

A party for second shift foremen will he held Friday, April 29, at Sorg's barn, just off the Bluffton road. The program will begin at 12 midnight. The committee in charge of arrangements includes Joe Wyss, Taylor St., Floyd Garland, Bldg. 17-2, and Harley Springer, Taylor St.

G-E Board Of Directors Make Amendments To Liberalize Savings, Stock Bonus Plan

Employees buying U. S. Savings Bonds under the G-E Employee Savings and Stock Bonus Plan may withdraw some of the bonds purchased during a current year, and leave on deposit with the Company other bonds purchased in the same year, without forfeiting their right to the 15 per cent stock bonus when credited as of the end of the year on the bonds left on deposit.

The ruling was made by the Board of Directors of the Company at its meeting in March, John D. Lockton, Treasurer, announced. At the same time the Board liberalized the plan's provisions relating to payments in the event of the death of a participant who had not selected a beneficiary.

A participant in the plan, at the time he surrenders the appropriate receipts to withdraw bonds purchased for him during the current year, may elect to reparticipate in the plan or to continue his current participation at the time of such withdrawal.

As an example of the practical application of the new ruling, a participant who holds receipts for bonds paid for at the end of January and February this year may withdraw either the January or the February hond, but he is not required to withdraw both bonds.

That applies only to the purchases during a current year. It does not for a prior year or years. If the participant wishes to withdraw bonds purchased during 1948, he would be required to withdraw all of the bonds purchased for that year. For example he could not take his October, 1948, bond and leave his November and December, 1948, bonds on deposit. The reason for the ruling is that the 15 per cent stock bonus for a prior year or years will have already been contingently credited to the account of the participant for such year or years. A partial withdrawal would necessitate splitting the stock bonus which would not be practicable, Mr. Lockton explained.

Credit for the G-E stock bonus occurs as of Dec. 31 each year and the amount of the credit is 15 per cent of the cost price of the bonds purchased during the current calendar year. Therefore, in withdrawing any of a current year's bond purchases, there is no stock credit to adjust.

The participant loses the stock bonus when he withdraws a prior year's purchases, but not the income on the stock that has been credited to his account. He is paid the latter in any event.

Greater flexibility in paying the stock bonus and accumulated income in those instances where a participant dies without having designated a beneficiary is the intent of a second amendment to the plan. Under it the Committee seeks to simplify administration by reserving the right to pay over and deliver the stock bonus and accumulated income either to the legal representative of the participant or to any one or more of such dependents or distributees of the participant as the Committee may designate.

17 Pass Red Cross First Aid Courses

The following people successfully completed the Red Cross First Aid courses which were held recently at St. John's Lutheran church: Ann Fairbanks, Lyle Rupert, Olka Johnston, June Hines, John Wilson, William Curtis, Fredrick Bishop, Norman Jacobs, Mrs. August Eisenacher, Mrs. Arthur Meyers, Hazel Bennett, Nora Spencer, Berneta Welbaum, Mary Heymann, Alta Bishop, Mary Sitko and James Battrick.

Containers Placed At All Plant Gates For Cancer Society

Containers for contributions to the Allen County Cancer Society have been placed at all gates to the Broadway, Taylor St., and Winter St. plants.

The national goal for the drive, which ends April 30, is $14,500,000; the goal for Allen County has been set at $21,000.

One of the projects sponsored by the Allen County Society is the detection center at 714 Fairfield Ave. It is the first independent center in the state.

Under the direction of the Fort Wayne Medical Society, the center is staffed by volunteer members of the cancer society. The nominal fees charged for examinations aid in support of the center. Examinations are given Tuesday, Wednesday and Thursday mornings.

Funds from the current April campaign for cancer control will underwrite maintenance of the center and "Little Red Door Services" of the Allen County Cancer Society. These services include educational programs, literature, and home-care materials for cancer patients.

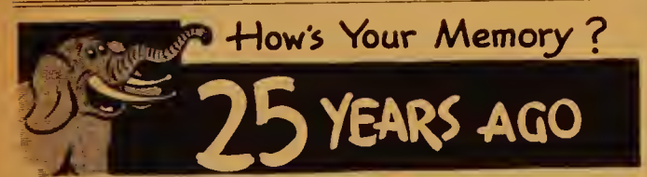
Help Stop The Ruthless War Cancer Is Waging Against Us

The American Cancer Society, now conducting its annual April campaign for funds in Allen county and throughout the nation, has two fundamental aims in expenditure of the funds received.

The first is education of the public in detection and early treatment for cancer. The second aim is aiding in the care of cancer patients to bring about their recovery or to alleviate their suffering.



We are hampered in our efforts to control cancer because its "cause" is still unknown. But American Medical Association and American Cancer Society leaders say that one half, or at least one third, of the 200,000 annual cancer deaths could be prevented.

Cancer is now the second greatest killer of Americans. Babies are sometimes born with it. Over 2,000 persons under the age of 21 die with it every year. More than half of all cancer deaths occur before the age of 65. Cancer kills 60 per cent more men and women between the ages of 45 and 60 than are killed by all contagious and infectious diseases. It is the chief cause of death among women between 30 and 60. It is responsible for one out of four deaths among women between the ages of 45 and 60. No age group is free of cancer.

World War II cost each American $640 a year. But to fight cancer, we contribute less than 18 cents per person, although cancer killed more than twice as many Americans during the war as combat did.

Since we don't know what we're fighting, the battle against cancer is by nature a difficult one. All we can do is to keep the enemy from landing; or failing that, crush him on the beachhead. It will take great sums of money to stop this ruthless war cancer is waging against the unarmed people of this country; but conquest will make victory priceless.

The ladies of the plant entertained the gentlemen at a Leap Year dance on April Fools' day. In order to attend the dance each girl had to have a partner whom she had asked to accompany her, and no young man could get in without having been asked by a girl. In short, there were no wall flowers at this dance and no seats provided for such. Each girl, after she had obtained a young man's consent to attend the dance with her, provided herself with programs which she filled out prior to the dance.

However, there of course were obstacles to be overcome. Some girls were too bashful to ask young men to be their partners, and others did not know any young men to ask. Consequently, Miss Kinna was forced to open up a matrimonial bureau. She obtained the names of the girls who wished to go but lacked partners, and then she went about and obtained the names of the men who really felt themselves willing and eligible to go. And in order to make things run smoothly, she also found out each girl's and man's specifications for a partner. Some of these are exceedingly interesting. For instance, the following specifications were given by some of the men: Small both ways; stylish stout and without a pharmaceutical complexion; without bobbed hair; bobbed hair and with a tile-mill complexion; red hair—bobbed; good looking—Gladys Haiber's type; "the kind men don't forget;" pretty bobbed head; red head, bobbed, not too tall, blue eyes—that's all; factory girl not over 5 feet; a charming young lady of good looks, rather tall (not short), well built—someone with a "good line;" between three and eight feet, man funny enough so don't get a funny girl. While other gallants sang to the tune of "the thick and the thin, the short and the tall, I don't give a rap, I love them all." On the other hand, some of the girls turned in the following specifications: Dark, without bobbed hair, glasses, "kinda" stout; not too tall; anything just so he is a good dancer.

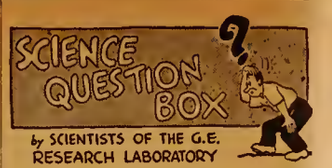
After Miss Kinna had finally managed to pair off these "orphans" everyone was happy, and when the day of the dance rolled around every one was standing on his toes with eager anticipation. Some had a strong suspicion that there would be no dance at all, which occurrence would carry out the April Fools' day end of the thing. But most of the people had not adulterated their enthusiasm with any such suspicion.

Finally at 12 o'clock sharp the girls hurried to various parts of the plant after their promised partners and escorted them over to the dance floor in Building 16-2. They helped the young men down the stairs and up on the way over, held the doors open for them, always allowing the young men to precede them through doorways, and in every way showed them the courtesies they themselves know so well.

Inside they found the hall gaily decorated in blue and white crepe paper and Mr. Kelley's orchestra at one end waiting for the signal to begin. The chaperones, the Misses Martha Scherzinger and Florence Case, and the Messrs. F. A. Thompson and C. A. Bireley were also there ready to receive the crowd.

About the time everyone was getting used to seeing through the haze of paper the music stopped and to the amazement of all the dance was over. There had been seven dances in all, two fox trots, two waltzes, one one-step, a circle two-step and a tag dance.

The dance led to at least two Leap Year dinners. One of these dinners, attended by the Misses Ann Ball, Isabelle Ueber, Magdalene Welch, Gladys Haiber and Mary Harlan, and the Messrs. Paul Spiegel, Jack Renner, August Weisenburger, Ray Niebel and Arthur Slane, was given just before the dance in the officials' dining room; and the other, attended by the Misses Florence Lindeman, LaVera Vail, Beulah Kinna and Dorothy Hormel, and the Messrs. Neal Hensh, Ewald Kimm, J. T. Fredendall and Clarence Roembke, was given directly after the dance in the same dining room.



We hope you all had a very Happy Easter. Although the weather made it look more like Christmas, it was a good day to be with family and friends. . . . Some folks remark he's as strong as a mule, but not so with Clarence Coulter. He's stronger. Clarence walked the old mule around the farm so long that he finally laid down and died (the mule that is). . . . John Ruhl, tropical fish expert says, they're growing like weeds, and we may have a fish fry any day now. Is there any gold in them thar fish, John? . . . Milford Crick is in the market for a new car. His Buick is about gone. About all there is left is a front spring, radiator cap, rear fender, one windshield wiper and enough air for 2½ tires. . . . Robert McCollister is really losing weight the wrong way. Bob's gone from 200 to 236 in no time at all. . . . There's talk around that Tom Hutsel is henpecked, because he goes to the style shows with his wife. We don't think so, we think it's the other way around. It takes a lot of courage for a wife to take such a handsome husband to see those beautiful girls all decked out. . . . Happy birthday to Elizabeth Clevenger, April 19; George Green, April 21; and Clarence Ward on April 23. . . . Thanks to all you nice people of the Broadway and Taylor Street plants for your swell comments regarding our Good Friday issue. We want you to know that we appreciate it. Such nice things make us feel that our efforts are not in vain, but rather add a spark to life which encourages us to try and do a better job as we go along. Thanks again, folks.

Insulation News

A little thing like the weather didn't keep Dorothy Baumgartner from parading her Easter outfit. Dorothy says she spent three months shopping for it and neither rain, nor sleet, nor snow could stop her from wearing it. In fact, she said the rain worked just like Vigoro on her corsage, and made it sprout with new blooms. Don't carry this too far now, Dorothy. . . . Bill Hattendorf was really disgusted with Easter weather. He splurged this year and had his good suit cleaned, but he claims the cleaners shrunk it. That's what you get for wearing your finery in the rain, Bill. Why not take it up with the weather man, instead of the cleaners; that is, if the weather man is still among the living. If wishes could kill, the weather man would have dropped dead. . . . Have you always wondered why the Easter Bunny has a shiny nose? If you're stymied on this riddle, Russell Flaugh will gladly supply the answer.

Q: What is the Moon made of and how big is it?

A. The surface of the Moon seems to consist of a pulverized material such as powdered pumice. This may be partly meteoric dust which has settled on the surface over the ages and partly powder from the Moon's own rocky crust as a result of great and sudden temperature changes. The general composition of the Moon is doubtless the same as that of the Earth, since it was probably formed from the same raw materials. In fact, according to one theory, the Moon consists of matter torn from the Earth in the remote past, the Pacific Ocean basin being the cavity which it left behind. The Moon's diameter is 2160 miles and its mean distance from the Earth is 238,857 miles, though its actual distance varies from 221,463 to 252,710 miles.

155 Share $1,555 For Suggestions

Receives $25 For New Method

Gaylord Morris, Bldg. 26-3, is shown receiving a $25 suggestion award from Chester Lichtenberg, Assistant to the Works Manager, and W. E. Holmes. Mr. Morris recommended a new method of determining the time required to wind transformer coils.

Elex Club Announces Plans For Mother, Daughter Party

The Elex Club is planning to hold its annual Mother and Daughter parties Thursday, May 5. The day girls' affair will begin at 8 p.m. and will be held at the G-E Club gym. The party for the night girls will be at the YWCA with a luncheon being served at 12 noon.

Dorothy Koomjohn, concert pianist, and Ogden's saxophone quartet will be featured on the first shift girls' program. The night girls will have for their program Vernon Carr, magician, and Delores Patterson, vocalist.

Each mother of Elex members attending the parties will receive a gift from the club. There also will be prizes for the oldest and youngest mother, the one coming the greatest distance, and the oldest grandmother attending the party. This year there will also be four attendance prizes for the mothers.

Tickets for the day girls' party are 75 cents, and for the night girls' session are $1 each. Reservations can be made with contact girls and must be in on or before Friday, April 29.

G-E Films To Be Shown At Fort Wayne Drive-In

"Excursions in Science," a series of General Electric films, will be shown at the Fort Wayne Drive-In Theater, 5800 Bluffton Rd., starting next week.

The first film will be shown Sunday and Monday, April 24-25, as a short subject with the feature, "Song in My Heart." The second in the series will be shown June 16-17, with "Fuller Brush Man;" and the third G-E film will be presented July 16, along with the double-feature program of "Adventures of Don Coyote" and "Magnificent Brute."

Stockholders

(Continued from Page 1)

while trustees, guardians and other fiduciaries number about 10 per cent. Various educational and charitable institutions owning G-E stock total approximately one-half of one per cent.

Price Reductions

(Continued from Page 1)

effective Jan. 17, resulting in a new list price of $27.11.

Standard models of oil burner motors rated ⅛ and ⅙ horsepower which were reduced, as of Feb. 23, 14 per cent and 12.1 per cent, respectively. New list prices are $20.28 for the ⅛ horsepower motor and $20.72 for the ⅙ horsepower motor.

The ¾ horsepower, National Electrical Manufacturers' Association Standard, single-phase, jet pump motor which was reduced nine per cent, making the new list price $45.35.

The one horsepower, NEMA-Standard, single-phase, jet pump motor which was reduced 9.2 per cent to a new list price of $58.59. Prices on off-standard jet pump ratings were not reduced.

Mr. Lord said a revised line of split-phase, belt-drive, blower motors, solid or resilient base, is being announced for shipment, starting in May, at prices approximately three per cent lower on the ⅙ horsepower rating and six per cent lower on the ¼ and ⅓ horsepower ratings. The list prices of the new standard solid-base motor models are $15.59, $17.21, and $21.81 for ratings ⅙ through ⅓ horsepower.

Price reductions also have been announced on the small 6.292 inch diameter, ½, ¾ and 1 horsepower single-phase motor parts of welded-core design for commercial hermetic refrigeration compressors.

Since OPA went into effect in 1941, the price level of General Electric FHP motors has risen only 47.4 per cent; compared to a composite rise of 94 per cent in the price level of copper, steel and castings, which are the component materials used in manufacturing electric motors.

Ye Old Meter Girls Plan Spring Party

Ye Old Meter Girls' spring party will be held at 8 p.m. Tuesday, April 26, at the Dehler-Hughes hall. Tickets for the party are 50 cents and anyone desiring to attend should make reservations immediately.

Co-chairmen for the evening are Mrs. Wilbur Lee and Mrs. Willard Stephen, assisted by Catherine Wise, president of the group.

Quarter Century Club Sends Membership Cards

Membership cards have been mailed to all members of the Quarter Century Club. Any member not receiving a card should contact A. C. Hartman, secretary, Bldg. 8-2.

26-3 News

By Mabel Odel

Morris Felger can take all the curves on the city streets without a mishap. A bend in the river plus the super speed of his boat can turn all the world upside down for him in the middle of the stream. . . . Here are a few fish stories of the past week: Wade Bowman caught a cat fish that was too large to go in a 50 lb. lard can. We're told he had to tote it home under his arm. . . . Bill Slater is getting all set to go after the ones that Wade missed. He has been painting his boat and tuning up the motor with that far away look in his eye. . . . Hap King has the river all churned up fishing for channel cat; without luck so far. . . . Floren Leiberenz must have told his story last. He went fishing and brought home a big pan of mushrooms. Wonder what kind of bait he used? . . . Our good friend Wendell Harshman from South Whitley limps in with some tall tales that tops them all. They're just like the jackpot on the "Stop the Music," they grow, and grow and grow. . . . Frenchie Chilcote is right up there with the brass hats now. His new secretary, we hear, is Helen Wagner. We wonder what it is that makes Martha Warren hesitate? . . . Gertrude Kummerant doesn't want anybody (not even the sweeper) messing around in her repair shop, so she keeps the door locked. You should hear her sing the blues when she has to do her own sweeping. . . . Cora Bucher is running close competition with Daisy Mae, only she is trying a new technique. She bought a new Chevy for her drawing card. . . . We wish a happy birthday to Francis Leach. . . . We are sorry to hear that Agnes Allomong is ill. She would like to hear from some of her coworkers. Her address is Hamilton, Ind., R.R. 1. A card or a letter would go a long way in cheering her up. How about it, gals? Let's keep her posted on some of the local news. . . . We have heard some funny nicknames for Bob Wiehe and Virgil Buchanan. Bob's is the "old goat." What is it they call you, Virgil? . . . Lena Forker is the proud owner of seven little babies, beagle puppies that is, all for sale. . . . Morris Felger drives a hard bargain. He isn't satisfied when the girl says "yes" to an invitation to an evening's entertainment. He sits home on that particular evening just to see if she will call and ask him over. . . . Florence Schlosser says she doesn't want a man, not even if he was worth $20,000. Look out, fellows, hold on to your heart strings and also your purse it may be a trap. . . . LaDonna Durbin missed out on March 17 by the wearing of the green, but she has a pair of shoes now that would put all of you Irishmen to shame. . . . Some one should teach Gertrude Kummerant the fundamentals of an air gun. They will work if they have a bit, Gertie. . . . We all have our curiosity aroused over all the telephone calls that Blanche Botteron has been receiving. Come on, Blanche, give. . . . Annabelle Blair has a new Nash. One that you push a button, presto a bed. The housing situation doesn't worry her a bit. . . . Our deepest sympathy to Mildred Brower in the death of her sister.

Office Offerings

Jim Voirol has sent out an SOS. He wants someone to help him convince his wife that a trip to Wisconsin would be just the thing. . . . Wayne Jones and Arthur Stuart are leaving us today. We are sorry to see you go, fellows, and we join to wish you both the best of luck. . . . We all feel rather slighted by the conduct of Pat Lahr. Now any number of us would appreciate a week off, but what does Pat do? She takes the extra measle she had and gave it to one of the girls in Bldg. 26-2 office.

Moser Honored For Long Service

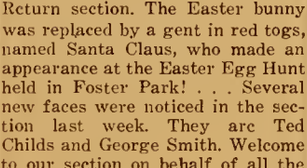
Jesse Moser, Bldg. 6-4, recently completed 35 years service with General Electric. At that time he received a long-service certificate. In the picture are (l. to r.) Jack Heiniger, Henry Reidenbach, Mr. Moser, Clair Lieurance, and G. F. Bond.

Chamber of Commerce Plans Annual Safety Conference, Exhibit

The sixth annual Safety Conference and Exhibit will be held Tuesday and Wednesday, April 26-27, at the Chamber of Commerce.

The first day of the conference, which is sponsored by the Industrial Safety committee of the Chamber, will feature a luncheon and evening dinner meeting. "Purchasing for Safety" will be the theme of the luncheon meeting, and the evening meeting will have as its theme, "Helping the Employee Become a Safe Worker."

Herschel Smith, G-E Safety Engineer for the Fort Wayne Works, will preside at the second day's luncheon, which will feature a "Report to Fort Wayne." Mr. Smith is chairman of the Safety Council.



"Management's Responsibility in Safety" will be discussed at the final evening session.

Industrial safety exhibits will be on display in the Chamber auditorium by 14 firms making safety equipment. A series of public safety exhibits also will be set up in the second floor lounge. Both displays will be open for public inspection from 1 to 10 p.m. during the two-day conference.

Loyd Bodenhamer, of the G-E Safety section, is chairman of the Exhibits committee.

Gus, Mitzie and Vik gathered a flock of hens together recently into the Burry hatchery to discuss ways and means of cleaning up the littered "chicken coupe." The hens called were Lois Burry, Anna Lee, Vera Keefer, Charlotte Brunner, Anita Fitch, Daisy Tannas and "Braunie." . . . We welcome all of the new girls into our section and as there are quite a few of them, we won't mention any names and that way we will be sure not to miss any of them, but to all WELCOME. . . . Those "specks" that Harley Springer sees when he gazes through his telescope can't be stars. Could it be that he discovered a new planet? . . . Walt Netz, Standardizing, likes to come out to Taylor St. to work, but such strange things keep happening to his hat. . . . Welcome to our new nurse Alta Bishop. Hope you like it here with us, Alta. . . . Harold Mosshammer sure is getting absent-minded lately. He was getting ready to wash up the other day, so he began to take his glasses off, but he forgot what he was doing and removed his upper plate instead. . . . The gang around the Die Cast welcome Selma Voigt. . . . Girls, don't mend your hubby's socks, says Willa Bryant, as she has a much easier method. You just wait until the holes get large enough and then throw them away. We agree that it is a time saver, Willa, and a lot easier for us working gals. . . . Wonder how Irma Beard and Anita Fitch came out in their safari to 'Busco to catch Oscar the other day. We haven't heard any reports on it lately? . . . Mary Foote Rose declares that she can't be a hypochondriac, since she never took a hypo in her life. . . . We had several out-of-towners over that grand and beautiful (?) Easter week-end. Among them were Tommy Williams, who went to St. Louis, Mo. and Hollis Mee, who went to Garrett, Ind. . . . Ray Hills has a new horn on his car and everywhere he goes, he blows it just to revel in the sound it makes. . . . Anyone interested in buying a back half of a '39 Packard, please contact Roy Orr at once. . . . Ed Birely is in quarantine again now that the other little boy has the chicken-pox. You had better be careful, Ed or you will be the next one.

The twist in the weather around Fort Wayne Easter Sunday was by far more unusual than any of the occurrences in the Repair and Return section. The Easter bunny was replaced by a gent in red togs, named Santa Claus, who made an appearance at the Easter Egg Hunt held in Foster Park! . . . Several new faces were noticed in the section last week. They are Ted Childs and George Smith. Welcome to our section on behalf of all the group, fellows. . . . We were also given an opportunity to learn how conditions are in Cairo, Egypt, in the person of Mohmoud Shamah. Mohmoud is learning the practical application of manufacturing conditions in this country of the General Electric Co. It was quite an unusual experience for the Repair and Return members to talk to this talented young fellow. . . . Nena Foster, we learn, is thinking of heading East to the John Powers model agency in New York City in the desire to become a popular photographic model. Our comment is merely a silent one, Nena! . . . We are happy to learn that Herb Jehl's father has returned home following a major operation. We all wish him the best of luck, Herb. . . . Mildred (Mickey) Hoover has a new wire trellis, courtesy of Elmer Hemsoth, for her sweet potato vine. It really adds something to your bench, Mildred. . . . With the bowling season over for this year, Ed Bowser is thinking of taking golf lessons for the summer season. Any comment, Ed? . . . We understand the Easter Bunny was very good to your reporter, Bob Mobberly. On Easter morning he found a large box all fixed up with fancy ribbon and all. Upon opening it he found two small white rabbits. . . . Our parting thought: Nature, to be commanded, must be obeyed.

Apprentice BROADCAST

By Mildred Ellis

Bill Owen has spent weeks visiting all the junk yards, and now the big day is near when he will have his car (?) in running order. One consolation, Bill shouldn't be having the same trouble Berkheiser had last week. He was caught speeding in the big city of New Haven. Warren was able to talk fast enough to get out of a fine. When Roby was stopped under the same conditions he wasn't quite so lucky, he had to contribute to some officer's pay envelope. . . . A sure sign of spring: (who can be sure after Sunday) When the fellows start bragging about how big their tomatoes will be this year. Homer Carson is anxious to produce a sandwich tomato—one that is all meat without seeds or air holes. . . . Cigarettes are being rationed again! To Jack Kirklin in Bldg. 4-6. . . . Misfortune dealt the Butcher family a double blow last week. Hillard's brother was hospitalized with a back injury, and the next day his grandfather was injured in an auto accident. . . . We were sorry to hear of the death of Mark McNulty's mother-in-law. . . . Ralph Obringer doesn't know his own strength. He wanted to raise a beam in his house one-fourth inch but he moved it enough to crack the whole wall. . . . While Lew Davis was on tour of Bldg. 17 last week he found the very thing for a tiller on his sailboat, but they wouldn't let him take it home. . . . Work on Hubartt and Kirlin's sailboat had to be halted because Carl's little boy has scarlet fever. They still promise to have it finished by Decoration Day, so all ye brave souls will have a chance for a nice boat ride soon. . . . Notice, girls: Bob Barnes claims walking in the rain is what made his hair so curly last Friday—(could be, but it sure doesn't effect my hair in the same manner.) Bob came to work Monday sporting the new low plunging neckline to be the first in the school to wear the latest style. . . . The establishment of a consulting firm is being considered by Wagner, Jones and Stoup. Object: To help those who don't get 100's on their examination in Trig. Naturally there will have to be a small fee charged. . . . Movies at the apprentice school are just like downtown—popcorn and all. . . . Speaking of movies, since the drive-in theaters have opened Paul and Joyce are their most steady customers. . . . Frank Woenker has his headaches with his ball team. The rumors sound as if Frank is about to lose a couple of boys if he can't find transportation for them to get home after practice. It seems the boys got shortstopped by a guy by the name of Stine or Stine's. . . . Harold Fremion sure is on the ball these days with the N. G., the boys think you are bucking for something, Harold.

A bear in a Coast zoo died—possibly because the weather was unbearable.

To put it bluntly, Paul Gause was tickled pink to see his name in the WORKS NEWS. Here is is again, Paul. . . . We wonder what has become of Wayman Patrick's Pyramid Club. We're waiting to help him spend his winnings. . . . We have "Glamour Girl" material in Norma Bower. . . . If you notice that sad expression on Eddie Noonan's face, it's because he had the misfortune of breaking the brace on his front tooth. Lay off that hard tack, Eddie. . . . Jerry Light has imbibed so freely on those 10 cent raisin pies—resulting in insomnia. Jerry has taken to counting sheep so much that they have become a reality. He can tell by the wool in his eyes. . . . Though he was sorry to leave Bldg. 2, Guy Secaur, was very enthusiastic about his transfer to Bldg. 1. . . . We haven't had much to tell about Dale Cowan, but we do know that he is still interested in these big political arguments and will challenge anyone to a good debate. . . . We thank the gang for the fine response in the Red Cross drive. We know you would not let such a worthy cause down. . . . When it comes to crocheting, Mable Eyanson is a whizz. She recently completed a darling dress for her granddaughter. Very lovely work, Mable, maybe you will make one for us someday. . . . Some people sure are lucky when it comes to thinking up these good suggestions to better their working conditions. Like Marcile Jones and Bernice Miller, Inc., they sure hit the jackpot on their idea. Keep up the good work, girls, you might find a solution to the double nut block buster. Congratulations, lucky gals. . . . Sorry to see Bob Shoup leave us again. We'll miss your cheery words and smiling face and also all the news you so energetically obtained for us, thanks, Bob, for the items. . . . Would it be asking too much of all employees to keep the street clear at midnight so other cars can get through. Some of these people have the nasty habit of blocking traffic and cause a great deal of confusion. So please, fellow employees, please cooperate. . . . Being married 39 years is a long time, but for Amos Byrd those years were happy ones—congratulations on your anniversary. . . . Chop-chop, those new molars Vilas Bolinger is sporting are deluxe. . . . Only a wild cat could scratch such slashes, Eddie, better go easy on that razor. . . . When your dogs get tired you're done. Iola Hamerick complains her feet hurt on the bottom so bad they keep her awake at night. Nothing serious, Iola, they're only barking, and a barking dog is never dangerous. . . . Leona Fruechte is taking time off for several weeks. It's no vacation but just a recuperation. . . . Alice Lake has been reported on the sick list. We are anxious for your return. . . . Leona "Red" Tinner has an interest in Kansas. No it isn't an oil well or coal mine; anyway she's heading west next week. We will be looking for a nice report on your return. . . . Junior Lake has a hankerin' to go on the night shift. Why the sudden notion? . . . Speedball Steele was really busy while George was sick. He sure was glad when his partner returned to work. . . . Another Bldg. 1 employee transferred to Bldg. 2 was none other than Mike Clauser. . . . Jerry Light is in the market for hip boots—fishing will be good this year according to the fisherman's almanac. What size do you wear, Junior? . . . Paul Gause is going to raise turkeys. . . . Chet Nelson looks handsome with his dentures. . . . We welcome the new test engineer, Dave Kirby. . . . Barbara Roop's boyfriend was rather embarrassed the night he was waiting for her at the gate at 5 p.m. and discovered she had gone home a little after four. . . . Did anyone see the eclipse? It was really something to see. . . . Here is another one of Christine Andrews' poems:

Chemistry

Chemistry is a study,
Of all there is about,
Somehow my mind seems muddy.
When I seek to search it out.

Nature has really moved in on us. A robin has built her nest in the tree outside the office door, and we musn't forget to mention the nest of four little baby bunnies out in the lawn. Note: Increase of one since last week's report, due to a miscount.

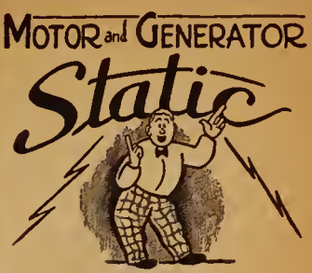
Receives Gifts At Retirement

When Mary Banks left the Company recently for retirement, she received numerous gifts from her friends in Bldg. 31-1. She is shown opening her presents at her desk. Looking on are (l. to r.) Althea Tarr, Agnes Harber, Goldie Lutz, Leona Varner, Bonna Lou Broyles, Donnabelle Dawson, Bea Collar and Betty Schoenherr.

Even though Easter turned out more like Christmas the spirit of the holiday prevailed, and Monday morning its memory was still lingering on in the form of flowers and bunnies. Louella Welbaum and Mary O'Brien were wearing the flowers and Dottie Fletter had a very cute little pink bunny. . . . If you've noticed that Betty Millhouse seems to be walking on air, it's because she's been riding in their new Plymouth. . . . Poor Buck Buchanan, says he's aged 15 years all due entirely to rolling the lawn last Thursday. Buck discovered that he had about 102 muscles that hadn't been used recently. Oh! his aching back. . . . 'Tis nice to see our little Eva Westrick back and also a happy birthday (April 3) to you, Eva. . . . Two of our former colleagues, Virginia Miller Goeglin and Charlotte Grooves Kircofe paid us a pleasant visit recently. It was certainly nice to see the gals again.

White Is Appointed Assistant Manager, Production Service

G. D. White



G. Doyal White has been named Assistant Manager of Production Service, Fort Wayne Works Contributing and Service Division. He will also continue as Purchasing Agent.

An employee of General Electric since 1912, Mr. White first worked in the special machine section as a time clerk. He then transferred to the General Tool division. He has done various work in the division, including tool design, cost work, and production work. From there he was assigned to the Central Planning section, and later became associated with the General Service division. During most of this time he has worked in the nondurable tools and supplies section, and in 1948 became the Purchasing Agent for the Works Contributing and Service division.

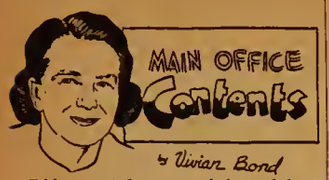
He is married and lives at 825 Pasadena dr.

One of our outdoor men, Glen "Bird Boy" Hoon thought we had a very warm week-end. According to reports he should have been sweating with those two wool shirts, a sweater and a jacket on. We wonder if he will wear his flannel underwear on the Fourth of July. . . . Glen Ramsey's stirring up our Republican ranks when he insists the NRA was started under Hoover's administration. . . . Carey Baker was having trouble getting his apron on the other day. Elusive things, aren't they, Carey? You proved to us that you're still pretty fair on your feet. . . . Our gentleman of the week is Ralph Steward. If you happen to be in the Employee's Store when Ralph is there, he will always trade numbers with you if you are in a hurry. . . . Clyde Spangler really had a pale look when that big grinder wheel flew apart in front of him. He says that the farm was never like this. . . . Mrs. Jackemeyer has a foolproof way of reminding her husband of what he is to remember on the way home from work in the evening. She wraps the note in his sandwiches or cookies in his lunch box and then ties a string around Norman's finger so that he remembers to eat his lunch. . . . Our apprentice, Delbert Meyers, intends to help his mother with spring house cleaning on his Monday off. . . . We understand that Glen Kline is planning to bring his own camera for the next group picture to be taken. He can guarantee results since his outfit is "tried and proven." . . . "Swing her pa, swing her ma, swing that gal from Arkansas." Agnes Ditlinger and Johnny Marks can tell you that square dancing is getting more popular than round dancing out at the Hoagland Barn. . . . Our congratulations to Arleen Reinke of the Tool Division office and to Dorwin Stanley who are being married tomorrow evening at Zion Lutheran Church. The reception is to be held at the Log Cabin beginning at 8:30 p.m. At a dinner recently given in her honor at the Indiana Room of Hotel Indiana, the girls of our office presented Arelen with a pair of figurines. Our best to both of you.

Thought for the Week: Make no show of taking great delight in your victuals; feed not with greediness; cut your bread with a knife; lean not on the table; neither find fault with what you eat.

* * *

Alas, they say I'm growing old,
And it hurts me to the core;
But I strive to keep a pleasant smile
And never to act sore.



I'll admit that youth has left me,
But I don't think they are fair;
For the fellows that accuse me
Have false teeth and real gray hair.

By Jim Mitchell.

Here is a tip on the "Mystery Melody" Walt Disney's "March of the Seven Dwarfs." . . . Jim Mitchell enjoyed a week's vacation last week. He spent the entire week hunting for the Busco Turtle. . . . Ran into Dick Hobson the other day. "Say," he sez, giving a dirty look, "You will have to quit printing things about me that are not true." "What do you mean," we answered with a smile, "you do have the largest collection of neckties in Bldg. 31 don't you?" "Yes," he replied, "And you are a singer of note and do drive a Buick, don't you?" we asked. "Well, yes," came the answer. "Then what are you kicking about?" we continued. "But that title 'Canvas Back Hobson' 'taint right. None of the WAC boxing teams ever floored me, besides the only nickname I ever had was "Corn Cob," and that was when I was a mere lad." Feeling properly ashamed, we are writing this so you, dear reader, will understand. . . . James Mitchell has suffered one of life's greatest disappointments. He just took a week's vacation and most of the folks claimed they didn't know he was gone. But we knew, James, everything was so quiet and serene without you around. Pappy Archbold sat and chewed his finger nails, clear up to the elbow.

Ramblings 31-2

Recently we had an epidemic in the Drafting and Engineering Sections. Elgie Ginder and Dean Shaffer, draftsmen, and Myrt Baird, engineer, had pink eye. The epidemic had a tragic affect on Venus Fan. During one of her nightmares, she dreamed she was at Mr. Shaffer's home and his children had pink eye. Then it was discovered that Venus too had pink eye, but Venus had her pink eye on the bottom of her feet. All this time we thought people got athlete's foot on their feet. . . . Curly Mannan has been painting the inside of his house. He somehow managed to get finished in spite of two small children, who are apt to get their fingers on the walls. Curly said, "who will help me keep the walls clean?" John and Mary agreed to help. Curly wasn't satisfied to let well enough alone; he had to tease little John and Mary about fingers on the wall. Mr. Mannan pointed to a place on the wall and said, "I put my mark over here, where are you going to put yours?" The children, a little puzzled, just looked at him, but the next day the children looked again where they thought Dad put his mark. Then they put their marks on the wall, too.

by Vivian Bond

Did you take my advice of last week and keep your fur coat ready for the emergency? Judging from the beautiful corsages the girls were wearing Monday—they must have saved them for a better day. . . . I was confused and the weatherman must have been really confused to give his Christmas weather Easter, or could it be that we are not living up to God's standard? . . . A. E. Leider went to his home for the Easter holiday from the St. Joseph Hospital, returning Monday to prepare for an operation Wednesday. We trust that you are feeling better at this time and will soon be on the road to recuperation. . . . In the April issue of the magazine "Tool Engineer" the Milton Klines, Bldg. 18-1, were given a nice mention in the Andy-grams column. The occasion was the Pittsburgh meeting of the American Tool Engineer's Society. . . . Herbert Kammeyer was literally showered (with cards that is) on his birthday last Tuesday. . . . The many friends of Paul Burt who died in Cincinnati were grieved to learn of his death. Paul was a member of the first graduating class of our Apprentice School in 1917. He has been associated with the E. A. Kinsey Company both in Indianapolis and Cincinnati, and has spent many hours in General Electric Company assisting in the selection of machine tools. We extend our deepest sympathy to his family. . . . Is Raymond J. Hoffman, Bldg. 16-3, planning to change from a Buick to a Chevrolet? We saw him at Swanson's the other day looking at a nice green one. You are not that Irish, Ray! . . . Welcome to Gloria Koeble who came to Mr. Kellermier's office from Winter Street. . . . Can you feature this? Marie Mueller, Bldg. 18-4, came back to G-E from downtown and said, "Where do you girls spend your money? I have lots of it but no place to spend it!" Marie, my telephone number is 2212 and I will gladly give you some pointers. . . . Doris Snyder, Bldg. 18-5, received some beautiful birthday gifts last week. She is 16 this year and it seems she was 16 last year. Will somebody please clue her that 17 comes after 16. . . . Looking the news situation over in Bldg. 18-2 I find to wit: P. F. Peternell of Bldg. 18-2 has purchased a cottage at ——— Lake. He would not tell us the location, but being a good snooper I find that it is Lake Gage. We won't come up until you invite is, Pete, so don't be so modest about it. . . . Mary Cooper is trying to keep out of the news. . . . Lucile Currie entertained guests from Indianapolis for Easter. . . . Our friend Mart Einsiedel looked and looked for his glasses. That's all right I won't tell. . . . Mary Brouwer enjoyed a birthday Easter. . . . V. J. Tuttle, who recently retired, visited Bldg. 18 last week. . . . Franklin Bercot, Bldg. 16-3, has a brand new baby girl. Our congratulations. . . . We understand that Bill Spahr, Bldg. 18-1, waited until Easter Sunday to buy his new Easter outfit and in Decatur too. Oh well, it snowed anyway. . . . Opal Cook and Ray Lindemuth, Bldg. 18-5, are so fond of animals they hate to part with them. But after Junior Rat was dead one week and rigor mortis had set in, the funeral finally was held by mortician Dick Kent. Flowers were omitted. . . . When did Ruth Givens start smoking cigars? We saw her buying a whole box of 'em. She must be well along in the habit. . . . Dorothy Long is trying a hand at dog raising. Her first experience was a slight disappointment—Anyone interested in toy pekinese should see her and extend some advice. . . . Ginny Bradtmiller, please explain to the people in Bldg. 18-5, that your "top caving in with water" was your convertible—nothing else. . . . Wednesday of last week Annabell Redding tried to put her time card in the box. "Isn't today Friday?" she said when someone tried to stop her. . . . Patricia Beebe did not have too much chance to say goodby to the boys in the drafting training course and asks us to say goodby to them for her. . . . Spring must be here, or is it just Bob Meyer's curly hair that causes him to come to work without a hat. . . . Did anyone note the lovely apricot blooms before the freeze, on the west side of the street. Nothing is more beautiful and celestial than the first blossoms that appear in the spring. . . . Jean Edwards and Dorothy Crist, Bldg. 18-1, entertained with a surprise personal shower for Vickie Bickis last evening.

The essence of knowledge is, having it, to apply it; not having it, to confess your ignorance.

FHP Divisions Develop New Business Machine Motor

Ingrid Swanson, Taylor St., is shown using an electric typewriter powered by a G-E business machine motor similar to the one in the inset.

"The new electric typewriter is a big help to me," according to Ingrid Swanson, secretary to A. W. Bartling, "because it helps me get more work done, and it is easier to use than a hand-powered machine."

Miss Swanson's electric typewriter is powered by a type KH-10 frame motor, similar to the new, definite-purpose typewriter motor manufactured in Div. 17, which was announced to the trade last week by the FHP Motor divisions. The new motor is for use on typewriters, accounting machines, and other business machines.

Of open, ventilated, sleeve-bearing construction, the new Type KH motors are available in these ratings: 1/40 hp, 1725/1425 rpm, 115 volts, 60/50 cycles; 1/40 hp, 1425 rpm, 115 voles, 25 cycles; 1/20 hp, 3450/2875 rpm, 115 volts, 60/50 cycles. All are equipped with double-bonded resilient mounting rings, including latches, and three 12-incb leads.

A new, specially-designed, externally mounted, starting switch, which replaces the conventional centrifugal starting switch mounted inside the housing, permits the new motor to be of minimum over-all size and weight. Measuring 2½ x 1½ x ⅝ inches, the switch includes a thermal cut-out feature which will open the line circuit in time to prevent damage to the motor in the event the machine jams and the motor is stalled. It also may be used as the line switch for the business machines in which the motor unit is installed.

When the start button is pressed, the main and start windings are connected in parallel across the line. The start winding is cut out of the circuit when the start button is released, leaving only the main winding across the line. The stop button takes the motor off the line.

Fans cast integral with each end of the rotor provide good ventilation and permit the use of a minimum amount of copper and iron; this results in a motor of reduced weight—about 4 lbs.

"Another good thing about telling the truth is you don't have to remember what you say."

Our congratulations to our good bowlers, George Soule, Dick Madden, Eldon Roby, Joe Haas and Dale Springer, for taking first place in the G-E tournament last Saturday night. The score with handicap was 3315. Not bad, eh? Keep up the good work. . . . We in Bldg. 17-2 extend our sincere sympathy to Mr. and Mrs. Ray DeBolt in the death of their son, Bob. Bob was killed in an automobile accident last week. . . . Bonnie and Carol Bender wore their new Easter outfits in spite of the snow, but had to cover their straw hats. They are the daughters of the Paul Benders. . . . Mr. and Mrs. Harold Prough announce the arrival of a baby boy. Congratulations. . . . George Miller is going by the name of "Tough Boy" now. He loves it—they say. . . . Ham sandwiches and colored eggs were very much in evidence last Monday. . . . Ralph Walda is back on rotor inspection after an absence of six years. Welcome back, Ralph.

Tricks In Transformer

—FROM DIVISION 91—

By Johnny McMaken

Many people were disappointed over the week-end because they did not get to display their new Easter bonnets. I imagine even Fred Banks was a little unhappy because he has been sporting a crew cut the latter part of the week. After Sunday maybe Fred wishes he had a little of that hair back. . . . It looks like Bill Gepfert is going to farming. Bill got a tractor. Now all he has to do is learn how to drive it. . . . Lavern Shultz is growing a mustache. Going to be a real lady's man. . . . It finally happened, after waiting 20 years, Luther McConnehey got King Tuttle's job. It is probably a good thing King Tut retired when he did. I don't believe Mac could have waited another year. . . . It has been a rumor that the reason Zell comes in late and with mud on his shoes, is because he has a muddy lane back to his house. I understand he also bought a 1½ ton truck to pull his car out of the lane in the morning. . . . Ruben Dewart has gone in the ash hauling business. How much do you charge, Rube? . . . We finally found out why Melvin Leykauf has been coming into work with that tired, worn-out look. His wife has been giving him too many scares lately. . . . Lawrence Hosack finally traded his old brokendown LaSalle for a brokendown Buick. At first he thought it was a six and when he looked under the hood he found out it was an eight. So far he has only needed a new fuel pump and a new timing gear. Not bad for only having it a week. . . . Al Campton, the big show producer is hoping the show business will pick up again soon. . . . We are glad to see Bob Bunyan back again after a couple of week's illness. Looks like Bob got sort of a cold reception for his first day back to work, as he had to work with Stauffer's crew most of the day. . . . Harold "Whitey" Franz spent Good Friday working with the packing section in Bldg. 26-B. Whitey needed a rest though, after running so many bell cases all week. We might also add that George Christman spent the day doing a job that isn't exactly considered in his line of work—pounding out some iron down at the annealing ovens. They always say that a change once in a while does not hurt anyone. . . . Waldo Grider one of our friends from up around "Fulk's Lake" got nervous the other day and bit the stem off his pipe—Perhaps he was day-dreaming about that big turtle. . . . Robert "Minnie" Mennewisch failed to show up for work Good Friday. His excuse—you guessed it—CHURCH! . . . Russell Kryder, the chief down in the steel shed, is looking for a good trade on one article only. That happens to be on a good pair of false teeth. . . . A couple of weeks ago Ralph Milligan spent a week-end in Toledo showing some of his antique collection. Is that all you did in the big city, Ralph? . . . . Has anyone seen Floyd Null's little white envelope recently? He surely must have lost it because he is on the side lines again. . . . If you have noticed an unusual amount of noise coming from the punch press section the last couple of weeks, you can put the blame on our "bath tub" jobs. Looks like everyone except your reporter has had a turn at running this job. . . . You would naturally think that the people who live nearest the shop would arrive at work first in the mornings, but such is not the case. Some morning just notice what time our office girl Mary arrives for work, and you will see what we mean. . . . Roe Ormiston has been out of town for a couple of weeks again, and the only way we know how to explain this is that he is taking up the slack down at Danville again. . . . Last Friday we wished Eddie Dauscher a happy birthday and at the same time were treated to some of the Dauscher's home made peanut brittle. We might add that two more of our office girls, Dorothy and Evelyn, forgot about their diets long enough to sample some of the candy. . . . We were glad to hear that Ed Prince pulled a big bass out of Wolf Lake last week. From all those hard luck stories that Ed has been telling us about the fishing up at his place, he very nearly had us convinced that there weren't any fish there to be caught. . . . Our machinist, Howard, brags about having some big tackle busters up at his lake. Fish stories on this floor don't mean a thing, Howard, so looks like you are going to have to bring in some proof sometime. . . . Anyone interested in buying some corn see George Schaffer our truck driver. We understand that George is still husking last year's corn. That is, we mean his wife and children are wading the water barefooted and doing all the husking while papa George sits up on the tractor smoking cigarettes and yelling for more corn. . . . If there is anyone who is handy in sheet steel work, would you please make Joe Collis a new gas cap cover for his Kaiser? It seems as though his fell off on the road somewhere.

A New York man holds 1000 patents—but we'll bet some of his faucets leak.

by Katie Steinman

We extend our deepest sympathy to Merle Morkoetter in the death of his wife. Also to Lt. Barney in the death of his mother and to Bill Grush, whose brother was killed in an automobile accident last Saturday. . . . We sure hope Bill Huber is recovering nicely from his accident which occurred while working at his home several weeks ago. Bill is nursing a fractured ankle. . . . This week we've saved a spot to mention a few of our proud fathers. Like Rog Pierson, whose little daughter Linda, aged 7, won first place in accordion solos at the Hotel Van Orman where the Fort Wayne Music Center held their annual festival. Erv Huth's son, Gail, playing his guitar with the Sunshine Islanders, with their group took the honors in that section. . . . Pop Luebke's son, Winfred Jr., was chosen to serve as page in the State Legislature at Indianapolis, which proved to be a very interesting experience for him. . . . Fred Altekruse's son graduates from the Coast Guard Academy, June 3, at New London, Conn. Fred and his wife are expecting to be there at that time. . . . And must we make mention at this time that Ernie Hanauer was particularly proud (?) of his two boys sometime ago, too. Ernie is a little reluctant at giving out with the details. However, we do know that he can be mighty stern with the younger generation if needs be. . . . To Charlie Niblick: Chattanooga Choo-Choo, here I come. (What's up, Charlie, goin' some place? In a new car maybe? Or just the old one with a new overhaul?) . . . Birthday greetings to Elmer Mesing, Roger Pierson and Arnold Landis.

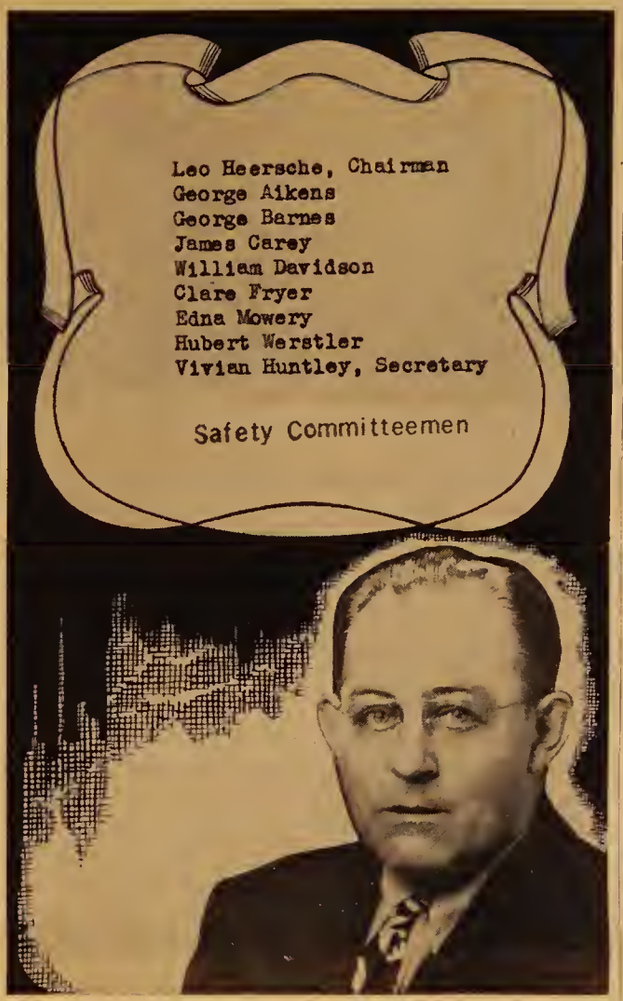
Ed Glusenkamp bought a new car to avoid the embarrassment of another breakdown such as he experienced recently. We've been told that now when he backs out of his garage with the new one he doesn't look to the rear but depends entirely on signals from Mrs. G. to guide him safely down the drive. So far the plan has worked but just supposing his wife wants to take a little vacation, what's he gonna do then? . . . Speaking of cars, Roy Bracht tore the innards out of his automobile. When he reassembled it, to his surprise, no parts were left over and the thing really runs, OK too. . . . Evelyn Daugherty does a pretty good job in creating hat styles. They might win a prize for Breakfast in Hollywood, but they certainly would never be confused with a Lily Dache original. . . . Bill Doell has finally acquired the new look since he's wearing one of those king size white aprons.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

It has been reported that Ted Schlup can be found on week-ends lounging leisurely at Fred Schlaudroff's soft drink emporium on Broadway. . . . Someone has suggested to us that Charley Dixon, our local hog fancier, buy that elephant that was a prize on a radio program, and rent him out to stamp out mole hills on lawns. Good for gopher holes, too. . . . Frank Elder, Jr., is convalescing at home after surgery, at the St. Joe hospital. Doing nicely, too, we hear. . . . Wilbur Ayres had an accident recently, while chopping some kindling, hewed too close to the line, or something, and almost detached a thumb and forefinger from his hand. . . . Frankie Enderle, our favorite financial genius and ladies' man, assures us that he is spending the pleasantest days of his service at the G-E. Now that Frank Elder is off on sick leave, enjoy these halcyon days to the utmost, Enderle, they'll soon be over. . . . What's the matter with Mart Heider, on pension? Hasn't he come out of hibernation yet? Mart hasn't paid us a visit for several months.

Nora Coburn hoarded a pair of shoes. When she took them out of the closet to wear for Easter, she found out they were too small for her. . . . Ask Bill Rectanus why he doesn't shave his whole face instead of just part of it. . . . Anyone wishing a recipe for a good meat loaf? We think Eddie Murchland has it. . . . Dick Moore was helping his wife dry the dishes, when all of a sudden he dropped a dish. He tried to break the fall by kicking his foot out to catch it and kicked his other foot from under him. Dick landed on the floor. . . . It is rumored that Fletcher Cumbey is in the market for a nice gentle pony. . . . Ask Wayne Weimer what this tally-ho business means. . . . We hear Russell James won a rabbit the other day, and now he is going in the rabbit business. . . . Congratulations to Opal Runnion who has a beautiful sparkler. When is the lucky day? . . . Congratulations to Mr. and Mrs. Jordan Gunkel on the birth of a baby girl. . . . We think Bob Enz should be a papa more often. That sure was swell cake, Bob. . . . Anyone having a chris craft for sale, contact Bill Fowler. . . . We express our sympathy to Nora Doud in the recent death of her mother. Also sympathy to the George Helsel family.



Top Floor Topics

DIVISION 95

By Walter E. Pohler

One morning last week Bill Mills discovered that someone had prepared his daily time slip for him. Bill started a little G-2 activity to find out who could be so thoughtful and helpful. He believes he has discovered the culprit, but the thing still to be cleared up is how Dick Canfield, who works second trick, can know what Bill does on first trick. . . . Friday evening Ray Feller and his passenger, Fred Day, proceeded to Ray's car in the parking lot as usual to go home. Ray stepped on the starter and the shrillest whistle started and smoke began to roll out from under the hood. In fact the whistle could be heard at an open window in Bldg. 26-5. Ray jumped out and raised the hood to see what was wrong. Some kind friend had attached a whistle bomb to the spark plugs. As Ray raised the hood at least six cars began to pull out of the parking lot. It seems you have a lot of friends, Ray. . . . Several fellows have raised the question why a certain individual in the Transformer Bowling League always puts a cigar in his mouth while bowling but never lights it? Guess it must be superstition. . . . Famous statements: Jack Lee, "Have you heard the one about the guy." . . . Here is an announcement we have all been waiting for. Our co-worker, Ruby Musselman, was all smiles the other morning. She was wearing a beautiful diamond ring. The lucky fellow is Herb Rapp of Churubusco. We understand the wedding will be soon although we don't have the exact date. We all extend to the bride-elect our very best wishes and our congratulations to the groom-elect. . . . Someone asked the other day if we could include thank-you notes in our column? We would like to say that we would be very happy to include such items in our column. . . . We were hoping to publish the names of assistant editors for each section several weeks ago, but, due to our unsettled status, this hasn't been accomplished. Your Division editor gets around over the floor numerous times each day. Please feel free to hand him any items of interest you might have for the column, they will be appreciated. Just note on a slip of paper the name of the individual together with the facts you want included in the item. If you don't see your Division editor, give the items to your foreman and we feel sure they will see that they get to the proper individual. . . . To insure the proper Easter atmosphere last Friday, one of the second trick operators brought in a live rabbit. However, we don't believe the rabbit laid any Easter eggs, since he appeared to be very frightened in his new surroundings. . . . We would like to express our sympathy to the Merle Markoetter family in the death of Mrs. Markoetter. Quite a number of us in Bldg. 26-5 knew Merle and his family when he was a fellow employee of the Transformer Division.

Trying To Help . . . .

. . . THE OTHER FELLOW WITH THE SAME KIND OF PROBLEMS WE HAVE, USUALLY RESULTS IN OUR HELPING EACH OTHER. I am sure all present and past members of our Safety Committee will agree to this.

Being good Safety Committeemen is not an easy task. We work on a safety problem letting the "chips fly where they will." Our very best friends, or even we, may have to change our work habits, and/or supervision may have to install a guard, change a method, etc., in order to eliminate or reduce the hazard.

We thank Leo Heersche, Safety Leader, FHP Motor Div. 20, in the above picture, and committeemen in this division for helping us bring this thought to your attention.

LET US HELP SOLVE THE PROBLEM OF CROSSING BROADWAY SAFELY BY FOLLOWING THE SAFETY LANES. REMEMBER HOW MANY TIMES YOU HAVE SAID, "SOMEBODY OUGHTA' DO SOMETHING ABOUT THIS!"

HERSCHEL L. SMITH
Safety Engineer

We learn that Ray Heck owns so much land around Payne, Ohio, that his holdings almost encircle the town with the exception of one narrow strip of land upon which a lane is in a deplorable condition most of the year. This is the only free entrance and exit to the town as he charges a toll fee on all other roads crossing his land. Ray is trying to buy up this remaining land then he will have control over all roads. The citizens are up in arms and plan to establish an air lift to serve the city. . . . Ray DeBolt has purchased a new car (it was new around 1933) but nevertheless it is new to him. He paid $50 for it and is very much elated over his purchase. He tells us that it has demountable rims also all the desirable features incorporated in a car of that era. The top leaks pretty bad so he is looking around for an old California top to put on it. There is also a decided sag in the wheel base but he feels sure that this can be remedied. . . . Spring is surely here as Chet Price appeared upon the scene attired in a bright green shirt. It is of a shade that reminds one of the early green of spring. This evidently is his favorite color, but we are sincerely hoping that he will not wear this shirt often. It reminds us of that famous green sweater he wore for such a long time. This sweater did not make an appearance this past winter. We are wondering if the moths might have eaten it. . . . Harold Richmond is now busily engaged in taking instructions and studying preparatory to entering the Grand Lodge of the Mystic Order of Ancient Arabian Hack Drivers. He is very interested in the activities of this order and plans to reach the highest chair of the order, that being the office of the Grand Premier of the Indiana diocese. More power to you, Harold, for we will be pulling for you. . . . We happened to notice a picture in the daily press of Preston Hille attired in a cow puncher's outfit, packing a vicious looking six shooter on his hip. We do not know whether he is trying to ape Roy Rogers or Skipalong Hotspurs. He told us that next week he is going to get a ten gallon hat, a set of spurs and a western pony. Then he will be able to put on his own act as a lone ranger. . . . As you all know by this time Ed Smith has his new Buick. It is a beautiful car with a light green satin finish and those new round chromium hood vents. To witness him driving into the parking lot in the morning one would think that the King of Siam and his entourage were paying us a visit.

Just what happened to a certain radio station last Sunday? Chauncey Tucker would like to know. He was to be on the air with his religious program and after a few minutes of air time they realized they were not on the air. When he tuned in the station, to his amazement they were playing records. . . . Churubusco has nothing on Div. 14. We also have a turtle, or a facsimile thereof. . . . We are all very curious as to what Walter Doctor is going to do with the two buckets he bought. . . . Just why did Forrest Grimm stand up in a car all the way home the other night. . . . We understand Herb (Clark Gable) Seslar is taking beauty treatments. . . . Kathryn Erwin really thinks June, Bob Kissinger's wife, will get a golden crown when she reaches the pearly gates. . . . As a "speech maker" we would say Mr. Arnold could rate top place in any oration. . . . Walter Doctor developed a blister from cutting his grass. Who said women were the weaker sex? . . . Earl Greenlee only wishes he had some grass to cut. Don't give up, Earl, it takes time. . . . The fellows are wondering why Fritz Voltz is passing out cigars. We understand the "boss" brought him in a banana. . . . Bill Lavine really goes for everything in a big way. Now, he has planted enough raspberry bushes to supply all the kids in Huntington. . . . Dessie Jackson has been having a bad time. She lost her voice and doesn't know a bit of "sign" language. . . . Some folks are waiting for flowers to bloom and grass to grow, but not Irene Anderson. She can hardly wait for the rhubarb to get big enough to eat. . . . Best wishes to Glenna Hyatt, who is leaving us, to take up full time duties as a housewife. . . . Our sympathy to Louise Roberts in the death of her brother. . . . Was Lucky Gus Weisenburger's face red last week while bowling. The boys claim he rolled a perfect gutter ball. . . . "Willie" Skevington hopes his team comes out on top in the bowling league. The extra money will sure help out this year on his vacation trip to California. . . . We are wondering if Walter Holloway is really going fishing or looking for turtles up around Adams Lake? . . . If anyone has noticed Eldon Bell is not quite as smart as usual, it is due to the fact he has had a wisdom tooth pulled, Heaven help us if he loses the other two.

Courage is fear that has said its prayers.

Medical Memos

By Mary Heymann

Now that the Easter season has passed, we are all getting back in the old routine. Everyone seems to be busy planting gardens or chasing the winter's accumulation of dirt and grime. Sometimes it is most difficult to keep your mind on wallpaper cleaning, when you prefer to be thinking of sinking approach shots on the golf course! . . . Mrs. H. L. Murdock had the misfortune of fracturing her left wrist when she fell recently at her home. What! After all the spring cleaning was done? . . . Several Elex members were seen browsing around at the rummage sale. There was a wide variety of articles, even Dewey buttons! . . . Maurine Nail and daughter Marilyn and Mary Heymann were dinner guests of Berneta Welbaum Friday. Here's wishing you many more happy birthdays, Maurine. . . . George Faulkner, formerly with the Medical section, recently visited old friends in Bldg. 21, while in Fort Wayne on Easter vacation. He is in his junior year at Indiana University Medical Center at Indianapolis and will spend the coming summer at the ROTC at Grand Rapids, Mich. Glad to have you with us again, George, and don't forget to drop in whenever you get back to Fort Wayne. . . . The bright smile on Mae Mulvane's face this week could be due to the fact that her son Forrest is home for spring vacation. . . . Dr. Leslie Wilson, until January, 1948 employed as Assistant Works Physician at G-E, has been transferred from Marion, Ill. to the Veterans' Hospital at Fort Benjamin Harrison at Indianapolis, Ind. We are glad to hear from him again, and to know that he has moved closer to us. . . . Mary Shernock is the new nurse at the Danville Dispensary, replacing Jean Tuttle who left April 15. . . . While looking through some poems the other day, I happened to run across this one by Agnes James, RN.

Nurse's Lament

To serve the sick is noble quite
And would be lots of fun,
If one could change one's feet like tires
Before the day is done!

John Clark was sweeping the floor the other day. Everything was going very nicely, when suddenly, John let out a yell. Everybody looked at him to see what had happened, and saw John removing Art Hubler's teeth from his pants leg. No, Art wasn't behind the teeth, but the story goes that Art had lost his teeth and never even missed them until, John took them over and asked him if he had lost anything. You had better put a string on them, Art, as some day they are liable to "bite" the wrong person. . . . Wayne Worman has been walking around with his chest sticking out since they took his picture for the WORKS NEWS. If you would like to have your picture taken, here's a little tip, just learn to "whistle". . . . It sure is good to have Ralph Keller back with us after his recent illness. Now he really has a good reason for wearing those suspenders as he lost quite a bit of weight. . . . Ralph came back last Monday, and then his girl "Friday" (Jackie Elder) didn't show up for work. Let's hope that she hasn't gone and gotten herself sick now that the boss is back and she can relax again. . . . Someone mentioned the fact that they never saw so many new hair cuts floating around as there were last Monday morning. . . . Bill Buuck's bowling team took second place and Andy Anderson's took third place in the recent G-E Bowling Tournament. Congratulations, fellows. . . . Oral Emrick's picture was in the NEWS last week and he says he thinks he looked like a midget. Maybe it wasn't you that was so small, Oral, as it could have been that broomstick which they gave you for a gun was just so-o-o big. By the way is that why you get those big scores, you use a broomstick? If so, best you bring it when you bowl too. . . . Sarah Moore wants to know where you can go when something happens, so that there isn't always someone around to see it happen. . . . By the way, Sarah was in Indianapolis Easter. We hear that she had to pick her new Easter bonnet out of the gutter. Was the wind that strong, Sarah, or ? . . . Pat Perry was quite excited last Friday when she caught two live bunnies at her place. The eggs they left were enjoyed by the whole section. . . . Elinor Laux has sure been a busy little bee preparing for the wedding of her daughter, which will take place tomorrow. . . . We want to welcome Ed Donaghy back to the first shift. . . . Mel Riley looked like he weighed many pounds more last Monday after helping his children eat their Easter eggs.

"A word to the wise should be sufficient," or so the saying goes. But in Byron Simmons' case, we're not so sure. If he could only remember to put a little red lantern on his car when starting out for an evening of fun, it would be so much easier to find. Hence, no need for those weary strolls around the block in search of the car. . . . We wish a speedy recovery to Tom Dent, who recently underwent surgery at the Lutheran Hospital. We sincerely hope that Tom is well on the road to recovery and that we will see him back with us in the very near future. . . . "Reverend" Chandler invited the boys in the Tool Cribs at Taylor Street to attend his church Good Friday. Most of them backed down because of the weather. Ward Staley and Fred Bishop braved the gale and attended church. . . . A secret can only be a secret just so long. What Karl Soest really does on those so-called Wednesday night lodge meetings has finally come to light. Harry Golden, Marion Sienkiewicz and Al McCullough attended the wrestling matches the other night and now they are positive Karl is "The Demon," expert wrestler. Come on, Junior, 'fess up. . . . We are glad to hear that Ray Girvin's wife is home from the hospital and doing nicely. Give her our best wishes, Ray. . . . Could it be the fuss the girls have been making about the fellows smoking cigars in the office that prompted Lloyd Platt to start giving his supply of cigars away or was he just feeling sorry for Al McCullough. Either way, we have Lloyd trained to do his cigar smoking at home. Others, please note. . . . A thought for the week—"Finish each day and be done with it. You have done what you could. Some blunders and absurdities no doubt crept in; forget them as soon as you can. Tomorrow is a new day; begin it with too high a spirit to be cumbered with old nonsense. This day is all that is good and fair. It is too dear, with its hopes and invitations to waste a moment on yesterdays." (Ralph Waldo Emerson)

G-E Salesmen Intensify Campaign To Sell SM Ignition Transformers

Frank Ondrovik, Supervisor of the Promotional Service section, Specialty Transformer and Ballast divisions, and J. P. Coughlin, Assistant Manager of the Specialty Transformer Sales division, are shown examining the new SM ignition transformer sales kit.

Scenes such as the one shown above are being re-enacted in dozens of customers' offices across the nation as G-E Salesmen intensify their efforts to sell General Electric's SM ignition transformers to the oil burner industry.

SM means "Standardized Manufacture." It is expected that the four units in this new line will replace scattered production of many of the 1,500 designs now furnished to the industry by the Specialty Transformer and Ballast divisions here.

General Electric's standardization program was started about a year ago but has recently received great impetus by announcement of a 10% price differential on these units under others of comparable rating. This reduction was made possible by manufacturing economies resulting from volume production.

To help our salesmen, a full-fledged advertising and sales promotion campaign is being carried on. Giant telegrams were sent to each customer announcing the new line, followed by sales letters and a catalog containing complete buying information.

The customer reads about them regularly in advertising in trade magazines. He saw them displayed at the Heating and Ventilating Show held recently in Chicago and will see them again in May at the Oil Heat Institute Show in Boston.

To make the personal calls of our salesmen more effective, they have been supplied with kits identical to the one shown above.

All of us in Bldg. 26-2 want to extend our sympathy to Gertrude Wagner whose mother died last week. . . . Dorothy Andrews was the guest of honor at a dinner party given recently by the girls in Payroll. She is being transferred to Bldg. 26-3. Dorothy received two lovely boudoir lamps. Those attending the dinner were Iona Gray, Mary Brinker, Wilma Dowden, Ruby Beard, Jocile Stohlman, Betty Spittler, Evelyn Bradbury, Margaret Tennison and Gloria Miller. . . . We welcome Hal Hoffman to the Planning Section. He is single, girls, until tomorrow to be exact—a married man then. He was formerly a test engineer and is now a planner. . . . Happy birthday, Thelma Schmidt. She received a white batiste blouse from her fellow workers in the Service Bureau. . . . It's farewell to Dick Stoner who is leaving the drafting division. He says he is going into his own business (couldn't be monkey business, could it?) Dick received a ticket last week at 2 a.m. welcoming him to the Police Station. He got the ticket for running a stop sign. . . . The Service Bureau had a potluck Monday. Those attending were Mickey Huth, Roedean Dowell, Virginia Harris, Audrey Waltz, Solona Huter, Louise Klinker, Thelma Schmidt, Francis Miller, Bob Thomas and Dick Walters. . . . The Radio Section is very happy to welcome Robert Berghoff. . . . A. M. Krakower has been ill for the past several weeks. Here's hoping you are back with us soon. . . . Henry Lehman is a newcomer. He is working for E. C. Hill in the Engineering Development Section. . . . Our congratulations to F. T. Gamec and his gang for that swell performance PLANTATION CAPERS!

We in the office are thinking of having a towel shower for Bill Crane. He sure needs them since he sits next to the drinking fountain and gets a sprinkling every so often. . . . Paul Clendenen actually sat on an egg but nothing happened. Guess he just isn't a good mother hen. . . . Speaking of eggs, Eileen Hennen had some of the fellows in the office in a dither about an Easter egg, a soft boiled messy one. . . . Vern Castle came in while in low gear the other morning looking about 10 years older. It all boiled down to the fact that his baby had her 17th birthday and was no longer a child but a full-grown young lady. . . . Luella Bixler is again on the sick list. We hope you will be better soon, Luella. . . . The employees of Bldgs. 17-2 and 17-3 extend their sympathies to Mr. and Mrs. Raymond DeBolt whose son died in an auto accident last week.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSING DATE FOR NEXT ISSUE
Monday, April 25, 1949

LOST AND FOUND

FOUND—One silver earring with a white set.

FOR SALE

TWO STOVES — Kitchen cabinet, dog house. H-50513.

NEW DEEP WELL JET PUMP—Never used. Bargain. A-2745.

IRONER — Simplex, floor model, like new. H-75412.

USED PIPE AND FITTINGS — Gas heater and 30 gal. tank. A-25973.

1945 FORD DELUXE TUDOR—Radio, heater, good tires, A-1 condition, $1100. Arcola 37F40.

HORTON AUTOMATIC IRONER—And table. H-78753.

1933 PLYMOUTH COUPE—H-83872.

"SKILLSAW"—Large size, only used on one house, very reasonable. H-37777.

MOTOR SCOOTER—American. A-57127.

BOAT—12 ft. steel, in good condition. H-65332.

LEADER GAS STOVE—$20; Toilet, $3; single compartment kitchen sink with fittings. H-65522.

HOLLYWOOD BED—Full size, mattress, bed skirt $25; ice box, $5. 1205 E. Pontiac, lower apartment, evenings.

ROTOREX HAND SWEEPER—Reasonable. H-54523.

LADIES' BROWN CHESTERFIELD COAT—Size 20, like new. H-57912 after 5 p.m.

G-E WASHER—$35. H-44642.

TRICYCLE — Small; beginners roller skates; dresses, size 5-7. H-3436.

G-E 5.5 FT. REFRIGERATOR — New unit; also 28" bicycle, good condition, balloon tires. Leo 2357.

MANURE SPREADER—Corn King International, good, can be converted to tractor type, Zanesville 48Y.

STEEL BATHINETTE — Val-pak luggage, like new. Columbia City 260J.

G-E ROASTER—Broiler stand; lot in North Highland; Deep freezer. A-55935.

WHITE PORCELAIN ICE REFRICERATOR — Insulated, 100 lb. capacity. A-77972.

FOR RENT

SLEEPING ROOM — A-68721 between 5-9 p.m.

TWO SLEEPING ROOMS—Just cleaned, redecorated; near C-E. A-65331.

COTTAGE—By week or season; located at Snow Lake, Fremont, Ind., 4108.

PARKING LOT—1434 Broadway, $1.50 per month. E-40203.

TO TRADE

JOHNSON OR ELECTRIC OUTBOARD MOTOR — For radio-phonograph (prefer table model or portable). H-57474.

WANTED

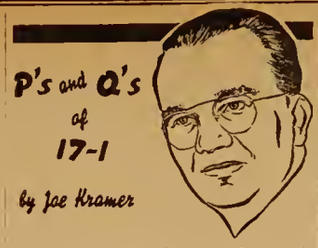
COLLAPSIBLE BABY BUCCY—H-03513.

BABY BED—H-3510.

TRANSPORTATION

WANTS RIDE—Enno Richter, from Rd. 3 and Wallen Road. Works in Div. 17 at Taylor St. from 5:48 to 3:18. Ext. 417 or A-99150.

WANTS 4 RIDERS—Vernon Baker, from Churubusco, Ind. Works in Bldg. 17-3, from 7 to 3:30. Churubusco 4773.



WANTS RIDER—Dale Grigsby, from Columbia City. Works in Bldg. 25-2, from 8 to 5:15. Ext. 753.

HE DID NOT FAIL, HIS FIRST ATTEMPT WAS JUST UNSUCCESSFUL: Bob Sharrow's attempt to prove that after three days homogenized milk will not spoil—regardless of temperature—was unsuccessful. . . . JUST ABOUT, BUT NOT QUITE: Last Monday Joe Gardt joined the "Just About Floor Sitter's Club." If he had gone all the way, he would have been the first one to do so from a standing position. Better luck next time, Joe! . . . AWARD OF THE WEEK: The shirt of the week was one multicolored tee shirt worn by Joe Hiles. His girl friend bought it for him, so the story goes. . . . WHAT SIZE BOWL: Some people are wondering who the new barber is who gave N. C. Oetting a "butch" haircut. It was evident that he (the barber) must have been an apprentice. . . . SEAT OF THE WEEK: Denton Manecke, it seems, caught his trousers on a file cabinet last week. You can guess the rest. As a result, he remained seated the rest of the afternoon in a far away corner. . . . CAR: Charlie Thomas is the proud owner of a new Plymouth. Hope everything goes all right this time. . . . LOST? If you wish to find your way around town, ask Frank Moody for directions. In case he isn't in, ask Marian Leiter. . . . WELCOME BACK: To Bob Dobbin who was hospitalized three days last week. Hope you're feeling fine, Bob. Also to Harry Balz who is back after a triumphant week's battle with the flu bug. . . . ABSENT-MINDEDNESS? Everyone thought that Gwen Stienbarger was going to serve tea and crumpets one afternoon last week. She was quite startled when Georgia Garret called her attention to the apron she was wearing. . . . BELATED WELCOME: To Margaret Taylor who is working for Bill Pringle and Harry Balz in the DC Division. She came to Bldg. 4-6 from the Transformer Div. . . . FOND FAREWELL: To Jim Burton who left the Developmental Div. to continue test at Winter Street. Also a hearty welcome to Bob Winchester who is taking Jim's place. . . . BONNET LOST: Judy Clark was the victim of a practical joke last week. Someone removed her new Easter hat from its box and put an ash tray disguised as a hat in its place. Judy really had a pained expression on her face when she reached into the box to show it to someone. . . . HAPPY BIRTHDAY: To Al Volz who was surprised, to say the least, by a birthday party in his honor. What kind of presents did you receive, Al? . . . QUESTION OF THE WEEK: Why is it that Wally Clayton didn't have time enough to tuck his shirt tail in before coming to work? . . . EXPANSION: The drafting section of the Developmental Division found it necessary to give Cecil Harrod a little more space around his desk. What with a new wife and home cooking, there is much speculation as to which will take the most space, Cecil or his desk? . . . SYMPATHY: We extend our sympathy to Fred Suhr whose mother died last week. . . . BREAK IT UP: Ruth English nonchalantly tripped over Bob Langdon's telephone wires last week. In so doing, she passed a death sentence upon his "indestructible one." She did a very thorough job — no pain — instant death—a million and one pieces to prove it. . . . WEDDING BELLS: A luncheon was held Wednesday for Lydia Swift and Phyllis Buell, who will walk down that primrose path tomorrow afternoon. Best wishes and may you both live happily ever after. . . . UNINTERESTING: Because of Ray Nupp's repeated request that I print something about my co-editor, I might add the following: Teddy Neds thinks that she is the most uninteresting person in Bldg. 4-6, but who will believe it?

How did you like our Christmas weather last Sunday? . . . Rumor has it that a lot of people saw the eclipse, but none saw the cow jumping over the moon. . . . Hickory dickory dock, the mouse didn't run up the clock. It ran up Nina's leg. We don't know which was more frightened, Nina or the mouse. . . . Joe Jensen got a new motor. He thought he would try it. It vibrated so it jumped all over the garage floor, so he has decided to put a saddle on it, before trying it again. . . . See the big smile Walter Kryder wore last Thursday? He had his picture taken. He is a Quarter Century man. Congratulations. . . . By the way, Walter is going to wear bow-ties. We will admit the other kind seem to get shorter and shorter. . . . Ocie Jackson was uptown and was going to buy bananas. She got so confused, she forgot them. The theme song around her house was, "Yes, we have no bananas." . . . Have you noticed Herb Bender giving his shoes a high class shine every afternoon? . . . Minnie Barr was going to church last Thursday during all the rain and storm. The wind came along and whisked her umbrella down the street so fast, she never did catch up with it. . . . Guess Bertha Bertsch must be a carpenter these days. She went home and found her steps weren't finished, so she got a hammer and went to work. Ready to hang out your shingle? . . . Sorry to hear Evelyn King had the misfortune of falling and had to go to the hospital. Also that Urah Miller and Elsie Klemm are on the sick list. . . . We have come to the conclusion that Ann Robinson doesn't trust people. She wore her red hat all day for fear of losing its ornaments. . . . Fay Kittredge was seen mopping the floor at lunch time. New sideline? . . . It's a happy birthday to Ethel Keller. . . . Ann Kensil needs a spring tonic. She is so tired. . . . We express our sympathy to Jerry Snyder. After being so kind to her bird, it decided to go to bird heaven. However, Jerry likes bargain days. Two for five especially. . . . Have you noticed Lowella Koogle's short hair cut? . . . Also Leona Hollis's new "specks?" Quite a classy plastic and gold job. . . . Ethel Carr is getting patriotic. She knows the leads are red, white and blue. What! No black? . . . Congratulations on the pink bootied addition at the Donald Coverdale home. The mamma (Betty Barger) is a former co-worker. . . . Have you heard about Lorena Buuck being chased by a bear? At least it looked like a bear crawling on all fours. However, she thinks it was the Beast of Busco. . . . Newcomers to the early bird shift are Margaret Hayden, Lois Gordan and Ralph Lindeman. . . . Jack Dennis was seen hanging his coat in the ladies' coat rack. Don't make a mistake, Jack, and take the wrong coat.

We just about didn't make a column this week due to an abundant supply of hard boiled colored eggs. . . . There were a number of new suits on the streets Easter Sunday, but the majority of them were covered up either by top coats or rain coats. We are told that a few of them were even still in the boxes in which they came from the store. . . . Of course, some people wear Easter clothes to church and then return home with a top coat that is better than the one they went to church with. Was Argent Denney's face red when he received a phone call last Sunday morning. . . . The assurance that spring has arrived was given by the sight of Clarence Doetor coming to work without the flaps on his hat down. Doc says it is the new spring style to wear them up now . . . Ted Brockmeyer and his wife helped her mother and father celebrate their 50th wedding anniversary Easter day by entertaining them at Sunday dinner. . . . We wish Harry Kessler a speedy recovery and a quick return to work. . . . Douglas (Casey Jones) Bragg was an engineer on "Old 99." Anyone wanting to know complete particulars involved in running a steam engine are asked to contact Doug. . . . A very belated birthday wish to Ermond Tickel who celebrated his birthday last Friday. He received many cards and well wishes from his co-workers in Bldg. 17-1. . . . You have heard of buying a pig in a poke. Here is one about buying a squeak in a rabbit. Our genial philosopher, Argent Denney, purchased a fluffy little rabbit with a squeak, but when Denney got it home he couldn't get the rabbit to squeak. . . . Ed Arthur is looking for a pulley large enough to take care of a one-inch rope. Ed wants to use it on his boat for lowering the anchor because he says that the ordinary three-eighths of an inch anchor rope isn't strong enough to hold the boat when you start pulling in those big fish. . . . The new face at the welding machine in Group 19x22 is Louis Hesse from the second trick. . . . Anyone wanting to learn the new mop dance with orange peel teeth is asked to contact George (Goldie Locks) Mosshammer. . . . George Kaade has been transferred to Bldg. 4-1 paint oven. Don't forget your old friends in Bldg. 17-1, George. Drop back and see us occasionally. . . . We not only have assurances from Art Brockmeyer that the Moose Easter egg hunt was a success, but we know from two former employees of Bldg. 17-1, James Johnson and Henry Gollmer, who were seen leaving Foster Park with some swell prizes. Henry's boys won a wagon, a three-wheeled scooter, and a swell wool sweater. . . . Victor Hall was looking for a Christmas tree to put up Easter morning. He said it looked more like Christmas than a sunny Easter. . . . Regardless of how the punch press team or the planning team comes out in their league bowling, Bldg. 17-1 is still going to have members on a champion bowling team. Addie Masbaum and Tavie Popa are bowling tonight in the roll off for the Ladies' Monday night league. The reason we are so sure Bldg. 17-1 will have a member on the champion team is that Tavie and Addie bowl on different teams.

Inquiring Reporter

DO YOU THINK COMIC BOOKS ARE HARMFUL FOR CHILDREN?

W. K. GREGG
Bldg. 20-2

"Comic books generally are a stimulant to the child's imagination and are entertaining. They can be classed along with moving pictures and radio programs: Like them, they can be harmful if indulged in to the point of interference with school work and other more profitable activities. Comic book selection should be supervised by parents and should be permitted in limited quantities. Then they can certainly do no harm. I think we all like the Dagwood type."

WAYNE M. WORMAN
Taylor St.

"Young and impressionable minds naturally react strongly to either good or bad comics, but the background or home influence is the source of the result. Sometimes this is very bad, causing dire results later. Therefore, they should be kept as free from crime as possible."

MARJORIE KRAMER
Bldg. 17-4

"No, not anymore than what we read every day is harmful to grown-ups. In comic books the villain is always brought to justice by the hero; Superman becomes the ideal of most children—not Three-Fingered Louie. Some people believe a child might put to use an 'idea' which springs from his reading a comic book. This is possible, but I believe the incentive was planted earlier in the child by the wrong kind of environment."

JUANITA BRINKMAN
Taylor St.

"Yes, I think most comic books are harmful nowadays. So many have shooting and crime stories in them. If they would have more animal comic books like Mickey Mouse and Donald Duck they would be much better for children to read."

VERONICA COOK
Bldg. 26-3

"No, I think comic books are all right for children if they are really comics. There are some books on the market that are called comics which are not fit for children, but I would not call any comics 'good' for children."

Our happy Easter greetings certainly sounded like merry Christmas—or at least they should have. . . . Our deep sympathy to Jim Smith in the death of his mother. . . . Thanks to all you folks who inquired about the column. We didn't know there were so many readers. . . . Ed Klomp was seen smoking a cigar with a band nearly as long as the cigar. Now the question is: Was the band on there to keep the tobacco from unrolling, or did he have two ends joined for economy purposes? You take your pick. . . . Don Gerardot wasn't awake the day he tried to light his cigarette with a steel rule instead of a lighter. Mondays are sure rough.

Cy has a Ford as we all know
But 25 is all she'll go
His Ford won't start when wet and dark
Like his Bosox has no spark.
And as we pass him on our way
We hope that he will choose someday
A better car, a better team
And live in happiness supreme.
Norb Lose

(Cy, you should buy a DeSoto!) . . . The awful crash heard in Bldg. 17-4 t'other day was not an atom bomb explosion but Elnor Laymon falling flat on her face. She saved the jello she was carrying. After all it was all Esther, Jean and she had to eat. . . . Talk about new Easter togs, seems as if Bill Turner was rushing the season with his new apron. That goes for Elnor's purple sweater too. Did you see it? Couldn't miss it, she wore it all day. . . . Yes, Clara Gehring has birthdays too. Thanks for the treat, Clara, and many more happy years. Your age?—oh, you didn't say! . . . Approximately seven minutes after 12 Wednesday we heard Ruby Lydy say, "Well, I'm ready to go home; I've got my check and had my lunch." It's a good deal, Ruby, if you can swing it! . . . The welcome mat is out for Edith Harchelrode, Frieda Flaugh, Mary Hake and Vera Dickey. Hope you like your new work. . . . Welcome back to Edna Ward. We're glad you are well and back with the gang again. . . . Marge Kramer, if your picture turns out to be in technicolor don't blame the phonographer. He can't help it your face lighted up like a Christmas tree when he snapped you. . . . Ruth Baker claims she's cured of her spring fever. We wonder what the remedy is? . . . Rumor has it that Dick Seidel spent a lot of time Friday at Hatcher's. He heard they had a Ford, but when he got there, it wasn't, wonder where it went! . . . Ray Solga, after much deliberation finally decided to purchase a brand new hair cut for Easter. Some of his friends saw him in the Easter Parade and hardly knew him without all his usual cranial foliage. Since buying a used Pontiac, Ray says he must get better mileage on both the haircut and Pontiac. . . . Most of the testers won't venture into Adams County now since Norb Lose bought a car. No wonder insurance premiums have gone up. If you ever want any of your friends to come close to Decatur again, Norb, you had better hurry and take driving lessons so you can get your driver's license and display same to your friends. . . . Homer "Thomas A. Edison" Murphy knows what equipment is in the Test Section now. He helped to take inventory. Not a bad way to get acquainted. . . . "Neptune" Miller says he finally has his outboard motor in first class shape and ready to run again. Don Kruse is planning on going with him this week-end and has doubled his ration of vitamins preparatory to rowing the boat all over the lake.

Bowlers come and bowlers go
Of that we are quite sure
Some bowl good and some bowl bad
That much we will endure.
When we send a bowler
With champion expectations
We don't intend that he'll return
With nothing but frustrations.
Your poor dear wife will have to sell
Her home and jewels too
To try and pay the total cost
Of the bowling trip for you.
You'd better not tell us again
Of the bowling games you've won
Or we'll bring up the subject
Of that lowly 501!

This poem and the flowers on his bench were "Champ" Crabill's hello from the gang. Better luck next time. . . . Cy Seymour is going to Florida soon, and is getting in shape by eating hog meat and corn pone at the cafeteria. Every day he looks at the menu at lunch time and relates his experience with good ole Southern cooking, possum oozing with gravy, corn pone, lassus and grits. He is crazy (his own admission) about black eyed peas, such as only can be had below the Mason-Dixon line. . . . The progress of the electrical age has been greatly retarded since the team of Les Stauch and Herb Tilbury have been working here. It is difficult at times to determine which is the tester and which is the reader, since neither one can decide on how to connect a motor or what frequency to be used. It is not unusual to see Les wheeling transformers around the floor for the test, only to have Herb tell him that the job has another frequency. . . . Recalling the days when some of the fellows were enjoying world travel under the sponsorship of their friends and neighbors, we discovered that the course of a couple of our veterans stopped at China. The rickshaw boys are Joe Prezbindowski and Ray Matthews.

Warner Has 30 Years Service

W. W. Warner, Taylor St., recently celebrated his 30th anniversary with General Electric. Shown at the presentation of a congratulatory letter from the management are (l. to r.) M. E. Lord, Manager of the FHP Motor divisions; Mr. Warner, and A. W. Bartling, Manager of FHP Sales.

Firemen To Tryout For Softball Team

All firemen who desire to tryout for the Interdivision softball team are requested to report for practice at 6 p.m. Thursday, May 5, at Diamond 4, McMillen Park.

Our most sincere sympathy to Merle Morkoetter and son in the death of their wife and mother and to Ray DeBolt in the death of his son. . . . Henry Bradfield is at the Lutheran Hospital recovering from an appendectomy. He is in Room 220. . . . Our welder Ernie Brown, now Governor of Moose Lodge 200, and his efficient committee combined a bit of Christmas spirit which was aided by proper weather settings to make their annual Easter egg hunt a great success. Our former co-worker Claude Gill gave a helping hand to add to the success. . . . Get your man Chief A. R. (Butch) Vegalues was out last week and assisted in locating several oil cans missing from the oiler's wagon. . . . The secret of Marcellus Junk's success in the bowling tournament is now out. He says he was throwing a straight hook; now if you can throw a straight hook you can be a top notch bowler too. . . . A couple of the tool crib boys, Traverse Chandler and Fred Bishop staged a foot race the other day with Traverse winning in a close heat. . . . Mac McMaken, our St. Joe fireman, always comes up a casualty after they have a fire. Last week he had a bandaged hand and a slight limp. Could it be you fell off the truck again, Mac? . . . Joe Mattis finally left his friend Bill Johnson out in the cold last week when he addressed the boys at lunch with his usual cheery "Hello, Gentlemen," and you too, Bill. . . . Cris Delagrange has a new supply of the most aromatic herring you ever smelled. If you don't think so, just ask Art Kraft or Ozzie Nahrwold. . . . Birthday greetings this week go to Ardell Hambrock, John Driver and Hubert Sherlock. Congratulations and many happy returns. . . . It seems that Jess Batchelder started something last week as several of us have been taking turns at keeping the new skunk cage that Gene Werling fixed up. I know it's not my fault because no matter who I play with I get skunked. . . . Paul Boedeker has begun to get a bit chesty since his bowling team has gone into first place. Maybe he has started throwing that straight hook too.

Fractional Fiction 4-5

By Leola Carrier

The Bldg. 4-5 office is looking on the bright side nowadays. The paint has been removed from the windows, and old war memories have been washed away. . . . We all are wondering how many more hidden traits we have among our people. Ilo Motter brought in a cake shaped like a lamb with a big red ribbon around its neck. Gene Berg said he was going to bake his wife a birthday cake. How about displaying your talent, Gene? . . . Red Lee said he wasn't bragging when he was showing pictures of his grandchildren. I am just proud of them. They take after the grandfather. They are small. . . . Helen Papenbrock needs someone to keep her posted on what day it is. She puts her clock card in the box Thursday, and Friday comes around, she wonders who took her card. . . . Dohr Kreig is going to have his own originality by wearing purple hair. He said he wasn't the boy with the green hair. . . . We all enjoyed the beautiful church picture window in last week's issue. Congratulations to the WORKS NEWS staff. . . . Div. 15 is doing all right. Helen Papenbrock came along, said they have a new Pontiac. Frenchy LeGras is expecting a new Buick this week and "Lightening" Auth has a new DeSoto. . . . Leola Carrier and husband spent last week in Hot Springs, Ark. They were visiting her husband's folks. . . . Paul Stemmler had the luck of a fisherman, no fish but two flat tires. . . . We all wish Forrest Bunner a speedy recovery. Forrest has been ill for a couple of weeks. . . . Birthday greetings for the week go to Henry Vance and Rose Moody. Many more happy returns. . . . We express our sympathy to Pearl Ross in the death of her husband.

Young couples seem to get along best when near relatives are far away.

Tanks To You From Plating-Two

By Marie Lantz

Although the weatherman didn't prepare us for nor predict a "white Easter," Pink and Dewey almost did. Since it was turning colder Good Friday, we thought their remark that it was snowing down south referred to the weather. After we fell, we found it was just a slip falling down. . . . No kidding the Bunny almost brought us the Beast of Busco—in the form of an Easter egg—almost, we say. The beautiful blue egg which had his name inscribed upon it fell to the floor before the turtle was transferred. . . . Pressing is Helene Evanoff's present ambition—men's shirts, that is. Our advice is old and worn—if you don't succeed, Helene, try again. For it all comes out in the wash. . . . Clyde couldn't exactly be crafty—not with his apparent distaste for toasted cheese sandwiches. . . . Fred Zimmerman gave us quite a scare last week. Taken ill at work, he was sent home—but is back on the job now, feeling better.

Carl Metker doesn't seem to be the type that gets excited very easy, but he did the other night when the car stalled and Ardola Johnson yelled for assistance to get the car going again. Carl was so excited that he snuck the lighted end of a cigarette in his mouth. Now he is very careful of what he eats. . . . We were very surprised when we heard that Bill Wickliffe was afflicted with dizzy spells. He went to the dentist and he gave him some pills to help deaden the pain. When he left and was walking down the street he became very dizzy and couldn't imagine any doctor giving anyone that much dope to make a person feel like he did. Imagine his surprise when he discovered that he had left his glasses in the office. . . . Janice Hyser and Carole Ragen saw to it that the Easter bunny didn't forget Mary Nute and her husband. . . . Congratulations to Pauline (Smith) and Paul Irey whose daughter was born a week ago. . . . Hazel Stauffer is all in tune for another wedding. Last Saturday she played the organ at her first wedding and from all reports she did OK. All you June brides remember that. . . . Our friend Warren Jackson has gone to Taylor Street, and, boy, will we miss him. . . . That was a pretty good picture of Serena Slater in last week's WORKS NEWS but if we didn't know who sat back of her we wouldn't have recognized Millie Coleman. . . . Happy birthday to Faye Folk. . . . The last I heard there was going to be a law-suit—one was going to sue the other. Ted Bain's name was under Hamilton McCoys picture. I don't know who would win out, but "Skin-head" Bain said that the next time Mac had his picture taken he should paste a fly on his head so they would know who was who.

Voltmen Sign New Pitcher, Scott Cary

The Tools jumped into a two-game lead in the Small Motor League this week with just one night to go.

Paul Walker had the only 600 series of the week. A 601 on games of 195-202-204.

Two hundred scores were as follows: Flager, 222, 201; Walt Mertz, 205, 211; Lowell Welker, 202, 200; Jim Daley, 221; Stephen, 210; Leo Elward, 202; Bill Miller, 201, and Erv "Ghost Writer" Aumann, 200.

Office League

The Dickason Barber Shop team gave the Designers a haircut and shave. In return they got clipped, but managed to win the second half. Next Monday night they will engage the Blueprint boys to determine the league championship.

The high-low doubles tournament will also be held next Monday evening.

Orv Doherty finished the season in high gear, shooting a 606 on games of 158, 232 and 216.

Two hundred scores: Don Waldrop, 235; Walt Gerke, 222; Dick Gettys, 221; Erv Aumann, 213; Frank Schlink, 213; Vic Rump, 212, and Les Shroyer, 211.

Bowling and Stuff

Hurry and sign up as a charter member of the Fort Wayne Bowlers Welfare Association. Membership closes April 30.

The Hahn Way Cleaners won the team championship of the employees' tournament. They shot games of 1074, 1216 and 1025 for a 3315 total. They had a handicap of 135 pins per game. Members of the team and their totals are George Soule, 519; E. Roby, 526; R. Madden, 595; J. Haas 585, and Dale Springer, 613.

Second place went to the Worthman team, which had a 3252 total and the highest actual pin fall of the tournament, 3036. They were led by Joe Hambrock's 662 series.

Third place went to the Taylor St. team with a 3221 total. They were paced by Oscar Shelper's 696 total and 277 high single game.

Fourth place went to the Motor and Generator team, which always gets all the wood (providing they get enough handicaps) a 3170 total. They were paced by Lee Crowell's 672 total and Paul Walker's 265 second game. They beat Brouwers.

Fifth place went to the Brouwers' Tire and Battery team. Their total was 3143. George Luedeman showed the way with a 641 series and a high single game of 267.

Sixth place—Apparatus 2	3108
Seventh place—Cost	3097
Eighth place—Apparatus 5	3095
Ninth place—Pabst Blue Ribbon	3088
Tenth place—Inspectors	3086
Eleventh place—Apparatus 7	3075
Twelfth place—Series & Spec.	3072
Thirteenth place—Levels	3062
Fourteenth place—Doric	3054

The next team, the boys who were just out of the money, was the Broadway Beer and Wine boys with a score of 3047.

In the doubles last Saturday, Walt Mertz and Frank Matthews shot into second place with a 1379 total. Frank ran into the baby split in the last frame and failed to convert to miss out on first place. They shot an actual pin total of 1271, which isn't bad in any man's league.

Don Dimke and M. Junk continue to lead the doubles with a 1390 total.

Ed Kraft continues to lead both the singles and all events with scores of 756 and 1937.

Walt Mertz took over second place in the all events with a 1787 total. Other unofficial standings are as follows: George Luedeman, 1769; L. May, 1761; P. Walker, 1749; A. Crayton, 1744; W. Buuck, 1725; G. Soule, 1724, and F. Matthews, 1722.

The tournament will conclude Saturday with three squads of doubles and singles. Squad times will be 3 p.m., 5:30 p.m., and 7:30 p.m.

League secretaries are urged to turn in their final league standings to Les Shroyer, Bldg. 31-2. These standings will be edited and turned over to the city secretary for the annual year book.

Plans are underway to hold the second annual tournament of league champions. This tournament will be held to determine the club champion. The winners receive G-E Club sweater awards. So keep in there pitching.

Last week's ghost writer was none other than Erv Aumann. Thanks a million, Erv, we'll see that you get another crack at it.

Decatur Bowling Leagues

In the Fraternal League, Bob Lord stole the show on the final night of bowling. He rolled his highest series of the season with a neat 683 on games of 194-278-211. Bob's efforts led Moose I to three wins over G-E Club. Moose II league winner won only one from K. of C.

The two hundred scores were: Zelt, 204; Babcock, 200, 214; Werling, 202, and J. Murphy, 212.

The final standings were: Moose II, 30-15 (also first half winner); Moose I, 28-17; K. of C., 23-22, and G-E Club, 9-36.

The high series in the Monday night league were rolled by G. Schultz, 610, and H. Murphy, 627.

Scores of 200 were rolled by Cook, 257; Laurent, 201; Longsworth, 208, and Bieberich, 214.

Ham League Schedules First Outdoor Practice

The first outdoor practice for the Ham Softball League will be held at 6 p.m. Tuesday, April 26, at the McMillen park. All ball players are to report promptly at 6 p.m.

There are still a number of openings for team positions. Anyone interested is requested to fill out the blank below and mail it to Bill Schible, Bldg. 20-1.

Voltmen Invite Youngsters To Attend All Games Free

Ask For Volunteers To Assist In Looking After Special Section

The G-E Voltmen will throw the Dwenger Park gates open this season to all boys and girls up to 15 years of age.

A new policy adopted this year by the G-E Club, the plan has been established to help underprivileged children of Fort Wayne. In addition to this special arrangement for youngsters, boys and girls from 15 to 18 will be charged a nominal fee of 30 cents for the games.

To Have Special Section

A special section will be established for these young fans, though those who come with their parents will be permitted to sit with them. Charles Wilt, G-E Club President, has issued an appeal for G-E employees to assist in looking after the special section.

"These foster fathers will be admitted free along with the children," Mr. Wilt stated.

Policy Wins Praise

His announcement concerning the youth open-door policy won praise from Lt. Emma Lepper, head of the Juvenile Aid Division of the Fort Wayne Police Department. She stated, "The G-E Voltmen deserve considerable commendation in this move. They certainly are giving the youth of our community a fine way to spend their leisure time."

The announcement was also made that the sale of Booster tickets will start Friday, April 29. The regular adult tickets are: grandstand, 74 cents, and box seats, $1.25. Booster tickets are $1. With a Booster ticket, employees can see the regularly scheduled games for 50 cents.

Booster tickets will be available at the G-E Club bowling alleys and at the personnel offices at the Taylor St. and Winter St. plants.

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

It seems as though one of our old friends from Div. 1, O. D. Coleman, had a little difficulty getting the elevator to run the other day. After trying for several minutes to get it to go up, Clyde Cowan opened the door and there was Orv still waiting. Next time you want to go up Orv call for help and we'll find an operator for you. . . . Last Friday all the girls in the office received their pretty Easter hankies from their secret pals. All the hankies were beautiful and they really looked like spring. . . . Several of the fellows have learned not to put anything on Alma Witte's desk they don't want mailed. Any stray letters found lying around on the desk she puts in an envelope and out they go. . . . Happy birthday to Thelma Stapleton on April 26, hope you have a very nice day. . . . Thursday all the girls in the division had a potluck lunch. After such a layout of wonderful food, we were not worth much the rest of the day. . . . Girls, when Gene Foster whistles when he talks to you, he is not flirting. He just has his new front teeth, and is having a little difficulty with them.

One of the country's best alarm clocks is ham and eggs cooking on the kitchen stove.

OWL GOLF LEAGUE PLANS ORGANIZATIONAL MEETING

The Owl Golf League will have an organizational meeting at 2 p.m. Friday, April 29, in the G-E Club. League play is tentatively scheduled to start Wednesday, May 11.

All team captains and players who are not members of a team are requested to attend this meeting. Floyd Garland, league manager, and Earl Stauffer, secretary of last year, will be in charge of the meeting.

Scott Cary, talented lefthander who pitched for the G-E Club baseball team during the 1945 season, has been added to the 1949 roster of Voltmen, it was announced today by Manager John (Red) Braden.

Cary pitched the whole season of 1947 for the Washington Senators of the American League.

In the summer of 1946 he entered Organized Baseball with a record of 30 victories against only three defeats.

Scotty hung up his enviable record for Orlando, Fla., of the Class D, Florida State League, a farm club for the Senators. Then Manager Ossie Bluege snatched him up for the Washington team.

A relief pitcher for the Senators, Scotty was credited with three wins and two losses.

The American League banished him the next year, when he developed a sore arm during spring training.

He joined the St. Louis Browns, in the Tri-State League, and was farmed out to Chattanooga, members of the Southern Asociation. He chalked up 15 wins against eight losses last season.

When his father died last summer, Scotty decided to leave organized ball to help his mother on their farm near Burr Oak, Mich.

The fifth newcomer signed this season, Cary brings the Voltmen's pitching staff to six men. Other pitchers are John Orphal, Hugh Orphan, Charles Shipman, Al Hazel, and Bill Brandt; other newcomers thus far include Don Runge, Stanley Miasek, Shipman and Orphal.

Owl Industrial Team Schedules First Practice

The Owl Industrial League softball team will hold its first practice at 9:30 a.m. Monday, April 25, at McMillen Park. All men on second or third shift wanting to play softball this season are invited to this practice.

In case of rain, there will be a meeting in the G-E Club gym. All positions are open, and players should send the application blank below to Cecil Tarney, team manager, Bldg. 4-5.

All players are requested to bring their gloves to the practice. In case of an indoor practice, gym shoes are also required.

Where The Money Goes

MATERIALS, etc., took $201 million—or 48.4c out of each $1 received

$201 million had to be used in the first 3 months of 1949 to provide for materials, light, heat, power, supplies, services of outsiders, reserves, wearing out of equipment, and taxes other than Federal Income Taxes shown below.

EMPLOYEES took $163 million—or 39.5c out of each $1 received

$163 million went for our employees' pay checks of $151 million, and for extras of $12 million to provide pensions, insurance and other employees' benefits.

UNCLE SAM took $23 million—or 5.7c out of each $1 received

$23 million was required by Uncle Sam for Federal Income Taxes on the Company's total income for the quarter.

BUSINESS NEEDS took $13 million—or 3c out of each $1 received

After these expenses, $27 million was left as net income, or 6.4¢ on each $1 received. But $13 million, or 3¢ on each $1 received, couldn't be paid to stockholders. It had to be kept in the business to finance larger inventories, to provide for meeting competition, and to make as many jobs as possible as safe as possible.

OWNERS took $14 million—or 3.4c out of each $1 received

$14 million was paid to stockholders. They, in general, had to pay a second tax of from 17¢ to 82¢ out of each $1 of this amount in personal Federal Income Taxes. These taxes were in addition to the $23 million of their original total income already taken for Federal Income Taxes as indicated above.

Both receipts and earnings were somewhat below the previous quarter, but a little above the first quarter of last year.

In the middle of March our prices were reduced on refrigerators, radios and freezers. New, low-priced television sets and automatic clothes washers were brought out. These developments came so late in the quarter as not to indicate their full effect on volume and earnings. They are expected to save customers $50 million this year. Further price reductions have been made in April.

April business is fair to date and jobs for the Company as a whole are only about 3% below our all-time peak. We have no predictions to make for the balance of the year, but all concerned can be assured that every effort will be made to get the sales that make the jobs.

GENERAL ELECTRIC

FORT WAYNE WORKS

NEWS

Volume 32 | FORT WAYNE, INDIANA, FRIDAY, APRIL 29, 1949 | No. 17

The real test in golf and in life is not in keeping out of the rough, but in getting out after we are in.

—*Rev. John H. Moore*

G-E Club To Sponsor Old Fashioned Dance

An Old Fashioned Dance for G-E employees will be held Friday night, May 6, in the G-E Club gymnasium, the Family Night committee announced

Admission will be free of charge to all employees and their families. Tickets are available at the G-E Club and Bldg. 18-B candy stands and at the personnel offices at the Taylor St. and Winter St. plants.

The dance, second to be held this year in the G-E Club's Family Night series, will begin at 8 p.m. Joe Taylor, Bldg. 27, and his Red Bird recording band will furnish the music.

Special dance sets will be arranged for the inexperienced or less ardent dancers. Ed Parker, Bldg. 24, will pipe the sets to the gay music of some real hoosier fiddle-busters.

Summer Help Opportunities Are Restricted

During the past few years the General Electric Company at Fort Wayne has employed a number of students during the summer months.

This year the opportunities for summer employment will be greatly restricted because conditions have changed, involving some reduction of the working force.

While applications for summer employment are being received, the indications at present are that such employment will not be available this year.

For obvious reasons, any work becoming available will be given to those employees off for lack of work at the time.

Veterans To Hold Annual Meeting, Elect New Officers

Plans are being completed for the annual meeting of the G-E World War Veterans' Association at 8 p.m. Friday, May 6, in Kreis Stolzenau hall.

Highlight of the meeting will be the annual election of officers.

Nominees for office are:

President:

Howard Householder, Taylor St.

Ken Michael, Broadway

Vice-President:

Jimmie James, Broadway

Frank Till, Winter St.

Secretary:

Walter Whonsetler, Broadway

James Bohn, Winter St.

(Continued on Page 3)

Today Is Deadline For Reservations To Elex Mother, Daughter Parties

Today is the last day to make reservations for the Elex Mother and Daughter parties to be held Thursday, May 5.

There are two parties planned, one at the YWCA for the night girls with luncheon being served at 12 noon. The second affair will be held at 8 p.m. in the G.E Club gym for the day girls.

Dorothy Koomjohn

Dorothy Koomjohn, concert pianist, will be featured at the day girls' section of the Elex Mother-Daughter party Thursday, May 5.

Miss Koomjohn is the daughter of Charles Koomjohn, Bldg. 4-6. She is a member of the faculty for the St. Louis Institute of Music. A graduate of the Ruth Castle Studios in Fort Wayne and the St. Louis Institute, she recently completed her first concert tour, through Pennsylvania and Ohio.

Featured at the noon party are Vernon Carr, magician, and Delores Patterson, vocalist. The day girls will hear Dorothy Koomjohn, concert pianist, and Ogden's saxophone quartet.

There will be gifts for each mother of Elex members. There will also be prizes for the oldest and youngest mothers, the one coming the greatest distance, and the oldest grandmother attending the parties. In addition, there will be four attendance prizes for motbers.

Tickets for the day girls' party are 75 cents each, while the night girls' tickets are $1 each.

Elex To Co-Sponsor Rummage Sale May 13

The Elex Club will hold a rummage sale Friday, May 13, with the Anthony Blvd. Presbyterian Church. The sale will be held in a building at the corner of Baker and Calhoun streets.

Merrihue To Speak At Dinner For G-E Foremen, Supervisors

W. V. Merrihue, Manager of Employee and Community Relations for the Apparatus Department, will be the speaker when the Fort Wayne Management plays host to the G-E Foremen's Association and the Supervisors' Club at their semi-annual dinner Wednesday, May 11, in the G-E Club auditorium.

W. V. Merrihue

Mr. Merrihue graduated from the University of Pennsylvania with a Bachelor of Science degree in Chemical Engineering in the class of 1925. While an undergraduate, he edited several magazines which attracted the attention of the General Electric Company. This resulted in an offer of a position in the centralized Publicity Department of the Company as a copywriter.

In periodic steps, he was promoted to Assistant Manager of the Industrial Advertising division, Manager of the Central Station Advertising division, Assistant Manager of all Apparatus Advertising divisions, and in 1944 was made Manager of the Advertising and Sales Promotion divisions of the Company's leading unit, the Apparatus Department. After three years in this capacity, he was promoted to Manager of Employee, Labor, and Community Relations for the Apparatus Department.

In 1932 Mr. Merrihue received the Company's highest honor, the Charles A. Coffin Award for "initiative, ingenuity and perseverance in devising a new and unusual sales plan."

In his present position he sets policies and appraises, stimulates, and coordinates the industrial relations of a far-flung operation embracing twenty-three manufacturing plants throughout the country with a combined employment of 97,000 people.

To Serve Dinner In Shifts

Every member is asked to report for the dinner at the time indicated on the invitation. The dinner will be served in two shifts, one at 5:30 p.m. and the second at 6 p.m.

Record Number of Stockholders Attend Annual Meeting at Schenectady Works

A bird's-eye view of the largest crowd ever to attend a General Electric stockholders meeting, which was held in the Company's new $30,000,000 turbine building in Scehnectady. Chairman of the Board of Directors, Philip D. Reed, presided at the meeting. An estimated 1,500 stockholders heard G-E President Charles E. Wilson speak on the annual report for 1948 and on operations for the first quarter of 1949.

An estimated 1,500 stockholders attended the annual meeting of the General Electric Company Tuesday, April 19, which was held in the heart of the Company's largest manufacturing operation, its new $30,000,000 turbine building. It was believed to be the largest crowd ever to attend any stockholders meeting.

Guests were also given an opportunity to view the partially-completed new quarters of the G-E Research Laboratory at the Knolls, near Schenectady.

The meeting was presided over by Philip D. Reed, chairman of the G-E Board of Directors. Secretary

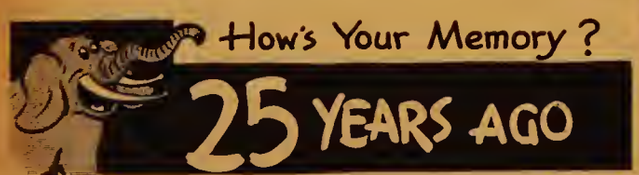
Value Of Better Ideas Seen In New Method Of Resuscitation

An example of what it means to think out a better way of doing things, an improved method of accomplishing an objective, is found in the revised manner of applying the prone pressure method of artificial resuscitation. For years and years there was only one acknowledged way of reviving a person presumably dead through electric shock, gas suffocation or drowning. For years and years first aid crews followed the accepted way, assuming there could be no other.

Then, apparently all of a sudden, someone came forward with a different way . . . not only different but infinitely better. It ended the danger of injury to the person being revived. By the old method, occasionally ribs were broken or internal organs were misplaced by the pressure employed to restore natural breathing. Everyone accepted this as a natural course of events. Everyone thought nothing much could be done about it.



But something was done and through the new method now being used throughout the Company, danger of cracked ribs of other internal injuries is almost entirely eliminated. The patient has more of a chance to recover. The natural function of breathing is given more opportunity to return . . . the better way has prevailed all because someone had the brains to think further than the job as it was laid out.

There Are All Kinds Of Accidents To Befall Us

An accident is the product of luck. It may be good luck. It may be bad luck. If you won a lottery for $100,000 that would be an accident, happy to be sure. If you dropped a piece of steel on your big toe and laid up in the hospital while the toe mended, that would be an accident, dismally unhappy of course.

All day long everywhere we have accidents. Luckily most of them do not cause personal injury or property damage. Records compiled by a large insurance company show that in a unit group of 330 similar accidents, 300 produce no injuries, 29 are accompanied by minor injuries and only one causes a major injury or perhaps death.

If we are to keep accidents, these things which happen without design, to a minimum number, each one of us has a part to do. What that part is, each one of us knows best and if we continually apply that knowledge, we'll escape a lot of trouble.

The plans for the memorial which will be erected here at our plant in honor of the men who left our organization for military service during the World War, are nearing completion.

* * *

Making moonlight for the movies. Romance—manufactured in General Electric shops.

Although the company was a pioneer in the manufacture of moving picture apparatus, it is only during the last four years that it has had broad interest in helping Hollywood. Yet in this short time much apparatus of great importance to the motion picture business, infant prodigy of industries, has been developed.

Today G-E workers make motion picture projection lamps of both arc and Mazda type, studio lights, studio spotlights and motor-generator compensarcs. Thus the antics of Chaplin and the artistry of Arliss, together with the work of hundreds of other stars shining in filmdom, is brought into contact with the daily tasks of workers in G-E plants.

* * *

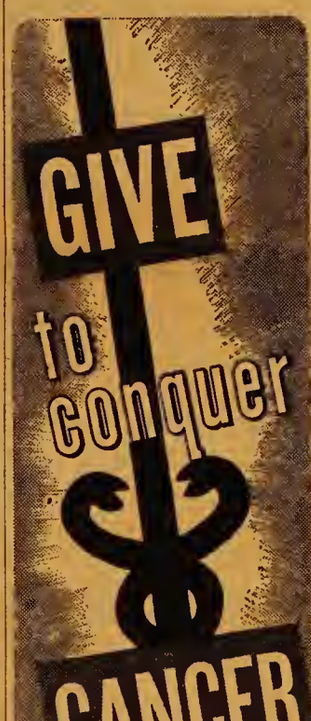
You want to be sure to attend the Federation County Fair planned for Saturday night, April 26, The Y.W.C.A. gymnasium will be so transformed for this occasion that you will not be able to recognize it.

We might tell you a few secrets if you don't tell too many people. Polly Botts has offered her services as an expert horsewoman for our benefit, and listen—Sh-h-h! Irene Meyers is going to be a mon—No, we guess we'd better not tell that. Anyway, you he sure to come, for there will be many surprises waiting for you.

* * *

At the annual meeting of the debenture bondholders of the G-E Employees Securities Corporation held at the fire station, Building 45, of the Schenectady Works at 11 a.m., April 14, Fred Duryee, of this Works, re-elected a bond director.

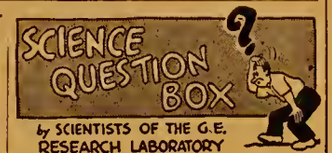
* * *



Two new members, Samuel Richards, of Building 2-3, and Peter M. Braun, of Building 12-2, have lately received Quarter Century Club membership buttons.

* *

Thirty-seven members of the Apprentice Alumni Association made a visit to the Auburn Automobile Company's plant at Auburn, Indiana on Saturday morning, April 5th. Eddie Kammeyer was the first to be welcomed at Auburn. He was escorted down the main street to the court house and back again to the office of a justice of the peace, where he was relieved of some money because he failed to turn a street corner in the proper manner.



'Where Do You Think You're Going?'

Cancer Can Strike Anyone

Give and keep giving to conquer cancer. Every dime helps teach new thousands how to recognize cancer and what to do about it. Every quarter helps support research scientists seeking the cause and cure. Every dollar helps provide facilities for treatment and care.

Q. Is a level line a straight line?

A. No, not if it is very long. A line or surface is level when it is at right angles to the vertical, i.e. the direction of the center of the Earth. The vertical at New York is not the same as the vertical at Chicago, and a level line between the two cities would curve, following the curvature of the Earth.

WHAT'S NEW IN G-E PLANTS & LABS

CLEVELAND—Using the new "coiled-coil" filament construction announced recently, the Lamp Department here announces reduction in the size of the 75-watt general lighting lamp as well as an increase in its light output and efficiency. It now has the same physical size and shape as the present 60-watt lamp, making it suitable for use in portable lamps and fixtures where only lamps of lower wattage could be used previously. Other lamps to which the technique had already been applied are the 50, 60, and 100 watt. Greater efficiency of new method is attributed to the coiling method which reduces the filament from an original 21½ inches to a length in the finished filament of only ⅛ of an inch.

Radio tubes of ceramic materials, recently developed in the Research Laboratory at Schenectady, offer many advantages in producing tiny radio waves a few inches in length. The development solved the chief problem in making such tubes, that is, obtaining a tight seal between the ceramic and metal parts.

YORK, PA.—The Boundary Ave. Works here has completed 1,521 days without a lost-time accident, the last such accident being Oct. 12, 1944, an unequalled record within the Company.

Meet the President

Record Number

(Continued from Page 1)

W. W. Trench read the notice of the meeting and G-E President Charles E. Wilson spoke on the annual report for 1948 and included a report on the first quarter of 1949. A report was also given by J. W. Belanger, Manager of the Turbine divisions, who spoke on "New Turbine Facilities and the Future of the Power Industry."

1,155 Tour Research Lab

Of the visitors who arrived between 9 and 11 a.m. for the meeting, 1,155 were taken on the tours through the new Research Laboratory facilities. Following a luncheon for all guests, bus tours were conducted around the Schenectady Works, as well as tours of the new turbine building in which the meeting was held. A staff of 380 was present to direct the tours, luncheon and other meeting facilities. Of this number 110 were members of the G-E Woman's Club who served as waitresses at the luncheon.

After presenting the five summary statements of G-E's 1948 performance enumerated in the 57th Annual Report, Mr. Wilson added:

"These and similar accomplishments, which have benefited so many people year after year, were made possible only because General Electric's operations have been profitable. It seems to me that this sums up fairly well the performance of our corporate job during 1948, with full awareness of our social responsibilities. It is a performance in which we take considerable pride."

Elect 16 Directors

Members of the Board of Directors which were elected at the meeting are: Charles F. Adams, S. Sloan Colt, Donald K. David, Charles D. Dickey, G. Peabody Gardner, Francis L. Higginson, John Holmes, George G. Montgomery, Henry S. Morgan, Philip D. Reed, Edward R. Stettinius, Jr., Robert T. Stevens, Sidney J. Weinberg, Lewis B. Williams, Charles E. Wilson and Robert D. Woodruff.

Operations of the General Electric Company and its consolidated affiliates for the first three months of 1949 resulted in a profit available for dividends of $26,702,978, or 93 cents a share of common stock. This represented an increase of 5 per cent over the $25,389,149, or 88 cents a share, earned in the corresponding period of 1948. These earnings were equivalent to 6.5 cents on each dollar of sales in the 1949 period compared with 6.9 cents a year earlier.

Net Sales Boost 12%

Consolidated net sales billed in the first quarter of this year totaled $411,615,528, or 12 per cent more than the $365,957,990 billed in the same period a year ago.

The Company will pay a dividend of 50 cents a share on April 25 for the first quarter of 1949, compared with 40 cents a share paid for the corresponding quarter last year. This will he the 207th dividend on the Company's common stock and will involve the distribution of approximately $14,200,000 to about 250,000 stockholders.

Consolidated statements of operations for the three months ended March 31 this year and last year, partly estimated and subject to audit at the year end, are shown below:

	3 months ended March 31 1949	1948
Net sales billed	$411,615,528	$365,957,990
Costs, expenses, and other charges	363,053,853	319,705,167
Income from sales	48,561,675	46,252,823
Income from other sources:		
Interest, dividends, and other sundry revenue	2,835,859	2,024,030
Less interest and other financial charges	1,194,556	1,298,450
	1.641,303	725,580
Total income before provision for Federal taxes on income	50,202,978	46,978,403
Federal taxes on income	23,500,000	21,500,000
	26,702,978	25,478,403
Minority and nonconsolidated interest in net income	—	89,254
Net income applicable to General Electric Company common stock	$ 26,702,978	$ 25,389,149
Earnings per share on 28,845,927 shares Issued	$0.93	$0.88

Zercie Sinish received word of another new grandson last week. That makes three lively little grandsons for Zercie. . . . Norene Devlin celebrated a birthday on Wednesday of last week. Slightly belated we wish to say happy birthday, Norene. . . . Rae Smith seems to have quite a time getting things together, especially earrings. Seems last Wednesday she appeared for work very cheerfully only to find that she was wearing a very novel pair of earrings. One earring being red and the other green. Red and green stockings aren't to unusual, but red and green earrings are quite unusual. . . . The Pi Omi Cron sorority spring dance being held this Saturday has been keeping its members very busy with all the details. Emma Meyers is one of the busy gals, but I'm sure the results will be well worth the effort. . . . Thought for the week: If Helen Eggeman can keep track of Viola Haiber's keys, can Viola keep track of Helen's car. . . . Hilda Krause reported that the "Sunflower State" Kansas greeted her with very pretty weather for her Easter visit. That just goes to show you, Hilda, that even the weather man was glad to see you back. . . . Could it be that Hazel Smith's Mom doesn't trust her driving? . . . Shipping section has been puzzled lately with a very deep problem. Who likes spaghetti best, Bob Jellison or Katie Minehart? . . . 'Tis agreed by all the M/S typist that Dorothy Fletter would make an excellent silent actress. Her pantomime is perfect.

Cordiner Is Elected Executive Vice Pres., Director Of Company

R. J. Cordiner

Ralph J. Cordiner has been elected executive vice president and a director of the General Electric Company by the board of directors, it was announced this week. The directors also re-elected Charles E. Wilson and Philip D. Reed, as president and chairman of the board, respectively.

Mr. Cordiner has been vice-president and assistant to the president since February, 1945. He became assistant to the president in July, 1943, after serving during the war as director general of war production scheduling and vice chairman of the War Production Board.

Before the war he served for many years with the Company's Appliance and Merchandise Department. In 1938 he succeeded Mr. Wilson as manager of that department. Before joining the Appliance and Merchandise Department, he had served with Hotpoint, Inc., a G-E affiliate, which he joined in 1923.

A native of Walla Walla, Wash., Mr. Cordiner was graduated from Whitman College in 1922 with honors.

Veterans to Hold

(Continued from Page 1)

Treasurer:
Harold Rahe, Winter St.
Don McAleece, Taylor St.
Sergeant-At-Arms:
Edmund Holocher, Broadway
Andrew Brown, Taylor St.

In addition, nominations will be accepted from the floor prior to the balloting.

Vice-President Robert Bangert and his committee have prepared a full program of entertainment.

Tickets for the meeting are $1 and are being sold by all contact men.

Mrs. Olive Adams Dies

Mrs. Olive E. Adams, 47, 1623 E. Creighton Ave., died at 9:25 p.m. Friday, April 22.

She was a member of American Legion Post 47 Auxiliary, and an employee of General Electric since 1941. Mrs. Adams was first employed as a matron in Bldg. 26-2 and later in Bldg. 19-5. At the time of her death she was an assembler in Bldg. 4-3.

Services were held at 1:30 p.m. Tuesday at the Forest Park Methodist Church, the Rev. Dale Stackhouse officiating. Burial was in Huntington.

Last report — Elizabeth Carnel, Bldg. 18-1, is bemoaning the fate of her new (?) car. She tangled with a government representative, consequence the side of her poor little car was caved in to say nothing of her nerves. It seems that it is necessary to get an act of Congress to get her car repaired. Mayhe you are not of the right politics! . . . Happy birthday to Dorothy Janel of Bldg. 18-1 and Karl Reid, Bldg. 18-4. . . . The air was a little hazy in Bldg. 18-B recently when Hazel O'Brien locked her keys inside the canteen. . . . We have a report that Paul Lenz, Bldg. 18-4, is able to be "out" again. It seems his shirt sleeves departed from his shirt Tuesday a.m., or, could it be he is starting a new style. . . . We are certainly pleased to report that A. E. Leider is recuperating satisfactorily from his recent operation at the St. Joseph Hospital. This time "Hap" stay put in your room so they will not have to send out a four bell alarm looking for you. . . . The second floor of the hospital looks a bit like G-E row. Harold Mettler of Bldg. 4-4 is unhappy over an injured right hand—I am sure he feels that a power mower is as dangerous as a half dozen wild cats, and Leo Nyboer of Bldg. 4-5 is counting the hours until his month's sojourn is ended. . . . Did you notice the happy smile and new eye sparkle displayed by Marion Champion our Bldg. 18 messenger girl? The sparkle was a reflection from a very beautiful diamond denoting her engagement to John Waggoner of Elkhart, Ind. June is the month set for the wedding. Won't she be a cute little pocket edition of a bride? Sunday was the day of joint celebration, her birthday and engagement. Our very best wishes to you. . . . Ray White's Cubs had a kite flying contest last Saturday. Ray gave prizes for the biggest kite, best built, etc. But it took Ray to find the hole, trip, lose his balance, his change and his KEYS. Monday—he said, no keys no work in Bldg. 18-4! . . . There has been a first aid station established in Bldg. 18-4 with Olive Smith as the attendant. Herman Kappel the first noticed patron, gives a good recommendation for the service. Will Estel Monroe of Bldg. 18-1, please note, maybe they will supply a sling for your arm the next time you hurt your finger on the file. . . . What has happened to Mae Lacey? We understand that Lloyds of London refused to insure her. . . . We would like to know if there is anyone that can go in or out of a door more quietly than Carl Brandt, Bldg. 18-4. . . . Chet Kowalski, of Bldg. 18-1 must have an attraction in Pittsfield—last week two days and again this week. . . . Jean Meyer, Accounting section, is still bemoaning the fact that she had to send back a hamburger recently, or should we say the results have caused her to be a little unhappy. Don't let it get you down we like you anyway! . . . The Fort Wayne Management should be more "Safety Minded" than usual, if possible, after attending the two day session of the Sixth Annual Northeastern Indiana Safety Conference at the Chamber of Commerce. Our Herschel L. Smith, is General Chairman of the Safety Council, and Loyd Bodenhamer was chairman of the exhibits committee and a member of the program committee. . . . We were sorry to learn of the death of our friend John Gruber, who retired from G-E a number of years ago. Until the past two years he visited Bldg. 18 often and we shall miss his friendly visits.

The less people speak of their greatness, the more we think of it.

Elex Club To Hold Officers' Conference

The Elex Club's Spring Conference for Officers will he held tomorrow and Sunday, April 30 and May 1, at the Keys Hotel on Route 30 west.

The opening session will begin at 1 p.m., with Charlotte Stanford, Elex president, presiding. Following the first meeting, dinner will be served in the Key's grill, with the Decatur delegates acting as hostesses. The theme will be "Loo-Ah-OO, GeCode Style." Elex will have charge of the May Day Breakfast at 10 a.m. the next day, and the meetings will close at 2 p.m. Sunday.

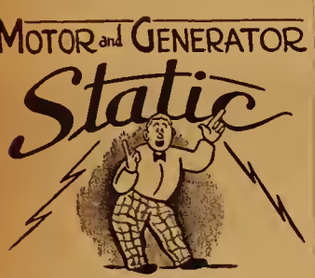
Mr. and Mrs. C. H. Matson, Mr. and Mrs. I. H. Freeman, and S. S. Monroe, of DeKalb plant, will be guests at the conference.

There are seven delegates representing Decatur, five from Danville, two from DeKalb and eight from the local Partizan Chapter.

Chemistry Class Tours Lab

Last week the chemistry class of Liberty Center high school toured the Taylor St. laboratory. W. K. Bugher, the instructor, (in the background, above, at the far right) is a former G-E employee. He worked at both the Broadway and Taylor St. labs from 1943 to 1945.

UE Suit Against G-E, AEC Dismissed By Federal Court



The million-dollar damage suit to enjoin the General Electric Company from following an Atomic Energy Commission order, brought by the CIO-United Electrical Workers against the Commission and G-E, was dismissed this week in Washington by Federal Judge F. Dickinson Letts. The UE announced the decision would be appealed.

The suit challenges orders issued by the AEC to General Electric last fall directing the Company not to recognize the UE as bargaining representative of employees engaged in classified atomic energy work in the Schenectady, N. Y., area.

Judge Letts, in his memorandum opinion, held that "the action of the Atomic Energy Commission of which the plaintiff — UE — complained was authorized by the Atomic Energy Act."

The Commission gave as reasons for their action failure of the UE officials to sign the non-Communist affidavits required under the Labor-Management Relations Act. And the fact that—"information is available, much of it a matter of open public record, of alleged Communist affiliation or association of various officers of UE." The Commission also pointed out that the UE officers had declined to submit data for loyalty investigation and had failed to take advantage of two invitations from the Commission to refute charges made as to their "alleged Communist affiliation or association."

Following this action the UE instituted suit against the Company and the AEC on Oct. 28, 1948, for $1,000,000 damages as a result of the Company's compliance with the Commission's order not to recognize the union at the two atomic power laboratories.

THOUGHT OF THE WEEK

"The biggest problem in the world could have been solved when it was small."

FOOD: It's rather an interesting pastime watching people's reactions in restaurants. Joe Neal, bachelor gourmet of Bldg. 31-1, assures himself of both food and service in a neighborhood restaurant by taking a waitress home and presenting flowers to the cook, while Fred Eisenbiegler, who is on a diet, under high pressure salesmanship by same waitress, ordered a large meal and pie on the side. . . . BEWARE: All gamblers are warned to beware of Jim Mitchell, who was observed buying a book on "How to Play Poker in Six Easy Lessons." According to reports he is on lesson five and should graduate next week. . . . "BUTTON—BUTTON": Who's got the button? The answer is Herm Zuber of Bldg. 19-B. Yes, Herm still wears his old wartime identification button. Relates Mr. Zuber, "Sometimes I have to look at it to identify myself, I was mighty purty in those days." . . . EXPANSION: George Grote is expanding his activities, and is now known as the Louis Bromfield of Bldg. 19-1. His latest project is a potato patch in Ohio. . . . Twins? Imo Foley and Althea Tarr, our cost division twins, celebrated their birthdays April 25. . . . RIGHT WAY: Little did the boys in Bldg. 27 realize as they watched Frank Rathert go about his duties, that hidden beneath a rugged exterior was the soul of a true artist. To Mr. Rathert, anything that violates his conception of harmony, produces the same discordant effect as a jazz musician in a symphony orchestra. Coming to work the other morning Frank observed ladies wearing head scarfs in a manner that violated his conception of the beautiful, so taking a scarf he demonstrated the proper way of arranging that head covering. This demonstration brought applause from his audience on the bus who realized that here was a genius at work. To Mr. Rathert there can be only one right way and that way he will be glad to demonstrate by appointment. . . . ACCIDENT: The other evening Roscoe Markley was feeling tired when he crawled into bed. As he settled down for a good night's rest there came a cracking sound and the bed collapsed, depositing slats, spring, and mattress and Mr. Markley on the floor. Was Roscoe nonplused by this accident? Did the fact that the large toe on his left foot was sprained in the collapse and a slat hit him on the head prevent our hero from enjoying a good night's sleep? The answer is, no. He rolled over and slept soundly till morning. The real accident occured when he awakened and forgetting what happened attempted to crawl out of bed. His head struck a side rail of the bed with slight injury to Roscoe and none to that piece of furniture. . . . SLIPPING: We have noted with alarm that Capt. S. S. Marquardt has lately been publicized in the "gossip column" of the evening paper. Too, we note that he is not adverse to this publicity since he brings copies of the items in for us to see, in the event we missed it the night before. Despite his recently developed "Man about town" air, we sincerely hope that he will not go so far as to effect a cane, spats and monocle. For an intimate glimpse behind the scenes of "Night Life with the Elite" may we humbly suggest the attention of Cliff Milnor.

Ramblings 31-2

At the end of the archery demonstration of the G-E Sports Show, Mr. and Mrs. Anderson called for a volunteer to have an apple shot off of his head. Tony of Main Auto was urged to try his luck, but he said, most emphatically, "Nothing doing." Then our K. R. McDougal walked nonchalantly up to the stage and volunteered. Earl Anderson gave him a farewell handshake, seated him in a chair, took his glasses, and placed an apple on his head. Meanwhile, Mrs. Anderson was standing ready with bow and arrow to shoot at the apple. "Oh, yes," said Earl, "I'll have to blindfold you, so you won't flinch and get hurt!" Mac said O. K. and in a few seconds twang went the bow, plop went the arrow and apple. The blindfold was removed. Mac heaved a sight of relief as he turned and saw the arrow and apple against the target. Mac took the apple, bit into it, and rejoined the audience. Just call Mac Bill Tell, Junior.

At a time like this words fail me—in fact words are inadequate to express my feelings. Olive Adams, our good friend and co-worker, suffered a stroke last Friday night, after working all day, and departed from this earthly life to one in a higher realm. She was kind and considerate, never one to anger, always pleasant with everyone. She was an Elex contact girl. She will be greatly missed by all who knew her. To her bereaved family our heartfelt sympathy to each and every one of you. . . . Emily Nierman, Alice Claymiller and Elfrieda Wolfe have returned to work after a short illness. . . . Happy birthday to Merle Kcesler and to Melba Flanders, and many more. Thanks for the lovely cake, Melba. . . . We welcome Herb Stack back to the group. Hope your stay will be for a long time. . . . What was this we heard of Lec Raver coming to work wearing two shades of hose. Was it too early in the morning, or was it a hurried job? . . . Say, Boedeker just when are you going to get that house painted? Could it be that you want the test and inspections boys to help? . . . Why doesn't Carl Harmon have a garden? This is a nice time to get out and play in the dirt, Carl, why don't you try it. . . . Fred Clark has a new car. Just watch him strut his stuff down the street. It is a honey of a car. We can say the same for Paul Ginder—he got a new green tudor Mercury. . . . I sure wish Waldemar Schmidt would give me a little news. Why the hold out, Schmidt, more money? Very sorry, no help. . . . Thelma Purdue had a lot of mud on her umbrella the other day. The only way that I can figure out that it got so muddy is that she must use it for a landing net when she goes fishing. She is still looking for that fishing partner. . . . Donna Lindley didn't know that selling a house could be such a headache and says never again. . . . That was a very good picture of Everett Lindeman in last week's WORKS NEWS, but, Everett, you never should have done it—now we know how old you are. . . . Our friend, Lillie Benz, is being pensioned this week. She hasn't been feeling too well and is going to California for a little while to see if the climate out there will help. We sure hope that it does and we are going to miss you very much.

R. P. Loveland Writes Article On Spur Gears

R. P. Loveland, Bldg. 4-6, has written an article about "Spur Gears" for the latest issue of Machine Design.

The story, a technical discussion of spur gears for use with universal and aircraft motors, is illustrated with sketches, diagrams and tables.

Mr. Loveland started with General Electric in May, 1930, in the FHP Motor Drafting division. Later he did layout work in the Engineering division and in 1937 he worked for L. F. Hemphill in Mechanical Engineering for Series and Specialty Motors. During the war, Mr. Loveland was assigned to work on the mechanical design of aircraft motors and later did coordination and design work of gear equipment which was driven by aircraft motors. Then in 1946 he was placed in charge of mechanical design for the DC and Specialty Motors division.

Mr. Loveland is the Company's representative from Fort Wayne in the American Gear Manufacturers' Association and on the G-E Interworks Gear Committee. He is also a member of the Fine Pitch Gear Committee of the AGMA and chairman of the subcommittee on flanges and drives for the SAE Aircraft Standardizing Committee.

Mr. and Mrs. Loveland have a son and daughter and live at 911 W. Creighton Ave.

Our deepest sympathy to Bill Grush in the death of his brother, Clarence, and to Robert Cuncy in the death of his mother. Also to Carl Moore whose father died and and to Estella Mitchell in the death of her mother. . . . If anyone notices the pleased look on Bill Crozier's face, it is only because he is now the proud papa of an 8 lb. 3 oz. baby boy. Congratulations to you and your wife, Bill. That goes for Ray Smith at Taylor St., too, the proud father of a new baby girl. . . . The John Root's have moved into their new home, and from all reports they are well pleased with John's masterpiece. Forest Carr and his family are settled in their new home too, with plenty of room for all, we hear. The boys are sorry to see you leave, Frosty, so come back and see us once in a while. . . . Wanted for Paul Dull: One small-sized tug boat with car-top carrier. . . . Bill Wetzel now owns a glorified Chevy, so anyone wishing to buy his old '37 DeSoto should contact him at once. Buying said car will entitle said purchaser to a shove into the center of the street. . . . John Birchmeyer is about to lose his happy home if he doesn't get that new Johnson motor off the dining room table, but quick. He's just so proud of the darn thing. . . . Not too much excitement on the third trick, but when something does happen it leaves poor Abe Koch at a loss—of his teeth that is. We understand the Lieutenant left his "plate" on the table at the wrong time and his wife unknowingly tossed them in the furnace. Folks, that accounts for Abe hanging around the undertaker parlors so much lately. He's waiting for a "good as new" set that fits just right. . . . Our curiosity is aroused no end as to who Bob Hatfield is going to take fishing with him when he uses that 800 feet of fish line and two cans of bait. . . . No, they didn't install any new lighting between columns P-15 and Q-15 at Taylor St. Mary Saxton says the windows in the General Service office have just been washed. . . . Happy birthday to Bill Gregg, Cecil Dougherty and Pop Luebke. . . . Lee Miller is doing all right for himself lately. A new pair of safety glasses, a pair of safety shoes; and, of course, he hasn't said anything but we have an idea Herschel Smith will donate at least six pairs of socks to go with those shoes.

Walk Safely

To Avoid That Run-Down Feeling

IS THE ARROW POINTING AT YOU?

Don't be a violator like those shown above. Form a habit of walking in the safety lanes, not only in front of the plant but at every crossing in the city. A few extra steps may save your life.

During the first three months of this year, there was a ratio of four Fort Wayne Works employees who lost time due to off-the-job injuries in relation to one because of injuries while on-the-job.

26-3 News

By Mabel Odel

Bertha Thimlar held the limelight last Friday. It was her last day with the G-E. She has her future backed with a beautiful diamond about the size of an acorn. She treated the girls with cake, a sample of her own culinary art. In turn the girls presented her with a dozen red roses. Best wishes for your future happiness, Bertha. . . . Our deepest sympathy to Ruth Freeland in the death of her mother. . . . Notice! I, your editor, received the following card: Dear Mabel, I saw in the G-E News that you were our editor again. I think you remember me, and was wondering if you would put in the column that: "Jay and Aylene Spiece wishes to thank their many friends for the lovely cards and well-wishes during their illness. We are some better and hope that it won't be too long before we can be back to work again." Jay and Aylene, 1012½ E. Washington Blvd. . . . Whitey Leiberenz would be a perfect playmate—no worry. He keeps everything under control. . . . George Brehm has a group known as the "sweater section." LaDonna Durbin is the outstanding member in pastel pink. . . . Tomorrow is the big moment in Martha Warren's life. She has finally said, "yes," and Monday we will see a blushing bride. . . . The packing section had a potluck and to give it the picnic atmosphere, they all wore slacks. . . . Annabelle Blair was having trouble all day. . . . If you see someone opening doors and yelling, "Yoo Hoo," don't get alarmed. That's just Wade Bowman in what is known as "the old round-up." . . . Hap King, "the mean little kid," ties knots in girls' apron strings. Vera Hoover, as a result, was tied pretty close to her bench most of the day. . . . Garnet Curie, Lorraine VonBehran, Wanda Grimm and Dorothy Whan showed the gang what the Easter parade should have been like. . . . A few things that are hard to believe: A group of girls huddled together with Les Parrish in the center down on his knees. Lawrence Schuster raving about what class she has, what beautiful lines, she really is a honey. And says it's an outboard motor he's talking about. Lorraine VonBehran working in a corner all by herself and claiming that she isn't being punished. Irma Wilkens shutting a window on her hand with the result that it was badly bruised.

Office Offerings

The welcome mat is out for Jim Wellman, Dorothy Andrews and Chris Starke. . . . We don't know how Wendell Harshman rates, but he was the only one that received a gift from Helen Reynolds while she was in Mexico. He is very proud of it and wishes to thank Helen very much. Oh, we forgot to tell you, it was a package of good old Mexican soil. . . . Most people make hay while the sun shines, but Jim Voirol bought a flood light so he could mow his in the cool of the night. . . . Pat Lahr is the envy of all her friends. She has a beautiful leather purse that was also brought back from Mexico. . . . We wonder if Cliff Bowman could furnish everyone with paper weights. When Al Coxson lets loose with one of those man-sized sneezes, they would come in rather handy.

Here and There

IN BUILDING 17-4

By Beth Jacobs

Get well wishes to Maxine Baker. We hope you'll be in the pink when this is read. . . . Anyone having any old magazines or even any new ones that they don't want, please bring them in and give to Walter Lorenz. It seems as though he likes to read magazines belonging to other people while he eats his lunch, and at the present time no one has brought in any recent issues and he had read all available copies at least twice. Maybe we could take up a collection and buy him a year's subscription for some well known magazine! . . . With all the ice fishermen on the floor, someone surely could bring some of their ice fishing clothes for Cy Seymour to wear. With all the balmy spring weather Cy still wears his brown overcoat to work. Maybe the slipping Boston Red Sox is causing his sudden chill? . . . We wonder how many after-dinner cigars Ed Klomp collected after the banquet Thursday night as he was seen contacting all the non-smokers and inquiring whether they planned to attend? . . . Congratulations to Carl Hattendorf who walked off with second place with a 735 in the singles bowling tournament Saturday night. As Mr. Hanson says "It's better than a 500." Know what he means, Roger? . . . Belated birthday greetings to Mary Burkholder. We know some nice things happened to her and we hope nice things will continue happening to her for years to come. . . . Jean Forst went to a motorcycle dance! Well we had never heard of motorcycles dancing, sounds interesting though. . . . Did ja hear about Esther Hakes watching a dancing class through a window instead of where she was walking, stumbled and fell flat on her nose. Well, she did! . . . Ruth Theurer passed candy Friday. Seems she has birthdays too. Hope you have many more happy years, and there weren't any twins involved, were there?

John Gruber Dies

John V. Gruber, 84, died at 3 p.m. Tuesday, April 19, at the Allen County Infirmary. He began working for General Electric in 1912 as a helper and when he retired in 1932 he was a crane operator.

Funeral services were held 2 p.m. Thursday, April 21, at the Chalfant-Perry Funeral Home, Dr. E. R. Garrison officiating. Burial was in Prairie Grove Cemetery.

Ralph Keller thanks all of his co-workers for the beautiful plant which he received from them during his recent illness. It was greatly appreciated and he brought one of the blooms in to work to show everyone just how beautiful it really was. Thanks a million, everyone. . . . Wonder what that noise was? Don't get excited it was just Walt Colchin. The strangest noises have a way of coming out of Walt whenever he gets excited or laughs. . . . Lloyd Garrison was going around last Monday giving away money. When someone asked him what the reason was, he replied that he was giving dividends on the money that was taken up on the weight of the "Busco Beast" about two months ago. Lloyd says now that he has given the money back, they will no doubt catch the thing this week. . . . Jessie Cleveland took her "spring vacation" last Thursday and Friday and helped her mother with the housecleaning. . . . Kenny Brown wouldn't take the hint when someone told him about those '36 Chevies. He just went ahead and bought one and now it is in the garage having some work done on it. After this, Kenny, maybe you will listen to the "voice of experience." . . . Congratulations to Gladys (Mosshammer) Pantazin who celebrated her birthday last Monday. They say she passed out cake for her treat, but we wouldn't know about that. . . . Ruth Cavender was seen passing out candy last Monday. So far we haven't been able to find out just what the occasion was, whether she got married or whether she too was celebrating her birthday. . . . Glenn Miller thinks he has a secret, seems as though he went and bought himself a new Chrysler last week, but has been very quiet about it. We don't know why he doesn't want anyone to know, so we'll just forget that we ever mentioned anything about it and help him keep his secret. . . . We also hear that "Moe" and his '36 Chevie parted company last week. He is now sporting a 1940 Packard. He says this one is much better, but still that lil' old '36 had its good points. or should we say features. Hm-m-m wonder how many he can name. . . . We extend our deepest sympathy to Rose Cuney in her recent bereavement. . . . Marguerite Stahl says she sure is sorry that she missed your picture in the NEWS last week, Oral, but wants to know if you were really trying to make everyone believe that was a real gun. . . . Pictures have the queerest way of disappearing in groups 17x41-70-80 and then all of a sudden reappearing, but upside down.

We are sorry we missed Lois Springer, Wava Augensbaugh and Florence Lea on their birthdays. We wish them many more happy ones. . . . We wish Neva Scott a speedy recovery. She was operated on recently. . . . Charles Trey is leaving us for retirement in about three weeks. . . . We understand Frank Fann hasn't patented his ice cream cocktail yet, but in the future it will be the hit of the week.

The most expensive thing about a home is carelessness.

New Clock-Radio

Claire O'Keefe of the Transmitter Division, Syracuse, is shown here holding a Model 65 white clock-radio receiver which will turn the radio on and off at the owner's will. One of the advantages of this new member of the G-E radio family is that it permits the user to go-to-sleep-with-music without having to worry about turning the set off. The Model 65 is in white plastic and the Model 64 in rose-wood plastic.

Remember to turn your clock up an hour tomorrow night. . . . This last week Div. 16 was awarded a safety performance certificate for 50 per cent improvement over last year's record. Let's even better that and keep that zero at the top of our lost time accident board. "Safety first makes safety last." That was the slogan that won first place in a nationwide contest. . . . Have you done your good neighbor deed today? If you haven't don't wait because you will be rewarded. Virgie Mayer and Mildred Huntine were going to shop for a hat after work. But their trouble was lugging an empty thermos bottle all over town. Good neighbor Mary Wright came forward. She would take the bottles home and return them well filled (one black, one with cream) provided they bring her a new hat. The next morning the bottles were returned full, and Mary was seen wearing a new hat. It will last all summer too. Not only as headgear but doubling as a suit pin. . . . Last Friday we put our "We wish you happiness" mat out for Helen Weigle. She is saying "I do" tomorrow. Friday when she came in, she found a brand new milk pail and milking stool, for her life down on the farm. Farmer Harold Bowker was seen giving her lessons on how you should sit on the stool. Delores Wonderly was also giving hints on the art of milking. Let's all visit her this summer and see if she took her lessons seriously. We will all miss you. We have lost a smiling co-worker and Elex has lost a fine contact girl. . . . Delores Wonderly is replacing Helen as our contact girl. . . . Joan Kemery has troubles. She decided to bake a cake and couldn't find her flour sifter. Her husband was using it to sift feed for the calves. Joan is buying a new sifter and hiding it, but good! . . . Marcille Thomas, Louella Koogle and Jerry Snyder helped Leona Hollis celebrate her 16th (?) birthday last Wednesday. No wonder they were all 20 minutes late to work. Anyway, happy birthday, Leona. . . . Is Al Johnson from "Busco"? He's been selling turtles. . . . When Rose Dowling laughs, she just laughs all over. She even loses her voice. The reason, egg mash. . . . Hedy Harrison just loves Al Jolson (far away). . . . Betty Pressler was really having a time eating an ice cream cone. . . . We hope that by the time this goes to press Iley Souder, Esther Fox and Rachel Jackson are off the sick list. Emma Bennett Snyder has taken a sick leave. . . . If you hear Jess Hahn uttering the words, "a little bird told me," you will know where it came from. Two little birds made their appearance on a new perch Jess had made. However, Jess prefers martins. These birds are more valuable. They sleep days, and only see what goes on at night. Jess, you've got the bird. . . . Edith Paxson can be seen strolling down the street with her new shopping cart. Bright red wheels and even rubber tires. . . . Our sincerest sympathy to Ross Domer in the death of his mother.

Once they've tied the marriage knot a lot of fellows find they don't have much rope left.

We would like to compliment all members of our division who participated in the minstrel show last Wednesday. We enjoyed it thoroughly. Ray O'Keefe had all the men swooning when they saw those legs and ankles. Frank Fleischer, Frank Chayka and Max Barrows have been receiving telephone calls all week. And many people are still wondering how Bob Loveland could possibly smoke that oversized cigar in one evening. We would also like to mention the "one man act", in the second row, right hand side of the chorus, sort of added a "three ring circus effect." . . . Now Harry, we don't want you to get all puffed up about that article in last week's WORKS NEWS, stating that Margaret Taylor started working for Bill Pringle and Harry Balz. It was only a typographical error, it should have read "Margaret is working for Bill Pringle and Ted Ross." Besides we thought we had better clarify this for your wife's sake. She might think you were holding out on her all this time. . . . We wish a happy belated birthday to Don Spalding (last Monday) and a happy birthday to Phyl Hines (Wednesday), Mabel Waggoner (Thursday) and Shorty Poyser (Saturday). . . . We missed Tom Doell all last week, and we were glad to have him back with us Monday. The "flu bug" has also bit Owen Vaught, and we hope that he will be back soon. . . . C. F. Voss has a new wooden nameplate on his desk, thanks to Earl Stauffer. Take a look at Claude's desk the next time you go into the DC Div. The Development Div. welcomes two new "A" course test engineers, John Oldenkamp and Bob Winchester. Both were formerly in Motor Generator, and John is the present editor of the "News Letter." . . . Glenn Willits, AC Div. passed candy and cigars one day last week. He is the proud father of a new baby girl, Jo Anne. . . . We are glad to see Arlene Dellinger back after a six week's absence due to an appendectomy. Take it easy, Arlene. . . . We also wish a speedy recovery to Jo Biddle of the Renewal Parts Div. She is at present in the Methodist Hospital, recuperating from an illness. . . . The girls of the FHP Motor Sales Division at Taylor Street and of Bldg. 4-6 honored Beth Young, now at Taylor Street and Dorothy Broucek, Renewal Parts Sales Div., with a dinner last Thursday, April 21, at Johnnie's Steak House on the Decatur Road. Beth was married April 10, to Russell Young, and Dorothy is leaving to become a full time housewife. Both of the girls were presented with lovely gifts. . . . It seems and looks as if Betty French has a bad case of spring fever, you look for her and as the song goes, "Oops, nobody there." Confidentially, we think it's "lake fever."

It's Windy Here

FHP Motor Division 17 Office

By Joan Aubrey

Have you ever seen anyone walking on air? If not you should have seen Gene Foster the last few days since four weeks old Michael Anthony has come to live at the Foster house. If there was ever a proud father, Gene is really it. . . . Gene is not the only one with a baby. Peg Turschman has a family of five kittens at her house. What with Peg's dog and a family of kittens, she really has her hands full. . . . We understand Perry O'Neill has been getting up at 3 a.m. the last few mornings to get in condition for his floor walking job coming up in the near future. That's a good idea, Perry, nothing like keeping in shape. . . . Just as soon as Charlie Gable gets his house painting done he is going to get back in production with his ceramics, and then I am sure we will get those sample ash trays for our desks. (Won't we, Charlie?) . . . If Joan Liebig goes horseback riding again next Sunday (which I heard she might) I wonder if she will be able to make it in Monday morning? If Jack Angel gives her that fast ride through the park that he has promised, I don't think we need look for her.

Borrow a boy for a ballgame.

Volunteer at the G-E Club to assist in the special section for youngsters at the Voltmen games.

Manners are described as "a difficult symphony in B natural."

OUT OUR WAY

By J. R. WILLIAMS

Medical Memos

By Mary Heymann

I Wonder Why: We had a green Christmas and a white Easter . . . People are so listless and draggy coming to work and at quitting time are so full of energy . . . Someone doesn't clean the dirty floor in the partnership entrance used by the Employees' Store and the Dispensary . . . It never fails to rain when a car is washed and shiny or you have a clean cap. . . . Did you ever happen to notice the proud auntie expression on Veda Orff's face the other day? Her little niece and nephew, Ann and David Ehinger, had their pictures in the evening paper. They had been participating in the Easter egg hunt. . . . Mamie Allen entertained Olive Walters recently with a dinner party in honor of her birthday. Miss Walters received many cards and gifts and also a beautiful cake. The cake was baked and decorated by Mabel Wilson. . . . At the close of bowling season, a luncheon party was held at the Golden Sun Guest House. Those attending were Eileen Foor, Bea Lantz, Mary Jane Redding, Barbara Wilson, Benneta Welhaum and Mary Heymann. Plans are under way to dig up a few divots this summer. . . . We think Bertha Schrader may be heading the list in already having had spring mushrooms gathered from her own back yard.

First Aid

We envy gals whose poise suffices
To make them shine in every crisis.
Those who, confronted by a wound
Have never beat the air and swooned,
But calmly bound up legs and throats
With strips torn from their petticoats.
Alas, we have no fortitude,
Disaster makes us come unglued.
And though we dearly love our chums
In times of stress we are largely thumbs,
Besides—and this would sorely try us
Our petticoats are on the bias.

We are glad to welcome John Craig back to work following an operation. He's looking fine and up to normal, able to fill the Santa Claus suit again. . . . Earl Johnson is ill at his home near Corunna, and Nona White has returned to her home following an operation. . . . Our sympathy to Willis Mertens whose mother died last week. . . . Notice to Floyd Loraine and Ivan Jones: It's still the policy of the G-E for men employees to work until 3:30. After ringing out at 3:25, imagine their surprise to see the rest of the boys still busy on the job. . . . The boys have a new name for Paul Kennerk, it's Newsy-Nosey Kennerk. Don't you care, Paul, your reporter is always glad for news. . . . Charlie Reed spent a couple of days at home last week; could be he was keeping the goats away from his apple trees. Anyway he says he and the neighbor have come to an agreement and he's going to get rid of the goats. . . . Mardell Mannix is leaving us today to become a full time housewife. Along with a gift from her coworkers go our best wishes. . . . Mary Stewart spent the week-end visiting in Chicago, and Erna Mann participated in the women's bowling meet in Columbus. . . . Farmer Wilmer Lavine says the busy season is here now. The spray is ready and waiting in his barnyard so that as soon as the blossoms fall he can get busy on the fruit trees. Hope the job will be a success, we'd enjoy some nice juicy apples next fall.

GENERAL ELECTRIC NEWS SUPPLEMENT

Candid Camera

VOLUME 14 APRIL 29, 1949 No. 4

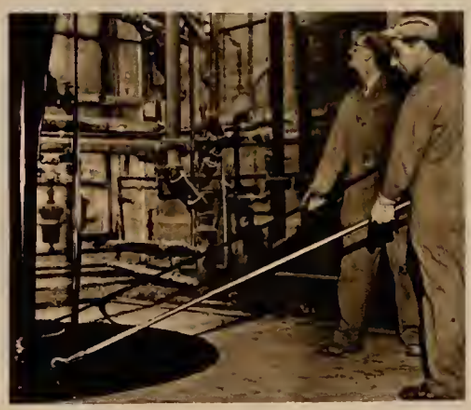
A Double Take . . . is not surprising with two such lovelies for the camera (and cameraman). At left, preparing for dress rehearsal of the G.E.E.A. Variety Show at Pittsfield Chemical Department April 21-22, are Mary Lou Sisson and Bess Galt. Above is an all-star line-up left to right: Kurt Frisch, Mary Lou Sisson, Jack Galt, Bess Galt, Nat Valenti, Mary DiMashe, Ed Butler, Dorothy Shephard, Al Raney, Dolores Dondi, Jim Hogan, Olga Varono.

"Let 'Er Go"... say Waverly A. "Pappy" Reeves, left, and A. J. Philpott to Captain Scott Fowler as they prepare to take off in the Pan Air clipper "America," which is using a G-E turbo-supercharger for the first time commercially. Mr. Reeves, who retired from the Gas Turbine Division, Lynn, in 1947, has been a pioneer in the turbo-superchorger development. Mr. Philpott is the world's oldest aviotion editor.

100th Birthday . . . will be celebrated next January by Benjamin A. Foss, former River Works employee, and now the oldest living G.E. pensioner. Mr. Foss started with the old Thomson-Houston Company in 1888, and retired from G.E. in 1927. He keeps up-to-date on the News.

$1300 For An Idea . . . is a suggestion award that makes C. F. Lenhart the holder of the largest single suggestion payment ever earned at the Switchgeor Divisions, Philadelphio. Here he is being congratuloted on the excellence of the idea which brought the award by the manager of the Switchgear Division, R. F. Tinnerholm. Looking on at left are: A. C. Boisseau, Managing Engineer; E. V. McKernan, supervisor, and G. F. Tucker, superintendent.

Chemical Department Employees Make New Product



At Taunton, Frank Ferreira molds a transparent drinking cup dispenser. This is one of the many attractive and practical items made for home and business use by the Chemical Department.

Highly skilled moldmaker, Robert F. Martin, in the tool-room at Pittsfield finishes the mold cavity in this block of solid steel. Phenolic compound subjected to heat and pressure in this mold becomes a plastics case for a table-model radio.

Veteran varnish-maker John Creszynski joined the Company in 1902. Progressing through various jobs at Schenectady, he has watched the rise of General Electric to prominence in the chemical industry during nearly half-a-century.

At the Pittsfield phenolic resin plant Bart Hanafin and Jerry Ryan spread a fresh batch of the molten resin as it pours from a mixing kettle. When cooled this black material will be ground into powder for molding into plastics articles.

Donald Uhll, in the Decatur plant, adjusts an extrusion machine which, running 24 hours a day, emits a continuous ribbon of white plastics strip used in finishing refrigerator cabinets.

The newest case for kitchen clocks, with the numerals molded around the rim, is finished by Agnes Miller in the molding section at Taunton.

The Chemical Department's newest wonder-materials, the silicones, are produced in an ultra-modern factory at Waterford. Here, in a dramatic camera shot, Joseph Burroughs reads the gauge on a chlorosilane distillation column.

G-E Glyptal alkyd resin, the basic ingredient for many appliance paints is manufactured at Anaheim, Calif., and Schenectady. Operators E. W. Maher and J. W. Balch keep in touch with other men in the chemical plant at Anaheim through the use of this intercommunication set.

for Modern Living

THE men and wamen af the Chemicol Deportment produce not anly basic chemicals for industry but olsa a variety af beautiful and practicol articles for madern living. Plastics radia cabinets and taoster bases; decorative plastics kitchen table taps and durable enamels; magnesium oxide far heating elements in electric ranges and the taugh insulotian hidden within motars in major hausehald appliances ore anly a few af their products.

General Electric began ta make its awn plastics over a half century aga. Naw as one af the warld's largest praducers af finished plastics, the Chemical Department not anly supplies laminated plastics and molded plastics components far products of the variaus divisions af aur campany, but also supplies lorge quantities of these materials ta ather manufacturers.

On these pages typicol Chemical Department emplayees are shawn at their jobs in the voriaus plants lacated across the cauntry fram Massachusetts ta California.

Miniature appliances molded to scale in white plastics at Taunton enable Betty Bowen of the Bridgeport Home Bureau to plan any kitchen arrangement in exact detail as she desires it.

A large freezer tray is produced every few minutes in this molding machine tended by Mary Beckham at the Decatur plastics plant in Illinois.

Lloyd Kutcher and Raymond Weaver check a die in the tool-room at Coschocton. They are the two longest-service employees on the hourly payroll here, having been hired on the same day, when this Ohio plant was first started.

Carefully, Frank Kordana lifts a gleaming white radio cabinet from his press in the large Pittsfield plastics plant. Work areas and machines are kept clean to avoid marring the beauty of this light colored plastics while it is processed.

Candid Camera

Ready for Shipment . . . by truck is this group of Switchgear Division's employees. During the recent Philadelphia transit emergency, G.E. provided truck tronsportation for hundreds of employees, both to and from the plant, and this scene was duplicated on many street corners.

"The Village Smithy" . . . was a modern artist compared with Thomas Doig, Schenectady, shown above with the beautiful and intricate coffee table which he made in his home blacksmith shop. Mr. Doig uses the same kind of equipment that was used centuries ago by old-world blacksmiths . . . a tiny forge, tongs, onvil and hammer. He makes many different items.

The Champ . . . in its field is this 388,000-pound stator, the heaviest single piece of electric equipment ever shipped from the Schenectady Works. Two 100-ton cranes were required to hoist the device and set it on the flat car. This stator was built as part of a steam turbine-generator.

Modern Trends . . . at Electronics Park, Syracuse, include the three secretaries and three television receivers pictured above. From left to right the secretaries are: Marjorie Engel, Urchil Wales and Jean Gartland, all of the G.E. Receiver Division. In the same order the television receivers are: Model 807 with 10-inch "daylight" picture tube, Model 805 with 10-inch conventional tube, and Model 806 with 10-inch "daylight" tube, all in the lowest price range.

Waltzing Range . . . was a traffic stopper at the Furniture Mart in Chicago. Don Youngson, left, and Foster Burch, Bridgeport, are shown here with their "baby." The G-E Range dances to waltz music, opens its doors and turns its lights on and off — all without aid from human hands.

Atlantic City Bound . . . Bowlers about ready to board one of three buses chartered to take 12 Philadelphia Switchgear teams to the A.B.C. Tournament. The happy looking fellow with hat in hand at extreme left is Frank Rathgeb, President of the Bowling Association and at extreme right is Bill Moore, Secretary.

Karl Soest was very unhappy about the mistake I made in last week's column. His lodge meeting nights are Tuesday and Thursday, not Wednesday. He says his wife won't let him out on Wednesday nights after reading last week's column. My apologies, Karl. . . . We welcome back to the Bldg. 8-1 grinding room Chester Gillam and bid a sad adieu to Harry Golden. Harry is now over in Bldg. 27 tool crib. . . Amos Trowbridge is leaving Bldg 6-1 today, much to our regret. We understand, though, that he and Mrs. Trowbridge are leaving for a vacation to the Southland in a few days. Happy traveling, folks. . . . Tom Dent is convalescing at his home on Webster St. and we hope it won't be long before he's back with us. . . . A familiar face belonging to Mary Lou Somers made its appearance in Bldg. 8-1 last week. Mary Lou, as you all remember, formerly worked with some of our gang over in Bldg. 20-2. . . . If anyone is wondering why the buttons were popping off Charles Florent's shirt last week—well, here's why. He became the father of a nice big baby girl. Mrs. Florent will be remembered as the former Ellie Dietze who used to work in the Tool Supply section. Congratulations to both of you from all the gang. . . . Birthday greetings this month go to Ralph Fry, Kenneth Redding, Cecil Strong, Fred Bishop, Vaughn Tomlinson and, last but not least, Orval Koble. . . . Frank Parker sure shows signs of spring fever these nice days. He dreams of those shady nooks along Cedar Creek and those "beauties" on the end of his line. . . . From all reports from the fellows in the grinding room, Cecil Strong hasn't mastered the art of cigar smoking. Charley Florent gave Cece a cigar last Monday morning. After he had finished smoking it Fred Divelbiss and Al McCullough stood by with the stretcher expecting Cecil to pass out any minute, but at the end of the day he was still on his feet. We wonder what would have happened had he been smoking one of those two for a nickel cigars instead of one of those three for 50 cents ones Charley passed out. . . . Charley Strong (receiving section's genial truck driver) is on vacation this week and things just aren't the same. Ah, what a ladies man he is—on the delivery route he always aims to please the girls. That's OK, Charley, we should have more men like you and the G-E would be a more pleasant place to work.

Borrow a boy for a ballgame.

Volunteer at the G-E Club to assist in the special section for youngsters at the Voltmen games.

Magazines Mailed From Works Library

You may have any of the following magazines mailed to you regularly by merely filling in the blank below, encircling the magazines you wish, and mailing this notice to the Works Library, Bldg. 8-2. Each issue of the magazines of your choice will then be mailed to you, and you may keep them in your possession for a period of five (5) days before returning to the Library. For further information call extension 2203.

DIVISION 95

By Walter E. Pohler

We extend our sincere sympathy to Clarence Dick, whose brother's body was returned from Europe for burial. . . . Our farmer friend from Dunfee, Noel (big wheel) Smith, occasionally brings eggs to his co-workers. The other day Noel brought a dozen eggs to one of the winders. On the way in the eggs fell off the car seat, breaking one and smearing the remaining eggs. Noel proceeded to clean the eggs and in the process broke another. However, the purchaser was charged for a full dozen. In explanation of this charge Noel stated that he was only acting as a carrier in bringing in eggs and as such was not responsible for accidents to the eggs while they were in transit. Confidentially, we believe he didn't dare go home without the full amount of money that a dozen eggs would bring. . . . Our congratulations to Walt Mertz on the fine bowling he did in the G-E Tournament. Walt and his partner, Frank Matthews, captured second place in the doubles and Walt placed fifth in All-Events. . . . Anyone desiring a recipe for coffee which is guaranteed to be free of caffeine should see Devona Clayton. We have been told that one must put coffee in the pot in making coffee. . . . Attention, all fishermen who desire information about the one best way to get a worm on a hook. Velma Meads has a new method for performing this operation which she will be glad to demonstrate. This method involves putting your foot on one end of the worm and then hoping that the worm will wiggle in the direction of the hook. . . . The attention of all our readers is invited to an article by Capt. Eddie Rickenbacker in the May issue of Coronet Magazine entitled "I believe in Prayer." We believe that the suggestions contained in this article would go a long way toward solving the problems of our day if they were followed by each and everyone of us.

ECHOES FROM 19-2 & 19-3

By Gladys McMillan and Ed Dickty

It is said that Russ Neireiter has evolved a novel way of keeping himself in new shoes. It's a kind of rotating method, and occasionally an honest dollar can be picked up in the exchange. For details, see Russell. . . . Whenever Bill Irmscher horns in on an engineer's post-mortem over a commutator. He is at a considerable disadvantage because of his shortness. We suggest that he always have a box handy to stand on, thus putting himself on equality with the rest. . . . Frank Elder visited the boys last Tuesday, the first since he was off for a surgical operation several weeks ago. He looks fine. . . . The old arguments about the best lakes and ways to fish are coming up again. . . . Clarence Nichter, as usual, is speaking with the voice of authority. . . . We are sorry to report that Frankie Enderle does not seem to be in the best of health. Being solicitous of his well being, we advise getting to bed early occasionally; also, less dates and strawberry pop.

Advice usually can be had for nothing—just about what it's worth.

Mildred Ellis Is Editor Of 'Apprentice Broadcast'

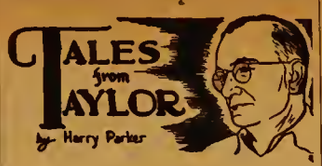
Mildred Ellis

Mildred Ellis, Bldg. 12-2, has been named editor of "The Apprentice Broadcast" column for the WORKS NEWS. A member of the G-E family since 1946, Mildred first worked in the Plastics division as a stenographer. When the division was transferred to the Decatur, Ill., plant, she became Walter Wolf's secretary in the Apprentice School.

For outside interests, Mildred likes bowling and reading. She has two reporters, Joe Rowan and Donald Miller, who let her know the happenings of apprentice draftsmen in the various sections throughout the works.

Apprentice BROADCAST

By Mildred Ellis



The apprentices with families had to work overtime Saturday by coloring Easter eggs. Butcher had double overtime; first by making the kids some eggs, and second by keeping them from eating too many. . . . Now that spring is here and the windows are open, working in the bench section proves most interesting. . . . The boys in M and G are really raising a cloud. They broke out in an epidemic of pipes of all kinds—moochers special, first grade size, guest size and box of matches size. About next week those exhaust ventilators will need a thorough de-sludging. . . . Scenes at the Joslyn Steel Mill Tour: Wilbur Jones pushing a wheelbarrow, "Just helping out," he says. The pipe smokers trying to out smoke the steel furnaces. Birkenbeul warming his back against a furnace. Miller looking for scrap. Davis and Kirlin looking for sail boat parts (as always). Mr. Wolf watching the boys enjoy themselves and Dick Gebert displaying his new shiny body (meaning his "chevy.") . . . Anyone who wants to know about the new drafting classes see Whitie Fremion. He seems to be able to get official news before it becomes official. . . . Dick Wagner has caught some of Paul Misbo's enthusiasm for drive-in theaters. . . . The draftsmen bowling team gave a good account of themselves with all five men bowling over their average but not quite lucky enough to get in the money. Warren Berkheiser had the high single game of the team with a 197 count. Maybe next year, men. . . . At long last, our old fashioned phone died, and we are the proud possessor of a new French-type phone. . . . We are sorry that Dick Gotschall is on the sick list again, this time with an infection in his foot. We hope Dick will be back with us soon. . . . Harry Meads didn't have the difficulties of some of the married men (who rated new shoe strings for Easter) he came to work Thursday all decked out in a suit and tie. . . . Myron Auer's friend (?) in Bldg. 19-5 gave him a sandwich to tide him over 'till lunch time. It's the first and last time Auer will ever eat a sauerkraut sandwich for it sure had lasting (sound) effects. . . . Dick Reinking had better start looking where he is going or go where he looks. It seems someone got in his way while he was skating backwards and caused him to come to an abrupt and painful halt. Dick was absent Friday! . . . Frank Woenker reports that his ball team is to be called the Apprentice Majors. Birkenbeul is strengthening the outfield this year and Dick Wagner will be holding down the first sack and Kenny Zurbuck, pitcher, looked his old form in an inner squad game. The team hopes to get five practice games in before the opening of the season. . . . The reason it takes Don Miller so long to get to the phone—he always has his shoes off. I guess he doesn't have any sympathy for his fellow workers.

Nothing can be done in a day if the day is always tomorrow.

Sports Featured At Family Night

Hunting and fishing were featured at the Family Night Thursday, April 21, in the G-E Club auditorium. The event was sponsored by the G-E Rod and Gun Club and G-E Squares. Sports equipment was displayed by the Main Auto Supply Company, Sears-Roebuck and Sappenfield, and photographic equipment by Howard's and Sunny Schick. There were also fishing and hunting movies; bait casting and archery demonstrations.

Lawrence Myers finally got rid of his old car and has purchased another one. It is a used car, but nevertheless it is new to him. The other morning he was so anxious to drive it to work, he left the house attired in his bathrobe. He presented quite a sight walking across the lawn attired as he was and carrying his lunch kit. His wife had to call and remind him of the fact that he was not properly dressed for work. . . . Mable Miller has finally moved into her new wigwam on Baker St. The last load left her former residence at 1:45 p.m. Saturday, with the exception of a lot of plants that were in the house. When asked how she intended moving them, she told us that she was going to move them in her chariot now that the horses had arrived. The last we saw of her, she was headed north on Fairfield Ave. at a high rate of speed, with her tresses flying and trailing greenery. Actually it looked like something out of the dim and forgotten past. . . . All season Carl Schoenherr has been unable to beat Popeye Patterson at bowling. He gave us the excuse that his arm had been in poor condition all winter, but the truth of the matter is that he has been using a ball that his grandfather used in the days following the close of the Civil War. This ball, made of wood, is so flat on one side that instead of rolling down the alley it just slides along. . . . Mildred Bladsoe and her husband have acquired a puppy. The first night at home it raised such a fuss that she didn't know what to do about it. So she put the pup in bed with them. Even this didn't have a soothing effect. It still continued to raise a rumpus. Thinking that it might have colic; she searched the house for some paregoric, but wasn't able to find any. As a last resort she got the hot water bottle and placed it on the puppy's tummy, put a baby's pacifier in its mouth and pinned a blanket around it. This did the trick, for the pup went sound asleep. . . . Marion Oman, in discussing the high cost of haircuts, tells us that in Scotland a haircut costs only one shilling. We wish to remind him that this is not Scotland, and who would want to go there just for a haircut? He tells us that from now on, instead of getting a crew-cut, he is going to have his dome shaved. . . . One afternoon this past week, Edwin Moodie prepared himself for a trip downtown. He had proceeded more than half way when he discovered much to his displeasure that his trousers were reversed. He then found it necessary to return home and put them on properly.

We understand Vern Dassler was so disturbed a week ago Friday, to think he had forgotten a meeting he was to attend. When he finally arrived he didn't throw in his hat, but a chair. Leave it to Vern to make an "entrance." . . . "Tootsie" Irwin received a present the other day. We hear it was a pair of binoculars. "Better to see you with, my dears." . . . Dorothy White has been reading a book on psychology and when Lowell Arnold saw it he was really bewildered. . . . Hank Epple is about to reform Vern Amstutz. If there is any doubt about it just ask Hank. . . . Our "Tyro" of Whitley County, Mike O'Grady, is in dire need of advice. It seems Mike has a cow that is being very difficult. She has not only slapped him in the face with her tail but put her foot in the bucket of milk, skinned his leg, and practically knocked Mike through the barn. . . . Mr. "Popeye" Campbell was again in rare form last Thursday night. We hear he broke a bowling pin and realized later he was using the wrong bowling ball. . . . "Putt" Putman gave the boys something to talk about. A right-handed bowler, he made the 5-6-10 split by hitting the six pin on its right side causing it to fall over on the five pin. The amazing factor is he shot left-handed to make the split. . . . We wonder by now just how much Cleon Oyer owes the fellows on his bowling bets. . . . We finally found out why Noel Young is so happy again. Rachel presented him with a fine pair of kids. Who's Rachel? Why the pet goats? . . . Walt Niemeyer has a new way of testing fields. . . . Was Maxine Daniel's face red when a certain person asked her just what she was doing out on a country road. Won't these back seat drivers ever learn? . . . Willy Rathert was so proud of her record this last week that it was a shame a flat tire had to spoil it. . . . Tomorrow Helen Horstmeyer will say "I do." We hope you'll be very happy, Helen.

Most of us have that so-called "spring fever," but this is not so with Art Luessenhop who admitted that he is still in the same old rut. Could be that you need a tonic, Art. . . . We understand that Elsie Miller and her husband, Melvin, really cut a mean rug when they attend those Saturday nigbt square dances. . . . LOST. A chair about so-o-o high. Tracey Bartle has looked everywhere for it—but no results. . . . Joye Boyd thought that she would enjoy horseback riding, but after the first attempt has decided that it is a much too strenuous sport. . . . Those gals, Joan Tudor, Arlene Helberg, and Ginny Free and their husbands, are burning the midnight oil lately playing cards. From what we hear the gals really are doing all right as they beat the fellows most of the time. . . . Dave Chambers, our test engineer in the test and inspection office, really greeted Spring in fine fashion this past week. Your yellow jacket and green tie really brightened the surroundings, Dave. . . . Welcome to Virginia Emrick who has joined the gang around die cast. . . . Emma Vaughn and Ethel Koontz bowled in New Haven last Saturday in the tournament, but the gals just won't tell us how they made out. Were the scores that bad, girls? . . . We hear that Roy Orr was really lamenting the blues last Monday about the nice spring shower we all enjoyed on Saturday. It seems that he had just gotten bis car all nicely washed, and the rains came. After they had gone, he had the whole thing to do over. We sympathize with you, Roy, as we had the same trouble. . . . Al Bobay is really getting up in the world. It seems that he went to Peru over the week-end and had a police escort on the way back home. . . . Ruby Stucky is again leaving us. We hate to see you go, Ruby, but hope that you enjoy yourself while you are off. . . . We also hated very much to lose Arveda Neal again, we'll really miss you too, Arveda. . . . We had several out-of-towners again this past week-end and among them were Maggie Moore, who went to Lavina Lake; Tommy Williams, who went to Lima, O., and says that despite all of her troubles, she really had a swell time; Evelyn Lietzke who went to Columbus and Springfield, O., Arwood DeLuery, who went to Indianapolis, and Rose Liby who says she just went fishing, but the same old story—No fish. . . . We also welcome Warren Jackson to our division, and to tell you that we hope you will like it here with us, Warren.

A lot of self-made men keep quiet about it on account of the bad job they did.

Borrow a boy for a ballgame. Volunteer at the G-E Club to assist in the special section for youngsters at the Voltmen games.

Only one ad per employee may be inserted. Each ad must be limited to 10 words and cannot be repeated. All articles mentioned must be personal property of the employee. Ad will not be accepted unless accompanied by the name, pay number, and division of the employee. No works building or telephone number may appear in ad, only the home telephone number or address.

No ad will be received over the telephone. Send all ads to WORKS NEWS office, Bldg. 8-2.

"Lost" and "Found" articles must be cleared through the Plant Protection office, Bldg. 10-2, or the Plant receptionist, who will place the Ad-let and otherwise advertise the article.

CLOSINC DATE FOR NEXT ISSUE
Monday, May 2, 1949

LOST AND FOUND

LOST—One silver earring.

LOST—Lindsley gold wrist watch with gold chain strap. Lost between Bldg. 26-3 and College St. gate.

FOUND—Pair shell rimmed glasses in black leather case. Found in Bldg. 4-B about two months ago.

FOUND—Tan coat belt.

FOUND — Earring gold colored, with white cameo on red background. Found on Wall St. between Bldgs. 26 and 27.

FOUND—Fountain pen, grey with red and white flecks.

FOR SALE

CHILD'S SIDEWALK BIKE—$7, or will trade for small tricycle. H-81107.

OAK SECRETARY — Library table; straight chair. All excellent condition. H-69644.

1937 CHRYSLER—Royal coupe, radio, heater. $135. H-66704.

1935 PLYMOUTH — Deluxe two-door, $135. A-55921.

1935 CHEVROLET—Master, four door, fair condition. $125. A-69575 or A-40602.

ARCHLOCK SHOES—Sizes 6½B and 5½C; Record Player; radio; books. A-60045.

SPRINGERS—Dressed or alive. A-98109.

TWO GIRLS' BICYCLES—20" sidewalk size, reasonable, need some repair. H-28824.

HOOVER SWEEPER—And attachments, used. 1014 W. Packard Ave.

TWO MEN'S SPRING SUITS—In good condition, size 36, $5 each. H-91202.

STORKLINE BUGGY — Teeter Babe, Taylor Tot, Baby Scale. A-49103.

8x10 BROODER HOUSE—Covered with heavy brick siding; brooder hood for 125 chicks, electric. H-77165 after 4 p.m.

FOUR TWO-PANEL DOORS — 29x78, hardware; lavatory. H-9783.

SHOES—Dr. Locke, 7½AAA; strap slippers, 7½AAAA, H-58323.

WANTED

CHINA CABINET — A-56663 Monday evening.

HIGH CHAIR—Maple stain finish—A-97696.

GIRL SCOUT UNIFORM—Size 14 or 16. H-64921.

FOR RENT

NEWLY FURNISHED LARGE BEDROOM—Near bus; innerspring; privileges; 1 or 2 girls. 116 E. Lexington Ct. after 6 p.m.

One last reminder to tell you not to forget to set your clocks ahead tomorrow night as the community goes on daylight saving time. . . . We're more than glad to welcome that Smith, named Ray, back, after a week's absence. Welcome back, "Mr. President." . . . Warning:—Anyone who happens to be on the steps at the south end of Bldg. 4 between 6:55 and 7 a.m. is in great danger. When Alvine Doehrman starts up the steps she really goes like a jet propelled rocket! In fact, sometimes she goes so fast it takes her four more flights to get stopped. Last Monday was such a day, when she finally got stopped she was in Bldg. 4-5. Just what type vitamin pills do you take, Alvine? Or is it that New Haven air? . . . We understand Perry Jeffries, as much as he loves fishing, proved to Nena Foster that he hasn't spent all his time fishing! . . . Edith Venrick's boy friend was dumbfounded when she started to "melt." They were having a fast game of pinochle! . . . The entire section joins in wishing God's speed for the recovery of Bill Putt who has been ill these past two weeks. Hurry and recover, Bill, we all miss you. . . . We were glad to see Helene Evanoff of Bldg. 17-1 office and "P's and Q's from 17-1," fame acquiring some important data on our floor last week. Come back again and visit us, Helene. . . . We were all sorry to learn of the serious injury that befell Harold Mettler over the week-end when he got his hand caught in his power lawn mower. We all wish you the best of luck, Harold. . . . We all extend our best wishes to Walt Sollberger on the marriage of his daughter, Rosalind, last Saturday. The very best of wishes to the newlyweds, Walt. . . . We extend happy birthday wishes to Margaret McCaffery and Gladys Stahly. Many more happy returns of the day. . . . Our parting thought: One man with courage is a majority.

"Dollars go farther when accompanied by sense."

The "Hotshots," the Bldg. 17-2 bowling champions, would like to offer the large trophy to Vern Castle for an additional dime on the hour. . . . Gene Dahman has given up the idea of raising chickens. It is just too much work, says Gene. . . . Don Shroyer drove his brother-in-law to Chicago where he will re-enter the Veterans Hospital for treatment. . . . Mary Beaman spent Tuesday and Wednesday of this week in Indianapolis attending the Grand Chapter Order of Eastern Star. . . . Charlie Thomson has purchased a house in Huntington and hopes to be moved this week. . . . Al Knight was struck by an automobile on Broadway last Monday. He received several cuts and bruises but hopes to return to work this week. . . . Charlie "Admiral" Laymon has been using some of his knowledge of art around the tool room. He made a very good poster for Joe Haas. . . . John Johnson lost his temper the other day. This is very unusual for Johnny. After putting in 39 hours and 50 minutes of a week without a mishap he had to cut his thumb. . . . Ed Bienz wasn't quite as lucky in betting on the bowling tournament held at the G-E Club as he was last year. He lost all side bets made. . . . In case you have more coffee for lunch than you want ask Oberholtzer what to do about it. . . . Ruben "Rabbit" Riker can pull a carrot out of any of his pockets any day of the week. . . . What is black and white and "red" all over? A newspaper; all but George Miller's. Someone located his and tore it in shreds before he had a chance to read it. . . . Paul Koldewey has made his contribution to better streets. . . . He parked three hours in an hour zone. He was shopping with the wife, the usual alibi. . . . Jim Kavanaugh is happy. His car is running again.

Once upon a time three fellows went fishing, Louie Watt, Buck Adams, and Bob Repine. They fished until Bob caught a bass and then decided to rest, so to shore they rowed, and picked a nice sunny place to rest; except Bob who decided he would cast from shore. The warm sun soon lulled Louie and Buck to slumberland while Bob continued to cast from shore. When the sleepers awoke Bob was ready to go, having had a bit of luck from shore, so they rowed to the car. As Bob took the stringer of fish out of the water there was quite a bit of surprise registered by the sleepers. We have the usual threat from Louie that he is going to break up his rod, throw away the rest of his tackle and never go fishing again. All of which would probably please Mrs. W. no end since he never catches any fish. . . . Now that Paul Boedeker's team won first place again this half in the G-E League, he is pointing his teammates toward the roll offs, and how he is going to take Marc Junk's team even if Junk does throw that straight hook. . . . What kind of an Indian Dance was Gene Werling doing one morning last week when he was caught "spread eagled" with dinner bucket waving in one hand and apron in the other, coming down Lavina St. has been solved. The explanation is that he just saw his ride pass the corner and was trying to attract attention. . . . Birthday greetings this week go to Fred Boehm, who said he was just 24. Keep that up, Fred, and you will soon be as old as Jack Benny. . . . Bob Repine was somewhat surprised one day last week when he looked up from his work and everyone was gone or eating lunch, Bob was just so interested in his work he didn't notice the time. . . . Ward Staley finally had to wash his car after getting caught in that dust storm last Saturday while visiting in Markle. . . . Jess Batchelder had a bit of trouble getting the right bottom plates and sleeves matched up in the die cast mold last week but is now on the beam again.

Let's Eat! CAFETERIA and RESTAURANT MENUS

MAY 2 THROUGH MAY 6

BROADWAY TAYLOR STREET

Serving Hours:

Cafeteria—16-1 11:00 A.M. - 1:00 P.M. 10:48 A.M. - 12:30 P.M.
16-2 11:00 A.M. - 12:30 P.M.
16-1 6:45 P.M. - 8:12 P.M. 6:55 P.M. - 7:30 P.M.

Restaurant 16-2 12:00 M. - 1:00 P.M.

MONDAY, MAY 2

Bean Soup	Beef Noodle Soup
Meat Loaf	Roast Beef and Dressing
Beef Stew	Ham and Limas
Ham Sandwiches	Barbecue Sandwiches
Whole Browned Potatoes	Whipped Potatoes
Creamed Peas	Creamed Tomatoes
Harvard Beets	Buttered Spinach

TUESDAY, MAY 3

Vegetable Soup	Cream of Tomato Soup
City Chicken	Baked Ham
Baked Ham	Chicken and Noodles
Hamburger Sandwiches	Chopped Beef Sandwiches
Escalloped Potatoes	Whipped Potatoes
Buttered Cabbage	Green Beans
Buttered Green Beans	Buttered Cauliflower
	Sweet Potatoes

WEDNESDAY, MAY 4

Chicken Rice Soup	Bean Soup
Fried Liver	Roast Pork
Chicken and Noodles	Corned Beef and Cabbage
Hot Roast Beef Sandwiches	Hot Roast Beef Sandwiches
Mashed Potatoes	Whole Browned Potatoes
Escalloped Corn	Escalloped Corn
Buttered Spinach	Buttered Peas
French Fried Onions	Corn Bread

THURSDAY, MAY 5

Cream of Tomato Soup	Vegetable Soup
Swiss Steak	Swiss Steak
Ham and Limas	Smoked Sausage
Ham Salad Sandwiches	Ham Sandwiches
Mashed Potatoes	Whipped Potatoes
Buttered Celery and Carrots	Buttered Broccoli
Glazed Sweet Potatoes	Harvard Beets

FRIDAY, MAY 6

Old English Beef Broth	Cream of Potato Soup
French Fried Fish	Salmon Patties
Salisbury Steak	Veal Chop Suey
Hot Roast Pork Sandwiches	Hot Roast Pork Sandwiches
Mashed Potatoes	Steamed Potatoes
Buttered Broccoli	Buttered Squash
Buttered Hominy	Buttered Hominy

Wide selection of home-made pies and delicious salads served daily.
Breakfast served at Broadway daily from 6:20 to 7:50 A.M.

Special dinners and parties arranged upon request.

Menus Subject to Change

Inquiring Reporter

IN WHAT CIVIC AND CHURCH ACTIVITIES DO YOU TAKE PART?

KATHRYN ERWIN
Taylor St.

"I am a member of the Cathedral of the Immaculate Conception, the Rosary Sodality, the CCHS Mothers Club and the Catholic Business Women's Club. Each group is individually interesting, charitable and educational. As we read of religious persecution in foreign lands, we in America should zealously guard our religious freedom. Not only should we be members of church and civic groups, but active members."

L. M. O'SHAUGHNESSEY
Taylor St.

"I am an active member of the American Legion Post 420, Knights of Columbus, G-E Vets, and I am also an usher at the St. Rose Church of Monroeville."

CLARA A. COHAGAN
Bldg. 26-4

"I am a teacher of spiritual philosophy, and it is my opinion many material problems would be solved much easier if people could be more spiritual minded and observed the Golden Rule."

HENRY LOWE
Bldg. 17-3

"We should all take some active part in church work and encourage others to do so. Go to church regularly, it will help you. It will also help to make this a better world to live in; for it will help the people to make it a better world, because the world is what the people make it."

ROSCOE D. MARKLEY
Bldg. 19-B

"I am a member of the Roanoke Lions Club, serving on the boy and girl committee; president of the local PTA; chairman of the troop committee, troop 131, Boy Scouts of America; Deacon at Beech Groove Christian Church and a member of the church board."

OUT OF THE BLUE in 26-2 Office

by Delores Patterson

Unmistakable Signs of Spring: To celebrate the advent of spring, Gordon Harvey, Ballast Engineering, had the telephone company replace his conventional, black, drab-looking telephone with a new, glamorous-looking PINK one! In addition to the gay color, Gordon's pride and joy (the telephone) is unique in that the mouthpiece has the fragrant scent of an exotic cologne. Needless to say, Gordon has started a fad which may spread all over the plant. Already the secretaries and engineers of Specialty Trasformer and Ballast Enginecring Divisions are clamoring for a new model. . . . John Oldenkamp is leaving Ballast Engineering and going to Bldg. 4-6. Curtis Cockburm is taking his place. Curtis came from the Works Lab., Bldg. 28-2. . . . We are very happy to welcome back to Bldg. 26-2 T. Wayne Jones, formerly of Bldg. 26-3. He is in charge of the Service Bureau. C. E. Starke has been transferred to Bldg. 26-3. Good luck, Chris. . . . Dick Stoner had his big day Friday. For one thing, it was his last day and also he won $200 on the bowling tournament. Dick is going to have a magic novelty shop at 712 S. Harrison St. Best of luck, Dick, we'll miss you. . . . We welcome R. R. Berghoff to Specialty Transformer and Ballast Engineering Divisions. He came from Pittsfield where he has been for the past six months. . . . A. M. Krakower is back with us after being off ill for quite sometime. . . . Have you heard that you could have had the measles along with your paycheck in Payroll last week? Jocile Stohlmann just recovered from the measles! . . . Bill David and Bob Loecher, production course trainees, will be spending the next few weeks with us. Welcome, fellas! . . . "Where to spend that two weeks vacation with pay?" That's the question confronting Helen Brindle and Delores Patterson. If you have any ideas, please let them know.

Rifle Team Ends Indoor Season

The rifle team of the G-E Rod and Gun Club ended a successful indoor season Tuesday evening by defeating Huntington, 1088-1054. Next Tuesday, May 3, the team will open its outdoor season on the club's range on the Smith Road. Team members are (l. to r., kneeling), Herb Scherer, Lester May, Forrest Reed, Kenneth Hart and Austin Harrison. Standing (l. to r.), Emery McDaniel, Lester Bland, Ernest Allmandinger, Doug Heckman, Amel Beck, Oral Emrick and Dick Pinkham.

G-E REVIEW HAS ARTICLE BY A. H. LEE

"Fractional-Horsepower Gearmotors . . . Their Classification and Application" is the topic of an article in the April issue of the General Electric Review written by A. H. Lee, FHP Motor Sales division.

A gearmotor is the combination of an electric motor and a gear reducer built and assembled to form an integral part, the article explains. For economy, space-saving, reduction of maintenance, and simplified mechanical design, these units are being used advantageously today and new uses are still being found.

The article covers four pages and contains photographs, tables and graphs.

Mr. Lee started with the Company on test July 30, 1928, at Schenectady; two months later he was transferred to the Pittsfield Works. He came to Fort Wayne March 17, 1930, as an engineer in the FHP Motor divisions. He joined the sales division Dec. 28, 1935, and has been specializing in gear motor problems and applications since 1938.

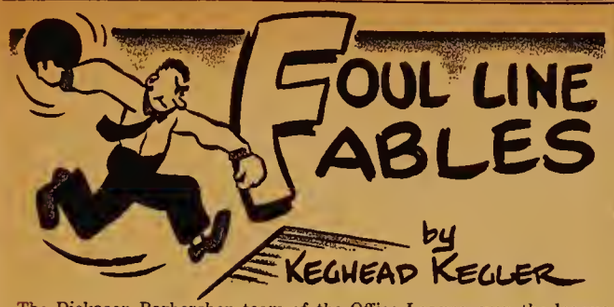
A graduate of the University of Minnesota, Mr. Lee has a Bachelor of Science degree in Electrical Engineering. He is single and lives at 1734 Third St.

Congratulations to Leo Elward on his marriage to Helen Wolfe. The ceremony took place last Saturday morning in St. Paul's Catholic Church. It took you a long time, Leo, but you finally made it (the hard way, that is). A few minutes after the ceremony began, lo and behold Leo fainted and passed out completely. He was given smelling salts and a chair to sit on. It was necessary to open all the windows in order to revive poor Leo. We knew you were shy of the ladies, Leo, but not that shy. Not only that but at this writing which is Monday a.m. all your friends who attended the ceremony are complaining of colds. They say that if you had any intentions of getting married outside you should have told them, so that they could have dressed accordingly. Well now since we know you are going to live, we wish you, Mr. and Mrs. Leo Elward, the best of everything. Always take and be satisfied with what He above sends you and you will never have a disappointment. Happy married life, kids. . . . Steve Bobay's back again with that nag. He bought her a new pair of shoes for Easter, and she is so proud that at times she really gets up enough ambition to chase the flies off of herself. Steve says if she shows that much life with new shoes what will she do with a new pair of choppers, so choppers it is. Maybe that's not a bad investment, Steve, 'cause after all if she does lay down and die you can always have the choppers recast for yourself. . . . Happy Birthday, Earl Rickey, Sr., April 25, and Austin Garman, April 26. . . . Bill Deitz says I'll teach those hogs not to crawl under the fence, so Bill turns on the fence juicer just a wee bit more. Results: one dead sow. That's cutting off your nose to spite your face, Bill, think of all those roast ribs gone to waste. Serves you right, that will teach you to take it easy from now on (we hope).

Insulation News

Agnes Bensman, Bldg. 12-3, sent out an SOS to her co-workers last week. It seems Agnes got an impromptu bath in shellac from the spray gun container. She was shellac from her head down to her toes. We girls want to know if shellac works better than Lux for nylons, Agnes. You ought to know. . . . Anything pertaining to the lost and found department, please report it to Alta Lec. We guarantee she'll find it for you. We sure are grateful that Alta doesn't follow the old rule of "Finders-Keepers." She even returns her found items all wrapped up real pretty like. . . . Did Jim Norris buy a station wagon or a stationary wagon? It was reported in the South Side Times that his new car had to be pushed around the block to get started. . . . Ray Fisher sure must have hated to see that half-century mark roll around. His wife called up to let his co-workers know that it was his birthday. She wanted us to remind him of it. Rest assured, Mrs. Fisher, he sure was reminded. . . . Happy Birthday to Hans Muller on April 24. Hans celebrated by painting his house. . . . Folks we want you to know that Elaine Allen has been responsible for writing the articles which have appeared in the WORKS NEWS for the past several weeks. Elaine has done a swell job and we appreciate it. . . . Josephine Balsama made a one point landing from sitting on the edge of the office chair. Safety committee man, Hans Muller, found in G-E Q-60-A that "no work shall be done underneath a suspended load." So Jo got up from underneath her desk. . . . Elaine Allen must have been traveling. She lost a cigarette case somewhere in Fort Wayne.

Red Peppers Are League Champs



The Red Peppers of the Monday Night Ladies' Bowling League lived up to their name and copped the league's championship. Their season's record was 35 wins and 13 losses for the first half, and 23 victories and 19 defeats for the last half. To insure their claim to the crown, the girls defeated the Pin-Ups Friday, April 22. The girls on the winning team are (l. to r.), Emma Vaughn, captain, Pauline Hartman, Virginia Buesching, Adeline Massbaum and Barbara Vaughn.

"Why don't you look into things before you throw them out!"

COPYRIGHT 1949 CARTOONS OF THE MONTH

The Dickason Barbershop team of the Office League, won the league championship by whipping the Blueprint boys, 3003-2822. Erv Aumann led the way with a 635 on games of 186, 214 and 235. Erv received plenty of help from Carl Hattendorf's 206, Walt Nitz's 214, and Bill Piercy's 223. Dick Gettys shot a 608 in a losing battle on scores of 190, 190, and 228.

In the high-low doubles competition Dick Gettys and Forry Carlson won first place with a 1073. Frankie Schlink and Don Stoneman came in second, 1061; and Hal Fanning and Walt Nitz, third, 1050.

Two hundred scores: Schlink, 230; Don Stoneman, 201; Paul Perry, 212; Clarence Rump, 215 and 205; Vic Rump 244, and Bob Blomker, 229.

Apparatus League

Team No. 5 leads the league by six games. In other words, they have the first half all wrapped up.

Paul Perry led the ten pin assault Thursday evening with a 618 on scores of 199, 194 and 225. Right behind him was Walt Nitz with 199, 201 and 213 for a 613 total.

Other 200 scores: A. Thompson, 200; W. Wright, 213; Oscar Huge, 209; Vic Rump, 201; Paul Billman, 225, and R. Bresler, 219.

Small Motor League

The Tools walked off with the league championship by winning both the first and second half.

Two hundred scores: Lowell Welker, 200; Ty Cook, 226; Ray Lindemnth, 203; Runyon, 204; Stephen, 215; Don "Shorty" Kaiser, 206; Hinton, 243; Walt Mertz, 214; Orv Doherty, 201, and Koehrman, 209.

Interdivision League

Taylor St. won the last half and will meet the Brouwer Tire and Battery team in the league rolloff.

The big news of the week was the high single game of the year by Giese—a big 290 count. He spared the first frame and then proceeded to strike out.

Other 200 scores: Russ Rose, 234; Leo Elward, 224; Bainbridge, 214; Harold Spath, 209 and 201; Andy Anderson, 207; Les Shroyer, 202; Walt Seidel, 201; Frank Iannelly, 200, and Harold Fanning, 200.

Two hundred scores for the previous week were: Lee Crowell, 253; Doyle Miller, 233; Gale Meeks, 231; Paul Walker, 224; Andy Anderson, 216; Frank Iannelly, 215; Noah Kuntz, 215; Frank Kopp, 214; Paul Billman, 214; Art Seidel, 213; Walt Seidel, 212; Erv Haugk, 212; Murray Johnson, 212; Clarence Rump, 210; Milt Marks, 204; Erv France, 202 and 202; Bob Buck, 202, and Russ Rose, 201.

Masonic League

The Ionic team won the second half and will roll the Patrol for the league championship.

Two hundred scores this week were: Ed Crabill, 230; Somerville, 203; Manor, 202; Archer, 223 and 202; Gilchrist, 200; Trevey, 202; Harold "84" Garrett, 226, and Meyer, 212.

Bowling and Stuff

The following are the standings of the various divisions of the bowling tournament:

Eddie Kraft Takes Top Bowling Honors In G-E Tournament

Eddie Kraft won top place in the annual G-E Bowling Tournament that ended Saturday evening, April 23. He won the singles with a 756 and the all-events with a 1937 total.

The Junk-Dimke combination won the doubles event with a total of 1390 pins, while the Hahn Way Cleaners five won the team event with 3315.

Second placers were C. Hattendorf with a 735 in the singles; Mertz-Matthews, in the doubles with a 1379; Worthman Home Builders, 3252 for team standings and V. Rump in the all-events with a 1851.

Audrey Hickernell can tell you all about spring housecleaning. In fact it is so drastic at her house that she has had to move out while her floors have their faces lifted. Ah, sweet spring. . . . Walt Lamboley was really sitting on the hot seat when he sat on a wastepaper basket the other day. Needless to say that he soon stopped sitting and started stamping instead. . . . Calling All Patrol Cars, Calling All Traffic Cops, Clear the Streets, there is a new driver loose on the streets and it's a woman. The above alludes to Dorothy Mills who is starting her driver's lessons. We're only kidding, Dorothy, you will be a swell driver. . . . The Birthday Club held its regular meeting at the Colony House in New Haven. It was a grand party with Marveline Butts as hostess and Eileen Hennen the guest. Election of officers was held and Laurel Weaver is the new president with Ann Lapidot as vice-president, and Florence Knight as secretary-treasurer. Those present were Dorothy Askren, Audrey Hickernell, Florence Knight, Joan Seery, Ann Lapidot, Marilyn Roehm, Laurel Weaver, Evelyeen Bennett, Eileen Hennen, Marvelene Butts and Belle Buchan.

Former Catcher For Generals Joins G-E's Semi-pro Champs

Signing of Serg Schuster, pepper pot catcher, was announced today by John (Red) Braden, manager of the Voltmen.

Schuster will be remembered by local fans for his play with the Fort Wayne Generals last season. He is a good receiver and, at the plate, can hit a long ball. Serg hit seven home runs for the Generals at Dwenger Park last year.

Schuster has played with Uniontown and York in the Inter-state League, Scranton in the Eastern League, and last year with the Generals in the Central League.

Quits Cleveland Indians

With the breakup of the Generals, Schuster was sold to the Cleveland Indians and assigned to Dayton. After spring training, he asked for his release to play with the G-E semipro champs.

In addition to catching, Schuster appeared in several games at second base last year.

Tomorrow the Voltmen open spring training at Dwenger Park, with another warm-up period scheduled for Sunday. They will open the season here Sunday afternoon, May 15, against Michigan City.

Ticket Sales Open

Today is the opening of all ticket sales. Booster tickets are $1 and enable employees to see the regularly scheduled games for 50 cents. The regular adult tickets are: grandstand, 74 cents; box seats, $1.25 per game.

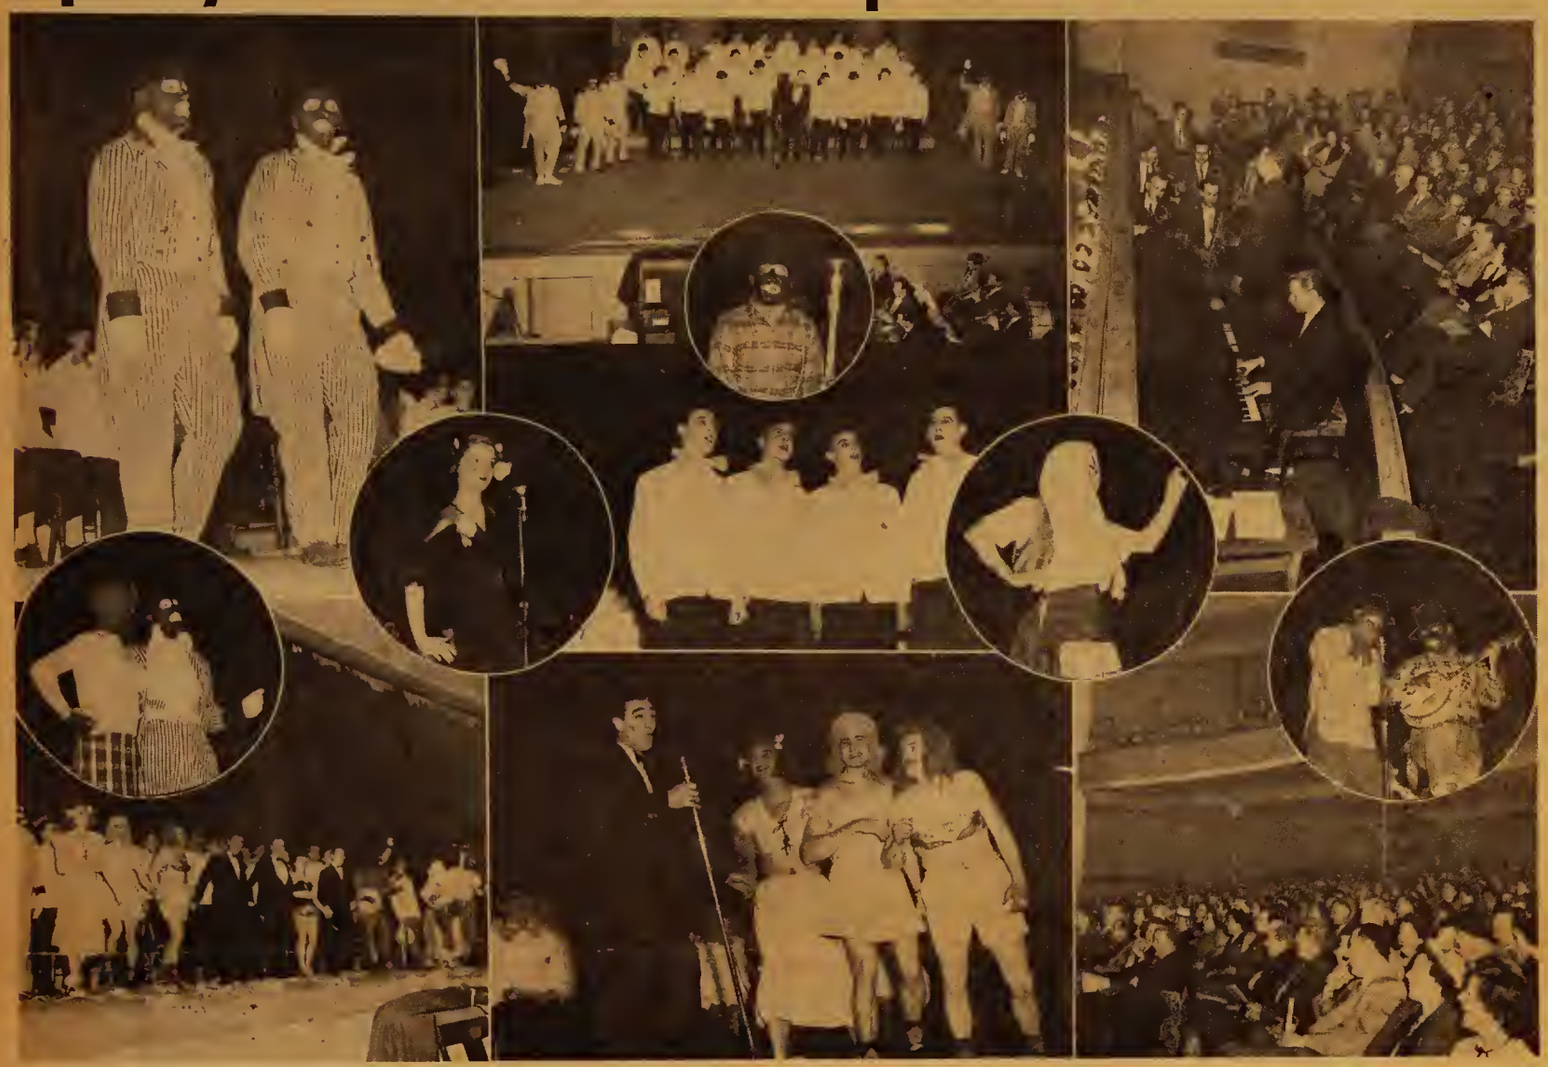
Booster tickets are available at the G-E Club bowling alleys and at the Taylor St. and Winter St. personnel offices.

The Voltmen roster at present includes:

Pitchers — Al Hazel, Charley Shipman, John Orphal, Hugh Orphan and Scott Cary; infielders—Olin Smith, Bill Hardy, Stan Shargey, Stan Miasek, John Dudick and Serg Schuster; outfielders—Don Runge and Paul Dyke.

G-E Ham League Calls New Practice Sessions

Because the Ham League has been rained out for their first two practice sessions, there will be another Tuesday, May 3, and Friday, May 6. Both sessions will be held at McMillen Park at 6 p.m. In case of rain the team will meet at the G-E Club gym.



Any ball player 35 or over is urged to attend, as there are several positions open. Send applications to Bill Schible, Bldg. 20-1.

Interdivision Softball Managers Are Invited To Attend Meeting

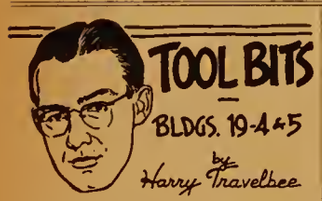
All managers of the Interdivision Softball League are requested to attend a meeting in the G-E Club lounge Monday, May 2, at 5:15 p.m. Anyone unable to attend is requested to send a team representative.

Capacity Crowd Attends Squares' Minstrel Show

A capacity crowd of 900 persons packed the Civic Theatre Wednesday night, April 20, to witness the Squares Club minstrel show, Plantation Capers. The two-hour madcap of minstrel melodies and mischievous merry-making kept the audience rolling in the aisles.

The WORKS NEWS photographer caught the scenes, above, during the hilarious and melodic extravaganza:

At the top, left, Rufus (Herb Eaton) and Rastus (George Hoopingarner), the Chocolate Songbirds, give their rendition of "Rufus Rastus Johnson Brown." In the center, top photo, the show opens with a rousing song of welcome by the chorus. "Johnnie" Johnson is the very distinguished and capable interlocutor. The endmen in the picture (l. to r.) are Dave Clugston, Bob Loveland, Herb Eaton, Dick Thomas and Glen Tobias. The chorus, under the direction of Glenn Seabold, includes Ralph Welsh, Don Spaulding, Forry Carlson, Fred Suhr, Ron Robinson, Tony Schneble, Frank Chayka, Hugh Folson, Bill Dripps, Frank Fleischer, Joe Jamieson, Bob Dent, Bill Hunt, Bob Drake, George Martin, Marion Halleck, Charles Brown, George Culp, Gail Rowley, Bob Altevogt, Paul Vance, Stan Antalis, Walt Hein, Andy Schevchuk, Chet Krasienko, Tom Greenman, Ted Hicks, Paul Shaefer and Joe Formanek. A musical shave is presented in the center photo, by the barbershop quartet featuring (l. to r.) George Culp, Paul Vance, Frank Fleischer and Glenn Seabold. In the upper right corner, starting at the top (l. to r.) are Lou Pooler, drums; Martin Heller, trombone; Bob Sharrow and Ernie Freegard, trumpet; Don Motter, Bob Schulte and Chet Smith, saxophone; Glenn Seabold, director, and Ted Ross, piano.



In the lower right corner, the entire company comes on stage for the last curtain call and well-deserved applause. In the center photo at the bottom, Joe Zasa and the Mop Sisters. (Frank Fleischer, Frank Chayka and Max Barrows) offer Buckets o'Jive. In the lower left corner, the crowd goes into hysterics as the endmen start their line of patter.

In the spotlight inserts (l. to r.): as his girl friend (Ray O'Keefe) watches lovingly, the Black Crow Crooner (Dick Thomas) sings "I Ain't Got Nobody;" Mickie Marcotte provides some scorching torch songs to bring the house down; Mert Edgar poses with his devils fiddle; Charlie Koomjohn dances to some exotic rhythms, and two "Lease-Breakers" (Walter Hein and Jim Townsend) go into some musical antics.

Frank Gamec was chairman of the show; Joe Zasa, director, and Frank Ondrovik, administrative chairman.

Ray Rogers, Ken Parks and Ray O'Keefe provided the properties, costumes and makeup; tickets, publicity and programs were handled by Bob Rowe, Bob Schulte and Bob Triplett.

An open house was held in the Squares Club rooms after the show. Cliff Leegard was in charge of arrangements. The cast also held a stag party last Wednesday night in the club rooms.

Have you noticed that the trains are running on schedule now since Carl Einsiedel is back on the job from his siege of the flu? . . . All the generous friends of Doc Kleemeyer are requested to hereafter boil all colored Easter eggs. Doc says he isn't too crazy about raw eggs, and besides it gets all over his vest. We wonder who could do a trick like that. . . . Hey, all you single girls, we have great news for you. That old famous Bachelor Club of tne Tool Room has been reduced to one surviving member, Leo Schlaudraff, since Dorwin Stanley and Arleen Reinke got hitched. . . . "Somebody moved it" was all Frank Hoffman could say after he kicked over a full bucket of Kemtone. . . . That loud noise at the west end of Bldg. 19-4 was Mart Walsh dropping his watch. . . . A week ago, Joe Mettler was the only one of our many Izaak Waltons to venture out in the cold. Our hats off to you, Joe, maybe we can send you to Alaska or somewhere. . . . Why is Lowell Welker always going home at noon to change clothes? Is he showing off his large wardrobe? . . . One of the lathe men received a free bath (almost, that is) at the Tool Crib drinking fountain last week. Those things are plenty tricky, aren't they, Carl? . . . Might as well get yourselves braced, fellows, cause the fishing season is here, and we might as well get ready for some tall tales. We hear John Roemer went fishing last Saturday, and, believe it or not, he admitted he didn't catch a thing; however, his trip was not in vain. He saw a 26-lb. pike that some other fellow caught on Otter Lake. At least there are some big ones around, eh, John? . . . Caviar is what Frank Druhot calls it, but we call it plain old St. Mary's river carp eggs. Frank claims it weighed over 16 lbs. 10 ozs. . . . We're trying to figure out for sure if the fellas' wives are getting stronger or if those bumps on the heads of Bob Truelove and Walter Greiner are really caused by domestic accidents such as falling trees, slipping stepladders or a cake of soap on the bathroom floor. . . . Anyone wishing to see a super lawn roller in operation, drive out to Waynedale and look up Ross Cohagan any afternoon after work or week-ends. . . . After an extended illness, William Jeffries is back on the job feeling fit as a fiddle. Best of luck, Bill. . . . No, not a safe cracker, just Earl Plummer. He forgot his keys to get in his tool box. Don't forget to bring all the tools back you borrowed from the boys, Earl. . . . Henry Wittber will probably be raising those large tomatoes again this year. Do you want a special basket or will a wheelbarrel be all right, Hank? If you want any information regarding cheese sandwiches see Al Nebur. . . . "Thar she flows," yelled Joe Hartman, Swede Moser, and George Hartman as they hit a rich vein of H2O. Swede says he doesn't mind drilling wells if George would feed him something besides bass and bluegills. . . . We are all looking forward to seeing that famous two wheel bike of Scott Click's that has been handed down through his family for generations. Must be a beauty with all that new chrome and paint to doll it up. We would like to see you ride it to work some day and really give us a show, but looks like we will have to wait till W&D's have their antique show, as Scotty is going to have it on display there.

Employment, Production Situation Reviewed

Oswalt Is Appointed To Succeed Gargett

W. F. Oswalt

J. H. Gargett

W. F. Oswalt has been appointed Manager of Manufacturing, Specialty Transformer and Ballast divisions. He succeeds J. H. Gargett, who retired this week after 42 years of service.

Mr. Oswalt was first employed by the Company in 1929, when he entered the Apprentice school. Upon his graduation as a toolmaker, he was assigned to Bldg. 26-3. He later transferred to Bldg. 19-2 to do time study engineering. In 1942 he became a methods planner in the Supercharger division. He was then appointed Supervisor of Planning at the Taylor St. plant.

In 1945 Mr. Oswalt was appointed Plant Superintendent of the Danville, Ill., plant, and the next year was named Plant Manager. He returned to Fort Wayne last year as Assistant Manager of Manufacturing in the Transformer and Ballast divisions.

Mr. Gargett began working for General Electric in 1906. He spent

(Continued on Page 4)

355 G-E Toasters Go On Sale Today

A shipment of 175 Class A and 180 Class E toasters has been received by the Fort Wayne Employees' stores for immediate sale. These do not include the number held for employees who have made reservations. All reservations will have been filled by closing time today.

Class A toasters sell for $14.85 and Class E toasters are $13.45, employees' prices.

G-E Is County's Largest Taxpayer

The General Electric Co. is Allen County's largest taxpayer by a wide margin, the County Treasurer's office has revealed.

The Company's 1949 tax bill on its local industrial plants and equipment in Allen County totaled $714,133.

The first half-year installment of this, the largest tax bill ever paid here by G-E, was presented last week when the Company remitted a check for $357,066.50 to Treasurer Sam Cook.

"Some conception of how heavily the General Electric Company contributes to operation of governmental functions here is gained when one observes that this one industry pays three-fourths of money for all the salaries included in the Fort Wayne Board of Public Safety budget, which includes salaries of all police officers, all firemen and all employees of the Police Signal Department," Mr. Cook stated.

"It pays almost twice as much as all the salaries in the Fort Wayne Board of Public Works and Fort Wayne Board of Public Health budgets," he added.

Works Manager Discusses Layoffs And Shutdowns

Product Managers Relate Present Trends To General Business Activity

Editor's Note: Though most of the following production and employment information is not encouraging, it is published in the interest of giving accurate and complete details on the current situation to substantiate or correct rumors which in too many cases are more disturbing than the actual facts.

"For the past several months, employment in all divisions of the Fort Wayne Works and branch plants has been very unstable and at present is at the lowest level since pre-war," according to C. H. Matson, Works Manager.

"Though there have been a few isolated and temporary instances of an upward trend, in general every activity has been unfavorably affected by a sloping off of the post-war demand for our products, resulting in numerous and in some cases heavy layoffs for lack of work," stated Mr. Matson. "The largest layoff took place this week when more than 700 persons were affected. In addition, arrangements have been made to close the Benton, Ill., Ballast Plant permanently, effective May 21. The Tiffin, O., Fractional Horsepower Motor Plant and the Danville, Ill., Ballast Plant will be closed for one week, effective May 9 and the DeKalb, Ill., Motor Plant will be closed for two weeks effective the same date."

Continuing his review of the current situation, the Works Manager revealed that the general layoffs and temporary interruption of production in the branch plants are directly due to cuts in production resulting from a continuing reduction in orders received for the Fort Wayne and branch plant products and the existence of large finished product inventories.

Referring to surveys recently made, he stated that "Preference for our products has kept our factories operating at a higher level than those of our competitors,"

Management Invites Foremen, Supervisors To Hear W. V. Merrihue

The Fort Wayne Management will be host to members of the G-E Foremen's Association and the Supervisors' Club for their semi-annual dinner, Wednesday, May 11, in the G-E Club auditorium.

W. V. Merrihue, Manager of Employee and Community Relations for the Apparatus Department, will be the speaker.

Invitations have been issued and members are urged to return the perforated stub today. The dinner will be served in two shifts, one at 5:30 p.m. and the second at 6 p.m.

Williams Tops List Of 116 Suggestors

Robert A. Williams, FHP Motor Division 15, led the list of 116 suggestors with a $115 award for his idea on low voltage winding. The awards amounted to a total of $1,487.50.

A $100 award went to W. H. Wiegmann, FHP Motor Div. 17, for his suggestion involving die casts. Roy F. Bracht, FHP Motor Div. 15, was next on the list with two awards, $50 and $25 for suggestions on coil assembly and winding. For his idea on salvaging castings, Raymond A. Pickett, FHP Motor Div. 17, received $35.

Awards amounting to $25 were made to the following: Walter Amacher, FHP Motor Div. 15; Charles H. Francies, FHP Motor Div. 16; Kenneth Gaunt, Decatur; Gertrude Kummerant and Gaylord P. Morris, Jr., Specialty Transformer Div. 93.

(Continued on page 4)

Robert A. Williams, Bldg. 4-5, is pictured above looking over the application of his $115 suggestion on changes in the method of winding. Looking at the suggestion are (l. to r.) Mr. Williams, Kathryn Gilbert, Ed Sonday, General Foreman; and Paul Hapner.

Quarter Century Club To Hold Annual Outing At Limberlost, Sept. 10

The Quarter Century Club will hold its annual outing Saturday, Sept. 10, at Camp Limberlost on Oliver Lake, it was announced today by Fred L. Schafenacker, president. The outing has been held at Camp Limberlost since 1946, when the group met there for the first time since before the war.

Volume 32 Friday, May 6, 1949 No. 18

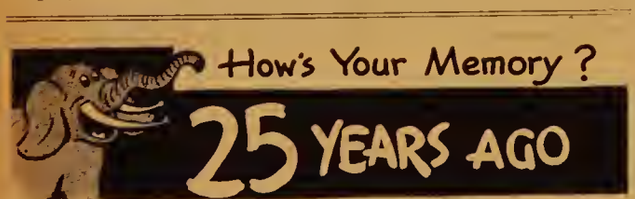
"All That I Am Or Hope To Be . . .

. . . I owe to my angel mother." So said Abraham Lincoln in one of the most memorable tributes ever paid any woman. And it is Mother, indeed, who deserves the praise, the thanks, the kindly tribute for all the tenderness, companionship and loving care she has showered on every son and daughter.

Just remember the times Mother has "come through" for you . . . when you were small enough to hide behind the bulwark of her skirts . . . when you first went to her for advice that showed the wisdom of her years . . . when she deprived herself of something to give you your heart's desire!

So remember Mother this year on her day, May 8, in some special way that says she's the best Mom in the world —that you're glad she's your Mother.

Remember her . . . it takes so little time—yet means so much.



YMCA Gears Its Program To Meet Needs Of Temporarily Unemployed

Gearing its program to meet the needs of the times, the Fort Wayne YMCA was busy this week reminding the citizens of the community that its recreational and social facilities are available to all young men who may be temporarily unemployed, regardless of their ability to purchase a membership.

David Cunningham, President of the organization, has stated: "Naturally, the YMCA has many services to render during boom times when business and industry are at their best, but these services become especially important when, as at the present, because of unfavorable business conditions or the making of adjustments in production schedules, young men are unemployed and subject to a natural physical and mental depression. The unemployed who take advantage of our recreational, leadership, social and guidance services during these times are better able to keep themselves fit to take advantage of re-employment opportunity and to face the problem of living."

Mr. Cunningham issued an invitation to all unemployed adults to visit the "Y" and take advantage of its facilities which are supported and maintained by local citizens, business and industry to meet just such emergencies.

The organization is currently conducting its annual drive to raise funds to meet operating expenses for the coming year. The total operating budget of the YMCA is $440,000 and 83% of its activities are self supporting. The goal of the present campaign is $75,000 which constitutes the cost of services rendered boys and young adults who because of circumstances cannot pay the full cost of those services. According to Mr. Cunningham, it is among the less fortunate young people that "Y" services are most needed. The Fort Wayne General Electric facilities annually contribute $1,750 to this work, in addition to contributions made by individual employees.

On Monday evening, May 19, a crowd of about a hundred young folks gathered for a supper in Building 16-2 immediately after work and organized what will be known in the future as the Alpha Phi Club. Through the efforts of Miss Kinna, a temporary committee was appointed to get the crowd together. The supper was served at 6 o'clock, followed by a short business session at which the following officers were named to lead the club until November, when new executives will be elected: Ray Kierspe, president; Hulda Burg, vice-president; Carrol Blincoe, secretary-treasurer, and Alma Olson, assistant secretary-treasurer. The entertainment committee of which Edna Sarazen is chairman, has the following personnel: Edna Welch, Ed Kammeyer and Karl Geller. The purpose of this organization is to promote social good times and wholesome recreation among the young folks in the Works. It is the only club of its kind for a young mixed crowd.

WHAT'S NEW IN GE PLANTS & LABS

A vibration meter, developed by the General Engineering and Consulting Laboratory, designed for use in laboratory, production line, and flight testing of gas turbines, is announced by the Special Products Division at Schenectady. The meter measures vibration displacement, velocity, and acceleration, and has a vibration frequency range, without filters, from 30 to 300 cycles a second. The equipment consists of from one to five vibration detectors, an amplifier with indicating instrument, and, when desired, a remote indicating instrument for panel mounting on the aircraft when flight testing.

New theories on how and why metals break, which have a bearing on a longer life for cut flowers and the height of giant California redwoods, were revealed at Schenectady by the Research Laboratory. Fracture of metals begins with extremely small crack—nuclei which grow into a large split when enough tension is applied. Bubbles, which break a water column, have a lot in common with cracks in metal. A column of fluid or a bar of metal will hold together if the tension of a pull is not great enough to make the nuclei (bubbles or cracks) grow into a break. An example of how much tension a fluid can stand without breaking is a California redwood which pulls a column of water in its trunk as high as 300 feet under a tension of about 130 pounds per square inch. When a flower is cut in the garden, a super-critical nucleus is introduced into the bottom of the stem, growing quickly into bubbles that block the stem's water columns. It becomes impossible for the flower to suck up water from a vase and the flower soon wilts. By cutting off the bubble-blocked portion of the stem under water in the vase, the column is restored and the flowers will live considerably longer.

SCIENCE QUESTION BOX

by SCIENTISTS OF THE G.E. RESEARCH LABORATORY

Q: The other day I heard a recording of my voice, as I took part in a conversation. It seemed very unnatural, even though others sounded as usual. Why is this?

A: It is a common experience that a person hearing for the first time a faithful reproduction of his own voice is unable to recognize it. Partly this is because one hears a great deal of the sound of his own voice by conduction through the bones of the head. Also, since his ears are behind and at right angles to his mouth, the quality of his voice, even as he hears it through the air, is different from the way it sounds to someone standing in front. One usually thinks his own voice is much more resonant and mellow than it actually is.

Q: What is meant by "squaring the circle" and why is it impossible?

A: This was a famous problem of the ancient Greeks. It was to draw a square having the same area as a given circle, using nothing beside the pencil but a compass and an unmarked straightedge. Though never solved, it was not until 1882 that it was proved impossible. The proof involves very advanced mathematical analysis, and the fact that "pi", the ratio between the diameter of a circle and its circumference, is what mathematicians call a "transcendental" number.

Meet the President

Employment

(Continued from page 1)

and observed that this would indicate that we continue to hold our fair share of the various markets which is important to future production and employment.

Sales Efforts Being Made

Mr. Matson reported that a determined effort is being made by all Fort Wayne G-E product lines to develop new customers.

Commercial divisions are daily canvassing all sources of business and the research and developmental sections are endeavoring to produce new lines to replace those for which the post-war demand has been filled.

The Managers of the Fort Wayne business divisions were interviewed in regard to current and future production and had the following comments to make:

M. E. LORD

Manager, Fractional Horsepower Motor Division

"Fractional Horsepower Motors are sold primarily to machinery and appliance manufacturers who install the motors on their equipment for sale to the ultimate user. Because of this, the Fractional Horsepower Motor divisions are affected business-wise by most of the industrial activity in the country, since these motors are used to some degree in every phase of our economic life.

"Post-war expansion over pre-war levels of all industries using Fractional Horsepower Motors to meet the abnormally high post-war demand necessitated abnormally high production and employment in our business which reached its peak in 1948. As sales of the equipment manufactured by these industries on whom we depend for our business fell off, accumulated inventories of completed equipment plus parts in process, including motors as a major item had to be reduced. As a consequence, instead of dropping down to a lower adjusted level consistent with general business activity, requirements for Fractional Horsepower Motors have dropped below that level and will not return until our customers have reduced their inventories of equipment and motors.

"Activity has improved in the oil burner industry and some of the other industries which were cut earlier. Customers who have been out of the market for nine months to a year are again purchasing our motors, but in making their purchases in a buyers market are looking for price, short delivery service, good workmanship and high degree of quality in the product they buy. We expect to supply all of these and if general business conditions do not become worse, our business should improve month by month."

W. C. WICHMAN

Manager, Specialty Transformer and Ballast Divisions

"Specialty Transformers and Ballasts are essentially components of end-product equipment such as oil and gas fired heating equipment, fluorescent lighting, control units for machine tools and printing presses, etc. Our business depends on the requirements and sales of many diversified and in some cases specialized end-products.

"Due to the starving of many of the end-product equipment markets during the war, the post-war demand was abnormally high and in excess of any previous in history. It was only with difficulty that through our expanded facilities we were able to satisfy the demands of our customers and hold our share of the very competitive markets.

"Except for an adjustment a year ago, a high level of demand has continued almost without interruption until very recently. During the first quarter of this year, orders were approximately at the same level as for the last quarter of last year. In April, however, business fell off badly. At present, orders appear to be at lower levels than customer sales of end-products. This indicates that customers are reducing inventories of components and finished products held in stock. Although our business continues at levels well in excess of pre-war, it has been necessary to curtail output to more nearly the pattern of incoming orders.

"At best, the future business outlook is uncertain, though there are some optimistic factors which suggest a better future if general business conditions remain good."

J. M. CRAWFORD

Manager, Large Motor and Generator Divisions

"Orders received have remained reasonably consistent, but at a level lower than current output. The orders are above pre-war levels and previous forecasts for the year to date.

"In addition to our own business, this division has been helping another division at a time when they could not manufacture their total requirements. That program will be completed by June and will result in a corresponding reduction of our personnel."

* * *

In regard to the Works Service and Contributing Divisions, Mr. Matson stated, "These divisions in addition to maintaining the various Fort Wayne and branch plant facilities used by the business divisions also provide various services and component parts and materials essential to the product lines. These include wire manufacture and insulations; tool manufacture and maintenance; all general plant services; personnel services, including employment; all production services, such as receiving, shipping, transportation and general stores, and technical services, including Works Laboratory. Of necessity, the work in these divisions fluctuates with the demands of the product lines. Any reduction in orders received by those businesses necessitating cuts in production and employment is directly reflected in the employment of the service divisions.

"Demands for magnet wire used by the product lines are at an extremely low point which has forced a virtual shutdown of the wire mill. Some new outside business has been secured, but this only permits operation of the mill at a small percentage of capacity. Curtailed use of works and branch plant facilities by the business divisions has resulted in a lower demand for maintenance personnel and employment cuts have been made necessary. Current level of employment in all divisions remains above pre-war levels, but considerably below post-war peaks. Increased activity in the product lines would immediately favorably influence employment in the Works Service Divisions.

"It is to be hoped in the interest of those now currently employed and those employees off for lack of work, but awaiting recall, that activity in those businesses and industries which all of the Fort Wayne Works Service and business divisions serve will increase sufficiently in the coming months to make jobs now available more secure and warrant re-employment of our temporarily released employees."

Zimmerman Is Honored On 45th Anniversary

Harry Zimmerman, G-E Club Steward, ended 45 years of service wtih General Electric Friday, April 29. At that time he received a certificate denoting his long time service. At the presentation were (l. to r.) I. H. Freeman, Supervisor of Personnel; Dick Kent, G-E Club secretary; Charles Wilt, Club president and manager; C. H. Matson, Works Manager; Mr. Zimmerman; Eva Tucker, director; George Waldschmidt, G-E Club treasurer; Carl Reynolds, first vice president, and Claude Holmes, director.

Harry Zimmerman, G-E Club Steward, celebrated his 45th anniversary with General Electric, Friday, April 29. He began working here in 1902 when he was 15 years old. His first job was in the fan motor division, but he left two years later to fulfill an ambition to be a railroader.

His railroading career was shortlived, however. After one trip, he reported back to G-E for his old job. He was then assigned to the meter assembly line, and later transferred to the relay division. From 1920 until 1934 he was in charge of relay assembly. He achieved the Company's highest honor, the Coffin Award, in 1929. The award was made "in recognition of his unusual initiative, originality and skill in designing relays."

The division moved to the Philadelphia Works in 1934, and Harry accompanied the group there. When asked to remain there, he refused because he was "too good a Hoosier" to leave Indiana. Mr. Zimmerman returned to the local plant to work in the meter division and later for Plant Protection. Between 1937 and 1943, he was manager of the Works Cafeteria, and since the latter date has been the G-E Club Steward.

Harry has been active in the Volunteer Fire Department, and at one time was Assistant Chief. He is still treasurer of this organization. He also has been aetive in G-E Club aetivities. He was elected its first vice-president, when the club was organized in 1927. In addition he was a G-E Securities Corp. bond direetor for Fort Wayne in 1929 and 1930, and has just finished a trusteeship with the Quarter Century Club.

Fred J. Hey Dies

Fred J. Hey, 55, died about noon Sunday, May 1, at a local hospital where he had been a patient for the past eight years.

He was employed by the General Electric in 1916 as an insulator. At the time he left the Company in 1931 due to illness, he worked in the Wire and Insulation Div.

Retires After 42 Years' Service

J. H. Gargett, Manager of Manufacturing, Specialty Transformer and Ballast divisions, left Friday for retirement May 1 after 42 years of service with the Company. At that time he received a sickle-bar for his garden tractor from his friends in the divisions. Left to right are N. J. Sordelet, Willard Lenz, Glenn Hobbs, P. M. Staehle, D. B. Poland, C. K. Bowman, L. M. Garman, L. N. Sordelet, C. P. Mentzer, Mr. Gargett, E. A. Bangert, W. W. Dreyer, F. N. Banks, F. T. Gamec, E. J. Schurenberg, W. F. Oswalt, T. H. Gugler, and L. H. Driftmeyer.

Birthday greetings of the week go to Alice Dahman and Thomas Blackwell. . . . We understand that Thomas Blackwell will soon be a member of the Fire Department. His rating will be that of a "Starter, first class." . . . Audrey Tierney was disappointed that nobody noticed her hair cut. . . . Wedding bells rang for Doris Berg to Edwin Brager last Saturday. Best wishes, Doris. . . . If anybody wants any plastering done, see Francis Gerardot. He has the new kind of "quick setting" plaster. . . . All of you had better prepare yourselves for the fish stories. We hear several of the fellows from the office went fishing last Saturday. . . . We are trying to figure out if Harold Struver is actually Scotch. He returned three cups of ice cream until he found a full one. . . . We welcome Fred Moody to Bldg. 4-5. Fred is a test engineer. . . . Willard Ropa was back to pay us a visit. Welcome back anytime, Willard, we were glad to see you. . . . We wish to express our sympathy to Helen Bell in the death of her grandfather.

Williams Tops

(Continued from page 1)

Those receiving awards ranging in various amounts from $5 to $20 are listed below:

FHP Motor Div. 1: Henry D. Grepke.

FHP Motor Div. 13: Gwendolyn J. Buzby.

FHP Motor Div. 14: Lottie McFarland, Stella M. Strong, John D. Anspach (two awards), and Willie E. Roby.

FHP Motor Div. 15: Walter Amacher (four awards), Paul R. Castle, Gilbert P. Auth, Neil W. Anderson, Milton E. Roller (two awards), Fred F. Bailey, Forrest R. Allman, William W. Ort, Wilbur E. Tibbitts, John H. Holloway, Lynn L. Crawford, Earl W. Souers, Thyral L. Neu, M. S. Pettit, William B. Widdifield, and Kathryn Gilbert.

FHP Motor Div. 16: Herbert Bender, Walter H. Buesking, Junior L. Wappes, Edward Bienz, George Ross, Clifford Dowden, Charles H. Francies, William J. Miller, and Gerald R. Wert.

FHP Motor Div. 17: Russell L. Poorman (two awards), Enno H. Richter, Harry L. Babcock, Joseph S. Eifrid, John T. Repine, Arthur E. Smethers, Edward P. Saxton, Herb D. Fuhrman, Maurice Roe, Walter J. Koehlinger, Gustave H. Berghoff, Ruth J. Leverton, Ralph J. Begue (three awards), and John Terry.

FHP Motor Div. 33: George H. Miller.

Decatur: Harold Keller, Charles Cloud, F. Tumbleson, Harold Rhynard, and Lloyd A. Myers.

Tiffin: Paul Raitz, Richard Runion, H. E. Coffman, Hillis H. Askam, William G. Clark, and Walter R. Lonsway.

DeKalb: W. A. Gibson, Robert Ferris, Wayne Rewerts, Clifford V. Smith, and Francis Sibley.

Specialty Transformer Div. 91: Arnold Creed, George W. Jones, C. R. Hoover, Rosella M. McKinney, Charles F. Holtsclaw, Donald Ford, Charles Druce, Thomas S. Salmon, Harry C. Ribel, Charles R. Mercer, and Lorin E. Prince.

Specialty Transformer Div. 93: Donald R. Shepherd, Floyd D. Chilcote, Eugene A. Scherer, Frank F. Schultz, Margaret Pelkey, Virgil B. Buchanan, L. W. Schuster, Robert Hower, Frank F. Schultz, Jr., Peter J. Eberhardt, and Russell L. Armstrong.

Danville: Robert Taylor, Dan Parker, Ambrose A. Frazier, Simeon Edwards, Robert Bush, and Owen E. Bedard.

Motor and Generator: Ralph V. Rockhill, William F. Behm, Harold R. Blust, Delphus Morrical, Calvin W. Marhenke, and Clifton J. Mugg.

Wire and Insulation: Lynn A. Wilson, Carl M. Junk, Clarence E. Coulter, and Russell L. Flaugh.

Tool Div.: Guy E. Wagoner, E. T. Ueber, Erwin F. Wiebke, Nolan Lowden, and James P. McFeely.

Miscellaneous: Frederick Bishop and Doyle C. Huffman.

Two Men From Bldg. 27 Retire

Frank Fordham and Louis Koop, both of Bldg. 27, left Friday for retirement. Mr. Fordham was presented some fishing equipment and Mr. Koop was given a ring by their co-workers in Motor and Generator. Mr. Fordham is shown receiving his tackle from H. L. Stevenson, with Mr. Koop at the right.

Appointed

(Continued from page 1)

most of his service in the Transformer division. He has held the positions: head of Cost, Superintendent of the Transformer divisions, Assistant to the Works Manager, and Manager of Manufacturing, Specialty Transformer and Ballast divisions.

Pensioners

(Continued from page 1)

tificate to George Waldschmidt, Bldg. 8-2.

Under the present plan, persons now going on pension receive a small card in place of a certificate. These cards are particularly useful for identification purposes when pensioners visit a G-E plant.

Here we are all back on that good old daylight saving time—that is all of us except some of the clocks out here in the factory. It seems as though there was quite a bit of confusion last Monday as some of the people were still working when the whistle blew as they thought they still had another hour to go. Best they get those clocks fixed quick because many days like that and we'll all be nervous wrecks. . . . Ed Brockhall must feel pretty bad since the fishing season on bass ended last week, because now Ed can't have his picture in the newspaper for catching those big fellows. Just to try and keep him from being too unhappy, we'll let his name appear in our NEWS. Then he won't get out of the habit of reading about himself. . . . Anyone wanting to order some fresh vegetables should contact Oral Emrick, as we hear that he really has a fine garden. Hm-m-m wonder if he planted the seeds with his rifle? . . . Dale Ross says this may be a little early, but she wants all her customers to know that she won't forget to bring their "poppies" in this year on Poppy Day. It seems that she sold out last year and her old customers had to buy them elsewhere. . . . Ed Donaghy says it seemed good to see Clyde Helms work up a sweat for a change. The story goes that Clyde was out and did a little garden work for Ed with Ed's roto-tiller. Better watch that stuff, Clyde. . . . Hillard Moore had a little trouble getting his boat in the lake last Saturday. First he got his car stuck and was tied up for three hours trying to get that unstuck, and then it was too late to do much fishing. Better luck next time, Buck. . . . Eddie Bandt attended the wedding of his niece, Helen Horstmeyer, last Saturday.

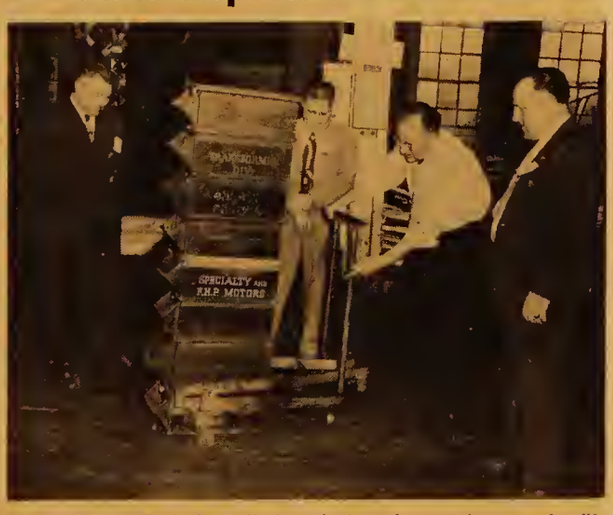
Larimore Dies

Walter G. Larimore, 48, 438 Maxine Dr., died at 3:25 p.m. Saturday, April 30, at the Methodist hospital.

He began working for General Electric in 1920 as an inspector, and has held various production jobs since that time. When he left for illness in 1948, Mr. Larimore was a production order clerk at Taylor St.

He was a member of the Quarter Century Club, and St. Paul's Lutheran Church.

"Doggie" Murray hit the jack pot last Friday night when he was presented with his farewell gift of just ever so many silver dollars. Good luck, Doggie, and don't forget your old friends here at the plant. . . . We were sorry to learn of Arnold Wuebbenhorst's automobile accident and hope by this time he is much improved. . . . Lee Miller starts his three weeks' vacation Monday, lucky guy, and from there on it will be a life of ease for him. Lee is retiring this month and we do wish him the very best of everything. . . . Can you imagine Bob Hatfield having the audacity to ask "Old Man" Helmer to walk over the ramp instead of just crossing the street, so Bob wouldn't have to buy a posie last Friday? However, he does have his moments though, like asking Schible to bend a couple of stainless steel bars for him to use as a hamburger grill. He is giving this to his wife as a gift on their silver wedding anniversary, which they are celebrating today, Congratulations, Bob. . . . Has anyone heard the new horn in Bldg. 20-1 office? Howard Moore wasn't too keen about it at first but has decided it isn't quite as bad as it sounds, after you get used to it, that is. . . . Harry Nickels is now on the second trick, folks, in case you hadn't noticed. . . . Happy birthday to John Lare and Dick Gallmeier.



Elex Partizan Chapter Plans Meeting May 17

The Partizan chapter of Elex will hold a meeting Tuesday, May 17, at 1:30 p.m. in St. Paul's hall, corner of Barr and Madison.

Faye Voss will be chairman of the meeting, assisted by Mildred VanHorn and Martha Wedler. There will be a social hour following the business session.

You hear a good many echoes in the world, but mighty few real voices.

State Inspectors Tour Plants

Hersehel Smith, Works Safety Engineer, is shown demonstrating a tote box lifter to the state inspectors. Above (l. to r.) are Floyd Futrell, George Bubel, Mr. Smith and George W. Curtis.

A group of factory and building inspection personnel of the Indiana Division of Labor toured the Broadway and Taylor St. plants this week. Two other groups will come here later as a part of a plant visitation-orientation program being conducted in seven Indiana industries for new inspectors.

Meritorious Safety Certificates Are Presented To FHP Divisions
